

THE GREAT ENCYCLOPÆDIA OF UNIVERSAL KNOWLEDGE

*With 1,100 illustrations
and a 22-page Supplement of Famous Characters
in Drama and Fiction*

ODHAMS PRESS LIMITED
LONG ACRE, LONDON, W.C.2

PREFACE

FOR more thousands of years than we can accurately estimate mankind has been in search of knowledge. At first tentatively and to-day more surely, man has sought knowledge which would arm him against the terrors and dangers of the powers of darkness, which would clothe him against his nakedness and feed him against his hunger. Early in his long story, however—"ere the first star shivered"—the wonders of nature, the mystery of life and the universe his imagination. How long can it be since he first contemplated the stars in their courses, the tides of the seas, the eternal miracle of day and night? How long since the first realisation that knowledge and wisdom and truth are among the priceless eternal possessions of men? Down the pathway of the unending years, through the recognition of the things about him, through thought and emotion, through the worship of unknown gods, man started on his long, long journey in search of knowledge and truth. History cannot teach us, nor legend recall, from what dim recesses of time spring the ultimate source and desire of all our knowledge.

This encyclopædia, in which in brief form is recorded the knowledge of mankind, is a milestone marking yet another stage in history. Here for all to read, will be found the lives of men and of women, the accumulated wisdom of the centuries, the story of religion, of science, of art and of literature, descriptions and illustrations of the teeming life of the earth to-day, of birds, beasts and fishes, of trees, plants and flowers, and descriptions and illustrations of the strange and terrible forms of life that have gone and whose memory is embodied to-day in nothing more than a fossil. Here are the primitive ancestors of man, his primitive weapons, and the primitive instruments he used, and here are all the wonderful inventions and discoveries of modern times that have made life what it is to-day, that have given cures for our illnesses, the fruits of all the earth for our table and the comforts of science for our leisure.

Sometimes with pride, sometimes with misgiving, but always

with humility, we shall read the immensity of the story, the untold ages that have gone, the magnificent courage with which mankind has faced the unknown, the little ambitions and jealousies which have been provoked, the revolting cruelties of some in their search of immediate personal and material ends, and the undying glory of others in their self-sacrifice. We shall read again of the terrible and strange forms of animals that have lived and died, of the empires that have risen and fallen, of the men and women who have gone before, of failures and successes all coming and going like the rising and the setting of the sun, while life itself pursues its unalterable course.

No effort has been spared in the collection of this information. No research has been neglected. In times when the world is changing so quickly before our eyes, when new happenings, new inventions and new discoveries follow so hard on the heels of the old, it has been no easy task. But no last search has been omitted as each section has been recorded to make sure that the events of to-day are covered equally with the history of two thousand years ago.

Here then is "The Great Encyclopædia of Universal Knowledge"—the wisdom of the centuries, the product of years of labour and thought and research by a host of experts, for your profit, your benefit, and your enjoyment.

THE EDITOR.

1922

A

Aachen (formerly **Aix-la-Chapelle**), in Rhenish Prussia, one of the oldest cities in Germany, made capital of the German empire by Charlemagne; derives its name from its mineral springs; is a centre of manufacturing industries and an important trade; is celebrated for its octagonal cathedral (in the middle of which is a stone marking the burial-place of Charlemagne), for treaties of peace in 1668 and 1748, and for a European congress in 1818. Pop. 155,000.

Aalborg, a trading town on the Limfjord, in the N. of Jutland, Denmark. Pop. 48,000.

Aalesund, a seaport of Norway, in the Møre fylke (county), standing on three islands; one of the chief centres of the fishing industry. It was destroyed by fire in 1904. Pop. 14,000.

Aar (or **Aare**), the largest river of Switzerland, a tributary of the Rhine, 180 m. long, rising in the Aar Glacier in the Canton of Berne.

Aarau, capital of the Swiss canton of Aargau; manufactures silk, cotton, etc. Here the Helvetic Republic was proclaimed in 1798. Pop. 12,000.

Aardvark, the name, meaning earth-pig, given by the early Dutch settlers in S. Africa to an animal resembling the ant-eater, characterised by

AARDVARK

large, pointed ears, long snout and tongue, long, powerful tail and short legs. It is a burrowing animal, living chiefly on ants, and its toes are modified for digging.

Aardwolf, or **Maned Jackal**, a small animal resembling a hyæna, found throughout Africa; 3 ft. long; coat yellow, striped with black; burrows like a fox and feeds on carrion and termites.

Aargau (**Argovie**), a fertile Swiss canton bounded on the N. by the Rhine (Germany opposite), through which the R. Aar flows. Cap. Aarau. Pop. 260,000.

Aarhus, a seaport and trading town, second city of Denmark, standing on Aarhus Bay, on E. of Jutland; has considerable export and import trade, a fine old Gothic cathedral and a University; capital of a county of the same name. Pop. 90,898.

Aaron, the elder brother of Moses, and the first high-priest of the Jews, an office he held for forty years; with Moses, led the Israelites out of Egypt; at Mt. Sinai supported the hands of Moses whereby victory over the Amalekites was secured. While Moses was on the mount, he countenanced idolatry and the making of a golden image, but repented.

Aaron's Beard, the popular name of *Hypericum calycinum* (St. John's Wort or Rose of Sharon), a plant of the Guttiferæ order, bearing large yellow flowers 3-4 in. across; often used in rock-gardens and for covering dry banks.

Aaron's Rod, a popular name for *Verbasum thapsus*, a yellow-flowered species of Mullein.

Abacus, in architecture, a tablet crowning a column and its capital. Also a calculating apparatus, consisting of a grooved board containing pebbles or a wire frame on which beads are strung, used by the

ancient Greeks, Romans, Egyptians, Mexicans, and some primitive modern people.

Abaddon, the Hebrew name of the "angel of the bottomless pit," king of the swarm of locusts which, according to Rev. ix, shall torment those who "have not the seal of God in their foreheads." Greek name Apollyon.

Abalone, the name of several species of limpet-like molluscs of the Haliotidæ family, also known as "ear-shells" and "ormers." They are found in most parts of the world except S. America. One species (*H. tuberculata*) is common round the Channel Islands and N. of France, and is an article of food there. Other edible species are equally common in China, Japan, New Zealand, etc. Mother of pearl is obtained from the shells of some species.

Abandonment, in law, the relinquishing of an interest or claim. In marine insurance, if the assured abandons to the assurers (or insurers) his right to what is saved out of a wreck, he is entitled, if anything insured has, by some of the usual perils of the sea, become practically valueless, to call upon the assurers to pay the full amount of the insurance, as if it were a case of total loss.

The surrender of his property by a debtor for the benefit of his creditors is also an illustration of the legal use of the term. Things found must not necessarily be assumed to have been abandoned, unless all the circumstances indicate that the owner intended to part with the thing; and to appropriate things found, where the owner could on inquiry be identified, renders the finder liable to be charged with larceny.

Abano Bagni, a village 6 m. from name Aponus. Famous for its baths. It was the birthplace of the Italian astrologer Pietro d'Abano. Pop. 4,500.

Abarbanel (or **Abraham**), Isaac Ben Jehuda, Portuguese scholar and statesman claiming descent from royal house of Judah; born in Lisbon; treasurer to Alfonso V., on whose death he fled to Spain; minister of state to Ferdinand and Isabella 1484 till Jews banished 1492. Went afterwards to Naples, Corfu, and Monopoli. Minister of state at Venice 1503-1508. Interpreter of Hebrew scripture. (1437-1508).

Abarim, a mountain range in Transjordan, the highest point being Mt. Nebo (2848 ft.), from which, at "the top of Pisgah," Moses first saw the Promised Land and where he died. (Deut. xxxiv. 1 and 5.)

Abatement. In law, a "plea in abatement" was one which showed some reason for abating or quashing the plaintiff's statement of claim on the ground that it was improperly framed, e.g., the misnomer of a defendant. Such pleas have now been abolished, and the defendant must himself correct the misnomer. Also used in the literal sense to destroy or abate a nuisance. In heraldry, it indicates a mark or blot on the escutcheon for some stain, as e.g. bastardy, in the wearer.

Abati (or **Abbato**), **Niccolò dell'**, Italian fresco-painter, born at Modena. Influenced by Correggio. His "Martyrdom of St. Peter and St. Paul," painted for the Benedictine church at Modena, is in the Dresden gallery. After painting in his native city and at Bologna, he removed to France

ABATTOIR

c. 1552, and worked under Primaticcio in the palace of Fontainebleau. (1512-1571).

Abattoir, or **Slaughter-house**. The word is more usually applied to a public slaughter-house which by law is under the control of the local government authorities. Bye-laws provide for their proper control; private slaughter-houses must also be conducted conformably with these bye-laws, under annual licence from the local authority. The largest in the world are in Chicago.

Abauzit, **Firmin**, a French Protestant theologian and mathematician; a friend of Newton and supporter of his theories, and esteemed for his learning by Rousseau and Voltaire. (1679-1767).

Abbas, uncle of Mohammed, calliph of Bagdad and founder of the dynasty of the Abbasides (q.v.). (566-652).

Abbas **The Great**, Shah of Persia, of the dynasty of the Sophis, great conqueror, reformer and administrator. (1557-1628).

Abbas Hilmy, or **Abbas II.**, last eldest son of Tewfik Pasha, whom he succeeded 1892. Quarrelled with British authorities in Egypt until the Sudan was recovered by Kitchener. Visited England 1899; but in Great War took side of Central Powers. Deposed 1914; retired to Vienna, where he had been educated; died there. (1874-1923).

Abbasides, a dynasty of 37 caliphs who ruled as such at Bagdad from 750 to 1258, when the Tartars burned Bagdad. Luxury and the arts were fostered under this dynasty, the most famous member of which was Haroun al-Raschid.

Abbas-Mirza, a Persian prince, a reformer of the Persian army and a leader of it, unsuccessfully, however, against Russia. (1783-1833).

Abdess, a dignitary in the Roman Catholic Church, the superior of a nunnery. She fulfils the same functions in the nunnery as the abbot in a monastery. She may not preach, however, or receive confession. Elected by the nuns, the appointment of an abbess is confirmed by the bishop.

Abbeville, a thriving old town on the Somme, 12 m. up, with an interesting house architecture and a cathedral, unfinished, in the Flamboyant style. Used as a British base in the Great War. Pop. 21,000.

Abbey, a church institution forming the dwelling-place of a community of monks or nuns. It usually comprises a

church, chapter-house, refectory, cloisters, dormitories, guest-room, almonry, hospital, library and other buildings. Among the principal British abbeys are those at Westminster, Canterbury, Durham, Fountains, Holyrood and Buckfastleigh. Buckfast Abbey has been rebuilt in recent years by a community of Benedictine monks near the ruins of an old Cistercian abbey.

Abbey, **Edwin Austin**, famous American painter, born in Philadelphia; sent to England, 1878, by Harper Brothers to make studies for illustrations of Herrick's poems. Also illustrated Shakespeare. Painted panels, "The Quest of the Holy Grail," for Boston Public Library, 1891-1902. A.R.A. 1896; R.A. 1898; painted official picture, "Coronation of Edward VII." Brilliant colorist. Died in London. (1852-1911).

BUCKFAST ABBEY

ABDOMEN

Abbot, head of a monastery or abbey. Usually elected for life by the monks and confirmed in office by the Pope or the Bishop of the diocese. There were two classes of abbots: Abbots Regular, as being such in fact, and Abbots Commendatory, as guardians and drawing the revenues.

Abbot, **George**, Archbishop of Canterbury in the reigns of James I. and Charles I., Vico-chancellor of Oxford University and one of the translators of King James's Bible. In conflict with Laud on theological questions and suspended by Charles for opposing Dr. Sibthorp on non-resistance to royal demands. (1562-1633).

Abbotsford, the residence of Sir Walter Scott near Melrose, on the Tweed, built by him in 1811 on the site of a farm called Cartleyhole.

Abbot's Langley, England, believed to be the birthplace of Nicholas Break-spear, Pope Adrian IV. Pop. 5,553.

Abbott, **Rev. Edwin Abbott**, English clergyman, schoolmaster, and author. Wrote chiefly on scholastic and theological subjects. Most important work was his *Shakespearean Grammar* (1870); other works include *Bacon and Essex*, *Francis Bacon*, *The Anglican Career of Cardinal Newman*. (1838-1926).

Abbott, **Lyman**, American Congrega-tionalist minister and editor. Pastor at Terre Haute, Ind., 1860; at New England Church, New York, 1865-1889. Afterwards editor of *Harper's Magazine*. Edited *Illustrated Christian Weekly*, and with Henry Ward Beecher, *Christian Union*, afterwards *Outlook*. Pastor of Plymouth Church, Brooklyn, 1888-1889. (1835-1922).

Abd-el-Kader, Arab emir of Mascara and bitter opponent of the French conquest of Algeria; waged war for 15 years, but surrendered to the French in 1847. Released in 1859, he became a faithful friend of France. (1807-1883).

Abdel-Krim, leader of the Riff rebels in Morocco against the French and Spanish. Served Spain during the Great War, but turned against them, and in 1921 nearly annihilated a Spanish army of 20,000 men near Melilla. Came in conflict with the French also with some successes, but in 1926 surrendered at Fez and was exiled to the Mascarene Is.

Abd-el-Rahman, Moorish Governor of Spain who invaded Gaul at the head of a great Mohammedan army, but was defeated and slain by Charles Martel at Tours in 732.

Abdera, a town in ancient Thrace, the birthplace of Democritus and a town, but nevertheless proverbial for the stupidity of its inhabitants.

Abdications: the most celebrated are those of the Roman Dictator Sulla in 79 B.C.; Diocletian in A.D. 305; Charles V. in 1556; Christina of Sweden in 1654; Napoleon in 1814 and 1815; Charles X. in 1830; Louis Philippe in 1848; Ferdinand of Austria in 1848; Isabella II. of Spain in 1870; Amadeus I. of Spain in 1873; Milan of Servia in 1889; Pedro II. of Brazil in 1889; Hamid II. of Turkey in 1909; Manoel of Portugal in 1910; Puyi of China in 1912; Nicholas II. of Russia in 1917; Ferdinand of Bulgaria in 1918; Wilhelm II. of Germany in 1918; Karl of Austria in 1918; Constantine of Greece in 1922; Muhammad VI. of Turkey in 1922; George II. of Greece in 1924, restored to the throne in 1936; Amanullah of Afghanistan in 1929; Prajadhipok of Siam, 1934; and Edward VIII. of England, December, 1936.

Abdomen, the lower part of the trunk of the body, resting on the bones of the pelvis and separated from the

ABDUCTION

thorax by the diaphragm. The membrane which lines the wall of the abdominal cavity is called the peritoneum. The upper part of the abdomen contains the stomach, in front of which is the liver, and behind, the spleen, pancreas, and kidneys and, below, the intestines.

Abduction (in law) means the act of taking away a woman against her will, using as a means either force or deceit. The abduction of women and the stealing of children under 14 are accounted felonies and punishable with penal servitude. The abduction and seducing of a girl under 18, however, is reckoned a misdemeanour and punishable with 2 years' imprisonment, or less.

Abdul-Aziz, Sultan of Turkey from 1861 in succession to his brother Abdul-Medjid. Extravagance and misgovernment led to revolts and he was deposed, dying 4 days later. (1830-1876).

Abdul-Hamid II., Sultan of Turkey, brother to Abdul-Aziz, and his successor, referred to as Abdul "the Damned" and the "Great Assassin." Under him Turkey suffered serious dismemberment. Christian subjects in Armenia and Crete were massacred with savage atrocity and revolts suppressed with the greatest cruelty. He was himself deposed by the Young Turks in 1909 and parliamentary government, which he had proclaimed and suspended, was established. (1842-1918).

Abdul-Medjid, Sultan of Turkey, succeeded his father Mahmud II. in 1839, shortly after the Turkish defeat at the hands of Egypt. Carried out a number of reforms in the army and public affairs. In support of him against Russia, England and France undertook the Crimean War. (1823-1861).

Abd-ur-Rahman, Sultan of Fez and Morocco 1823-1859. Abandoned levying of tribute for protection from Moorish pirates; spent first 4 years of his reign putting down insurrections. As ally of Abd-el-Kader, he was defeated by Bugeaud at Isly, 1844, and made peace with the French. (1778-1859).

Abecedarians, a name formed from the alphabet and given to a sect of Anabaptists in Germany. They maintained that the Scriptures could be communicated direct from God, and consequently they did not learn to read.

A'Beckett, Gilbert Abbott, an English humorist, contributor to *Punch* and other organs; wrote the *Comic Blackstone* and comic histories of England and Rome. (1811-1856).

Abednego, the Babylonian name of Azariah, Daniel's companion, who with Shadrach and Meshach was cast into the fiery furnace by Nebuchadnezzar and miraculously saved. (Dan. iii.).

Abel, the second son of Adam and Eve; slain by his brother Cain out of jealousy because his sacrifice proved more acceptable to God.

Abel, Sir Frederick Augustus, with Professor James Dewar joint inventor of cordite; a famous authority on explosives; chemist to War Dept., first director of Imperial Institute. (1827-1902).

Abelard, Peter, a theologian and scholastic philosopher of French birth, renowned for his dialectic ability, his learning, his passion for Héloïse, and his misfortunes; made conceivably the best of credibility, and was a great teacher in his day. (1079-1142).

Abefe, the English white poplar tree, (*Populus alba*) (q.v.).

Abencerrages, a powerful Moorish tribe in Grenada, whose fate in the 15th century has been the subject of interesting romance.

ABERDEENSHIRE

Abeokuta, a town in S. Nigeria, capital of Abeokuta province, founded in 1825 by inhabitants of a number of villages as protection from slave-raiders. It is surrounded by a mud wall, and the houses are built for the most part of mud. Area of the prov. 4,266 sq. m. Pop. (town) 53,300; (prov.) 434,526.

Aberavon, a town and seaport in Glamorganshire, Wales, with copper and iron works, for some years the Parliamentary seat of Ramsay MacDonald. The rise of Port Talbot as an industrial centre has led to its decline. Pop. 16,400.

Abercarn, a town in Monmouthshire, England, with collieries, smelting and chemical industries. Pop. 20,554.

Abercorn, Third Duke of, became the first Governor of Northern Ireland in 1922, having at one time sat as M.P. for Londonderry and been Treasurer to the Household. (1869-).

Abercrombie, Lascelles, English poet, critic, and University lecturer; educated at Malvern and Manchester University; has published several volumes of poetry and some critical essays, his first work, *Interludes and Poems*, appearing in 1908. (1881-1938).

Abercromby,

Sir Ralph, a British general of Scottish birth; distinguished himself in Holland when serving with the Duke of York in 1793 and 1799. Captured Grenada and several islands in the W. Indies in 1796. Fell in Egypt after defeating the French near Alexandria. (1731-1801).

SIR R. ABERCROMBY

Aberdare, an industrial town in Glamorganshire, S. Wales. Large quantities of coal from its mines are exported from S. Wales ports. Also has combustion works, brick works, and other industries. Pop. 48,751.

Aberdeen, the fourth city in Scotland, on the E. coast, between the mouths of the Dee and Don; built of gray granite, with many fine public edifices, a flourishing university, a large trade, and thriving manufactures. Old Aberdeen, on the Don, now incorporated in the municipality, is the site of a cathedral church, and of King's College, founded in 1484. Pop. 167,000.

Aberdeen, George Gordon, Fourth Earl of, a shrewd English statesman, served in the cabinets of the Duke of Wellington (Foreign Secretary 1828-1830) and Sir Robert Peel (Colonial Secretary 1834-1835; Foreign Secretary 1841-1846). Negotiated Oregon Treaty with United States Government in 1846 fixing the Canadian boundaries. Prime Minister 1852-1855, but resigned on a vote of censure on the mismanagement of the Crimean War. (1784-1860).

Aberdeen, Sir John Campbell Gordon, Seventh Earl of; first Marquess of Aberdeen and Temair (created 1916). Lord Lieutenant of Ireland 1886 and 1895-1915. Governor General of Canada 1893-1898. (1847-1934).

Aberdeenshire, the sixth largest with a coastline of 65 m. on the North Sea; mountains in SW., whence ranges stretch out in a NE. direction from the Grampians. Chief mountains: Ben Macdui (4,296 ft.), Ben Avon (3,843 ft.), Lochnagar (3,786 ft.). Chief industries: granite-quarrying, fishing, shipping, agriculture, and distilling. County town Aberdeen. Pop. 323,800. Area, 1,971 sq. m.

ABERDOUR

Aberdour, a town in Fifeshire, Scotland, standing on the Firth of Forth, 18 m. from Edinburgh, a seaside resort with good bathing. Pop. 2,055.

Aberdovey, a seaside resort on the estuary of the Dovey, 10 m. from Aberystwyth, Merionethshire, Wales. Pop. 1,203.

Aberfeldy, a burgh of Perthshire, Scotland, on the R. Tay. The Falls of Moness are in the neighbourhood. Pop. 1,500.

Aberfoyle, a village on the R. Forth, 34 m. from Glasgow, Scotland, the scene of incidents in Walter Scott's *Rob Roy*. Pop. 1,100.

Abergavenny, a market town of Monmouthshire, England, at the confluence of the rivers Usk and Gavenny. It was an old Roman Settlement. Has a wool market and there are local mines and iron foundries. Pop. 8,600.

Abergele, a market town and seaside resort, Denbighshire, N. Wales; the site of a Roman camp. Pop. 2,600.

Abernethy, a small burgh in S. Perthshire, Scotland, with a Pictish round tower, and once the capital of the Pictish kingdom. Pop. 600.

Abernethy, John, a distinguished surgeon, and authority on stomachic diseases. (1764-1831).

Aberration of Light, a phenomenon due to the fact that light from a star does not reach the earth instantaneously, but takes a measurable time, according to its distance away. A telescope cannot be pointed directly at a star in order to observe it, as could be done if the earth were not rotating. As a consequence, the star appears to describe an ellipse in the heavens, and from careful measurements the speed of the earth in its orbit can be calculated, and hence its distance from the sun.

Chromatic Aberration is due to the fact that rays of different wave-length are differently refracted during their passage through a lens or prism; hence the image formed is not quite in focus for the violet rays if it is exactly in focus for the red ones. The difference is slight, but must be corrected for accurate instruments. This may be done by the use of a combination of lenses of different refracting power.

Abersychan, a town of Monmouthshire, England, 10 m. N.W. of Newport, with collieries and tin-plate and iron works. Pop. 25,600.

Abertillery, a town in Monmouthshire, England. It has an important tin-plate industry and coal mines in the vicinity. Pop. 31,800.

Aberystwyth, a market town and summer resort in Cardigan-shire, Wales, with a university. The National Library of Wales is also here. Pop. 9,500.

Abeyance, the suspension of action in expectation of ordinary or legal procedure. Titles, estates, and the freehold of a church benefice are said to be in abeyance if there is no present owner or holder.

Abgar XIV., a king of Edessa in Mesopotamia, one of a dynasty of the name. He was a contemporary of Jesus Christ, and is said to have corresponded with Him.

Abhorrrers, the Royalist and High Church party in England under Charles II., so called from their abhorrence of the principles of their opponents.

Abiathar, a Hebrew priest during the reigns of David and Solomon; son of Ahimelech (by mistake the positions of father and son are reversed in 2 Sam. viii. 17), priest of Nob, where Saul massacred the priests and he alone escaped. He fled to David at

ABNER

Adullam, and served as high priest till Solomon's reign. Joined in the rebellion of Adonijah, and was banished to Anathoth.

Abigail, wife of Nabal, gave hospitality to David's messengers when her husband refused it. Ten days later Nabal died and David married her. (1 Sam. xxv.) Also the name of a sister of David.

Abijah, the name of several persons mentioned in the Bible. The most important (also referred to as Abijam) was a son of Rehoboam, and his successor. He made war on Jeroboam successfully in an attempt to recover the Ten Tribes.

Abimelech, (1) King of Gerar, S. Palestine, in time of Abraham, whose wife he innocently took, but restored on learning she was not merely Abraham's sister (Gen. xx). (2) Another King of Gerar, with whom Abraham's son, Isaac, had a similar adventure (Gen. xxvi). (3) Son, by a concubine, of Gideon, upon whose death he murdered all but one of his 70 brethren and proclaimed himself king. His skull was broken by a stone thrown by a woman from the tower at Thebez (Judges ix).

Abingdon, a town in Berkshire, England, 6 m. S. of Oxford, in an agricultural district; site of a Benedictine Abbey, remains of which still exist. Carpets and clothing manufactured. Pop. 7,240.

Abington, Frances, English actress, daughter of an ex-soldier named Barton. Sang at tavern-dinners. Successively milliner's assistant, cookmaid, and actress at Haymarket 1755 and at Drury Lane 1756. 5 years success in Dublin. Returned to Drury Lane as leading lady. Original Lady Teazle 1777. (1737-1815).

Abiogenesis, the theory that living organisms arose from non-living matter. It has been keenly disputed by modern scientists, who since Darwin's time have been more impressed with the interrelation of all existing and extinct living organisms, though they have so far failed to establish the time, place, and manner of emergence of life. The line of demarcation between non-living matter and the most simple forms of life is not in itself clearly defined, but there is as yet no evidence that abiogenesis does take place.

Abishai, brother of Joab, nephew to warriors. Accompanied David to the camp of Saul at Hachilah by night. Adhered to David during Absalom's rebellion. Slew the Philistine giant Ishbi-benob when the latter attacked David. (2 Sam. xxi.)

Abjuration, Oath of, instituted by William III. Any person holding public office was required to take this oath, abjuring any claim made by a member of the Stuart family to the throne of England. It also contained a rejection of papal authority in England, and provided that if the King of England were to be excommunicated by the Pope, he did not thereby forfeit the loyalty of his subjects.

Abkhasia, an autonomous state in the Caucasus, a Socialist Soviet Republic of Georgia. It has an area of about 2,500 sq. m. and is largely agricultural. It has been under Persian, Georgian, and Turkish rule, and was not pacified by Russia until 1864. Pop. (est.) 200,000. Cap. Sukhum.

Ablution, the ritual purification of the body after contact with the dead or something unclean. It is widely practised, water being the most common medium used. The term is also used in the Catholic Church for the washing of the chalice and the hands of the priest after Mass.

Abner, son of Ner and cousin of David. After the death of Saul, made Ishbosheth King of Israel. During the war with David that followed, he killed Asahel

son of Joab. Later, as a result of dissension with Ishbosheth concerning Rispah, Saul's concubine, he joined David and was treacherously killed by Joab (2 Sam. iii and iv).

Abney, Sir William de Wiveleslie, photographic chemist, born at Derby. Director, Science and Art Department, S. Kensington 1893-1903. Expert at astronomical and spectral photography. One of the inventors of the emulsion that made instantaneous photographs possible. K.C.B., 1900. (1843-1920).

Abo (also known in Finnish as Turku), the old capital of Finland and seat of the government, on the Gulf of Bothnia, largely destroyed by fire in 1827, when the university was removed to Helsingfors, the present capital. Pop. 69,000. Also, a town in Nigeria, W. Africa, at the head of the Niger Delta. It exports large quantities of palm oil. Pop. 7,900.

Abode (in law), commonly habitation or place of residence; also a synonym for stay or continuance. For some purposes in law a man may be regarded as having an abode where he has his place of business, even though he resides elsewhere; or where he has a temporary residence, though his permanent residence is elsewhere or even abroad.

Abode must be distinguished from "domicile," which means much more than even a place of residence (and is important in the law of settlement and removal of paupers and in questions of nationality), whereas abode does not necessarily imply that. In law, indeed, abode is lower in import than "residence," which strictly means the place where a man lives, i.e., where he sleeps or is at home.

Abolitionists, a society formed in the U. S. in 1832 to press for abolition of slavery. The society grew in numbers and influence and was the moving force in the war of 1861-1865, which resulted in the victory of the anti-slave States under Abraham Lincoln (q.v.).

Abomey, in the colony of Dahomey in French W. Africa, capital of the ancient kingdom of Dahomey, conquered by the French in 1892. Pop. 20,000.

Aborigines, an old tribe which inhabited Latium; but, derivatively, the earliest known inhabitant of any continent (e.g., the "blackfells" of Australia), country (e.g., the "Maoris" of New Zealand), or district. Experience shows that aboriginal races are apt to dwindle speedily in numbers when brought into contact with European civilisation. The Maoris, however, are now on the upward grade in population.

AUSTRALIAN
ABORIGINAL

Abortion, the premature birth or expulsion of the foetus. Another word for this is miscarriage. To be an abortion it must occur before the seventh month, and may come about naturally, as when the foetus is dead, or be brought about artificially by means of instruments or drugs. The procuring of abortion by a pregnant woman by artificial means is a felony, and so also is an endeavour by any person to procure miscarriage of any woman by such means, the punishment being penal servitude up to 3 years or imprisonment not exceeding 2 years with or without hard labour. An abortion brought about artificially to save the mother from serious illness or death is not a crime.

Aboukir, village near Alexandria, in Egypt, on the bay near which Nelson destroyed the French fleet in 1799; where Napoleon beat the Turks, 1799; and where Sir Ralph Abercromby fell, 1801.

About, Edmond Francois Valentin, French author; born at Dieuze, Lorraine, educated at Paris and Athens. Wrote: *La Grèce Contemporaine*, a satirical account; *Tolla*, a plagiaristic novel; many short humorous stories; and three serious novels—*Madelon*, *L'Infâme*, and *Le Roman d'un Brave Homme*. After the Second Empire's fall, he conducted a paper. (1828-1885).

Aboyne, village and parish (Aboyne and Glentanner) of Aberdeenshire, Scotland, on the Dee, in a forested, mountainous district. Pop. 1,500.

Abracadabra, a magic word supposed to be most effective when written in the form of a triangle. It was used in the past as a spell, and was thought to cure illnesses, subdue devils, and to keep away evil spirits.

Abraham, or Abram, son of Terah, Hebrew patriarch and ancestor of the Jews. By Divine command he continued the journey from Ur of the Chaldees which he had commenced with Terah till he came to the land of Canaan. Famine drove him on to Egypt, whence he returned, and settled near Hebron after Pharaoh had taken Sarai into his harem in the belief that she was his sister. Had a son Ishmael by his concubine Hagar, but a son Isaac was born to Sarah (Sarai) when he was 100 years old. Had 6 other children by Keturah, but Isaac was his sole heir. Died aged 175 and was buried beside Sarah in the cave of Machpelah.

Abraham, The Plains of, a plateau near Quebec, Canada, the scene of the battle in which the English under Wolfe defeated the French under Montcalm in 1759.

Abraham-Men, discharged lunatics allowed at one time to roam about England and beg; a term also applied to a set of impostors who wandered about the country affecting lunacy.

Abrantes, a town in Portugal, on the Tagus; taken by Marshal Junot, 1807, and giving the title of Duke to him. Pop. 11,000.

Abraxas Stones, Greek word Abraxas and cabalistic figures engraved on them and used as talismans. The word Abraxas, the Greek letters of which made up the number 365, was used by the Basilidians to signify the 365 orders of spirits which they believed to pervade the Universe.

Abruzzi, Duke of the, Italian geographer, admiral, explorer, and mountaineer, ascended Mt. St. Elias in Alaska in 1897 and Mt. Ruwenzori, Central Africa, 1906, and made attempts on several Himalayan peaks, including K.2 (Mount Godwin Austen). Commanded naval squadron in the Tripolitan War and Italian Navy during part of the Great War. (1875-1933).

Abruzzi e Molise, a department of Central Italy comprising the provinces of Aquila degli Abruzzi, Campobasso, Chieti, Pescara, and Teramo. It includes the central portion of the Apennines, and there are large forests and numerous streams which flow through fertile valleys into the Adriatic. Cattle, pigs, and sheep are raised; other produce includes corn, rice, almonds, and wine. Area 5,952 sq. m. Pop. nearly 1,500,000.

Absalom, the third and favourite son of David, of a man of great personal beauty and popularity. Rebelled against his father, but after considerable initial success, during which he occupied Jerusalem and David fled, he rejected the counsels of Ahithophel and was totally defeated in Gilead. While escaping on a mule, his hair was entangled in the branches of an oak, and he was despatched by Joab.

ABSALON

Absalon, Archbishop of Denmark, distinguished as warrior, ecclesiastic, and statesman. During Valdemar's reign he led the forces which cleared the seas of Wendish pirates. (1128-1201).

Abscess, a local collection of pus in the body, caused by the presence of pus-forming bacteria, which liquefy the tissues, destroying the blood-cells that have collected round. Pus will continue to form until the white blood corpuscles are sufficiently strong to kill the bacteria, or until the abscess bursts or is lanced. An abscess can be detected by heat, swelling, and pain, and may occur under the skin, or in an organ, joint, or bone, and frequently in the socket of a tooth.

Absentee, the term applied to a landlord who draws revenues from estates but does not live on them; applied in particular to the landlords who, being English and living in England, did much to impoverish the Irish.

Absinthe, an extremely intoxicating liquor, producing more harmful results than any other form of alcohol. Its characteristic flavour comes from worm-wood. Other ingredients are fennel and hyssop. It was chiefly manufactured in France but both manufacture and sale have for some years been prohibited there.

Absolution, a religious ceremony by which a Christian priest sets a person free from the guilt of sin or from excommunication by the Church. The right to give absolution is traced to the teachings of Christ and of St. Paul. Confession was in earlier days made before a congregation and absolution not given until penance had been carried out. At the present time, the Roman Catholic Church gives absolution after confession, stating what penance is then to be performed. The Church of England also reserves to itself the power to give absolution to repentant sinners.

Absorption, the taking up by one substance of another, or the taking up of radiant energy by a substance. In the former sense, it includes the absorption of water by a sponge, of oil by a wick, of soil-solution by the root-hairs of plants, and many similar phenomena. In science, the taking up of a gas by a solid (charcoal, for instance, takes up many times its own volume of ammonia) is called sorption, and includes adsorption, or the taking up of the gas by the surface layer of the solid, and absorption or the taking up of the gas by the interior of the solid. Adsorption takes place much more quickly than absorption. Absorption of light is the reason why articles appear coloured or black in white light; a red object is red because it absorbs all of the light which falls upon it except the red, this being reflected. A perfectly black object absorbs the whole of the light which falls upon it.

Abstract of Title, an epitome of ownership of land (including house property). A contract for the sale of land, or "Property," as it is popularly called, implies an agreement to make a good title to the property sold, and the vendor is bound to deliver to the purchaser an "abstract" of his title, i.e., a summary in writing of all the documents, facts, and events upon which his right to the property depends. The manner in which a given title is to be deduced is strictly defined by law, and especially by the Law of Property Act, 1925, and by the Land Registration Act. (See also **Appointment**, **Power of**.)

Absyrtus, a son of Aëtes, King of Colchis, and brother of Medea, who cut him in pieces as she fled with Jason, pursued by her father, throwing his bones behind her to detain her father, who stopped to pick them up.

ABYSSINIA

Abu, a mountain in Rajputana, 5,653 ft. high, held sacred by the Jains. It has a footprint of Vishnu on the top, and 2 marble temples half-way up.

Abu-Bekr, as the father of Ayesha, the father-in-law of Mohammed. Sole companion of Mohammed in his flight from Mecca, and nominated by him his successor, became the first of the caliphs and the founder of the Sunnites. Encountered severe opposition from impostors and revolting tribes, but was successful in a series of campaigns. His record of the sayings and doings of the Prophet formed the basis of the Koran. d. 634.

Abu-Klea, name of some wells in the Soudan, where Sir H. Stewart defeated the Mahdi's forces in 1885.

Abutilon, a genus of plants of the Malvaceae order; 120 species growing in tropical regions. *A. Avicenna* is cultivated in China for the sake of jute fibre.

Abydos, an ancient city on the Asiatic side of the Hellespont, famous as the home of Leander, who swam the Hellespont every night to visit Hero in Sestos, and as the spot where Naxos, King of the Persians, built his bridge of boats to come into Europe in 480 B.C. Also a place of note in Upper Egypt, one of the most important cities of ancient Egypt, where were temples and royal tombs. The Great Temple of Abydos still stands, an imposing relic.

Abyssal, the term given to the division of marine fauna that dwells in the lowest depths of the sea, where there is a cold temperature, darkness, and intense pressure of water. These creatures are mostly blind, in some cases phosphorescent, and are carnivorous. Their colourings are usually brilliant; sponges are a form of abyssal fauna.

ABYSSAL FISH

Abyssinia (Ethiopia), a mountainous country in E. Africa, divided from the Red Sea and the Gulf of Aden by Eritrea, and French and British Somaliland, bounded on the S.E. by Italian Somaliland, in the S. by Kenya, and in the W. by the Anglo-Egyptian Sudan; until 1936 an independent empire under the rulership of Haile Selassie I., the dominant race being the Amharic; now incorporated with Eritrea and Italian Somaliland in the newly-formed colony Italian E. Africa (q.v.). Area about 350,000 sq. m. Pop. (estimated) 7,600,000.

Another name for the country and a more ancient one is Ethiopia. The legendary Queen of Sheba was supposed to have ruled the country, the history of which was connected with that of ancient Egypt and later with that of Palestine. Christianity was received in the 4th Century, but 4 centuries later the Mohammedan conquest took place, and it was not until the middle of the 19th Century that the country took a settled form under one ruler, Kassal or Theodore. He quarrelled with his English advisers and killed himself when compelled to surrender to a punitive expedition under Napier (1868).

In 1882 the Italian Government bought the port of Assab, and in 1885 occupied Beilul and Massawa. The Abyssinians ordered the withdrawal of Italian troops and claimed free trading rights in Massawa. No notice of these demands was taken by the Italians, and the Abyssinians attacked an Italian detachment. In 1888 negotiations took place between the two countries, and a year later, when Menelik claimed the throne, the Treaty of Uccallit was concluded between

them giving the Italians practical control of the country. War broke out once more in 1895, and ended the following year, when the Italians were defeated at Adowa, and by a convention the independence of Abyssinia under Menelik was recognised. In 1906 Great Britain, France, and Italy signed an agreement guaranteeing this independence.

In 1913 Menelik died. His grandson was deposed in favour of his daughter, whose nephew, Ras Tafari, acted as co-ruler. In 1923 Abyssinia was admitted into the League of Nations. The Empress died in 1930 and Tafari became sole ruler, being crowned Negus (or Emperor) Haile Selassie I. A year later the first parliament was opened.

Previously in 1928 Italy had signed a treaty with Abyssinia by which it was agreed that all disputes should be submitted to arbitration. Nevertheless, in 1935 Italy prepared to invade Abyssinia, Mussolini's plans to conquer the country receiving some colour of moral justification through several border disputes, notably the Wal-Wal incident on Dec. 5th, 1934. He rejected arbitration through the League of Nations.

In Oct., 1935, the invasion began, and Haile Selassie mobilised his available forces. The Ethiopian army was not strictly organised; it had no transport and little munition. Adowa was captured by the Italians on Oct. 6th. The League of Nations declared Italy the aggressor, and later, Nov. 18th, economic sanctions were enforced against Italy. Meanwhile Ras Gugsa, one of the Abyssinian leaders, went over to the Italians.

The Italian advance was conducted from the N. under General De Bono (later superseded by General De Badoglio), and from the S. under General Graziani. Bombing and the use of poison gas were mainly responsible for overcoming the Abyssinian resistance. By April 30th, 1936, the defence of Addis Ababa was abandoned, and on May 2nd, the Emperor fled, being taken on an English cruiser from Djibouti to Haifa. Riots followed in the capital, Badoglio finally taking over the town on May 5th; 4 days later the King of Italy was proclaimed at Rome Emperor of Abyssinia.

Acacia, a large genus of shrubs and trees included in the Mimosaceae sub-order of the Leguminosae. There are some 550 species, which are found in almost all tropical and sub-tropical countries. They are, especially common in Australia (known as "wattles"), where they form a large part of the scrub. Many species are commercially valuable for their astringent and gum-yielding properties. *A. Senegal* (Africa) and *A. Arabica* (India) yield gum-arabic; *A. Catechu* (E. Indies) cutch; various wattles of Australia yield tannin.

The English False Acacia, *Robinia Pseud-acacia*, belongs to the same natural order.

Academy, a public shady park or place of groves near Athens, where Plato taught his philosophy and whence his school derived its name, of which there are 3 branches, the *Old*, the *Middle*, and the *New*, represented respectively by Plato himself, Arcesilaos, and Carneades. The *French Academy*, of 40 members, was founded by Richelieu in 1635, and is charged with the interests of the French language and literature, and in particular with the duty of compiling an authoritative dictionary of the French language. Besides these, there are in France 4 others with a limited membership in the interests of other departments of science and art, all now associated in the *Institute of France*, which consists in all of 239 members. There are similar institutions in other countries.

Academy, British, founded in 1902 for the promotion of historical, philosophical, and philological studies.

Academy, Royal.

See *Royal Academy of Arts*.

Acadia, or *Acadia*, the French name for Nova Scotia and New Brunswick.

Acanthus, a genus of plants of the Acanthaceae family; includes some 20 species most of which have a single herbaceous stalk,

thick pinnatifid leaves, and flowers in terminal spikes. *A. mollis* (bear's-brace or branksursine) grows in most Mediterranean countries, and the leaves of this and of *A. spinosa* are supposed to have been the inspiration of the Roman and Greek architectural decoration bearing the name. This consists of a leaf-like carving on the capitals of the columns of certain orders or architecture.

Acapulco, the most important Mexican port on the Pacific; harbour commodious, but climate unhealthy; has suffered severely from earthquakes. Pop. 7,000.

Acaran and Amphoterus,

sons of Alemson and Callirhoe. When their father was murdered, Callirhoe prayed that they might suddenly grow up and avenge his death on Phlegus, which was granted.

Acarmania, a province of Greece, N. of the Gulf of Corinth; its population once addicted to piracy; to-day incorporated with *Ætolia* as a province of modern Greece. Area (with *Ætolia*) 3,000 sq. m. Pop. (with *Ætolia*) 220,000.

Acastus, legendary Greek, son of Pelias, King of Iolcus; took part in the Calydonian boar hunt and went with the Argo to Colchis; on return, drove Jason and Medea from Iolcus for their share in the murder of his father, Medea having persuaded his sisters to cut up his father and boil him in the hope of restoring his youth. Slain, after a quarrel, by Peleus, son of *Æacus*, *Aspidamia*, his wife (*Acastus*'s wife), having first tempted and, when rejected, finally accused Peleus of dishonouring her.

Accad, one of the four towns in the land of the kingdom of Nimrod. (Gen. x. 10.)

Accadian, the language in which the sacred texts of Assyria and Babylonia were originally written; the language of Accad, a city in N. Babylonia, probably the same as Agada near Sippard.

Acca Laurentia, wife of Faustulus, shepherd of Numa, saved the lives of Romulus and Remus.

Acceleration, the rate of increase in velocity, the velocity of a moving body. In the case of a body acted on by the earth's gravity and falling in a vacuum (i.e., removed from the resistance of the air) the acceleration is 32 ft. per sec. per sec., i.e., there is an increase of 32 ft. per sec. in the velocity every second. At the end of the first second the velocity is 32 ft. per sec.; at the end of the second second 64 ft. per sec., and so on.

Accent, (1) the stress or emphasis placed on one or more syllables in a word. In the English language accent is much used, and the same word by a change of accent may have a different meaning, as for example collect the verb, and collect the noun. In English poetry accent forms the basis of its metre, whereas Latin poetry depends on quantity for its rhythm. Accent is sometimes used to signify the tone in which a word is said, but the proper term for this is inflection. A whole word, however, may be accented or unaccented, which means it is said with or without emphasis. (2) There

ACCEPTANCE

are special accents or signs used in French and other languages. In French the acute accent (') the grave (`), and the circumflex (^) are placed above vowels, and denote a certain pronunciation rather than accentuation of the vowel. (3) In music, accent is the emphasis on a note or series of notes.

Acceptance, in law, to be valid, must fulfil requirements; acceptance of a Bill of Exchange, i.e., the signification by the drawee of his assent "to the order of the drawer," must be written on the bill and signed by the drawee, whose mere signature is sufficient to render him liable on the bill; but an "acceptance" which expresses that the drawee will perform his promise by any means other than the payment of money is void.

A contract for sale of goods, £10 or over in value, is not enforceable unless the buyer "accept" part of the goods and actually receive them, or make part payment, or unless there be a memorandum in writing of the contract signed by him, and generally the buyer will be held to have accepted if he does any act in relation to the goods which recognises any pre-existing contract of sale whether there be acceptance in performing the contract or not. A solicitor may accept service of a writ of summons in lieu of personal service on his client but it must be with his client's authorisation.

Accessory, one who is concerned in the commission of a felony. Accessories are of two classes: (a) before the fact, i.e., one who procures, advises, or commands a felony to be committed; (b) after the fact, i.e., one who, knowing a felony has been committed, harbours, relieves, or assists the felon, as by opposing his arrest or rescuing him. (A wife is not punishable for screening her husband.) In (a) the punishment is usually the same as for the principal; in (b), the maximum is imprisonment up to 2

ident, (in law) in its ordinary sense, means any unforeseen, any extraordinary incident, or anything that happens otherwise than by design; in logic, it means something in any subject, person, or thing not belonging to the *Essence* or which is not indispensable to the existence of the subject, etc.

In law, it is a word of circumscribed meaning which varies according to the context. In relation to "equitable relief" which a person is seeking in a case where he has no common law remedy, accident means an unforeseen event not due to any negligence or misconduct on the part of the petitioner for relief. In the Criminal Law, an occurrence is "accidental" when caused unintentionally and in such circumstances that a person of ordinary care and prudence could hardly have avoided.

In insurance practice, the meaning of "accident" depends on the context, but it includes occurrences brought about by the negligence of the assured and other persons. In the Workmen's Compensation Acts, the word must be given its ordinary and popular sense, and in the law-courts it has been defined as including e.g., a deliberate assault on the workman, which may be an "accident" for the purpose of statutory compensation.

Accipitriformes, an order of birds which includes the hawks, vultures, and ospreys, all of which, in virtue of their strong, sharp beaks, are adapted to the pursuit of prey. In all of them the upper mandible of the beak is curved downwards and ends in a hook, and the toes (four in number) end in strong curved claws. *Accipiter* is the genus of the order which includes the sparrow-hawks.

Acclimatisation, or **Naturalisation**, the process by which men, animals, or plants adapt them-

ACCOUNTS

selves to a new climate. It sometimes involves the modification of characteristics previously present and the development of new which aid in survival in the new circumstances. It also sometimes involves a disturbance of the existing balance of nature as e.g. when the prickly pear was introduced to Australia from Africa and the rabbit from England. In England the brown rat has almost entirely displaced the indigenous black rat, and the brown squirrel has very largely displaced the red variety.

Accolade, a gentle blow with the flat of a sword on the shoulder given by the king in conferring knighthood.

Accommodation Bill, in law, a bill which a person signs as drawer, acceptor, or endorser, without himself obtaining any value for it, and which he signs merely for the purpose of lending his name to some other person; by so signing, he makes himself liable on the bill to the holder for value, and it is immaterial whether, when the holder took the bill, he knew the person was an accommodation or not. The accommodating party has, of course, a right to be indemnified by the person to whom he lent his name.

Accoramboni, Vittoria, an Italian lady of great beauty who married Francesco Peretti, but brought about his murder in order to marry the Duke of Bracciano. Later she had to flee Venice, and after the Duke's death was assassinated on the instigation of Orsini, with whom she was to share the inheritance. (d. 1585).

Accordion, portable musical instrument invented in 1829, consisting of a keyboard, reeds of varying length and thickness, and bellows. The Melodeon, which is a kind of accordion, is a wind instrument with a row of reeds, and is operated by keys.

ACCORDION

Accountancy, a profession concerned with the management of all accounts relating to commercial and official business. Owing to the growth and complexity of business and the need for improvement in the systematic arrangement of accounts, a professional class arose whose efficiency and honesty were guaranteed. Associations of Accountants came into being in the 16th Century, but in Great Britain progress was slow until the middle of the 19th Century and the formation of Limited Liability Companies.

The first society was formed in Edinburgh and incorporated by Royal Charter in 1854. In London the Institute of Chartered Accountants in England and Wales, founded in 1870, was incorporated in 1880; the Society of Incorporated Accountants and Auditors in 1885; the Corporation of Accountants in 1891; and the London Association of Certified Accountants in 1906. Accountants are usually paid by agreement according to standard rates, and, if found responsible for damage arising out of neglect of duty, may be sued.

Accountant-General, or **Accomptant-General**, an officer of the Court of Chancery, appointed by Statute to receive all money lodged in Court, and to place it in the Bank of England for security. The office was abolished in 1872 and the duties transferred to the Paymaster-General.

Accounts, **Falsification** of, is a misdemeanour and falsification on the part of a clerk, steward, or similar employee, is punishable under the Falsification

ACCRA

of Accounts Act, 1875, by penal servitude up to 7 years or imprisonment, with or without hard labour, up to 2 years. The falsification of a mechanical means of recording an account, e.g., a taximeter, is within the Act. Officers of Companies and bodies corporate keeping fraudulent accounts are guilty of misdemeanours under the Criminal Consolidation Act and punishable by penal servitude up to 7 years.

Accra, cap. and chief port in British Gold Coast colony. Pop. 67,000.

Accrington, a manufacturing town in Lancashire, England. 22 m. N. of Manchester, noted for cotton, weaving, etc. Pop. 43,000.

Accumulator, or **Storage Cell**, a type described as secondary because the chemical changes in it which produce the electrical energy were themselves rendered possible by the previous application of electrical energy to the cell from an outside source, e.g., a generator or dynamo.

The familiar lead accumulator, invented by Planté in 1859 was improved by Faure and others. It consists essentially of 2 lead plates immersed in dilute sulphuric acid, the surface of one plate being covered with lead peroxide (PbO_2). The latter plate forms the positive terminal of the cell, and when the 2 terminals are connected in a circuit a current flows, the necessary energy being provided by the chemical reaction expressed in the equation: $PbO_2 + Pb + 2H_2SO_4 = 2PbSO_4 + 2H_2O$. Both plates thus become covered with lead sulphate, and sulphuric acid is removed from the solution, which at the same time becomes more dilute owing to the water formed. The specific gravity consequently falls, and when it reaches a certain level the cell should be recharged.

Recharge is effected by connecting the cell to a source of direct current, the current being made to flow through the cell in the opposite direction to that of the current which the cell gives when being used. The reverse chemical change then occurs, and the sulphate is reduced to lead on one plate and oxidised to lead peroxide on the other. Completion of charging is marked by the evolution of gas produced by electrolysis; and the specific gravity of the acid will have reached its original value, unless there has been appreciable loss by evaporation, when the specific gravity will be too high and should be brought down by the addition of a little distilled water.

The average voltage of a fully charged accumulator is 2, and discharge should not be continued below a voltage of 1.8; the cells should not be left discharged, and should if possible be discharged and recharged at short intervals, e.g., once a fortnight. The level of the liquid should also be maintained, while if it has to remain unused for any length of time, it should be fully charged, emptied of its acid, and stored in the dry state.

The modern accumulator economises space by having several positive and negative plates alternately. The Edison or nickel-iron accumulator has certain advantages over the lead-acid accumulator: it consists of a number of perforated nickel tubes packed with nickel hydroxide and fine nickel shavings, and a number of perforated nickel boxes packed with finely divided iron. The former tubes constitute the positive "plate," and the latter the negative. They all stand in a solution of caustic potash (potassium hydroxide). Edison accumulators can be left discharged and may be short-circuited without damage. They are frequently used for electric traction; their average voltage is about 1.2.

Aceldama, the "field of blood" which Judas "bought with the reward of iniquity," and falling headlong, burst asunder in the midst (Acts i). According

ACHARD

to Matthew xxvii, Judas cast down the 30 pieces of silver and hanged himself, and with the money the chief priests bought "the potters' field," "the field of blood," to bury strangers in.

Acephali, the levellers in the reign of no head or superior. Also certain ancient heretics, who appeared at the beginning of the 6th Century, and asserted that there was but one substance in Christ and one nature.

Acerra, an ancient city of Campania, Italy, 9 m. N.E. of Naples; it was destroyed by Hannibal, but rebuilt; in those days subject to inundations. Pop. 16,000.

Acestes, in Roman legend, a king of Sicily who helped Priam in the Trojan war. Founder of the city of Acesta, he was supposed to be the son of the river god, Criniscus, and Egesta, a Trojan woman, and to have entertained Æneas.

Acetaldehyde, a colourless volatile liquid boiling at 21° C. It possesses a pungent smell, and may be made by oxidising ordinary (ethyl) alcohol with potassium dichromate and sulphuric acid. Commercially it is important as an intermediate, and is manufactured by causing acetylene to combine with water under the catalytic influence of mercuric sulphate. On oxidation it yields acetic acid (q.v.). By treatment with acid it is converted into the white solid known as "meta," which is used as a fuel in place of methylated spirit.

Acetic Acid, the acid in vinegar. In the pure state it is manufactured by the oxidation of synthetic acetaldehyde (q.v.), though a certain amount is still obtained by the old method of distilling wood in the absence of air. It is a white, crystalline solid, melting at 17° C. to a colourless liquid with a pungent smell. The salts are called *acetates*, and some, e.g., basic lead acetate ("sugar of lead") and aluminium acetate, are of commercial importance. Much acetic acid is used in manufacture of celanese (acetate rayon).

Acetone, a colourless liquid obtained by the distillation of calcium acetate. It is used in the manufacture of chloroform, iodoform, and cordite (q.v.).

Acetylene, a colourless gas which, when impure, has an unpleasant smell. The pure gas has a sweetish smell and burns with a hot, luminous, and smoky flame;

in special burners which supply it with ample air its flame is extremely brilliant and non-smoky. It is prepared by the addition of water to calcium carbide, and is of considerable importance as an "intermediate," i.e., as a compound from which other substances are conveniently obtained (see **Acetaldehyde**). The oxy-acetylene burner, in which acetylene is burned in oxygen, produces an intensely hot flame, and is extensively applied in engineering.

OXY-ACETYLENE BURNER

Achæa, the N. district of the Peloponnese in ancient Greek times, eventually the whole of it.

Achæans, one of the chief of the Hellenic races; once inhabited Thessaly, whence they migrated to the Peloponnese; a name frequently extended in the Homeric period to the whole race.

Achæmenes, King of ancient Persia and of the Achaemenides from whom were descended Cyrus, Cambyses, Darius, Xerxes, etc.

Achard, Franz Karl, a Prussian chemist, one of the first to manufacture beet sugar. (1753-1821).

Achates, the attendant of Æneas in his wanderings after the fall of Troy, remarkable for, and a proverbial type of, fidelity.

Achelous, or *Akheleos* (modern Aspropotamo), the largest river in Greece, 130 m. long, rising in the Pindus Mts., and flowing into the Gulf of Patros (Ionian Sea); often mentioned by ancient Greek authors, and giving name to a god.

Achene, in botany, a fruit containing only one seed, dry and indehiscent (i.e., remaining closed at maturity) and the product of one cupule. The Ranunculus and the Potentilla (a genus of Rosaceæ) are true examples, though the term is extended to include fruit of Compositæ, Gramineæ, etc.

Achensee, a lake in Austria in the Tyrol, the source of the Achen R.

Achenwall, Gottfried, a German statistical science. (1719-1772).

Acheron, in ancient Greek mythology a river in the underworld over which the dead were ferried by Charon. It was the name also of several rivers in Greece more or less suggestive of it.

Achievement, the full representation in heraldry of the shield and accessories; also known as Hatchment.

Achill, a rocky, boggy, sparsely inhabited island off the W. coast of Ireland (Eire), in Co. Mayo, with a bold headland 2,322 ft. high. Pop. 5,000.

Achillea, hardy perennial plants of the order Compositæ with yellow or white flowers; grows to height of 2 to 3 ft.; dwarf variety, 6 ins.; *A. millefolium*, the common yarrow or milfoil, and *A. Plarnica* are found in Britain.

Achilles, the son of Peleus and Thetis, King of the Myrmidons, the most famous of the Greek heroes in the Trojan war, whose wrath and the consequences of it form the subject of the Iliad of Homer. His only vulnerable point was in the heel, at the point where his mother held him as she dipped his body in the Styx to render him invulnerable.

Achilles Tendon, the great tendon of the heel, the only place where Achilles was vulnerable.

Achimenes, a genus of deciduous tuberous plants of the order Geraneaceæ, mostly native to tropical America and cultivated in greenhouses for the sake of the flowers.

Achish, King of Gath in Philistine. Twice he sheltered David (see I Sam. xxi and xxvii).

Achithophel, or Ahitophel, the Gilon-father of Bath-sheba; an extremely able but unprincipled counsellor of David, who, however, joined Absalom in rebellion against David; when his advice was ignored he despaired of success and hanged himself.

Achmet I., Sultan of Turkey from 1403 to 1412; A. II., from 1412 to 1417; A. III., from 1417 to 1429; A. IV., from 1429 to 1442. He gave asylum to Charles XII. of Sweden after his defeat by the Czar at Pultowa.

Achondroplasia, a condition in found in one child of a large family, in which the bones harden too early. The result is a head and face of a normal size and a stunted body, though otherwise the child is healthy and intelligent.

ACHILLES TENDON

Achromatism, the state of being aberration, with special reference to lenses (achromatic lenses) which are corrected for chromatic aberration. See *Aberration of Light*.

Achromatopsis, or Colour-Blindness, was first described in 1794 by Dalton, himself a sufferer, his condition being in particular the inability to distinguish red or green.

Acid, in chemistry, originally defined as a substance possessing a sour taste and a characteristic effect upon certain compounds known as indicators (q.v.); thus acids will turn blue litmus red, yellow methyl orange, pink and red phenolphthalein, colourless. They will also cause metallic carbonates (e.g., marble and washing soda) to effervesce in the presence of water, owing to the liberation of carbon dioxide. They invariably contain hydrogen, part or all of which may be replaced by a metal with formation of the corresponding metallic salt. They frequently corrode metals and organic matter, and when diluted are good electrolytes.

The latter property is due to the ease with which they ionise into protons (hydrogen ions) and negative ions; the protons immediately each combine with a molecule of water to form oxonium or hydroxonium ions, H_3O^+ , and it is to these oxonium ions that the characteristic behaviour of acids is due. On the modern theory of acids, any substance capable of "donating" one or more protons to another substance is regarded as an acid; the ease with which the protons are given up is a measure of the strength of the acid.

The principal acids are sulphuric (H_2SO_4), nitric (HNO_3), and hydrochloric (HCl) among the inorganic or mineral group, while acetic (CH_3COOH), hydrocyanic or prussic (HCN), oxalic ($H_2C_2O_4$), tartaric ($H_2C_4O_6$), citric ($C_6H_8O_7$), benzoic (C_6H_5COOH), salicylic ($C_6H_4(OH)COOH$) and picric ($C_6H_2(NO_2)_3OH$) are typical examples of acids containing carbon. Acids neutralise bases (q.v.) with formation of salts and water.

Acidimetry, the chemical processes of determining the amount of acid present in a substance, the usual process being to add alkali of known strength until the acid is neutralised.

Aci-reale, a seaport in Sicily, at the Catania, with mineral waters. Pop. 35,000.

Acis, a Sicilian shepherd enamoured of Galatea, whom the Cyclops Polyphemus, out of jealousy, crushed under a rock, from beneath which a river has since flowed.

Aclinic Line, the magnetic equator, roughly with the geographical equator along which there is no magnetic dip. If a magnetised needle is suspended so that it can turn in a vertical plane it remains horizontal upon the line itself. The north pole dips if north of the acilinic line and the south if south of the line at an angle which increases as the poles are approached.

Acne, a skin disease showing hard, reddish pimples, or tubercles, on the face and shoulders. *Acne rosacea*, a congestion of the skin of the nose and parts adjoining.

Acolyte, a candidate for priesthood in the Roman Catholic Church who has reached the fourth stage of initiation; originally a youth who assisted in church ritual by carrying candlesticks, lighting candles and carrying the bread and wine at communion, offices now usually performed by laymen.

Aconcagua, (1) A mountainous province of Chile. Cap. San Felipe. Area 5,800 sq. m. Pop. 454,000. Valparaiso is also in this province. (2) An extinct volcano, the highest peak of the Andes about 100 m. N.E. of Valparaiso, 22,867 ft. high.

Aconite, a genus of plants (*Aconitum*) of the order Ranunculaceae.

There are over 100 species, mostly native to Northern temperate upland districts and nearly all poisonous, their roots, which can and have been mistaken for horse-radish, containing alkaloids of the aconitin group (q.v.). The most important species, and one of the most poisonous, is *A. napellus* (monkshood, wolf's bane), which is propagated by bee-pollination, and is almost coextensive with the habitat of the humble-bee. It is common in England.

MONKSHOOD

Aconitine, a most virulent poison prepared from aconite (*Aconitum napellus*) and, owing to the very small quantity sufficient to cause death, very difficult of detection. In very small quantities it is used as a drug (sedative) in medicine both externally (in cases of neuralgia) and internally (in some fevers to depress the heart).

Acontius, in Greek mythology, a beautiful youth of Ceos who fell in love with Cydippe at the festival of Artemis. He threw before her an apple bearing the legend "I swear by the sanctuary of Artemis to marry Acontius." She read this aloud and, Artemis hearing her, she was compelled to keep her vow.

Acorn, the fruit of the oak tree (q.v.), consisting of a nut in a cup, the cup being the hardened cupule. When unripe it is of value in tanning. It also provides food for swine, and has been used in the past, ground to a flour, for breadmaking.

Acorn-Shells, group of crustaceans found attached to rocks and piers on the seashore and forming the sub-order Operculata, order Cirripedia, closely allied and very similar to the stalked barnacles.

Acoustics, the technical estimation of the effects of sound in an enclosed space and consideration of the methods by which a desired effect may be obtained. The energy of a sound wave on meeting a flat surface, such as the wall of a room, is partly reflected, partly absorbed. Part also may be transmitted through the wall. The acoustic absorption of a surface of any material can be calculated.

Acre, an English unit of square measure, equals 4,840 sq. yds.

Acre, *St. Jean d'* (or *Akka*), a seaport in Palestine at the foot of Mt. Carmel, scene of many battles. Taken at an enormous sacrifice of life, by Philip Augustus and Richard Cœur de Lion in 1191; held out against Bonaparte in 1799. Captured from the Turks by Allenby in 1918. It is a very picturesque town, notable for its mosques and for the ruins of the Tower of Heli. Pop. 8,000.

Acridine, a crystalline solid obtained from coal-tar anthracene and used in the preparation of dyestuffs.

Acrisius, son of Abas, King of Argos. He was father of Danae, and when an oracle foretold that a son of Danae should kill him, he had her confined in a dungeon. She had a son Perseus by Zeus, however, and though both were exposed to the sea, the oracle was fulfilled.

Acroceraunia, a promontory in Epirus, N. Greece, dangerous to ships.

Acrolein, a colourless volatile liquid with a pungent odour obtained by the destructive distillation of fats.

Acoliths, statues of which the trunk and extremities of the body of stone.

Acromegaly, a disease affecting especially the hands, feet and head, attributed to a defective working of the pituitary gland. The bones become enlarged. Treatment with extract of the pituitary and thyroid glands gives relief in many cases.

Acropolis, a fortified citadel in ancient Greece commanding a city, and usually the nucleus of it. The most famous was the Acropolis at Athens, on which was built the Parthenon, the Erechtheum, the temple of Nike Apteros, etc.

Acrostic, a form of verse, dating historically from the 4th Century, in which the initial letters of the lines, read in order, form a word or phrase.

Acroteria,

statues or ornaments placed on the apex or lower angle of a pediment or the pedestals supporting the statue.

ACROTHERIA

Acta Diurna, a sort of gazette read in a summary way, established at Rome in 131 B.C., and rendered official by Caesar in 50 B.C.

Acta Sanctorum, a large series of volumes dealing with the lives of the saints of the Catholic Church, begun in the 17th Century by the Jesuits, carried on by the Bollandists, and still incomplete.

Actæon, in Greek legend, son of Aristæus and Autonoe, and the hunter who came upon Artemis when bathing. She changed him into a stag, and he was thereupon devoured by his own dogs.

Acting. See *Drama*; *Theatre*.

Actinic Rays, sometimes termed ultraviolet rays, given off by a body under intense heat. They have a shorter wave-length and more rapid frequency than the violet rays.

Actinium, a radio-active element discovered by Debiere in 1900, one of the products of disintegration of the uranium (q.v.) series, gives rise itself to a series of radio-active substances, the final state being lead; symbol Ac.

Actinometer, an instrument originally invented by Sir John Herschel to measure the heating effect of the sun's rays. Now includes instruments used by photographers (e.g., exposuremeters) for measuring actinic power of sunlight.

Actinomycosis, a serious and sometimes fatal disease of a fungoid nature on the mouth and lower jaw of cows, but liable to occur also in man. It is characterised by chronic inflammation and lumpy tumours, the latter often discharging pus which infects the lungs and causes acute pulmonary actinomycosis. The infection appears to be carried by cereals, especially barley, and is ascribed to certain bacteria-like organisms known as *Streptothrix* or *Actinomyces*. The discovery of the infective microbes was made by Bollinger in 1877 (cattle) and Israel in 1878 (man). Treatment is usually surgical, though potassium iodide taken internally has sometimes proved successful.

Actinotherapy, the treatment of disease by means of natural or artificial light rays.insen, in Denmark, was one of the first to apply this method in medical practice, and it has since been widely adopted.

Actinzoa (Anthozoa), in zoology a class of animals comprising

the sea anemones and coral polyps. It is to animals of this class that the building of the vast coral reefs is due. Most actinzoa have a central mouth with tentacles around it; their alimentary canal freely passes, by a wide opening, into the general cavity of the body, and this cavity is prolonged into the stomach, which is internal, a character in which the actinzoa differ from the hydrozoa, to which class, however, they are closely allied.

ACTINOZOA
(Sea anemone)

Action, in law, proceedings undertaken to obtain the recognition of one's rights. In civil actions the procedure is first by writ or originating summons, then pleadings are put in, leading up to trial, judgment, and execution. Trials are held in the High Courts, County Courts, and Courts of Summary Jurisdiction, and there are special Courts, such as Ecclesiastical, etc., for certain kinds of cases. In the Higher Courts special juries may be empanelled for important cases. Actions for debt may be followed by a judgment summons when no defence is entered, and committal to prison. An interlocutory judgment is one in which damages are assessed later against a non-appearing defendant.

Actium, a town and promontory at the entrance of the Ambracian Gulf (Gulf of Arta) on the W. Coast of Greece. Here Augustus gained his naval victory over Antony and Cleopatra, Sept. 2, 31 B.C.

Act of Bankruptcy, in law, means the commission of which by a debtor renders him liable to be adjudicated bankrupt if a creditor presents a petition against him within three months of such act.

Act of Congress, in the United States of America means a bill or resolution which has passed both houses of Congress and received the assent of the President.

Act of God, is a legal term for occurrences not attributable to human negligence or that could not have been avoided by ordinary foresight. It is mainly met with in insurance and shipping transactions; practically every charter-party and insurance policy form contains a clause relating to non-liability in the event of an Act of God.

Act of Parliament, may be i.e., local in character, e.g., an Act to promote a dock or railroad undertaking—or public and general—i.e., of general application and scope. Acts of Parliament are the statute law of the realm or the written law, as opposed to the unwritten common law or customary law. Until comparatively recent times, all Acts passed in one Session of Parliament were incorporated in one Statute and cited (e.g.) 20 Vict. c. 17; but now Acts may have short titles which can be used individually.

In England most Acts or Bills, as they are called before they receive the Royal Assent, are initiated in the House of Commons; passage in three successive Sessions of the Commons overrules rejection by the House of Lords. Finance Bills can only originate in the House of Commons, and cannot be rejected by the House of Lords.

Acton, a municipal borough of Middlesex, England, 7 m. from Charing Cross. Henry Fielding, the novelist, and Mrs. Barry, the actress, resided here. It has many industries, including dye works,

motor-car manufacturing and repairing works, and the driving-testing station of the London Passenger Transport Board. Pop. 70,500.

Acton, John Emerich Edward Dalberg Acton, First Baron, a grandson of the following, who became a leader of the Liberal Catholics in England, M.P. for Carlisle, and was made a baron in 1868. He was a man of wide learning, and the projector of the *Cambridge Modern History* which he did not live to see published. (1834-1902).

Acton, Sir John Francis Edward Bart., born at Besançon. Served in Tuscan navy; reorganised Neapolitan navy, and finally became Prime Minister of Naples. Owing to inveterate opposition to the French had to flee with the royal family in 1798 on account of French invasion, and again in 1806. (1736-1811).

Acts of the Apostles, a narrative account in the New Testament of the founding of the Christian Church chiefly through the ministry of Peter and Paul, attributed to Luke. It commences with the ascent of Christ in the year 33, and concludes with the imprisonment of Paul in Rome in 62.

Actuary, an expert in all matters connected with vital statistics, and one capable of calculating the probabilities of human life for purposes of insurance. In Roman times the actuary was the scribe who recorded the work of the Senate. The word was confirmed in its present specialised meaning by the foundation of the Institute of Actuaries in 1848 (incorporated 1884), followed by the Faculty of Actuaries in Scotland in 1856 (incorporated 1868).

Acunha, Tristan d', a Portuguese navigator, companion of Albuquerque, who gave his name to a group of volcanic islands in the S. Atlantic (1506); Nuna d', his son, viceroy of the Indies from 1528 to 1539; Rodrigue d', Archbishop of Lisbon, who in 1640 freed Portugal from the Spanish domination, and established the house of Braganza on the throne.

Adagio, a musical term used to indicate that a passage is intended to be played very slowly; by extension it is applied to whole movements and whole compositions as, e.g., Mozart's Adagio in B Minor.

Adam (i.e., man), the first father, according to the Bible, of the human race. Created of the dust of the ground on the sixth day, with the breath of life breathed into his nostrils, and placed in "a garden eastward in Eden." During a deep sleep, a rib was taken from him, and a woman (Eve) was made. Eve, tempted by the Serpent, ate of the fruit of the tree of the knowledge of good and evil, and persuaded Adam to eat also, for which they were both cast out of Eden. His sons were Cain, Abel and Seth.

Adam, Juliette Lambert, a notable French writer; born at Verberie, Oise. Married (1) La Messine; (2) Edmond Adam. Her salon, of the Second Empire, was the rendezvous of all the artists, writers, and composers of the day, and was politically influential. Wrote on the siege of Paris of 1871, on Egypt, on the Great War. Bitter in her attacks on Bismarck. In 1919 Clemenceau invited her to the signing of the Peace Treaty. (1836-1936).

Adam, Robert, a distinguished British architect, the most celebrated of four brothers (John, Robert, James, and William), born at Kirkcaldy, the son of an architect. Designed the Register House and the University, Edinburgh, though his most notable work was the construction in conjunction with his brother James) of the old Adelphi. Left his mark on English interior decoration and furniture also, being particularly successful in his treatment of fireplaces, mantelpieces and ceilings. (1728-1792).

Adamawa, a region in W. Africa, in the Cameroons, with a healthy climate and a fertile soil, rich in all tropical products. Watered by the Benue R., a tributary of the Niger. Chief town, Yola. Named after a chief Adamu, who founded the Yola emirate. (d. 1848). Pop. 800,000.

Adamites, visionaries in Africa in Bohemia in the 14th and 15th, who affected innocence, rejected marriage, and went naked.

Adamnan, St., abbot of Iona, of Irish birth, who wrote a life of St. Columba and a work on the Holy Places, of value as the earliest. (625-704).

Adams, John, the second president of the United States (1797-1801). He took a prominent part in the events that led up to the Declaration of Independence. (1735-1826). John Quincy, his eldest son, the sixth president. (1767-1848).

Adams, John Couch, an English astronomer, director of Cambridge Observatory, the discoverer simultaneously with the French astronomer Leverrier of the planet Neptune. (1819-1892).

Adam's Apple, (1) is a phrase to describe the prominence in the throat caused by the larynx and surrounding thyroid cartilage. (2) A popular Italian name for *Citrus limetta*, the sweet lime (order Rutaceae).

Adam's Bridge, a chain of coral reefs connecting Ceylon with India.

Adam's Peak, a conical mountain 7,420 ft. high, with a foot-like depression 5 ft. long and 2½ ft. broad on top, ascribed by the Mohammedans to Adam and by the Buddhists to Buddha.

Adamson, Rt. Hon. William, born at Halbeath, Fifeshire, son of a miner, entered the mines at age 11 and worked there for 28 years. Became Assistant Secretary of Fife, Kinross, and Clackmannan Miners' Association in 1902; General Secretary, 1908. M.P. West Fife, 1910-1931. Secretary for Scotland, January-October 1924, and 1929-1931. Chairman of Labour Party, 1917, and first Labour leader of the Opposition in the Commons. F.C., 1918. Lost his seat to a Conservative, 1931; defeated by a Communist, 1935. A trustee of the National Library of Scotland, 1927. (1863-1936).

Adana (Seyhan), vilayet and town of Turkey on the R. Seyhan, 30 m. from the Mediterranean. Cotton, wool, grain and fruit produced. Pop. (vilayet) 387,000; (town) 76,000.

Adanson, Michel, a French botanist, born in Aix, the first to attempt a natural classification of plants. (1727-1806).

Adaptation, the act of suiting or fitting a thing for a new purpose. A novel may be altered (adapted) to form a play. A play may be adapted to make a film, or a poem adapted to form the words of a song. In music the term usually implies some form of modification. A musician may adapt an orchestral work so that it can be performed by a single instrument.

In biology adaptation is really a form of unconscious evolution. It means the emphasis and growth of certain characteristics which prove useful in aiding survival. The word is also applied to a man who adapts himself consciously to his surroundings, altering his outlook or way of living so as to be more suitable to his immediate needs.

Adcock, A. St. John, English novelist and journalist. Abandoned law for literature in 1893, and contributed to periodicals a great deal. For some years editor of *The Bookman*. (1864-1930).

Adda, Italian river, tributary of the R. Po, which it joins 8 m. N. of Cremona. It rises in the Rhaetian Alps and flows through Lake Como; on its banks Bonaparte gained famous victories over Austria.

Addams, Jane, American social worker; of Senator John H. Addams, Quaker friend of Lincoln; travelled in Europe; founded Hull House Settlement, Chicago, 1889; organised Women's Peace Party and presided over International Congress of Women at the Hague, 1915; did much to relieve post-War distress in Europe; shared Nobel Peace Prize, 1931. (1860-1935).

Adder. See *Viper*.

Adder's Tongue Fern (*Ophioglossum*)

vilgatum), the English name of the fern genus, *Ophioglossum*; the name is suggested by the fact that the fructification is not, as in most ferns, on the back of the frond, but is in a lengthened spike, somewhat resembling a serpent's tongue.

Addington, a district of Croydon, Surrey, 10 m. from London. **Addington Palace** was formerly the residence of the archbishops of Canterbury. It is now a golf club and course.

Addington, Henry, Lord Sidmouth, an English statesman; was Speaker of the House 1789-1801 and after the retirement of Pitt 1801 formed a Ministry which lasted till 1804. He held other offices afterwards, including those of President of the Council 1805-1812, Lord Privy Seal 1806, and Home Secretary 1812-1821. (1757-1844).

Addis Ababa, capital of Abyssinia (Ethiopia); Italian E. Africa. The palace of the wife of Menelik who signed the treaty with Italy in 1896 is here. The occupation of Addis Ababa by the Italians on May 5, 1936, completed the conquest of the organised resistance of Abyssinia by Italy in the War of 1935-1936. On the approach of the Italians the Emperor, Haile Selassie I., fled and the populace looted the town.

Addiscombe, a district of Croydon, Surrey, England. The College of the East India Company was situated here, and among the famous men to receive training were Sir Henry Lawrence, Lord Napier, and Lord Roberts. Pop. 14,048.

Addison, Dr. Christopher, 1st Baron English politician. After a period as medical professor at Sheffield he entered the House of Commons as M.P. for Hoxton in 1910; became Parliamentary Secretary to the Board of Education and then Minister of Munitions. As Minister of Health he had much to do with the inauguration of the medical panel in the National Health Insurance scheme and was responsible for the Coalition Government's housing scheme. On a dispute arising over this he resigned, and later joined the Labour Party. Elected for Swindon, 1929, but was defeated, 1931; Minister of Agriculture and Fisheries, 1930-1931; re-elected 1934 and defeated again in 1935. Raised to the peerage in 1937. (1869-).

Addison, Joseph, a celebrated English essayist; studied at Oxford. A Whig in politics, he held a succession of Government appointments, resigning the last for a large pension; was pre-eminent among English writers for the purity and elegance of his style. His name is associated with the *Tatler*, *Spectator* and *Guardian*, as well as with a number of beautiful hymns. (1672-1719).

Addison's Disease, is a tuberculous, catarrhal infection of the adrenal glands, discovered by Dr. Thomas Addison of Guy's Hospital, London, in the middle of the 19th Century. It is a rare but usually fatal disease. The patient loses appetite and weight, and develops intestinal trouble. His skin usually darkens.

Addled Parliament, the second English parliament that sat in the reign of James I. in 1614. It was dissolved after sitting for two months without passing a single Bill because it refused to grant the King money until the important question of imports was settled.

Addlestone, a town of Surrey, England, in Chertsey urban district. Pop. 9,000.

Adelaar, Curt Sivertsen, a famous Norse seaman, who rendered distinguished naval services to Denmark and to Venice against the Turks. (1622-1675).

Adelaide, the capital of S. Australia, on the R. Torrens, which flows through it into St. Vincent Gulf, 7 m. SE. of Port Adelaide; a handsome, admirably planned city, with a cathedral, fine public buildings, a university and an extensive botanical garden; it is the great emporium for S. Australia; exports wool, wine, wheat and copper ore. Pop. 313,000.

Adelaide, Port, the haven of Adelaide (q.v.), a port of call with a commodious harbour.

Adelaide, Queen of William IV. of England, whom she married in 1818 as Duke of Clarence; eldest daughter of George, Duke of Saxe-Meiningen. (1792-1849).

Adeler, Max (pseudonym of Charles Heber Clark), American humorous writer. Author of an extravagant and immensely popular book called *Out of the Hurly-Burly*, 1874, and several similar works. Under his real name, he was a Philadelphia journalist and a lobbyist for high protection. (1841-1915).

Adelphi, a district of London by the Charing Cross within a short distance of Temple Bar. Owing to its fine view of the Thames, Adelphi Terrace, one of the thoroughfares, remained partly residential, and George Bernard Shaw resided there for many years. A street in the district was named after each of the four Adam brothers, James, John, Robert and William, architects of the 18th Century, and the founders of the Adam style of architecture and interior decoration, but the former William Street is now Durham Street. Some of the Adams' buildings including the Terrace have recently (1936) been pulled down.

Adelsberg. See *Postumia-Grotta*.

Aden, a fortified town on a peninsula in British territory S. of Arabia, 105 m. E. of Bab-el-Mandeb; a coaling and military station, in a climate hot but healthy. Separated from Bombay after the passing of the Government of India Act in 1936, when it became a crown colony. N. of the Colony is the Protectorate of Aden, which includes the Hadramaut, 42,000 sq. m. in extent, with a pop. of 100,000.

Adenoids, an enlargement of the lymphatic tissues at the back of the nose and throat. First signs of adenoids are continual colds and catarrhal trouble. Adenoids may become permanently enlarged and the general condition of the child be lowered. The glands of the neck may also become enlarged and breathing obstructed, the child seldom breathing through its nose. In severe cases of adenoids a simple operation is usually advisable. The adenoids and often the tonsils are removed ("enucleation").

Aderno, a town of Sicily, NW. of Catania, the site of an ancient town and some notable ruins. Pop. 40,000.

Adiantum, (maiden-hair ferns), mostly found in tropical America and cultivated elsewhere in hothouses. *A. capillus-veneris* occurs in England, though it is very rare.

Adiaphorists, Lutherans who in the 16th Century maintained that practices of the Romish Church, such as having pictures, lighting candles, wearing surplices and singing certain hymns in worship, obnoxious to others of them, were matters of indifference.

Adige, a river of Italy, which rises in the Rhaetian Alps and falls into the Adriatic after a course of 250 m.; a rapidly flowing river subject to sudden floods. Important battles were fought on its banks in the Great War.

Adipocere, a fatty, wax-like substance produced by the decomposition of animal matter in wet places.

Adipose Tissue, a tissue of small vesicles in the body filled with oily matter, in which there is no sensation, and a layer of which lies under the skin and acts as a fuel reserve, as well as giving smoothness and warmth to the body.

Adirondack Mountains, a high-lying, picturesque granite range in the State of New York; source of the Hudson and a popular holiday resort.

Adit, a horizontal entrance to a mine working; frequently employed in the past when the coal vein was approached horizontally from the sloping sides of a valley.

Adjudication Order, in law, an order made by the Court of Bankruptcy declaring the debtor bankrupt, so that his estate may be vested in a trustee (often the official receiver) and wound up for the benefit of his creditors.

Adjutant, a gigantic Indian stork, about 5 ft. in height, with a tremendous beak, bald head and neck, and an enormous pouch which can be inflated. This bird and two closely allied species in Asia and Africa all have the commercially valuable soft under-tail coverts known as "Marabout." It feeds on carrion and offal.

Also an army rank, denoting a regimental staff-officer who assists a commanding officer in administrative work.

Adler, Nathan Marcus, Jewish scholar and Chief Rabbi in Britain, in which office he was succeeded by his son Herman (1839-1911); born in Hanover; did much towards the establishment of a United Synagogue. (1803-1890).

Ad Libitum (*ad lib.*), essentially a musical term to denote that the performance of a passage is at the pleasure or discretion of the performer, or that an accompaniment is not essential and may be omitted if desired.

Admetus, King of Phæra, in Thessaly, whom Apollo served for a time as goat-herd. See *Alceste*.

Administration, one of the functions of government, in virtue of which a government or ministry is frequently called "an administration." It consists of the due application and performance of the existing laws, and to that extent is in contradistinction to the other function of a government, which is legislation or the introduction of new laws.

ADJUTANT
STORK

Administrative Counties are those counties or parts of counties, including the County of London and the county boroughs, which, under the Local Government Acts 1888-1929, form separate "administrative counties" of themselves for the purpose of managing, through county council, the administrative business of their respective areas.

Administrator, a legal term for the High Court (Probate, Divorce, and Admiralty Division) to manage the estate of a person who dies intestate, who has not appointed executors, or whose appointed executors have not survived him. The person next of kin to the deceased is usually appointed administrator; if the next of kin is the husband, his right is unquestioned.

Admiral, the highest rank in the Navy. In Britain there are four grades: Admirals-of-the-Fleet, Admirals, Vice-Admirals, and Rear-Admirals, each rank with a distinctive flag, the red cross of St. George being marked in the cantons.

Admiralty, The Board of, a department of State controlling and maintaining the Navy. The sole responsibility for the Navy was taken away from the Lord High Admiral by Henry VIII. and placed under a Navy Board. The Board continued to maintain political and executive control, but, owing to its being found inefficient and unwieldy in the Napoleonic Wars, it was considerably reformed by Sir James Graham in 1832.

The present Board of Admiralty consists of eight Lords Commissioners, together with the Permanent Secretary, a civil servant, who is responsible for the organisation and financial control of the Admiralty. Of the eight Lords Commissioners, three hold political appointments which are filled by the Government during its period of office, and the remaining five are officers of the R.N.

Admiralty Islands, a group NE. of New Guinea in the Pacific under German administration 1885-1914, but occupied by the Australians in 1914, and since the War under Australian mandate. Pop. 14,918.

Adobe, a Spanish word for sun-dried bricks made of clay or other suitable material mixed when damp with chopped straw, etc. Such bricks are extensively used for building construction in arid countries, the style having originally been introduced to Spain probably from N. Africa, and having been carried from Spain to Mexico and other parts of the New World.

Adolf, Friedrich, King of Sweden, during whose reign the nobles were divided into the two factions of the Caps, or the peace-party, and the Hats, or the war-party. (1710-1771).

Adonijah, son of David by Hagith; a spoiled child, in David's old age he proclaimed himself king, and was supported by Joab and Abiathar. David thereupon had Solomon proclaimed. Solomon at first spared Adonijah, but when he asked for Abishag in marriage, Solomon had him slain by Benaiah (1 Kings ii).

Adonis, in Greek legend a beautiful youth beloved by Aphrodite (Venus). He was killed by a boar and the flower anemone sprang from his blood. A dispute arose between Aphrodite and Persephone for the possession of him and was settled by Zeus allowing him to spend half the year with each.

Adonis, a genus of plants of the order Ranunculaceae. *A. autumnalis* is the English Pheasant's Eye.

Adoption, an act whereby a person assumes the responsibilities of parenthood towards the child of another, the

child becoming legally his own. Adoption has only been recognised legally in England subsequent to 1926. Previous to that, it was merely voluntary guardianship. Laws governing adoption had previously existed in other countries (e.g., France, Germany, the U.S.A.) with varying conditions regarding the age of the adopter, who is sometimes also required to be married. In England a proposed adopter must be not less than 25 years of age and the adoption must be sanctioned by a court. The natural parent loses all rights in the person adopted and the adopter takes his place in all respects.

Adoptionists, heretics who in the 8th Century maintained that Christ was the son of God by adoption and not by birth, and was one with Him in character and will.

Adour, a river of France, rising in the Pyrenees and flowing into the Bay of Biscay.

Adowa (or Adua), capital and trade centre of Tigré province, Abyssinia, 6,000 ft. above sea level. Italians under Gen. Baratieri met severe defeat here March 1, 1896. Italo-Abyssinian war 1935-1936 opened here Oct. 3, 1935, by Italian air attack on Adowa, which surrendered to Italian forces Oct. 7. Pop. prior to war, about 5,000.

Adoxaceae, a dicotyledonous order of the Saxifragaceae, with which it is sometimes included. There is only one species in the order, *Adoxa Moschatellina*, the moschatel, found in N. temperate countries, including England.

Adrastus, a king of Argos, the one of the Seven against Thebes, who died of grief when his son fell in the second.

Adrenalin, a secretion produced from the suprarenal glands situated on the upper part of the kidneys.

It causes many effects in all parts of the body, altering the blood pressure and the breathing movements. The amount of adrenalin secreted is increased by great fear or violent anger, giving rise to the usual symptoms of these emotions. Adrenalin has been prepared in the laboratory.

THE SUPRARENAL GLANDS (A-A')

Adria, an ancient town of Italy, on the Adriatic between the Po and the Adige; a flourishing seaport at one time, but now 14 m. from the sea. Pop. 15,800.

Adrian, name of six Popes: A. I., from 772 to 795, did much to embellish Rome; A. II., from 867 to 872, zealous to subject the sovereigns of Europe to the Popehood; A. III., from 884 to 885; A. IV., Nicholas Breakspear of Langley, Herts, from 1154 to 1159, the only Englishman who attained to the Papal dignity; A. V., in 1276; A. VI., from 1522 to 1533.

Adrian, St., the chief military saint of Europe for many ages, second only to St. George; regarded as the patron of soldiers and protector against the plague, died a martyr at Nicomedia, March 4, 303. Festival Sept. 8.

Adrianople. See Edirne.

Adriatic, The, an arm of the Mediterranean, 450 m. long, separating Italy from Yugoslavia and Albania, fringed with islands on the W. side (Yugoslavia) and only 45 m. wide at the Straits of Otranto. Chief ports are (Italian) Fiume,

Trieste, Venice, Ravenna, Ancona, Brindisi and Otranto; Ragusa (Dubrovnik) and Cattaro (Yugoslavia); Durazzo (Albania).

Adriatic Question, The, the question of the control of the Adriatic, involving, more or less, all the four littoral states, Italy, Yugoslavia, Albania and Greece. It was one of the prices paid to Italy (under the 1915 Secret Pact of London) for her participation in the Great War on the side of the Allies, that she should receive back "Italia Irredenta," including Trieste, Pola and a part of Dalmatia. As the inhabitants of the Adriatic littoral are largely Serbs and Croats, there has since been friction between Italy and Yugoslavia almost leading to war. To-day the Adriatic Question is almost non-existent, as Italy commands the entrance to the sea and has virtually absolute control.

Adullam, a royal Canaanitish city 10 m. NW. of Hebron, with limestone cliffs in the vicinity, a cave in which was David's hiding-place (1 Sam. xxii. 1).

Adullamites, an English political party so named by John Bright. In 1866 they deserted the Liberal side in protest against a Liberal Franchise Bill then introduced.

Adult Education, before the Great War, consisted mainly of University Tutorial classes run by the University Extensions lecturers and by the Workers' Educational Association. In 1924 the Board of Education realised the need for adult education and published a list of regulations. Grants are provided and classes in a wide range of subjects are taken by paid lecturers.

Adulteration is defined as "the admixture with an article, intended for food or medicinal use, of any other substance, whether noxious or harmless, or the abstraction of any constituent part, whereby in either case the quality, substance, or nature of the article is injuriously affected," and is governed by various Acts of Parliament, of which the principal is the Sale of Food and Drugs Act, 1875.

In the reign of Henry III. the first statute was passed making adulteration of human food a punishable offence. Various Acts to prevent the adulteration of tea and coffee were passed in 1718, 1724, 1730 and 1766. The Adulteration of Hops Act was passed in 1733; the Bread Acts in 1822 and 1836; butter was safeguarded by the Margarine Acts of 1887 and 1907. The duty of preventing adulteration by the terms of the various laws falls on the Local Authorities, who accordingly appoint public analysts.

Adultery, sexual intercourse outside of the lawful union by a married man or woman. In England adultery is not punishable by law, although it may become the basis of a law suit or a divorce case and involve the payment of damages. In ancient times adultery was often punishable by death, and instances of this are found in the Old Testament.

Ad Valorem Duties are those levied according to the value of the articles. The term is used also of stamp duties, which in many cases—e.g., in the case of an award, a bill of exchange and a lease—are payable, under the Stamp Acts, according to the value of the subject-matter of the particular instruments or workings.

Advent, from the Latin *adventus*, is the term given to the four weeks preceding Christmas. It was set by the Christian churches as a period of preparation for the festival of Christmas, and used formerly to be kept, like Lent, as a fast. Advent begins on the nearest Sunday to St. Andrews Day, November 30, which is the first Sunday in Advent, and is the beginning

of the Church year. The term "Second Advent" is used when speaking of the Second Coming of Christ or the Day of Judgment.

Adventists, various sects which believe in the imminence of the Second Coming of our Lord, found chiefly in America. The most famous are the Second Adventists, founded by William Miller in 1831, and the Seventh Day Adventists, founded in 1844.

Advertisement is an announcement, a notice made public. In Ancient Greece a public crier was employed to advertise, and he published abroad the wares of shopkeepers. The town-crier, announcing events and making known the loss of things, has existed in England for many centuries, and is still found in certain parts. The Romans advertised by the written word. In public ways notices were placed on the walls telling of forthcoming amusements, such as the gladiatorial shows. The Romans also published notices in a gazette.

In England various shopkeepers made known their wares by signs, such as a barber's pole or a hat or a wig, and men selling wares in the street had their cries, such as "Sweet Lavender," one of the old cries of London, the call of the rag-and-bone man, or of the coalman. English printed advertisements first came into fashion in the 17th Century.

Many of these early written advertisements were exaggerated and verbose statements, whereas the tendency to-day, particularly in placard and hoarding advertisements, is towards a shorter and bolder advertisement, skilfully designed to catch the eye. Advertising in its many varied forms, which include electric signs and sky-writing, is now a recognised aid to selling, studied almost as a science.

Advocate, Lord, chief law officer for the Crown in Scotland, public prosecutor and a member of the administration in power.

Advocates, Faculty of, the body of lawyers qualified to plead at the Scottish bar.

Advocates' Library, a library belonging to the Faculty of Advocates in Edinburgh, founded in 1682. It is now the National Library of Scotland and entitled to receive a copy of every copyright book published.

Advocatus Diaboli, the devil's functionary in the Roman Catholic Church appointed to argue against a proposed canonisation.

Adwoson, a perpetual right of presentation to a benefice, originally, for the most part, appendant to a manor. The lord of the manor could grant it away to some private person or to an ecclesiastical or other corporation. At the dissolution of the monasteries the adwosons with great titles passed by Crown grant to

separation has occurred, the living itself remains a rectory. By the Benefices Act, 1898, an adwoson cannot be sold by auction except as appendant to a manor or estate, and separation and sale of next presentation are forbidden. Recent law has much restricted the right of sale of adwosons, and in time this right will cease altogether.

Æacus, in Greek legend, King of the Myrmidons, renowned as an administrator of justice; after death appointed one of the three judges in Hades.

Ædiles, magistrates of ancient Rome. Amongst other duties they had charge of the public buildings and public structures of the city generally, the inspection of corn markets, weights and measures and responsibility for fires.

Ædui (or *Hæduli*), a powerful tribe of ancient Gaul inhabiting the country between the Saône and Loire, their capital being Bibracte. They early submitted to Rome, but revolted at the time of Vercingetorix, after which a new capital, Augustodunum (modern Autun), was established.

Ægæan Islands (also known anciently as the *Ægates* or *Goat Is.*), three in number off the W. coast of Sicily, where was fought the naval battle between the Romans and the Carthaginians, 241 B.C., which brought the first Punic War to an end, the Romans being victorious.

Ægean Sea, and islands, anciently that Sea between Asia Minor and Greece. Most of the *Ægean Is.* (now known as the *Ægean Archipelago*) belong to Greece. In the Tripolitan War (1911-1912) Italy occupied certain of the Dodecanese group, then belonging to Turkey, and ceded them to Greece, with the exception of Rhodes, in 1920, by treaty signed at Sévres. This treaty, however, was denounced by Italy after the Treaty of Lausanne, 1923, when Turkey surrendered the islands to Italy. The islands of the Dodecanese group are still claimed by Greece.

Ægeus, the father of Theseus, who threw himself into the *Ægean Sea* in the mistaken belief that his son, who had been to slay the Minotaur, had been slain by it.

Ægina, a Greek island 20 m. SW. of Athens, in a gulf of the same name. It played a prominent part in ancient Greek history, and has some important antiquities.

Ægis (literally, a goat's skin), the shield of Zeus, made of the hide of the goat Amalthea (*q.v.*), representing originally the storm-cloud in which the god invested himself when he was angry. The *Ægis* of Athena bore a representation of the Gorgon's head.

Ægisthus. See *Agamemnon*.

Ægospotami, a small river running into the Hellespont. The Athenians met complete defeat by Lysander here in 405 B.C.

Ægyptus, legendary King of Egypt, had fifty sons. When they demanded in marriage the fifty daughters of his twin-brother Danaus, Danaus gave each daughter a dagger and instructions to kill their husbands on the wedding night. This they did with the exception of Hypermetra, who spared Lynceus.

Aehrenthal, *Aloys Lexa von*, Count, born in Bohemia, Austro-Hungarian Foreign Minister, 1906-1912, and as such responsible for the annexation of Bosnia-Herzegovina in 1908 and the submission of Serbia. (1854-1912).

Ælfric, a Saxon author of the end of the 10th Century, known as the "Grammarian"; Abbot of Cerne and of Evesham, notable for his *Homilies* translated from the Latin. Another *Ælfric* was Archbishop of Canterbury 995-1005.

Ælia Capitolina, the name of the Roman colony established in Jerusalem by Hadrian after the expulsion of the Jews and the destruction of the city (c. A.D. 130).

Ælianus, *Claudius*, an Italian rhetorician who wrote in Greek and whose extant works are valuable for the passages from prior authors which they have preserved for us.

Æmilia Via (the *Æmilian Way*), a road constructed by *M. Æmilius Lepidus*, Roman consul, 187 B.C., from Ariminum to Placentia, one of the most famous of the Roman roads.

Æmilius Paulus, the Roman consul who fell at Cannæ, 216 B.C.; also his son, surnamed *Macedonicus*, so called as having defeated Perseus at Pydna, in Macedonia.

Æneas, a Trojan, the hero of Virgil's wanderings after the fall of Troy, settled in Italy, and was the traditional forefather of the Julian Gens in Rome.

Æneas Silvius. See *Piccolomini*.

Ænesidemus, a sceptical philosopher, born at Knossos in Crete, who flourished shortly after Cicero, and summed up under ten arguments the contention against dogmatism in philosophy.

Æolian Harp, a musical instrument, of a wooden sound-box across which strings are stretched, the strings being set in vibration and the sounds produced by the action of the wind.

Æolian Islands, (*q.v.*), the *Lipari Islands*.

Æolians, one of the Greek races, who, originating in Thessaly, spread N. and S., and emigrated into Asia Minor, giving rise to *Æolic*, one of the dialects of the ancient Greek language.

Æolus, the Greek god of the winds and ruler of the island of *Æolia*. According to Homer's *Odyssey*, he gave Odysseus a bag containing the unfavourable winds when he started on his homeward journey, but this was opened by his companions and he was driven back.

Æon, a Greek word literally meaning an age, and, among the Gnostics, one of a succession of powers conceived as emanating from God and presiding over successive creations and transformations of being.

Æpyornis, an enormous and long-necked, extinct bird, the existence

of which probably gave rise to the fabled roc of Arab story.

Naturalists refer it to the family *Æpyornithidae* and include in this family some twelve allied forms. The former existence of the bird was inferred from its eggs found in the marshes of Madagascar, which have a circumference of over 36 ins. and a girth of 30 ins. Later the bones were discovered, from which remains it was found that the bird was similar to, but larger than, the moa (*apteryx*). The bird is said to have resembled an ostrich in appearance, was over 7 ft. high, had long, stout legs, 4-toed feet, rudimentary wings, very small breast-bones and a crest on the forehead.

ÆPYORNIS

Aerated Waters, invented by Joseph Priestley (1733-1804), consist of water artificially charged with carbon dioxide under pressure, and sometimes contain dissolved salts, sugar and flavouring essences. The simplest kind is made by forcing carbon dioxide into ordinary tap-water, as in a "Sparklet" syphon, the gas being supplied under pressure in a small metallic bulb.

Aerial, in radio or wireless, is a wire or system of wires slung in an elevated position and insulated from its supports, serving to collect or transmit the electrical radiations; an insulated wire leads from it to the set. In Great Britain, a private receiving aerial must not exceed 100 ft. in length.

Aerial Navigation is carried out in one or more of three ways: viz., by pilotage, dead-reckoning, or navigation pure and simple. For short-distance flights the pilot may travel without a navigator and take his direction from visual objects on the ground.

When an aircraft is flying out of sight of land, the navigator is carried, and the position of the aircraft is determined, and constantly checked, by astronomical observations (as in marine navigation), by directional wireless bearings and by the use of instruments, which include an aero-compass, a drift indicator, an altimeter which registers pressure at different altitudes, and the gyro-turn indicator which records the equilibrium of the machine.

Dead-reckoning is a mixture of pilotage and navigation. A navigator is carried, and instruments, visual objects and wireless are all used to determine the course of the aeroplane, this being checked by the compass, estimation of the wind, drift, etc.

Aerodrome, a ground or water area, laid out for the landing and departure of aircraft. There are certain international requirements for a licensed aerodrome. Spaces for landing and departing aeroplanes must be divided and marked off clearly. Signals must be placed on all obstacles, and directional signals to show the direction of the wind must be visible. The tariff of charges must be displayed clearly and the aerodrome must possess adequate first-aid equipment. There must be sufficient lighting for night landing (such as the Neon lights at Croydon). There is generally an aerial lighthouse. Large aerodromes possess a Traffic Officer, on whose word alone aeroplanes may land or depart. The control tower is equipped with wireless, being connected by land-line to masts some distance away.

Aerodynamics, a comparatively new and still very largely empirical branch of physics, dealing with the forces existing between the atmosphere and an object when the two are in motion relatively to one another. Its development has been largely due to progress in aviation, which in turn has benefited from aerodynamical research. One of the principal methods is to experiment with scale models in wind-tunnels, such as that at the National Physical Laboratory at Teddington, though the application of the data so obtained to larger craft often encounters considerable difficulties.

Design of airships, and of aeroplane wings, to reduce friction and drag (streamlining), and to increase stability, owes much to aerodynamics. The mathematical difficulties are much greater when very high velocities have to be treated, for at low velocities—up to some 300 m.p.h.—air behaves roughly as though it were incompressible as far as aeronautical problems are concerned, while at higher velocities new and complicated phenomena appear.

Aero-Engines are essentially internal-combustion engines in which the ratio of weight to power is kept as low as possible; this is all the more important inasmuch as the weight of fuel to be carried is considerable, while a great deal of the energy of combustion is wasted in the exhaust gases. In early aeroplanes the engine was usually of the rotary type, consisting of a number of cylinders arranged radially and rotating round a fixed crank, but the high centrifugal force so produced has caused the rotary engine to become obsolete.

In the fixed radial type the cylinders rotate the crank, but are themselves stationary. Both fixed and rotary radial aero-engines are air-cooled, but water-cooling is used in a further type in which the cylinders are arranged much as in a motor-car. Attempts

are being made to perfect engines of the diesel type for use in aeroplanes, since the running costs would be lower and the fuel radius greatly increased.

Aerolite.

Meteorite.

Aeronautics. The term covers both aerostation and aviation, the former being flight by the aid of something lighter than air, the latter by the aid of a machine heavier than air. Stories of attempted flight and experiments to that end go back to the earliest history of man, but it was not until the time of Henry Cavendish that aerostation became a practical possibility. In 1766 he discovered that hydrogen was lighter than air, and this led to various experiments, among which may be mentioned that of Tiberius Cavallo, an Italian physicist, who inflated soap-bubbles with hydrogen and floated them.

The discovery of the balloon, however, was proceeding in France along different lines when in 1782 two brothers, French paper-makers of Annonay, Etienne and Joseph Montgolfier, succeeded in raising a silk balloon, as a result of heating the air contained in it. In 1783 Pilâtre de Rozier made the first flight in a heated-air balloon, but in the same year, Professor Charles, also a Frenchman, was making successful experiments with hydrogen-filled balloons. In 1784, in England, Lunardi made a two-hours' flight across country in a balloon, while a year later Blanchard and Jeffries made a hazardous flight across the Channel. An important landmark was the ascent in 1803 of a balloon with steering apparatus and carrying 14 passengers.

THE MONTGOLFIER'S BALLOON

Those early experiments led to the construction of dirigible airships, Count Zeppelin producing one in 1900. With the present century came experiments with gliders, some with machinery attached. Lillenthal, a German mechanic, made several successful flights in an apparatus of his own design, until he was eventually killed. In the U.S.A. Farman and Wilbur and Orville Wright were pioneers in the construction and use of the aeroplane. In England, however, in 1868 Stringfellow built a successful steam-driven machine with vertical screw propellers, combining "aero-planes" with aerial screws and reaching a high speed along a wire. Between 1890 and 1908, Ader, a Frenchman, and Orville Wright made important flights, the latter covering over 50 m. In 1909, Blériot crossed the Channel in a monoplane, and from then until 1914 progress was steady if slow.

The Great War gave an impetus to aviation, and design improved so rapidly that in 1919 Sir John Alcock and Sir A. W. Brown flew in a biplane across the Atlantic from Newfoundland to Ireland, 1,890 m. in just under 16 hrs. The same year a British airship crossed from Scotland to New York in 4 days. Commercial aviation now became a practical possibility, and international laws were drawn up for its control.

In 1925 Sir Alan Cobham flew to Cape Town and the following year made the return journey. In 1926 also he flew to Australia and back. An epoch-making flight was that of Charles Lindbergh who in 1927 made the first solo flight across the Atlantic, crossing from New York to Paris in a monoplane. In 1928 Capt. H. J. Hinkler, an Australian aviator, flew from England (Croydon) to Australia (Port Darwin), covering the distance (12,000 m.) in 16 days. This time was lowered to 10 days by Wing-Commander Kingsford-Smith in 1930.

In May of the same year a new record for the London-to-India solo flight was created by Miss Amy Johnson, who reached Karachi in 6 days. In 1929 a regular air-mail service had been established from London to India, and a network of air-lines had already spread over Europe. Meanwhile the Pacific was crossed in a three-engined monoplane, the *Southern Cross*, with a crew of four, including Kingsford-Smith. The N. Pole submitted to air conquest when in 1926 Admiral Byrd of the U.S. Navy with Pilot Bennett flew from Amsterdam Island to the N. Pole and back, 1,600 m. in about 16 hrs. Hubert Wilkins, the explorer, also crossed from Alaska to Spitzbergen, 2,000 m.

The Schneider Trophy, for which international aviation contests had been held at intervals since 1913, has been the occasion of high-speed flying. The Trophy was won in perpetuity in 1929 when Flying Officer Wag-

SCHNEIDER TROPHY WINNING PLANE

born won the race for Great Britain with an average speed of 328.6 m.p.h. In 1931 there was no race, but Flight-Lieut. Stainforth completed the course at an average speed of 383.67 m.p.h., his fastest circuit being at 408.288 m.p.h. The race was discontinued in 1932. In 1934 Stainforth's speed was exceeded by Francesco Angello, of the Italian Air Force, who reached an average speed of 449.68 m.p.h. over a two-mile course.

Several notable flights to Australia were made between 1930 and 1934. In the latter year the time taken was lowered to 2 days 22 hrs. 54 mins. 18 secs. as a result of the England-to-Melbourne International Air Race for a trophy presented by Sir Macpherson Robertson, won by C. W. A. Scott and T. Campbell Black in a D.H. "Comet" machine, built especially for the race.

A regular air service was opened from Croydon to Cape Town in 1932, following individual flights by J. A. Mollison, by his wife, Amy Johnson, and by two French fliers, Coulette and Salet. A Portsmouth-Johannesburg air race was flown in Oct. 1936 and was won by C. W. A. Scott and G. Guthrie in a Percival Vega Gull machine. Their time was 2 days 4 hrs. 56 mins.

Other notable flights were the round-the-world flight (1930) by Post (U.S.A.) and Gatty (Australia) in 9 days, the non-stop flight (1933) from Cranwell to Walvis Bay in a Fairey (Napier) monoplane in 2 days 9 hrs. 25 mins. (5,309 m.), and the non-stop flight (also 1933) from New York to Syria by Codes and Rossi in a Bleriot (Hispano Suiza) monoplane in 2 days 6 hrs. 44 mins. (5,657 m.). In 1933 Captains Stevens and Anderson of the U.S.A. in a stratosphere balloon had mounted to 74,000 ft. (over 14 m.) but the highest altitude reached by an aeroplane is 66,017 ft. (over 10 m.) flown by Lieut.-Colonel Mario Pezzi, an Italian Air Force pilot, on Oct. 22, 1938.

In 1937 a new record for the flight in each direction from England to Cape Town was set up by Clouston and Mrs. Kirby-Green. A U.S.S.R. machine flew 6,700 m. non-stop from Moscow to California via the N. Pole. Miss Jean Batten set up a new record for a solo flight from England to Australia. Five two-way crossings of the Atlantic were made successfully by Imperial Airways, paving the way for a regular trans-Atlantic mail and passenger service. In 1938 Flying Officer A. E. Clouston flew from England to New Zealand and back in less than 11 days and a service machine flew from

Edinburgh to London in 48 mins. In April 1938 H. F. Broadbent, an Australian flier, flew from Darwin (Australia) to Lymington in 5 days 4 hrs. 21 min., the previous record being that of the Australian woman flier, Jean Batten, who, in 1937, flew from Darwin to Croydon in 5 days 18 hrs. 15 min. In July 1938 Howard Hughes, an American, flew round the world in 4 days. Two out of three specially prepared British Wellesley long-range bombers broke the Russian-held long-distance record by flying 7,162 m. direct from Ismailia, Egypt, to Darwin, Australia. The third broke the record by 300 m. before landing on Timor Island for petrol.

Gliding has become an important part of aeronautics in recent years, both in Germany and in England. In 1936 Dittman reached an altitude of 8,860 ft. carrying a passenger, whilst in July 1938 an Englishman, Mr. J. F. Fox, flew 96 m. from Dunstable to Norwich. The British Gliding Association holds annual competitions. In 1938 Flight-Lt. Murray and Mr. J. S. Sproule stayed in the air 28 hours.

Interesting developments in aeronautics have been the construction of the autogyro (see *Aeroplane*) and of the Mayo Composite Aeroplane. The Mayo composite aeroplane consists of a big flying-boat carrying on its back a highly powered float seaplane. The two are locked together at the take-off, but at a height of three or four thousand feet the seaplane is released to pursue its course alone. By this means the seaplane is launched with a load of petrol, etc., which would prevent a take-off from the sea. A flight across the Atlantic has already been made, an unsuccessful attempt on the long-distance record and non-stop mail trips from England to Alexandria.

Aeroplane, or *Airplane*, a heavier-than-air flying machine moving under its own power; similar machines without engines are known as gliders. The chief parts of an aeroplane are the wings or planes, the engine or engines, the air-screw or "propeller" (actually the aeroplane is propelled only when the screw is at the back), the fuselage and the rudders. Monoplanes have the advantage of lightness and less air-resistance, and are therefore as a class speedier than biplanes; the latter, however, possess the compensation of greater stability and safety.

The frame of an aeroplane is mainly constructed of some light metallic alloy such as duralumin, while the wings are of fabric or thin metal, in a biplane the wings are connected by vertical struts. The wings are slightly curved in section, and are set at a small angle to the horizontal; hence when the aeroplane moves, a lifting force is produced. As the machine gathers speed, this force finally becomes equal to its weight, and the plane rises. Should the flying speed be lowered too much, the lifting force becomes less than the weight of the machine, and the plane "stalls."

To prevent stalling, and thus to allow landings to be made at comparatively low velocities, various devices have been introduced which suitably alter the resistance of the wings to the air and thus modify the lifting force; such, for example, are the Handley-Page slots in the wings, by opening or closing which—coupled with judicious use of the ailerons (hinged rear portions of the wings)—the pilot can maintain control in conditions where stalling would otherwise be inevitable.

To facilitate landing in confined spaces, aeroplanes of the autogyro and helicopter varieties have been invented. Both possess horizontal vanes rotating round a vertical axis, rotation in the autogyro being affected by the forward motion of the machine and in the helicopter by direct application of motive energy from the engine. The autogyro can fly at very low speeds, while the helicopter

can practically hover. The automatic control of pilotless aeroplanes has now reached a high level of achievement, and the day when such planes will carry out mail and cargo services is perhaps not far distant. The control is made by wireless, with astonishing precision, while the machines themselves are made to mark their course on a chart at the control station.

Aerotherapeutics, the treatment of disease by administration of air under varied conditions, e.g., enriched with oxygen or at lower or higher pressure than normal. It is usually also taken to include the open-air treatment of consumption, bronchitis, hay-fever and similar complaints.

Aerschot, a town in Brabant, Belgium, on the river Demer, 20 m. from Brussels. It was captured by the Germans Aug. 19, 1914. It was retaken and held for a few days by the Belgians in the following month, when it again fell to the Germans, remaining in their hands till the end of the Great War. Pop. 7,500.

Æschines, a celebrated Athenian orator, rival of Demosthenes, who in the end prevailed over him by persuading the citizens to believe he was betraying them to Philip of Macedon, so that he left Athens and settled in Rhodes, where he founded a school as a rhetorician (389-314 B.C.).

Æschylus, great Greek tragedian, who distinguished himself as a soldier at the battles of Marathon and Salamis before he wrote as a poet. It is said that he wrote some seventy dramas, though only seven of them are extant—the *Suppliants*, the *Perseæ*, the *Seven against Thebes*, the *Prometheus Bound*, *Agamemnon*, *Chaphori* and the *Womenis*, his plays being trilogies; born at Eleusis and died in Sicily. (525-456 B.C.).

Æsculapius, a son of Apollo and the nymph Coronis. He was taught the art of healing by Chelron, but destroyed by Zeus with a thunderbolt for restoring Hippolytus to life, and afterwards admitted among the gods as god of medicine. The chief centre of his worship was at Epidaurus, whence it was introduced to Rome. His chief attribute as a god was a staff with a serpent coiled round it, now used as the badge of the R.A.M.C.

ÆSCULAPIUS

Æsculus, the only genus of trees of the order Hippocastanaceae. There are 25 species found in N. temperate regions and in S. America. *A. Hippocastanum* is the familiar horse-chestnut.

Æsir, generic name given to the Gods in Scandinavian mythology; their number is stated at twelve or more, but is uncertain.

Æsop, a celebrated Greek fable writer of the 6th Century B.C., concerning whom little is known except that he was originally a slave, manumitted by Iadmon of Samos, and put to death by the Delphians, probably for some witticism at their expense.

Æsthetics, the science or philosophy of the beautiful in Nature and the fine arts, including the analysis of the theories and conceptions employed by artists in their work (whether formulated or unformulated), philosophic attempts to establish the nature and laws of Beauty, and the establishment of standards of taste and criticism in art.

Some perception and appreciation of beauty is implied in every work of art, and so it may be taken as axiomatic that the history of æsthetics must go back to the

earliest works of art, even before views about the nature of beauty were consciously formulated. It is also a curious fact that when man's creative artistic output has been greatest he has been least apt to philosophise about the conceptions he has been using.

Theorising about Beauty commenced in ancient Greece. Socrates thought a thing beautiful only so far as it was fitted to its purpose. Plato, the father of Idealism, saw in every beautiful object an outer or sensible form and an inner, invisible and permanent idea. These ideal forms of things, he claimed, can be perceived by man, and science consists of recalling the nature, forms, harmonies and proportions of those perfect and immutable essences. "Beauty in every form is one and the same," and to the man who perceives this will be revealed "a simple science, the science of Beauty everywhere, of Beauty everlasting, not growing or decaying, not waxing and waning, but Beauty absolute, separate, simple and everlasting."

Aristotle was concerned more with the analysis of matter-of-fact experience. He recognised that Beauty could exist in a state of repose (e.g., in still life). He did not identify the Beautiful with the Good, as did Plato, nor with the useful, like Socrates. On the other hand, when he formulated his three unities of tragedy he established standards of taste which have dominated many succeeding creative periods.

Since Greek days a tremendous body of literature has been built up on the subject. Baumgarten, the father of the science in Germany, identified the Beautiful with the perfect, and claimed (in his *Æsthetica*) it to be the purpose of Art to imitate Nature, since it is in Nature that we find the greatest perfection. Lessing in his *Laocöon* defined Beauty as "visible perfection, an imperfect image of the supreme perfection." Kant, who examined our faculty of pleasure and pain in his *Critique of Judgment* in order to discover its *a priori* principles, found Beauty to consist of a consciousness of disinterested pleasure. Schiller derived our artistic instincts from the *spieltrieb*, the play impulses, the natural outcome of an overabundant enjoyment of life. Hegel regarded Beauty as the disclosure of mind in the sensuous forms of things, and considered the Beauty of Art as higher than the Beauty of Nature in so far as mind is higher than Nature. Schopenhauer regarded a work of genius as being achieved through a kind of ecstasy and as existing for itself alone. "To be useless is its patent of nobility," he wrote.

Modern speculation is mainly concerned with the analysis of the psychological reactions of the observer to what he regards as beautiful. Harmony, proportion and colour all play their part in the make-up of a beautiful object, but the extent of the disagreement between man and man, race and race, and one age and another makes it certain that to some extent at least beauty is "in the beholder's eye."

Æstivation, a botanical term indicating the arrangement of the sepals and petals in the flower-bud. It is said to be *open* if they do not touch, *valvate* if they touch without overlapping, *imbricate* if they overlap. In zoology it means the state of torpor in which some animals pass the summer time.

Ætion, a Greek painter of the 4th Century B.C., who executed a picture representing the nuptials of Alexander and Roxanda. The president of the Olympic Games at which it was exhibited gave him his daughter in marriage.

Ætius, a native of Coele-Syria, lived in the 5th Century; leader of an extreme view in Arrianism, for which he suffered banishment.

Ætius, a Roman general, who resisted the aggressions of the Barbarians for twenty years, and defeated Attila the Hun at Chalons, 451; assassinated out of jealousy by the Emperor Valentinian III., 454.

Ætolia, a country of ancient Greece, N. of the Gulf of Corinth, now, with Acarnania (q.v.), a province of Greece.

Affidavit, an old legal form still in use, being a written statement of evidence given on oath before a magistrate or commissioner for oaths.

Affiliation, a legal process whereby a husband, the father of a child born out of wedlock is made responsible for its maintenance. The mother's evidence as to the paternity of the child is accepted provided there is certain corroborative evidence. The process is governed by the Bastardy Acts of 1845, 1872 and 1873, supplemented by the Affiliation Orders Act, 1914, and the Bastardy Act of 1923, by which a father is liable for maintenance up to £1 a week.

Affinity, in law, relationship through marriage, i.e., the relationship of a husband to his wife's blood relations and of a wife to her husband's blood relations. Secondary affinity is the relationship between a husband's relations and a wife's relations. Marriage is prohibited within the same degrees of affinity as of consanguinity (i.e., blood-relationship), with the one exception that a husband may marry his deceased wife's sister and the wife her deceased husband's brother.

Affirmation, a solemn statement unaccompanied by oath. It applies particularly to the deposition of evidence, the customary oath having long been omitted if the person affirming be a Quaker, Moravian, or Separatist. Later, by the Oaths Act, 1869, anyone objecting to an oath on conscientious grounds was permitted to affirm. The law, however, did not apply to the oath of allegiance given by Members of Parliament, but as Charles Bradlaugh refused to take the oath in 1880 on the ground that he had no religious belief, the law was amended. In 1888 a further Oaths Act was passed permitting affirmation in all circumstances.

Afforestation, as a science, dates back to the 18th Century. The depletion of the forest lands and failure to take steps to restore them had resulted in a serious shortage of timber. Marked variations of climate, less equable temperature, land erosion and floods were incidental results.

Afforestation, the process of replanting forests, is based on the science of forestry (i.e., consideration of climatic conditions, of the nature of the soil, and of the economic factors involved in the demand and supply of timber). The science was developed particularly in Germany and Switzerland, but the replanting of forest lands on a large scale is a development of the 20th Century.

In the British Isles the Forestry Commission, set up in 1919, was empowered to acquire land for replanting and to give grants for the afforestation of private land. Many hundreds of thousands of acres have been acquired by the Commission, and a large part planted, including land in the Esk and Uddon Valleys. Afforestation plans in the Lake District have aroused a great deal of controversy and some opposition.

Afghanistan, a country in the centre of Asia, between India on the E. and Persia on the W., its length about 800 m. and its breadth about 500 m., occupying 278,000 sq. m., with a mixed turbulent population, majority Afghans. Long a bone of contention between England and Russia, it is now independent.

The country is mountainous, the lofty ranges including the Hindu Kush. Communication with India is via the Khyber Pass, the

Gomal Pass and the Bolan Pass. The largest river is the Helmand. Others include the Kabul and the Hari Rud. The climate is extremely cold in the higher and intensely hot in the lower regions. The principal crops are wheat, barley, rice and maize. Other products include castor-oil, tobacco, fruit, cotton. The chief towns are Kabul (the capital), Kandahar, Ghazni and Herat.

Afghanistan first became an independent State when Ahmad Shah established himself as King of the Duranis in 1747. He extended his dominion into Persia and into India, where he inflicted a crushing defeat on the Mahrattas at Panipat.

Afghanistan has twice been involved in war with England. The First Afghan War ended in 1819 with the complete defeat of the Afghans and Sikhs at Guzerat after a massacre of the British at Kabul in 1841 and other reverses. The Second Afghan War ended in 1878 after the capture of Kandahar and Jalalabad, and England gained control of Afghan foreign policy.

In 1919 Habibullah Khan was assassinated and shortly afterwards Amanullah succeeded to the throne. In 1921 Britain recognised the independence of Afghanistan and the existing boundaries were accepted. In 1927-1928 King Amanullah and Queen Suraya visited Europe. Amanullah was an enlightened king and tried to impose Western culture on Afghanistan. The people revolted and he abdicated in favour of his brother Inayatullah. Amanullah returned to the throne in 1929, but a few months later again abdicated and fled the country. The present king is Zahir Shah, successor to his father Nadir Shah, a former minister of Amanullah, who was elected king after a period of internal strife, but who was assassinated in 1933. Pop. estimated at 11,000,000.

Afghans, The, a fine and noble but and shortly afterwards Amanullah succeeded to the throne. In 1921 Britain recognised the independence of Afghanistan and the existing boundaries were accepted. In 1927-1928 King Amanullah and Queen Suraya visited Europe. Amanullah was an enlightened king and tried to impose Western culture on Afghanistan. The people revolted and he abdicated in favour of his brother Inayatullah. Amanullah returned to the throne in 1929, but a few months later again abdicated and fled the country. The present king is Zahir Shah, successor to his father Nadir Shah, a former minister of Amanullah, who was elected king after a period of internal strife, but who was assassinated in 1933. Pop. estimated at 11,000,000.

Africa, one of the five great divisions of the globe, three times larger than Europe, seven-tenths of it within the torrid zone, and containing over 200,000,000 inhabitants of more or less dark-skinned races. Long a *terra incognita*, it was in the 19th Century parcelled out by European nations, chiefly Britain, France and Belgium.

Africa is almost entirely an enormous plateau, except in the extreme NW. and SW. It is higher in the S. and E. than in the N., where the continent is widest. A broad belt stretching in a NE. to SW. direction reaches a minimum elevation of 3,000-4,000 ft., and is crossed by the great Rift Valley. The principal mountains are the Drakensburg, Karroo, in the S., the mountains of Livingstone, Kenya and Abyssinia in the E., and the Atlas mountains of the NW. The principal rivers are the Niger, Congo, Orange, Limpopo, Zambesi and Nile, but, owing to the plateau formation of the continent, are of little value, being navigable only in part by river steamers. There are numerous lakes, the largest being Victoria, Tanganyika and Nyasa. In the N. lies the vast Sahara desert, while in the SW. is the Kalahari desert.

Most of the continent lies within the tropics. The mean annual temperature is therefore high except in the highlands. The equatorial belt is remarkable for its equable temperature, there being little difference between day and night and summer and winter temperatures. The equatorial belt is a region of heavy rainfall. In January, when the sun is overhead in the Southern Hemisphere, the area of heaviest rainfall is in the S., while in July the reverse is noticed. In the NW. and

there is winter rain followed by summer drought typical of Mediterranean climate.

The vegetation of N. Africa resembles that of the shores of the Mediterranean. In these subtropical regions are oranges, olives and dates, as well as wheat, barley, evergreen oak and cork trees. The baobab or monkey-bread tree, the cassava, the yam and the ground-nut (pea-nut, valuable in soap and margarine manufacture) thrive in the Sudan, as well as cotton, oil palms and sago palms. In Central Africa are dense belts of tropical forest, similar to those found by the Amazon, and in S. Africa are large tracts of grassland, prickly pear and aloe trees.

Animals of Africa include among pachyderms the elephant, the hippopotamus and the rhinoceros. Antelopes abound in S. Africa and zebras and giraffes in the E. Gorilla, chimpanzee, baboon and mandrill are varieties of primates found in Africa, while other characteristic animals are carnivores including lion, leopard, hyenas and jackal. Among birds the ostrich is peculiar to Africa, while myriads of flamingoes throng the great lakes. The most important mineral products are gold, diamonds, copper, coal and iron. Gold is mined in the Transvaal, diamonds at Kimberley, coal in Natal and Cape Colony and iron in Algiers.

The chief territorial divisions of Africa are: (1) British—Union of S. Africa, Tanganyika, Kenya, Anglo-Egyptian Sudan, British Somaliland, Nigeria, Gold Coast and Sierra Leone. (2) French—Algeria, Morocco, Tunis, French W. Africa, French Equatorial Africa, French Somaliland and Madagascar. (3) Portuguese—Portuguese W. Africa, Portuguese E. Africa. (4) Spain—Rio de Oro, Spanish Guinea and Spanish Morocco. (5) Italy—Libya, Italian Somaliland, Eritrea and Abyssinia. (6) Independent—Egypt, Liberia and, until 1936, Abyssinia.

Exploration. Africa was known as Libya to the Greeks and Romans. In 1482 Diaz discovered the Cape of Good Hope, and ten years later da Gama discovered the Cape route to India. Portuguese exploration continued along the coast and French adventurers journeyed into the interior at Senegal. Later Dutch settlements were established at the Cape, while the British explorer Mungo Park in 1795 reached Timbuktoo. Richard Lander reached the Niger mouth in 1830. In 1849 Livingstone explored Tanganyika, while Burton and Speke discovered the lake of that name shortly after. Speke, Grant and Baker extended the work, while Stanley crossed the continent from E. to W. in 1871.

Peoples and population. The most thickly populated parts of Africa are the Nile delta, the Lower Nile Valley and the basin of the Congo and Niger. The original inhabitants include Negroes, Hottentots, Bantus, Bushmen and dwarf tribes, such as the pygmies. European settlers include British, Dutch, Portuguese, French, Spanish, Italians, Germans and Turks, who occupy the extreme N. and S. Asiatic settlers include Hamites, Semites and Hindus. Berbers are descendants of the Semites, and Taurgs are a mixture of Berbers and Negroes.

Inland communication is defective. There are railways in the S. and N., and camel caravans solve transport problems in the great Sahara area, the two chief routes being the Eastern Caravan Route from Tripoli to Lake Chad, and the Western Caravan Route from Taadit to Timbuktoo. The projected Cape-to-Cairo railway is not yet completed, though it is possible to traverse the continent from N. to S. by waterways when the railway falls. Modern motor roads and passenger air service, however, are bringing Africa nearer to Europe. Most of the ocean maritime trade is in the hands of the British.

Africa, German East, a former German colony, conquered by the Allies during the Great War after twenty months' fighting by a comparatively small force, renounced by Germany under the Treaty of Versailles, and now held under Mandates by Britain (Tanganyika territory, *q.v.*) and Belgium.

Afridis, a treacherous tribe of eight clans, often at war with each other, inhabiting a mountainous region on the NW. frontier of India W. of Peshawar.

Afrikaner Bond, a South African to the Dutch whose purpose it was to bring about the union of South Africa in a republic. It secured the official use of the Dutch language in Parliament and the Law Courts. Under the influence of Cecil Rhodes the anti-British feeling in the Bond was modified.

Aga Khan (Sultan Sir Mahomed Shah), the head of the Ismaili

Mohammedans, a keen traveller and noted race-horse owner. For his loyal services during the Great War he was granted the status of a first-class chief. He spends much of his time in England. Played a prominent part in the Indian Round-table Conference, 1930-1931. P.O. 1934. In 1937 he was elected President of the League of Nations. (1876-).

THE AGA KHAN

Agadir, a port of Morocco at the mouth of the Sus some 20 m. S. of Cape Ghir, where in 1911 the German gunboat *Panther* was sent with promises of assistance to the natives in their struggle against France. Relations were severely strained, and a European war was only narrowly averted. Now a free port. Pop. 2,000.

Agag, King of the Amalekites, captured alive and spared by Saul, but hewn in pieces by Samuel (1 Sam. xv).

Agamemnon, a son or grandson of Mycenae; married Clytemnestra, sister of Helen, and became general-in-chief of the Greeks in the war against Troy after Paris had carried off Helen. On the advice of the soothsayer Calchas, sacrificed his daughter Iphigenia (*q.v.*) for the success of the enterprise he conducted. He and Cassandra, daughter of Priam of Troy, who had fallen to his lot, were assassinated by Egisthus and Clytemnestra on his return from the war. One of the principal characters in Homer's *Iliad*. His fate and that of his house are the subject of *Æschylus's* trilogy *Orestes*.

Agapæ, love-feasts among the primitive Christians in commemoration of the Last Supper at which the poor were entertained and succoured; closely associated with the eucharist. The feast and the eucharist were later separated and the agapæ finally suppressed by the Church owing to abuses which crept in.

Agapemonites, is the name given to persons who belonged to a community founded by H. J. Prince, a former clergyman of the Church of England, at Charlton in England in 1859. The community consisted of men and women who lived in one building, sharing their goods under the leadership of Prince, who was termed "the Lord" (Agapemone, the name of the community, signifies "the abode of love"). Other such societies existed before in England, such as the one known as the Family of Love in the 16th Century, and one was formed later in 1896, the members of which called themselves the "Children of the Resurrection."

Agar-Agar, a gum resembling gelatine and used as a medium for bacteria culture.

Agaricus, a genus of fungi of the sub-order Basidiomycetes, which includes the mushrooms and many so-called toadstools. They have a fleshy pileus or cap, with a number of almost parallel or radiating gills on the lower side, bearing spores, the whole being supported on a lengthened stalk. A vast number of species exist, usually classified according to the colour of the spores, some of them being edible, some poisonous. *A. campestris* is the common mushroom.

SECTION OF COMMON MUSHROOM

Agassiz, Louis, a celebrated Swiss naturalist, in the department especially of ichthyology, and in connection with the glaciers; settled as a professor of zoology and geology in the United States in 1846. (1807-1873).

Agate, a comprehensive name for the forms of the mineral silica, among which are included chalcedony, amethyst, cornelian, jasper, the so-called "Scotch pebbles" and opal. The stones are polished for decoration and are also used as burnishers for gold-leaf. The chief European working of agate is in Germany. They are also found in Canada (Ontario), Australia, Africa and India.

Agatha, St., a Sicilian virgin who suffered martyrdom at Palermo under Decius in 251; represented in art as crowned with a long veil and bearing a pair of shears, the instruments with which her breasts were cut off. Festival, Feb. 5.

Agave, a genus of plants of the order Amaryllidaceae, having a short stem and bearing large, fleshy, pointed leaves with a spiny edge in a large rosette. It grows slowly and flowers only once after a period of 10 to 60 years. The principal species, *Americana* (Century Plant or American aloe), grows chiefly in Mexico, but may be cultivated as a greenhouse plant in England. In Mexico the head of the rapidly growing inflorescence is cut off and the sap collected, this, after fermentation, yielding pulque, the national drink of Mexico. By distillation mescal is produced. Other species yield fibre of commercial value including sisal.

Agde, a French Mediterranean seaport in the dept. of Hérault and 3 miles from the mouth of the Hérault. Pop. 9,500.

Agen, a town in France on the Garonne, 84 m. above Bordeaux, capital of the dept. of Lot-et-Garonne. Pop. 23,000.

Agent, in law a person authorised to do certain acts by another person, called his principal. This authority can sometimes be delegated. His powers may be general or for a special purpose. Agents may be public or private, and may be classified into brokers, factors, bailiffs, etc. Generally speaking, the maxim *qui facit per alium, facit per se* (i.e., the act of an agent is considered as an act of his principal) applies; and the principal is liable for damage done to third parties through his agent's negligence or want of skill.

Agésilas, a Spartan king, victorious over the Persians in Asia and over the allied Thebans and Athenians at Coronea, but defeated by Epaminondas at Mantinea after a campaign in Egypt; d. 360 B.C., aged 84.

Agincourt, a small village of France in Pas-de-Calais, where Henry V. in a bloody battle defeated the French, Oct. 25, 1415.

Agistment, in law, a form of contract, under which one man (an agister) undertakes to receive the calves, horses or other animals of another and graze them on his land. He is liable under the contract for negligence or for not taking proper care of the animals.

Aglaia. See *Graces*.

Agnano, Lake of, a lake near Naples, used for medicinal baths; occupied the crater of an extinct volcano, its waters in a state of constant ebullition.

Agnes, St., a virgin who suffered martyrdom, was beheaded because the flames would not touch her body, in 303 during the reign of Diocletian; represented in art as holding a palm-branch in her hand and a lamb at her feet or in her arms.

Agni, the god of fire in the Vedic mythology, begets the gods, organises the world, produces universal life; one of the three terms of the Vedic trinity, Soma and Indra being the other two; is depicted as having three legs, seven arms, and two faces and accompanied by a lamb.

Agnosticism, the doctrine which disclaims the supersensuous, or denies that we know or can know the absolute, the infinite, or God. The word itself was coined by Professor Huxley in 1869 and the exponents were Herbert Spencer and Tyndall, while the chief conclusions of modern agnosticism are stated in the philosophy of Kant.

Agnus Dei, the figure of a lamb bearing a cross as a symbol of Christ, or a medal with this device; also a prayer in the Mass beginning with the words, "Lamb of God."

Agonic Line, a line drawn on a map of the world through all parts at which the magnetic needle points due N. and S.

Agora, the public meeting and marketplace and centre of civic life of an ancient Grecian city, corresponding to the Roman forum.

Agoraphobia, a neurasthenic condition, the characteristic of which is a fear of open spaces. The nervous disorder with opposite symptoms is claustrophobia.

Agouti, Marie Catherine Sophie de Flaviigny Comtesse d', a French authoress under the pseudonym of Daniel Stern. Formed a *liaison* with Liszt, by whom she had three children, one of whom, Cosima, married Wagner. (1806-1876).

Agouti, (Asvet)

a rodent of the order Dasypodidae, native of Brazil, Paraguay and Guinea; very destructive to roots and sugar-canes.

AGOUTI

Agra, a hand-some city on the Jumna, in a province of the same name, which with Oudh forms the United Provinces. Famous for, among other monuments, the Taj Mahal, a magnificent mausoleum erected near it by the Emperor Shah Jehan for himself and his favourite wife; it is a centre of trade and seat of manufactures of Indian wares. Pop. 230,000.

Agram. See *Zagreb*.

Agricola, Cnæus Julius, a Roman general, and father-in-law of Tacitus, who wrote a biography of him. Spent a number of years in Britain, during which he conquered N. Wales and Mona (Anglesey, the seat of Druidism) and advanced

as far as the North and Clyde. He was recalled by the Emperor Domitian in 87, and retired into private life. (87-93).

Agricola, Johann, a follower and friend of Luther, who became his antagonist in the Antinomian controversy as to whether the Mosaic law or the law of the Gospels alone was binding on Christians. (1492-1566).

Agricola, Rodolphus, a learned and accomplished Dutchman, much esteemed by Erasmus, and much in advance of his time; his most important work, *Dialectica*, being an attack on the scholastic system. (1442-1485).

Agricultural Co-operation, systems of organised marketing, consisting of local associations, the members of which are paid for all produce at an agreed rate, subject to later increase from any profits that may accrue; also of organised buying of agricultural requisites. Has developed on widely different lines in different countries, the governing factor being the question whether the industry is supplying a home or an export market. Advance has been more notable in countries such as Denmark than in England.

Agricultural Credit. Since the beginning of the century a movement to assist agriculture by the formation of credit banks or co-operative societies has been progressing, especially in Germany and the Continent generally. These banks exist for the provision of long and short credit, the former for land mortgage, and the latter for financing the work of producing and marketing the crops. They raise money either by issuing shares or by borrowing from joint-stock banks on the security of their whole membership. Agricultural credit on these lines has not been very successful in England.

Agriculture, originally only the cultivation of the soil, now stands for farming generally, including stock-raising. Stick-digging and hoeing go back to very early times, and it is known that the invention of the plough was prehistoric.

Owing to the fact that growing crops need protection, agriculture encourages the formation of communities. The early Eastern civilisations developed irrigation, but Greek methods were non-irrigated. The system of fallow-land prevailed. The Romans followed the Greeks, but were not conspicuous as agriculturists. Rotation of crops, however, became the widely recognised system.

In northern Europe agriculture developed on the same lines, although even in the Middle Ages implements were crude. In England even in Saxon times rotation of crops was practised. Some land was left permanent pasture, some cultivated in a series of three fields—one under grain, one legumes, one fallow. Feudalism encouraged farming, but later, towards the 16th Century, agriculture for purposes of local food supply began to give way to agriculture and land development for general profit.

The soil now underwent more thorough cultivation. Seed was sown in drills instead of broadcast, and a four-field system of rotation was introduced. Potatoes and root-crops were introduced into England in the 17th Century, and the same century saw great improvements in stock-breeding. In the 18th and 19th Centuries enclosure of farmland (commons, &c.) was enforced, causing great hardship to the labourer and small-holder, but agriculture was put on the footing of a national industry. By 1850 England was capable of feeding 17,000,000 people on home-grown food.

To-day English agriculture tends to decline, for although the land is capable of growing some of the finest wheat and produce in the

world, competition with foreign and Dominion imports of grain, cattle and meat has so depressed prices that in several branches of agriculture a remunerative return is to be had only through a Government subsidy, or a quota system.

Modern farming is aided by research in agricultural science, and by improvements in agricultural machinery. Many farms in England, however, have been worked out and would, under present conditions, prove too costly to restore to a profitable state of cultivation. Soil, even under rotation cultivation, needs replenishing with expensive manures, and the combined cost of manuring and draining poor soil is prohibitive.

Trenches and draining are essential for heavy clay and marshland. Clay soil is benefited by an autumn dressing of such manures as lime and basic slag. Farmyard manure, a more or less complete fertiliser, is good for both light and heavy soils. The straw in its composition binds the former and lightens the latter. It is spread on the fields in autumn. In addition to artificial manures, green manuring (e.g., lucerne) must be mentioned; and for this purpose a rapidly-growing green crop, such as clover, is sown, and when in full leaf is dug or ploughed into the ground.

Grassland on a farm may be either temporary or permanent. If permanent, it may be sown for grazing or for hay. Grassland usually needs manuring with farmyard manure over and above what is obtained from the cattle grazing on it. Heavy grassland is benefited by basic slag in autumn and superphosphate in spring. Temporary grassland will be converted periodically back into arable land.

The regular rotation of crops usually consists of an autumn-sown cereal followed by a root crop for fodder, a spring-sown cereal, and a leguminous forage crop. Crops grown will include such cereals as wheat and oats sown in autumn, barley and oats sown in spring. Root-crops include potato, sugar-beet, turnip, carrot and parsnip. Pulse-crops are beans and peas, and forage crops may consist of lucerne, vetches, clovers, kale and cabbages.

Agriculture and Fisheries,

Ministry of, that Whitehall Government department which is concerned with the interests of agriculture and fisheries in England and Wales. Its predecessors were the Board of Agriculture created in 1793 and the Fishery Department of the Board of Trade. Its many duties include the administration of the Agricultural Holdings Acts, research, marketing schemes and legislation, and agricultural credits. There are analogous but separate departments in Scotland and Northern Ireland.

Agriculture, International Institute of, formed in 1905 to collate and publish information on all agricultural topics. Most of the leading nations of the world are represented.

Agrirentum, an ancient city, now Girgenti, on the S. of Sicily, still showing traces of its former grandeur.

Agrimony, is the English name for a small, yellow-flowered plant growing in dry places. The flowers grow one above the other on a tall spike. The botanical name is *Artemisia eupatoria*; it belongs to the natural order Rosaceae, of the class *Legandria*. The name is also given popularly to other plants, including hemp agrimony (*Eupatorium cannabinum*).

AGRIMONY
(*Artemisia eupatoria*)

Agrippa, Herod. See Herod.

Agrippa, M. Vipsanius, a Roman general, the son-in-law and favourite of Augustus, who distinguished himself at the battle of Actium, and built the Pantheon of Rome. (63-12 B.C.).

Agrippina, the daughter of Vipsanius and the granddaughter of Augustus; married Germanicus. Banished from Rome by Tiberius, and d. in 33.

Agrippina, the daughter of Germanicus and the former, born at Cologne, and the mother of Nero. Her third husband was her uncle, the Emperor Claudian, whom she got to adopt her son, and then poisoned him, in order to place her son on the throne; but the latter, resenting her intolerable ascendancy, had her put to death in 59.

Agtelek (or **Agtelek**), a village N.E. of Budapest, in Hungary, with vast stalactite caverns, some of them of great height.

Agua Calientes, a high-lying inland trading town in Mexico, so named from hot springs there. Pop. 82,000.

Ague, an old-fashioned name for the alternate shivering and sweating.

Agulhas, **Cape** (i.e., the Needles), the most southerly point of Africa, 100 m. ESE. of the Cape, and, with the bank of the whole S. coast, dangerous to shipping.

Ahab, son of Omri and King of Israel; fond of splendour. Married Jezebel, daughter of the King of the Zidonians, and worshipped Baal, the worship of God being restored by Elijah after a three years' famine.

Coveted Naboth's vineyard, as a result of which Jezebel secured a false accusation of blasphemy against Naboth and had him stoned to death. Was slain in battle at Ramoth-gilead.

Ahasuerus, the name of several kings of Persia mentioned in the Bible. One of them, mentioned in Ezra iv. 6, has been identified with Cambyses. Another, mentioned in Esther i. and x, who repudiated his wife Vashti and married Esther, has been identified with Xerxes.

Ahaz, a King of Judah who first brought Judah under tribute to Assyria when he sought help against the kings of Damascus and Israel (2 Kings xvi and 2 Chron. xxviii).

Ahaziah: (1) eighth King of Israel (896-895 B.C.); son of Ahab and Jezebel. He was on the point of setting out against the Moabites, who had refused their yearly tribute, when he fell through a lattice at his palace. He appealed to the oracle at Baalzebub, but was rebuked by Elijah, who prophesied that he would not rise again from his bed. (2) The fifth King of Judah, an idolater who allied himself with Jehoram. Revolution broke out in Israel under the direction of Jehu and Elishah. Ahaziah was mortally wounded and died at Megiddo.

Ahimelech, Jewish high-priest at Nob; son of Ahitub and great-grandson of Eli. Deceived by David, Ahimelech succoured him when he fled from Saul, and gave him back the sword of Goliath in the presence of Doeg, who at Saul's command slew him and eighty-four other priests (1 Sam. xxi, xxii).

Ahuachapan, a town and coastal dept. of the Republic of Salvador, Central America. Pop. (town) 29,500.

Ahwaz, a town of SW. Iran (Persia) on the R. Karun. Pop. 30,000.

Ahmadnagar, town 122 m. E. of Bombay. Captured from the Mahrattas in 1803 by Gen. Wellesley and ceded to the British in 1817. Pop. 50,000.

U.E.

Ahmed Shah, son of Sammaun Khan, the founder of the Afghan dynasty and the Afghan power; after the murder of Nadir Shah elected King of the Duranis in Afghanistan, in 1747; invaded India in 1748, and in 1756 captured Delhi and installed a viceroy. His viceroy was displaced and in a further campaign he utterly defeated the Mahrattas at Panipat, (1724-1773).

Ahmedabad, the chief town of Gujarat, in the Bombay Presidency, a populous city and of great splendour in the last century of which gorgeous relics remain. Pop. 314,000.

Aid, in the feudal system a payment or tax made by tenants of land to the king. Such tax was taken when the king's eldest son was knighted; when his eldest daughter was married, and when he himself stood in need of ransom. It was abolished in the reign of Charles I. A grant-in-aid is a payment made by the Imperial Government, as, e.g., by way of subsidy to a depressed industry, or to a Colonial government to meet expenditure beyond the capacity of the local revenue.

Aidan, St., Bishop of Lindisfarne, founder of the monastery there and the apostle of Northumbria, sent thither from Iona on the invitation of King Oswald in 635. (d. 651).

Aide-de-Camp, in the army a staff officer, responsible for conveying the commands of the general or chief of staff to the officers concerned. A number of aides-de-camp are attached to the king's household.

Aigues Mortes, a port in the French dept. of Gard, 3 m. from the Mediterranean with which it is connected by canal. St. Louis sailed from here in 1248 and 1270 for the Crusades. Pop. 4,500.

Aiguillon, Duc d', corrupt minister of trial for official plunder of money, which was quashed at the court of Louis XV. He was the tool of Mme. Du Barry. (1720-1782).

Ailanthus, a genus of eight Asiatic and Australian trees of the natural order Simarubaceae. *A. glandulosa*, the "tree of heaven," was introduced to England from China in 1751. It is deciduous and is notable for its foliage, the leaves being somewhat palm like, and its decorative fruits. Other species are useful timber trees in Australia.

Ailsa Craig, a rocky islet of Ayrshire, Scotland, 10 m. NW. of Girvan and 2 m. in circumference, rising abruptly out of the sea at the mouth of the Firth of Clyde to a height of 1,097 ft.

Ain, a French river, has its source in the Jura Mts., and falls into the Rhone. Also a dept. of France between the Rhone and Savoy. Pop. 317,000. Cap. Bourg.

Ainley, Henry, English actor. Born at Leeds, he worked in a bank before going on the stage, and made his first London appearance in 1900 at the Lyceum. He won a name chiefly for his acting in melodramas and in Shakespeare. (1879-).

Ainos, a primitive, thick-set, hairy race, now confined to Yezo and the islands N. of Japan, aboriginal to that quarter of the globe, and fast dying out. They are animal-worshippers and frequently set up on the outskirts of their villages curious cleft poles with the head of an animal in the fork. (See illustration on right.)

Ainsworth, William Harri- See Ainos son, an English historical novelist, the author, amongst other

B

popular books, of *Rookwood*, *Jack Sheppard*, *Old St. Paul's*, *The Tower of London*, etc. (1805-1882).

Ain-Tab (Turkish, Gaziantep), town in Turkey in Asia Minor, 60 m. NE. of Aleppo; trade in hides, leather and cotton. Pop. 40,000.

Aintree, a village in Lancashire, 6 m. course on which the Grand National is run.

Air, the gaseous envelope which surrounds the earth, is a mixture of several gases, the chief of which are nitrogen (78%), oxygen (21%), argon and its congeners (about 1%), and carbon dioxide (0.03-0.04%); the proportions are given by volume. Oxygen is the gas which supports life and combustion and causes rusting; the nitrogen acts as a diluent and is now the chief source of nitrogenous compounds (see *Ammonia*); the carbon dioxide is the principal food of green plants, its removal by the latter being counterbalanced by the respiration of animals and plants and the combustion of coal, coke, petrol and other carbonaceous fuels; argon and neon are extracted from the air for use in electric filament and discharge lamps.

Airbrake, a mechanism whereby the coaches in a railway train may be applied. The first airbrake was invented by George Westinghouse in 1869; modern Westinghouse brakes are automatic.

Air Council, consists of the President, who is Secretary of State for Air, the Vice-President, who is the Under-Secretary of State for Air, the Chief of Air Staff and Senior Air Member of the Council, the Air Member for Personnel, the Air Member for Supply and Organisation, the Air Member for Research and Development, and the Permanent Secretary of the Air Ministry. The Council was established by the Air Force (Constitution) Act of 1917, and is responsible for the control of the R.A.F. The Director and Committee controlling the Meteorological Office are appointed by the Air Council.

Aircraft-Carrier, an armed vessel built to carry aircraft and providing facilities for air operations while at sea. Battleships and cruisers equipped with catapults for launching aeroplanes are to be distinguished from aircraft-carriers proper.

Aird, Sir John, famous contracting engineer. With his father he was responsible for the erection of the Crystal Palace and for its removal from Hyde Park to Sydenham, and for numerous docks and railways all over the world. Also built the Assuan and Assuit dams on the Nile, and sat in Parliament from 1887-1905. (1833-1911).

Airdrie, a town in Lanarkshire, 11 m. E. of Glasgow, in a district rich in iron and coal; has cotton-mills, foundries, etc. Pop. 26,000.

Aire, a river of Yorkshire, England, a tributary of the R. Ouse; rises in the Pennines and flows through the Aire Gap; Leeds stands on its banks.

Airedale, a popular variety of terrier, said to be a cross between the Welsh terrier and the otter-hound; first bred in 1853. Larger than the original terrier, it has a hard, close, wiry coat of a rich tan and black, weighs from 40 to 45 lb. It has a short back, straight, sloping shoulders, deep chest and powerful jaws.

Air Engine, an engine in which air is heated and so expands, pushing the working piston along a cylinder. The air is sub-

sequently cooled and returns to its original volume. The practical difficulties of such engines are very great, and with the advent of the internal-combustion engine and cheap electrical power they have become of little general importance. They possess, however, the advantage of being comparatively fool-proof, and so are occasionally used for pumping, etc., in cases where skilled attention is unobtainable or too expensive.

Air Force, Royal, was constituted by Act of Parliament in 1917 by amalgamating the Royal Flying Corps with the Royal Naval Air Service. In 1918 this amalgamated force was organised and controlled by a newly-created Air Ministry. The R.A.F. consists of the Royal Air Force proper, the Air Force Reserve, the Auxiliary Air Force Reserve and the Territorial Air Force. The Air Council controls matters relating to the R.A.F. and the defence of the realm by air.

The R.A.F. is organised into the Air Defence of Great Britain and the Overseas Commands; the former comprises five Commands—namely, Western Area, Central Area, Fighting Area No. 1, Air Defence Group and Inland Area—together with the separate home commands at Halton and Cranwell and the Coastal Area Command. The Overseas Commands are the Middle East, India, Iraq, Aden, the Mediterranean and the Far East.

The R.A.F. possesses four main classes of aircraft: bombers, fighters, bomber-transport machines and flying-boats. The R.A.F., besides having its own use as a fighting unit, co-operates with the Army and Navy.

Air Mail. See *Aviation*, *Civil*.

Air Ministry, The. See *Air Council*.

Airport, an aerodrome used for the purposes of civil aviation, in particular for international air traffic which demands the presence of customs facilities. See also *Aerodrome*.

Air Pumps, are devices for exhausting air from vessels, or for driving air through vessels at increased pressure; in the latter sense they are usually called air blowers. The earliest pump was invented in 1650 by Otto von Guericke, Burgomaster of Magdeburg (Saxony), and improvements were soon made by the Hon. Robert Boyle and Robert Hooke, who constructed the first efficient "pneumatical engine."

Air-Raid Precautions (commonly referred to by the initial letters, A.R.P.). Owing to the development of aerial warfare, attention has been more and more focused on protection for towns and the civilian population against explosive, incendiary and gas attack from the air in any future war. Most European countries have been experimenting and developing precautionary measures. In England, where the population is concentrated in large urban centres and aerial attack might prove particularly disastrous, an Air Raid Precautions Bill received the Royal Assent on Dec. 22, 1937.

Plans for protection are far-reaching and include the provision of bomb-proof shelters, special fire-fighting apparatus and squads to deal with the effects of incendiary attack, the provision of gas-masks for the whole population (by Dec. 1, 1937, a special factory had turned out 20,000,000 masks), instructions to the general populace for rendering rooms gas-proof, and decontamination squads for ridding the streets of such gases as mustard gas, which are liable to hang about for periods.

London, with its population of 8,000,000 (one-fifth of the population of the British Isles), presents a special problem. In the event of a future war a barrage of wire

AIREDALE

supported by balloons will be used as in the Great War, and plans have been made for at least a partial evacuation of the population. Sound-detectors will be used to discover the presence of enemy aeroplanes immediately they cross the coast, and anti-aircraft guns and fighter aeroplanes will challenge any invaders.

Experiments in "blacking-out" districts have been made in order to bring a closer reality of the problem to civilians. All lights are extinguished and squads of trained men are given experience in fire-fighting and in gas-decontamination as though a raid had actually taken place.

Air Raids, attacks from the air upon opponents situated on the ground or, more especially, upon the civilian population in towns. During the Great War the first Zeppelin raid on England was over Norfolk on January 19, 1915. Raids followed over the Tyne, over Southend and in May over London. Up to 1917, 52 Zeppelin raids killed and wounded 1,800 people, including military. With increased defences against Zeppelins, aeroplane raids proved more effective, and the daylight raid over London on June 13, 1917, killed 137. Aeroplane raids at night continued at frequent intervals, the casualties amounting to 2,500 killed and wounded. Air raids and air attacks have been extensively used as an instrument of modern warfare in Abyssinia, Spain and China.

Airship, a type of lighter-than-air machine which has developed from the free balloon. There are three types: non-rigid, semi-rigid and rigid. The non-rigid or dirigible balloon consists of a gas-filled envelope from which is suspended a car with engine to propel it. Experiments in Great Britain before the Great War were mainly with this type. One was built in 1916, 262 ft. long, 57 ft. wide, and, with two 240-h.p. engines, was capable of 58 m.p.h.

The semi-rigid have a long, rigid keel attached to the bottom of the envelope, thus permitting a greater load. The largest and with the greatest carrying power are the rigid, constructed of a framework of light metal, such as an alloy of aluminium, with a light cover, inside which the gas is carried in a series of chambers. Count Zeppelin completed the first in 1900.

The English airship R.100 crossed the Atlantic and back, but it is now dismantled, following the disaster to its sister-ship, R.101, which crashed in flames in 1930, and airship construction has been abandoned in England.

It is the opinion of many authorities that airships are impracticable, although this was somewhat discounted by the commercial success on a regular Friedrichshafen-New York crossing of the German *Graf Zeppelin* and the *Hindenburg*. The disaster to the *Hindenburg* in 1937 resulted in the withdrawal of the German trans-Atlantic airship service for a time. Since then an agreement has been discussed between Germany and the U.S.A. for a supply of the non-inflammable gas helium (produced almost solely in the U.S.A.) for commercial airships.

Airy, Sir George Biddell, English astronomer. Professor of astronomy and mathematics at Cambridge, and Astronomer Royal 1836-1881. He was the first to enunciate the complete theory of the rainbow and helped in the preparation of a catalogue of stars. President of the British Association in 1851. (1801-1892).

Aisle, in a church or other building a gangway between seats, especially that on each side of the nave. In architecture it may also mean any long narrow space separated from the body of a building by a column of arches or piers.

Aisne, a French river which, after a course of 150 m., falls into the Oise near Compiègne. Also a dept. in the N. of

France. Area 2,866 sq. m. Pop. 485,000. Capital Laon. It was the scene of three battles in the Great War, in the autumn of 1914, after the Battle of the Marne, in the spring of 1917, when Nivelle vainly attacked the "Hindenburg Line," and in the summer of 1918, when the Germans were making their final advance.

Aïsse, Mile., a Cressonine brought to France about 1700; left letters on French society in the 18th Century. (d. 1733).

Aix, a town, the ancient capital of Provence, 20 m. N. of Marseilles, the seat of an archbishopric and a university; founded by the Romans 123 B.C.; near it Marius defeated the Teutons. Pop. 38,000.

Aix, Isle of, a fortified French island in the Atlantic, at the mouth of the Charente.

Aix-la-Chapelle. See *Aachen*.

Aix-les-Bains, a small town near Chambéry, in the dept. of Savoy, and much frequented by invalids for its waters and baths. Pop. 9,000.

Ajaccio, the capital of Corsica, the birthplace of the Bonaparte family, of Cardinal Fesch, and Bacciocchi. Pop. 24,000.

Ajaigarh, a salute state in Bundelkhand, Central India Agency. Pop. 85,000. Also a hill fort in the state.

Ajalon, Valley of, in Palestine, scene of a battle between Joshua and five Canaanitish kings, during which the sun and moon stood still at the prayer of Joshua, to enable him to finish his victory (Josh. x). Allotted in the first place to the tribe of Dan. It is the modern Yalo.

Ajanta, the name of a range of hills in Hyderabad and Berar, and a village in Hyderabad near which have been discovered a series of caves with unparalleled examples of Buddhist fresco-painting, "the most perfect and complete Buddhist Caves in India, without any admixture of Brahmanism."

Ajax, the name of two Greek heroes in the Trojan war, and the synonym of a fiery and impetuous warrior: one, the son of Telamon of Salamis, who, on the death of Achilles, contended with Ulysses for his arms, but was defeated, in consequence of which he lost his reason and put an end to his life; the other, the son of Oileus, swift of foot, like Achilles, suffered shipwreck on his homeward voyage, as a judgment for an outrage he perpetrated on the person of Cassandra in the temple of Athena in Troy.

Ajmer, a city in the heart of Rajputana, capital of the province of Ajmer-Merwara; well built, and contains some famous edifices. Pop. 120,000.

Ajodhya, an ancient city of Oudh, 77 m. E. of Lucknow, once, on religious grounds, one of the largest and most magnificent cities of India, now in ruins; the modern town is an insignificant place, but has an annual fair, attended by often 600,000 pilgrims.

Akabah, a gulf between the Sinai Peninsula and Arabia, forming the N.E. inlet of the Red Sea. On the E. side is the town of Akabah, the sole sea outlet of the British mandated territory of Trans-Jordan.

Akbar (Jellal-ed-Din Mohammed), the great Mogul emperor of India, who, after a minority of a few years, assumed the reigns of government at the age of eighteen, and in ten or twelve years had the whole of India N. of the Vindhya Mts. subject to his rule. He was wise in government as well as powerful in war, and one of the largest-minded rulers in history. (1512-1605).

Akenside, Mark, an English physician, productions and pieces, the *Hymn to the*

Naiads and a poem of a didactic nature entitled the *Pleasures of Imagination* much quoted from at one time. (1721-1770).

Akh(e)naton, name adopted Amen-hotep IV.,

Pharaoh of the 18th dynasty, who tried to establish a monotheism—prohibiting all worship except of the sun-god, Aten. He removed the Egyptian capital from Thebes to Tel-el-Amarna. He is the Nefer-Khopru-Ra of the Amarna Tablets; his wife was Nefer-titi. His intolerance helped to defeat his ends; but he is the subject of the enthusiastic *Life and Times of Akhnaton*, 1910, by A. E. P. B. Weigall. He reigned 17 years, beginning about 1375 B.C.

AKH(E)NATON

Akhmim, a town in Egypt on the right bank of the Nile with relics of very early days and a cotton industry that is still famous. Pop. 28,000.

Akiba, Ben Joseph, a famous Jewish rabbi of the 2nd Century, a great authority in the matter of Jewish tradition; flayed alive by the Romans for being concerned in a revolt in 135.

Akkad. See *Accadians*.

Akkas, a wandering race of negro dwarfs in Central Africa, with large heads and hairy bodies, who live by hunting.

Akkerman. See *Cetatea Akab*.

Akmolinsk, a province of Kazak S.S.R., Russia. Also the capital of the province. Pop. (town) 10,000.

Akron, a town in Ohio, U.S.A., capital of Summit Co., Ohio, and on the Ohio Canal, seat of manufactures and centre of traffic. Pop. 255,000.

Akyab, a district (on the N.E. of the Bay of Bengal) and town, in the Arakan division of Burma, the town since 1826 having been the seat of government of Arakan. Pop. (town) 38,000; (district) 480,000. Area (district) 5,136 sq. m.

Alabama, one of the United States of N. America, traversed by a river of the name, a little larger than England, highly fertile and a great cotton-growing country, and abounding in iron, coal and marble; bounded on the W. by the Mississippi, on the N. by Tennessee, and the E. by Georgia. First explored 1540; admitted to the Union 1819; in the civil war as a Confederate State sent almost the whole white population to fight. Cap. Montgomery. Pop. 2,648,000.

Alabama, The, a war vessel built at Birkenhead for the Confederates in the American Civil War, for the devastation done by which, according to the decision of a court of arbitration, the English Government had to pay heavy damages of three millions of money.

Alabaster is of two kinds. In the past the alabaster used for carving was a marble-like carbonate of lime. That of to-day is a softer sulphate of lime, and looks something like white marble. This type is used in Italy a great deal for small carvings, such as statuettes.

Alagoas, a maritime state of Brazil, it was formerly a part, with tropical products as well as fine timber and dye-woods. Cap. Maceio. Pop. (estimated) 1,310,000. Also a town, formerly capital of the same province. Pop. 5,050.

Alais (Ales), a town at the foot of the Cevennes, in the dept. of Gard, France, in the centre of a mining district; once the stronghold of French Protestantism. Pop. 36,000.

Aland Isles, a group of 300 small islands, of which 80 are inhabited; fortified by Russia; restored to Sweden 1919. Used by the Germans in the Great War as a naval base. Now part of the Finnish Republic. Pop. 27,000.

Alans, a barbarous horde from the East, who invaded W. Europe in the 4th and 5th Centuries, but were partly exterminated and partly ousted by the Visigoths.

Alarcon y Mendoza, Juan Ruiz de, a Spanish dramatist born in Mexico, who, though depreciated by his contemporaries, ranks among the foremost dramatic geniuses of Spain; he was a humpback and was very unpopular; d. in 1639.

Alaric I., King of the Visigoths, a man of noble birth, who at the end of the 4th and beginning of the 5th Centuries ravaged Greece, invaded Italy, and took and pillaged Rome in 410; died at Cosenza, in Calabria, the same year, at the early age of thirty-four.

Alaric II., King of the Visigoths, whose dominions included all Gaul and most of Spain; defeated by the Franks at Poitiers, and killed by the hand of Clovis, their king, in 507.

Ala-Shan, a sparsely-inhabited, almost barren province of Mongolia, in the Gobi Desert, bounded E. by the Ala-shan Mts., which reach 11,000 ft.

Alaska, an immense territory belonging to the U.S.A. by purchase from Russia, extending from the W. of Canada to Behring Strait; it was the scene of the Klondyke Gold Rush of 1896, prior to which the inhabitants, chiefly Indians and Eskimos, lived by hunting and fishing and by the export of salmon. Chief industries: salmon-fishing, mining, furs, sealing (the fur seals being protected by the U.S.A. on the Pribilof Is.). Area 590,880 sq. m. Pop. 59,000, rather more than half being whites and the rest mainly Eskimos and Indians. Cap. Juneau.

Alassio, a fishing town and seaside resort of Liguria, on the Italian Riviera, province of Genoa. The surrounding hills are thickly wooded. Pop. 6,000.

Alava, the southernmost of the three but least populous; rich in minerals, and fertile in soil. Area 1,180 sq. m. Pop. 90,000. Cap. Vitoria.

Alb, a long linen robe worn by officiating priests; formerly it was also used by those newly baptised, whence the first Sunday after Easter, on which they appeared in it, was called *Dominica in albis*—i.e., literally, the Lord's day in Albs.

13TH-CENTURY ALB

Albacete, a province in Spain, with a capital of the same name, 140 m. S.E. of Madrid. Pop. (town) 42,000; (province) 325,000.

Alba Longa, a city of older than Rome, and reputed to have been founded by Ascanius son of Aeneas. Destroyed by Tullus Hostilius.

Alban, St., the first martyr in Britain to the Christian faith in 303; represented in art as carrying his head between his hands, having been beheaded. Supposedly put to death at St. Albans, where a church was built to commemorate him and a monastery subsequently added.

Albani, Mme., adopted name of Marie Emma Lafrenesse, an operatic soprano singer, of French-Canadian descent, born in Chambly, Quebec; made her opera debut at Messina at the age of 18. From 1872 to 1896 appeared regularly at Covent Garden, and in 1911 made her farewell appearance at the London Albert Hall. Made a D.B.E. in 1925. (1852-1930).

Albania, a democratic monarchy in the Balkans with its coast on the Adriatic and an area of 20,000 sq. m., comprising the former Turkish province of Scutari and parts of Kossovo and Yanina. In Nov. 1912, during the 1st Balkan War, Ismail Kemal and 80 Albanian chiefs proclaimed the independence of Albania, and this was recognised in 1913 by the Treaty of London. The country was invaded by troops on both sides during the Great War. In 1917 Italy occupied the whole country and established a protectorate. An Albanian government was set up, however. Albania became a member of the League of Nations in 1920. A Republic was declared in 1925 and Ahmed Zogu became President. In 1928 Zogu became the first king, as Zog I. Cap. Tirana. Pop. 1,003,000.

Albano, Lake of, a small crater-like lake, 15 m. SE. of Rome, near which rises the Castel Gaudolfo, where the Pope has a villa. The lake lies at the foot of Mt. Albano, the highest point in the Alban Hills. Near the lake, and on the ancient Apian Way, is a town of the same name. Pop. 8,000.

Albany, the old Celtic name for the Scottish highlands. Also famous bachelor chambers off Piccadilly, where Gladstone and Macaulay, among others, were residents.

Albany, a town in W. Australia, on King George Sound, 261 m. SE. of Perth, a port of call for Australian liners. Pop. 4,000. Also the capital of the State of New York, on the Hudson R., a well-appointed city; seat of justice for the State, with a large trade and numerous manufactures. Pop. 127,000. Other towns of the same name are (1) the county town of Dougherty Co., Georgia, U.S.A. Pop. 14,500; (2) county town of Lynn Co., Oregon, U.S.A. Pop. 4,800; (3) county town of Gentry Co., Missouri, U.S.A. Pop. 3,000.

Albany, river of Canada, 450 m. long, rising in Lake St. Joseph and flowing into James Bay. Fort Albany and Albany I. are at the mouth.

Albany, Louise Maximilienne Caroline, Countess of, daughter of Prince Adolphus of Stolberg, wife of the English Young Pretender, Prince Charles Stuart. The marriage was a failure and she fled, being released in 1788 by the death of Charles. She visited England in the company of the Italian poet Alfieri, to whom she was rumoured to be married. (1752-1824).

Albany, Dukedom of, earliest dukedom in Scotland, conferred 1398 under Robert III. (christened John) on his brother Robert Stewart (c. 1340-1420), whose son and successor, Murdoch, was put to death, with his son Walter, by James I., 1425. Title conferred by James II., c. 1456, on his second son, Alexander (c. 1454-c. 1485), and extinguished in Alexander's son John, 1536. Arthur, second son of James V. (b. and d. 1541), styled Duke of Albany at birth. Lord Darnley, husband of Queen Mary, made Duke of Albany 1565. Before his accession to the throne in 1567 James VI. was Duke of Albany; his son Charles also, from 1600 till he became Charles I., 1625. James II. of Great Britain was Duke of Albany 1660-1685. The title was included with the dukedoms of York created 1717, 1760 and 1784. Leopold, youngest son of Queen Victoria, was

made Duke of Albany in 1881 (1853-1884); succeeded by his posthumous son Leopold, Duke of Saxe-Coburg and Gotha from 1890, who became an alien enemy and lost title 1918.

Albatross, the largest and strongest of the sea-birds; ranges over the

southern seas, often seen far from land. It is a white bird of the Diomedidae family, which is included in the Procellariiformes or Petrel tribe, and has a powerful hooked beak and webbed feet. Three genera and fifteen species are recognised, the largest being the Wandering Albatross (*Diomedea exulans*), the wing-spread of which is as much as 11 ft. It is a superstition among sailors that it is disastrous to shoot one (cf. Coleridge's *Ancient Mariner*).

Albeniz, Isaac, Spanish composer and pianist, born in Gerona. Composed several operas and many great piano-forte pieces. (1860-1909).

Alberoni, Giulio, an Italian of humble birth, became a Cardinal of the Church and Prime Minister to Philip V. of Spain, wrought hard to restore Spain to its ancient grandeur, was defeated in his project by the quadruple alliance of England, France, Austria, and Holland, and obliged to retire. (1661-1752).

Albert, a French village in the dept. of the Somme on the Ancre, which was used as a base by British troops in the Great War.

Albert, King of the Belgians; born in Brussels, a younger son of Philip Count of Flanders, and nephew of King Leopold II.; became Count of Flanders in 1905 on the death of his father, and after travelling succeeded to the throne in 1909. A popular monarch, the events of 1914 established his reputation in the eyes of the world. He took command of the Belgian forces after the German invasion, and in 1918 led an offensive of the Allies which ended in the recapture of the Belgian coast. He was killed through a fall while mountaineering in the Meuse Valley. (1875-1934).

Albert I., Emperor of Germany from 1898 to 1908, eldest son of Rudolf of Hapsburg, "a most clutching, strong-fisted, dreadfully hungry, tough, and unbecomingly man, whom his nephew at last had to assassinate, and did assassinate, as he crossed the river Reuss with him in a boat, May 1, 1908."

Albert II., a successor, "who got three crowns—Hungary, Bohemia, and the Imperial—in one year, and we hope a fourth," says the old historian, "which was a heavenly and eternal one," for he died the next year, 1439.

Albert, Margrave of Brandenburg, surname, named "the Bear," founder of the Margravate of Brandenburg and of the greatness of Prussia; distinguished as a soldier and for his services in the interests of Christianity and civilisation. (1100-1170).

Albert, Prince, second son of Ernest, Duke of Saxe-Coburg-Gotha; born Aug. 26, 1819, he became the consort of Queen Victoria in 1840, and from his prudence and tact was held in high honour by the whole community; he died at Windsor of typhoid fever in 1861. (1819-1861).

Albert Hall, a large circular hall used for oratorios, concerts, public meetings, etc., and capable of holding 10,000 persons. It stands opposite the Albert Memorial to the Prince Consort, and its building was completed in 1871. Possesses one of the greatest organs in the world.

ALBATROSS

Albert Medal, a medal of gold (1st class) and of bronze (2nd class) instituted in 1888 by Queen Victoria in memory of the Prince Consort, awarded to civilians for gallantry in saving life at sea, though since 1877 it has been awarded for similar gallantry on land. The ribbon is of blue and white vertical stripes (for bravery at sea) and crimson and white stripes (for bravery on land). For bravery at sea an anchor is intertwined with the monogram V.A.

ALBERT MEDAL
FOR GALLANTRY
AT SEA

Albert Memorial, a monument in memory of Albert the Prince Consort, husband of Queen Victoria, erected in Kensington Gardens. It was designed by Sir Gilbert Scott.

Albert (Albert Nyanza), a lake in Equatorial Africa, forming the boundary between the Belgian Congo and Uganda Protectorate, discovered by Sir Samuel Baker in 1864. 110 m. long by 25 broad, and 2,500 ft. above sea-level, in the Great Rift Valley. The White Nile has its source in this lake.

Albert, the last Grandmaster of the Teutonic knights, who took zealously to Protestantism and came under the influence of Luther, who advised him to declare himself Duke of Prussia, under the wing of Sigismund of Poland. In so doing he became founder of the Prussian State. (1490-1568).

Alberta, a fertile prairie province of W. Canada, with large forests, on the E. slope of the Rocky Mountains, the S. abounding in cattle ranches, and the mountainous districts in minerals; produces wheat and coal. Bounded by British Columbia on the W., Saskatchewan on the E., and the U.S.A. on the S. Established as a province in 1905. Area 255,285 sq. m. Pop. 731,605. Cap. Edmonton.

Albertus Magnus, one of the scholastic philosophers and theologians of the Middle Ages, teacher of Thomas Aquinas, supreme in knowledge of the arts and sciences of the time, and regarded by his contemporaries in consequence as a sorcerer. (1190-1280).

Albertville, (1) a town in the dept. of Savoie, France, near Chambéry. Chief among its many manufactures is pottery. Pop. 5,500. (2) A settlement in the Belgian Congo on Lake Tanganyika. It is the terminus of the Congo Railway.

Albi, a town and archbishopric of some antiquity and note in the dept. of Tarn in the S. of France, 22 m. NE. of Toulouse. Pop. 29,000.

Albigenses, a religious sect, odious as which sprang up about Albi, in the S. of France, in the 12th Century, against which Pope Innocent III. proclaimed a crusade, which was carried on by Simon de Montfort in the 13th Century, and by the Inquisition afterwards, to their utter annihilation.

Alboin, King of the Lombards in the 6th Century, from 561 to 573; invaded Italy as far as the Tiber, and set up his capital in Pavia; incurred the resentment of his wife, who had him assassinated for forcing her to drink wine out of the skull of her father.

Alboni, Marietta, a former famous Italian operatic (contralto) singer, a pupil of Rossini; appeared with great success in many capitals. (1823-1894).

Albuera, a Spanish village 12 m. SE. of Badajoz, scene of a victory (May 16, 1811) of General Beresford over Marshal Soult.

Albufera, a lake on the coast of Spain, 7 m. S. of Valencia, near which Marshal Suchet gained a victory over the English in 1812.

Albumins, or proteins, are colourless, tasteless and usually amorphous (i.e., non-crystalline) substances, forming essential constituents of plants and animals. One of the commonest is white of egg or egg albumin—which differs from most of its class in being crystalline. With water, albumins form colloidal solutions (see Colloids), and on heating such solutions the albumins coagulate. Coagulation may also be brought about by the addition of alcohol. The elements carbon, hydrogen, oxygen and nitrogen are present in all albumins, while some contain sulphur and phosphorus as well. In the body they provide for growth and repair. Their structure is extremely complicated and has not yet been elucidated.

Albuquerque, the largest city of New Mexico, U.S.A., on the Rio Grande; an important railway junction and centre of a timber and agricultural district. Pop. 26,000.

Albuquerque, Alfonso d', a celebrated Portuguese patriot and navigator, the founder of the Portuguese power in India, who, after securing a footing in India for Portugal by the capture of Goa, headed a number of expeditions to Malacca, the Malabar coast and Aden. He was recalled, but died at sea and was buried at Goa. (1433-1515).

Alburnum, sap-wood, the part of the tree lying immediately under the bark and outside the heart of the tree, up which the sap rises.

Albury, a town in New South Wales, Australia, the centre of a wine-growing district on the R. Murray. It is on the banks of the R. Murray, 386 m. by rail from Sydney. Pop. 10,542.

Alcala de Henares, a town in the province of Madrid, the birthplace of Cervantes, long the seat of a famous university founded by Cardinal Ximenes, which was removed to Madrid in 1836. Pop. 12,000.

Alcamenes, a distinguished Greek sculptor, chiefly known for his statues of Hephestus and Aphrodite (5th Century B.C.).

Alcamo, a town of Sicily in a fertile district where olives, lemons and oranges are produced, once a Saracen town. Pop. 58,000.

Alcantara, a town of Spain, on the Tagus, near Portugal, with a bridge of six arches, 670 ft. long and 210 ft. high, built in honour of Trajan in 104. The Order of Alcantara, a religious and military order, was established in 1176 here, for defence against the Moors, and was suppressed as such in 1835. Pop. 3,000.

Alcazar, a town of Spain in the province of Ciudad Real, with an old Moorish castle. Pop. 16,000.

Alcedo, a genus of birds of the water nae, Kingfisher sub-family (Alcedinæ), to which belongs the English Common Kingfisher (*A. ispida*) (q.v.).

Alcester, a market town in Warwickshire, England, at the confluence of the rivers Aine and Arrow. Pop. 2,196.

Alcester, Frederick Beauchamp Paget Seymour, Baron, English admiral who served in the Crimean war, and who commanded the English fleet which bombarded Alexandria in 1882, for which he was made a baron. (1821-1895).

Alcestis, the wife of Admetus, who gave herself up to death to save her husband. Hercules descended to the lower world and brought her back. She is the subject of one of the tragedies of Euripides.

Alchemy, the early analysis of substances which has in modern times developed into chemistry, and which aimed chiefly at the discovery of the philosopher's stone, of a universal solvent, and of the elixir of life.

Alcibiades, an Athenian of high birth, and related to Pericles, possessed of a handsome person, brilliant abilities and great wealth, but of a wayward temper and depraved, whom Socrates tried hard to win over to virtue, but failed. He involved his country in a rash expedition against Sicily, served and betrayed it by turns in the Peloponnesian war, and died by assassination in exile. (450-404 B.C.).

Alcidae, the name of the family of birds which includes the Auks, Pullins, Razor-bills, Guillemots, etc.

Alcira, a walled town in Spain in the province of Valencia. Pop. 22,000.

Alcmene, the wife of Amphitryon and the mother of Hercules.

Alcock, John, an eminent ecclesiastic of the reign of Edward IV., founder of Jesus College, Cambridge, and distinguished for his love of learning and learned men; d. 1509.

Alcock, Sir John William, with Sir W. Brown made the first

SIR J. ALCOCK'S
AEROPLANE

trans-Atlantic aeroplane flight from Newfoundland to Clifden, Ireland, in 16 hrs., on June 15, 1919, a feat for which he was knighted. During the Great War he had been taken prisoner by the Turks when in the Royal Naval Air Service. He died as a result of a flying accident six months after the Atlantic crossing. (1892-1919).

Alcohol, an Arabic word formerly applied to the substances (lead sulphide and antimony sulphide) used to blacken the eyelids and eyelashes (modern kohl), but now used to denote several groups of carbon compounds, and, in particular, spirit of wine or ethyl alcohol. Its last significance was given to it, quite arbitrarily, by Paracelsus (1493-1541).

The simplest alcohols are of the general formula $C_nH_{2n+1}OH$, where n is a whole number; the first members are methyl alcohol or methanol (wood spirit), ethyl alcohol or ethanol (ordinary alcohol), propyl alcohol, or propanol, butyl alcohol or butanol and amyl alcohol or pentanol, while succeeding members are named according to the number of carbon atoms in them—hexanol, heptanol, etc.

Methanol is a colourless, volatile, inflammable liquid made by the distillation of wood, but more frequently synthesised by passing a mixture of carbon monoxide and hydrogen over a heated catalyst (oxides of zinc and chromium). It is very poisonous, and is used for denaturing ordinary alcohol—i.e., for rendering it unfit for human consumption.

Ethyl alcohol or plain "alcohol" is obtained by the fermentation of sugar (as in the preparation of wines) or of starch (as in the industrial process). Like methanol, it is a colourless, volatile liquid, burning with a blue and very hot flame, but its poisonous character is much less marked. Pure or "absolute" alcohol is,

however, very toxic, and even when diluted it rapidly causes intoxication. It is the basis of all intoxicating drinks.

Methylated spirit is ethyl alcohol which has been made non-potable by the admixture of methanol, pyridine, a violet dye, etc.; another variety is less adulterated, and is suitable for many industrial processes. Glycerol, a sweet, colourless and somewhat syrupy liquid, is used as an anti-freezing liquid in motor-car radiators. Glycerol or glycerine is more syrupy than glycol, and is obtained as a by-product in the manufacture of soap. It is used as an "anti-freeze" and in a large number of other ways—e.g., in making nitroglycerine and dynamite.

Alcott, Louisa May, American authoress, who acted as a nurse to the wounded during the Civil War; her works, of which *Little Women* is most widely known, were addressed to the young. (1832-1888).

Alcoy, a town in Spain in the province of Alicante; staple manufacture, paper. Pop. 36,000.

Alcuin, a learned Englishman, born at York, and educated under Alibert at the Cathedral school there. Invited by Charlemagne to introduce scholarly culture into the Frankish empire and establish libraries and schools of learning, he settled on the continent and eventually became Abbot of St. Martin's at Tours. Wrote homilies, letters, a number of lives of saints, etc. (735-804).

Alcyone, daughter of Aeolus, who threw herself into the sea after her husband, who had perished in shipwreck, and was changed into the kingfisher.

Aldan, the name of a plateau and of a river in the S. of the Yakutsk S.S.R. in Asiatic Russia. The river is a tributary of the Lena, over 1,000 m. long, and useful for navigation.

Aldebaran, a conspicuous star of first magnitude in constellation Taurus; a "giant" of diameter 34 million miles and composed of material of very low density.

Aldehydes, a family of organic substances obtained by the oxidation of different alcohols. *Formaldehyde* is used as an antiseptic in the solution known as formalin. *Acetaldehyde* is a colourless liquid with an unpleasant smell, which polymerises to give *Paraldehyde*, which is used in medicine as a soporific.

Alder, or alnus, a group of trees of the order Betulaceae, closely related to the Birch. The common or black alder, *Alnus glutinosa*, is common in Britain, and grows best in damp places. It will reach 50 ft. in height, has oval leaves with serrated edges, and bears male and female catkins on the same tree.

Alderley Edge, urban district of M. SW. of Stockport, a residential district for Manchester. Pop. 3,000.

Alderman, in early English history a title given to Governors and Chiefs. Later earldoms were conferred on the holders of the office, and the name was applied to heads of Guilds and such bodies. By the Municipal Corporations Act of 1835, aldermen became members of a Municipal Council and were elected by Councillors to serve for six years, one half retiring every three years.

The City of London Corporation was excluded from the Act and the Courts of 26 aldermen elected by the freemen of the Wards except in the case of one for Southwark, chosen by the aldermen. The Local Government Act of 1933 provides that one-half of the number of the senior aldermen of a County Council must retire in every third year, being the year in which County Councillors are elected.

Alderney, one of the Channel Islands, 3 or 4 m. long by 2 m. broad, celebrated for its breed of cows; separated from Cape de la Hague by the dangerous Race of Alderney. Pop. 1,500.

Aldersgate, an early gate of London in the NW. of the city. It is mentioned, 100 A.D., as *Ealdrodesgate*, and may have been named after someone of that name, although Stow believed it was named from its age. The gate was damaged in the Fire of London, but was restored, to be finally demolished in 1761.

ALDERSGATE

Aldershot, a permanent camp, established in 1855 for instruction in military manoeuvres, on a moorland in Hampshire, 35 m. SW. of London. It has become the largest of such camps in the United Kingdom and the village of Aldershot has become a town with a pop. of 35,000.

Aldgate, one of the gates of London, called Eastgate in Saxon times, and later Alegate. Excavations in 1908 established the fact that there had been a Roman gate here. It was rebuilt in the 12th Century, but finally demolished in 1761.

Aldine Editions, a series of the classics, issued from the press of Aldus Manutius in Venice and remarkable for the correctness of the text and the beauty and clearness of the printing.

Aldred, Bishop of Worcester in the reign of Edward the Confessor, made a pilgrimage to Jerusalem, became Archbishop of York, and crowned the last of the Saxon and the first of the Norman kings of England; d. 1069.

Aldus Manutius, or Aldo Manuzio, an Italian printer, born at Bassano, established a printing-office in Venice in 1488, issued the celebrated Aldine Editions of the classics, and invented the italic type. Some attribute this invention to his typesetter, Francesco de Bologna. (1447-1515).

Alekhine, Alexander, chess champion, born in Moscow of noble family; won world-championship from Capablanca, 1927, world's record score, San Remo, 1930; world's blindfold champion. (1892-).

Alemanni, a confederacy of tribes on the banks of the Rhine in the 3rd Century, and for long gave no small trouble to Rome, but whose incursions were arrested, first by Maximinus, and finally by Clovis in 496, who made them subject to the Franks, hence the modern names in French for Germany and the Germans.

Alemtejo, a southern province of Portugal; soil fertile to the E. Area 9,200 sq. m. Pop. 588,000. Cap. Evora.

Alençon, a French town in the dept. of Orne, 105 m. W. of Paris, once famous for its lace. Pop. 17,000.

Alençon, Counts and Dukes of, a title borne by several members of the house of Valois—e.g., Charles of Valois, who fell at Crécy (1346); Jean, 4th Count and 1st Duke, who fell at Agincourt (1415).

Aleppo, a city in N. Syria, one of the greatest trading centres in the world. The Iraq oil pipe-line has one of its two termini here. In the Great War it became the final

ground of Turkish resistance to Allenby, who captured the town in the autumn of 1918. After the War the town and district were joined with Damascus to form the Syrian State under French Mandatory rule. Pop. 177,000.

Alesia, a strong place in the E. of Gaul, now known as Alise-Ste-Reine, in the dept. of Côte-d'Or, which, as situated on a hill and garrisoned by 80,000 Gauls, cost Caesar no small trouble to take. The surrender of Vercingetorix here in 52 B.C. marked the final conquest of Gaul.

Alessandria, a strongly fortified and stirring town on the Tonaro, capital of the province of the same name in Piedmont, N. Italy; the centre of eight railways. Pop. (town) 78,000; (province) 820,000. Area (province) 1,970 sq. m.

Aletsch Glacier, in Switzerland, the largest of the glaciers of the Alps, which descends round the S. of the Jungfrau into the valley of the Upper Rhône. Aletschhorn, a peak 13,700 ft. high, is in the Bernese Alps.

Aleutian Islands, a chain of volcanic islands, 150 in number, stretching over the N. Pacific from Alaska, in N. America, to Kamchatka, in Asia, with fishing and sealing industries which afford a living to about 1,000 people. Constitute part of Alaska, U.S.A.

Alexander Archipelago, a group of over 1,000 islands off the SW. coast of Alaska, U.S.A., rising boldly from the sea and wooded on top.

Alexander, King of the Hellenes (Greece), became king in 1917 on the dethronement of his father Constantine II. He died in 1920 as the result of a bite from a pet monkey, the government for that short period having been in the hands of Venizelos. (1893-1920).

Alexander, King of Yugoslavia, son of King Peter of Serbia. He took an active part in the Balkan War, and in the Great War led the Serbian forces. Appointed by his father regent of Serbia in 1914, in 1918 he became regent of the newly-formed state of Yugoslavia, and succeeded his father as king in 1921. He was assassinated by a Croat malcontent, together with M. Barthou, French Foreign Minister, in Marseilles in October, 1934. (1888-1934).

Alexander the Great, the king of Macedonia, son of Philip by Olympias, daughter of Neoptolemus, king of Epirus; born at Pella, 356 B.C.; had the philosopher Aristotle for tutor, and being instructed by him in all kinds of serviceable knowledge, ascended the throne on the death of his father, at the age of 20; after subduing Greece, had himself proclaimed generalissimo of the Greeks against the Persians, and 2 years later crossed the Hellespont, followed by 30,000 foot and 5,000 horse; with these conquered the army of Darius the Persian at Granicus in 334, and at Issus in 333; subdued the principal cities of Syria, overran Egypt, and crossing the Euphrates and Tigris, routed the Persians at Arbela; hurrying on farther, he swept everything before him, till the Macedonians refusing to advance, he returned to Babylon, where he suddenly fell ill of fever, and in eleven days died at the early age of 32. The inspiring idea of his life is defined to have been the

ALEXANDER THE GREAT

right of Greek intelligence to override and rule the merely glittering barbarity of the East. (356-323 B.C.).

Alexander III., pope, successor to Adrian IV., an able man, whose election Barbarossa at first opposed, but finally assented to; took the part of Thomas à Becket against Henry II. and canonised him, as also St. Bernard. Pope from 1159 to 1181.

Alexander VI., called Borgia from his mother, a Spaniard by birth, obtained the popehood by bribery in 1492 in succession to Innocent VIII., lived a licentious life and had several children, among others the celebrated Lucretia and the infamous Caesar Borgia; d. 1503, after a career of crime, not without suspicion of poison. In addition to Alexanders III. and VI., six of the name were popes; A. I., pope from 106 to 115; A. II., pope from 1061 to 1073; A. IV., pope from 1254 to 1261; A. V., pope from 1409 to 1410; A. VII., pope from 1655 to 1667; A. VIII., pope from 1689 to 1691.

Alexander I., first Prince of Bulgaria, a nephew of Alexander II. of Russia. At the outset he was in the hands of Russophiles; in 1881 he assumed absolute power. He restored the constitution in 1883, but after the Serbo-Bulgarian War, which resulted in the union of Bulgaria and E. Rumelia, he was seized and compelled to abdicate. He returned in triumph, but abdicated again in the same year. (1857-1893).

Alexander I., Emperor of Russia, son of and successor of Paul I., took part in the European strife against the encroachments of Napoleon, was present at the Battle of Austerlitz, fought the French at Pultusk and Eylau, was defeated at Friedland, had an interview with Napoleon at Tilsit in 1813, entered into a coalition with the other Powers against France, which ended in the capture of Paris and the abdication of Napoleon in 1814. Under his reign Russia rose into political importance in Europe. (1777-1825).

Alexander II., Emperor of Russia, son and successor of Nicholas I., fell heir to the throne while the siege of Sebastopol was going on; on the conclusion of a peace applied himself to reforms in the state and the consolidation and extension of the empire. His reign is distinguished by a ukase decreeing in 1861 the emancipation of the serfs, numbering 23 millions, by the extension of the empire in the Caucasus and Central Asia, and by the war with Turkey in the interest of the Slavs in 1877-1878. His later years were clouded with great anxiety, owing to the spread of Nihilism, and he was killed by a bomb thrown at him by a Nihilist. (1818-1881).

Alexander I., King of Serbia, became king under a regency upon the abdication of his father King Milan in 1889. Assassinated with his wife, Draga, in his palace by military conspirators. (1876-1903).

Alexander, Rt. Hon. Albert Victor, Secretary, Parliamentary Committee, Co-operative Congress. Chief Clerk for Higher Education, Somerset County Council, till 1920. M.P. (Co-op.), Hillsborough division of Sheffield, 1922-1931 and since 1935; Parliamentary Secretary, Board of Trade, 1924; Privy Counsellor, 1929; 1st Lord of the Admiralty, 1929-1931. (1885-).

Alexander, Samuel, O.M., honorary Manchester University; born in New South Wales, Australia, but graduated at Oxford. By analogy with chemical science he arrives at his doctrine of Emergent Evolution, in his *Space, Time and Deity*, 1920. (1859-).

Alexander Nevsky, grand duke of Russia, conquered the Swedes, the Danes, and the Teutonic knights on the banks of the Neva, freed Russia from tribute to the Tartars; is one of the saints of the Russian Church. (1220-1263).

Alexander Severus, a Roman wise, virtuous and pious prince, conquered Artaxerxes, King of Persia, but in the course of an expedition against the Germans, fell a victim, with his mother, to an insurrection among his troops near Mainz. (205-235).

Alexandra, Queen, wife of Edward VII. and mother of King George V. She was a daughter of King Christian IX. of Denmark, and married in 1863. Her other children were Prince Albert Victor, who died 1892, Princess Louise, who married the 1st Duke of Fife, Princess Victoria, Princess Maud (Queen of Norway, wife of Haakon VII.) and Prince John. (1844-1925).

Alexandra Day, June 26, commemorates the arrival of Queen Alexandra in England, in 1862, the year prior to her marriage. Artificial roses are sold in the streets for the benefit of the hospitals.

Alexandra Palace, situated on Alexandra Park, in North London, opened in 1863, the year of the marriage of Queen Alexandra, queen of Edward VII. Threatened with demolition in recent years, it was finally bought for the public by various local councils. The N.E. tower has now been removed and a television mast installed in its place, all this part of the Palace being taken over by the British Broadcasting Corporation for television broadcasts.

Alexandretta, a coast town of N. Syria on the Alexandretta Gulf. It was founded by Alexander the Great in commemoration of his victory at the Issus, 333 B.C. Its importance is due to its proximity to the Beilan Pass. At the close of the Great War it was occupied by British and French troops. Pop. 14,500.

Alexandria, the chief port of Egypt, founded by Alexander the Great in 332 B.C., at one time a great centre of learning, and in possession of the largest library of antique literature in the world, dispersed during the wars of Caesar and Theodosius; at one time a place of great commerce, but has very materially decayed since the opening of the Suez Canal. Pompey's Pillar, 88 ft. high, various Græco-Roman antiquities, and the catacombs are among the most interesting relics. Two obelisks known as Cleopatra's Needles, also survive, one standing now on the Thames embankment, the other in New York.

The modern city lies partly on a small peninsula and partly on the isthmus formed in more recent times by silted deposit. It has been the scene of much fighting in the past. It was captured by the French in 1798, recaptured by the British in 1801. In the British bombardment of 1882 much damage was done to the antiquities. Alexandria, from its intimate connection with both East and West, gave birth in early times to a speculative philosophy which drew its principles from Eastern as well as Western sources. Pop. 573,000.

Alexandria, (1) a town in Virginia, U.S.A., on the Potomac, 7 m. S. of Washington, accessible to vessels or the largest size. Pop. 24,000. (2) A city of Louisiana, U.S.A., centre of a rice and cotton growing district. Pop. 23,000. (3) A thriving town in Scotland on the R. Leven, 3 m. N. of Dumbarton. Pop. 10,000. (4) Town of Rumania on the R. Vede. Pop. 19,000.

Alexandrian Codex, a Greek MS. of the Bible now in the British Museum and assigned to the year 450.

Alexandrine Verse, is which each line consists of twelve syllables (six iambs). It is usually written in rhymed couplets, and has been the chief measure used in French heroic poetry. It is said to have been first employed by Alexander of Paris in a poem on Alexander the Great.

Alexandropol. See Leninakhan.

Alexeieff, Michael Vassilievitch, Russian general. The son of a private, he began his military career in the Russo-Turkish War of 1877, and in the Russo-Japanese War of 1904 he acted as quartermaster-general and chief of staff to one of the Russian armies. Until the Czar took command of the Russian troops in the Great War Alexeieff was chief of staff to General Ivanoff, but he became the real leader of the army under the Czar, a position he held until the first revolution of 1917, when he was replaced by Brussiloff. On the ascendancy of Lenin and Trotsky he retired and endeavoured to organise a counter-revolution, dying before he could complete his plans. (1857-1918).

Alexis Michaelovitch, Czar of Russia, father of Peter the Great, the first Czar who acted on the policy of cultivating friendly relations with other European states. (1630-1677).

Alexius Comnenus, Emperor of the East, began life as a soldier, was a great favourite with the troops, who, in a period of anarchy, raised him to the throne at the time of the first crusade, when the empire was infested by Turks on the one hand and by Normans on the other, while the crusaders who passed through his territory proved more troublesome than either. He succeeded in holding the empire together in spite of these troubles, and to stave off the doom that impended all through his reign of thirty-seven years. (1048-1118).

Alfalfa. See Lucerne.

Alfieri, Vittorio, Count, an Italian dramatist, spent his youth in dissipation before turning to the dramatic art; on the success of *Cleopatra*, met at Florence with the Countess of Albuvi, the wife of Charles Edward Stuart, on whose death he married her; was at Paris when the Revolution broke out, and returned to Florence, where he died and was buried. Tragedy was his forte as a dramatist. (1749-1803).

Alfonsine Tables, astronomical tables drawn up at Toledo by order of Alfonso X. in 1252 to correct the anomalies in the Ptolemaic tables; they divided the year into 365 days, 5 hours, 49 minutes, 16 seconds.

Alfonso III., surnamed the Great, King of Asturias, ascended the throne in 866, fought against and gained numerous victories over the Moors; died in Zamora, 910.

Alfonso X., the Wise, or the Astronomer, omer, King of Castile and a philosopher; after various successes over the Moors, first one son and then another rose against him and drove him from the throne; died at Seville two years later. His fame connects itself with the preparation of the Alfonsine Tables. (1226-1284).

Alfonso I., the "Conqueror," founder was the first king, originally only count, as his father before him; in that capacity took up arms against the Moors, and defeating them had himself proclaimed king on the field of battle. (1110-1185).

Alfonso XIII., of Spain, a post-humous son of Alfonso XII. He succeeded to the throne on the day of his birth, his mother, Queen Maria, acting as regent till 1906, in which year the king married Victoria Eugenie, niece of Edward VII., of England. There was an attempt to assassinate the king and queen on their wedding day. Outbreaks of a similar character occurred on several subsequent occasions, and finally after the fall and death of the Dictator, Primo de Rivera, the Republican movement made such headway that Alfonso fled the country, 1931, and has since lived in retirement in England. (1886-).

Alfred The Great, King of the W. Saxons, the most celebrated and the greatest of all the Saxon kings. His troubles were with the Danes, who at the time of his accession infested the whole country N. of the Thames; with these he fought nine battles with varied success, till after a lull of some years he was surprised by Guthrum, then king, in 878, and driven to seek refuge on the island of Athelney. Not long after this he left his retreat and engaged Guthrum at Edington, and after defeating him formed a treaty with him. After this Alfred devoted himself to legislation, the administration of government, and the encouragement of learning. It was he who in the creation of a fleet laid the first foundation of England's greatness as monarch of the deep. His literary works were translations of the *General History* of Orosius, the *Ecclesiastical History* of Bede, Boethius's *Consolations of Philosophy* and the *Cura Pastoralis* of Pope Gregory. (849-901).

Alfreton, a market town in Derbyshire, England. The manufactures include hosiery, hats and pottery, and there are stone and iron works. Pop. 21,200.

Algae, a subdivision of the *Thallophyta*, the lowest section of plant life,

comprising seaweeds, pond-scum and similar plants inhabiting fresh and salt water. They show great diversity of form, and are characterised by a general simplicity of structure and of reproductive processes. They are

ALGAE (A COMMON SEA-WEED)

flowerless, stemless and cellular throughout. The other subdivision of the *Thallophyta* is the fungi, with which the algae have some characteristics in common.

Algarve, the most southerly province of Portugal, hilly, but traversed with rich valleys, which yield olives, vines, oranges, etc. Cape St. Vincent, off which the British fleet defeated the Spaniards in 1797, is in this province. Area, 1,937 sq. m. Pop. 300,000. Cap. Faro.

Algebra, a universal arithmetic of Arabian origin or Arabian transmission, in which symbols are employed to denote operations, and letters to represent number and quantity. The letters used in algebra stand for any number or quantity, and therefore the results contained in the algebraical expression must be equally true of all numbers.

Algeriras, a town and port in Spain on the Bay of Gibraltar, 5 m. across the bay; for centuries a stronghold of the Moors, but taken from them by Alfonso IX. after a siege of twenty months. Algeriras Bay was the scene of a battle between the French and English in 1801. Considerable damage was done by Spanish government warships in 1936 during the Spanish Civil War. Pop. 20,000.

Algeria, in the N. of Africa, belongs to France, stretches between Morocco on the W. and Libya and Tunis on the E., the country being divided into the Tell along the sea-coast, which is fertile, the Atlas Highlands overlooking it on the S., on the southern slopes of which are marshy lakes called "shots," on which alfalfa grows wild; the Steppes, a pastoral region; and thirdly, the Sahara beyond, rendered habitable here and there by the creation of artesian wells; its extent nearly equal in area to that of France, with a population numbering about seven millions, of whom only 900,000 are French.

The country is organised in two divisions, the Northern of which includes the three depts. of Algiers, Oran and Constantine, each sending three deputies to the French chamber. S. Algeria comprises the territories of Ain-Sefra, Ghardaia, Tougourt and the Sahara Oases. A Governor-General is appointed by France. French citizenship has been extended to natives with certain qualifications.

It has been successively under the sway of the Carthaginians, the Romans, the Vandals, the Arabs, the Byzantines, and the Berbers, which last were in the 16th Century supplanted by the Turks. At the end of this period it became a nest of pirates, against whom a succession of expeditions were sent from several countries of Europe, but it was only with the conquest of it by the French in 1830 that this state of things was brought to an end.

Algiers, the capital of Algeria, founded by the Arabs in 933, called the "silver city," from the glistening white of its buildings as seen sloping up from the sea, presenting a striking appearance; was for centuries under its Bay the headquarters of piracy in the Mediterranean, which only began to cease when Lord Exmouth bombarded the town and destroyed the fleet in the harbour. Since it fell into the hands of the French the city has been greatly improved, the fortifications have been strengthened, and its neighbourhood has become a frequent resort of English people in winter. It is a French naval station. Pop. 257,000.

Algin, a viscous gum obtained from certain sea-weeds; used as size for textile fabrics, and for thickening soups and jellies.

Algoa Bay, an inlet at the E. of Cape Colony, South Africa, 20 m. wide, on which Port Elizabeth stands, 425 m. E. of the Cape of Good Hope.

Algol, a variable double star in Perseus, normally of second magnitude, but fading to fourth magnitude for about 20 minutes at intervals of three days, due to the eclipse of the brighter member by the fainter, which revolves round it.

Algonquins, one of the three aboriginal Indian races of N. American Indians, originally occupying nearly the whole region from the Churchill and Hudson Bay southward to N. Carolina, and from the E. of the Rocky Mts. to Newfoundland.

Alhambra (Red Castle), an ancient palace and stronghold of the Moorish kings of Granada in Spain, founded by Mohammed II. in 1213, decorated with gorgeous arabesques by Isuf I. (1345), erected on the crest of a hill which overlooks Granada; has suffered from neglect, bad usage, and earthquake.

Alhambra, a city of California, U.S.A., on the outskirts of Los Angeles, primarily residential. Pop. 30,000.

Alhazen, an Arab mathematician and astronomer, an authority on optics of the 11th Century. He boasted of his ability to control the Nile, but when called on by the Caliph to do so, feigned madness until his death.

Ali (Ali-Ben-Abu-Talib), the cousin of Mohammed, one of his first followers at the age of sixteen, and fourth of the Caliphs, "a noble-minded creature, full of affection and fiery daring. Something chivalrous in him; brave as a lion; yet with a grace, a truth and affection worthy of Christian knighthood." Became Caliph in 656; died by assassination in the Mosque at Bagdad. (600-661).

Alibi, a legal defence, often used in criminal cases, to prove the absence of the person charged with the offence from the scene of the crime at the time it was committed.

Alicante, the third seaport-town in Spain, with a spacious harbour and strongly fortified, in a province of the same name on the Mediterranean. Pop. (town) 78,000; (province) 550,000.

Alice Maud Mary, Princess, daughter of Queen Victoria, married Prince Louis (Grand-duke) of Hesse. Her six children included Alix, Czarina of Russia. (1843-1878).

Alice Springs, a telegraph station in Australia, 1,120 m. by rail from Adelaide, S. Australia.

Alien, a person resident in a country of which he is not by birth or naturalisation a subject. The naturalisation of the father subsequent to the birth of the child does not affect the nationality of the child. Questions relating to aliens in Great Britain are governed by the British Nationality and Status of Aliens Act, 1914, amended by the Acts of 1918, 1922 and 1933.

By the present law an alien is permitted to hold real and personal property with assured succession. An alien, however, cannot vote in parliamentary or municipal elections and may not take office. If he buys a British ship, it ceases to be British. In the army he cannot hold commissioned rank. The Aliens Restriction Amendments Act, 1919, provides that aliens may be prohibited from entering or leaving the United Kingdom, while on the other hand they are subject to deportation, registration, etc.

Alienation, a legal term for the transfer of property by conveyance and not by inheritance.

Aligarh, a city and district in the United Provinces of India, between Agra and Delhi. Fortified by Sindha in 1759 and captured by the British in 1803. Has an important Mohammedan University. Area of district 1,957 sq. m. Pop. (city) 67,000; (district) 1,200,000.

Alimentary Canal, a passage five or six times the length of the body, lined throughout with mucous membrane, extends from the mouth to the anus, and includes mouth, fauces, pharynx, oesophagus, stomach, and small and large intestines.

Alimony, the allowance ordered by the courts to be paid out of the husband's estate for the maintenance of his wife subsequent to a divorce or judicial separation.

Ali Pasha, Pasha of Janina, a bold and crafty Albanian, able man, and notorious for his cruelty as well as craft, finally killed at the instigation of the Sultan. (1741-1822).

Alison, Sir Archibald, a lawyer and historian, his great work being a *History of Europe from the French Revolution to the Fall of Napoleon*, afterwards extended to the *Accession of Louis Napoleon*. (1792-1867).

Aliwal, a village in India in the Punjab, on the Sutlej, where Sir Harry Smith gained a brilliant victory over the Sikhs, who were provided with forces in superior numbers, in 1816.

Aliwal North, town and health resort of Cape Province, S. Africa, on the Orange River, in a district of the same name. It has sulphur springs, and diamonds have been found. Pop. 6,500. It and Aliwal South, near Mosse Bay, were named after Sir Harry Smith, victor of Aliwal and Governor of Cape Colony, 1847-1852.

Alix (Alexandra Feodorovna), daughter of Princess Alice of Hesse and granddaughter of Queen Victoria; married Nicholas II. Czar of Russia, and was killed with him at Ekaterinburg. Had one son, Alexis, on account of whose delicate health she fell under the influence of Rasputin; had a bad influence on the Czar during the War. (1872-1918).

Alkahest, the presumed universal solvent of the alchemists; a term invented by Paracelsus.

Alkaline Earths, name given to the oxides of the metals calcium, barium and strontium, which are distinguished from the alkalis soda and potash by their small solubility in water.

Alkalis, substances which when in solution turn red litmus blue and have other characteristic actions on indicators (*q.v.*). They are soluble bases (*q.v.*), and the chief of them, sodium hydroxide (caustic soda), potassium hydroxide (caustic potash) and lime, find extensive application in the chemical and other industries. Alkalis neutralise acids, forming salts and water; the caustic alkalis have a corrosive action upon flesh. Washing-soda, sodium carbonate, is alkaline in solution owing to chemical change, and is sometimes described as a "mild" alkali.

Alkaloids, complex nitrogenous organic compounds of basic character, mostly derivatives of pyridine, quinoline, isoquinoline, pyrrol, etc. The first alkaloid to be isolated was morphine, which was obtained from opium by Sertuerner in 1817. Common alkaloids are quinine, strychnine, brucine, conifine, nicotine, atropine, hyoscyamine, cocaine and curarine.

Practically all alkaloids possess a bitter taste and intense physiological activity, and many are exceedingly poisonous; thus curare, a bitter resinous substance extracted from the S. American plant *Strychnos toxifera*, and used by natives for poisoning arrows, owes its toxic character to the presence in it of curarine.

Several alkaloids are of great medicinal importance—*e.g.*, quinine in cases of malaria and atropine in paralysing the accommodation of the eye for ophthalmic examination. Some of the simpler alkaloids have been synthesised, while new ones have been prepared from those which occur naturally.

Alkmaar, a town in N. Holland, 25 m. NW. of Amsterdam, and situated on the N. Holland canal, with a large trade in cattle, grain and cheese. Pop. 30,000.

Allah, the Arab name for God, adopted by the Mohammedans as the name of the one God.

Allahabad, the City of God, a central city of British India and capital of the United Provinces, on the confluence of the Ganges and the Jumna, 550 m. from Calcutta, and on the railway between that city and Bombay. The most conspicuous building is the fort. Other notable features are the two cathedrals, the Mayo Memorial Hall and a pillar of Asoka. During the Indian Mutiny it was the scene of a massacre. Pop. 184,000.

Allan, David, a Scottish portrait and historical painter, born at Alloa; illustrated Ramsay's "Gentle Shepherd"; his greatest work is the "Origin of Painting"; now in the National Gallery at Edinburgh. (1744-1798).

Allan, Sir William, a distinguished Scottish historical painter, born at Edinburgh, many of his paintings being on national subjects; he was a friend of Scott, who patronised his work, and in succession to Wilkie president of the Royal Scottish Academy; painted "Circassian Captives" and "Slave-Market at Constantinople." (1782-1850).

Alleghany Mountains, a range of Appalachian system in U.S.A., extending from Pennsylvania to N. Carolina; do not exceed 2,400 ft. in height, run parallel with the Atlantic coast, and form the watershed between the Atlantic rivers and the Mississippi.

Allegheny, a manufacturing city in Pennsylvania, U.S.A., on the Ohio, opposite Pittsburg, of which it is a kind of suburb, being connected by six bridges. Pop. 135,000.

Allegiance, the bond between the subject and the State or head of the State in return for which the subject receives the protection of the State. In England the allegiance is due to the king, and every one born in the king's dominions (with the exception of the children of ambassadors) owes such allegiance. Many public officials (including Members of Parliament, recruits to the Forces, etc.) have to take an actual oath of allegiance. Aliens owe temporary allegiance while they enjoy the king's protection. Within one month of taking out papers of naturalisation an alien is required to take an oath of allegiance. A breach of allegiance constitutes the crime of treason.

Allegory, a figurative mode of representation, in which a subject of a higher spiritual order is described in terms of that of a lower which resembles it in properties and circumstances, the principal subject being so kept out of view that we are left to construe the drift of it from the resemblance of the secondary to the primary subject.

Allegri, Gregorio, an Italian composer, born at Rome; member of the choir of the Sistine Chapel and author of a *Miserere*, which is still sung there every year in Holy Week. (1580-1632).

Allegro, a musical direction indicating a brisk, lively movement.

Allen, Bog of, a dreary expanse of bogs of peat E. of the Shannon, in Offaly (King's Co.) and Kildare, Ireland (Eire); the Lough of Allen is an expansion of the waters of the Shannon.

Allen, Charles Grant, novelist. Born in Canada, he was educated at Birmingham and Oxford, and later became a professor in Jamaica. He wrote on biological subjects, though it is as a novelist he is chiefly remembered, his most famous book being *The Woman Who Did*. (1848-1899).

Allen, Sir Hugh Percy, director of Royal College of Music 1918-1937. Organist: St. Asaph's Cathedral, 1897; Ely Cathedral, 1898; New College, Oxford, 1901-1918. Director of Music, University College, Reading, 1908. Knighted 1920; G.C.V.O., 1935. Professor of Music, Oxford University, since 1918. Has conducted Bach choirs, London and Oxford, and often at Leeds Festivals. (1869-).

Allenby, Field-Marshal Sir Edmund Henry Hynman, Viscount of Megiddo and Felixstowe, entered the Army in 1879, fought in the Zulu and Boer wars, and was British cavalry leader at Mons in 1914 and on the Somme. Promoted commander of the 3rd Army Corps in 1915 and played a distinguished part in the Battle of Arras. In 1917 he took command of the forces in Egypt, leading the offensive that won Palestine from the Turks, and by capturing

Jerusalem achieved the object for which the Crusaders had fought six centuries earlier. For his war services he received a viscounty and a Parliamentary grant of £50,000. After the War he became a field-marshal and High Commissioner for Egypt for some years. (1831-1936).

Allenstein, town of E. Prussia, 64 m. S. of Königsberg, in Allenstein province (pop. 640,000). Taken by the Russians in Aug. 1914, it was evacuated during the Battle of Tannenberg. Pop. 38,000.

Allentown, county town of Lehigh County, Pennsylvania, on the Lehigh R., 50 m. NW. of Philadelphia, the great centre of the iron trade in the U.S.A. Pop. 92,000.

Alleppey, the chief seaport of Travancore, India, with a considerable export trade. Pop. 32,000.

Alleyne, Edward, a celebrated actor in the reigns of Elizabeth and James I., the founder of Dulwich College; as theatrical manager and proprietor acquired much wealth; bear-master to James I.; contemporary of Shakespeare. (1566-1626).

Allia, a stream flowing into the Tiber 11 m. from Rome, where the Romans were defeated by the Gauls under Brennus, 390 B.C.

Alliance, **The Triple**, in 1668, between England, Holland and Sweden against Louis XIV.; **the Quadruple**, in 1718, between France, England, Holland and the Empire to maintain the Treaty of Utrecht; **the Holy**, in 1815, between Russia, Austria and Prussia, an effort to seek peace on the basis of the Gospels; **the Triple**, in 1882, between Germany, Austria and Russia, at the instigation of Bismarck, from which Russia withdrew in 1886, when Italy stepped into her place. Under it the signatories, in 1887, guaranteed the integrity of their respective territories. It was broken up at the end of the Great War, at the outbreak of which in 1914 Italy withdrew.

Allier, a confluent of the Loire, in France, 270 m. long, rising in the dept. of Lozère and joining the Loire near Nevers; also one of the departments through which it flows. Area 2,850 sq. m. Pop. 374,000. Cap. Moulins.

Alligator, a fresh-water reptile of the crocodile family, but differ-

ing from the true crocodile in several features, notably the shape of the head and the jagged fringe on the hind legs. There are two species, *A. Mississippiensis*,

CHINESE ALLIGATOR
(*A. sinensis*)

which is common in the Mississippi and the lakes and rivers of Louisiana and Carolina, and *A. sinensis* of the Yang-tse-kiang. The Gaimans of Central and S. America differ from the alligator only in having a shield of bony plates on the under-side of the body.

Alliteration, is the term given to the repetition, usually in a poem, of words beginning with the same initial letter, sound or vowel. It is a poetical device frequently found in Celtic poetry, and rhymelless alliterative verse was the basis of the old English epic *Beowulf*, as of practically all old English poetry. *Piers Plowman*, a 14th-Century poem by Langland, is also written entirely in alliterative verse.

Alloa, a thriving seaport on N. bank of the Forth, in Clackmannan, Scotland, 6 m. below Stirling, famous for its ale. Pop. 18,250.

Allopathy, in opposition to homeopathy, the treatment of disease by producing a condition of the system different from or opposite to the condition essential to the disease to be cured.

Allotment, usually means a small piece of ground under cultivation, not exceeding 40 poles, mainly producing crops for the benefit of the allotment-holder and his family. The size of an allotment has varied under various Acts, from 40 rods (1922) to 5 acres (1925), while a small-holding is from 1 to 50 acres.

Allotropy, the phenomenon of a chemical substance being found in two or more entirely different forms—e.g., charcoal, graphite, and diamond are all composed of carbon, but differ entirely in physical properties, and are known as the allotropic modifications of carbon. Sulphur and phosphorus both exist in allotropic modifications. Ozone is an allotrope of oxygen, having the chemical formula O_3 (oxygen = O_2).

Alloway, the birthplace of Burns, on the Doon, in Scotland, 2 m. from Ayr, the assumed scene of Tamo'shanter's adventure. Pop. 1,000.

Alloy, a coherent mixture of metals. Where two metals have been welded together, the mixture is termed an alloy only if the two component metals are indistinguishable. The commonest methods of forming an alloy are by fusing the metals together when in a molten state, or by reducing an ore already composed of two metals. The composition of an alloy should be uniform, although in solidifying the component metals may separate (segregate) to a certain extent. Many alloys have commercial use, notably brass, an alloy of copper and zinc, and steel, aluminium and magnesium alloys.

All-Saints' Day (**All-Hallows, Hal-lowmas**), Nov. 1, a feast dedicated to all the Saints.

All Souls' College, a college of Oxford University founded by Henry Chichele (q.v.), Archbishop of Canterbury in 1432.

All Souls' Day, a Roman Catholic festival, held on Nov. 2, when prayers are said for the dead.

Allspice, the berry of the pimento or *Pimenta officinalis*, a tree of the Myrtaceae (myrtle) family, indigenous to Central America and the W. Indies which, dried when unripe, is widely used for flavouring purposes.

All-the-Talents Ministry was formed by William Wyndham, Lord Grenville (1759-1834) in 1806. Under him Fox and his followers united with the aristocratic Whigs together with the Tories under Lord Sidmouth. The best work of the ministry was the abolition of the slave trade in 1807, but Grenville failed to make a successful peace with Napoleon, and the name of the ministry, which had begun as a complimentary title, became a term of derision. Grenville resigned in 1807.

Alma, a river in the Crimea, half-way between Eupatoria and Sebastopol, where the allied English, French, and Turkish armies defeated the Russians under Prince Menshikov, Sept. 20, 1854.

Almaden, a town in the province of slope of the Sierra Morena, in Spain, with rich mines of quick-silver. Pop. 10,000.

Almagest, is the name of a treatise by Claudius Ptolemaeus (Ptolemy), who was born in Egypt and lived in Alexandria in the 2nd Century. Ptolemy's theory of the solar system, known as the Ptolemaic system, was that the earth was the centre of a sphere

which carried the heavenly bodies along in its daily revolution.

He accounted for the revolutions of the sun and moon by supposing they moved in eccentric circles round the earth, and regarded the planets as moving in epicycles round a point which itself revolved in an eccentric circle round the earth. This theory was believed in Europe for many centuries. The *Almagest* was divided into sections, and included a list of the then known stars.

Almagro, *Pizarro* d', a confederate of *Pizarro*, in the conquest of Peru, but a quarrel with the brothers of *Pizarro* about the division of the spoil on the capture of Cuzco led to his imprisonment and death. (1475-1538). *Diego* d', his son, who avenged his death by killing *Pizarro*, but being conquered by *Vaca de Castro*, was himself put to death. (1520-1542).

Almanac, a form of calendar with special features added, such as astronomical occurrences, church festivals, political statistics, etc. Well-known almanacs include the *Nautical Almanac of Great Britain*, *Amanach de Gotha* of Germany, a kind of European peerage of late years extended to include statesmen and military people and statistical information, and *Ephemeris* of the U.S.A. A general almanac known as *Whitaker's Almanac* is a popular reference book in this country. The first almanac, called *Prognostications*, was published about 1450.

Almansa, a town of S.W. Spain, in *Albacete* province, scene of a British defeat in 1707. Pop. 12,000.

Alma-Tadema, *Sir Lawrence*, a distinguished artist of Dutch descent, settled in London; famous for his highly-finished treatment of classical subjects. (1836-1912).

Almeida, *Francisco* d', the first Portuguese Viceroy of India, a firm and wise governor, superseded by *Albuquerque*, and killed on his way home by the *Kaffirs* at the Cape in 1510. (1450-1510). *Lorenzo*, his son, acting under him, distinguished himself in the Indian seas, and made Ceylon tributary to Portugal. Killed at sea by the Egyptians, 1508.

Almelo; a town of Holland, in the province of Overysel, at the junction of canals and railways. Has considerable textile industries. Pop. 32,500.

Almeria, a chief town and seaport in the S. of Spain, an important and flourishing place, next to Granada, under the Moors, and at one time a nest of pirates more formidable than those of Algiers. Bombarded on May 31, 1937, by German warships as a reprisal for an attack on the *Deutschland*. Capital of the fruit-growing province of *Almeria*. Area (prov.) 3,390 sq. m. Pop. (prov.) 340,000; (town) 56,000.

Almond, (*Prunus amygdalus*), an early flowering tree, a species of *Prunus* of the natural order *Rosaceae*, frequently cultivated in English gardens. The flowers appear before the leaves in early spring. The kernel of the seeds is eaten as a nut, and from the kernels almond oil is extracted.

Almoner, originally the officer of a religious house who distributed to the poor one-tenth of the revenue of the house. There were also almoners attached to the persons of kings and bishops. In England the King's Bounty is distributed twice a year by the Lord High Almoner, who is frequently a bishop.

Almora, a high-lying town and district of the Himalayas, 85 m. N. of Bareilly and one of the chief means of access to Tibet. Supposed to be particularly healthy. Pop. 10,000.

Almshouse, a building, usually erected by private charity, where poor and aged

persons may live. Many almshouses date from a long time ago, one of the most ancient being the mediæval Hospital of St. Cross, near Winchester, which was founded in 1136. In America the term "almshouse" implies an institution supported by the State—a poor-house.

Alnwick, the county town of Northumberland, in the north entrance is *Alnwick Castle*, the seat of the Duke of Northumberland.

one of the most magnificent structures of the kind in England, and during the Border wars a place of great strength. Pop. 7,000.

Aloe, a genus of succulent plants of the order *Liliaceae*, embracing 180 species, the majority natives of S. Africa, valuable in medicine, in particular for a purgative from the juice of the leaves of several species.

ALOE

Aloes Wood, the heart of the Asiatic tree *Aquilaria Agallocha* of the order *Thymellaceae*, which yields a fragrant resinous substance formerly of great value and still used in India and the East.

Alopecia Ariata, for the development of round bald patches on the head due to the hair falling out. It may result in complete baldness. The cause is unknown and treatment is by stimulating the scalp as, e.g., by rubbing, application of ointments and by violet rays.

Alost (or *Alost*), a Belgian town on the *Scheldt*, 19 m. NW. from Brussels, with a cathedral, one of the grandest in Belgium, which contains a famous painting by *Rubens*, "St. Roche beseeching Christ to arrest the Plague at Alost." Pop. 40,000.

Aloysius, St., an Italian nobleman, who joined the Society of Jesus; canonized for his devotion to the sick during a plague in Rome, to which he himself fell a victim, June 21, 1591. See *Gonzaga*.

Alpaca, a gregarious ruminant of the *Andes*, and particularly the tablelands of *Chile* and *Peru*; is covered with a long, soft, silky wool, of which textile fabrics are woven; in appearance resembles a sheep, but is larger in size, and has a long, erect neck with a handsome head.

Alpes, three departments in SE. France; the *Basses-A.*, in NE. part of *Provence*, bounded by *Hautes-Alpes* on the N. and *Var* on the S., sterile in the N., fertile in the S., cap. *Digne*; *Hautes-A.*, forming part of *Dauphiné*, traversed by the *Cottian Alps*, climate severe, cap. *Gap*; *A. Maritimes*, E. of the *Basses-A.*, bordering on *Italy* and the *Mediterranean*, cap. *Nice*.

Alphabet, as the basis of written indefinite origin. Whilst the Egyptian system of hieroglyphs and the Babylonian cuneiform writing are older, the first true alphabet is that known as *Semitic*. The earliest record of this is the inscription on the *Moabitic Stone* (q.v.). From the *Semitic* was derived the Greek alphabet, which in turn, with certain literal changes, inspired the *Roman*, and it is in the last-named that the English alphabet had its origin. Of other alphabets the *Arabic* comes from the *Aramean* (a *Phœnician* derivative), and the several *Indian* forms from another similar source known as *Sabaean*. The *Runic* alphabet originated in *Scandinavia*, but whether it is *Phœnician*, *Greek*, or *Latin* in origin is debatable. The *Ogham* alphabet (6th Century A.D.), while

believed by some scholars to be from the Runic, is attributed by others to Roman influence.

Alpha Particles, the positively charged particles expelled during certain radioactive changes. Their velocities, which vary somewhat, are about one-twentieth that of light. They are less penetrating than beta particles (*q.v.*), but produce a greater effect within their smaller range; they cannot pass through more than 10 cm. of air or $\frac{1}{2}$ mm. of aluminium. They are detected and measured by the ionisation they produce in a gas, shown by the rate of discharge of an electroscope. Alpha particles appear to be atoms of helium which have lost their two outer electrons. See *Radioactivity and Ions*.

Alpheus, a river in the Peloponnesus, flowing W., with its source in Arcadia; also the name of the river-god enamoured of the nymph Arothusa, whom he pursued under the sea as far as Sicily, where he overtook her and was wedded to her.

Alpine Club, an English club devoted to mountaineering, primarily in the Alps, but also in other districts; founded 1857-1858.

Alps, The, the vastest mountain system in Europe; forms the boundary between France, Germany, Switzerland, and Austria on the N. and W., and Italy on the S., their peaks mostly covered with perpetual snow, the highest being Mont Blanc, within the frontiers of France. According to height, they have been distributed into *Fore*, *Middle*, and *High*; the *Fore* rising to the limit of trees; the *Middle* to the line of perpetual snow; and the *High* above the snow-line. In respect of range or extent, they have been distributed into *Western*, *Middle*, and *Eastern*; the *Western*, including the Maritime, the Cottian, the Dauphiné, and the Graian, extend from the Mediterranean to Mont Blanc; the *Middle*, including the Pennine and Bernese, extend from Mont Blanc to the Brenner Pass; and the *Eastern*, including the Dolomite, the Julian, and the Dinaric, extend from the Brenner and Hungarian plain to the Danube.

Alsace-Lorraine, a territory originally of the Holy Roman empire, ceded to Louis XIV. by the peace of Westphalia in 1648, restored to Germany after the Franco-German War in 1870-1871, by the peace of Frankfurt; restored to France by the Treaty of Versailles, 1919. Its area is 5,605 sq. m. and the pop. 1,898,370. Under the German system the province was divided into three districts: Lorraine, Upper Alsace and Lower Alsace. By the law of 1911 a constitution was granted to Alsace-Lorraine by which it received three votes in the Federal Council.

The three chief towns are Strassburg, Mulhausen, and Metz. The chief crops are wheat, rye, barley, oats, potatoes, and hay. The potash deposits are superior to those of Strassfurt, Germany. The province forms part of the Rhine basin, and is served by the tributaries Ill, Saar, Moder and Moselle.

Alsatia, Whitefriars, London, which at the time enjoyed the privilege of a debtors' sanctuary, and, till abolished in 1697, had become a haunt of all kinds of nefarious characters.

Alsatian Dog,

is another name for a breed of German sheepdog derived from a mixture of varieties of N. and S. German sheepdogs. They are often used as police dogs.

ALSATIAN

Alsen, a Danish island adjacent to Slesvig, one of the finest in the Baltic. It was ceded to Germany by Denmark in 1864, but returned to Denmark again in 1919.

Altai Mountains, in Central Asia, stretching W. from the Desert of Gobi, and forming the S. boundary of Asiatic Russia, abounding, to the profit of Russia, in silver and copper, as well as other metals.

Altamira, a cave in N. Spain, in which Early Stone Age wall paintings of animals.

Altamura, an ancient town of the Apulia dept. of Italy. It trades in wine and cattle. Its Romanesque cathedral was founded in 1230. Pop. 25,800.

Altar, an erection in a church for the purposes of prayer and sacrifice; among the earliest peoples usually constructed of rough stones for the purpose of offerings or sacrifice. In later times made of wood or stone, or, as in King Solomon's temple, of gold and brass. For many centuries the altar provided a sanctuary for those fleeing from justice.

Altazimuth, an instrument based on which the altitudes and azimuths of heavenly bodies are determined.

Aldorf, an old town and capital of the Swiss canton Uri, at the S. end of the Lake of Lucerne; associated with the story of William Tell; a place of transit trade. Pop. 4,000.

Aldorfer, Albrecht, a German painter and engraver, a pupil of Albert Dürer, and, as a painter, inspired with his spirit; his "Battle of Arbela" adorns the Munich Picture Gallery. (1488-1538).

Altenburg, a town in Thuringia, Saxony, Germany, once the capital of Saxe-Altenburg and 24 m. S. of Leipzig; its castle is the scene of the famous *Princenraub*, related by Carlyle in his *Miscellanies*. Pop. 41,000.

Alternating Current, a current which changes its direction several times a second. Low-frequency currents—about 50 cycles per second—are used for electric motors, while those of high frequency—up to a million cycles or more—are utilised in wireless. Alternating current is economical owing to the fact that it is possible to transmit across long distances at high voltage, and step down to the required pressure by means of a transformer.

Alternator. See *Dynamo*.

Althæa, a genus of plants of the order Malvaceæ of which there are 15 species, two being found in Britain, viz., *A. officinalis*, the marshmallow, and *A. rosea*, the hollyhock.

Althing, the parliamentary assembly of Iceland; instituted in 928 and reconstituted in 1874; it meets at Reykjavik, is bi-cameral, and its membership varies, but must not exceed 49.

Alto, in music the highest pitch of the Alti, male voice.

Alton, a town of Hampshire, England, on the River Wey. It is the centre of a hop-growing and agricultural district, and its breweries are renowned. Paper-milling is also carried on. Pop. 6,172. Also a city in Madison Co., Illinois, U.S.A., a busy trade and manufacturing centre. Pop. 30,000.

Altona, a town and seaport of Schleswig-Holstein, Germany, close to Hamburg, on the right bank of the Elbe, and practically forming one city with it. Pop. 242,000.

Altoona, city of Pennsylvania, U.S.A., 116 m. E. of Pittsburgh. Here are locomotive and carriage works, and machine shops of the Pennsylvania Railroad Co. Pop. 82,000.

Alto-Relievo, figures carved out of so as to project at least one half from its surface.

Altrincham (Altringham), a market town of Cheshire, England, 8 m. from Manchester. It has saw-mills and engineering works, and market-gardening is extensively carried on in the district. Pop. 21,356.

Altruism, a Comtist doctrine which, postulating sacrifice of self for the good of others as a social instinct in man, inculcates it as the ideal of human action. Herbert Spencer, in his *Data of Ethics*, purports to show how altruism and egoism will become reconciled with each other in the course of social evolution.

Alum, the name applied to a class of double sulphates. Potash alum is what is generally known as "alum," and is a mixture of potassium sulphate and crude aluminium sulphate. It is soluble in water, and is a strong astringent with a sweet-sour taste. It is much used in medicine and the arts.

Aluminium (Aluminium in U.S.A.), is a light, metallic element with no common analogues. Symbol Al, atomic number 13, atomic weight 27.1. First isolated by Woebler in 1827, but was comparatively rare until 1886, when electrolytic methods of preparing it were invented independently by Hall in America and Héroult in France. The chief ore is bauxite.

Aluminium has a bluish-white colour and a low specific gravity (2.7); it is fairly hard, and very resistant to atmospheric corrosion. This combination of valuable qualities renders it suitable for a wide variety of purposes—e.g., domestic cooking utensils, aeroplane construction, electric cables, motor-car parts and so on. It also forms light but strong alloys, such as duralumin and magnalium, extensively used in aeronautical engineering.

Alured of Beverley, an English chronicler of the 12th Century; his annals comprise the history of the Britons, Saxons and Normans up to his own time; 2, 1129.

Alva, a town of Clackmannanshire, Scotland; woollens are manufactured. Pop. 4,800.

Alva, **Fernando Alvarez de Toledo, Duke of**, a general of the armies of Charles V. and Philip of Spain; his career as a general was uniformly successful, but as a governor his cruelty was merciless, especially as the viceroy of Philip in the Low Countries. (1508-1583).

Alvarado, **Pedro de**, one of the Spanish conquerors of Mexico, and comrade of Cortez; was appointed Governor of Guatemala by Charles V. as a reward for his valiant services in the interest of Spain. (1495-1541).

Alvarez, **Don Jose**, the most distinguished of Spanish sculptors, born near Cordova, and patronised by Napoleon, who presented him with a gold medal, but of whom, for his treatment of his country, he conceived so great a hatred, that he would never model a bust. (1768-1827).

Alverstone, **R. E. Webster, Viscount**, lawyer and statesman. In 1885 he entered the House of Commons, becoming Attorney-General in the Conservative Governments of that year and 1886 and 1895; led for *The Times* at the Parnell enquiry; Master of the Rolls 1900, and Lord Chief Justice from 1900 to 1913. Was one of the arbitrators on the Alaskan boundary question. In the Court of Criminal Appeal, did much to establish the principles on which the decisions of the Court are founded. (1842-1915).

Alwar, a native state in the Rajputana Agency, India. Capital, a city of the same name. Pop. 45,000.

Alyssum, or **Madwort**, belongs to the order Cruciferae. Garden varieties are *A. maritimum*, a white, sweet-scented perennial usually grown as an annual, *A. saxatile*, a shrubby, yellow perennial, *A. atlanticum*, a prostrate species, and *A. spinosum*, which forms silver, spiny hummocks.

Amadeus, the name of a shallow salt lake in the centre of Australia, subject to an almost total drying-up at times.

Amadeus I. of Spain, 2nd son of Victor Emmanuel of Italy, elected King of Spain in 1870, but abdicated in 1873. (1845-1890).

Amadis de Gaula, a celebrated romance in prose, written partly in Spanish and partly in French by different romancers of the 15th Century; the first four books were regarded by Cervantes as a masterpiece. The hero of the book, Amadis, surnamed the Knight of the Lion, stands for a type of a constant and deferential lover, as well as a model knight-errant, of whom Don Quixote is the caricature.

Amadou, a spongy substance, consisting of slices of certain fungi beaten together, used as a styptic, and, after being steeped in saltpetre, used as tinder.

Amalekites, a warlike race of the Sinaïtic peninsula, which gave much trouble to the Israelites in the wilderness; successively defeated by Joshua and Saul, and eventually practically annihilated by King David.

Amalfi, a port of Italy, on the N. of the Gulf of Salerno, 24 m. S.E. of Naples; of great importance in the Middle Ages, and governed by Dukes of its own. Pop. 6,000.

Amalfian Laws, a code of maritime law compiled at Amalfi in the 12th Century.

Amalgam, an alloy of another metal with mercury. Tin amalgam was formerly used for silvering mirrors.

Amalthea, the goat that suckled Zeus, one of whose horns became the cornucopia—the horn of plenty.

Amanullah, ex-king of Afghanistan; at the age of 26 succeeded his father Habibullah by means of a *coup d'état* on the latter's assassination in 1919, and at once declared war on India, being decisively beaten. In 1928 he and his second wife Surayya came on a visit to Europe, including London, and on his return he tried to introduce Western ideas into Afghanistan, an attempt which led to strong opposition from the chiefs and priests and ended in a revolution which brought about his abdication in Jan. 1929. (1892-).

Amaranth, the English name for the several species belonging to the genus *Amaranthus* of the order Amarantaceae, found both in tropical and temperate climates. The species *A. caudatus* is a well-known British plant, popularly called "Love Lie-Bleeding."

Amaryllidaceæ, an order of monocotyledonous plants, very similar to the Liliaceæ, from which they differ in having the ovary below the flower. The order includes four sub-orders, some 90 genera and 1,050 species, which are found chiefly in tropical and subtropical districts. The daffodil and snowdrop are native to Great Britain.

CORNUCOPIA

Amaryllis, the name of a shepherdess in the pastorals of Theocritus and Vergil; any young rustic maiden. Also a genus of plants of the order Amaryllidaceae, *A. belladonna* being the Cape Belladonna Lily.

Amasia, a town in Turkey in Asia Minor, once the capital of the kings of Pontus. Pop. 26,000.

Amateur, one who takes part in an activity for its own sake rather than for any monetary gain. It is used particularly of a person interested in the fine arts or in some form of sport. An amateur taking part in any sport must not accept money as payment for his services, but definitions of the term vary according to the ruling of the societies governing the various sports.

The Amateur Rowing Association demands perhaps the strictest application of the term. Anyone who has competed with or against a professional, or who has been employed in any way in the building or care of boats, is barred from participation in amateur rowing events. In cricket and in golf the amateur may not play for money, but beyond that there is no strict ruling.

The Amateur Athletic Association forbids the teaching of athletics for money, and competition against professionals or for prize-money annuls the amateur status of those taking part.

Amati, a celebrated family of violin-makers of whom the most noted were Andrea and Nicolo, brothers, at Cremona, in the 16th and 17th Centuries. Amati violins are now highly valued.

Amatitlan, a dept. and town in Guatemala, Central America. The town, the inhabitants of which are mainly engaged in the preparation of cochineal, stands on a lake of the same name. Pop. (town) 12,000.

Amatongaland, or **Tongaland**, a region of S. Africa, which was declared a British Protectorate in 1895; an area about 1,200 sq. m. bounded on the N. by Portuguese possessions, on the W. and S. by Zululand and on the E. by the Indian Ocean. Tongaland within British influence, about 600 sq. m., was annexed to Natal.

Amaziah, eighth King of Judah, succeeded to the throne on the murder of his father, fought successfully against the Edomites, but was utterly defeated and captured by Joash, King of Israel. He was slain at Lachish (2 Chron. xxv).

Amazon, a river in S. America and the largest on the globe, its basin nearly equal in extent to the whole of Europe; traverses the continent at its greatest breadth, rises in the Andes about 50 m. from the Pacific, and after a course of 4,000 m. falls by a delta into the Atlantic, its waters increased by a great number of tributaries, 20 of which are above 1,000 m. in length, one 2,000 m., its mouth 200 m. wide; its current affects the ocean 150 m. out; is navigable 3,000 m. up, and by steamers as far as the foot of the Andes.

Amazonas, the name of three S. American territories; (1) the largest state of Brazil, in the N., and including a large part of the basin of the Amazon. It is bounded on the N. and W. by Venezuela, Colombia and Peru. It is entirely in the tropics and crossed by the Equator in the N. It is heavily forested, and produces rubber, timber, cocoa, brazil nuts, etc. Area 731,000 sq. m. Pop. 483,000. Cap. Manaus. (2) An inland dept. in the N. of Peru. Area 13,900 sq. m. Pop. 80,000. Cap. Chachapoyas. (3) A territory in the S. of Venezuela. Pop. 60,000.

Amazons, a fabulous race of female warriors, who had a queen of their own, and excluded all men from

their community; to perpetuate the race, they cohabited with men of the neighbouring nations; slew all the male children they gave birth to, or sent them to their fathers; burnt off the right breasts of the females, that they might be able to wield the bow in war.

Ambassador, the accredited representative of one country in another country. He represents the Sovereign or head of his State in the State to which he is accredited; he has the right of audience with the head of the foreign State, and powers generally are conferred on him to deal with all questions of importance between the two countries.

An ambassador's person and that of all members of his staff are immune from the ordinary laws of the country in which he is resident. Representatives at legations situated in other countries are called ministers. Papal legates take ambassadorial rank.

Amber, a fossil resin, generally yellow, and semi-transparent, derived, it is presumed, from certain extinct coniferous trees; becomes electric by friction, and gives name to electricity, the Greek word for it being *electron*; has been fished up for centuries in the Baltic, and is now used in varnishes and for tobacco pipes.

Ambergris, an ashy-coloured substance, the intestines of the sperm whale, being often found floating on the ocean which this cetacean frequents. It has a musky smell and is used for mixing with perfumes.

Amble, a seaport of Northumberland, England, land, 9 m. S. of Alnwick. From its harbour (Warkworth harbour) coal is exported. Pop. 4,000.

Ambleside, a small market-town of Westmorland, England, near the head of Lake Windermere, in the so-called Wordsworth District. Pop. 2,300.

Amblyopsis, a small translucent and colourless fish of the

Amblyopsidae family (*A. spelaeus*), with rudimentary but functionless eyes, found in the subterranean waters of the Mammoth Cave of Kentucky, U.S.A.

AMBLYOPSIS

Amboise, a French town, on the Loire, 14 m. E. of Tours, with a castle, once the residence of the French kings. It was the scene of the Conspiracy of Condé and the Huguenots in 1560 against Francis II., Catharine de Medici, and the Guises. The Edict of Amboise (1563) conceded the free exercise of their worship to the Protestants. The Logis du Roi contains the remains of Leonardo da Vinci.

Amboyna, the most important island of the Moluccas, in the Malay Archipelago, with a chief city bearing the same name, and especially rich in spices; it belongs to the Dutch, who have diligently fostered its resources. Pop. 400,000.

Ambrose, St., Bishop of Milan, born at Tréves, one of the Fathers of the Latin Church, and a zealous opponent of the Arian heresy; as a stern puritan refused to allow Theodosius to enter his church, covered as his hands were with the blood of an infamous massacre, and only admitted him to Church privilege after a penance of eight months; he improved the Church service, wrote several hymns, which are reckoned his most valuable legacy to the Church. Festival, Dec. 7. (c. 340-397).

Ambrosia, the fragrant food of the gods of Olympus, as nectar was their drink, and fabled to preserve in them and confer on others immortal youth and beauty.

Ambrosian Library, a famous library in Milan found early in the 17th Century by Cardinal Borromeo (q.v.) in memory of St. Ambrose (q.v.), the patron saint of Milan.

Ambry, in medieval architecture a niche, a recess or cupboard in a wall where were kept the sacred vessels.

Ambulance, a conveyance for sick or injured people and also a term for a moving hospital, travelling with an army. Ambulance wagons now used are lightly-built, easily-running motor vehicles capable of conveying two or more stretchers with attendants. Ambulances are supported by various societies, such as the British Red Cross Society and the St. John's Ambulance, and they are also attached to hospitals and police stations.

Amende Honorable, originally a mode of punishment in France which required the offender, stripped to his shirt, and led into court with a rope round his neck held by the public executioner, to beg pardon on his knees of his God, his king, and his country; now used to denote a satisfactory apology or reparation.

Amendment, a proposed alteration to a motion. It may involve adding, altering or omitting, but the subject must have a close, positive bearing on the original motion. Amendments are usually voted upon as distinct from the bill or proposal which they are intended to amend. In law, an amendment is an alteration to a pleading, and the allowance of amendments is governed by the Rules of the Supreme Court and is subject to the consent of the Court.

America, including both N. and S. and the W. Indies, 9,000 m. in length, varies from 3,400 m. to 28 m. in breadth, contains 16½ millions of sq. m., is larger than Europe and Africa together; bounded throughout by the Atlantic on the E. and the Pacific on the W., contains within it the greatest possible diversity of physical features, natural scenery and flora and fauna.

America, Central, a neck of land connecting N. and S. America and extending from Mexico on the N. to Panama on the S., is a plateau with terraces descending to the sea on each side, and rich in all kinds of tropical vegetation; consists of seven political divisions, viz., Guatemala, Salvador, British Honduras, Honduras, Nicaragua, Panama and Costa Rica.

America, North, is 4,560 m. in length, contains over 81 millions sq. m., is less than half the size of Asia; consists of a plain in the centre throughout the length, a high range of mountains, the Rocky, on the W., and a lower range, the Appalachian, on the E. parallel with the coast, which is largely indented with gulfs, bays and seas; has a magnificent system of rivers and large lakes, the latter the largest in the world, a rich fauna and flora, and a wealth of minerals. The divisions are the Dominion of Canada, Newfoundland, the United States and Mexico.

America, South, lies in great part within the Tropics, and consists of a high mountain range on the W., and a long plain with minor ranges extending therefrom eastward; the coast is but little indented, but the Amazon and the Plate Rs. make up for the defect of seaboard; abounds in extensive plains, which go under the names of Llanos, Selvas and Pampas, while the river system is one of the vastest and most serviceable; the vegetable and mineral wealth of the continent is great, and it can match the world for the rich plumage of its birds and the number and splendour of its insect species. The territorial divisions are Colombia, Venezuela, British, French and Dutch Guiana, Ecuador, Brazil, Peru, Bolivia, Paraguay, Chile, Argentina, Uruguay.

American Indians, the aboriginal races of the New World, misnamed Indians by Columbus; they are mostly of a red or copper-coloured skin, have coarse, black, straight hair, high cheek-bones, black, deep-set eyes, and tall, erect figure, and apparently are fast dying out, but they have amalgamated with most other races; to be found still as far S. as Patagonia, the Patagonians being of the race. In the U.S.A. there are over 200 tribes, comprising some 350,000 persons, inhabiting separate tribal reservations in a large number of states, chiefly Oklahoma, Arizona and S. Dakota. They enjoy full civic rights.

America's Cup, The. In 1851 a cup was given by the Royal Yacht Squadron for a race for all yachts at Cowes, Isle of Wight. Fifteen vessels started, the victor being the schooner, *The America*, of 150 tons. Many attempts have been made, especially by Sir Thomas Lipton and Mr. T. O. M. Sopwith, to regain the cup, the race for which has since been contested in American waters.

Amerigo Vespucci. See *Vespucci*.

Amerongen, a village in the province of Utrecht, Holland.

The ex-Kaiser Wilhelm II. fled there on Nov. 10, 1918, to the castle of Count Bentinck.

Amersfoort, a town in Holland, in the province of Utrecht.

Pop. 45,000.

Amersham, a market town in Buckinghamshire, England, with a chair-making industry. The birthplace of Edmund Waller, the poet, is close by. Pop. 4,000.

Amery, Rt. Hon. Leopold Stennett, English politician. Entered the House of Commons as a Conservative in 1911, and in 1922 became First Lord of the Admiralty. He became Secretary for the Colonies in 1924 and in 1925 Secretary for the Dominions, posts he held till the defeat of the Baldwin Government in 1929. Presided over Imperial Conference, 1923 and 1926. (1873-).

Amesbury, a village in Wiltshire, England. John Gay wrote *The Beggar's Opera* in Amesbury Abbey, the old residence of the Dukes of Queensberry, built by Inigo Jones. Stonchenge is in the neighbourhood. Pop. 1,530. Also a town in Massachusetts, U.S.A., where the poet Whittier made his home for many years. Pop. 10,000.

Amethyst, a species of quartz gem stone, of varying violet, purple or blue colour. Found mainly in India and Ceylon, and also in Scotland.

Amhara, the central and largest division of Abyssinia. The Amharic tongue is founded on the old Semitic.

Amice, a flowing cloak formerly worn by pilgrims, also a strip of linen cloth worn over the shoulder of a priest when officiating at mass.

Amides, in organic chemistry, compounds formed by replacing the hydrogen of ammonia by an acid radical. The amides proper are obtained by heating the ammonium salt of the corresponding acid, by acting upon one of its esters, its chloride, or anhydride with ammonia.

Amiens, in France, the old capital of Picardy, on the Somme, with a cathedral begun in 1220, described by Ruskin as "Gothic clear of Roman tradition and of Arabian taint, Gothic pure, authoritative, unsurpassable, and unaccusable"; was the birthplace of Peter the Hermit, and is celebrated for a treaty of peace between France and England concluded in 1802. The population is 93,800. It was the British Army base during the Battle of the Somme in 1916.

and the scene of repeated but unsuccessful attempts by the German army to capture it.

In the second Battle of the Somme, Amiens was the principal German objective, and the brunt of the attack was borne by the ill-fated British 5th Army. The attack almost succeeded, but the German Army was too exhausted to continue its momentum. On Aug. 8, 1918, Haig attacked on the Amiens front with the 3rd British Corps, the 33rd American Division and Australian and Canadian troops. The assault was followed by an attack by 200 tanks, which completed the demoralisation of the German Army.

Amines, carbon compounds which may be regarded as derived from ammonia by the replacement of one or more hydrogen atoms of the ammonia molecule by univalent hydrocarbon radicals. The aliphatic amines are strongly basic substances, the lower members possessing ammoniacal, fishy smells; certain of them, in fact, occur in herring-brine, fish paste, etc., to which they impart the characteristic smell. Aniline, an aromatic amine, is important as the basis of the well-known aniline dyes. Certain complex amines are very poisonous (ptomaines).

Amirantes, a group of small coral islands in the N.E. of Madagascar, belonging to Britain; are 11 in number, are wooded, and only a few feet above sea-level. Pop. 90,000.

Amman, capital of Trans-Jordan.

Ammanford, market town of Carmarthenshire, Wales, 12 m. N. of Swansea. It has collieries and tin-works, and manufactures paint. Pop. 7,000.

Ammeter, an instrument used in strength of an electric current in amperes.

The most common type consists of a movable coil connected in parallel with a low resistance formed by copper wires. Alternating current is usually measured by a magnetic needle working between the pole of a magnet which has several adjoining coils. The most practical form for measuring current at radio-frequencies, such as in the aerial of a wireless transmitting station, is one which utilises the heating effect of the current passing through a thin wire.

AMMETER

Ammon, an Egyptian deity, frequently represented with the head of a ram, who had a temple at Thebes and in the Libyan Desert; was much resorted to as an oracle of fate.

Ammonia, NH_3 , a colourless gas, lighter than air and very soluble in water; it possesses a pungent smell and is suffocating, though not actively poisonous. It may be prepared by heating any ammonium salt with an alkali (e.g., lime or sodium hydroxide), and is a product of the distillation of coal (as in the manufacture of coal-gas). Synthetic methods of obtaining ammonia from atmospheric nitrogen have been elaborated.

Ammonia is formed during the putrefaction of organic matter, hence its presence in water usually means that the water is unfit for drinking owing to contamination with sewage or animal excreta. In the soil, ammonia and ammonium salts are converted by bacterial action into nitrates, which form the principal nitrogenous food of green plants.

Ammonites, E. of the Jordan, descended from Ben-Ami, a son of Lot, and

closely related to the Moabites; at continual feud with the Jews, and a continual trouble to them, till subdued by Judas Maccabeus.

Ammonites, a group of extinct spiral Mesozoic times. They are particularly abundant in the Jurassic strata, and are used as zone fossils (q.v.).

Ammonius Saccas, a philosopher of Alexandria, and sometimes reckoned as founder of Neoplatonism. His fame, however, was completely dwarfed beside that of his greater pupil, Plotinus. Among his other pupils were Longinus and Origen. d. 243, at a great age.

Ammunition, Originally military provisions for attack and defence. Now the materials used in the discharge of firearms and ordnance of all kinds. Berthold Schwarz, a German monk, is supposed to have been the inventor of cannon in 1313. Stone shot, darts, etc., were first used as projectiles, propelled by gunpowder. Metal shot was substituted in the 17th Century.

Shells were also used at an early date, but they were dangerous to use owing to the absence of fuses. In 1784 Lieut.-General Henry Shrapnel invented a projectile that was primarily a bursting charge, not intended to give velocity to the discharging bullets. In the 19th Century fuses were developed and shells superseded the old case-shot.

High explosives were first adopted by the French in the form of melinite and by the British as lyddite. Gas shells were first used by the Germans in the Great War. Rifling in ordnance changed the projectile to its present elongated form.

Amnesia, either partial or complete loss of memory brought on by various causes, such as an injury to the brain or disease of the brain, insanity, and even tiredness. A very ordinary form of amnesia is when the names of people and places are forgotten.

Amnion, name given to the innermost membrane investing the foetus in the womb.

Amœba, a minute animalcule of the simplest structure, being a more mass of protoplasm; absorbs its food at every point all over its body by means of processes protruded therefrom at will, with the effect that it is constantly changing its shape.

Amok, or **Amuck**, a Malay word applied to a native Malay who, through opium or other causes, enters into a state of murderous frenzy. The word has been adopted into the English language, meaning a state of blind rage, either of man or animal.

Amomum, a genus of plants, such as the cardamom and grains of paradise, belonging to the order Zingiberaceae, and remarkable for their pungency and aromatic properties.

Amontillado, the name under which one of the Fino types of Spanish sherry is shipped.

Amorites, a powerful Canaanitish tribe, either "highlanders" or people of tall stature. NE. of the Jordan; subdued by Joshua at Gibeon.

Amory, Thomas, an eccentric writer of the Life of John Bunce, Esq., and other productions quaintly autobiographical, rhapsodical and delirious. He was a fanatical Unitarian. (1691-1789).

Amos, a poor shepherd of Tekoa, near Bethlehem, in Judah, who in the 8th Century B.C. raised his voice in solitary protest against the iniquity of the northern kingdom of Israel, and denounced the judgment of God as Lord of Hosts upon one and all for their idolatry, which nothing could avert; one of the twelve minor prophets.

Amoy, one of the open ports of China, on a small island in the Strait of Fukien; has one of the finest harbours in the world, and a large export and import trade; the chief exports are tea, sugar, paper, gold-leaf, etc. As in Shanghai, there is an international self-governing settlement; in this case on the neighbouring small island of Kulangsa. Amoy was seized by the Japanese in May, 1938. Pop. 234,000.

Ampère, the unit of electric current, being the current which flows through a wire of resistance 1 ohm when the potential difference between its ends is 1 volt; named after the famous French physicist.

Ampère, **André Marie**, a French mathematician and physicist, born at Lyons; distinguished for his discoveries in electro-dynamics and magnetism, and the influence of these on electro-telegraphy and the general extension of science. (1775-1836).

Amphibia (or **Batrachia**), a division of cold-blooded vertebrates intermediate between fishes and reptiles, and called amphibia, because of their capacity to live either in water or on land. They may be distinguished from other land vertebrates by their smooth, wet skin without scales. Most, but not all, lay eggs in water which develop into tadpoles, and later into full-grown animals which hibernate on land, returning to the water to spawn. Amphibia include frogs, toads, newts (Tritons) and salamanders.

FEMALE NEWT

Amphictyonic Council, a council consisting of representatives from several confederate States of ancient Greece, 12 in number at length, two from each, that met twice a year, sitting alternately at Thermopylae and Delphi, to settle any differences that might arise between them, the decisions of which were several times enforced by arms, and gave rise to what were called *sacred wars*, of which there were three.

Amphion, a son of Zeus and Antiope, who is said to have invented the lyre, and built the walls of Thebes by the sound of it.

Amphisbæna, a genus of limbless, worm-like lizards found in America and Africa. They burrow and live underground, and differ from all other limbless lizards in their capacity to move either backwards or forwards by an undulatory motion.

Amphitheatre, a type of building, the Romans, in which gladiatorial shows were held. They consisted of tiers of seats surrounded at the top by a ring of columns or by a wall, were circular in shape and built of stone, although the first amphitheatre at Pompeii was built of wood. In the centre was a large open space, the arena for the competitors, and the surrounding seats were divided into the "podium"; the lowest tiers were for the noble spectators, and the upper tiers for the rest of the community. The whole building was open to the sky. The Colosseum, the most famous ancient amphitheatre in existence, is at Rome, and was built in A.D. 80. There is also a fine example of a Roman amphitheatre at St. Albans in England.

Amphitrite, a daughter of Oceanus or Poseidon, and goddess of the sea.

Amphitryon, the King of Tiryns, and husband of Alcmena, who became by him the mother of Iphicles, and by Zeus the mother of Hercules.

Amphora, a vessel usually of earthenware, used by the ancient Greeks and Romans for storing wine. It was two-handled, and usually tall and slender, the bottom sometimes tapering to a point which either rested in a tripod or was inserted in a socket in the ground.

AMPHORA

Amplifier, an electrical appliance which increases the intensity of the electrical currents in wireless reception. The type now in general use is the Thermionic valve, which consists of a filament, surrounded by a wire grid, above which is placed a plate called the anode, as it receives a positive charge from a high-tension battery.

Amptihill, market town of Bedfordshire, England, 8 m. SW. of Bedford, with ironworks and a brewery. In its former castle Katherine of Aragon dwelt before her trial. Pop. 2,000.

Ampulla, a bottle used by the Romans, to hold the oil used in anointing; in the Christian Church a vessel serving the same purpose and used at coronations.

Amritsar, a sacred city of the Sikhs, in India, in the Punjab, and a great centre of trade, 32 m. E. of Lahore; is second to Delhi in N. India; manufactures cashmere shawls. It was the scene in 1919 of serious riots, which were quelled by Sir Michael O'Dwyer. Pop. 265,000.

Amsterdam, a great trading city at the mouth of the Amsel, on the Zuider Zee, resting on 90 islands connected by 300 bridges, the houses built on piles of wood driven into the marshy ground; is largely a manufacturing place, as well as an emporium of trade, one special industry being the cutting of diamonds and jewels; birthplace of Spinoza. Pop. 780,000.

Also a city in Montgomery county, New York State, where rugs, carpets, etc., are manufactured. Pop. 34,500.

Amulree, **William Warrander Mackenzie**, Baron, barrister, Chairman of government committees of inquiry and of war-time and other tribunals concerned with industry and wages. Secretary of State for Air, 1930-1931. Chairman, Royal Commission on Newfoundland, 1933. K.B.E. 1918. Ennobled 1929. (1860-).

Amundsen, **Captain Roald**, famous Norwegian explorer. Born at Borge, the son of a shipbuilder, he went early to sea, and in 1897 joined the Gerliche expedition. He was in charge of an expedition which navigated the NW. Passage in 1906, and in 1911 an expedition of his reached the S. Pole—the first to do so, a feat in which he beat Capt. Scott by a few weeks.

In 1925 he made an unsuccessful attempt to reach the N. Pole by aeroplane, but in 1928 with Ellsworth and Nobile flew over the pole in the airship *Norge*. When, in 1928, General Nobile's airship *Italia* was forced down during a N. Pole voyage, Amundsen, despite a previous quarrel with Nobile, hastened by plane to take part in a search and disappeared. (1872-1928).

Amur, a large, eastward-flowing river, partly in Siberia and partly in China, which falls into the Sea of Okhotsk. Length about 1,600 m.

Amurnath, a place of pilgrimage in Cashmere, India, on account of a cave believed to be the dwelling-place of Siva.

Amygdaloidal Rocks, igneous rocks in which the holes left by escaping bubbles of steam and gases have been filled by mineral deposits through the percolation of water from the surrounding rocks.

Amyot, Jacques, Grand Almoner of France and Bishop of Auxerre; was tutor of Charles, son of Henry II., and translator, among other works, of Plutarch into French, which remains to-day one of the finest monuments of the old literature of France. (1513-1593).

Anabaptists, a fanatical sect which arose in Saxony at the time of the Reformation, and though it spread in various parts of Germany, came at length to grief by the excesses of its adherents in Münster.

Anabasis, an account by Xenophon of the ill-fated expedition of Cyrus the Younger against his brother Artaxerxes, and of the retreat of the 10,000 Greeks under Xenophon, who accompanied him, after the Battle of Cunaxa in 401 B.C.

Anabolism, a name given to changes whereby an animal or plant builds up its tissues from carbohydrates, fats, proteins and mineral salts in its food. The building-up process depends on a sufficient and balanced supply of the four groups mentioned, as well as on small quantities of vitamins (*q.v.*).

Anacharsis, a Scythian philosopher of the 6th Century B.C., who, in his roamings in quest of wisdom, arrived at Athens, and became the friend and disciple of Solon, but on his return home was put to death by his brother; he stands for a Scythian savant living among a civilised people, as well as for a wise man living among fools.

Anachronism, a chronological error, especially in literature or art. It is an anachronism to represent people as wearing the clothes, or moving in surroundings, which belong to a later period.

Anaconda (*Eunectes murinus*), a gigantic constricting serpent of tropical America of aquatic habits, belonging to the boa family. Some specimens are 30 ft. long.

Anacreon, a celebrated Greek lyric poet, a native of Teos, in Asia Minor; lived chiefly at Samos and Athens; his songs are in praise of love and wine; not many fragments of them are preserved. (560-478 B.C.).

Anadyomene, Aphrodite, a name meaning "emerging," given to her in allusion to her arising out of the sea; the name of a famous painting of Apelles so representing her.

Anadyr, a river in Siberia, which flows into a gulf of the same name on the Behring Sea.

Anæmia, a state of the blood in which there is a general poverty or lack of red corpuscles. Simple anæmia in which the patient lacks energy and is pale, is best treated by careful nourishing diet, plenty of fresh air and general attention to the health. Anæmia may also exist in connection with an existing illness. Pernicious anæmia is a slow, wasting disease caused by the enormous destruction of the red corpuscles in the blood, and is dangerous.

Anæsthesia, a state of complete or partial insensibility especially as brought about by the use of chemical substances known as anesthetics. General anæsthesia is commonly effected by the administration of chloroform or ether,

or a mixture of chloroform, ether and alcohol, and less frequently ethyl chloride; in dentistry a mixture of nitrous oxide and oxygen is generally preferred.

Local anæsthesia is produced by the injection of cocaine, eucaine or novocaine, or by spraying some very volatile liquid, such as ethyl chloride, upon the appropriate region; the rapid evaporation of the liquid causes intense cold, and so renders the treated area temporarily insensible. Spinal anæsthesia or analgesia is brought about by the injection of novocaine or stovaine into the spinal fluid.

Pioneers in the use of anesthetics were Sir Humphry Davy (nitrous oxide), Sir James Simpson (chloroform) and Dr. C. D. Long of the United States (ether).

Anagni, a small Italian town, 40 m. S.E. of Rome, the birthplace of several popes. The cathedral dates from the 11th Century. Pop. 10,000.

Anagram, is a very ancient form of word-play, and consists in jumbling the letters of a particular word in such a way as to form from it other words having a definite meaning and an appropriate connection.

Anahuac, a plateau in Central Mexico, 7,580 ft. of mean elevation; the Aztec name of Mexico prior to its conquest by the Spaniards.

Anakim, a race of giants that lived in the S. of Palestine, called also sons of Anak. Their chief city was Hebron; they were overcome by Joshua and Caleb, who took possession of it.

Analyst, Public, a local government official, appointed under the various Food and Drugs Acts to analyse samples of food, drugs and agricultural products offered for sale so as to detect adulteration. Such appointment must be confirmed by the Ministry of Health (or the Ministry of Agriculture). Usually the official is a Fellow of the Institute of Chemistry.

Anamalai Mountains, a range of mountains in India in the W. Ghats in Travancore and Coimbatore. Highest point Anamudi, 8,840 ft.

Ananas, a genus of plants of the order Bromeliaceæ. *A. sativus*, the pineapple, is extensively cultivated for its fruit.

Ananias, name of three people mentioned in Acts: (1) a High priest, the "whited wall" who commanded bystanders to smite Paul; (2) the husband of Sapphira; he sold some land, and instead of giving all the proceeds to the Apostles, kept back a part; when discovered, fell dead; (3) a disciple at Damascus who was sent to Paul at the period of his blindness; by laying on of hands Paul cured him.

Anaphylaxis, the name given to a condition of being highly sensitive to certain stimuli. It is found among all animals, and also in men. A common example is hay-fever, which is caused in some people by air containing even a small amount of pollen. Anaphylaxis makes foods, harmless to the majority, have an immediate and violent effect on some people, e.g., eggs or shellfish.

Anarchism, a projected social revolution, the professed aim of which is that of the emancipation of the individual from the present system of government which makes him the slave of others, and of the training of the individual so as to become a law to himself, and in possession, therefore, of the right to the control of all his vital interests. The modern movement owed its impulse to Proudhon (1809-1865); other leaders were Bakunin (1814-1876) and Prince Kropotkin.

Anastasius I., Emperor of the East, excommunicated for his severities to the Christians, and the first sovereign to be so treated by the Pope; built the "Anastasian Wall" at Constantinople as protection against the Bulgars. (430-518).

Anathema, a word originally meaning a thing devoted or set aside as an offering. If a living man or animal, it had to be slain, and so the word acquired the secondary meaning of "accursed," as in St. Paul's Epistles. In the Catholic Church the word was used in excommunication.

Anatolia, the Greek name for Asia Minor.

Anatomy, literally dissection or "cutting up," is the science which deals with the structure of living organisms, and has therefore three main branches: viz. human anatomy, animal anatomy and plant anatomy. Comparative anatomy is the study of the structure of different species of animals, one of its principal objects being to discover points of similarity of genotic significance. Pathological anatomy studies the characteristic appearance of the body of its organs in disease, while artistic anatomy considers the human body from an aesthetic standpoint.

Ancachs (*Ancash*), a coastal dept. of Peru. Area 14,700 sq. m. Pop. 450,000. Cap. Huaraz.

Ancestor-Worship, the worship of ancestors that prevails in primitive nations, due to a belief in Animism (*q.v.*); it obtained in ancient Rome and is still part of the Chinese and Japanese religions.

Anchorises, the father of Æneās, whom his son bore out of the flame of Troy on his shoulders to the ships; was buried in Sicily.

Anchovy (*Engraulis encrasicolus*), a small fish of the herring family abundant in the Mediterranean—captured for the flavour of its flesh and made into sauce; has a single dorsal fin, a deeply forked tail and a deeply cleft mouth.

ANCHOVY

Anchovy Pear, a W. Indian tree (the *Grias cauliflora* of the order Myrtaceae), the fruit of which has the taste of the mango.

Ancient Lights, a privilege, now whereby the light entering an existing window may not be interfered with. The old interpretation that windows enjoying ancient lights must have existed from time immemorial is now legalised as a period of 20 years.

Ancona, a port of Italy in the Adriatic, second to Venice; founded by Syracusans, capital of a province of the same name. Pop. 84,000.

Ancre, river in the dept. of the Somme, France, of which river it is a tributary. It was the scene of British offensives in Nov. 1916 and Jan. 1917.

Andalusia, a region in the S. of Spain watered by the Guadalquivir, comprising the provinces of Almería, Cádiz, Córdoba, Granada, Jaén, Huelva, Málaga and Seville, fertile in grains, fruits and vines, and rich in minerals. Pop. 4,000,000.

Andamans, a group of volcanic islands in the Bay of Bengal, 204 in number, surrounded by coral reefs; since 1858 used by the Government of India as a penal settlement.

Andante, a musical direction indicating that a passage is to be played in a steady manner, neither fast nor slow.

Andermatt, a Swiss village in the canton of Uri, well known as a winter-sports centre.

Andersen, **Hans Christian**, a world-famous fairy-story-teller of Danish birth, son of a poor shoe maker, born at Odense; was some time before he made his mark, was honoured at length by the esteem and friendship of the royal family, and by a national festival on his seventieth birthday. (1805-1875).

Anderson, **Sir Edmund**, Lord Chief Justice of Common Pleas under Elizabeth, sat as judge at the trial of Mary, Queen of Scots. Anderson's *Reports* is still a book of authority. (1580-1605).

Anderson, **Elizabeth Garrett**, M.D., daughter of Newson Garrett, merchant, Aldeburgh. The Society of Apothecaries unwillingly licensed her, 1865. She opened, 1866, in Euston Road, St. Pancras, what is now called the Elizabeth Garrett Anderson Hospital. M.D. (Paris), and elected to London School Board, 1870. Married James George Skelton Anderson, shipowner, 1871. (1836-1917).

Anderson, **John**, a native of Rosneath, professor of natural philosophy in Glasgow University, and the founder of the Andersonian College in Glasgow. (1726-1796).

Anderson, **Mary**, American actress; first appearance, as Juliet, Louisville, 1875; first visited England, 1883; was Rosalind in the performance of *As You Like It* that opened Shakespeare Memorial Theatre, Stratford-on-Avon, 1885; retired 1889, and married Antonio de Navarro, papal chamberlain, who died 1932. (1859-).

Andes, an unbroken range of high mountains, which extend, often in double and triple chains, along the W. of S. America from Cape Horn to Panama, a distance of 4,500 m. The average height of the range is estimated at 13,000 ft., the highest peaks being Aconcagua (23,000 ft.), Huascarán (22,150 ft.), Coropuna (22,900 ft.), Huandoy (21,088 ft.), Chimborazo (20,500 ft.), Cotopaxi (the world's highest active volcano, 19,613 ft.), Sorata (Illampu) (25,250 ft.), Illimani (24,633 ft.). There are over 150 active volcanoes. The Amazon has its source in the Andes.

Andorra, a small republic in the E. Pyrenees, enclosed by mountains, under the protection of France and the Bishop of Urgel, in Catalonia; cattle-rearing is the chief occupation of the inhabitants. Pop. 5,000.

Andover, an old municipal borough and market-town in Hampshire, England, centre of an agricultural district. Pop. 9,000. Also a town in Massachusetts, U.S.A., 23 m. from Boston, famous for its theological seminary, founded in 1808. Pop. 10,000.

Andrassy, **Count Julius**, (1) a Hungarian statesman, was exiled from 1848 to 1857, became Prime Minister in 1867, played a prominent part in diplomatic affairs on the Continent to the advantage of Austria. (1823-1890). (2) His younger son; twice Minister of Interior before Great War, during which he was negotiator with German Government. Foreign Minister at Vienna 1918; afterwards member of Hungarian National Assembly, latterly as legitimist. (1860-1929).

Andrée, **Saloman August**, Swedish polar explorer; in July 1897 set out from Spitzbergen with two companions in an ordinary balloon, for the N. Pole. Their bodies were found on White L. in 1930. (1854-1897).

Andrew, St., brother of St. Peter and one of the Apostles, suffered martyrdom by crucifixion; became patron saint of Scotland; represented in art as an old man with long white hair and a beard, holding the Gospel in his right hand, and leaning on a transverse cross. St. Andrew's Day falls on Nov. 30.

Andrew, St., The Cross of, cross like an X, such having, it is said, been the form of the cross on which St. Andrew suffered.

Andrewes, Lancelot, an English prelate, a zealous High Churchman in the reigns of Elizabeth and James I.; attended the Hampton Court Conference, and was one of the translators of the Authorised Version of the Bible. (1555-1626).

Andreyev (Andrew), Leonid Nikolaevich, Russian author, whose poverty and wretchedness form the background of his novels, stories and plays. His most widely known novels are *The Abyss* and *In the Fog*; chief play *The Life of Man*. (1871-1919).

Androclus, or **Androcles**, a Roman slave condemned to the wild beasts, but saved by a lion, sent into the arena to attack him, out of whose foot he had long before sucked a painful thorn; the animal recognised him as its benefactor, and spared his life. Bernard Shaw's play *Androcles and the Lion* adapts the legend to the theme of Christian persecution.

Andromache, the wife of Hector and the mother of Astyanax, famous for her conjugal devotion; fell to Pyrrhus, Achilles' son, at the fall of Troy, but was given up by him to Hector's brother; is the subject of tragedies by Euripides and Racine.

Andromeda, a beautiful Ethiopian sea monster, which Perseus slew, receiving as his reward the hand of the maiden; she had been demanded by Neptune as a sacrifice to appease the Nereids for an insult offered them by her mother, Cassiopeia.

Andronicus, the name of four Byzantine emperors: **A. I.**, **Comnenus**, killed his ward, Alexis II., usurped the throne, and was put to death, 1185; **A. II.**, lived to see the empire devastated by the Turks (1282-1288); **A. III.**, nephew of the preceding, dethroned him, fought stoutly against the Turks without staying their advances (1328-1341); **A. IV.**, dethroned his father, Soter V., and was immediately stripped of his possessions himself. (1377-1379).

Andros, the most northerly island of the Cyclades lying SE. of Zebocia and belonging to Greece. Has fertile soil and is productive of wine and silk. Pop. 20,000. Chief town, Andros. Pop. 2,000. Also an island in the Bahamas. Pop. 7,000.

Anemometer, an instrument for measuring the velocity of the wind. The commonest type consists of four hemispherical cups mounted on the arms of a rotating post. The rate at which the cups revolve in the wind is made to register the velocity of the wind in miles per hour.

Anemone, or **Windflower**, a genus of flowers of the natural order Ranunculaceae, comprising 120 different species, most of which grow in temperate regions. Two are native to the

British Isles, viz., *A. nemorosa*, the wood anemone, and *A. pulsatilla* (pasque flowers). Other varieties grown as garden flowers include *A. coronaria* (poppy anemone), *A. hortensis fulgens* (scarlet windflower), *A. hepatica* and *A. japonica*.

Aneroid, a barometer, consisting of a small watch-shaped, air-tight, air-exhausted metallic box, with internal spring-work and an index, affected by the pressure of the air on plates exposed to its action.

Aneurin, a British (Welsh) bard at the beginning of the 7th Century, who took part in the Battle of Cattraeth, and made it the subject of an epic poem named *Gododin*.

Aneurysm, a swelling on the coat of an artery, containing blood. May be external, the result of an injury, and susceptible of surgical treatment. The most serious type occurs on the aorta, the main artery of the body, and may be caused by syphilis, alcoholism, rheumatism or other diseases.

Angara, a tributary of the Yenisei, Baikal. Irkutsk stands on its banks.

Angel, a gold coin introduced into England from France by Edward IV.; last coined in the reign of Charles I. The coin had the archangel Michael piercing the dragon on the obverse of it (from which it took its name) and a ship on the reverse.

Angel-Fish (*Squatina squatina*), a hideous, voracious fish, the squaloid (shark) family,

ANGEL- OR MONK-FISH

closely related to the squaloid (shark) family, with a flat, ray-like body, growing to a length of 5 ft., and occurring round the British coasts; known also as the Monk-fish. Also the name of certain tropical fishes, brilliantly coloured and laterally compressed, found in the waters round the Bermudas, the W. coast of tropical America, E. Indies, etc., including *Pterophyllum scalare* and *Pomacanthus semicirculatus*.

Angelica (*Angelica officinalis*), a kitchen herb of the natural order Umbelliferae, used for candying and the seed for flavouring.

Angelico, **Fra.**, an Italian painter, born in Tuscany; became a Dominican monk at Fiesole, whence he removed to Florence, and finally to Rome, where he died; devoted his life to religious subjects, which he treated with great delicacy, beauty and finish. (1387-1455).

Angell, Sir **Ralph Norman**, English author, son of Thomas Angell Lane of Holbeach. Educated in France. Rancher and journalist in Western U.S.A. in Paris: edited *Gakigami's Messenger* 1899-1903; on *Eclair* 1903-1905; managed *Paris Daily Mail*, 1905-1914. Dropped name of Lane, and became famous 1909 as author of *The Great Illusion*—theme: that war is unprofitable to victors. M.P. (Labour), N. Bradford, 1920-1931. Knighted, 1931. Nobel Peace Prize, 1933. (1874-).

Angelus, a devotional service in the Catholic Church in honour of the Incarnation, held three times daily, 6 a.m., noon and 6 p.m., when the Angelus Bell is rung.

Angers, capital of the dept. of Maine-et-Loire, France, on the Maine, the ancient capital of Anjou, with a fine cathedral, a theological seminary and a medical school. Pop. 85,000.

ANEMOMETER

Angerstein, John, born in St. Petersburg, a distinguished patron of the fine arts, whose collection of paintings, bought by the British Government, formed the nucleus of the National Gallery. (1735-1822).

Angina Pectoris, an affection of the heart of an intensely excruciating nature, the pain of which at times extends to the left shoulder and down the left arm, usually attacking men past middle age and symptomatic of other trouble.

Angiosperm, is the name given to seeds as in an ovary, belonging to the important group Phanerogams, or flowering plants and distinguished by having carpels and stamens—e.g., the Chestnut.

Angkor, ancient city of Cambodia in French Indo-China, now only ruins. Other wonderful remains known as Angkor Wat are in the vicinity.

Angle, a member of a Teutonic tribe, which first, in the 5th Century, crossed over to Britain. With other tribes it colonised a great part of the country. In building, an angular projection. In geometry, the inclination of one straight line upon another, meeting at a point, called the vertex. A vertical line upon a horizontal forms a right angle of 90°. An acute angle is one less than 90°; an obtuse angle between 90° and 180°; a reflex angle between 180° and 360°.

Angle Measure. The magnitude of an angle is generally expressed in circular measure for scientific purposes. The unit of circular measure, the radian—the angle subtended at the centre of a circle by an arc equal to the radius.

Angler Fish, a number of species of fishes included in the order *Pediculati*, sub-orders *Lophiidae*, *A-*

ANGLER FISH OR FISHING FROG

ternarioidae and *Ceratoidae*. The Angler-fish or Fishing Frog (*Lophius piscatorius*) has a broad, big-mouthed head and a tapering body, both covered with appendages having glittering tips, by which, as it burrows in the sand, it allures other fishes into its maw. It is found round the coasts of Europe and N. America, living on the sea-bottom, often at considerable depths.

Anglesey, i.e., Island of the Angles—an island forming a county in Wales, separated from the mainland by the Menai Strait; flat, fertile and rich in minerals. Pop. 49,000.

Anglesey, H. W. Paget, Marquis of, eldest son of the first Earl of Uxbridge, famous as a cavalry officer in Flanders, Holland, the Peninsula, and especially at Waterloo, where he lost a leg, and for his services, which won him his title; was some time lord-lieutenant in Ireland, where he was very popular. (1768-1854).

Anglican Church, the body of Episcopal churches all over the British Empire and Colonies, as well as America, sprung from the Church of England, though not all subject to her jurisdiction.

Angling, the sport of catching fish with rod, line and hook, either in fresh or salt water. The former is the more popular, fly-fishing for salmon in Scotland in particular among the wealthy, while in the N. of England there are many working men's angling clubs. For sea-fishing worms instead of the fly are mainly used for bait.

Anglo-Catholics, the name given to the High party of the Church of England, which claims that the church is part of the Catholic Church, holding a common faith with Rome, though not under the authority of the Pope. It had its origin in the Tractarian Movement in Oxford in the middle of last century, and has made its great stand on the question of reservation of the sacraments, and to a less extent on Catholic ritual and vestments. The Church Assembly tried to direct the party and its movement through the Prayer Book Measure, 1927.

Anglo-Saxon, the name usually assigned to the early infected form of the English language, though the term "old English" is favoured by many philologists on the ground that it indicates the real continuity of the language from the earliest times.

Anglo-Saxon Chronicle, written or compiled in the reign of Alfred, and, if not his own work, probably owes much to his inspiration; it is the most important monument of extant Anglo-Saxon prose; it is written in clear, forcible style, and often, as in the account of the Battle of Ashdown and other fighting episodes, is both rhythmic and musical. It was continued later beyond the Conquest to the death of Stephen.

Angmering, a village of Sussex, England, near the coast. It is extending towards the sea, and the modern part is known as Angmering-on-Sea.

Angola, a district on the W. coast of Africa, between the Congo and Benguela, subject to Portugal, the capital of which is Huambo (re-named New Lisbon). The old capital was St. Paul de Loanda. Pop. 3,000,000.

Angora. See Ankara.

Angostura. See Ciudad Bolivar.

Angostura, a medicinal bark obtained from the tree *Cusparia febrifuga* exported from Ciudad Bolivar.

Angoulême, an old French city in the dept. of Charente, and standing on the R. Charente; has a fine cathedral, and was the birthplace of Marguerite de Valois and Balzac. Pop. 34,000.

Angra do Heroismo, the capital of the Azores, on the island of Terceira, a fortified place. Pop. 10,000.

Angra Pequena. See Lüderitz.

Anguilla, or Snake Island, one of the Leeward Is. in the W. Indies, E. of Porto Rico, belonging to Britain. Pop. 4,000.

Angus. See Forfarshire.

Anhalt, a State (formerly a duchy), of central Germany, surrounded and split up by Prussian Saxony, watered by the Elbe and Saale; rich in minerals. Cap. Dessau. Pop. 341,000.

Anhui (or *Anhu*), a large inland province of central China, one of the chief cotton-growing provinces. Area 52,000 sq. m. Pop. 23,000,000. Capital Hwaining.

Ani, (1) a ruined town of Armenia, near the capital of the Bagratids or monarchs of the "third dynasty" in Armenian history. (2) An Egyptian writer who compiled the Papyrus named after him, the "Papyrus of Ani," an account of the rites to be observed at Egyptian obsequies. It forms a part of the Book of the Dead or "Book of the Coming Forth of the Day," a series of formulae put together by the priests of Heliopolis about 3000 B.C.; now in the British Museum.

Anichini, *Luigi*, an Italian medallist of the 16th Century; executed a medal representing the interview of Alexander the Great with the High Priest of the Jews, which Michael Angelo pronounced to be the perfection of the art.

Aniline, a colourless, transparent, oily liquid, obtained chiefly by reducing nitrobenzene with iron scraps, steam and hydrochloric acid, and extensively used in the production of dyes.

Animal, an organism endowed with life. In zoology (the science of the study of the animal kingdom) the word has a more restricted meaning, animals being differentiated from plants. It is accepted, however, that animals and plants had a common origin, and most distinctions between them are arbitrary.

Animals are capable of locomotion and of assimilating organic substances, while in their organism there is an absence of chlorophyll and cellulose. There are, however, some animals which do not fulfil all these conditions, while there are some plants which do. Moreover, both animals and plants may be unicellular. In animals of a higher degree of complexity the organism includes the following systems: respiratory, circulatory, muscular, nervous, digestive, reproductive, and excretory.

Animal Worship, the deification of that obtained in many ancient religions, of which survivals are still to be found, as in India and Polynesia.

Animism, a belief that there is a psychical body within the physical body of a living being, correspondent with it in attributes, and that when the connection between them is dissolved by death the former lives on in a ghostly form; in other words, a belief in a ghost-soul existing conjointly with and subsisting apart from the body, its physical counterpart.

Aniseed, the seed of the anise (*Pimpinella anisum*), an umbelliferous plant, used as a carminative and in the preparation of liqueurs.

Anjou, an ancient province in the N. of France, annexed to the crown of France under Louis XI., in 1480; the countyship was held by the English crown from the time of the accession of Henry II., who was the son of Geoffrey VI. of Anjou, till wrested from King John by Philip Augustus in 1203.

Ankara (*Angora*), ancient name, Ancyra, since 1923 the seat of the Turkish Government, a city in the centre of Anatolia, in a district noted for its silky, long-haired goats, cats and dogs. Modern improvements have been effected by Kemal Atatürk, the President-Dictator. Pop. 124,000.

Ankle, the joint or articulation connecting the foot with the leg. The ankles support the weight of the body, and a sprained ankle is a common injury. The ankle, a hinged joint, is moved by three ligaments, the anterior, internal and external.

Ankober, or **Ankober**, former capital of the kingdom of Shoa, in Abyssinia (Italian E. Africa); stands 8,200 ft. above sea-level.

Ankylosis, the medical term for the stiffness of joints which results from a shortening of the muscles or ligaments (which may allow restricted movement) or from the growing together of the bones which form the joint, in which case no movement of the joint is possible.

Ankylostomiasis, a disease of the human intestine caused by a parasite ankylostoma. Symptoms of the disease are similar to colic and anaemia. The disease is treated by anthelmintics (i.e., medicine for killing intestinal worms) and purgatives.

Anna, an Indian copper coin. Its value is the sixteenth of a rupee, equivalent to about one penny.

Anna Comnena, a Byzantine princess, who, having failed in a political conspiracy, retired into a convent and wrote the life of her father, Alexius I., under the title of the *Alexiad*. (1083-1143).

Anna Ivanovna, niece of Peter the Great, Empress of Russia in succession to Peter II. from 1730 to 1740; her reign was marred by the evil influence of her paramour Biren over her, which led to the perpetration of great cruelties; was famed for her big cheek, "which, as shown in her portraits," Carlyle says, "was comparable to a Westphalian ham." (1693-1740).

Annam, a kingdom of the size of Sweden, along the E. coast of French Indo-China, under a French protectorate since 1885; it has a rich, well-watered soil, which yields tropical products and is rich in minerals. Area 39,758 sq. m. Pop. 5,200,000.

Annan, a burgh in Dumfries, Scotland, on the R. Annan; birthplace of Edward Irving, and where Carlyle was a schoolboy and later mathematics master. Pop. 6,000.

Annapolis, a small seaport of Nova Scotia, Canada, on the Bay of Fundy. Also the name of the capital of Maryland, U.S.A., where is the U.S. Naval Academy. Pop. 12,000.

Ann Arbor, a city of Michigan, U.S.A., on the Huron, with an observatory and a flourishing university. Pop. 27,000.

Annates, or **First Fruits**, originally a levy made by the Pope on all ecclesiastical benefices. The rate at which they were calculated was first determined by Innocent III., and later increased by Nicholas III. In England, in the reign of Henry VIII., they were made payable to the Crown. In Queen Anne's reign they were given up to a fund for the augmentation of poor livings, known as Queen Anne's Bounty (q.v.).

Queen Anne, daughter of James II.; by the union of Scotland with England during her reign in 1707 became the first sovereign of the United Kingdom; her reign distinguished by the part England played in the War of the Spanish succession and the number of notabilities, literary and scientific, who flourished during it, though without any patronage on the part of the Queen. (1665-1714).

QUEEN ANNE

Anne Hathaway's Cottage, a farmhouse at Shottery, a hamlet near Stratford-on-Avon. It is mentioned in the will of one Richard Hathaway who died in 1581, and whose daughter Agnes was probably the same person as the wife of William Shakespeare. It is now national property.

Anne of Austria, the daughter of Philip III. of Spain, wife of Louis XIII. of France, and mother of Louis XIV., became regent on the death of her husband, with Cardinal Mazarin for minister; during the minority of her son triumphed over the Fronde; retired to a convent on the death of Mazarin. (1610-1666).

Anne of Brittany, the daughter of Duke of Brittany; by her marriage, first to Charles VIII., then to Louis XII., the duchy was added to the French crown. (1476-1514).

Anne of Cleves, daughter of Duke of Cleves, a wife of Henry VIII., who fell in love with the portrait of her by Holbein, but, being disappointed, soon divorced her. (1515-1557).

Anne of Denmark, Queen of England and daughter of Frederick II., King of Denmark and Norway. She was married to James, then King of Scotland, in Norway at Christiania (now Oslo), and crowned consort in 1603. Only two of her children survived: Charles I. (of England) and Elizabeth, Queen of Bohemia. (1574-1619).

Annealing, a process whereby a metal is heated to a desired temperature, and after a required period at the level of that temperature, is cooled at a certain rate. The purposes of this process are either to soften or refine the substance, give greater stability to its composition and power to withstand stress, or, in an alloy, to bring about a better mixture of the constituents of the alloy. To retain a brightness of surface and prevent oxidation, the furnace atmosphere can be controlled in a process known as *bright annealing*.

Annelid, from the Latin meaning "little ring," is the class of invertebrates which includes certain types of worms, closely related to the Arthropods and Molluscs. They are to be found in the sea, fresh water and the earth. Their bodies consist of numerous segments or ring-like divisions. Reproduction may be bisexual, unisexual or by budding.

ANNELIDS—LEECH (ON LEFT) AND LUGWORM

Annuities, ordinarily a regular money payment at fixed monthly or quarterly or yearly intervals. Annuities are made by the Government and Assurance Companies, by the former to reduce the National Debt. They are paid in many forms. A life annuity is paid to the nominee for a life-time. Joint annuities are those payable to all the nominees, until one dies. A contingent annuity is one of an uncertain period. Deferred or reversionary annuities depend on some outside factor before being payable, such as a death or lapse of years. The British Government make annuities through the National Debt Commissioners. They were first paid in 1808. In 1813 an Act was passed for the registering of all annuities.

Annunciation Day, a festival on commemoration of the salutation of the angel to the Virgin Mary on the Incarnation of Christ.

Anode, name given in electrolysis to the positive electrode, where the current enters the liquid, and to the positive electrode of a vacuum tube, such as a thermionic valve or X-ray tube.

Anointing with oil or ointment as a religious ritual has a two-fold purpose: to ward off the malignancy of evil spirits and diseases, and to communicate a sense of divine power by purifying the anointed of earthly taint. When they are crowned, the King and Queen are anointed by the Archbishop.

Anopheles, a genus of gnats or mosquitoes, most species being disease-carriers, including species responsible for carrying malaria, yellow-fever, etc.

Ansbach, a manufacturing town in SW. of Nürnberg, the capital of the old margraviate of the name, the margaves of which were Hohenzollerns (q.v.). Pop. 19,000.

Anselm, St., Archbishop of Canterbury, a native of Aosta, in Piedmont, monk and abbot; visited England frequently, gained the favour of King Rufus, who appointed him to succeed Lanfranc; quarrelled with Rufus and left the country, but returned at the request of Henry I., a quarrel with whom about investiture ended in a compromise; an able, high-principled, God-fearing man, and a calmly resolute upholder of the authority of the Church. (1033-1109).

Anson, Lord, a celebrated British naval commander, sailed round the world, during war with Spain, on a voyage of adventure with a fleet of three ships, and after three years and nine months returned to England, his fleet reduced to one vessel, but with £500,000 of Spanish treasure on board. Anson's *Voyage Round the World* contains an interesting account of this. (1697-1762).

Anstey, F. See Guthrie, T. A.

Anstruther, Easter and Wester, two on the Fife coast, Scotland, the former the birth-place of Tennant the poet, Thomas Chalmers, and John Goodsir the anatomist. Pop. 1,600.

Ant, a social insect belonging to the family Formicidae of the order Hymenoptera. They live in nests under the ground and in trunks of trees. These nests are hollowed into numerous galleries. They feed on many things, including any type of dead flesh, and are particularly fond of sweet juices, and will catch, keep and milk certain aphides for the sweet liquid found in their abdomen.

Three types of adult ants will be found in an ants' nest: winged males and females with sexual organs, and the sexless workers. The young pass through three stages as egg, larva and nymph. The male and female ants possess wings until fertilisation takes place, when the males die and females return to their nest. Ant communities are very highly organised, and will engage in battle, carrying away larvae to be brought up as slaves.

Antæus, a mythical giant, a *terra filius* or son of the earth, who was strong only when his foot was on the earth; lifted in air, he became weak as water, a weakness which Hercules discovered to his discomfiture when wrestling with him.

Antananarivo, or Tananarivo, cap. of Madagascar, in the centre of the island, on an inaccessible rocky height 5,000 ft. above sea-level. Pop. 99,000.

Antarctica, a circumpolar southern continent. Divisions have been named Graham I., Coats Land, Enderby Land, Kaiser Wilhelm II. Land, Queen Mary Land, Knox Land, King George V. Land, Wilkes Land, Adelle Land, Oates Land, Balleny Is., S. Victoria Land, Edward VII. Land, Kemp Land and Mary Byrd Land. The area is estimated at about 54 million sq. m. The average elevation is about 6,000 ft. and the highest peak over 15,000 ft.

Antarctic Exploration. The first important voyage was made by Capt. Cook during 1772-1775, when he crossed the Antarctic circle for the first time. In 1819 William Smith discovered a group of islands, which he named the S. Shetlands, while at about the same time an expedition under the Russian Capt. Bellingshausen explored the Sandwich group and named Alexander the First Land and Peter the First Land.

In 1823 Weddell reached Lat. 74° 15' S. Biscoe in 1836-1832 discovered what is now called Graham Land. In 1840 Captain Ross and Captain Hooker traced Victoria Land from Cape North to Cape Crozier, and named the two mountains Erebus and Terror after their two ships. The first winter endured by man in the Antarctic was in 1898, by Gerlache of Belgium.

Edward VII. Land was discovered by the British National Antarctic Expedition ship the *Discovery*. From 1901 to 1903 a German expedition in the *Gauss* discovered Wilhelm II. Land, and named an extinct volcano they discovered Gannssberg, while in 1902-1904 a Scottish expedition in the *Scotia* discovered a large barrier of ice at the SE. end of the Weddell Sea, forming part of the Antarctic continent.

In 1904 an expedition under Charcot found that the Biscoe Is. were more numerous than they had formerly been estimated to be. In his ship *Discovery* Captain Scott in 1901-1904 penetrated into this *terra incognita*, and Shackleton four years later succeeded in his *Nimrod* expedition in pushing across the ice to within 111 m. of the Pole.

On Dec. 14, 1911, Amundsen reached the Pole. Capt. Scott and his small party arriving there on Jan. 18, the next year, after great hardship, found Amundsen's tent planted on the spot, and perished in a blizzard on the way back to their base. In 1922 Shackleton died at sea on board the *Quest* while on another Antarctic voyage.

Aeroplanes have played an important part in modern Antarctic exploration. Wilkins, who had already done good work in the Arctic, discovered that Graham Land was composed of islands and was not a peninsula, and Admiral Byrd carried out an air-survey in wireless contact with New York. He flew from the Bay of Whales round the S. Pole and back in 19 hours. The *Norvegia* under Riisen-Larsen discovered Queen Maud Land in 1931, and completely circumnavigated Antarctica. In 1936 Lincoln Ellsworth of U.S.A. explored Ross Sea and completed an air survey; but, his aeroplane breaking down, he was rescued by the British Royal Research Ship, *Discovery II*.

Antarctic Ocean, name given to those parts of the Atlantic, Pacific and Indian Oceans which together encircle Antarctica. It includes the waters of the Ross, Weddell and Bellingshausen Seas, and is shallow—averaging about 2,000 fathoms. Despite its temperature, which is never over 40° F., it abounds in fish; there are also many whales. In winter it is frozen, and even in summer pack-ice remains around most of the coast. There are few islands, the chief being the Antarctic Archipelago S. of S. America.

Ant-Eaters, a family of edentate mammals. They have a tubular mouth with a small aperture, and a long tongue covered with a viscid secretion, which they thrust into the ant-hills, and then withdraw covered with ants.

GREAT ANT-EATER

They are native to tropical America, and include the Great Ant-eater (*Myrmecophaga tridactyla*), the Tamandua (*Tamandua tridactyla*) and the Two-toed Ant-eater (*Cyclothurus bidentatus*).

Antelope, hollow-horned ruminants closely allied to the sheep and the goat; very like the latter in appearance, with a light and elegant figure, slender, graceful limbs, small, cloven hoofs, and, generally, a very short tail; found in every continent except Australia, where there are no representatives; include gazels, bushbucks, kudus, elands, the bongo, sable and roan antelopes, gemsbok, gazelles, nilgai, etc.

Antennæ, is the name given to jointed horns or feelers found attached to the heads of certain kinds of insects and crustaceans. In butterflies the extreme end of their antennæ is club-shaped.

while in moths the antennæ are often feathered. Insects possess only two antennæ, but crabs may have four or more.

Antequera, a town in Andalusia, a stronghold of the Moors from 712 to 1410. Pop. 30,000.

Anthelia, luminous rings witnessed in Alpine and Polar regions, seen round the shadow of one's head in a fog or cloud opposite the sun.

Anthelmintics, drugs given to kill, or intestinal worms.

Anthology, is the name given to a collection of lyric poems by different authors or of extracts from longer works in prose or poetry, either by the same or different authors. Meleager, a Greek poet, compiled an anthology, entitled the *Garland* (c. 50 B.C.), and this is the basis of the present Greek Anthology, containing over 4,000 poems and inscriptions by over 300 writers. English literature is rich in anthologies.

Anthracene, a crystalline solid, one of the products obtained in the distillation of coal-tar and used for the manufacture of alizarin and other dyes.

Anthracite, a form of hard, black coal composed almost entirely of carbon. It burns with little ash or smoke, and is therefore suited for naval purposes. Particularly abundant in S. Wales and NE. Pennsylvania coalfields.

Anthrax, a disease especially in cattle, due to the invasion of a living organism, which, under certain conditions, breeds rapidly; two forms are recognised in man, external and internal; the former marked by pustules and fever, the latter due generally to infected water or meat, by intestinal disorders; both may lead to collapse. Many cases occur among wool-sorters and rag-pickers, and others may be due to infected camel's hair.

Anthropoid Apes, a class of apes, including the gorilla, chimpanzee, orang-outang, and gibbon, without tails, with semi-erect figures and long arms; classified in zoology in the sub-order of mammals, Anthropoidea, which includes man.

Anthropology, the science of man as he exists or has existed under different physical and social conditions.

Anthropometry, the science of the measurement of man, considered as a branch of anthropology. Extensive study of human characteristics has resulted in a number of scientific generalisations, especially with reference to measurements of the head, forehead, nose, stature, proportions of the body. Colouring is also important, jaw projection, etc. Anthropometry involves the measurement of man in relation to these characteristics. The anthropometric system of identifying criminals was evolved by Bertillon, but has long been replaced by the finger-print system introduced by Sir E. Henry from India.

Anthropomorphism, the ascription of human attributes to God.

Antibes, a seaport and place of ancient date on a peninsula in the S. of France, near Cannes and opposite Nice, much frequented by fashionable people. Pop. 12,000.

Antichrist, a name given in the New Testament to various incarnations of opposition to Christ in usurpation of His authority, but by St. John defined to involve that form of opposition which denies the doctrine of the incarnation, or that Christ has come in the flesh. The name is used in the Bible by St. John only.

Anti-Corn Law League, formed by the free-traders, Richard Cobden and John Bright, at Manchester in 1838 to oppose the duties on foreign corn then in force. They were finally repealed in 1846, as a result of the potato famine in Ireland, a barren rocky island, 140 m.

Anticosti, long, in the estuary of the St. Lawrence, Canada, frequented by fishermen, and with few inhabitants.

Anticyclone, an outward flow of air from the centre of an atmospheric area of high pressure. This is caused by air which in descending is heated and dried, thus transmitting radiation unimpeded. Weather affected by anticyclone is clear, frosty in winter and hot in summer.

Antigone, the daughter of Oedipus, led about her father when he was blind and in exile; returned to Thebes on his death; was condemned to be buried alive for covering her brother's exposed body with earth in defiance of the prohibition of Creon, who had usurped the throne; she hanged herself in the cave where she had been buried, and Creon's son, out of love for her, killed himself. She has been immortalised in one of the grandest tragedies of Sophocles.

Antigonus, surnamed the Cyclops or the one-eyed, one of the generals of Alexander the Great, made himself master of all Asia Minor, excited the jealousy of his rivals; was defeated and slain at Ipsus, in Phrygia, 301 B.C.

Antigua, one of the Leeward Is., in the W. Indies, belonging to Britain. About 51 m. in circumference. Area 108 sq. m. The islands of Barbuda and Redonda are dependencies of Antigua. Chief products: sugar and molasses. The chief town is St. John. Pop. 32,500.

Antilles, an archipelago curving round from N. America to S. America, and embracing the Caribbean Sea; the Greater A., on the N. of the sea, being Cuba, Haiti, Jamaica and Porto Rico; and the Lesser A., on the E., forming the Leeward Is., the Windward Is., and the Venezuelan Is., the Leeward as far as Dominica, the Windward as far as Trinidad, and the Venezuelan along the coast of S. America.

Antimony, a chemical element intermediate in character between a metal and a non-metal, but more closely resembling the former; it is sometimes known as a metalloid. Symbol Sb (from the Latin name *stibium*), atomic number 51, atomic weight 120.2. It occurs chiefly as the sulphide, stibnite, from which it is extracted by roasting the ore in air to convert it into the oxide, and heating the latter with charcoal.

The ordinary form of antimony has a silvery, metallic appearance and a specific gravity of 6.7; it is hard and brittle, and when solidifying after fusion expands, so that it may be successfully cast in moulds. It is an ingredient of many useful alloys—e.g., pewter and Britannia metal (alloys of tin, antimony and copper), type-metal (lead, antimony and tin), and anti-friction bearing metal (lead, antimony and tin). A tartrate of antimony and potassium is used as an emetic in medicine ("tartar emetic"), and also as a mordant in the dye industry.

Antinomianism (Greek *anti*, against, and *nomos*, law), originated in 1492 with Johannes Agricola, who with Luther was one of the pioneers of the Reformation. It signifies a rejection of the law of Moses in favour of a belief in the inner spirit. The doctrine was disputed by Luther and Melancthon, and Agricola eventually retracted.

Antinomy, in the transcendental philosophy of Kant the contradiction which arises when we carry the categories of the understanding above experience and apply them to the sphere of that which transcends it.

Antinous, a Bithynian youth of extraordinary beauty, a slave of the Emperor Hadrian; became a great favourite of his, and accompanied him on all his journeys. He was drowned in the Nile, and the grief of the emperor knew no bounds; he enrolled him among the gods, erected a temple and founded a city in his honour.

Antioch (now *Antakieh*), ancient cap. of Syria, on the Orontes, called the Queen of the East, on the high road between the E. and the W., and accordingly a busy centre of trade; once a city of great splendour and extent, and famous in the early history of the Church as the seat of several ecclesiastical councils and the birthplace of Chrysostom. There was an Antioch in Pisidia, afterwards called Caesarea. Pop. 28,000.

Antiochus, name of a number of Syrian kings of the dynasty of the Seleucids: **A. I.**, Soter—i.e., Saviour—son of one of Alexander's generals, fell heir to all Syria; king from 281 to 261 B.C. **A. II.**, Theos—i.e., God—being such to the Milesians in slaying the tyrant Timarchus; king, 261 to 246 B.C. **A. III.**, the Great, extended and consolidated the empire, gave harbour to Hannibal, declared war against Rome, was defeated at Thermopylae and by Scipio at Magnesia, killed in attempting to pillage the temple at Elymais; king, 223 to 187 B.C. **A. IV.**, Epiphanes—i.e., illustrious—waged a series of campaigns against Egypt, overrunning the country until ordered out by Rome, tyrannised over the Jews, provoked the Maccabean revolt, and died insane; king, 175 to 164 B.C. **A. V.**, Eupator, king from 164 to 162 B.C.

Antiparos, an island in the Aegean Sea, one of the Cyclades, W. of Paros, with a stalactite cavern.

Antipater, a Macedonian general, governed Macedonia with great ability during the absence of Alexander, defeated the confederate Greek states at Crannon, reigned supreme on the death of Perdiccas (397–319 B.C.).

Antipatris, a town in Palestine built by Herod the Great, and named after Antipater, his father.

Antiphilus, a Greek painter, contemporary of Apelles.

Antiphlogistic, any medicine which has the effect of abating fevers—e.g., aconite, mercury, etc.

Antiphon, an Athenian orator and politician, preceptor of Thucydides, and the first to formulate rules of oratory. (480–411 B.C.).

Antipodes (from the Greek, *anti*, opposite, and *pous*, a foot). Two places on the earth are the antipodes of each other if an imaginary straight line drawn from one to the other may be said to pass through the centre of the earth. The direct antipodes of England lies in the S. Pacific Ocean, the nearest point of land being Antipodes I., about 500 m. SW. of New Zealand.

Antipope, a pope elected by a civil elector, in opposition to one elected by the cardinals, or one self-elected and usurping; there were some 28 of such, though authorities do not agree on the precise number.

Antipyretics, medicines to reduce the temperature in fever.

Antipyrine, a febrifuge prepared from coal-tar, and used as a substitute for quinine.

Antirrhinum, or **Snappedragon**, a genus of plants of the order Scrophulariaceae. *A. magus* is sometimes described as a native of England, though it is more probably a naturalised escape. Although perennials, they are usually treated as half-hardy annuals in cultivation, and may be propagated from seed or by cuttings. Intermediate and dwarf varieties may be grown and of all colours except blue.

ANTIRR-
RHINUM

Antisana, a volcano of the N. Andes, in Ecuador, 19,200 ft. high; also a village on its flanks, 13,000 ft. high, one of the highest villages in the world.

Antiscorbutics, elements necessary to prevent or cure scorbutus (scurvy). Lack or insufficiency of certain vitamins is the cause of scurvy, and the preventative or curative treatment is the administration of them in the form of orange or lemon juice, fresh vegetables and milk.

Anti-Semitism is the name given to towards the Jewish race. The name originated in the 19th Century, but the antipathy goes back much earlier—to the Middle Ages and later when the Jews were barred from any form of trade or commerce, except usury. At this time the dislike was religious in origin, but in its modern manifestations it is far more an enraged attitude towards Jewish business ability and capacity to accumulate wealth.

Towards the end of the 19th Century pogroms or murderous riots against the Jews took place in Russia, Austria, Hungary, Rumania and Algeria. Anti-Semitism was also present as a social sign in England, Germany, France and the U.S.A. Feeling rose high in France in 1894, when Captain Dreyfus, a Jew, was falsely accused of espionage and condemned. After continued agitation for 10 years he was re-tried and finally released.

When the Nazi party, under Hitler, came to power in Germany in 1933, anti-Semitism assumed the form of a political movement. The Jews were declared the enemy of the German people and suffered severe persecution. A great number of Jews have been compelled to flee the country. Similar persecution accompanied the German annexation of Austria in 1938. See also Aryan paragraph under Aryan.

Antiseptics, substances used, particularly in surgery, to prevent or arrest putrefaction by killing bacteria; first used in surgery by Lord Lister, carbolic acid being for some time the chief.

Antisthenes, a Greek philosopher, a master of Hellenism, a disciple of Socrates, the Cynic school; affected to disdain the pride and pomp of the world, and was the first to carry staff and wallet as the badge of philosophy, but so ostentatiously as to draw from Socrates a rebuke (444-365 B.C.).

Antite-Taurus. See Taurus, Mount.

Antitoxins, substances produced in the body as an antidote against certain poisons, but only produced in the presence of those poisons. If the dead germs of diphtheria are injected into the blood of a horse, the antitoxin is produced and can be used as a cure for cases of the disease. A similar treatment can be used against venom in cases of snake-bite.

Antium (Mod. Porto d'Anzio), a town of Latium on a promontory jutting into the sea, long antagonistic to Rome, subdued in 333 B.C.; the boats of its ships,

captured in a naval engagement, were taken to form a rostrum in the Forum at Rome; it was the birthplace of Caligula and Nero.

Ant-Lion, a four-insect of the family Myrmeleonidae, of the order Neuroptera, sub-order Planipennia; found in S. Europe. In its larval stage it is carnivorous, and is found in loose sand, where it digs a pit in which to trap and overcome ants and other small insects.

LARVA OF
ANT-LION

Antofagasta, a port in Chile and capital of the province of Antofagasta. It was taken from Bolivia after the war of 1879, and much of Bolivia's trade passes through it. Exports silver ores, nitrate of soda, lead, copper, salt; the products of the province. Pop. (town) 53,600; (prov.) 178,700.

Antonines, The Age of the, a period of Roman history from A.D. 138 to A.D. 180 when Rome was under the rule of Antoninus Pius and Marcus Aurelius. The age was remarkable for prosperity and tranquillity.

Antoninus, Itinerary of, a valuable geographical work supposed to be of date 14 B.C., consisting of a register of the roads, stations and distances in the Roman Empire.

Antoninus, Marcus Aurelius. See Marcus Aurelius.

Antoninus Pius, a Roman emperor who reigned with justice and moderation, from 138 to 161, during which time the Empire enjoyed unbroken peace; built the Wall of Antoninus in Britain (q.v.).

Antoninus, Wall of, an earthen rampart, about 36 m. in length, from the Firth to the Clyde, in Scotland, as a barrier against invasion from the N., erected in the year 140 A.D.

Antonius, Marcus, a famous Roman orator and consul, slain in the civil war between Marius and Sulla, having sided with the latter (143-87 B.C.).

Antonius, Marcus (Mark Antony), and warm partisan of Caesar; after the murder of the latter defeated Brutus and Cassius at Philippi, formed a triumvirate with Octavius and Lepidus, fell in love with the famous Cleopatra, was defeated by Octavius in the naval battle of Actium, and afterwards killed himself. (83-30 B.C.).

Antony, St., a famous anchorite of the Thebaid; relinquishing his fortune, he spent 20 years of his life in a lonely ruin by himself, resisting devils without number; left his retreat for a while to institute monasteries, and so became the founder of monachism, but returned to die; festival, Jan. 17. (251-351).

Antrim, a maritime county and town in the NE. of Ulster, in Northern Ireland; soil two-thirds arable, linen the chief manufacture, exports butter; inhabitants mostly Protestant. Pop. 191,000 (excl. Belfast). The town of Antrim has a pop. of 2,000.

Antung, a port of Manchukuo (Manchuria), near the mouth of the Yalu R. It is a junction of the railway from Mukden and the Korean railway. Pop. 91,000.

Antwerp, a large, fortified, trading city in Belgium on the R. Scheldt, 50 m. from the sea, with a beautiful Gothic cathedral, the spire 402 ft. high. It is the chief seaport of Belgium. The chief

manufactures are sugar and textiles. Other industries include diamond-cutting, ship-building and petroleum-refining. It has a big air service.

The city is rich in architecture, and art treasures. In its cathedral are the "Descent from the Cross" and "Elevation of the Cross" of Rubens. The museum contains masterpieces by Steen, Rembrandt, Hals, Van Eyck. In the 16th Century it was the most prosperous city of Northern Europe. It was captured by the French in 1794, and Napoleon spent £2,000,000 on extending the docks for use in his campaign against England. It was occupied by the Germans during the Great War. Pop. 278,000.

Anu, the chief of a trinity of Babylonian gods, whose cult was associated mainly with Erech, a city of Southern Babylonia, where the worship of his daughter, the heaven goddess, Innini Ishtar, was closely connected with his.

Anubis, an Egyptian deity with the body of a man and the head of a jackal, whose office, like that of Hermes, it was to see to the disposal of the souls of the dead in the nether world.

Anzac, the name given during the Great War to the Australian and New Zealand Army Corps, formed from the initials of the same.

Anzac Cove, the bay in the Dardanelles where British and Anzac troops landed on April 25, 1915, under General Sir Ian Hamilton.

Aomori, a seaport of Japan. It has a fine harbour, and is situated in the Mutsu Bay at the N. of Honshu.

Aorist, Greek tense of indefinite past, corresponding to English past, e.g., "ran," "went," and used in narrative.

Aorta, is the main blood-vessel of the body, and receives blood from the heart through the left ventricle. The whole of the body except the lungs is supplied with blood through this the largest artery of the body. It begins near the front of the chest at the left ventricle, and after arching it runs behind the heart downwards through the diaphragm and the abdomen to below the level of the navel, where it ends and divides into the two common iliac arteries.

Aosta, a town of Italy, N. of Turin, in a fertile Alpine level valley, but where goitre and cretinism prevail to a great extent; birthplace of Anselm. Pop. 20,000.

Apaches, a fierce tribe of American Indians on the S. and W. of the U.S.A.; long a source of trouble to the republic. The same name is applied to men of the Paris underworld.

Apatite, a phosphate of calcium, found in veins in igneous rocks, and the ore from which are obtained the various phosphorus compounds required in agriculture and chemistry.

Ape, a name once used for any species of monkey, but now restricted to the anthropoids (q.v.) and the short-tailed or tailless monkeys, such as the Barbary Ape.

Apeldoorn, town of the Netherlands, in Gelderland, principally occupied in paper-making. Near is Hot Loo, the royal summer residence. Pop. 60,000.

Apelles, the most celebrated painter of antiquity; bred, if not born, at Ephesus; lived at the court of Alexander the Great; his great work "Aphrodite

BARBARY APE

Anadyomene": a man conscious, like Dürer, of mastery in his art, as comes out in his advice to the criticising shoemaker to "stick to his last."

Apennines, a branch of the Alps at right angles, nearly through the whole length of Italy, forming about the middle of the peninsula a double chain, Gran Sasso d'Italia, which supports the tableland of Abruzzi. The highest point of this parallel chain is Mte. Corno, 9,580 ft.

Aphasia, the inability to use or understand language. May be partial or complete, and is caused by a disease of the brain centre. In one form the patient knows what he wants to say, but has lost the power of speech, while in the other form there is loss of memory, the meaning of words being forgotten.

Aphelion, the point in the orbit of a planet when it is farthest from the sun.

Aphides (Aphidae), a family of insects, also known as Plant-lice and Green-fly, belonging to the sub-order Homoptera. They are very destructive to plants by feeding on them in countless numbers. They secrete a sweet substance of which ants are very fond, and to obtain which some species of ants keep them in a domesticated state. In most species males and fertilised females are produced only in the late autumn. Eggs laid by the fertilised females hatch out in spring into unfertilised females, which reproduce by parthenogenesis (q.v.). Birds, spiders and ladybirds (especially) keep the numbers down.

Aphonia, the loss, either partial or complete, of the use of the voice. It is caused by some defect, disease or injury to the organs used in speech. A very common cause of Aphonia is laryngitis.

Aphorism, a concise and epigrammatic expression of a thought, giving an aspect or a summary of the truth on any particular subject as it appears to the writer.

Aphrodite, the Greek goddess of love and beauty, wife of Hephaestus and mother of Cupid; sprang from sea-foam; as queen of beauty had the golden apple awarded her by Paris, and possessed the power of conferring beauty on others by means of her magic girdle, the cestus.

Apia, seaport of Samoa. The chief exports are copra, cocoa and bananas. Robert Louis Stevenson lived at Vailima near by, where he died in 1894. It was the capital of German Samoa until 1914, and was assigned to New Zealand under mandate by Treaty of Versailles, 1919.

Apis, the sacred live bull of the Egyptians, the incarnation of Osiris; must be black all over the body, have a white triangular spot on the forehead, the figure of an eagle on the back, and under the tongue the image of a scarabæus; was at the end of 25 years drowned in a sacred fountain, had his body embalmed, and his mummy regarded as an object of worship.

Apocalyptic Writings, writings composed among the Jews in the 2nd Century B.C., and ascribed to one and another of the early prophets of Israel, forecasting the judgments ordained of God to overtake the nation, and predicting its final deliverance at the hands of the Messiah.

APHRODITE

Apocrypha, The, a literature of sixteen books composed by Jews, after the close of the Hebrew canon, which, though without the sanction of the prophetic books of the canon, are instinct, for most part, with the wisdom which rests on the fear of God and loyalty to His law. The word Apocrypha means hidden writing, and it was given to it by the Jews to distinguish it from the books which they accepted as canonical.

Apogee, the point in the orbit of the moon when it is farthest from the earth.

Apolda, a town in Thuringia, Germany, with extensive hosiery manufactures; has mineral springs. Pop. 26,000.

Apollinaris, Bishop of Laodicea, denied the proper humanity of Christ by affirming that the Logos in Him took the place of the human soul, as well as by maintaining that His body was not composed of ordinary flesh and blood; d. 390.

Apollo, one of the principal gods in the Greek pantheon, identified with the sun and all that we owe to it in the shape of inspiration, art, poetry and medicine; son of Zeus and Leto; twin brother of Artemis; born in the island of Delos (q.v.), whither Leto had fled from the jealous Hera; his favourite oracle was at Delphi.

Apollonius of Perga, a famous mathematician born at Perga in Pamphylia c. 242 B.C., who with Archimedes and Euclid is accounted one of the founders of mathematics. He wrote on Conic Sections.

Apollonius of Tyana, a Pythagorean philosopher, who, having become acquainted with some sort of Brahminism, professed to have a divine mission, and, it is said, a power to work miracles; was worshipped after his death, and has been compared with Christ; d. 97.

Apollon, a Jew of Alexandria, who became an eloquent preacher of Christ, contemporary of St. Paul (Acts xviii and I. Cor. iii).

Apollyon, the destroying angel, the Abaddon (q.v.), Greek name for the Hebrew

Apologetics, a defence of the Christian religion in opposition to the rationalist and mythical theories.

Apologue, a fable or story in which the characters, often animals, are represented in some action, illustrating some moral wisdom. It differs from a parable in that the wisdom is of a more practical nature than a spiritual.

Apoplexy, is a disease of the nervous system. An apoplectic fit or stroke affects one side of the brain, which results in the paralysis of one side of the body. The most usual cause of apoplexy is a burst blood-vessel inside the brain and the destruction of surrounding tissue by hemorrhage. Apoplexy may seize elderly people after a heavy meal, or after some excitement, or exertion, or it may be the result of alcoholism, syphilis or gout. It may even affect a child.

Apostacy, the act of renouncing Christianity. The epithet apostate is applied to the Emperor Julian, on his having abjured the Christian religion, established by Constantine, in favour of paganism.

Apostle, means messenger, and comes from the Greek meaning "to send." It is usually applied to the twelve apostles chosen by Christ from among His disciples or followers to be His messengers. The names of the twelve Apostles were not called Peter, Andrew, James the son of Zebedee and John, his brother, Philip and Bartholomew, Matthew and Thomas, James

the son of Alphaeus, Simon Zelotes, Judas, brother of James, and Judas Iscariot (see Luke vi). Later, in place of Judas Iscariot, who betrayed Christ, the rest of the Apostles chose Matthias (see Acts i). In the New Testament the word Apostle is also used for other followers of Christ, Paul and Barnabas being among them.

Apostle's Creed summarises the Christian faith. Its authorship is imputed to the Apostles, but there is no record of it in its present form before the 3rd Century. It was introduced into the English Church at the time of the Reformation.

Apostle Spoons are small silver spoons, the handles of which are terminated in the form of an apostle. Nowadays apostle spoons are often used as tea-spoons, but in the past were given as christening spoons, each of the set of twelve being in the form of one of the apostles.

Apostolic Fathers, Fathers of the Church who lived at the same time as the Apostles. They were Clement, Barnabas, Polycarp and Ignatius.

Apostolic Succession, the derivation of episcopal power in an unbroken line from the Apostles, a qualification believed by High Churchmen to be essential to the discharge of episcopal functions and the transmission of promised divine grace.

Apothecaries' Fluid Measure.

60 minims = 1 fluid drachm; 8 drachms = 1 fluid ounce; 20 ounces = 1 pint (pt. or fl.). 8 pints = 1 gallon (gal., C., or Cong.). For rough approximation, one half wine glassful = 2 table spoonful = 4 dessert spoonful = 8 teaspoonful = 8 fluid drachms = 1 fluid ounce.

Apothecaries' Weight. 20 grains or minims = 1 scruple; 3 scruples = 1 drachm; 8 drachms = 1 ounce; 12 ounces = 1 pound. From this table 1 ounce = 480 grains. In 1885 the ounce of 480 grains was abandoned and in its place the ounce (avoirdupois) was substituted; thus 437½ grains = 1 ounce; 16 ounces = 1 pound.

Apothecary, The origin of the word is Greek, but its meaning has changed considerably in the course of time. In Rome the *apothecarius* was the man who looked after the place where the healing herbs were kept. By a natural transition it was applied to people who prepared the herbs and drugs.

Apotheosis, the deification of a human being, and consisting of the recognition of extraordinary qualities in a man, and of placing him in the ranks of the gods and according him the worship due to a god; a tendency common to all polytheistic religions, and particularly noticeable in ancient Greece and Rome. As a rule a man was not deified until after his death.

Appalachians, a mountainous system stretches N.E. from the tablelands of Alabama to the St. Lawrence, and includes the Alleghenies and the Blue Mountains; their utmost height under 7,000 ft.; do not reach the snow-line; abound in coal and iron.

Appeal, Court of. The constitution and jurisdiction of the Court of Appeal are laid down in the Judicature Acts, 1873-1875 and subsequent Acts. Appeals lie to the Court from all divisions of the High Court, and it is only inferior to the House of Lords, which is the supreme Court of Appeal.

It consists of certain ex-officio judges, and five ordinary judges, who are called Lord Justices of Appeal. The ex-officio members are the Lord Chancellor, all ex Lord Chancellors, any Lord of Appeal in ordinary, the Lord Chief Justice, the Master of the Rolls and the President of the Probate Division. Any barrister of 15 years' standing or any judge of the High Court is qualified for appointment. The Lord Chancellor may request any judge of the High Court to sit in the Appeal Court.

The Court has two divisions. The Master of the Rolls presides in one, and a senior Lord Justice in the second. If possible, King's Bench cases are heard by two common law and one equity justice, and in Chancery cases the proportions are reversed. The Court must hear motions for a new trial or to set aside verdicts given by a jury.

In interlocutory matters appeal must be made within fourteen days, in final cases within six weeks, of judgment. New evidence is not as a rule allowed, nor points which were not made in the lower Court. Appeals from recorders' and magistrates' courts are heard in the first instance by the High Court, and any further appeal from that Court would go to the Court of Appeal, and thence to the House of Lords.

Appeals in Ecclesiastical cases, however, go to the judicial committee of the Privy Council, which court of committee also hears appeals from the overseas Dominions, including India, and from the Colonies. Appeals from County Courts are only allowed where an important legal principle is involved. Appeals from criminal cases are heard by the Court of Criminal Appeal, which was instituted in 1908.

Appendicitis, inflammation of the appendix, a small blind gut in the abdomen with thick walls but narrow opening. It may be caused by compressed indigestible food entering the appendix, which it is unable to expel, or by a crick in the organ, or by the entrance of some foreign body, such as a pip or seed, or by intestinal worms.

Appenzell, a canton in the NE. of Switzerland, enclosed by St. Gall, divided into (1) Outer Rhoden, which is manufacturing and Protestant. Pop. 49,000, cap. Trogen. (2) Inner Rhoden, which is agricultural and Catholic. Pop. 14,000. Also the name of the capital. Pop. 2,700.

Apperley, Charles James, writer on sport, under name of Nimrod; educated at Rugby; cornet of Dragoons; ruined by farming experiments; contributed to *Sporting Magazine* and *Sporting Review*; wrote *Life of John Milton*. (1779-1843).

Appian Way, a magnificent high- Claudius, 312 B.C., and finished by Appius Augustus, and extending from Rome to Brundisium.

Appin, Linnhe, Argyllshire, Scotland, noted for its rugged, beautiful scenery.

Apple (*Pyrus Malus*), a tree of the order Rosaceae, in its wild state known as the crab-apple. In cultivation it is valued for its fruit, which is the most important of all hardy fruits. The apple, the fruit, is the round, fleshy fruit of the swollen calyx-tube, enclosing the seeds. Apples are rarely grown from seeds or cuttings, but are budded in summer or grafted in spring on to various types of Paradise Stock, a tree useless for fruit, but, because of its large mass of fibrous roots, an ideal stock or parent plant.

Apple of Discord, a golden apple, the words, "To the most Beautiful," thrown in among the gods of Olympus on a particular occasion, contended for by Hera, Athena and Aphrodite, and awarded by Paris of Troy, as

referee, to Aphrodite, on promise that he should have the most beautiful woman in the world for wife.

Appleby, the county town of Westmorland, England, on the Eden; is a health resort. Pop. 1,600.

Appleton, a city of Wisconsin, U.S.A., on the Fox R.; county town of Outagamie Co., seat of Lawrence College. Pop. 25,000.

Appogiatura, in music a short grace-note prefixed to another note. It has no time-value of its own, but subtracts from the time value of the note to which it is attached.

Appointment, Power of, a power, generally made exercisable by deed, or will, or both, enabling the donee of that power to appoint whom he will as owner of a particular fund or other property. Where the donee of the power is restricted in his appointment to some or all of a specified class of persons—usually the children to be provided for in a marriage settlement—the power is styled a "special," as opposed to a "general," power of appointment. Any person, excepting a lunatic or infant, may be appointed a donee of a power of appointment. Powers affect only the equitable, as opposed to the legal, interest or estate in property.

Appomattox Courthouse, a village in Virginia, U.S.A., where Gen. Lee and the Confederate army surrendered to Gen. Grant at the end of the Civil War in 1865.

Apponyi, Count Albert Georg, Hungarian statesman, began and ended as a Conservative, moderate Liberal 1899-1903. Led the Kosuth party. President of Chamber of Deputies 1901. Minister of Education 1906. Strong supporter of Central Powers in Great War. In 1919 a non-party member of National Assembly and chairman of peace-delegation. Hungarian representative at League of Nations. (1846-1933).

Apprentice, a person, usually a minor, who in order to learn a trade is lawfully bound in service to someone from whom in return he receives maintenance and instruction. In England it was compulsory up to 1814 for any one wishing to practise a skilled trade to be an apprentice for seven years. If the apprentice is a minor, the contract is signed for him by a parent or guardian. In recent times the number of apprenticeships has seriously declined, largely in consequence of trade-union restrictions, the greater subdivision of labour processes, and the difficulty experienced by parents in paying the premiums.

Approved School, a school approved by the Home Secretary and intended for the educational training of children or young persons sent there under the Children and Young Persons Act, 1933. These schools have superseded the reformatories and industrial schools. Juvenile Courts have power to send offenders to approved schools as an alternative to committing them to the care of some fit person who may be willing to undertake the care of the young offender.

Approved Society, in its most meaning to-day, is a friendly society approved by law for the purpose of the National Health Insurance Acts. It also means a society registered under the Industrial and Provident Societies Acts (1893-1923) or the Friendly Societies Acts (1896-1924), one of whose objects is the provision of allotments, and which by its constitution is restricted by Treasury regulations in respect of the rate of interest on share and loan capital and the

distribution of profits amongst its members. The term also includes a registered company which does not trade for profit or one whose constitution forbids the issue of any share or loan capital with interest or dividend exceeding the rate prescribed by the Treasury.

Apricot (*Prunus Armeniaca*), a tree of the order Rosaceae, bearing a stone fruit (drupe). Apricots are wall-trained fruit, and because they blossom early, require protection from frost. The tree is native to Armenia, Manchuria and N. China, but is widely cultivated in Europe, and is said to have been introduced into England by a gardener of Henry VIII.

Apse, is a recess which terminates a choir, or the ends of the transepts or another part of a church. It is polygonal or semi-circular in shape, and frequently found in Byzantine architecture.

Apteryx, a curious New Zealand bird with rudimentary wings, plumage like hair, and no tail; allied to the extinct moa; known popularly as the kiwi. It is the only living genus of the order Apterygiformes, and the smallest of the sub-class of flightless birds (Ostrich tribe) known as *Ratitae*. There are four or five species.

APTERYX

Apulia, a dept. of Italy, and including her provinces of Bari, Foggia and Lecce; extends from Monte Gargano in the N. to the heel of Italy. It was the scene of the last stages in the second Punic War.

Apure, a river in Venezuela, chief tributary of the Orinoco, into which it falls by six branches.

Apurimac, an inland dept. of Peru, and a tributary of the Ucayali, 600 m. long, which forms part of the boundary. The dept. yields tropical products. Cap. Abancay. Pop. 280,000.

Aquarium, is a tank in which aquatic plants and animals are kept and cultivated. The water in aquariums may be fresh or salt. Large aquariums are to be found in zoological gardens, and are stocked with many kinds of native and tropical fish and aquatic forms of life.

Aquarius, the Water-bearer, 11th sign sun enters Jan. 21.

Aqua Tofana, Tofana's poison, some solution of arsenic prepared by a Sicilian woman called Tofana, in 17th Century, and employed to poison many thousands of people.

Aqueducts, pipes for carrying water, such as were used to some extent by the Greeks, and more extensively by the Romans. Several Roman aqueducts are still standing, notably the Aqua Julia and the Aqua Velia.

Aquila, capital of the province of Aquila, degli Abruzzi, Italy, on the Alerno, founded by Barbarossa; lace-making is the chief industry. Pop. 24,000.

Aquila, a Judaized Greek of Sinope, in Pontus, executed a liberal translation of the Old Testament into Greek in the interest of Judaism versus Christianity in the first half of the 2nd Century A.D.

Aquila and Priscilla, a Jew of Pontus, whose wife, who had settled in Rome, but left when the Jews were expelled by Claudius (A.D. 49). They were in Corinth when Paul arrived and, being of a like trade, Paul lived with them. They accompanied Paul to Ephesus, where they took up their abode.

U.E.

Aquilegia, a genus of plants belonging to the order of Crowfoots (Ranunculaceae); *A. vulgaris*, or common columbine, has petals which terminate in a horn-like spur. The plants are indigenous to temperate climates.

Aquileia, an Italian village, 22 m. W. of Trieste, once a place of great importance, where several councils of the Church were held. Pop. 2,500.

Aquinas, Thomas, the Angelic Doctor, or Doctor of the Schools, an Italian of noble birth, studied at Naples, became a Dominican monk despite the opposition of his parents, sat at the feet of Albertus Magnus, and went with him to Paris; was known among his pupils as the "Dumb Ox," from his stubborn silence at study; prelected at his Alma Mater and elsewhere with distinguished success and while on his way to the Council at Lyons fell sick and died. His *Summa Theologica*, the greatest of his many works, is a masterly production, and to this day a standard authority in the Roman Catholic Church. His writings fill 17 folio vols., and with those of Duns Scotus, his rival, constitute the high-water mark of scholastic philosophy and the watershed of its divergence into the philosophico-speculative thought on the one hand, and the ethico-practical or realism of modern times on the other; he was canonised in 1323. (1226-1274).

Aquitaine, a division of ancient Gaul between the Garonne and the Pyrenees; was from the time of Henry II. till 1453 an appanage of the English crown.

Arabesque, an ornamentation introduced by the Moors, consisting of imaginary, often fantastic, mathematical or vegetable forms, but exclusive of the forms of men and animals.

ARABESQUE

Arabi Pasha, Ahmed, Egyptian popular leader; at first a labourer; conscripted into Egyptian army; rose to colonelcy. Rebellious against Khedive Tewfik from 1878; obtained removal of Nubar Pasha 1881; Minister of War 1882, repudiated French and British control. Defeated by British at Tel-el-Kebir 1882; banished to Ceylon; allowed to return to Egypt 1901. (c. 1841-1911).

Arabia, the most westerly peninsula of Asia and the largest in the world, being one-third the size of the whole of Europe, consisting of (a) a central plateau with pastures for cattle and fertile valleys; (b) a ring of deserts, the Nejd in the N., stony; the Great Arabian, a perfect Sahara, in the S., sandy, said sometimes to be 600 ft. deep, and (c) stretches of coastland, generally fertile on the W. and S.; has no lakes or rivers, only wadis, often dry; the climate being hot and arid, has no forests, and therefore few wild animals; a trading country with few roads or railways, yet the birthland of a race that threatened at one time to sweep the globe, and of a religion that has been a life-guidance to wide-scattered millions of human beings for over twelve centuries.

Politically it is divided into the kingdom of Saudi Arabia (the king is styled "King of the Hejaz and of Nejd and Its Dependences")—since 1933 these have formally included the previously independent state of Asir, the Principality of Kuwait, the Sultanate of Oman, the Imamate of Yemen, the British Colony of Aden, the Protectorate of Aden, including the Hadramaut, the Principality of Bahrain and the independent Sheikhdom of the Oman coast in treaty relationship with Great Britain.

The people of Arabia are nomadic, but

from early times attained a high culture, which influenced the West. The country was united by Mahomet, and the power of Arabia continued to spread after his death until the 16th Century. Then followed a period of weakness under the influence of outside peoples, principally the Turks, until the Wahabi dynasty was founded in the 18th Century.

The Turks remained the dominant power until the Great War, when nationalist feeling in Arabia allied the Arabians with the Allies. The Wahabi tribes were united under Ibn Saud, Sultan of Nejd. His ambitious designs brought him into conflict with Hussein, King of the Hejaz, who in the Arab War of 1919 was defeated. Ibn Saud extended his possessions, but Great Britain wished to maintain Hussein. Consequently in 1921 his two sons, Amir Abdulla and the Amir Faisal, were recognised as the rulers of Transjordan and Iraq respectively.

Hussein, however, by becoming Caliph in 1924, again excited the jealousy of Ibn Saud. The Hejaz was invaded, Hussein abdicated, and Mecca and Medina were captured by the Wahabis. Ibn Saud was thus practically the ruler of the whole of the Arabian peninsula, a position which he demonstrated in 1934 by defeating the Imam Yahia of Yemen. He, however, respected the independence of Iraq, and has maintained amicable relations with Great Britain, which for many years was the Mandatory for Iraq.

The present population of Arabia is said to be in the region of ten millions. Important journeys of discovery have been made in recent years across Arabia by Bertram Thomas (1930-1931) and H. St. John Philby (1933).

Arabian Nights, or the Thousand and One Nights, a collection of tales of various origin and date, traceable in their present form to the middle of the 15th Century and first translated into French by Galland in 1704. The thread on which they are strung is this: A Persian monarch having made a vow that he would marry a fresh bride every night and sacrifice her in the morning, the vizier's daughter obtained permission to be the first bride, and began a story which broke off at an interesting part evening after evening for a thousand and one nights, at the end of which term the king, it is said, released her and spared her life. The authoritative English translation is that by Sir R. B. Burton.

Arabis, or Rock-cress, a genus of plants of the order Cruciferae; bloom from February to May; have pure white single and double flowers borne in spikes above tufty grey-green foliage. There are five British species.

Arachne, in Grecian mythology, a Lydian maiden, who excelled in weaving. She had such skill that she ventured to challenge Athena, but so offended and enraged her by the perfection of her work that Athena destroyed it. Arachne hanged herself and was changed into a spider by Athena.

Arachnida, a class of articulated animals including spiders, mites, ticks and scorpions; mostly carnivorous. They have eight legs, and may be distinguished from other insects by having a cephalothorax (i.e., a fused head and thorax) and by an absence of antennae, in place of which are either pincers or daggers and sting.

Arad, a fortified town in Rumania, seat of a bishop, on the right bank of the Maros; manufactures tobacco, trades in cattle and corn. Pop. 63,000.

GARDEN SPIDER
(FEMALE)

Arafura Sea, a part of the Pacific Ocean lying between Dutch New Guinea and Northern Australia.

Aragon, a territory in the NE. of Spain, traversed by the Ebro, and divided southward into the provinces of Huesca, Saragossa and Teruel; mountainous in the N., with beautiful fertile valleys, rather barren in the S.

Araguaya R., an affluent of the Tocantins, in Brazil, which it joins after a course of 1,000 m.

Arakan, a strip of land in British Burmah, on the E. of the Bay of Bengal, 400 m. long and from 15 to 90 m. broad, a low, marshy country; produces and exports large quantities of rice, as well as sugar and hemp. The natives belong to the Burman stock, and are of the Buddhist faith, though there is a sprinkling of Mohammedans among them.

Aral Sea, a lake in Asiatic Russia, 265 m. long and 145 broad, larger than the Black Sea, 150 m. E. of the Caspian; has no outlet, is shallow, and is said to be drying up.

Aram, Eugene, an English school-usher convicted of murder years after the act and executed 1759, to whose fate a novel of Bulwer Lytton and a poem by Hood have lent a romantic and somewhat fictitious interest.

Aramæa, the territories lying to NE. of Palestine, the inhabitants of which spoke a Semitic dialect called Aramaic, and, improperly, Chaldee.

Aramæans, a generic name given to dwell in the NE. of Palestine, also to those that dwell at the mouths of the Euphrates and the Tigris.

Aran Is., three islands with antique relics. They stretch across the mouth of Galway Bay, W. coast of Ireland (Eire), to which they form a break-water.

Aranjuez, a town 28 m. SE. of Madrid, Spain, long the spring resort of the Spanish Court. Pop. 12,000.

Arapahoes, a tribe of N. American U.S.A., with long, black hair and large noses.

Ararat, a mountain in Armenia on which Noah's ark is said to have rested; 17,000 ft. high, it is a volcanic peak also known as Mt. Massis. Ararat is an old name of Armenia. Also the name of a town of Victoria, Australia, a centre of trade in wheat and wool. It has vineyards and gold is mined. Pop. 5,000.

Aras, a river of Asia Minor, 600 m. long, rising near Erzerum in Turkey and joining the R. Kur, which debouches into the Caspian Sea. For part of its length it forms the boundary between Russia (Armenia and Azerbaijan) and Persia (Iran). Also known as the Araxes.

Araucania, the country of the Araucos, in Chile, S. of Concepcion and N. of Valdivia, the Araucos being an Indian race long resistant, but now subject to Chilean authority, and interesting as the only one that has proved itself able to govern itself and hold its own in the presence of the white man.

Araucaria, a genus of tall trees of the Pinaceae (Pine) family of conifers, natives of and confined to the southern hemisphere. There are 15 species altogether, which include *A. imbricata*, the Chile Pine or Monkey-puzzle tree.

Aravalli Hills, in Rajputana and India. Mt. Abu (5,850 ft.) is the highest point.

Arbela (modern Arbil), a town near Mosul, in Mesopotamia (Iraq), where Alexander the Great finally defeated Darius 331 B.C. One of the chief towns of ancient Assyria.

Arbitration, a method of settling disputes by an agreement between the contending parties to accept the judgment of a third party. Arbitration in Great Britain is defined by the Arbitration Act of 1930. The choice of an arbitrator, or referee as he is sometimes called, is unrestricted, and his award is upheld by law. He should be qualified by legal training and special knowledge of the matter involved in the dispute.

Examples of civil law cases where arbitration is often employed are breaches of agreement or contract, trespass disputes, insurance liability, slander actions and property questions. Disputes between nations have been settled by international arbitrations and a permanent Court was established at the Hague in 1900, and such questions as fishing rights, territorial boundaries, money as caused by a wrongful action by another state and the rights of nationals in foreign countries, have been successfully dealt with.

Arbitration is often applied to industrial disputes. It is voluntary in Great Britain, but compulsory in some of the Dominions and in Italy. To ensure no stoppage of work at munitions centres during the Great War, arbitration was made compulsory for a time by the Munitions Acts of 1915-1917, but compulsion was abolished in 1919 by the Industrial Courts Act.

Arbitration Boards, which consider industrial disputes, are usually composed of the employers and the employed, with an independent chairman sometimes appointed by the Government. They are sometimes referred to as Conciliation Boards. Industries which are not well organised have the assistance of Trade Boards (q.v.) in seeking arbitration. The Minister of Labour has power to order an inquiry into the circumstances causing an industrial dispute before arbitration.

Arbor Vitæ, or *Thuja*, a genus of evergreen trees belonging to the Cypress tribe of the order Coniferales, often used for hedges; propagated by seeds and cuttings. There are two chief species: *T. occidentalis* the American arbor vitæ, and *T. orientalis*, the Chinese arbor vitæ.

Arbroath, or Aberbrothock, a thriving town of Scotland, on the Fortharshire coast, 7 m. N. of Dundee, with the picturesque ruins of an extensive old abbey, of which Cardinal Beaton was the last abbot. It is the "Fairport" of Scott's *Antiquary*. Pop. 3,000.

Arbuthnot, John, a physician and eminent literary man of the age of Queen Anne and her two successors, born in Kincardineshire, friend of Swift and Pope, joint-author with Swift, it is thought, of *The Memoirs of Martinus Scribnerus* and the *History of John Bull*. (1687-1735).

Arbutus, or *Strawberry Tree*, a genus of evergreen shrubs of the order Ericaceae, bearing white flowers in September, followed by red, strawberry-like berries; hardy in sheltered positions and will grow to between 25 and 30 ft. high. There are 20 species native to the Mediterranean districts, Central and Northern Africa. *A. unedo* is native to S. Ireland (Glenties district).

ARC, a curved line, or any part of a curve forming the part of a circle; also part of circle made

ARBUTUS

by the sun or other heavenly body in its journey; and the electric discharge between two carbon terminals of different potentials.

Arcachon, a popular watering-place, with a fine beach and a mild climate, favourable for invalids suffering from pulmonary complaints, 34 m. S.W. of Bordeaux. Pop. 10,000.

Arcade, a series of arches on the same pillars. When these arches stand out in relief against a wall, with the wall as background, they are called blind arches.

Arcadia, a mountain-girt, pastoral table-land in the heart of the Morea, Greece, 50 m. long by 40 broad, conceived by the poets as a land of shepherds and shepherdesses and rustic simplicity and bliss; it was the seat of the worship of Artemis and Pan.

Arcesilaus, a Greek philosopher, a member of the Platonic School and founder of the New or Middle Academy, who held, in opposition to the Stoics, that perception was not knowledge, denied that we had any accurate criterion of truth, and denounced all dogmatism in opinion. (316-241 B.C.).

Arch, a structure of stone or brick, the component wedge-shaped parts of which follow a curved line; the blocks or masonry are supported by their mutual pressure, and are able to support additional weight. The sides on which an arch rests are called haunches or flanks, and the masonry of the arch itself voussoirs, the centre and highest stone in the arch being the keystone. Triumphant arches were erected by the Romans to celebrate the triumphal return of their generals.

Arch, Joseph, English Labour leader; born at Barford, Warwickshire; worked on farms from age of 9; Primitive Methodist lay-preacher; foremost in founding Warwickshire Agricultural Labourers' Union 1872, and same year became organising secretary of new National Agricultural Labourers' Union. Liberal M.P. for NW. Norfolk, 1885-1886 and 1892-1900. (1826-1919).

Archæan Rocks, those igneous rocks underlying the Cambrian in which no certain traces of life have been found. These rocks form much of the highlands of Scotland.

Archæology, the study or the science of antiquity, of the monuments of antiquity, as distinct from paleontology, which has to do with extinct organisms or fossil remains.

Archæopteryx, the earliest species of bird, remains

of which have been found in the Upper Jurassic beds of Bavaria. It preserved many reptilian characteristics, including true teeth in both jaws, three clawed fingers on the wings and an elongated lizard-like tail. They belong to the order Saurimorphia ("reptile-tails").

ARCHÆOPTERYX

Archangel, the oldest seaport of Russia, on the Dvina, near its mouth, on the White Sea; is accessible to navigation from May to October, is connected with the interior by river and canal, and has a large trade in flax, timber, tallow and tar. Its development was materially aided in the Great War by the fact that, Baltic and Black Sea ports being closed,

It was the sole Russian port left that was served by railway communication. In 1919 the British N. Russian Relief Force, under Gen. Lord Rawlinson, evacuated from Archangel and Murmansk the British forces which had been co-operating with the White Russians to resist the Bolshevik forces. Pop. 195,000. Also a province of the U.S.S.R. of which Archangel is the administrative centre.

Archangels, in Christian tradition, one of the orders of angels, being placed by the Pseudo-Dionysius (5th century) and by Dante (in the *Divina Commedia*) in the third circle with Principalities and angels, and representing the division of the angelic office into parts and the assignment of the various parts to individual angels. Michael alone is described in the Bible as an archangel, his office being the leadership of the hosts of angels who fight Satan (Rev. xii. 7). In the Christian tradition Gabriel, the ministering angel, Raphael, and Uriel, "the fire of God," are usually also described as archangels. Other traditions add Chamuel, Jophiel and Zadkiel. They are all mentioned in the Apocrypha.

Archbishop, the head of an ecclesiastical province. The title came into use in the 4th century. In the Roman Catholic Church the powers of an archbishop are not so extensive as formerly. In the Church of England the Archbishop of Canterbury is the Primate of all England, the Archbishop of York the Primate of England. The former has the right to crown the King and Queen of England. The archbishop has supreme power under the king in ecclesiastical judicature.

Archdeacon, the bishop's vicar or representative of the bishop, attached to the cathedral, and having jurisdiction over the clergy and authority to manage the affairs of the diocese. He presides over a court where ecclesiastical causes are heard. In the 13th century the powers of an archdeacon were considerable, but have since been curtailed. In the Roman Catholic Church especially, by the Council of Trent (1564).

Archelaus, King of Macedonia, and with whom Euripides found refuge in his exile, d. 399 B.C.; also a general of Mithridates, conquered by Sulla twice; also the Ethnarch of Judaea, son of Herod, deposed by Augustus, died at Vienna.

Archer, Frederick James, English jockey. Rode his first winner when 13, and before the end of his career rode 2,743 winners out of 8,084 mounts, being the leading jockey from 1873 to 1885, including five Derby and six St. Leger winners. Taken ill with typhoid fever in 1886, he shot himself. (1857-1886).

Archer, William, dramatic critic and Perth; M.A. Edinburgh 1876. On London *Figaro* 1879-1881 and *World* 1884-1905. Introduced Ibsen to English public. Wrote: studies of Macready and Irving, an account of Francisco Ferrer, many works on the theatre, and five plays—three of them published posthumously. (1856-1924).

Archer-Fish (*Toxotes*), the name given to certain fish found on the coasts and rivers from India to the Pacific, from their method of securing insects, which is to eject a drop of water from the mouth, thus causing the insect to fall. Accuracy of aim is said to extend to 3 ft.

Archery, the art of using the bow and arrow. Archery for purposes of warfare and of hunting was practised by all the peoples of Asia in early times, while in Europe the Greeks and Romans became skilled bowmen. It survives at the present time as a form of sport. Archery societies,

such as the Royal Toxophilite Society (1781) and the Woodmen of Arden (1785), were founded in the 18th century. The sport is governed to-day by the Grand National Archery Society, and tournaments are held in various parts of the country. The bow is about 6 ft. in length, and generally made of yew. The arrows, of red deal, are 2 ft. long, and feathered with turkey or peacock feathers.

Arches, Court of, an ecclesiastical court of appeal connected with the archbishopric of Canterbury, the judge of which is called the dean.

Archidamus, the name of five kings of ancient Sparta. A. II. was king 469-427 B.C. After an earthquake had devastated Sparta he was forced into a four years' war before he again reduced the Helots. A. III., his grandson, was the victor of the so-called "tearless battle" in 367, in which he defeated the Arcadians and Argives without the loss of a single man to himself. Reigned 361-333 B.C.

Archil, purple dye obtained from lichens.

Archilochus, a celebrated lyric poet of Greece; of a satiric and often bitter vein, the inventor of iambic verse. (714-676 B.C.).

Archimandrite, monastery or monasteries in the Greek Church.

Archimedes of Syracuse, the greatest mathematician of antiquity, a man of superlative inventive power, well skilled in all the mechanical arts and sciences of the day. When Syracuse was taken by the Romans, he was unconscious of the fact, and slain, while busy on some problem, by a Roman soldier, notwithstanding the order of the Roman general that his life should be spared. He is credited with the boast "Give me a fulcrum, and I will move the world." He discovered how to determine the specific gravity of bodies while he was taking a bath. Discovered the relationship between the volume and surface of a sphere and cylinder. Invented instruments of war, including a burning mirror which is said to have prolonged the resistance of Syracuse for three years. Inventor also of the Archimedes' screw, consisting of a revolving spiral in a cylindrical case for raising water. See illustration on right, which shows an Archimedes' screw with part of the exterior cut away to demonstrate the working principle. (287-212 B.C.).

Archipelago, originally the Aegean Sea, now the name of any similar sea interspersed with islands, or the group of islands included in it.

Architects, Royal Institute of British, the leading British architectural body; founded in 1834 and incorporated in 1837; reincorporated fifty years later; in 1925 the Incorporated Society of Architects was merged in it. It holds examinations and confers the diplomas of Associate (A.R.I.B.A.) and fellow (F.R.I.B.A.), besides annually awarding a gold medal.

Architecture, means generally the construction, art of building and is divided into three groups: *Ecclesiastical*, i.e., churches, etc., *Civil*, houses and public buildings, and *Naval and Military*, i.e., ships and fortifications, etc. The history of architecture begins with primitive human dwellings and prehistoric monuments such as

the circle of stone at Avebury, Wiltshire, and is traced through the temples and pyramids of Ancient Egypt; the temples of Assyria and Babylonia; the palaces of Persia, where stone began to replace brick; the beautiful temples of Greece, with the Temple of Athena at Corinth and the famous Parthenon, on the Acropolis, in which architecture as an art reached its highest level for many centuries.

In Roman architecture concrete and the arch were used for the first time, and during this period civil architecture extended to the forum, the public bath, the triumphal arch, courts of justice and theatres. Byzantine architecture is notable for the celebrated church of St. Sophia at Istanbul (Constantinople) and its great dome of 107 ft. diameter. Romanesque or Western European architecture, which includes Anglo-Saxon churches, from Augustine until Edward the Confessor, characterised by a semi-circular Norman arch, of which Lincoln Cathedral is a fine example, carried the tradition on until the advent of the pointed arch of the 13th Century.

Gothic architecture represented a change from horizontal to a perpendicular style, and includes such variations as Early English, Decorated and Perpendicular, of which Salisbury Cathedral, York Minster and Henry VIII. Chapel, Westminster, are examples respectively. Renaissance architecture, dating from the destruction of the monasteries by Henry VIII., brought an increased interest in secular architecture, resulting in the Elizabethan country houses and Jesus College, Cambridge, and Wadham College, Oxford.

Gothic features disappeared in favour of the Jacobean style, of which Inigo Jones and Sir Christopher Wren were the foremost leaders, of whose art the Banqueting Hall, Whitehall, and St. Paul's Cathedral are respective examples. Classical architecture, which is noticeable during the next two hundred years, was developed under the influence of such craftsmen as Sir William Chambers (Somerset House), Sir John Soane (the old Bank of England) and the famous brothers Adam (Adelphi).

The French Revolution marks a period in the natural development of architecture, and various styles were adopted for some time, though there was a partial revival of Gothic architecture in English churches, while dwelling-houses continued to be erected in the Georgian style, and public buildings remained classic in style.

Modern architecture shows a violent break away from traditions of the past, except in so far as there is a noticeable return to the early horizontal character. There is a tendency to preserve the character of the material used, while the designs are geometrical in outline with clean lines, hard edges and "sanitary" smoothness. Steel, stone and glass are widely used, especially in industrial buildings, and on these lines an architectural revolution is taking place, especially in Germany, America and Holland. The modern dwelling-house is cubist in design, with a flat roof, suntraps and extreme simplicity of outline, and the efficiency of the house receives as much attention as the exterior design.

Architrave, the lowest part of an entablature, resting immediately on the columns.

Archives, originally a place where public and private records were kept, now refers to the records themselves. In England up to the 14th Century public archives were stored as part of the king's treasury. It was not until 1838 that the Public Record Office was established, there having till then been no central depository for public official records in this country.

Archon, a chief magistrate of Athens, of whom there were nine at a time, each over a separate department; the tenure of office was first for life, then for ten years, and finally for one.

Archytas, of Tarentum, an ancient Greek famous as a statesman, a soldier, a geometrician, a philosopher, and a man; a Pythagorean in philosophy, and influential in that capacity over the minds of Plato, his contemporary, and Aristotle; was drowned in the Adriatic Sea, 4th Century B.C.

Arcis-sur-Aube, a town of Troyes, in France, birthplace of Danton; scene of a defeat of Napoleon, Mar. 1814. Pop. 3,000.

Arc Lamps have carbon electrodes kept a short distance apart, the current being carried across the space by the carbon vapour, the high temperature produced—3,000° C.—raising the carbon to white heat. A similar arc is used for the electric furnace and electric welding.

Arcot, the name of two districts, N. and S., in the Presidency of Madras, India; also the name of chief town in the district, 65 m. SW. of Madras; captured by Clive in 1751; once the capital of the Carnatic. Pop. 4,330,000.

Arctic Exploration has its origin in early times, though the first properly organised voyages in search of the NW. and NE. Passages were made in the 16th Century. Among these early explorers were Henry Hudson, Sir Hugh Willoughby, Baffin, Frobisher, Davis and Chancellor. In the early part of the 19th Century Ross, Franklin, M'Clintock and Parry took part in expeditions, Franklin losing his life in that of 1845, which led to search-parties and fresh discoveries. Nansen and Johansen in 1895 got 200 m. nearer the Pole than had previously been reached; Peary made further progress in 1902, and in 1906 was only 201 m. from the Pole. In 1909 Peary planted the American flag at the Pole, not long after Dr. Cook had announced he had reached there, a claim which was disproved.

In 1925 Amundsen tried unsuccessfully to reach the Pole by aeroplane, but in 1928 the airship *Norge*, under General Nobile, succeeded in flying over it, though subsequently forced down. An attempted rescue by Amundsen by aeroplane led to his death when he crashed. Large areas of Greenland have been explored by the Cambridge University Expeditions of 1923, 1926 and 1929. Capt. Sir Hubert Wilkins, who had already explored Alaska, flew from Alaska to Spitzbergen. Watkins of Cambridge attempted to organise an air route from London to Canada via Iceland and Greenland. He was awarded the gold medal of the Royal Geographical Society in 1932, but lost his life while hunting from a kayak.

In 1937 Russian aeroplanes twice flew over the N. Pole in an attempt (successful on the second occasion) on the then non-stop record. On May 21, 1937, a Russian scientific expedition landed at the Pole in aeroplanes to spend a year on the drift ice studying meteorological and other conditions, communicating with the outside world by wireless.

Arctic Ocean, a circular ocean round the N. Pole, its diameter 40°, with low, flat shores, covered with ice-fields, including numerous islands; the Gulf Stream penetrates it, and a current flows out of it into the Atlantic. ©

Arcturus, star of first magnitude in *Boötes*, constellation *Boötes* in a direct line with the tail of the Great Bear.

Ardashir. See *Artaxerxes*.

Ardèche, a mountainous dept. of France on the right bank of the Rhône. Produces silk, wine, olives, etc. Pop. 283,000. Cap. Privas. Also a tributary of the Rhône of the same name.

Arden, a large forest at one time in England, E. of the Severn. Now only a well-wooded area in Warwickshire. Familiar to Shakespeare, and inspiration of forest scenes in *As You Like It*.

Ardennes, a forest, a tract of rugged woodland on the confines of France and Belgium, the scene of desperate battles in the Great War in 1914. Also the name of a dept. of France, on the borders of Belgium. Pop. 300,000.

Ardnamurchan, a district of Argyllshire, Scotland. It has deer forests, and the coast is rocky, with good salmon-fishing. A light-house stands on Ardnarmurchan Point, the most westerly point on the mainland of Scotland.

Ardoch, a place in Perthshire, Scotland, 7 m. from Crieff, with the remains of a Roman camp, the most complete in Britain. Pop. 1,000.

Ardrihaig, a port of Scotland at the entrance to the Crinan Canal in Argyllshire. Pop. 1,200.

Ardrossan, a burgh and seaport of Argyllshire, Scotland. It has a fishing industry, collieries and ironworks. The 12th Earl of Eglinton commenced building the harbour in 1806, and the development of Ardrossan has resulted. Pop. 6,900.

Ardsey, urban district of Yorkshire, England, in the W. Riding, 3½ m. NE. of Wakefield, formed of the villages of E. and W. Ardsley. There are coalmines and ironworks, and wool is woven. Pop. 9,000.

Areca, a genus of plants of the Palm order; the more notable species are the betelnut palm (*q.v.*) (*A. catechu*), a handsome tree cultivated in the hotter countries of Asia; and the cabbage-palm (*A. oleracea*), a very tall species which grows in the W. Indies.

Arena, a word derived from the Latin *harena*, meaning sand, and used to denote the central part of the amphitheatre where gladiatorial and other combats took place.

Arenga, a genus of plants of the Palm order found in Malaya. *A. saccharifera* is cultivated for the sugar obtained after evaporation of the sap and for a kind of sago made from the pith.

Areopagitica, a prose work of Milton, the hill of Ares in Athens, the liberty of uncensored printing, published 1644.

Areopagus, the hill of Ares in Athens, which gave name to the celebrated council held there, a tribunal of 31 members, charged with judgment in criminal offences, whose sentences were uniformly the awards of strictest justice.

Arequipa, a city in Peru, founded by Pizarro in 1539, in a fruitful valley of the Andes, 8,000 ft. above the sea, 30 m. inland; is much subject to earthquakes, and was almost destroyed by one in 1868. It has a university. Pop. 46,000. Also a coastal dept. of S. Peru, mountainous, rich in minerals, and with fertile valleys.

Ares, the Greek god of war in its sanguinary aspects; was the son of Zeus and Hera; identified by the Romans with Mars; was fond of war for its own sake; said to have had an intrigue with Aphrodite and been exposed to the ridicule of the gods.

Arethusa, a celebrated fountain in the island of Ortygia, near Syracuse, transformed from a Nereid pursued thither from Ellis, in Greece, by the river-god Alpheus, so that the waters of the river henceforth mingled with those of the fountain.

Aretino, Pietro, called the "Scourge of Princes," a licentious satirical writer, born at Arezzo, in Tuscany; settled in Venice, where his witty verses and plays enjoyed wide popularity. (1492-1556).

Arezzo, capital of a province in Tuscany, an ancient Etruscan town subject to Rome and in the Middle Ages subject to Florence; the birthplace of Meccenas, Michael Angelo, Petrarch, Guido and Vasari. Pop. (town) 57,000; (prov.) 306,000.

Argali, a number of species of great wild sheep found on the uplands of Siberia, as large as a moderately sized ox, with enormous, grooved, curving horns, strong limbed, sure-footed and swift. The more important are the Siberian Argali (*Ovis ammon*), Marco Polo's Sheep (*O. a. polii*) and the Tibetan argali (*O. a. hodgsoni*).

Argand, *Aimé*, a Swiss physician and chemist, born at Geneva; inventor of the argand lamp, with a circular wick. (1755-1803).

Argelander, Friedrich Wilhelm, a distinguished astronomer, born at Memel, professor at Bonn; he fixed the position of many thousands of stars, and recorded observations to prove that the solar system moved through space. (1799-1875).

Argenteuil, a town of France in the dept. of Seine-et-Oise on the outskirts of Paris. Pop. 59,000.

Argenteus Codex, a book, meaning "silver" an ancient manuscript of the four gospels written in Meso-Gothic, found in an Abbey in Westphalia, and now kept in Sweden, in the library at Upsala.

Argentine Republic, formerly the United Provinces of La Plata, a federal republic of S. America, the extreme length of which is 2,390 m. and the average breadth 500 m., the total area being 1,153,119 sq. m. It consists of 14 provinces, 10 territories and one federal district. It is bounded on the N. by Bolivia; on the E. by Paraguay, Brazil, Uruguay and the Atlantic; on the S. by the Antarctic Ocean, and on the W. by the Andes.

It comprises four great natural divisions: (1) the Andean region, containing the provinces of Mendoza, San Juan, Rioja, Catamarca, Tucuman, Salta and Jujuy; (2) the Pampas, containing Santiago, Santa Fé, Córdoba, San Luis and Buenos Aires, with the territories Formosa, Pampa and Chaco; (3) the district between the rivers Paraná and Uruguay containing the provinces of Entre Ríos and Corrientes and the territory Misiones; (4) Patagonia, including the E. half of Tierra del Fuego.

The great water-course of the country is the Paraná, with a length of 2,000 m. It is formed by the union of the Upper Paraná and Paraguay. European grains and fruits, including the vine, are successfully raised, and large areas produce wheat, maize, flax, etc., while countless herds of cattle, horses and sheep find pasture on the great grasslands. Gold, silver, nickel, copper, tin, lead and iron are found in the NW. mountainous districts.

The external commerce is important, the chief exports being beef and mutton, wheat, maize and linseed, wool, skins and hides, tallow. Imports are chiefly manufactured goods. The trade is largely with Britain and France. The chief denomination of money is the dollar or peso, value in gold 4 shillings. Buenos Aires is the capital. Other towns are Rosario, Córdoba, La Plata, Tucuman, Mendoza and Santa Fé. Pop. 10,646,814.

Argentite, or silver sulphide, grey in colour and when it occurs in large quantities, as in Mexico and Nevada, a rich ore of silver.

Argive, a native of Argos; hence, a Greek in general. Homer was the first to use the word.

Argol, a pink deposit left at the bottom of the vat or cask, forming a hard crust when wine is fermented. Tartaric acid may be prepared from it, or it may be used to form bitartrate of potassium, or cream of tartar.

Argolis, the NE. peninsula of the Morea provinces of Greece, is 12 m. long by 5 m. broad. Pop. (with Corinth) 166,000.

Argon, a chemical element belonging to the family of inert or noble gases; symbol A, atomic number 19, atomic weight 39.944. It is a colourless gas completely devoid of chemical properties, and occurs in the atmosphere to the extent of nearly 1 per cent. by volume. It is used in filling gas-filled electric lamps, being obtained for this purpose by means of the fractional distillation of liquid air. It was discovered in 1894 by Lord Rayleigh and Sir William Ramsay, though its existence had previously been suspected by Henry Cavendish in 1785.

Argonauts, the Greek heroes, sailors in the *Argo*, who, under the command of Jason, sailed for Colchis in quest of the golden fleece, which was guarded by a dragon that never slept; a perilous venture, but it proved successful with the assistance of Medea, the daughter of the king, whom, with the fleece, Jason in the end brought away with him to be his wife.

Argonne, in the NE. of France, a district covering parts of the depts. of Ardennes, Marne and Meuse. Here it was that the Duke of Brunswick was defeated by Dumouriez in 1792. In the Great War the Germans held strongly fortified positions in the hills and forests of Argonne during 1915 to 1918. They were only driven out by a large-scale attack of combined American and French armies from Sept. to Nov. 1918. The advance was only ended at Sedan by the Armistice.

Argos, long a prominent part in the history of Greece, but paled before the power of Sparta. Has been the scene of many conflicts since.

Argosy (*Argosie*), a large vessel designed for carrying merchandise. Some derive the word from Jason's ship the *Argo*; others from Ragusa, which appears in 16th-Century English as *Argosia*.

Argus, surnamed the "All-seeing," a fabulous creature with a hundred eyes, of which one half were always awake, appointed by Hera to watch over Io, but Hermes killed him after lulling him to sleep by the sound of his flute, whereupon Hera transferred his eyes to the tail of the peacock, her favourite bird. Also the name of the dog of Ulysses, immortalised by Homer.

Argus Pheasant, a beautiful bird (generic name *Argusianus*), so called from the eye-like markings on its plumage, found in the Indo-Malay country; described as having "the most perfect type of pheasant-wing, where the first flight feather is the shortest and the tenth the longest." Two types viz., the true Argus of

ARGUS PHEASANT

Malay (*A. argus*) and Borneo (*A. maye*) and Rheinhardt's crested Argus (*Rheinhardtia ocellatus*) of Malay and Tonkin.

Argyll, a large county in the W. of Scotland, consisting of deeply indented mainland and islands, and abounding in mountains, moorlands and lochs. Pop. 71,000.

Argyll, a noble family or clan of the name of Campbell, the members of which have held successively the titles of Earl, Marquis and Duke, their first patent of nobility dating from 1445, and their earldom from 1457.

Argyll, Archibald Campbell, 1st Marquis of, sided with the Covenanters, fought against Montrose; disgusted with the execution of Charles I., crowned Charles II. at Scone; after the Restoration committed to the Tower, was tried and condemned and met death nobly. (1598-1661).

Argyll, Archibald Campbell, 9th Earl of, son of the preceding, fought for Charles II., was taken prisoner, released at the Restoration and restored to his estates, proved rebellious at last, and was condemned to death; escaped to Holland, made a descent on Scotland, was captured and executed in 1685. (1629-1685).

Aria, in music, a melody as distinct from harmony. In particular it is applied to a composition (an air) for a single voice or a single musical instrument written with an accompaniment.

Ariadne, daughter of Minos, King of Crete, gave to Theseus a clue by which to escape out of the labyrinth after he had slain the Minotaur, for which Theseus promised to marry her; took her with him to Naxos and left her there, where, according to one tradition, Artemis killed her, and according to another, Dionysos found her and married her.

Arianism, the heresy of Arius (q.v.).

Arica, a seaport connected with Tacna, S. Peru, the chief outlet for the produce of Bolivia; suffers frequently from earthquakes, and was almost destroyed in 1868. In 1929, as the solution of the protracted Tacna-Arica dispute with Chile, Arica was assigned to Chile and Tacna province to Peru. The population has declined through earthquakes, and is now only 8,000.

Ariège, dept. of France, at the foot of the northern slopes of the Pyrenees; has extensive forests and is rich in minerals. Pop. 161,000.

Ariel, a name given to Jerusalem by the Prophet Isaiah in Isaiah xxix. 1. It is taken to signify "Lion of God." The word also occurs in Ezekiel xlii. 15, 16, where it signifies "hearth of God," and is used as a synonym for an altar.

Aries, the Ram, the first sign of the zodiac, which the sun enters on March 21. The constellation of that name is now in the sign Pisces, owing to the precession of the equinoxes.

Arion, a lyrist of Lesbos, lived chiefly at the court of Periander, Corinth; returning in a ship from a musical contest in Sicily laden with prizes, the sailors plotted to kill him, when he begged permission to play his lute; on this being conceded, dolphins crowded round the ship, whereupon he leapt over the bulwarks, was received on the back of one of them and carried to Corinth.

Ariosto, Ludovico, an illustrious Italian poet, born at Reggio, in Lombardy; spent his life chiefly in Ferrara, mostly in poverty; his great work, *Orlando Furioso*, was published in 40 cantos, in 1516. (1474-1533).

Ariovistus, a German chief, invaded Gaul and threatened to overrun it, but was forced back over the Rhine by Cæsar.

Aristæus, in Greek mythology, son of Apollo, the guardian divinity of the vine and olive, of hunters and herdsmen; first taught the management of bees.

Aristarchus of Samos, a Greek astronomer, who first conceived the idea of the rotundity of the earth and its revolution both on its own axis and round the sun, in promulgating which idea he was accused of impiously disturbing the serenity of the gods. (lived c. 270 B.C.).

Aristarchus of Samothrace, a celebrated Greek grammarian and critic, who devoted his life to the elucidation and correct transmission of the text of the Greek poets, and especially Homer. (220-143 B.C.).

Aristides, an Athenian general and statesman, surnamed *The Just*; covered himself with glory at the Battle of Marathon; was made archon next year, in the discharge of the duties of which office he received his surname; was banished by ostracism at the instance of his rival, Themistocles; three years after the invasion of Xerxes, was reconciled to Themistocles, fought bravely at Salamis, and distinguished himself at Plataea. (530-468 B.C.).

Aristippus of Cyrene, founder of the Cyrenaic school of philosophy, a disciple of Socrates; in his teaching laid too much emphasis on one principle of Socrates, apart from the rest, in insisting too exclusively upon pleasure as the supreme good and ultimate aim of life.

Aristocracy, the rule of the best, introduced as a political theory by Plato. In historical development, however, it has come to mean the rule of an hereditary upper class. The supreme example in history is the Roman Republic. A ruling aristocracy should not properly be dependent on a monarchy, although in history this has often been so.

Aristophanes, the great comic dramatist of Athens, lived in the 5th Century B.C.; directed the shafts of his wit against all, of whatever rank, who sought in any way to amend the religious, philosophical, social, political or literary creed and practice of the country, and held up to ridicule such men as Socrates and Euripides, as well as Cleon the tanner; wrote 54 plays, of which 11 have come down to us; of these the *Clouds* aims at Socrates, the *Acharnians* and the *Frogs* at Euripides, and the *Knights* at Cleon; d. 384 B.C.

Aristotle, a native of Stagira, in Thrace, and hence named the *Stagirite*; deprived of his parents while yet a youth; came in his 18th year to Athens, remained in Plato's society there for 20 years; after the death of Plato, at the request of Philip, King of Macedon, who held him in high honour, became the preceptor of Alexander the Great, then only 13 years old; on Alexander's expedition into Asia, returned to Athens and began to teach in the Lyceum, where it was his habit to walk up and down as he taught, from which circumstance his school got the name of *Peripatetic*; after 13 years he left the city and went to Chalcis, in Euboea, where he died. He was the oracle of the scholastic philosophers and theologians in the Middle Ages; is the author of a great number of writings which covered a vast field of speculation, of

ARISTOTLE

which the progress of modern science goes to establish the value; is often referred to as the incarnation of the philosophic spirit. His chief writings were *The Politics* and *The Poetics*, the latter the first written treatise on the principle of criticism. (384-322 B.C.).

Arithmetic, the science of calculation by numbers. The system of numeration by local value which forms the basis of present-day notation came from the Hindu or Arabic method about the 11th Century, and since the introduction of logarithms by Napier 400 years later there has been no significant advance in arithmetical rules.

As taught in European countries, arithmetic consists of the four elementary operations of addition, subtraction, multiplication and division, which are then applied to the tables of weight, length, money, etc. In other operations, numbers are divided into fractions involving the processes of least common denomination and greatest common factor. Fractions are vulgar and decimal, the latter based on tenths. Following is the method of proportion, once called the rule of three, leading to ratio.

Arius, a presbyter of Alexandria in the 4th Century, and founder of Arianism, which denied the consubstantiality of the Son with the Father in the Trinity, a doctrine which hovered for a time between acceptance and rejection throughout the Catholic Church; was condemned first by a local synod which met at Alexandria in 321, and then by a General Council at Nice in 325, which the Emperor Constantine attended in person; the author was banished to Illyricum, his writings burned, and the possession of them voted to be a crime; after three years he was recalled by Constantine, who ordered him to be restored; was about to be readmitted into the Church when he died suddenly. (280-336).

Arizona, one of the southern states of the U.S.A., N. of Mexico, nearly four times as large as Scotland, rich in mines of gold, silver and copper, fertile in the lowlands; much of the surface a barren plateau 11,000 ft. high, through which the cañon of the Colorado passes. Was under Spanish sway until it acquired its independence in 1821. Pop. 436,000— including over 43,000 American Indians.

Ark, the name given to the enclosed wooden vessel built by Noah and his family to save themselves and two of every species of bird and beast during the Deluge. (Gen. vi-viii).

Ark of the Covenant, a chest of wood overlaid with gold, 2½ cubits long and 1½ in breadth; contained the two tables of stone inscribed with the Ten Commandments, the gold pot with the manna, and Aaron's rod; the lid supported the mercy-seat, with a cherub at each end, and the shekinah radiance between. It was eventually enshrined in the Temple of King Solomon at Jerusalem.

Arkansas, one of the Southern States of U.S.A., N. of Louisiana and W. of the Mississippi, a little larger than England; rich in minerals, including coal and petroleum; lumbering an important industry; cotton, corn, rice and fruit grown. Pop. 1,854,000, one-third being negro.

Arkansas River, a tributary of the Mississippi, 2,000 m. long.

Arklow, a seaport of Co. Wicklow, Ireland (Eire), at the mouth of the R. Avoca, and has oyster-beds and other sea-fishing. Arklow was dismantled by Cromwell in 1649, and in 1798 there was conflict here between the United Irishmen and the Government. Pop. 5,000.

Arkwright, Sir Richard, born at Preston, Lancashire; bred to the trade of a barber; took interest in the machinery of cotton-spinning; with the help of a clockmaker, invented the spinning-frame; was mobbed for threatening thereby to shorten labour and curtail wages, and had to flee; fell in with Mr. Strutt of Derby, who entered into partnership with him; prospered in business, was knighted in 1786, and died worth half a million. (1732-1792).

Arlberg, a mountain mass between Vorarlberg and Tyrol, pierced by a railway tunnel, one of the three that penetrate the Alps, now electrified.

Arlen, an English novelist of note, born in Bulgaria of Armenian parentage, naturalised English in 1922. He established his reputation with *The Green Hat* in 1924. Subsequent novels include *Young Men in Love*, etc. (1895-).

Aries, a city, one of the oldest in France, on the Rhône, in the dept. of Bouches-du-Rhône, where Constantine built a palace; has ruins of an amphitheatre and other Roman works. Pop. 16,000.

Arlington, Henry Bennet, Earl of, served under Charles II. in his exile; a prominent member of the famous Cabal; being impeached when in office, lost favour and retired into private life. (1618-1685).

Arliss, George, English actor; first appearance, *Elophant* and *Castle Theatre*, London, 1887; first notable success in *Mr. and Mrs. Dacentry*, Royalty Theatre, 1900. With Mrs. Patrick Campbell to America, 1901; acted in historical plays. After 22 years' absence from England, played the Rajah in *The Green Goddess* by William Archer, St. James's, 1923. Autobiography, *Up the Years from Bloomsbury*, 1927. Has also achieved considerable success as a film actor. (1868-).

Arlon, a prosperous town in Belgium, capital of the province of Luxembourg. Pop. 11,000.

Arm, is an upper limb of the human body, joined into three main sections, the upper arm, the lower arm and the hand, which is again subdivided. The bone of the upper arm is the humerus, the fore-arm is formed of two bones, the ulna and the radius, and the wrist is an arrangement of eight bones known as the carpi, and joined to these bones are the five metacarpals, which reach to the roots of the thumb and fingers. Each finger has three bones, called phalanges, and the thumb two. The chief muscles which move the arm are the deltoid, the latissimus dorsi and the coraco-brachialis, the pectoralis major, biceps and triceps, the flexors and extensors. The arteries of the arm are the axillary, brachial, radial and ulnar arteries.

Armada, Spanish, named the Invincible, an armament fitted out in 1588 by Philip II. of Spain against England, consisting of 130 war-vessels, mounted with 2,430 cannon, and manned by 20,000 soldiers; was defeated in the Channel on July 20 by Admiral Howard, seconded by Drake, Hawkins and Froisher; completely dispersed and shattered in retreat by a storm on the coasts of Scotland and Ireland, the English losing only one ship; of the whole fleet only 53 ships found their way back to Spain.

Armadillo (*Dasypodidae*), a genus of the Edentate order of mammals. They are ground animals characterised by the thick, bony plates which cover their bodies like a shield; found chiefly in Central and S. America.

Armageddon, a name given in the *Apocalypse* to the final battlefield between the powers of good and evil, or Christ and Antichrist.

Armagh, a county in Ulster, Northern Ireland, 32 m. long by 20 m. broad; and a town in it, 33 m. SW. of Belfast, anciently the capital of Ireland; the seat of Catholic and Protestant archbishops, and has two cathedrals. Apples and flax are the principal crops of the county and the chief manufacture, linen-weaving. Pop. (county) 110,000; (town) 7,400.

Armagnac, a district, part of Gascony, in France, now in dept. of Gers, celebrated for its wine and brandy.

Armagnacs, a faction in France in time of Charles VI., headed by the Counts of Armagnac, at mortal feud with the Bourguignons, a strife which did not end until the Treaty of Arras, 1435.

Armatoles, warlike marauding tribes in the mountainous districts of Northern Greece, played a prominent part in the War of Independence in 1820.

Armature, the coil of wire in a dynamo or electric motor which breaks the magnetic field. It can be either stationary or rotating. Also the "keeper" of a horse-shoe magnet.

Armenia S.S.R., a Soviet Socialist Republic in Western Asia, W. of the Caspian Sea and N. of Kurdistan Mts., anciently independent, now a republic included in the Transcaucasian Federation under Soviet Russia, occupying a plateau interspersed with fertile valleys, which culminates in Mt. Ararat, in which the Euphrates and Tigris have their sources. The country is rich in copper and manufactures carpets. Area 11,945 sq. m. Pop. 1,110,000.

Armenians, a people of the Aryan race occupying Armenia, early converted to Christianity of the Euty-chian type; from early times have emigrated into adjoining, and even remote, countries, and are, like the Jews, mainly engaged in commercial pursuits, the wealthier of them especially in banking. Have been subject to the most brutal massacres in modern times by the Turks (1894-1896); over a million of them were massacred during the Great War, and the race was all but exterminated.

Armentières, a manufacturing and trading town in France, 12 m. N. of Lille in the dept. of Nord. During the Great War it was the scene of much fighting in Picardy. Pop. 18,000.

Armida, town of New South Wales, Australia. Gold, antimony and wolfram are worked, and sheep reared in the district. Pop. 7,000.

Armillary Sphere, a model of the in which the horizon, ecliptic, meridian and tropics were represented by metal circles; formerly used by astronomers in their calculations, but since displaced by the terrestrial globe.

Arminius, or Hermann, the deliverer of Germany from the Romans by the defeat of Varus, the Roman general, in A.D. 9, near Detmold (where a colossal statue has been erected to his memory); killed in some family quarrel in his 37th year.

Arminius, Jacobus, a learned Dutch theologian and founder of Arminianism, an assertion of the free-will of man in the matter of salvation against the necessitarianism of Calvin. (1560-1609).

Armistice, a pact to end fighting prior to a treaty being effected, the most famous being that signed at 5 a.m. on Nov. 11, 1918, under which Germany and the Allies agreed that all troops should cease fire at 11 a.m. that day.

Armorica, a district of Gaul in pre-Roman times, extending from the Loire to the Seine, now known as Brittany.

Armour, is a covering or partial covering used to protect the body in time of war, and therefore is made of some material impervious to attacking weapons. Metal has been the material most used for armour. The Greeks used bronze. The Roman shields were made of wood encased with hide overlaid with metal. Ancient German tribes used wooden shields covered with leather, while many native tribes of to-day, such as the Zulus, use a light shield covered with skin. The shield and the helmet or head-covering are the oldest forms of armour.

At the time of the crusades a more complete type of armour—this was plate armour and chain armour—was in use. The man and even the horse were almost completely covered by plate-armour. The use of gunpowder stopped the development of plate armour in Europe which in the 15th Century had reached its perfection and was often elaborately decorated by goldsmiths and silversmiths, the coat of arms, both as a distinguishing mark and for decoration, being intricately engraved on the shield.

In modern warfare armour is used on machines rather than persons, and tanks and armoured cars give some protection to their crews. The trench helmet or "tin hat" is a modern helmet used for protection against shrapnel.

Armoured Car, a metal-plated car which carries a mounted machine-gun encased in a small revolving turret. They differ from tractor-mounted guns and tanks, as they are built on lines resembling the chassis of an ordinary motor-car. They were used by the British army in France towards the end of the Great War and a great deal in the East. Armoured-car companies now form part of the Tank Corps in the British Army. Shortly after the Great War several British Cavalry regiments were converted into armoured-car units, and, under the scheme of reorganisation, announced in 1936, many other famous cavalry regiments will become either armoured-car regiments or light-tank regiments.

Arms, or armorial bearings, are heraldic compositions, the devices of which coats of arms are formed. A coat of arms should properly be hereditary, and was originally connected with armour; the former name for heraldry was armory. At the present day there is a tax in England on the use of heraldic arms.

Arms (weapons of offence), used in prehistoric times. The earliest were of stone, and consisted of spear-heads and arrow-heads. These were followed by those made of bronze, and a little later by iron weapons. The Greeks used swords, spears, lances and javelins. The Romans used a short, double-edged, pointed sword. Further N. the battle-axe was used by various tribes.

From the time of the Normans the bow-and-arrow seems to have been used in England; first a short bow, and then the long bow 6 ft. long, and later the cross-bow, a metal bow with a trigger release.

The first firearms were cannons firing stones, and were introduced as early as the 14th Century, while catapults sling stones were a much earlier invention. The forerunner of the rifle was the arquebus, a hand-gun invented in the 16th Century, so heavy that it needed to be fired from a rest. The arquebus was followed by the matchlock

THE CORNU-
COPIA ARMOUR
OF HENRY V

and the flintlock. The first percussion gun was invented in 1807, a muzzle-loaded gun, and was replaced later by the breech-loaded gun.

Modern weapons are rifles, bayonets, revolvers, grenades, machine-guns, heavy guns and howitzers, anti-aircraft guns, bombs, torpedoes, flame-throwers and poison gas.

Armstrong, Warwick, famous Australian all-round cricketer, who captained the Australian team in Australia in 1920 and in England in 1921 without losing a Test match. (1879-)

Armstrong, William George, Lord, born at Newcastle, produced the hydraulic accumulator and the hydraulic crane, established the Elswick engine works in the suburbs of his native city, and invented the Armstrong gun. (1810-1900).

Army, a military organisation, consisting of armed men. In primitive times the entire male population formed the available armed force in time of peril. An organised army existed in Egypt 2,000 years B.C., and later in Assyria, Babylonia and Persia. In Greece, and in Rome under the kings, the army was a gathering of citizens and peasants.

The conquests of Alexander the Great, however, had necessitated an efficient and permanent military organisation, and later in Rome a standing army was maintained for the protection of the Republic. The Roman emperors formed a large professional army, but after the break-up of the empire the growth of feudalism favoured small bands of armed men owing allegiance to their lord.

From towards the end of the Middle Ages to the 18th Century rulers were maintained, and war mostly fought, by mercenary armies of professional soldiers. The idea of "a nation in arms" found its first modern example in the "national" armies which fought under Lafayette to defend the new French Republic. From Napoleon developed the idea of a standing professional army to form the nucleus of the conscripted forces. While to-day compulsory military service prevails in all European countries except the United Kingdom, and in Japan, the doctrine that national defence is the concern of the entire nation has led to the formation of large standing armies.

In England, the army as a career owes much to Lord Cardwell, who in 1871 altered the conditions of service to six years with the colours and six with the reserve. He also introduced the linked-battalion system, i.e., one battalion abroad and the other at home. Lord Haldane created the territorial force in place of the Yeomanry and Volunteers. His reforms made possible the despatch of the expeditionary force to France on the outbreak of the Great War.

Since the War, and as one result of it, cavalry and artillery in the British Army have been mechanised. All transport is also mechanised. The Household Cavalry and a few Indian regiments alone retain horses. Several rifle regiments are being converted into machine-gun units, equipped also with anti-tank weapons, while the remaining rifle battalions will also carry light machine-guns.

Considerable progress has been made recently in reorganising the Army. Half the infantry battalions are to be armed with machine and anti-tank guns, and the first steps have been taken towards making promotion a reward for ability rather than seniority. The reorganisation of the Staff College, Camberley, during 1936, by doubling the output of staff officers, will also accelerate promotion for ability. The private's equipment has been still further lightened and the British standing army promises to become as mobile and hard-hitting force as any in the world.

Arnould, Antoine, the "great Arnould," a French theologian, doctor of the Sorbonne, an inveterate enemy of the Jesuits, defended Jansenism against the Bull of the Pope, became religious director of the nuns of Port Royal des Champs, associated here with a circle of kindred spirits, among others Pascal; expelled from the Sorbonne and banished the country; died at Brussels. (1612-1694).

Arndt, Ernst Moritz, a German poet and patriot, one of the first to rouse his countrymen to shake off the tyranny of Napoleon; his songs and eloquent appeals contributed powerfully to its liberation; his *Geist der Zeit* resulted in his having to flee the country after the Battle of Jena; his *Was ist des Deutschen Vaterland?* strikes a chord in the breast of every German. (1768-1860).

Arne, Thomas Augustine, a musical composer of versatile genius, born in London, produced, during over 40 years, a succession of pieces in every style from songs to sonatas and oratorios, among others the chorus—*Rule Britannia*. (1710-1778).

Arnhem, the capital of the province of Guelderland, Holland, is situated on the right bank of the Rhine, and has a large transit trade. Pop. 84,000.

Arnhem Land, a thinly-populated district in the N. of Northern Territory, Australia.

Arnica, a genus of hardy perennial plants of the order Compositae. Contains some 50 species. *A. montana*, or Mountain Tobacco, the most important member, grows on high ground in N. and temperate Europe, and yields a bitter resin and a volatile essential oil. Tincture of arnica is prepared from it.

Arnica montana

Arnim, Bettine von, sister of Clemens Brentano, wife of Ludwig von Arnim, a native of Frankfurt; at 23, conceived a passionate love for Goethe, then in his 60th year, visited him at Weimar, and corresponded with him afterwards, part of which correspondence appeared subsequently under the title of *Goethe's Correspondence with a Child*. (1785-1859).

Arnim, Friedrich Sixt von, a German arnion on the Lyra during the Great War. In one of the final German attacks he achieved some success, but at such a cost that it could not be followed up. (1851-1930).

Arnim, Count, ambassador of Germany, accused in the latter capacity of purloining State documents, and sentenced to imprisonment; d. in exile at Nice. (1824-1881).

Arno, a river of Italy, rises in the Apennines, flows westward past Florence and Pisa into the Mediterranean; subject to destructive inundations.

Arnold, an urban district and market town of Nottinghamshire, England, 4 m. NE. of Nottingham. It has an ancient church, and lace and hosiery are made. Pop. 14,500.

Arnold, Benedict, an American soldier, entered the ranks of the insurgent colonists under Washington during the War of Independence, distinguished himself in several engagements; promoted to the rank of general, negotiated with the English general Clinton to surrender an important post entrusted to him, escaped to the English ranks on the discovery of the plot, and served in them against his country; d. in England in 1801.

Arnold, Sir Edwin, poet and journalist, learned in Indian literature; author of the *Light of Asia*, *Light of the World*, and works in prose and verse. (1832-1904).

Arnold, Matthew, poet and critic, eldest son of Thomas Arnold of Rugby; professor of Poetry in Oxford from 1837 to 1867; inspector of schools for 35 years from 1851; commissioned twice over to visit France, Germany, and Holland, to inquire into educational matters there; wrote two separate reports thereon of great value; author of *Poems*, *Essays in Criticism*, *Culture and Anarchy*, *St. Paul and Protestantism*, *Literature and Dogma*. (1822-1888).

Arnold, Thomas, headmaster of Rugby at Oxford, and professor of Modern History at Oxford; by his moral character and governing faculty effected immense reforms in Rugby School; was liberal in his principles and of a philanthropic spirit; he wrote a *History of Rome* based on Niebuhr, and edited Thucydides; his *Life and Correspondence* was edited by Dean Stanley; is the headmaster of *Tom Brown's Schooldays*. (1795-1842).

Arnold of Brescia, an Italian disciple of Abelard, declaimed against the temporal power of the Pope, the corruptions of the Church, and the avarice of the clergy; headed an insurrection against the Pope in Rome, which collapsed under the Pope's interdict; at last was burned alive in 1155, and his ashes thrown into the Tiber.

Arnold of Winkelried, the Decius of Switzerland, a peasant of the canton of Unterwald, who, by the voluntary sacrifice of his life, broke the lines of the Austrians at Sempach in 1386 and decided the outcome of the battle.

Aromatic Compounds are substances derived theoretically, and often practically, from the parent substance benzene. The principal source is coal-tar, which contains benzene itself, toluene or methylbenzene, three isomeric xylenes or dimethylbenzenes, hydroxybenzene or phenol ("carbolic acid"), and many other aromatic compounds.

Various aromatic substances also occur in some kinds of natural petroleum, in gums and resins, and in many odoriferous plant and animal products. With nitric acid, aromatic compounds usually yield yellow nitro-compounds, some of which are important as explosives—e.g., trinitrophenol or "lyddite" (picric acid) and trinitrotoluene or T.N.T.

Aniline or aminobenzene is a colourless oil made by reducing nitrobenzene; it is the starting-point in the manufacture of many dyes ("aniline dyes"). Benzaldehyde is used as a flavouring essence ("oil of bitter almonds"), while salicylic acid is the source of aspirin. Phenol, and the related compounds, cresols, are used as disinfectants.

Arpad, the national hero of Hungary; a firm footing in the country; was founder of the Arpad dynasty, which became extinct in 1301; d. 907.

Arpeggio, in music, a series of notes instead of simultaneously as in a chord.

Arquebus, sometimes spelt Harquebus, is an ancient type of hand-gun, which preceded the modern rifle. It was fired from a hand-rest with a match from a touch-hole. A ball weighing about 2 oz. was discharged.

13TH CENT. FLINT-LOCK
ARQUEBUS

Arrack, a spirituous liquor, especially that distilled from the juice of the coconut tree and from fermented rice.

Arrah, a town in Bengal, India, 36 m. from Patna; famous for its defence by a handful of English and Sikhs against thousands during the Mutiny, till relieved by Major (Sir) Vincent Eyre. Pop. 50,000.

Arraignment, the legal process whereby a prisoner is called to the bar of the court by name, the indictment read over to him, and his plea of guilty or not guilty entered. If the prisoner refuses to answer, the court may complete the arraignment by ordering a plea of "not guilty" to be entered.

Arran, largest island in the Firth of Clyde, in Buteshire, Scotland; a mountainous island, highest summit Goatfell, 2,866 ft., with a margin of lowland round the coast; nearly all the property of the Duke of Hamilton, whose seat is Brodick Castle. Pop. 46,000.

Arras, a French town in the dept. of Pas-de-Calais, long celebrated for its tapestry; the birthplace of Damiens and Robespierre. It was the scene of severe fighting during the Great War and was almost completely destroyed, the Cathedral and Gothic town-hall included. Pop. 25,000.

Arras, **Battle of**, one of the biggest battles on the Western Front during the Great War, fought in early 1917, the intention being that the British forces should attack in the neighbourhood of Arras, draw off the German reserves and pave the way for a French attack on the Aisne, and between the two offences to break the Hindenburg line. The British attack, which lacked the element of surprise, was only partially successful, though some advances were made and thousands of prisoners and hundreds of guns captured. The French attack failed completely. The British losses were very heavy.

Arrest, the taking of a person into custody, either to prevent him committing a crime or to ensure that a suspected or guilty person should be present to answer a charge against him. Arrest in civil cases can only be effected for debt in certain circumstances or for contempt of court. Arrest is usually by means of a warrant or writ. A person committing a felony or assault or about to do so may be arrested summarily—even by another private person if the felony or assault is committed in his presence.

Arrhenius, Svante August, professor of physics at Stockholm, 1895-1905, and afterwards director of the department of physical chemistry at the Nobel Institute. He originated the theory of electrolytic dissociation, which laid the foundations of modern physical chemistry. Awarded Nobel Prize in 1903. (1859-1927).

Arria, a Roman matron, who, to encourage her husband Caecina Paetus in meeting death, to which he had been sentenced, thrust a poniard into her own breast, and then handed it to him, saying "It is not painful," whereupon he followed her example.

Arrian, Flavius, a Bithynian, a friend of Epictetus the Stoic, edited his *Enchiridion*; wrote a history of Alexander the Great in the *Anabasis of Alexander*, and *Peripius*, an account of voyages round the Euxine and round the Red Sea; b. 100, and died at an advanced age.

Arrondissement, a subdivision for purposes of a dept. in France. Each arrondissement has its own council for local purposes and is under the control of a sub-prefect. There are also five maritime arrondissements or maritime defence districts, each under the control of a prefect, who must be a vice-admiral of the navy.

Arrowhead, the popular name of a water plant (*S. sagittifolia*) of the genus *Sagittaria*, order Alismaceae, common in England. The submerged leaves are ribbon-shaped, the floating leaves ovate, whilst those above the water (the majority) are arrow-shaped, whence the name.

Arrowroot, a starchy substance obtained from the roots of various W. Indian plants, including the *Maranta arundinacea*. The name originated from an antidote to the poison of arrows, made by the S. American Indians out of roots of a plant confused with the maranta.

Arru (Aru) Islands, a group of islands, belonging to Holland, W. of New Guinea; export mother-of-pearl, pearls, tortoise-shell, etc. Pop. 22,000.

Arsaces I., the founder of the Parthian dynasty of the Arsacidae, by a revolt which proved successful against the Seleucidæ, 250 B.C.

Arsenal, the place where weapons and arms are stored and usually manufactured. In England much ammunition is manufactured by private firms. An Arsenal is government property, and among those in England are Woolwich Arsenal, Chatham, Portsmouth and Plymouth, while there are British Arsenals at Malta, Gibraltar and Calcutta.

Arsenal Football Club, founded in 1886 by employees of the Royal Arsenal, Woolwich. Reached the final of the English Cup in 1926-1927, being defeated by Cardiff City, but victorious against Huddersfield in 1929-1930 and Sheffield United in 1935-1936. The present ground is at Highbury.

Arsenic, a chemical element related to antimony and bismuth, but of much less pronounced metallic character than even the former; in many respects it more closely resembles a non-metal, particularly phosphorus. Symbol As, atomic number 33, atomic weight 74.96. It occurs in nature chiefly as the sulphides orpiment and realgar, but also as a double sulphide with iron (arsenical pyrites or mispickel); from the last substance it is extracted by strong heating in the absence of air. Arsenic and its compounds are violently poisonous, but in small doses the oxide and other arsenical derivatives are used in medicine.

Arson, the act of setting fire unlawfully and maliciously to a church, house, building, outhouse, barn, granary, etc., or to grass, crops, etc. The offence is punishable with penal servitude in English law under the Malicious Damage Act. It was a capital crime until 1827.

Art, History of, goes back to times when cave-dwellers portrayed animals on cave walls during their leisure, and fashioned rude images of "gods." In early civilisation pictorial and sculptural art had reached an advanced stage. The beautifully decorated personal ornaments of Egypt in the 4th Century B.C., the bas-reliefs of Assyria and the palace of Minos in Crete are eloquent examples that made their culmination in the frieze of the Parthenon at Athens. In ancient Greece common articles of domestic use show beauty and grace. Roman art

was mostly architectural, richly coloured mosaics decorated the building. The Byzantine period followed with carvings, embroideries and superb enamels. Meanwhile Roman sculpture became free from the conventions that are

A SUBJECT FROM THE
PARATHENON FRIEZE

noticed in earlier work, and naturalistic art began.

With the Renaissance and its impulsion to artistic vigour came Leonardo da Vinci with his wonderful painting of the ceiling in the Sistine Chapel), Michelangelo and Raphael. In Venice, the centre of art in that day, work by Bellini, Titian and Giorgione appeared. In Flanders Van Eyck, Matsys and Memling brought realism to painting. In the 16th Century Germany produced such masters as Holbein and Dürer, while Spanish Art is represented by the work of Ribera, Zurbaran, Velazquez, El Greco (Theotocopuli) and Murillo. In Holland, there was a lessening of purely religious art, portrait-painting and landscapes are characteristic. Rembrandt, Hals, De Hooch, Hobbema, Rubens, and Van Dyck are among the great Dutch artists.

In England, during the reign of Charles II., Lely became prominent, but the pioneer of English technical art was the satirical Hogarth. Claude and Poussin in France stand out amid the florid and flamboyant age of Louis XIV., while Watteau and Fragonard continued until the classic period of David and Inghen. England's greatest period began at the end of the 18th Century with portraits by Reynolds, Gainsborough, Hoppner, Romney, Raeburn and the landscapes of Wilson, Gainsborough, Crowe, Turner, and Constable. They were followed by the "Pre-Raphaelite" school of Burne-Jones, Rossetti, and Ford Madox Brown and Holman Hunt of the Victorian Age.

Art in the 20th Century broke away from tradition. In Great Britain, Augustus John, Walter Sickert, William Orpen, and Frank Brangwyn are examples of the impressionist school, just as the internationally famous work of the French sculptor Rodin broke new ground in stone. Contemporary art carries the revolt farther. Cézanne and Van Gogh in Europe forsook form for ideas. Cézanne translated nature in terms of polyhedral shapes, while Van Gogh sacrificed form to colour. Pointillism led by Seurat approaches the painting of light by the use of primary colours in combination. Picasso is the best-known exponent of abstract painting, while the newest phase—Surrealism, or the interpretation of the sub-conscious—has Salvador Dali and Max Ernst as its chief apostles.

Arta, Gulf of, an inlet of the Ionian Sea, on the W. coast of Greece, an abundant fishing-ground; scene of the battle of Actium, 31 B.C. The R. Arta flows into it, and a town of the same name stands on its shores.

Artaxerxes, the name of four ancient Persian monarchs: A. I., called the "Long-handed," from his right hand being longer than his left; son of Xerxes I.; concluded a peace with Greece after a war of 52 years; entertained Themistocles at his Court; king from 465 to 424 B.C. A. II., Mnemon, vanquished and killed his brother Cyrus at Cunaxa in 401, who had revolted against him; imposed in 387 on the Spartans the shameful Treaty of Antalcidas; was king from 405 to 359 B.C. A. III., Ochus, son of the preceding, slew all his kindred on ascending the throne; in Egypt slew the sacred bull Apis and gave the flesh to his soldiers, for which his eunuch Bagoas poisoned him; king from 359 to 338 B.C. A. IV. (Ardashir I.), grandson of Sassan, founder of the dynasty Sassanidae; restored the old religion of the Magi, amended the laws, and promoted education; king from c. A.D. 211 to 241.

Artemis, in the Greek mythology the twin sister of Apollo, born in the Isle of Delos, and one of the great divinities of the

Greeks; a virgin goddess, represented as a huntress armed with bow and arrows; presided over the birth of animals; was guardian of flocks.

Artemisia, Queen of Halicarnassus, joined Xerxes in his invasion of Greece, and fought with valour at Salamis, 480 B.C. A. II., also queen, raised a tomb over the grave of her husband Mausolus, regarded as one of the seven wonders of the world, 355 B.C.

Artemisia, a genus of plants of the order Compositae, comprising 280 species and members of which are found in S. Africa, America, Europe, Asia (Steppes). There are four British species, including *A. vulgaris* and *A. campestris*. The flavouring matter of absinthe is derived from *A. absinthium* (wormwood).

Artemisium, a promontory N. of Xerxes' last part of his fleet in battle with the Greeks, 480 B.C.

Artemus Ward. See C. F. Browne.

Arterio-sclerosis, a disease of the arteries, resulting in hypertrophy of the left ventricle of the heart, and causing an increase of blood pressure, which involves degeneration of the blood vessels. Cerebral hemorrhage may occur owing to the formation of small aneurism or small tumours in the arteries.

Artery, a cylindrical vessel or tube which conveys the blood from the heart to all parts of the body by ramifications which, as they proceed, diminish in size and increase in number and terminate in minute capillaries, uniting the ends of the arteries with the beginnings of the veins. They are membranous, elastic and pulsatile. There are two principal arteries or arterial trunks: the aorta, which rises from the left ventricle of the heart and ramifies through the whole body, sending off great branches to the head, neck and upper limbs, etc., and the pulmonary artery, which conveys venous blood from the right ventricle to the lungs, to be purified in the process of respiration.

Artesian Wells, wells made by at a point below the source of supply; so called from

Artois (Artesium) in France, where the first was sunk. They are practicable only where the crust of the earth forms a basin (e.g., the London basin) and the strata of which the basin is formed include one of permeable material (e.g., sand or gravel) between two strata of impermeable material (e.g., clay).

ARTESIAN WELL SHOWING SUPERFICIAL SOIL (A), IMPERVIOUS STRATA (B), AND POROUS STRATA (C)

Artevelde, Jacob van, a wealthy chief in a revolt against Count Louis of Flanders, expelled him, made a treaty with Edward III. as lord-superior of Flanders, and was killed in a popular tumult at Ghent. (1285-1345).

Artevelde, Philip van, son of the preceding, defeated Louis II. and became regent; but with the help of French Charles VI. Louis retaliated, defeated the Flemings and slew him. (1340-1382).

Arthritis, a disease of the joints, sometimes called rheumatic gout, which sets up inflammation and produces pronounced deformity. The actual

cause is still uncertain, but is considered microbic. The disease is chronic, and though regarded as incurable, is not necessarily dangerous. The onset begins usually in the hands, goes to the feet, arms and legs, sometimes resulting in complete helplessness.

Arthropoda, a big division of the animal kingdom, comprising certain groups of animals having affinities with the annelids (segmented worms). They also have segmented and articulated bodies, but differ in having hollow, articulated limbs (cf. the crab), an outer skin hardened to form a sort of skeletal crust, and two or more appendages near the mouth used as jaws. The group is subdivided into 11 classes, which include the crustacea, arachnida (spiders, king crabs, scorpions, mites and ticks), diplopoda (millipedes), chilopoda (centipedes), and hexapoda (insects).

Arthur, a British prince of widespread fame, who is supposed to have lived at the time of the Saxon invasion in the 6th Century, whose exploits and those of his court have given birth to the tradition of the Round Table, to the rendering of which Tennyson devoted so much of his genius. Arthurian Romance owes much to the writings of Geoffrey of Monmouth (12th Cent.). Walter Map (12th Cent.), and Sir Thomas Malory (15th Cent.).

Arthur, Prince, Duke of Brittany, heir to the throne of England by the death of his uncle Richard I.; supplanted by King John and presumed to have been killed by him. (1187-1203).

Arthur's Seat, a lion-shaped hill 822 ft., close to Edinburgh on the E., from the top of which the prospect is unrivalled.

Artichoke, a plant belonging to the Compositae; resembles a thistle. The true artichoke (*Cynara scolymus*) grows in S. Europe, and has an edible flower. The Jerusalem artichoke (*Helianthus tuberosus*) is a tuber common in Europe and America and, when cooked, is edible.

Articles, The Thirty-Nine, originally in 1562, to which every clergyman of the Church of England is bound by law to subscribe at his ordination, as the accepted faith of the Church. The number of articles was reduced later to 39, and took the form now used finally in 1604.

Artificer, a term used in the navy denoting ranks in the engineering. Artificer Engineers hold warrant rank and are promoted from Engine-Room Artificers (E.R.A.'s) who hold petty officer rank. A fifth class of E.R.A. includes boys in training over 15 years of age.

Artificial Respiration, the restoration of the action of breathing by mechanical means to persons overcome by poisoning, suffocation and drowning. The method recommended and practised by the Royal Life Saving Society and the St. John Ambulance Association is known as the "prone-pressure" or Schafer method. It is described in the Royal Life Saving Societies handbook as follows:

"The apparently drowned person must be placed at once, face downwards, on the nearest flat surface. Place yourself on one side of the patient facing the head, in a full kneeling position, with knees and hips bent. Put your hands on the small of the patient's back, the wrists nearly touching, the thumbs as near each other as possible without strain and the fingers passing over the loins on either side, but not spread out. Then bending the body from the knees and somewhat straightening the hip joints swing slowly forward, keeping the arms quite straight and rigid, so that the weight of your body is conveyed to your hands.

No exertion is required: the necessary pressure is imparted by the weight of your body. In this way the patient's abdomen is pressed against the ground; the abdominal organs are forced against the diaphragm; the diaphragm rises and air is driven out of the lungs together with any water or mucus which may be present in the air-passages and mouth, thus producing expiration.

"Next, swing the body slowly backwards to its first position, thus removing its weight from the hands (which are kept in position) and relaxing the pressure on the abdomen. The organs now resume their former position, the diaphragm descends, the thorax is enlarged and air passes into the lungs, inspiration being produced. Repeat the movements regularly about 12 times a minute, swinging the body alternately forwards and backwards from the knees."

Artificial Silk or **Rayon**, a synthetic material in imitation of silk and produced at a smaller cost than real silk. A chemically prepared fluid is subjected to mechanical reproduction of the silk-worm's movements. The basis of all artificial silk is cellulose, either wood-pulp (prepared from spruce) or cotton-cellulose. The cellulose is specially treated and then dissolved into a viscous fluid, which hardens on contact with air or some chemical. The four main processes are the nitro-cellulose in Belgium, the viscose process in England used by Courtauld's (the actual process is secret), the cupra-ammonium, first used in Germany and the acetate process, also secret, employed by British Celanese, Ltd. There are extensive artificial silk factories at Braine, Essex.

Artillery, all ordnance such as guns and howitzers (q.v.) as opposed to small arms and machine-guns. The term is also used for the troops who serve these arms. Generally speaking, artillery is divided into field, heavy and siege artillery.

All field artillery, by which is meant guns and howitzers which accompany mobile troops, are designed on the quick-firing principle, by which the inevitable recoil is absorbed by an arrangement known as the recoil carriage. With the quick-firing gun, propellant and projectile are combined in one cartridge similar to that used with small arms; with the howitzer they are separate.

A field battery consists of six guns or howitzers and 12 ammunition-wagons. Both guns and wagons are of the limber-type—i.e., in two detachable parts. Actually the function of artillery is to assist the other arms, especially in preparing the way for, and assisting, the infantry.

Artiodactyla, a sub-order of mammals also called Even-toed Ungulates, having an even number (either two or four) of toes on the foot, the second and third (or the two if there are only two), being of equal length; includes the Pecora (oxen, sheep, goats, antelopes, gazelles, giraffes, duikers, gnus, okapi, deer); Tylopoda (pad-footed camels, llamas); Tragulina (chevrotains); Suina (pigs, peccaries, hippopotamuses).

Artois, an ancient province of the N. of France, united to the crown in 1659.

Artz, David Adolf Constant, Dutch genre-painter; much influenced in his early years by Josef Israels. His homely subjects include "With Grandmother," "The Old Fisherman," and "The Return of the Flock." (1839-1890).

Arum, a genus of plants of the order Araceae of which there are 12 species, all found in Europe and the Mediterranean countries. British representative (*A. maculatum*) is the plant popularly known as lords and ladies, cuckoo-pint and wake-robin. It is a tuberous, monocotyledonous

plant, the flower of which grows in a spike out of a rolled-up leaf (spathe), leaving afterwards a spike of red berries, common in hedgerows. Berries and leaves are highly poisonous.

Water-arum (*C. palustris*) belongs to the genus *Calla* of the same order. The Arundilly, native to S. Africa is *Z. ethiopica* of the genus *Zantedeschia*.

Arundel, a town in Sussex, England, on the Arun, 9 m. E. of Chichester, with a castle of great magnificence, the seat of the Dukes of Norfolk. Pop. 2,500.

Arundel, Earls of, the earldom of Arundel is chiefly associated with the families of Fitzalan and Howard, but there were several earls of the Albini family: William de Albini (d. 1176), who was confirmed in the earldom by Henry II.; William de Albini (d. 1221), grandson of the preceding, also styled Earl of Sussex, and son of William, the second earl, whom he succeeded in 1196. He was a favourite of King John, and was his justiciar. Richard Fitzalan (1267-1302) became earl about 1290, and fought for Edward I. against the Scots. His son, Edmund Fitzalan (1285-1326), aided Edward II. and the Despencers (his son married a daughter of the Despencer family), against the partisans of Isabella, and he was eventually executed to satisfy the rancour of Mortimer. Richard (1307-1376), son of the preceding, fought at Crécy and became Earl of Surrey and regent of England. Henry, 12th Earl (1517-1580), was chiefly notable for his opposition to Warwick. He was implicated in Somerset's plot against Northumberland and proclaimed Mary as Queen. He was Lord Chamberlain under Edward VI., Lord High Steward under Mary and, under Elizabeth, a member of the Commission which treated with the Scots. In 1627 the title was formally bestowed on the Howard family, and since 1660 has been held by the Dukes of Norfolk.

Arundel Marbles, ancient Grecian marbles collected at Smyrna and elsewhere by the Earl of Arundel in 1824, now in the possession of the University of Oxford, the most important of which is one from Paros inscribed with a chronology of events in Grecian history from 1582 to 264 B.C.; the date of the marbles themselves is 263 B.C.

Arvales, *Frates*, a college of twelve priests in ancient Rome, whose duty it was to make annual offerings to the Lares for the increase of the fruits of the field.

Aryan, a term invented by philologists to describe the race presumed to have existed in prehistoric times and to have spoken a language (now commonly termed Indo-Germanic) from which the majority of European and some Indian languages are derived.

The place of origin of the race has been variously sought in Europe and Asia, and it is presumed to have branched off at different periods northwestward and westward into Europe and southward into Persia and the valley of the Ganges, giving rise to the great branches of the language, Greek, Latin, Celtic, Germanic, Slav on the one hand, and Persian and Hindu on the other, a community of origin that is attested by the comparative study of them.

The "Aryan" paragraph of Hitler's anti-Semitic policy in Germany involves a conception of the purity of Germanic or "Nordic" peoples of Europe which is not supported by philological or anthropological evidence.

Arya Samaj, a Hindu reforming sect founded by Swami Dyanand in 1827-1852, who denounced the idol-worshipping and the Hindu theories of purity and pollution. The sect seeks

inspiration in the Vedas, and commands considerable support, especially among educated Hindus.

As, a unit of weight (the libra or pound) and of measure in ancient Rome; also a Roman coin in use for several centuries, though the value varied.

Asa, the third King of Judah, who strenuously opposed idolatry and heathenism, even deposing his mother Maachab from being queen on this account; defeated Zerah the Ethiopian and pursued him to Gerar. He bought the help of Benhadad King of Syria against Baasha, King of Israel, and defeated the Israelites. Died 916 B.C., aged 41.

Asaph, musician in the temple at Jerusalem in the time of David and Solomon. A number of the Psalms are attributed to him.

Asbestos, a fibrous, non-inflammable mineral found in the igneous rocks of Devonian age in Canada and elsewhere. It is largely used for making fireproof materials, owing to its bad thermal conductivity, and for motor-car brakes and clutches.

Asbjornsen, Peter Christen, Norwegian writer on folklore and zoology; engaged upon scientific investigations along coast, 1846-1852, and later was appointed Inspector of Forests to the Government. Travelled the length of Norway to make a first-hand study of Norwegian folklore and published a number of collections of Norwegian fairy tales and folk legends. (1812-1885).

Ascalon, one of the five cities of the ancient Philistines, much contested during the Crusades; birthplace of Herod the Great.

Ascanius, the son of Aeneas, who ("with unequal steps") by the side of his father as he escaped from burning Troy; was founder of Alba Longa.

Ascension, a bare volcanic island in the Atlantic, rising to nearly 3,000 ft., belonging to Britain, 700 m. NW. of St. Helena, to which colony it is annexed. The island is noted for sea-turtles and tern.

Ascension, the rising of Jesus Christ into Heaven on the fortieth day after the resurrection, and celebrated in the Christian churches on Holy Thursday, the fortieth day after Easter. It ranks with the major Christian festivals of Christmas, Pentecost and Easter.

Asceticism, the practice of rigid self-denial, originally by athletes in training in Greece and later by religious zealots. Famous ascetics were Anthony the Hermit, Paul of Thebes and Simeon Stylites. Various schools of asceticism include Stoics, Cynics and Neoplatonists, while in modern times a mild asceticism survives in Quakerism and Sabbatarianism.

Aschaffenburg, an ancient town of Bavaria, on the Main, 20 m. from Frankfurt, with an old castle and cathedral. Pop. 36,000.

Ascham, Roger, a Yorkshire Fellow of a good classical, and particularly Greek, scholar; wrote a book on archery, deemed a classic, entitled *Toxophilus*, for which Henry VIII. settled a pension on him; was tutor and Latin secretary to Elizabeth; his chief work, *The Scholemaster*, a treatise on education. (1515-1568).

Asche, Oscar, actor, of Norwegian descent; born at Geelong, Australia. First appearance in London 1893. Toured with Benson. Married Lily Brayton. Long with Troc. Took many Shakespearean parts. Toured Australia and S. Africa. Ran his own play *Chu Chin Chow*, at His Majesty's 1916-1921—longest run on record. (1871-1936).

Aschersleben, a manufacturing town in the Magdeburg district of Prussia. Pop. 29,000.

Ascoli Piceno, a province of Central Italy in the dept. of Marche. Also the capital of the province, a cathedral town. Pop. 32,000.

Ascot, a race-course in Berks, 6 m. SW. of Windsor, the races at which, instituted by Queen Anne, take place a fortnight after the Derby.

Asgard, the garden of heaven of the Norse mythology, in which each had a separate dwelling, and approach to which was by the bridge Bifröst. Here also was Valhalla, to which went heroes killed in battle.

Ash, a genus of plants of the olive family of the northern hemisphere. *F. excelsior* is the common English ash tree, and supplies hard, tough wood. Flowers in racemes before the tree is in leaf. The fruit (called "keys") is a nut, dry and winged for wind-distribution.

ASH—LEAF
AND "KEYS"

Ashanti, a negro inland kingdom in the Upper Soudan, N. of Gold Coast territory, wooded, well watered, and well cultivated; natives intelligent, warlike and skilful; twice provoked a war with Great Britain, and finally the despatch of a military expedition under Sir Garnet (afterwards Lord) Wolseley, which led to the submission of the king and the appointment of a British Resident; annexed by Great Britain 1901. Its tribal confederation was resuscitated in 1935, when the Golden Stool, symbol of the soul of the Ashanti people, was restored to them by the Government. Pop. 578,000. (Europeans, 650).

Ashbourne, a market town of Derbyshire, England, on the R. Dove. Its 13th-Century cruciform church has a fine spire 211 ft. high, known locally as the "Pride of the Peak." Pop. 4,507.

Ashburton, an urban district and market town of Devon, England, near Dartmoor. Pop. 2,500. Also a town in S. Island, New Zealand, on a river of the same name. Pop. 5,300; and a river of Western Australia, 400 m. long, falling into Exmouth Gulf.

Ashburton, Alexander Baring, Lord, second son of Sir Francis Baring, a Liberal politician, turned Conservative, member of Peel's administration in 1834-1835, sent as special ambassador to the United States in 1842; concluded the boundary treaty of Washington, known as the Ashburton Treaty. (1774-1848).

Ashby-de-la-Zouch, a small town 17 m. W. of Leicester, England; has the ruins of a castle. Pop. 3,000.

Ashdod, a maritime Philistine city 20 m. S. of Jaffa, seat of the Dagon worship.

Ashdown Forest, a district of Sussex between Crowborough and E. Grinstead. It is the remaining portion of the Saxon forest of Andredswald.

Ashdown Park, Berkshire seat of the Earl of Craven. Here Alfred and Ethelred are said to have defeated the Danes in 871.

Asher, the name of the eighth son of Isaac, Jacob, the founder of an Israelitish tribe of the name.

Ashera, an image of Astarte (q.v.), and associated with the worship of that Phœnician goddess.

Ashes, The, the mythical trophy for which England and Australia compete in Test matches at cricket. In 1882 Australia beat England at the Oval, and a sporting paper published a mock in Memoriam notice "in loving memory of English cricket, which died at the Oval on Aug. 29, 1882. The remains will be cremated and the ashes taken to Australia." Since then every team going to or coming from Australia has been said to be fighting for "the Ashes."

Asheville, a town of N. Carolina, U.S.A., a county town of Buncombe Co. It has considerable manufactures of textiles, leather, etc., and is a health resort. Pop. 50,000.

Ashfield, Albert Henry Stanley, first of Detroit, U.S.A. Born at Derby; managed Electric railways in America; general manager, Metropolitan District Railway and Tube Railways, London, 1907; managing director, Underground Group, 1910-1933. Knighted 1914. M.P. (Coalition), Ashton-under-Lyne, 1916-1920; Privy Councillor 1916. President Board of Trade 1916-1919; ennobled 1920. (1874-).

Ashford, a market town of Kent, England; has a fine old church; industries include brickmaking, tanning, brewing and manufacturing agricultural machinery. There are large railway workshops here. Pop. 15,248.

Ashington, a town of Northumberland, England, the centre of a coal-mining district. Pop. 29,418.

Ashland, U.S.A.: (1) in Kentucky, a manufacturing town. Pop. 29,000; (2) in Wisconsin, a port on Lake Superior. Pop. 10,000; (3) in Pennsylvania; a coal-mining town. Pop. 7,000; (4) a health resort in Oregon. Pop. 4,000; (5) seat of the Randolph-Macon College in Virginia. Pop. 13,000.

Ashmole, Elias, a celebrated antiquary and authority on heraldry; presented to the University of Oxford a collection of rarities bequeathed to him, which laid the foundation of the Ashmolean Museum there. (1617-1692).

Ashstead, a town in Surrey, England; the chief industry brick- and tile-making. Near by is Ashstead Common, where Roman remains have been excavated. Pop. 4,783.

Ashtabula, a city of Ohio, U.S.A., a capital of a county of the name, with an excellent harbour and considerable manufactures; on Lake Erie. Pop. 23,000.

Ashtaroth. See Astarte.

Ashton-in-Makerfield, an urban district and town of Lancashire, England, iron-manufacturing and colliery centre. Pop. 20,511.

Ashton-under-Lyne, a cotton-manufacturing town near Manchester, England. Pop. 52,000.

Ash Wednesday, the first day of Lent, the connection with "ash" or "ashes," being that, according to the injunction of Gregory the Great, in the 6th Century, ashes, which had first been blessed, were sprinkled on the heads of worshippers, or the form of the Cross was traced with ashes upon their foreheads.

Ashwell, Lena (Lady Simson), O.B.E., actress, brought up in Canada; daughter of Captain Pocock, R.N. First appearance 1891 in *The Pharisee*. Toured America. Had Kingsway Theatre, 1907-1909. During War conducted entertainments at

front. Married in 1908 the late Sir Henry Simson, obstetric surgeon, who died in 1932. (1872-)

Asia, the largest of the four quarters of the globe; bounded on the N. by the Arctic Ocean, on the W. by the natural boundary formed by the Ural Mts., Mediterranean, Black Sea, Red Sea and Caspian Sea, on the E. by the Pacific Ocean and on the S. by a chain of islands through the Molucca and Sunda Is. The S. coastline is broken by the peninsulas of Arabia, India and Cambodia.

It may be divided into four great divisions: (1) N. Lowlands, which consist of Siberia, the Kirghiz Republic, Mongolia, Manchukuo and N. and Central China; (2) the Central Mountain System, including the vast Himalaya system, the Iranian Plateau, the Pamir Plateau, Tibet; (3) the Eastern Margin, comprising E. China and Japan and Annam, and (4) SW. Tablelands of Arabia, the Deccan and Iraq. There are also the large island groups in the SE., including Sumatra, Java, Timor, Borneo, Celebes and the Philippine Is.

The principal rivers of Asia are the Ob, Yenesei, Lena, Amur (of Siberia); Hwang-ho, Yang-tse-kiang, and Si-kiang (of China); the Mekong and Salween (in the SE.); the Irrawaddi (of Burma); the Brahmaputra, Ganges, Godavari, Kistna, Nerbada, and Indus (of India), and the Euphrates and Tigris (of Iraq). The chief mountain ranges are the Himalayas (including Hindu Kush, Karakorum and Pamirs), Kwen Lun, Tien Shan, Altai, Sayan, Yablonoi and Stanovoi mountains.

Climate.—Asia stretches through 76° of latitude, and many types of climate are found. In the interior extremes of heat and cold are experienced. The dry areas (Iran and Arabia) have a very high temperature. The lower temperature of the coastlands is due to the influence of the Pacific and Indian Oceans. In July the greater part of Asia receives inflowing winds, since the land being heated, a low-pressure area is created and the cooler, heavier air moves in to take its place. In January the process is reversed, and cold winds outflow. Most rain falls in summer; much is deposited on the mountains. A heavy summer rainfall is found S. of a line from the mouth of the Indus to Korea. Lands bordering the E. Mediterranean have dry summers and wet winters. Ceylon, the Malay Peninsula, the China coastlands and E. India have rain at all seasons.

Productions.—Agriculture is the leading industry, and in China, Japan and India the soil is very fertile. Some agricultural products are: wheat, one-eighth of world's crop (India and Siberia); cotton, a quarter of world's crop (India and China); tobacco, a third of the world's crop (Mediterranean, monsoon and tropical parts); cane sugar, half world's crop (wet tropical areas); rice (S. and SE. flood plains); tea (Ceylon, China, India, Java and Japan); coffee (Arabia, India and E. Indies); dates (deserts); fruit (Mediterranean area); fibres, hemp, jute, silk, coal, plantation rubber, pepper, taploca, camphor and drugs in monsoon and tropical areas. Asia has rich mineral deposits and produces half the world's tin from Malaya. Other important minerals are gold (S. India); iron (Siberia, India, China); petroleum (Caucasia, E. Indies, Burma); silver, copper, plumbago, lead, zinc and precious stones.

Asia Minor, called also *Anatolia*, a peninsula, extension westward of the Armenian and Kurdistan highlands in Asia, bounded on the N. by the Black Sea, on the W. by the Archipelago, and on the S. by the Levant; indented all round, mainland as well as adjoining islands, with bays and harbours, all more or less busy centres of trade; is as large as France, and consists of a plateau with slopes all round to the coasts.

Asiago Plateau, in the province of the Great War heavy fighting took place here between the Austro-German troops and the Italians, aided by British and French. The Austro-German forces took Gen. Cadorna's headquarters at Udine in Oct. 1917, and made direct assaults on the Plateau. These assaults were withstood, but in December the Italian forces gave ground, which they regained in Jan. 1918.

Askari, a race of people inhabiting the E. Africa, on the borders of Abyssinia. They are of Hamitic extraction, and have strains of Arab blood as well as Negroid. Their domestic life is simple, almost primitive. Of poor physique, they are capable of great endurance, and formed part of the Italian Eritrean forces in the Libyan war of 1912 and the Abyssinia campaign of 1935-1936.

Aske, Robert, leader of the Pilgrimage of Grace in Yorkshire arising from the ecclesiastical reforms of Henry VIII.; was executed 1537.

Askew, Anne, a lady of good birth, a victim of persecution in the time of Henry VIII. for denying transubstantiation, tortured on the rack and burnt at the stake, 1546.

Askwith, Lord (George Ranken), Chief Industrial Commissioner, before and during the Great War; counsel on the Venezuelan Arbitration, rendered distinguished service at the Board of Trade in railway questions and labour disputes. Comptroller-General of the Commercial, Labour and Statistical Departments 1909-1911, and chairman Fair Wages Advisory Committee 1910-1919; was chairman of Government Arbitration Committee under the Munitions Acts. Raised to the peerage 1919. (1861-)

Asmara, the seat of government of the Italian Colony of Eritrea (now incorporated in Italian East Africa). It stands 7,800 ft. above sea-level. Pop. 18,800.

Asmodeus, a mischievous demon or goblin of the Jewish demonology, who gloats on the vices and follies of mankind, and figures in Le Sage's *Le Diable Boiteux*, as lifting off the roofs of the houses of Madrid and exposing their inmost interiors and the secret doings of the inhabitants.

Asnières, a French town in the dept. of Paris. Pop. 71,000.

Asoka, an emperor in India who, after his accession in 264 B.C., became an ardent disciple of Buddha; organised Buddhism, as Constantine did Christianity, into a State religion. Evidence of his influence is still extant in pillars and rocks inscribed with his edicts in wide districts of Northern India. (272-232 B.C.)

Asp, a popular name given to two poisonous, horned snakes of the viper family, viz., the *Vipera aspis* of Southern Europe and *Cerastes cornutus*, a dull-coloured desert snake of Egypt, from the bite of which Cleopatra is commonly supposed to have died.

Asparagus, a genus of plants of the Liliaceae order; 120 species, found mostly in sandy and coastal districts. The most important member of the group is *A. officinalis*, native of N. Europe and naturalised in N. America, the young shoots of which are a popular vegetable and are forced in Great Britain and France.

ASP—*Cerastes cornutus*

Aspasia, a Greek courtesan remarkable for her wit, beauty and culture, a native of Miletus; being attracted to Athens, came and settled in it; became the mistress of Pericles, and made her home the rendezvous of all the intellectual and wise people of the city, Socrates included.

Aspatria, a town in Cumberland, England, 20 m. from Carlisle. Pop. 3,239.

Aspen, or Trembling Poplar (*Populus tremula*), a tree of the order Salicaceae, found in moist woods in Great Britain and N. Europe; of little value as timber, but at one time used in the making of arrows.

Asperges, the Roman Catholic ceremony in which the priest sprinkles the people with holy water before High Mass. The name is the first word of *Asperge me, Domini, hyssopo*.

Aspern, a village in Austria, on the Danube, 4 m. N.E. of Vienna, the scene of a fierce battle in which the Austrians under the Archduke Charles defeated the French under Napoleon, May 21, 1809.

Asphalt, a naturally-occurring bitumen of a black or brownish-black colour, consisting of hydrocarbons, and being the residue left by the evaporation of deposits of petroleum; also a limestone impregnated with bitumen. It can be melted, and has a variety of uses, including paving, damp-courses, an ingredient of enamels, etc. The most famous natural deposit is the pitch lake (Brea) in Trinidad. It can also be manufactured artificially.

Asphodel (*Asphodelus*), a genus of the Liliaceae family of plants; 12 species, mostly native to the Mediterranean district; appraised by the Greeks for its almost perennial flowering, and with which they, in their imagination, covered the Elysian fields.

Asphyxia, a suspension or loss of the power of respiration, characterised by convulsive struggling for breath, the lips and face turning black, and loss of consciousness, causing death in from two to five minutes. It is brought about by breathing carbonic acid gas, etc., strangulation, choking, pressure on the chest or over the breathing organs and drowning.

Aspidistra, a genus of the Liliaceae (lily) family, and a native of India, China and Japanese highlands. Certain species are very popular as indoor plants, having large dark green (sometimes striped) leaves rising from an underground stem.

Aspinwall. See Colon.

Aspirin, a commercial name for acetyl salicylic acid. A dose of 5 to 15 grains relieves but does not cure headache and neuralgia. It is of great value in rheumatic fever, causing the temperature to drop and pain and swelling to decrease.

Aspromonte, a mountain close by Reggio, in the department of Calabria, Italy, overlooking the Strait of Messina, near which Garibaldi was defeated and captured in 1862.

Asquith, Rt. Hon. H. H. See Oxford and Asquith.

Ass, a domestic animal of the horse family. Smaller than the horse, it has a tufted tail, and the wild variety is striped. It has hardihood, docility and endurance, and is a valuable beast of burden, especially in the East, in Arabia, Egypt and Assyria. Shagreen is made from its skin.

Assab Bay, a coaling-station belonging to Italy, on the W. coast of the Red Sea.

Assam, a province E. of Bengal, ceded to Britain after the Burmese War in 1826; is an alluvial plain, with ranges of

hills along the Brahmaputra 450 m. long and 50 m. broad; the lowlands extremely fertile and productive, and the hills covered with tea-plantations. Under the Government of India Act, 1935, it has a bi-cameral legislature, and the franchise has now been extended to women. Pop. 4,404,000.

Assassins, a fanatical Moslem sect organised in the 11th century, under a chief called the Old Man of the Mountain, whose stronghold was a rock fortress at Alamut, in Persia, whose creed involved the secret assassination of all enemies of their faith, and so called because the "devoted ones" who carried out the assassinations, and who were not initiates of the rites of the sect, were prepared for their deeds of blood by draughts of an intoxicating liquor distilled from hashish (the hemp-plant). A Tartar force burst upon the horde in their stronghold in 1256, and put them wholesale to the sword.

Assault, "an attempt or offer with force and violence to do a corporal hurt to another." If there is injury the term battery is added. An assaulted person may retaliate in self-defence with the object of ending the attack. A common assault incurs a fine not exceeding £5 or two months imprisonment. An aggravated assault is punishable with long terms of imprisonment, and includes criminal assault on women and children and intending to cause or causing grievous bodily harm.

Assaye, a small town in Hyderabad, S. India, 46 m. N.E. of Aurangabad, where Sir Arthur Wellesley gained a victory over the Maharrattas in 1803.

Assaying, the determination of the purity of a precious metal, or the estimation of a metal in an alloy or ore; the word assay is used also to describe the specimen to be assayed. Methods of assaying gold and silver were elaborated in ancient times, and reached a high standard of precision, but the accurate estimation of other metals became possible only with the development of chemistry. There are two chief methods: (1) dry assaying, in which the ore is reduced with whatever solid reagent is necessary and the pure metal obtained; (2) wet assaying, in which chemical solvents are used and salts of the metal obtained.

Assegai, a spear or javelin of wood, tipped with iron, used by certain S. African tribes with deadly effect in war; of two varieties, the longthrowing-spear and the short stabbing-spear.

ASSEGAI

Assembly,

Church, was set up under the Enabling Act of 1919; it governs the Church of England subject to the approval of Parliament, and consists of three houses, bishops, clergy, and laity, the last two elected from the diocesan conferences. It may discuss any proposal touching the Church of England, but if legislation is necessary before any proposal can become effective power must be sought under the Enabling Act of 1919.

Assembly General, the chief court of the Presbyterian Church, a representative body, half clergymen and half laymen, which sits in Edinburgh for about ten days in May, disposes of the general business of the Church, and determines appeals.

Assembly National, the Commons section of the States-General of France which met on May 5, 1789, constituted itself until 1791 into a legislative assembly, and gave a new constitution to the country.

Assent, Royal, the approbation given by the sovereign in Parliament to a Bill which has passed both Houses, after which it becomes law. It may either be done in person, when the sovereign comes to the House of Lords and the assent is declared by the Clerk of Parliament, or it may be done by letters-patent, under the Great Seal, signed by the sovereign.

Asser, John, monk of St. David's, in Wales, and Bishop of Sherborne, tutor, friend, and biographer of Alfred the Great; is said to have suggested the founding of Oxford University; d. 910.

Assessment, a demand or call made upon stock-holders for a specified sum of money per share in addition to that already subscribed. Assessments are usually made as a result of reorganisation of companies or corporations. Financial difficulties are a frequent cause, and sometimes bond-holders are called upon in addition to the share- or stock-holders. The term is also used in connection with taxation and rate determination; in this case assessment is the taxable or rateable value of the house or income.

Assessor, one who acts as technical advisor to a judge, usually in maritime and ecclesiastical court cases. In maritime cases assessors are generally officials of Trinity House, while a bishop conducting an inquiry usually has as assessors a barrister and his chancellor. In civil courts their places have been taken by expert witnesses. Municipal Corporations hold an annual election for two assessors to assist the mayor in preparing burghs lists, while the official authorised to assess property for taxation is called an assessor.

Assets, real and personal property composing an estate. Assets of a deceased person are either personal (goods, chattels, debts) or real (landed property), and devolve (in the first instance) on the executor or administrator, in whose hands it is chargeable with the payment of the deceased's debts and the legacies under his will (assuming he has made one). The term is also widely used in business in contradistinction to debts and liabilities. In balance sheets issued by banks, insurance companies and financial associations, liabilities are placed on one side and assets on the other. In bankruptcy the term denotes the whole of the property available for the payment of creditors. It is not a technical term in Scotland, but is freely used both in legal business and in commercial affairs in the same sense as in England.

Assiento, a treaty with Spain to supply negroes for her colonies, concluded in succession with the Flemings, the Genoese, a French company, the English, and finally the South Sea Company, who relinquished their rights in 1750 on compensation by Spain.

Assignats, bills or notes, to the value of 45 thousand million francs, issued as currency by the revolutionary government of France in 1790, and based on the security of Church and other lands appropriated by it, and which in course of time became almost valueless, to the ruin of millions.

Assignment, a transfer by deed or other instrument of transfer of any property, or right, title or interest in property, real or personal. Assignments are usually given for leases, mortgages and funded property. Pensions and government salaries are not assignable. No particular form is required for an Assignment in Equity (i.e.) of a chose in action (rights under a contract or to money payable otherwise than under a contract), debts of record, shares and stock, etc., etc.). Transfers of insurance policies, shares in companies, debentures, etc., both as to the rights and duties thereunder,

are dealt with by Acts of Parliament and Articles of Association.

Assiniboia, a prairie region in Canada, included in the province of Saskatchewan since 1905.

Assiniboine, a river in Canada, rising in Saskatchewan and joining the Red R. near Winnipeg; it gives its name to an Indian tribe of the Sioux stock.

Assiout. See *Asyut*.

Assisi, of Perugia, the birthplace and burial-place of St. Francis, and the birthplace of Metastasio. It was a celebrated place of resort of pilgrims, who sometimes came in great numbers. Pop. 18,000.

Assizes, denote the sessions of the judges of the Supreme Court, held periodically in each county. Assizes originated in Magna Carta. The districts visited by the judges are called circuits, and number seven. London and Middlesex are administered judicially at the Old Bailey, and do not come under the assize system. The Judicature Act of 1875 consolidated the superior courts and gave uniform jurisdiction to the judges, and provided for a more rapid despatch of business. An assize judge must stay at the town where the assize is held until all cases entered for trial are completed. In Scotland the jury, in criminal cases, are still technically called the assize.

Association Cup, a trophy in the vase awarded at the close of a competition between football clubs of the Football Association (q.v.), professional and amateur. Amateur clubs rarely survive the preliminary contest, though the Corinthians have reached the fourth round. The Cup was first presented in 1871. The original cup was stolen from a shop window in Birmingham in 1895, when Aston Villa were the holders. Aston Villa and Blackburn Rovers have each won the cup six times, Wolverhampton Wanderers five, Sheffield United four and Bolton Wanderers three. The Cup final is played at Wembley Stadium, and enormous crowds flock to see it, the numbers in 1923, when Bolton Wanderers met West Ham United, totalling over 120,000.

Association of Ideas, a term in philosophy and psychology to denote the leading of one thought to another. According to Hume, the association is influenced by contiguity in time or place, resemblance and cause and effect. Those philosophers who explain most mental processes by association of ideas are referred to as the associationist school, and include Hobbes, Mill, Herbert Spencer, though they differ as to whether contiguity or resemblance is the more important cause. Association of ideas is classified as *simple*, e.g., action, sensation, feeling; *compound*, e.g., odour and taste leading to recollection, and *constructive*, e.g., imagination leading to invention.

Assouan (*Assuan*), the ancient Syene, capital of a province of the same name, most southerly in Egypt, on the right bank of the Nile, near the last cataract. A dam 1 m. in length, capable of storing 2,420,000,000 cubic metres of water, was opened here in 1902. Pop. 17,000 (of administrative division 268,000).

Assumption, Feast of The, festival in honour of the translation of the Virgin Mary to heaven, celebrated on Aug. 5.

Assur, name of the mythical founder of Assyria, apparently the Asshur mentioned in Gen. x. 22 as a son of Shem, who was afterwards deified and became the chief god of the Assyrians, giving his name to the country (Assyria) and to the capital of the country.

Assur-Bani-Pal, King of ancient Assyria at the height of her power. He succeeded his father, **Esarhaddon**, his twin brother receiving Babylonia. He successfully suppressed a revolt in Egypt, but before many years Egypt was lost to Assyria for ever. He was involved also in wars with Babylonia, the Arabians and the Elamites, and though he conquered all, the Assyrian empire was so drained of resources that even before his death (c. 626 B.C.) it was already tottering.

Assyria, an ancient kingdom, the origin uncertain, between the Niphates Mountains of Armenia on the N. and Babylonia on the S., 280 m. long and 150 broad, with a fertile soil and a population at a high stage of civilisation; closely associated geographically and historically with Babylonia; became a province of Media, which lay to the E., in 606 B.C., and afterwards a satrapy of the Persian empire, and was under the Turks from 1638 till the Great War, when it was mandated to France.

A COLOSSAL WINGED BULL FROM THE PALACE OF SARGON, KING OF ASSYRIA

Astarte, or **Ashtaroth**, or **Istar**, the Phœnician, as **Baal** was the male, these two being representative respectively of the conceptive and generative powers of nature, and symbolised, the latter, like **Apollo**, by the sun, and the former, like **Artemis** or **Diana**, by the moon.

Aster, a genus of plants of the order the expanded flowers resemble stars (Latin, *aster*, a star). There is only one British species, *A. tripolium*, sea starwort or Michaelmas daisy, but there are dozens of varieties of this species known to horticulture in single and double flowers of all sizes, from a sweet pea to rather larger than a shilling in diameter; and in colour from white to deep mauve and clear sky-blue, but always with a yellow centre.

Asteroids, small or minor planets revolving in orbits round the sun. The search for a new planet between Mars and Jupiter led to the discovery of the first of these, **Ceres**, by **Piazzi** in 1801; this is the largest of the group, and has a diameter of 485 m. **Pallas**, **Juno**, **Vesta** and **Eros** are other well-known asteroids, while the total number probably runs into many thousands, most of them very small, being scarcely more than masses of rock, with a diameter of only a few miles. The asteroids were probably formed by the disintegration of a single larger planet revolving between Mars and Jupiter.

Asthma, difficulty of respiration, returning at intervals, with a sense of stricture across the chest and in the lungs, a wheezing, hard cough at first, but more free towards the close of each paroxysm. It is essentially a spasm of the muscular tissue in the smaller bronchial tubes. It generally attacks persons advanced in years. The exciting causes are accumulation of mucus in the lungs, noxious vapours, a cold and foggy atmosphere, or a close, hot air, flatulence, accumulated fœces, violent passions, etc. The most important treatment is to remove the exciting cause. It seldom proves fatal.

Asti, an ancient city in Piedmont, Italy, **Asti**, on the Tanaro, with a Gothic cathedral; is noted for its wine; birthplace of **Alfieri**. Pop. 28,000.

Astigmatism, a defect of the eye clear vision of vertical objects but not of horizontal at the same distance. It is due to irregular curvature of the eye, and can be rectified by the use of cylindrical lenses. It is quite distinct from and may occur with either short or long-sightedness.

Astley, **Philip**, a famous equestrian and circus manager, who with **Francini** established the **Cirque Olympique** in Paris. (1742-1814).

Astley Bridge, a cotton town of N. of Bolton, Lancashire, England. 8,500 inhabitants 2 m.

Aston Manor, a suburb of Birmingham, ham, England, until 1911 an independent municipal borough of Warwickshire.

Aston Villa, one of the outstanding Association Football clubs, formed during 1874 in connection with a Wesleyan Chapel at Aston. Under the guidance of **George Ramsay** the club flourished. The present ground is at Villa Park, Birmingham.

Astor, **John Jacob**, a millionaire, son of a German peasant, who made a fortune of four millions in America by trading in furs (1763-1848). His son, **William Backhouse**, doubled his fortune; known as the "landlord of New York" (1792-1875); his great-grandson, **William Waldorf Astor**, was U.S. Minister to Italy, and afterwards settled in England, becoming first Viscount Astor.

Astor, **Nancy Witcher, Viscountess**, the first woman to take her seat in the House of Commons, being returned for the Sutton Division of Plymouth as a Conservative in Nov. 1919, and since then returned at every election. A daughter of C. D. Langhorne of Virginia, she made temperance and social reform a life interest, the law prohibiting the sale of intoxicants to juveniles under 18 having been sponsored by her. Companion of Honour, 1937. (1879-).

Astor, **William Waldorf, 2nd Viscount**, M.P. for Plymouth 1910-1919, when he succeeded to the peerage; took a special interest in questions of public health and presided over the Parliamentary Committee which recommended the provision of sanatoria; Parliamentary Secretary to Ministry of Food, 1918, and Local Government Board, 1919-1921. He is a famous race-horse owner, and has won the Oaks five times, the Eclipse Stakes four times and the St. Leger. He owns *The Observer*. (1879-).

Astoria, a port of Oregon, U.S.A., on the mouth. The Columbia R. 10 m. from the mouth. The lumber trade and salmon packing are the chief industries. Pop. 10,000.

Astræa, the daughter of **Zeus** and **Themis**, the goddess of justice; dwelt among men during the Golden Age, but left the earth on its decline, together with her sister **Pudicitia**, the withdrawal explained to mean the vanishing of the ideal from the life of man on the earth; now placed among the stars under the name of **Virgo**.

Astrakhan, a Russian trading town on the mouth of the Volga, 40 m. from its mouth in the Caspian Sea, of which it is the chief port. Pop. 225,000.

Astragalus, a genus of herbs or shrubs three species of which are found in Britain, and are known as milk vetches. They are usually thorny plants and grow on dry soil (e.g., steppes and prairies, etc.).

Astral Spirits, spirits formerly or to people the heavenly bodies, to whom worship was paid, and to hover unembodied through space exercising demoniac influence on embodied spirits.

Astrid, Sophie Louise, Queen of the Belgians, third daughter of Prince Charles, Duke of Västergötland, brother of Gustav V., King of Sweden. Married Duke of Brabant (now Leopold III., King of the Belgians), 1926. Had three children. Killed on road near Lucerne Aug. 29, 1935, in motor accident, her husband being the driver. (1906-1935).

Astringents, drugs used in medicine to contract the tissues. They serve several purposes including the arrest of bleeding, diarrhoea, etc.

Astrolabe, an instrument used for finding the altitude of the stars. First used by astrologers, they are now used in astronomy and topographical calculations. Another kind is used in calculations of latitude by navigators, one being used by Columbus.

13TH CENTURY
ASTROLABE

Astrology, a science founded on a presumed connection between the heavenly bodies and human destiny, and at one time believed in by men of such intelligence as Tacitus and Kepler; few great families at one time but had an astrologer attached to them to read the horoscope of any new member of the house.

Astronomer, Royal, the head of the Greenwich (founded by Charles II. in 1675).

Astronomy (Early History of). Astronomy is the scientific study of the stars and other heavenly bodies. Hundreds of years before the birth of Christ, the Chinese made observations of eclipses, comets and constellations, calculated the angle of the ecliptic, and may even have been able to measure the length of the solar and lunar years with precision. In Egypt, the importance of the annual flooding of the Nile valley led to careful observation of the heavens, in order that the passage of time should be accurately known and the date of the next flood predicted, with certainty. The principal "star-gazer" of the ancient world were, however, the Babylonians, who not only prepared calendars showing in advance the dates and times of the new moon, but also predicted eclipses and calculated the positions of the planets in the heavens and the times of rising of some of the stars.

From Babylon a knowledge of astronomy was transmitted to Greece. As early as the 3rd Century B.C. Aristarchus of Samos advanced the theory that the earth revolved around the sun, while Eratosthenes (276-196 B.C.) measured the circumference of the globe with surprising accuracy. Hipparchus (186-125 B.C.), the founder of trigonometry, compiled a catalogue of more than a thousand stars, introduced the device of lines of latitude and longitude, calculated the obliquity of the ecliptic, and observed the precession of the equinoxes.

He regarded the earth, however, as the centre of the universe in which he was followed by the great Ptolemy (2nd Century A.D.), whose treatise on astronomy, the *Almagest*, remained the chief authority on the subject or over a thousand years. On this erroneous assumption celestial phenomena are actually much more difficult to describe with accuracy than on the heliocentric theory, though his system does very closely represent these phenomena as they actually appear to a spectator upon the earth.

During the supremacy of Islam, progress rather in the accumulation of observations

than in theoretical advance. It was not until the 16th Century that astronomy took another long step forward as a result of the work of Copernicus (1473-1543), who revived the heliocentric hypothesis. He believed the orbits to be true circles, and the complications thus involved prevented his theory from making much immediate headway, quite apart from the fact that men had grown so used to the idea that the earth was the centre of the universe that it had now become a religious dogma.

Fortunately, exact data, at that time being amassed by Tycho Brahe, enabled Johann Kepler (1571-1630) to calculate that the planets revolved in ellipses, not circles, and most of the Copernican difficulties were then resolved.

Astronomy, Modern. Early in the 17th Century (1608), astronomy was given a great impetus by the invention of the telescope by Lippershey, a Flemish optician; two years later Galileo had constructed a better instrument for himself, and found ocular evidence of the truth of the Copernican system. His work forms the basis of modern astronomy, and marks the opening of the scientific era in which we still live.

The next landmark was set up by Sir Isaac Newton, who discovered the law of gravitation—viz., that the gravitational attraction between two bodies varies inversely as the square of the distance between them. This discovery, together with Newton's improvements in mathematical methods, converted astronomy into an exact science, and enabled the movements of celestial bodies to be calculated with a degree of accuracy sufficient for all purposes except some of modern origin, where Einstein's theory of relativity affords a more exact tool.

NEWTON'S
TELESCOPE

For most of the two centuries which have elapsed since the death of Newton progress in astronomy was mainly due to improved technique in the manufacture of telescopes, and to the discovery of spectrum analysis by Bunsen and Kirchhoff (1859). Spectrum analysis provided the key to observations made some forty years earlier by Fraunhofer, who noticed and carefully mapped mysterious dark lines vertically crossing the solar spectrum.

It was known that the compounds of certain elements imparted a definite colour to a non-luminous flame when heated in it, and that the spectrum of such a coloured flame was not continuous. Bunsen and Kirchhoff's discovery was that an incandescent vapour will absorb light-radiations of the same kind as it emits, and the Fraunhofer lines must be caused by white light from the sun passing through a solar atmosphere in which the elements corresponding to the observed lines are heated to incandescence.

Further refinement in spectrum analysis has enabled the composition of the sun and other stars to be calculated not merely qualitatively, but to some extent quantitatively. In one case an element was discovered upon the sun while still unknown upon the earth; this was helium, discovered in the solar atmosphere by Sir Norman Lockyer in 1868, but not detected upon the earth until 1894 (Sir William Ramsay). The spectroscope has also made it possible to calculate whether stars are approaching, or receding from, the earth. See also Comets; Moon, The; Milky Way; Solar System; Stars.

Astrophysics, that branch of astronomy which studies the physical components of the stars and their atmospheres. The principal instrument used is the spectroscopic, which consists of a kind of elaborate prism and which separates the light coming from the body under examination into its different wave-length constituents. Since each substance has a different spectrum, it is readily ascertained by examination what substances are indicated.

Asturias, an ancient province in the N. of Spain, gave title to the heir to the crown, rich in minerals, and with good fisheries; now named Oviedo, from the principal town.

Astyanax, the son of Hector and Andromache; was cast down by the Greeks from the ramparts after the fall of Troy, lest he should live and restore the city.

Asuncion or **Assumption**, capital and chief port of Paraguay, S. America. It was founded on the Feast of Assumption in 1837, from which it takes its name. It is on the Paraguay R., 950 m. from the sea. The climate is hot and healthy. Pop. 95,000.

Asyút, capital of a province of the same name in Upper Egypt, on the Nile, 200 m. S. of Cairo; has a few imposing mosques and a government palace; is a caravan station; noted for its red and black pottery; occupies the site of the ancient city of Lycopolls. It is the site of a famous barrage and lock. Pop. 57,000.

Atacama, an all-but-rainless desert in the N. of Chile, in the provinces of Atacama, Antofagasta, Los Andes, etc., abounding in silver and copper mines as well as yielding salt, nitrates, etc., in considerable quantities.

Atahualpa, the last of the Incas of Peru, who fell into Pizarro's hands through perfidy, and was executed by his orders in 1533—that is, little short of a year after the Spaniards landed in Peru.

Atalanta, celebrated for her agility, the prize of any suitor who could outstrip her on the race-course, failure entailing death; at last one suitor, Hippomenes, accepted the risk and started along with her, but as he neared the goal, kept dropping first one golden apple, then another, provided him by Venus, stooping to lift which lost Atalanta the race, whereupon Hippomenes claimed the prize.

Atavism, name given to the reappearance in progeny of the features, and even diseases, of ancestors several generations before.

Atbara, or **Black R.**, rising in the Highlands of Abyssinia, the lowest tributary of the Nile, which it joins near Berber; the scene of General Kitchener's defeat of the Khalifa's army, April 8, 1898.

Atchafalaya, an outlet of the Red R. (W. tributary of the Mississippi in the U.S.A.) flowing into a bay of the same name, 220 m. long.

Ate, in the Greek mythology the goddess of strife and mischief, also of vengeance; was banished by her father Zeus, for the annoyance she gave him, from heaven to earth.

A tempo, a direction in music indicating that the performer is to return to the time in which the movement opened, after some variation.

Athabasca, a former territory, a river, and a lake in Canada; the territory was absorbed by the provinces of Alberta and Saskatchewan in 1906. The river rises near the Rockies, and after a course of 750 m. flows into the lake. Under the name Athabascan are included a number of Indian tribes which range from Yukon to California.

Athaliah, Queen of Judah, daughter of Ahab and Jezebel, celebrated for her crimes and impiety, for which she was in the end killed by her subjects.

Athanasian Creed, a statement, in the form of a confession, of the orthodox creed of the Church as against the Arians, and damatory of every article of the heresy severally; ascribed to Athanasius at one time, but now believed to be of later date, though embracing his theology in affirmation of the absolute co-equal divinity of the Father, the Son, and the Holy Ghost in the Trinity.

Athanasius, Christian theologian, a native of Alexandria, and a deacon of the Church; took a prominent part against Arius in the Council at Nicea (Nice), and was his most uncompromising antagonist; was chosen Bishop of Alexandria; driven forth again and again from his bishopric under persecution of the Arians; retired into Thebaid for a time; spent the last 10 years of his life as Bishop at Alexandria, where he died; his works consist of treatises and orations bearing on the Arian controversy, and in vindication of the doctrine of the Trinity viewed in the most absolute sense. (296-373).

Atheism, disbelief in the existence of God, in the intellect, or practical, in the life.

Athelney, a marsh near the confluence of the Tone and Parret, Somerset; Alfred's place of refuge from the Danes.

Athelstan, King of England for 15 years from c. 925, son of King Edward the Elder, and grandson of King Alfred. Became King of Great Britain after invading Scotland, 934. Routed at Brunanburh († Birrenswark), 937, an uprising of the various nationalities. Buried at Malmesbury. (c. 894-940).

Athena, the Greek virgin goddess of wisdom, particularly in the arts of war and peace; is said to have been the conception of Metis, to have issued full-armed from the brain of Zeus, and in this way the child of both wisdom and power; wears a helmet, and bears on her left arm the eagle with the Medusa's head; the olive among trees and the owl among birds sacred to her.

Athenæum, a temple in ancient Athens dedicated to Athena and used as a meeting-place by poets, philosophers; later a school of learning established in Rome about 133 by Hadrian. It is also the name of a London club, founded in 1824.

Athens, the capital of Attica, and the chief city of ancient Greece, the resort in ancient times of all the able and wise men, particularly in the domain of literature and art, from all parts of the country and lands beyond; while the monuments of temple and statue that still adorn it give evidence of a culture among the citizens such as the inhabitants of no other city of the world have surpassed. The two chief monuments of the architecture of ancient Athens, both erected on the Acropolis, are the Parthenon (q.v.), dedicated to Athena, the finest building on the finest site in the world, and the Erechtheum, a temple dedicated to Poseidon close by; is the capital of modern Greece and the seat of the government. Pop. 393,000. There is a cotton-market town of the same name in Georgia, U.S.A. Pop. 18,000.

Atherstone, a town in Warwickshire, England; hat-making is the chief industry. The ruins of Merevale Abbey are close by. Pop. 6,245.

Atherton, a town in Lancashire, England; has cotton mills, iron works and collieries. Pop. 19,985.

Athletics, sports such as running, jumping, wrestling and boxing, which were popular with the Greeks

and Romans, and which were indulged in at the Olympic Games from an early date. Oxford University was a pioneer of the modern athletic meeting in 1850, and now the Amateur Athletic Association, in co-operation with the universities and schools, organises several championship meetings. In 1896 an international championship meeting was held in Athens; the Olympic Games were thus revived, and except for the War years they have been held every four years since in different countries.

Athlone, a market-town on the Shannon, which divides it, and an important military station; is the chief broadcasting station in Ireland (Eire). Pop. 7,500.

Athlone, Major-General the Earl of (Prince Alexander of Teck), a son of the Duke and Duchess of Teck, and brother of Queen Mary. He entered the Life Guards and saw service in the South African war, and in Flanders in 1915. He adopted the English title in 1917, and was Governor-General of South Africa 1923-1930. Chancellor of London University. (1874-).

Athole, a district in the N. of Perthshire, Scotland, which gives name to a branch of the Murray family, the dukedom of Athole (or Atholl) having been granted to John Murray, the third Earl, in 1703.

Atholl, Dukedom of, created 1703, in favour of John Murray, second Marquess, who was loyal to the crown, though he opposed the union of England and Scotland; captured Rob Roy 1717. (1680-1724). John, third Duke, sold sovereignty of Man to the crown. (1729-1774). John James Hugh Henry, seventh Duke, changed his surname to Stewart-Murray. (1840-1917). John George, his son, served S. African and Great Wars. (1871-); his duchess, Katherine Marjory, daughter of Sir J. H. Ramsay, Bart., was Parliamentary Secretary to Board of Education 1924-1929.

Athos, Mount, or Monte Santo, a mountain over 6,000 ft. high at the southern extremity of the most northerly peninsula of Chalcidice in Greece, covered with monasteries, inhabited exclusively by monks of the Greek Church, and rich in curious manuscripts.

Athy, a town of Kildare, Ireland (Eire), at the junction of the Barrow R. and the Grand Canal. Pop. 3,500.

Atkinson, Sir Henry, a distinguished born in England, emigrated 1855. Played a prominent part in the Waikato War, was Minister of Defence 1864-1865, three times Prime Minister of New Zealand. (1831-1892).

Atlanta, the largest city and capital of Georgia, U.S.A.; a large manufacturing and railway centre; is a university town. Pop. 270,000.

Atlantes, figures of men used in architecture instead of pillars.

Atlantic, one of the great oceans of the globe, separating the Old World and the New; covers nearly one-fifth of the surface of the earth; length 9,000 m., its average breadth 2,700 m.; its average depth 15,000 ft., or from 3 to 5 m. with waves in consequence at times of great height and volume. In the middle there is a ridge rising to less than 6,000 ft. deep, on which the Atlantic cables are laid.

Atlantic City, city and popular seaside resort of New Jersey, U.S.A. On a sandy island, it has fine beaches, a promenade 8 m. long and an area. Pop. 66,000.

ATLANTES

Atlantic Records: First crossing by sailing-boat by Columbus in 1492, who reached Guanahani in 70 days. The first crossing by steam-boat was made by the *Sirius* in 1838 in 19 days, though the *Great Western* was the first built for a regular transatlantic service and was only beaten by a matter of hours on the first crossing. Fastest steamship crossing, by the *Normandie* (August 1937), was 3 days 23 hrs. 2 mins. First aeroplane crossing W. to E. by Sir John Alcock and Sir A. W. Brown in a Vickers-Vimy biplane, Newfoundland to Ireland, 1,890 m., in 16 hrs. First solo aeroplane crossing by Charles Lindbergh in 1927. First E. to W. flight by Baron Hunefeldt, Capt. Koehl and Capt. Fitzmaurice, 1928. First airship flight, by British *R34*, in 4½ days from Scotland to New York.

Atlantis, an island alleged by tradition of the Pillars of Hercules; Plato has given a beautiful picture of this island and an account of its fabulous history. The *New Atlantis*, a Utopia figured as existing somewhere in the Atlantic, which Lord Bacon began to outline but never finished.

Atlantosaurus, a fossil reptile, recently found in N. American strata. Its length was nearly 120 ft.

Atlas, a Titan who, for his audacity in attempting to dethrone Zeus, was doomed to bear the heavens on his shoulders; although another account makes him a king of Mauritania whom Perseus, for his want of hospitality, changed into a mountain by exposing to view the head of the Medusa.

Atlas Mountains, a range in NW. Africa, the highest point Tizi-n-Tamjurt (14,500 ft.); the Greater in Morocco, the Lesser extending through Algeria and Tunis, and the whole system stretching from Cape Nun, in Morocco, to Cape Bon, in Tunis.

Atmosphere, the gaseous envelope earth and becomes less and less dense as the distance from the earth increases. Its maximum thickness is not known with accuracy, but is estimated at about 300 m. The lower region, up to a height of about 6 m. or 10 km., is called the troposphere, while the upper region forms the stratosphere. The Aurora Borealis occurs in the stratosphere, which also contains a layer of ozone; the latter may be identical with the Heaviside layer of ionised gas which reflects wireless waves back to the earth.

Owing to its very tenuous character, the stratosphere offers very little resistance to objects passing through it, so that when flight in it becomes more easily possible, aeroplanes may be expected to attain enormous speeds. Ascents into the stratosphere have been made by Professor Piccard, Capt. Stevens and Anderson, and others, a maximum height of over 14 m. having been reached.

See Air.

Atoll, the Polynesian name given to a coral island consisting of a ring of coral enclosing a lagoon; common in the Indian and Pacific oceans.

ATOLL

Atom and Atomic Theory.

That matter is not continuous but discrete was suggested in classical times by Democritus, Leucippus, Epicurus, and Lucretius; Aristotle, however, opposed the suggestion, and such was his authority that atomism was little heard of for nearly two thousand years.

In the 17th Century A.D. Sir Isaac Newton used the hypothesis that matter is composed of hard, indivisible atoms to explain certain scientific phenomena, but the modern atomic theory is primarily due to John Dalton (1766-1844), who first showed how such a theory could be subjected to experimental tests. Dalton assumed that each element had its own peculiar type of atom, different from the atoms of all other elements; that atoms were indivisible, indestructible, and uncreatable; and that when atoms of elements combined to form molecules of compounds, they did so in small whole numbers. The theory met with little favour until Davy declared himself convinced.

Dalton represented atoms by circles suitably shaded, or distinguished in other ways, to differentiate those of one element from those of another, but this system was too clumsy, and was soon replaced by that of Berzelius, according to which the atom of an element is represented by the initial letter, or by the initial and another characteristic letter, of the Latin or latinised name of the element; thus H represents one atom of hydrogen, He one atom of helium, and Hg one atom of mercury (hydrargyrum).

Until the closing years of the 19th Century, Dalton's theory held almost undisputed sway. The work of Sir J. J. Thomson, however, on the passage of electricity through gases, the discovery of the cathode and Röntgen (X) rays, and the work of the Curies upon radioactivity, proved that atoms were composed of electric charges; and Lord Rutherford drew a picture of an atom as a miniature solar system, in which the sun is represented as a minute but heavy, positively-charged nucleus, around which revolve one or more planets in the shape of particles of negative electricity or electrons.

The simplest atom—that of hydrogen—consists of a nucleus of one proton, or particle of positive electricity, round which revolves one electron. More complex atoms have nuclei consisting of both protons and electrons, as well as of neutrons (particles consisting of equal charges of positive and negative electricity, and therefore without apparent charge), but the nuclei always have a resultant positive charge. Round these nuclei revolve a number of electrons equal to the number of units of resultant positive charge upon the nuclei; this number is known as the atomic number of the element.

Radioactive atoms spontaneously disintegrate, thus forming atoms of other elements; radium, for example, finally leaves a residue of lead. Artificial decomposition of atoms has recently been effected, and so the alchemists' dream of the transmutation of the elements has at length been accomplished. It has also been shown that atoms may be destroyed, or rather converted into energy. There seems to be no reason to doubt the possibility of the converse operation, viz., the synthesis of atoms from energy.

Atonement, a term common in the Old Testament for expiation of a sin by punishment or reparation so as to reconcile the sinner with God. Theologians differ widely as to the correct interpretation of the term.

Atonement, *Day of*, or the Great *Day of Atonement*, in the Mosaic law, was on the tenth day of the seventh month (see Levit. xxiii)—this being September or October. It is the last day of the Jewish year.

Atrides, a son of Pelops and King of Mycenae, who, to avenge a wrong done him by his brother Thyestes, killed the latter's two sons and served them up in a banquet to him, for which act, as tradition shows, his descendants had to pay heavy penalties.

Atrides, descendants of Atræus, particularly Agamemnon and Menelaus, a family frequently referred to as capable of and doomed to perpetrate the most atrocious crimes.

Atrium, the chief room in the villa of the ancient Romans. Also meant a public building and later was synonymous with "porch."

Atropa, a genus of two plants of the order Solanaceae. *A. belladonna* (deadly nightshade) is the source of atropine, and leaves, fruit and flower are all highly poisonous.

Atrophy, a wasting of the flesh due to some interference with the nutritive processes. It may arise from a number of causes, including disuse, pressure, interference with the supply system, or organic disease. In old age the whole frame, except the heart, undergoes atrophic change.

Atropine, an alkaloid found in deadly nightshade. The sulphate is used for ophthalmic cases.

Atropos, one of the three Fates, the one who cut asunder the thread of life; one of her sisters, Clotho, appointed to spin the thread, and the other, Lachesis, to direct it.

Attaché, a diplomatic officer attached to the staff of a commanding officer, or an embassy or legation, and sometimes travelling with an ambassador, whose duty it is to report on the naval and military organisation of the country they visit.

Attachment, in English law a taking of the person, goods, or estate by virtue of a writ or precept. It differs from arrest by proceeding out of a higher court, whereas arrest proceeds only out of an inferior court. Attachment applies to a man's goods (though not to his lands) as well as to his person, and, unlike an arrested person, the person attached is held until the day assigned, and not brought before court at once. Foreign attachment is the obtaining of the security or goods of a debtor in the hands of a third person.

Attainder, a consequence attached to death upon a criminal, or outlawry for a capital offence. The chief consequences were forfeiture of real and personal estate and loss of privileges as a freeman. The last bill of attainder was brought in 1820 against Queen Caroline.

Atterbury, Francis, Bishop of Rochester and controversialist, said to have inspired Sacheverell's defence. A Jacobite in sympathy, he was arrested for plotting with the Pretender to proclaim him King and exiled. (1662-1732).

Attestation, the act of bearing witness to any document by appending one's signature to it; also the act of witnessing any opinion or statement in a less formal manner; most important documents, like deeds and wills, require attestation; in Scotland all deeds and in England all wills must be attested by two witnesses. In a narrower sense the word is associated with attestation by a recruit under the Derby Scheme of Enlistment 1915-1916 prior to the introduction of conscription.

Attica, a country in ancient Greece, on the NE. of the Peloponnese, within an area not larger than that of Lanarkshire, which has nevertheless had a history of world-wide fame and importance.

Atticism, a pure and refined style of expression in any language, originally the purest and most refined style of the ancient literature of Greece.

Atticus, Titus Pomponius, a wealthy Roman and friend of Cicero, devoted to study and the society of friends, took no part in politics, died of voluntary starvation rather than endure the torture of a painful and incurable disease. (109-32 B.C.).

Attila, or Etzel, the King of the Huns, called "the Scourge of God," from the terror he everywhere inspired; overran the Roman Empire at the time of its decline, vanquishing the emperors of both East and West, extorting heavy tribute; led his forces into Germany and Gaul, was defeated in a great battle near Châlons-sur-Marne by the combined armies of the Romans under Aëtius and the Visigoths under Theodoric, retreated across the Alps and ravaged the N. of Italy; died of hemorrhage on the day of his marriage, and was buried in a gold coffin containing immense treasures in 453, the slaves who dug the grave having been killed, it is said, lest they should reveal the spot.

Attleborough, a market town, in Norfolk, England, 16 m. SW. of Norwich by rail; formerly the site of a 14th-Century college of the Holy Cross. Pop. 2,608.

Attlee, Rt. Hon. Clement Richard, leader of British Labour Party since 1935. Educated Haileybury and Oxford. Barrister, 1905. Member of Fabian Society since 1908. Secretary, Toynbee Hall, 1910. Tutor and lecturer in social science, London School of Economics, 1913-1923. Served in S. Lancashire Regiment and Tank Corps—Gallipoli, Mesopotamia, France; retired as major, 1919. Mayor of Stepney, 1918-1920; alderman 1919-1927. M.P. Limehouse division of Stepney, since 1922. Under-Secretary for War, 1924; Chancellor, Duchy of Lancaster, 1930-1931; Postmaster-General, 1931; P.C., 1935. (1883-)

Attock, a town and fortress in the Punjab, on the Indus where the Kabul joins it, and standing on the road through the Khyber Pass to Afghanistan, along which Alexander the Great, Tamerlane, and other invading leaders must have marched.

Attorney, one acting as a substitute for another to manage his affairs, under a Power of Attorney. The term applies generally also to those legally qualified to conduct law proceedings for their clients, and is synonymous with solicitor. By an act of 1873 laws governing attorneys and solicitors were consolidated and unqualified persons were prevented from practising. See **Solicitor**.

Attorney-General, The, with General, a law officer of the Crown, giving advice to the Government and leading for the Crown in important criminal cases and in civil cases concerning the public revenue. He is always to-day a member of Parliament and holds Cabinet rank (with a salary of £4,500 a year which is considerably increased by fees), the first Attorney-General to be admitted a member of the Cabinet having been Sir Rufus Isaacs (later Earl Reading).

Attraction, the force which draws together bodies or particles of a body. 1. *Cohesion* or molecular attraction fixes the state of a body. If the molecules rigidly cohere, the state is *solid*; if they separate readily, *fluid*; if they tend to diffuse, *gaseous*. 2. *Adhesion* is the attraction of molecules of different substances brought into close contact. 3. *Capillary attraction* occurs when water rises up the sides of a glass rod dipped into it, or when oil rises up wick. 4. *Electrical attraction* occurs when bodies electrified positively attract those electrified negatively. 5. *Magnetic attraction* is that property which enables certain ferruginous ores to attract iron, etc. See **Magnetism**. 6. *Gravitation* (q.v.) is that law of attraction which operates when bodies "fall" to the earth, a law which applies, according to Newton, to the heavenly bodies. Researches begun by Faraday and continued by leading scientists on the subject of dielectrics go to show that attraction may act through the medium between two distant bodies.

Atwood, George, a mathematician, invented a machine for illustrating the law of uniformly accelerated motion, as in falling bodies. (1746-1807).

Atys, a beautiful Phrygian youth, beloved by Cybele, who turned him into a pine, after, by her apparition at his marriage to forbid the bans, she had driven him mad.

Aube, a dept. in France, formed of Burgundy, with Troyes for cap. Pop. 243,000.

Auber, Daniel François Esprit, a popular French composer of operas, born at Caen; his operas included *La Muette de Portici*, *Le Domino Noir*, and *Fra Diavolo*. (1782-1871).

Aubergine, or Egg Plant, a plant (S. *Melongena*) of the Solanaceae family, so named because its fruit is shaped like an egg, is a kind of peach, and is cultivated in France and Italy, being eaten as a vegetable. Its foliage is cultivated for covering walls and trellis.

AUBERGINE

Aubers, a village in the dept. du Nord, France, about 10 m. from Lille, at the foot of the Aubers Ridge. These low hills were in the possession of the Germans during the Great War. They were unsuccessfully attacked by the Allies in March 1915. Their capture would have threatened the German hold on Lille.

Aubrey, John, an eminent antiquary, a friend of Anthony Wood; inherited estates in Wilts., Hereford, and Wales, all of which he lost by law-suits and bad management; left a vast number of MSS.; published one work *Miscellanies*, being a collection of popular superstitions; preserved a good deal of the gossip of the period. (1626-1697).

Aubrietia, a genus of plants of the order Cruciferae, mostly native of the Alps and Mediterranean regions, but cultivated in England as rock-plants.

Auburn, (1) a suburb of Sydney, New South Wales, Australia. (2) a manufacturing town of Cayuga Co., New York, U.S.A. The State prison is here. Pop. 36,000. (3) A town in Androscoggin Co., Maine, U.S.A. Bootmaking is the chief industry. Pop. 19,000. (4) A village of Co. Westmeath, Ireland. Formerly Lissoy. It has taken the name Goldsmith gave it in *The Deserted Village*.

Aubusson, Pierre d', grand-master of the Knights of St. John of Jerusalem, of French descent, who in 1480 gallantly defended Rhodes when besieged by the Turks, and drove the assailants back. (1423-1503).

Auch, capital of the dept. of Gers, France, 14 m. W. of Toulouse, with one of the finest Gothic cathedrals in France, perched on a hill, and accessible only by a flight of 200 steps; has a trade in wine and brandy and cotton and woollen manufactures. Pop. 9,000.

Auchinleck, a village of Ayrshire, Scotland, 15 m. E. of Ayr, with the mansion of the Boswell family. Pop. 3,400.

Auchterarder, a small town in Perthshire, Scotland, where the forcing of a presentee by a patron on an unwilling congregation led to the disruption of the community and the creation of the Free Church in 1843. Pop. 2,250.

Auckland, the largest town in New Zealand, in the N. island, with an excellent harbour in the Gulf of Hauraki, and the capital of a large province of the name, 400 m. long, and 200 m. broad,

with a fertile soil and a fine climate, rich in natural products of all kinds. Was the capital of New Zealand till the seat of government was transferred to Wellington. Has a University and many fine buildings, extensive docks, etc. Has a considerable shipping trade, sawmills, glassworks, shipyards, and sugar refineries. Pop. (prov.) 517,000; (town) 221,000.

Auckland Islands, a group of small islands 180 m. S. of New Zealand, with some good harbours and whale fisheries. Uninhabited.

Auction, a method of public sale whereby the object for sale is secured by the maker of the highest offer. Sale by auction was used by the Romans for the disposal of military spoils. Assent of the buyer is given by his bidding, while assent of the seller is signified by the fall of the auctioneer's hammer, and until this declaration the bidder may withdraw his offer.

Auction Bridge, a card game for ranged in two pairs of partners. The whole pack is dealt round, the dealer being the first to bid. A game consists of 30 points, scored by tricks below the line. Only the tricks above six are counted towards the score, 6 points being allowed for each trick above six in clubs when clubs are trumps, 7 in diamonds, 8 in hearts, 9 in spades, and 10 in no-trumps.

A player may make an opening bid of any number of tricks, but any succeeding call must be higher—e.g., one diamond takes precedence over one club, one heart over one diamond, and so on, but, e.g., two hearts can only be beaten by two spades or two no-trumps, or by three clubs or three diamonds. A player may pass or may increase his partner's bid. He may double his opponent's bid, thus doubling the penalties if his opponent loses and the score if he wins.

The highest bid determines the Trump suit, and the highest bidder plays his own and his partner's hand, which is laid down on the table. The tricks are taken as in whist. Rubber is gained by a win of two games out of three, and for rubber 250 points are scored above the line. Other scores above the line are honours, according to the court cards and aces in each hand. For every trick below the number contracted, the opponents score 50 points above the line. Grand slam (all tricks) scores 100 points, and Little slam (all but one trick) 50.

Aucuba himalaica

Aucuba, a genus of three species of shrubs of the Cornaceae (dogwood) family, one of which (*A. japonica*) is cultivated in England as a garden plant.

Aude, a maritime dept. in the S. of France, being a portion of Languedoc; yields cereals, wine, etc., and is rich in minerals. Pop. 296,000.

Audenshaw, a town of Lancashire, England, 5 m. E. of Manchester by rail. Manufactures include hats, hosiery, and there are cotton mills and engineering works. Pop. 8,460.

Audiphone, a fan-shaped plate of vulcanite which is sensitive to sound-waves. Fitted against the front teeth, the plate conveys sounds to the auditory nerve without passing through the external ear, thus enabling the deaf to hear.

Audit and Auditor, the examination of the accounts of the State, public bodies, companies, or private persons, in cases of importance by an accountant who is appointed as auditor, and who issues a certificate to the

effect that the accounts he examines are properly kept. The duties of auditors are laid down in the Companies Act of 1900. A limited liability company is compelled to furnish a properly audited balance-sheet annually.

The Exchequer and Audit department of the Civil Service is administered by the Comptroller and Auditor-General. He is appointed by Letters Patent under the Great Seal. He authorises all issues from the exchequer after Parliamentary authority has been obtained. He examines exchequer accounts, and issues an annual report. He is also Auditor-General of Public Accounts, the receipt of public revenue and accounts of Government stores and trading services.

Local government accounts are audited by auditors appointed by the Ministry of Health, formerly the Local Government Board.

Audley, urban district of Staffordshire, England, 4m. from Newcastle-under-Lyme. Coal is mined. Pop. 14,000.

Audley, Thomas, Lord, born in Essex, son of a yeoman; became Speaker of the House of Commons and Lord Chancellor of England; selfish, unscrupulous tool of Henry VIII. (1488-1544).

Audran, Edmond, French musical composer; wrote *La Cigale*, *La Poupée*, and many other light operas. (1842-1901).

Audubon, John James, a celebrated French Huguenot origin; author of two great works, the *Birds of America* and the *Quadrupeds of North America*, written and illustrated by himself, the former characterised by Cuvier as "the most magnificent monument that Art had raised to Nature." (1780-1851).

Auerbach, Berthold, a German poet, born in the Black Forest; his novels are in the main of a somewhat philosophical bent, he having been early led to the study of Spinoza, and having edited the latter's works early in his literary career; his *Village Tales of the Black Forest* were widely popular. (1812-1882).

Augeas, a legendary king of Elis, in Greece, and one of the Argonauts; had a stable with 3,000 oxen, that had not been cleaned out for 30 years, but was cleaned by Hercules turning the rivers Peneus and Alpheus through it; the act a symbol of the worthless lumber a reformer must sweep away before his work can begin.

Augereau, Pierre François Charles, Duke of Castiglione, born at Paris; distinguished in the campaigns of the Republic and Napoleon; executed the *coup d'état* of Sept. 4, 1797; his services were rejected by Napoleon on his return from Elba, on account of his having supported the Bourbons during his absence. (1757-1816).

Augite, a mineral, green, brown, or black in colour, of the pyroxene group; found in volcanic rocks.

Augsburg, a busy manufacturing and trading town, in Bavaria, once a city of great importance, where in 1530 the Protestants presented their Confession to Charles V., and where the peace of Augsburg was signed in 1555, ensuring religious freedom. Pop. 177,000.

Augsburg Confession, a document drawn up by Melancthon in the name of the Lutheran reformers, in statement of their own doctrines and of the doctrines of the Church of Rome against which they made their protest; presented to the Emperor Charles V. in 1530 at the Diet of Augsburg.

Augurs, a college of priests in Rome appointed to forecast the future and decide the will of the gods by observing the omens.

August, originally called Sextilis, as the sixth month of the Roman year, which began in March, and named August in honour of Augustus, as being the month identified with memorable events in his career.

Augusta, (1) a prosperous town in Savannah, Georgia, U.S.A., on the Savannah, 231 m. from its mouth. Is one of the largest cotton-market towns in the U.S.A., and has a U.S.A. arsenal. Pop. 60,000. (2) A town, the capital of Maine, U.S.A., with some manufactures. Pop. 17,000. (3) A seaport of Sicily, N. of Syracuse, devastated by an earthquake in 1693. The harbour, which is used for naval purposes, is fortified. Pop. 17,000.

Augustan Age, a period in the history of Rome during the reign of Emperor Augustus when national achievement reached its climax, especially in literature. Ovid, Livy, Horace, Virgil, and Catullus were living and writing at this time. The term has been used to refer to similar ages of cultural greatness in other countries.

Augustine, or **Austin**, St., the apostle with a few monks by Pope Gregory I. in 596 to convert the country to Christianity; began his labours in Kent; founded the archbishopric of Canterbury; d. 605.

Augustine, St., the Bishop of Hippo, and the greatest of the Latin Fathers of the Church; a native of Tagaste, in Numidia; son of a pagan father and a Christian mother, St. Monica; was converted to Christ by a text of St. Paul (Rom. xiii. 13, 14). He became bishop in 395, devoted himself to pastoral duties, and took an active part in the Church controversies of his age, opposing especially the Manicheans, the Donatists, and the Pelagians; his principal works are his *Confessions*, his *City of God* and his treatises on Grace and Free-Will. No Churchman has exercised greater influence in moulding the creed as well as directing the destiny of the Christian Church. He was especially imbued with the theology of St. Paul. (354-430).

Augustinians, (a) Canons, called also Black Cenobites, following the so-called "Rule of St. Augustine," had 200 houses in England and Wales at the Reformation; (b) the Augustinian or Austin Friars or Hermits, also known as the Black Friars, mendicant, a portion of them barfooted; the street Austin Friars in London commemorates the site of their house.

Augustus, called at first Gaius Octavius, ultimately Gaius Julius Caesar Octavianus, the first of the Roman Emperors or Cæsars, grand-nephew of Julius Caesar, and his heir; at Mantua helped to defeat and drive Antony out of Italy; became consul, formed one of a triumvirate with Antony and Lepidus; together with Antony overthrew the Republican party under Brutus and Cassius at Philippi; defeated Antony and Cleopatra at Actium, and became master of the Roman world; was voted the title of "Augustus" by the Senate in 27 B.C.; proved a wise and beneficent ruler, and patronised the arts and letters, his reign forming a distinguished epoch in the history of the ancient literature of Rome. (63 B.C.-A.D. 14).

Augustus II., Elector of Saxony and himself on Poland; was defeated by Charles XII. of Sweden at the Battle of Clissow (1702) and deposed; recovered the throne in 1709; is known to history as "The Strong"; among his many illegitimate children was the famous Marshal Saxe. (1670-1733).

Augustus III., son of the preceding; beat Stanislaus Leszczyński in the struggle for the crown of Poland;

lost Saxony to Frederick the Great during the Seven Years War, but recovered it in 1763. Showed great interest in painting and music. (1696-1763).

Auk, the common name of all birds of the family Alcidae, including the Auks, Guillemots, Puffins, Razor-bills (q.v.), which breed on and are common round the rocky coasts of Northern countries, and are for the most part black and white in colouring. The little Auk (*Alle Alle*) is a winter visitor to England. All birds in this family have short wings and webbed feet on heavy bodies. The Great Auk or Garg-fowl (*Platanus* or *Alca impennis*), now extinct, had such small wings as to be incapable of flight, and was finally exterminated in 1844. Eggs of the Great Auk are now very valuable.

GREAT AUK

Aulic Council, the Holy Roman Empire, from which there was no appeal, established by Maximilian I. in 1497; it had no constitution, dealt with judicial matters, and lived and died with the emperors.

Aulis, a port in Boeotia, where the fleet of the Greeks assembled before taking sail for Troy, and where Iphigenia, to procure a favourable wind, was sacrificed by her father Agamemnon, an event commemorated in the *Iphigenia in Aulis* of Euripides.

Aumale, Duc d', fifth son of Louis Philippe, distinguished himself in Algiers, but resigned the governorship when his father abdicated; lived in England for twenty years after, and left his estate and valuables to the French nation. (1822-1897).

Aurangabad, a city in Hyderabad, India; once the capital, now much decayed, with the ruins of a palace of Aurangzeb.

Aurelianus, Lucius Domitius, powerful Roman emperor; son of a peasant of Pan-nonia; distinguished as a skilful and successful general; was elected emperor 270; drove the barbarians out of Italy; vanquished Zenobia, queen of Palmyra, carrying her captive to Rome; subdued a usurper in Gaul, and while on his way to crush a rebellion in Persia was assassinated by his troops. (212-275).

Aurelius. See **Marcus Aurelius**.

Aureole, in Christian art a cloud of the entire figure of saints and martyrs. Properly the nimbus encircles the brows only.

Auricle, the name of (1) the two parts of the heart, viz., the left auricle which receives the arterial blood from the lungs, and the right auricle which receives the venous blood from the body; (2) the flap or pinna of the ear.

Auricula (*Primula auricula*), a plant of the primula order (Primulaceae) which includes the primrose, oxlip, cowslip, etc.; found wild abundantly on the Swiss Alps. It has long been cultivated by florists, and many varieties have been raised from seed having little resemblance to the wild plant except in foliage.

Auriga, one of the constellations, to be found between Gemini and Persous. Contains the stars Capella, Beta, and Nova, or the New star which shows considerable variability. This star was discovered in 1891 by Dr. Anderson with the aid of a pocket telescope.

Aurillac, capital of the dept. of Cantal, in France, on the Jordanne, affluent of the Dordogne, built round the famous abbey of St. Geraud, now in ruins. Pop. 16,000.

Aurochs, name given to two species of Bovidae (cattle): (1) *Bos primigenius*, the original wild cattle of Europe, standing as much as 6 ft. high at the shoulder, from which the European domesticated cattle are derived; now extinct; (2) the European Bison, *Bos (Bison) bonasus*, small herds of which still exist in Lithuania.

Aurora, a city in Illinois, U.S.A., 35 m. SW. of Chicago, said to have been the first town to light the streets with electricity. Pop. 46,000.

Aurora, the Roman goddess of the dawn, charged with opening for the sun the gates of the East; had a star on her forehead, and rode in a eosy chariot drawn by four white horses. See *Eos*.

Aurora Borealis, bright luminous beams seen in the night sky in northern latitudes, especially within the Arctic Circle; sometimes visible in the British Isles. It is supposed to be due to electrical disturbances having their origin in the upper atmosphere, but its exact nature is obscure. A similar light seen in southern latitudes is known as Aurora Australis.

Aurungzebe, Mogul emperor of Hindustan, third son of Shah Jehan; ascended the throne by the deposition of his father, the murder of two brothers and of the son of one of these; he governed with skill and courage; extended his empire, and, though fanatical and intolerant, was a patron of letters; his rule was far-shining, but the empire was rotten at the core, and when he died it crumbled to pieces in the hands of his sons, among whom he beforehand divided it. (1618-1707).

Ausonius, Decimus Magnus, a Roman poet, a native of Gaul, born in Bordeaux; tutor to the Emperor Gratian, who, on coming to the throne, made him prefect of Latium and of Gaul and consul of Rome. (310-394).

Austen, Jane, a gifted English novelist, daughter of a clergyman in N. Hampshire; member of a quiet family circle, occupied herself in writing without eye to publication, and only in mature womanhood thought of writing for the press. Her first novel, *Sense and Sensibility*, was published in 1811, and was followed by *Pride and Prejudice*—her masterpiece—*Mansfield Park*, *Emma*, *Northanger Abbey*, and *Persuasion*, her interest being throughout in ordinary, quiet, cultured life and the delineation of it, which she achieved in an inimitably charming manner. (1775-1817).

JANE AUSTEN

Austerlitz, a town in Moravia, near Brün, where Napoleon defeated the emperors of Russia and of Austria, at "the battle of the three emperors," Dec. 2, 1805.

Austin, the capital of Texas, U.S.A., on the Colorado. Founded 1838; its original name was Waterloo, but was changed in 1839 when Texas won its independence in honour of Stephen Austin, who was largely instrumental in achieving it. Pop. 63,000.

Austin, Alfred, poet-laureate, appointed Tennyson, born near Leeds, bred for the bar,

but devoted to literature as journalist, writer and poet; wrote *The Season*, *The Human Tragedy*, *Savonarola*, *English Lyrics*, and several works in prose. (1835-1913).

Austin, Henry Wilfred, "Bunny Austin," English lawn-tennis player. Won junior championships, Great Britain, 1922-1925. Captained his university and represented Great Britain in matches, Dominions and U.S.A., 1928. In Inter-Zone Final; in 1931 defeated S. B. Wood and F. X. Shields; in 1933, E. Vines (U.S.A.), who had beaten him 1932. Greatest British tennis stylist. (1906-).

Austin, Sir Herbert, First Baron; chairman Austin Motor Co., Ltd., born at Little Missenden, Bucks. Manager Wolseley Tool and Motor Car Co., Ltd., Birmingham, 1900-1905. Began own manufacture of motor-cars, Longbridge Works, Northfield, Birmingham, 1905, and became one of the largest manufacturers of motor-cars in the country with his "Austin" cars. K.B.E. 1917; Unionist M.P., King's Norton Division of Birmingham, 1919-1924. Ennobled, 1936. (1860-).

Austin, John, a distinguished English jurist, professor of Jurisprudence in London University; mastered the science of law by the study of it in Germany, but being too profound in his philosophy, was unsuccessful as professor. His great work was his *Province of Jurisprudence Determined*. (1790-1859).

Austin Friars. See *Augustinians*.

Australasia (*i.e.*, Southern Asia), a popular name given chiefly to Australia, New Zealand, and the islands adjoining, but sometimes employed to include the Malay Archipelago, the Philippines, and the Pacific Is.

Australia, a continent entirely within the Southern Hemisphere, about one-fourth smaller than Europe, its utmost length from E. to W. being 2,400 m. and breadth 1,971; the coast has singularly few inlets, though many and spacious harbours, only one great gulf—Carpentaria—on the N. and one bight—the Great Australian Bight—on the S.

The interior consists of a low desert plateau, depressed in the centre, bordered with ranges of various elevation, between which and the sea is a varying breadth of coastland; the chief mountain range is in the E., and extends more or less parallel all the way with the E. coast; the rivers are few, and either in flood or dried up, for the climate is very parching. Only one river—the Murray, 2,345 m. long—of any consequence, while the lakes, which are numerous, are shallow, and nearly all salt.

The flora is peculiar, the eucalyptus and the acacia the most characteristic, grains, fruits, and edible roots being all imported; the fauna is no less peculiar, including, in the absence of many animals of other countries, the kangaroo, the dingo, and the duck-bill, the useful animals being all imported; of birds, the cassowary and the emu, and smaller ones of great beauty, but songless; reptiles are numerous.

The aborigines, of many tribes, of primitive habits, and a low order of intelligence, are disappearing. The territory is divided into Victoria, New South Wales, Queensland, S. Australia, W. Australia, and the Northern Territory (N. and Central Australia), which, with Tasmania, federated in 1901 and became the Commonwealth. The capital is Canberra.

The climate is warm, temperate to tropical, and rainfall is, on the whole, sparse. Inland areas are waterless. A large area in tropical Australia has monsoon winds, is warm and dry in winter and hot and wet in summer, producing tropical forests near the coast and

savannah grasslands. The Southern strip has winter rains with a Mediterranean climate.

Production and Industries. The industries of Australia are pastoral, agricultural, mining, manufacturing, and lumbering. The pastoral industries are the most important, wool forming half the value of the exports. Sheep are grazed mostly in dry grass country inland, while cattle are numerous on the hillside and coastal plains.

In agriculture, wheat is the chief product, and much fruit is grown, especially in the S., where the hillside are favourable for the culture of grapes producing wine. Currants and raisins are grown in irrigated districts of the Murray basin and at Mildura.

Goldfields in Central Victoria, Western Australia, and New South Wales caused the establishment of towns like Ballarat, Bendigo and Bathurst, Kalgoorlie and Coolgardie. Production in 1937 amounted to 1,380,000 fine oz. Other minerals include copper in S. Australia and New South Wales; silver, lead, and zinc at Broken Hill, New South Wales; a very rich coal-field is worked in New South Wales at Newcastle (now the second largest town in New South Wales).

Manufactured articles include iron and steel goods, leather articles, woollen textiles, soap, and furniture. Little is exported. Timber-cutting yields special woods including hardwoods for railway-sleepers and road-paving. Railways link Perth, Fremantle, Kalgoorlie, Adelaide, Melbourne, Sydney, Brisbane, and Townsville in Queensland, while railways run inland from the principal towns to serve agricultural and mining transport needs.

An overland telegraph line from Port Darwin in the N. to Adelaide in the S. was completed in 1872. Air mail and passenger services connect the larger towns. Sydney is the centre of Australian commerce and the greatest port of the S. Pacific Ocean. Pop. 6,883,000 white and some 55,000 aborigines.

Australia Day, Jan. 26, the anniversary of the foundation of Sydney, New South Wales, in 1788 by Capt. Arthur Phillip.

Australia House, Strand, London, erected 1911-

1914 by the Commonwealth of Australia as offices of the High Commissioner and Agents-General for Victoria and Tasmania and opened in 1918.

Australian

Alps, a range of mountains in the W. of Victoria and S. of New South Wales, a continuation of the Great Dividing Range. The highest point is Mt. Kosciuszko (7,330 ft.).

Austria, formerly a Federal State in Central Europe with an area of 32,000 sq. m. and a population of 6,700,000, and bounded on the N. by Germany and Czechoslovakia, on the S. by Italy and Yugoslavia, on the W. by Switzerland, and on the E. by Hungary, now incorporated with Germany in Greater Germany.

It is an Alpine region. Agriculture is the leading industry. Wheat, rye, barley, oats, maize, and potatoes grow in the lowlands. Cattle are reared and horses, goats, pigs, and sheep. In the alpine districts dairy and poultry-farming are the chief industries, while forests provide valuable pinewoods.

The minerals include gold in the Hohe Tauern, lignite, anthracite, and iron ore (in considerable quantities), lead, zinc, salt, upper, graphite, and sulphur. Water-power

is an aid to industry. Manufactures include textiles, leather goods, cellulose, paper and wood pulp, and rubber goods, besides luxury articles, toys, and wood carvings. Railways (mostly State-owned) are being electrified, as the mountainous conditions consume large quantities of coal.

Until 1918 it formed part of Austria-Hungary. On the collapse of the Central Powers in 1918, the Hungarians, Czechs, Poles, Yugoslavs, and Rumanians previously incorporated in the "Dual Monarchy" seceded, and the Republic of Austria was proclaimed on Nov. 12, 1918. Its boundaries were defined by the Treaty of St. Germain, and the constitution by which it became a federation of nine provinces (including Vienna) was fixed in 1920. From 1923 onwards there was constant friction between the Socialists and anti-Socialists, resulting in serious rioting in July 1927 and in Civil War in 1934, during which the Karl Marx buildings in Vienna were shelled and the Socialist movement was ruthlessly suppressed.

Austria felt the depression acutely, Vienna ever since the War having been in the position of a capital without a country, and the question of an "anschluss" with Germany was frequently discussed. After the rise of Hitler, however, the democratic forces which had hitherto favoured "anschluss" became irreconcilably opposed to union with Nazi Germany. In July 1934, Dr. Dollfuss, the Chancellor, was assassinated by Nazis. He was succeeded in office by Herr von Schuschnigg. The constitution was changed in 1934, parliamentary government abolished, and the Republic replaced by a Federal State on Fascist lines. On July 11, 1936, an agreement between Germany and Austria was signed in which Germany recognised the sovereignty of the Federal State and Austria declared itself a "German state." The agreement, however, was never implemented, and for some time German wireless propaganda in Austria continued.

In Feb. 1938, Herr Hitler suddenly called Herr von Schuschnigg to Berchtesgaden, and under threat compelled the acceptance of a renewal of the truce of 1936, a condition being that Austrian Nazis should be given representation in the Austrian Cabinet, an amnesty granted to certain political offenders, and other measures taken "designed to improve Austro-German relations." Herr von Schuschnigg stood firm on the question of the sovereignty of Austria, and suddenly announced the holding of a plebiscite to decide the wishes of the people on the question of independence or union with Germany.

Germany immediately moved, and Hitler demanded and secured the resignation of Herr von Schuschnigg, a Nazi nominee, Dr. Seiss-Inquart, taking his place as Chancellor. On March 11, 1938, German troops crossed the frontier. Within 24 hours they had occupied the whole of Austria. *De facto* recognition of this was given by Great Britain and other countries, who reduced the status of their embassies to that of Consulates-General.

Austria-Hungary, an empire, formerly known as the Dual Monarchy, which existed from 1867 to 1918, and consisted of the Austrian Empire, including Bohemia, and the kingdom of Hungary, Croatia-Slavonia, and after 1908, Bosnia-Herzegovina. For nearly 250 years before the union Austria and Hungary had the same sovereign, and after the union, under the Emperor Francis Joseph, each retained its independence and separate constitution, foreign, military and certain financial affairs being administered jointly. At the end of the World War, largely owing to the great diversity of races that made up its population, the Dual Monarchy came to an end. See further **Austria; Hungary**.

AUSTRALIA HOUSE

Auteuil, a village in the dept. of the Seine, now included in Paris.

Authorised Version of The Bible

was executed between the years 1604 and 1610 at the instance of James I., so that it is not undeservedly called King James's Bible, and was the work of 47 men selected with marked fairness and discretion, divided into three groups of two sections each, who held their sittings for three years severally at Westminster, Cambridge, and Oxford, the whole being thereafter revised by a committee of six, who met for nine months in Stationers' Hall, London, and received thirty pounds each, the rest being done for nothing. The result was a translation that at length superseded every other, and that has since woven itself into the affectionate regard of the whole English-speaking people. The men who executed it evidently felt something of the inspiration that breathes in the original, and they have produced a version that will remain to all time a monument of the simplicity, dignity, grace, and melody of the English language; its very style has had a nobly educative effect on the national literature.

Autochthones, the original inhabitants and first possessors of a land, a term applied by the ancient Athenians to themselves, equivalent to our modern word aborigines.

Auto-da-Fé, or Act of Faith, a ceremony held by the court of the Inquisition in Spain, in the Middle Ages, preliminary to the execution of a heretic, in which the condemned, dressed in a hideously fantastic robe, called the San Benito, and a pointed cap, walked in a procession of monks, followed by carts containing coffins with malefactors' bones, to hear a sermon on the true faith, prior to being burned alive.

Autogyro. See *Aeronautics*.

Autolycus, in Greek mythology a son of Hermes (q.v.), and maternal grandfather of Ulysses by his daughter Anticlea; famed for his cunning and robberies; synonym for thief.

Automatic Action, a term used in physiology and psychology for non-reflex actions not the result of conscious will. Sleep-walking is the commonest form of automatic action. *Automatism* is the power of self-movement without external stimulus. The highest form is volition, the function of certain parts of the brain to originate thought apart from the stimulus of sensation.

Automaton, a mechanical contrivance which, when set in motion, reproduces the movements of man or animals. During the Middle Ages Regiomontanus is reputed to have devised an iron fly which returned to his hand after flying round the room. The most remarkable automaton of the 18th Century was a duck which dived, swam, ate, drank, and by a chemical solution in its stomach digested food. In recent years the Slav watch robot has been adopted into English in the same sense as a result of the presentation in London of an English translation of Karel Capek's Hungarian play *R.U.R.* (Rossum's Universal Robots).

Autun, an ancient city in the dept. of Saône-et-Loire, France, on the R. Arroux, believed to be the site of Bibracte, the capital of the Gallic tribe, Aedui, named Augustodunum in the time of Caesar Augustus, of which name the modern Autun is a corruption; has a fine cathedral and is rich in Roman antiquities; manufactures serges, carpets, velvet, etc. Pop. 14,000.

Auvergne, an ancient province of France, embracing the depts. of Puy-de-Dôme, Cantal and part of

Haute-Loire, the highlands of which separate the basin of the Loire from that of the Garonne, and contain a hardy and industrious race of people descended from the Avernii or original inhabitants of Gaul; they speak a strange dialect.

Auxerre, an ancient city of France, capital of the dept. of Yonne; has a fine cathedral in the Flamboyant style; drives a large trade in wine. Pop. 21,000.

Ava, on the Irrawaddy, capital of the Burmese empire from 1364 to 1740 and from 1822 to 1838; now in ruins from an earthquake in 1839.

Avalanche, a mass of snow and ice moving rapidly down a mountain slope. They are very frequent in the Alps, and are sometimes very destructive both to property and life. There are four kinds. *Drift*, or loose snow-avalanches of accumulated snow dislodged by wind; *rolling avalanches*, when a large portion of packed snow rolls down the slope, gathering weight and impetus; *sliding avalanches* when layers of ice during a thaw become detached from the lower slopes; and *ice or glacier avalanches*, caused by pieces of ice breaking from a glacier and crashing down the mountain-side.

Avalon, in the Celtic mythology an island of faerie in the region where the sun sinks to rest at eventide, and the final home of the heroes of chivalry when their day's work was ended on earth; the island-valley of Avilion in Tennyson's *Morte d'Arthur*.

Avars, a tribe of Huns who, driven from their home in the Altai Mts. by the Chinese, invaded the E. of Europe about 553, and committed ravages in it for about three centuries, till they were subdued by Charlemagne and all but exterminated in 827.

Avatar, or Descent, the incarnation of a Hindu deity, and incarnated manifestation of

Avebury, a village in Wiltshire, England, 6 m. W. of Marlborough, in the middle of a so-called Druidical structure consisting of 100 monoliths, the original purpose of which is a matter of surmise.

Avebury, Baron (Sir John Lubbock), the founder of bank holidays. Educated at Eton, he went in for his father's profession of banking in 1848, and became M.P. in 1870 as a Liberal. He sponsored the Bank Holiday Bill in 1871 and the Shop Hours Bill of 1886. He took a keen interest in natural history, was President of the British Association, wrote *The Use of Life* and *The Pleasures of Life*, was Vice-Chancellor of London University, and was raised to the peerage in 1900. (1834-1913).

Avellino, chief town in a province of the same name in Campania, Italy, 59 m. E. of Naples, famous for its trade in hazel-nuts and chestnuts; manufactures paper, macaroni, etc.; has been subject to earthquakes. Pop. 26,000.

Ave Maria, an invocation to the Virgin, so called as forming the first two words of the salutation of the angel in Luke i. 28.

Avens. See *Garni*.

Aventine Hill, one of the seven hills of Rome, the point to which the plebs sullenly retired on their refusal to submit to the patrician oligarchy, and from which they were enticed back by Menenius Agrippa by the well-known fable of the members of the body and the stomach. It was included in Rome by Servius Tullius.

Average, the mean proportion between certain given quantities; it is ascertained by adding all the quantities

together and dividing their sum by the number of the quantities. The more that the extremes vary, the less possible is it to reason out any individual case from a study of the average. But for elucidating general laws, the study of averages is of great value.

Average, General and Particular (in mercantile law), means the apportionment of losses or sacrifices of cargo, etc., incurred by accident or to avoid danger. **General Average** connotes "all loss which arises in consequence of extraordinary sacrifices made, or expenses incurred, for the preservation of the ship and cargo and such loss must be borne proportionately by all who are interested." Ordinary cases of loss which amount to a general average are: jettison of cargo; voluntary stranding to avoid wreck; damage to cargo by scuttling the ship to extinguish fire; repairs rendered necessary by collision. It is the duty of the master to retain cargo until he has been paid the amount due in respect of it for general average. **Particular Average** arises whenever any damage is done to the property of an individual by accident or otherwise, but which is not suffered for the general benefit—e.g., loss of an anchor, damage by water to cargo. Such losses remain where they fall, and no extraordinary compensation is granted in respect of them.

Averaging, on the Stock Exchange, the operation of increasing a speculator's holdings of a particular share or stock at a lower price than he gave for those already bought, with the object of averaging the price of the whole. Also the converse operation of selling more stock or shares when the price is rising against the speculator.

Averescu, Alexander, Rumanian soldier of Staff in war with Bulgaria 1913; in Great War commanded army in Transylvania and later on the Dobruja. In 1917 defended Moldavia until general surrender. President of People's Party. Prime Minister 1920-1921 and 1926-1927. (1858-).

Averno, or **Avernus**, a deep lake in Italy, near Naples, 1½ m. in circumference, occupying the crater of an extinct volcano, at one time surrounded by a dark wood, and conceived, from its gloomy appearance, as well as from the mephitic vapours it exhaled, to be the entrance to the infernal world, and identified with it.

Averroes, an Arabian physician and philosopher, a Moor by birth and a native of Cordova; devoted himself to the study and the exposition of Aristotle, earning for himself the title of the "Commentator." (1126-1198).

Aversa, an Italian town 8 m. from Naples, amid vineyards and orange groves; much resorted to by the Neapolitans. Pop. 24,000.

Aveyron, a mountainous dept. in the S. of France, with excellent pastures, where the Roquefort cheese is produced. Pop. 385,000.

Aviation. See **Aeroplane**; **Aeronautics**; **Airship**; **Aviation**, **Civil**; **Balloon**; etc.

Aviation, **Civil**, commenced in effect pre-war invention and development of the aeroplane were in civilian hands. The War gave a tremendous impetus to flying, and immediately afterwards the establishment of regular services for the transport of mail and passengers was undertaken. Pioneer work by individuals contributed tremendously to the opening up of long-distance services across the Atlantic and to the farthest parts of the empire.

The first regular air-mail and passenger service between London and Paris was established in 1919 by Aircraft Transport

and Travel, using an Alroco "DH" type of plane. The service was extended in 1920 to Brussels and Amsterdam. Imperial Airways was established in 1924, amalgamating four pre-existing companies. To-day there is a network of services covering Great Britain as almost every country in the world, regular services to Australia, India, the Cape, etc., and international services linking all the chief cities of the world.

The chief international Air Lines are Imperial Airways (British), Air France, Deutsche Luft Hansa (German), Pan-American Airways (U.S.A.), K.L.M. (Royal Dutch Air Lines), and Sabina (Belgian).

Avicenna, an illustrious Arabian prince of physicians, a man of immense learning and extensive practice in his art; of authority in philosophy as well as in medicine, his philosophy being of the school of Aristotle with a mixture of Neoplatonism, his *Canon of Medicine* being supreme in medical science for centuries. (980-1037).

Avignon, capital of the dept. of Vaucluse, France; an ancient city still surrounded by the fine 14th-Century wall, and with part of the famous Pont d'Avignon intact; beautifully situated on the left bank of the Rhone, near the confluence of the Durance; was the seat of the Papacy from 1309 to 1377, purchased by Pope Clement V. at that period, and belonged to the Papacy from that time till 1797, when it was appropriated to France; it contains a number of interesting buildings, and carries on a large trade in wine, oil, and fruit; grows and manufactures silk in large quantities. Pop. 57,000.

Avila, a town in Spain, in a province of the name, in S. of Old Castile, 3,000 ft. above the sea-level, with a Gothic cathedral and a Moorish castle; birthplace of St. Theresa. Pop. (prov.) 223,000, (town) 14,000.

Avlona, or **Vlonë**, a port of Valona or Vlonë, in Vlonë prefecture, on an inlet of the Adriatic. Pop. (prefecture) 53,400; (town) 9,000.

Avoca, or **Ovoca**, a short river of Co. Wicklow, Ireland (Eire). Arklow stands at its mouth. Formed by the rivers Avonmore and Avonbeg. Thomas Moore referred to the delightful scenery of the "Sweet Valo" in his *Irish Melodies*.

Avocet, a widely distributed group of birds of the snipe family. They are long-legged wading birds with a curiously curved, up-turned beak. The Common Avocet (*Recurvirostra avocetta*) was formerly common in the fens of Norfolk, but has ceased to breed there, and occurs now only as a visitor. Two species are also found in America, and one, the Handled Avocet, in Australia.

AVOCET

Avogadro, Amadeo, Count, Italian physicist, born at Turin; professor there 1820; formulated "Avogadro's Laws," that equal volumes of different gases at the same temperature and pressure contain each the same number of molecules. (1776-1856).

Avoirdupois Weight. 16 drams = 1 ounce, 16 ounces = 1 pound, 14 pounds = 1 stone, 2 stones (28 lb.) = 1 quarter, 4 quarters = 1 hundredweight (cwt.), 20 cwt. = 1 ton. In the U.S.A. and Canada the "short" ton of 2,000 lb. (100 lb. to the cwt.) is used in the measurement of many commodities.

AVOLA

Avola, a seaport on the E. coast of Sicily, ruined by an earthquake in 1693, rebuilt since; place of export of the Hybla honey; wine and sugar also produced. Pop. 16,500.

Avon, the name of several English rivers, from a Celtic word meaning water. (1) "Shakespeare's" Avon in Warwickshire, rising in Northants and a confluent of the Severn; (2) the Hampshire Avon, rising in Wiltshire and flowing through Salisbury to the English Channel at Christchurch; (3) the Bristol Avon, rising in the Cotswolds and flowing through Bath and Bristol to the mouth of the Severn at Avonmouth.

Avonmouth, growing port, Gloucestershire, England, 6 m. NW. of Bristol. It has extensive docks belonging to the Bristol Corporation.

Avranches, a town in dept. of Manche, Normandy; the place, the spot marked by a stone, where Henry II. received absolution for the murder of Thomas à Becket. Pop. 6,000.

Awe, Loch, in the centre of Argyllshire, over-shadowed by mountains, 23 m. in length, the second in size of Scottish lakes, studded with islands, one with the ruin of a castle; the scenery gloomily picturesque; its surface is 100 ft. above the sea-level.

Awomori, (or Aomor), a town of Honshu (mainland) I., Japan. It stands at the back of a big bay of the same name with fine anchorage at the N. end of the island.

Axholme, Isle of, a tract of land in Lincolnshire, 17 m. long and 5 m. broad; once a forest, then a marsh; drained during the reign of Charles I. and now fertile. Chief town Crowle. Pop. about 5,500.

Axim, a trading settlement on the Gold Coast, Africa, belonging to Britain; belonged to Holland till 1871.

Axis, the imaginary line round which the body rotates, and which passes through imaginary points called poles. The axis of the earth is inclined 23½° from the vertical, relative to its path round the sun, and the consequent inclination causes the seasons. Foucault proved that the earth, and not the stars, moved, from the fact that the axis of a gyroscope (q.v.) is invariable with regard to the stars and varying with regard to the earth. Axis in anatomy means two things: (1) The second vertebra of the neck on which the atlas section revolves, and (2) a short central artery whence arteries diverge. There are two kinds of arterial axes in the body: the abdominal aorta and the two thyroid axes.

Axminster, a town of Devonshire, England, on the R. Axe, E. of Exeter 26 m. by rail. It gave its name to the Axminster carpet, which was first manufactured here, 1755, and was the chief industry. This is now carried on at Wilton, and brushmaking has replaced it in importance. Textiles are also manufactured, and there are corn mills and iron-works. The minster from which Axminster takes its name is believed to have been founded by King Athelstan. Its fair dates from mid-13th Century. Pop. 2,327.

Axolotl, a larval form of the amphibian *Amblystoma* (*A. tigrinum*), common in lakes in Mexico and the Western States of America.

It has external gills, reproduces itself by laying eggs, but in Mexico does not as a rule undergo metamorphosis to become the adult salamander-like *Amblystoma*.

AXOLOTL.

AYUTHIA

Axum, capital of an Ethiopian kingdom in Abyssinia, now in ruins, where Christianity was introduced in the 4th Century, and which as the outpost of Christendom fell early before the Mohammedan power.

Ayacucho, a thriving town in Peru, founded by Pizarro in 1539, where the Peruvians and Colombians achieved their independence of Spain in 1824, and ended the rule of Spain in the S. American continent. It is capital of a mountainous dept. of the same name with a pop. of 303,000. (town) 15,000.

Aye-Aye (*Chiromys madagascariensis*), a small lemur of nocturnal habits found in the woods of Madagascar.

Ayesha, the daughter of Aiyubekr, and favourite wife of Mohammed, whom he married soon after the death of Kadijah; as he was devoted to Mohammed as he was to her, for he died in her arms. "A woman who distinguished herself by all manner of qualities among the Moslems," who is styled by them the "Mother of the Faithful" (see Kadijah). (610-677).

Aylesbury, a borough and market-town in Buckinghamshire, England, centre of a fertile agricultural district in the Vale of Aylesbury; has an extensive industry in dairy-farming and duck-rearing. Pop. 13,000.

Aylesford, a town of Kent, England, on the right bank of the Medway. Near by are remains of a Carmelite friary, cromlechs, and the "Countless Stones." It is the site of the victory of Alfred the Great over the Danes. Pop. 3,644.

Aylesham, a garden suburb village in Kent, England, N. of Dover, and not far from Dover. Planned in 1921, and built since as accommodation for workers in the new collieries opened in the neighbourhood. Pop. about 3,500.

Aymar, the chief native race of Peru and Bolivia, the dominant people of Peru at the time of the Spanish conquest though then subject to the Incas; attained a high degree of civilisation, and number to-day 500,000.

Aymer of Valence, half-brother of Henry III., was illiterate, and knew no English, but was forced into the see of Winchester by Henry. Repudiated the new Constitution at the Parliament of Oxford in 1258, and was forced by the barons to leave the country. (d. 1266).

Aymon, The Count of Dordogne, the father of four sons, Renaud, Guiscard, Alard, and Richard, renowned in the legends of chivalry, and particularly as paladins of Charlemagne.

Ayr, the county town of Ayrshire, at the mouth of a river of the same name, a clean, ancient town, its charter, granted by William the Lion, dating from 1200; well built, with elegant villas in the suburbs, a good harbour and docks for shipping. Pop. 36,700.

Ayrshire, a large and wealthy county in the W. of Scotland, bordered on the W. by the Firth of Clyde, agricultural and pastoral, with a large coal-field and thriving manufactures. Area, 1,132 sq. m. Pop. 285,000.

Aytoun, William Edmondstone, poet and critic, a native of Edinburgh, professor of Rhetoric and belles-lettres in Edinburgh University, author of the *Lays of the Scottish Cavaliers* and part-author with Sir Theodore Martin of the *Bon Gaultier Ballads*. (1813-1865).

Ayuthia (now called Krungkai), a city of Siam, built, largely on piles, on an island in the R. Menam, former capital of Siam; has fine temples and palaces, now largely in ruins. Pop. 50,000.

Azalea, a group of slow-growing shrubs included in the Rhododendron family, belonging to the order Ericaceae, some being evergreen, some deciduous. They flourish on the mountain slopes of Asia and N. America, and are extensively grown in gardens.

Azerbaijan, a Soviet Republic, in Transcaucasia, W. of the Caspian Sea, part of the U.S.S.R., with valuable oil-fields. Pop. 2,900,000. Cap. Baku. Also a province of Armenian Persia, S. of the Il. Aras, with fertile plains, cattle-breeding, and rich in minerals. Principal town, Tahriz. Pop. 2,891,000.

Azimuth, of a heavenly body, the arc of the horizon comprehended between the meridian of the observer and a vertical circle passing through the centre of the body. The azimuth and altitude give the exact position of the body with reference to the horizon.

Azo, an Italian jurist of the 12th Century. He was a professor of civil law at Bologna. His chief work was a methodical exposition of Roman Law, and was accepted

by the courts as the final judgment on difficult points of law.

Azores, (i.e., Hawk Islands), a group of nine volcanic islands in the Atlantic, 800 m. W. of Portugal, and forming a province of it; are in general mountainous; covered with orange groves, of which the chief are at St. Michael's and Fayal; the climate is mild, and good for pulmonary complaints. Cap. Angra on Terceira. Pop. 253,000.

Azov, Sea of, an opening from the Black Sea, very shallow, and gradually silted up with mud from the Don; in winter it is generally ice-bound. Azov is also the name of a town on the Don. Pop. 17,000.

Aztecs, a civilised race of small stature, of reddish-brown skin, lean, and broad-featured, which occupied the Mexican plateau for some centuries before the Spaniards visited it, and founded a powerful empire; they were overthrown by the Spaniards under Cortez in 1520.

Azuay, a fertile province of the Republic of Ecuador. Cap. Cuenca. Area 3,370 sq. m. Pop. 230,000.

Baader, Franz Xaver von, a German logician, born at Munich; a mining engineer by profession, was patronised by the King of Bavaria, and became professor of philosophy and theology in Munich. His philosophy, or theosophy, inspired by the mysticism of Boehme, had great influence on his Roman Catholic contemporaries of Germany. (1765-1841).

Baal (meaning Lord), *pl.* Baalim, the principal male divinity of the Canaanites and Phœnicians, identified with the sun; his crowning attribute, strength; worshipped on hill-tops with sacrifices, incense, and dancing. Baal-worship, being that of the Canaanites, was for a time mixed up with the worship of Jehovah in Israel. The name recurs often in personal and place-names.

Baalbek (i.e., City of Baal, or the Sun), an ancient city of Syria, 35 m. NW. of Damascus; called by the Greeks, Heliopolis; once a place of great size, wealth, and splendour; now a small, insignificant village; conspicuous among its ruins is the Great Temple to Baal, one of the most magnificent remains of the ancient East, covering an area of four acres.

Babbacombe, a Devonshire, England, seaside resort in the borough of Torquay. Near by is Kent's Cavern, in which were found remains of prehistoric man. Pop. 3,000.

Babbage, Charles, a mathematician, born in Devonshire; studied at Cambridge, and professor there from 1828 to 1839; spent much time and money over the invention of a calculating machine; wrote on *The Economy of Manufactures and Machinery*, and an autobiography entitled *Passages from the Life of a Philosopher*. (1791-1871).

Babel, Tower of, described in Genesis xi. 9. Heaven; its workmen were made to speak in confusing languages and the work stopped.

Bab-el-Mandeb (i.e., the Gate of Tears), a strait between Arabia and Africa, forming the entrance to the Red Sea; so called from the strong currents which rush through it, and often cause wreckage to vessels attempting to pass it.

U.E.

Baber (i.e., the tiger), the name by which is known Zehir ed-Din Mohammed, the founder of the Mogul empire in Hindustan; thence invaded India, and became at length master of it in 1526; his dynasty lasted for many centuries. (1483-1530).

Babington, Anthony, an English Catholic gentleman; conspired against Elizabeth on behalf of Mary, Queen of Scots, confessed his guilt and was executed at Tyburn in 1586. (1561-1586).

Babirusa, a mammal of the pig family, found exclusively in Celebes and Burn, in the E. Indies; remarkable for four curved tusks which are elongated growths of the upper canine teeth, these arching backwards towards the forehead.

Babis, a Persian sect founded in 1843 by Mirza Ali Mohammed; their doctrines a mixture of pantheistic with Gnostic and Buddhist beliefs; adverse to polygamy, concubinage, and divorce; insisted on the emancipation of women; suffered persecution, their leader being executed, but the sect has survived in Acre and elsewhere.

Babœuf, François Noel, a violent revolutionary in France, self-styled Gracchus; headed an insurrection against the Directory, "which died in the birth, stifled by the soldiery"; convicted of conspiracy, was guillotined, after attempting to commit suicide. (1764-1797).

Baboon, a genus of

monkey (*Papio*), native to Africa and Arabia. They are characterised by having projecting, naked, dog-like muzzles, powerful teeth, and ugly (often coloured) bare haunches. The species include the mandrill of W. Africa (*P. maimon*) with a blue and vermillion-streaked muzzle, and the drill (*P. leucophaeus*), both of which have short tails. The chacma (*P. porcellus*) of S. Africa, the anubis monkey (*P. anubis*), which was held sacred in ancient Egypt, and the hamadryas (*P. hamadryas*) of Arabia all have medium-length tails.

MANDRILL

Baby-Farming, a system of nursing new-born infants whose parents desired to be rid of the responsibility; previously subject to no supervision and much abused. Under the Infant Life Protection Act of 1897 and the Children Acts persons so receiving infants are subject to supervision.

Babylon, the capital city of Babylonia, one of the richest and most magnificent cities of the East, the gigantic walls and hanging gardens of which were classed among the seven wonders of the world; was taken, according to tradition, by Cyrus in 539 B.C., by diverting out of their channel the waters of the Euphrates, which flowed through it, and by Darius in 519 B.C., through the self-sacrifice of Zopyrus. Our knowledge of the city is derived mainly from Herodotus and Diodorus Siculus. Archaeologists have excavated wall remains near the town of Hillah. The city seems to have been rectangular in form and about 15 m. by 15 m., divided into two parts linked by an immense covered bridge of stone and iron clamps. The gardens of Semiramis and the Temple of Bael were two of the most notable features.

Babylonia, the name given by the Greeks to that country called in the Old Testament Shinar, Babel, and "the land of the Chaldees"; it occupied the rich, fertile plain through which the lower waters of the Euphrates and the Tigris flow, now called Iraq. From very early times it was the seat of a highly developed civilisation introduced by the Sumero-Accadians, who descended on the plain from the mountains in the NW. Semitic tribes subsequently settled among the Accadians and impressed their characteristics on the language and institutions of the country.

The 8th Century B.C. was marked by a fierce struggle with the northern empire of Assyria, in which Babylonia eventually succumbed and became an Assyrian province. Nabopolassar in 625 B.C. asserted his independence, and under his son Nebuchadnezzar Babylonia rose to the zenith of its power. Judah was captive in the country from 599 to 536 B.C. In that year Cyrus conquered it for Persia, and its history became merged with Persia's.

Babylonish Captivity, the name given to the deportation of Jews from Judea to Babylon after the capture of Jerusalem by Nebuchadnezzar, the migration continuing for 70 years, till they were allowed to return to their own land by Cyrus, who had conquered Babylon; those who returned were solely of the tribes of Judah, Benjamin, and Levi.

Baccarat, a gambling game which was introduced into France from Italy and is unlawful in England. There are two forms of the game, *Baccarat à banque* and *Baccarat chemin de fer*.

Bacchanalia, ancient Roman festivals, originally of a loose and riotous character, in honour of Bacchus. They were finally suppressed.

Bacchantes, votaries and priestesses of Bacchus; they wore their hair dishevelled and thrown back and had loose, flowing garments.

Bacchus, son of Zeus and Semele, the god of the vine, and promoter of its culture as well as the civilisation which accompanied it; represented as riding in a car drawn by tame tigers, and carrying a Thyrsus (q.v.); he rendered signal service to Zeus in the war of the gods with the Giants (q.v.). See *Dionysus*.

Bacchylides, a Greek lyric poet, 5th Century B.C., nephew of Simonides and uncle of Aeschylus, a rival of Pindar; only a few fragments of his poems extant.

Bach, Johann Sebastian, one of the greatest of musical composers, born in Eisenach, of a family of Hungarian origin, noted—sixty of them—for musical genius; was in succession a chorister, an organist, a director of concerts, and finally director of music at the School of St. Thomas Leipzig; his works, from their originality and scientific rigour, difficult of execution. (1685-1750).

Bach, Karl Philip Emanuel, third son of the preceding, born at Weimar. Abandoned law for music, and also became a distinguished composer, especially for the clavier. His greatest work was his *Sonaten für Kennr und Liebhaber*. (1714-1788).

Bache, A. Dallas, an American physicist, born at Philadelphia, superintended the United States coast survey. (1806-1867).

Bachelor, a word generally signifying a man who has not been married. It also commonly denotes inferiority of rank, as in knights bachelors who fought under the banner of another, and to newly appointed monks. As unmarried men English bachelors were taxed for five years under an Act of 1694 to meet the cost of the war with France and by present-day legislation their income-tax relief is slighter than that of married men. Italy and Germany impose special taxes on bachelors.

Bachelor of Arts, is one who has passed the first academical examination of a university, and is thus qualified to proceed to the degree of Master, which qualifies to teach. At Oxford and Cambridge bachelors can obtain the latter degree without further examination.

Back, Sir George, Arctic explorer, born at Stockport, entered the navy, was a French captive for five years, associated with Franklin in three polar expeditions, went in search of Sir John Ross in 1833, discovered instead and traced the Great Fish (or Back) R. in 1839. (1796-1878).

Backgammon, a game for two players on a board of alternate white and black point design. The board is in two parts, each end of each part having 6 points. One player has 15 white men, the other 15 black. A throw of dice indicates points which must be travelled. The direction of White's moving is from Black's right to Black's left, thence to White's right, and finally to White's left. Black's course is the reverse.

Backhaus, Wilhelm, German pianist. He studied under Reckendorf at Leipzig and D'Albert at Frankfurt. won the Rubenstein Prize at Paris in 1905, achieved world-wide fame. (1884-).

Backwardation, the term used on the Stock Exchange to describe the money paid by a seller of stock for the privilege of deferring delivery until the next account.

Bacillus. See *Bacteria*.

Bacon, a cured product of pigs and hogs. Curing is by salting and smoking. The usual method is to place the flesh in a solution of brine and rub salt into it by hand, or to inject salt by syringe. For smoking, sawdust of hardwoods is used.

Bacon, Delia, an American authoress, who first broached, though she did not originate, the theory of the Baconian authorship of Shakespeare's works. (1811-1869).

Bacon, Francis, Lord Verulam and Viscount St. Albans, the father of the inductive method of scientific inquiry; born in the Strand, London; son of Sir Nicholas Bacon; educated at Cambridge; called to the Bar when 21, after study at Gray's Inn; represented successively Taunton, Liverpool and Ipswich in Parliament; was a

favourite with the Queen; attached himself to Essex, but witnessed against him at his trial; became at last in succession Attorney-General, Privy Counsellor, Lord Keeper, and Lord Chancellor; was convicted of venality as a judge, deposed, fined, and imprisoned, but pardoned and released; spent his retirement in his favourite studies; his great works were his *Advancement of Learning* (1605), *Novum Organum* (1620) and *De Augmentis Scientiarum* (his greatest work; it expounds a new method of scientific discovery), but the most popular of his works is the *Essays* (first published in 1598), which are full of practical wisdom and keen observation of life. Ingenious, if futile, attempts have been made to claim for him the authorship of Shakespeare's plays, and have, indeed been extended so as to include those of Marlowe and even the essays of Montaigne. Bacon's moral character was singularly mixed and complex and strikingly in contrast with his great intellect, showing, as it does, remarkable coldness and bluntness of moral perception. (1561-1626).

LORD BACON

Bacon, John, sculptor, born in London, won the first gold medal for sculpture awarded by the Royal Academy; executed busts of Pitt which are now in Westminster Abbey and the Guildhall, as well as busts of Dr. Johnson and other notabilities. (1745-1799).

Bacon, Sir Nicholas, the father of Francis, Lord Bacon, Privy Counsellor and Keeper of the Great Seal under Queen Elizabeth. (1510-1579).

Bacon, Sir Reginald, Admiral; commander of the Dover Patrol (q.v.) from 1915 to 1918. He wrote a *Life of Admiral Fisher*. (1863-).

Bacon, Roger, a Franciscan monk, born at Ilchester, Somerset; a fearless truth-seeker of great scientific attainments; accused of magic, convicted and condemned to imprisonment, from which he was released only to die; suggested several scientific inventions, such as the telescope, the air-pump, the diving-bell, the camera obscura, and gunpowder, and wrote some eighty treatises. (1214-1291).

Bacteria, minute forms of plant life the fungi, but now assigned to a separate group under the name of Schizomycetes ("fission fungi"), in reference to their characteristic method of reproduction by simple cleavage. Bacteria were discovered by the Dutchman Anthony van Leeuwenhoek in 1683, but were little investigated until the 19th Century, when the foundations of bacteriology were laid by Cohn, Pasteur, and Koch. Two great advances were made when Weigert (1871) introduced the method of staining bacteria with various dyes, thus rendering them more easily visible, and when Koch (1881) showed that pure cultures—i.e., individual strains—could be obtained without difficulty by growing bacteria on solid media such as gelatine or agar-agar.

Bacteria are roughly classified according to their shape into four chief types—viz., the coccus, the bacillus, the spirillum, and the spirochæte. Cocci are spherical, but after division the new individuals may remain in association in straight chains (streptococci), in bunches more or less resembling bunches of grapes (staphylococci), in cubical groups of eight (sarcinae), or in blocks of four or a multiple of four (micrococci). Bacilli, as their

name implies, are rod-shaped organisms, and sometimes possess fine protoplasmic threads (flagella) by means of which they are able to swim in liquid media. Spirilla are spirally twisted, and, like bacilli, may be provided with flagella. Spirochætes resemble spirilla in being spirally twisted, but they are comparatively longer and thinner, and effect movement by undulation, not by means of flagella.

Certain more complex organisms, showing indubitable relationship with the types already mentioned, are usually included in the general group of bacteria; such, for example, are the Myxobacteria or slime fungi, the Trichobacteria or Chlamydobacteria (among which are the "iron bacteria"), the Thiobacteria or sulphur bacteria, and the Actinomycetes. There are also many species of virus which are too small to be seen even with the most powerful microscope, but which, from their effects, are presumed to be of a bacterial nature; these are often known as the non-filterable viruses, since they are so minute that they pass through the pores of an unglazed porcelain filter.

The relation of cause and effect which exists between some species of bacteria and certain diseases, such as tuberculosis, anthrax, bubonic plague, and leprosy, is now well established. Bacteria should not be regarded as entirely inimical, for the pathological varieties are probably in a minority. Many are of no known effect or importance, but some are of the greatest possible value to man, and indeed without bacteria life would be impossible. In the soil, several species of bacteria convert dead organic matter into nitrates, the chief nitrogenous food of green plants, and thus not only prevent a cumbering of the ground but also provide necessary nutrition for the plants on which all other life finally depends. The nitrogenous content of the soil is moreover actually increased by certain nitrogen-fixing bacteria which convert atmospheric nitrogen into nitrogen compounds. Bacteria are also instrumental in the souring of wine to form vinegar, in the manufacture of cheese and butter, in the curing of tobacco, the manufacture of leather, and in other ways.

Bactria, a province of ancient Persia, now Balkh (q.v.), at one time regarded as the probable fatherland of the Aryans; the birthplace of the Zoroastrian religion.

Bacup, a manufacturing town in Lancashire, England, about 20 m. N.E. of Manchester; cotton-spinning, weaving, and metal-working the main industries. Pop. 20,000.

Badajoz, capital of a Spanish province of the same name, on the Guadiana, near the frontier of Portugal; a place of great strength; surrendered to Soult in 1811, and taken after a violent and bloody struggle by Wellington in 1812. In August 1930, during the Civil War, the town was taken by storm by anti-Government troops after savage hand-to-hand fighting. Pop. (prov.) 72,000; (town) 46,000.

Badakhshan, a Mohammedan territory N.E. of Afghanistan, part in the Tadzhikistan S.S.R., part in Afghanistan; a picturesque hill country rich in minerals; it is 200 m. from E. to W. and 150 from N. to S.; Marco Polo visited it; the inhabitants, called Badakhshians, are of the Aryan family and speak Persian. Pop. 95,000.

Baden, or **Oberbaden**, a town in the canton of Aargau, Switzerland, 14 m. NW. of Zurich, long a fashionable resort for its mineral springs.

Baden, Free State of, or **Land Baden**, Germany, extends along the left bank of the Rhine from Constance to Mannheim; consists of valley, mountain, and

plain; includes the Black Forest; is rich in timber, minerals, and mineral springs; agriculture plays a large part in the economy; cotton fabrics, clock-making, wood-carving, jewellery, etc., also give much employment. There are two university seats, Heidelberg and Freiburg. Formerly a grand duchy, but after the Great War the National Assembly voted a republican constitution. Under the Nazi regime popular government was abolished and the State put under a governor. Pop. 2,300,000.

Baden, a town in the state of Baden, noted for its hot mineral springs, which were known to the Romans; popular as a summer resort. Pop. 30,000.

Baden-Bei-Wien, a fashionable resort, 17 mi. from Vienna. Pop. 22,000.

Badenoch, a forest-covered district of the Highlands of Scotland, 45 m. long, by 19 broad, traversed by the Spey, in the SE. of Inverness-shire.

Baden-Powell, Baron, founder of the Boy Scouts in 1908 as Sir Robert Baden-Powell. He first leapt to fame by his defence of Mafeking in the Boer War; from 1903 to 1907 he was Inspector-General of Cavalry, and in 1910 he retired from the army to devote his whole time to the Scout movement. He was raised to the peerage in 1929. O.M., 1937. (1857-).

Badge, an emblem, usually symbolic, designed to distinguish countries, societies, clubs, and their members, etc. Famous badges are the Fleur-de-lis, the Swastika, and, most famous, the Cross of Christianity. Badges do not come under the laws of Heraldry.

Badger, an animal of the sub-family Mustelinae in the Mustelinae or otter family.

The common badger is greyish-brown on back and black below, head white, with dark lines on side, muzzle pointed. Length is about 2 to 2 ft. 6 in., and height 1 ft. Badgers burrow by day and feed at night on roots, small quadrupeds, and insects. The hair is used for shaving-brushes and artists' brushes. Badger-baiting was a sport in England until prohibited in the middle of last century.

BADGER

Bad Lands is a term used generally to denote the large areas of rocky land in the W. of the U.S.A., particularly in Nebraska and S. Dakota. They are rich in fossil specimens.

Badminton, a village of Gloucestershire, England, in the Cotswolds. In the parish is Badminton House, 17th-Century seat of the Earl of Beaufort. Pop. 400.

Badminton, a game similar to tennis, but shuttlecocks take the place of balls. Badminton may be played as single or double, and within or out of doors. A badminton shuttlecock has 16 feathers 2½ in. long and cork 1 in. in diameter, and weighs 75 to 85 grains. A badminton racket weighs about 6 oz. The net is 5 ft. high in centre, 5 ft. 1 in. at ends, and 17 to 24 ft. long. Winner of toss chooses service, loser the ends. The game is of 15 aces. The side first to reach 13 all has option of setting 5, and when at 14 all, of 3. A full-sized court is 40 ft. long, 90 ft. wide, divided into courts of 15 ft. by 10 ft., leaving a centre space of 10 ft. by 20 ft. Serving is diagonal, always a volley from within the court.

Badoglio, Pietro, Italian soldier, born in Siliy. Was a corps commander at the Battle of Caporetto in the

Great War. Replaced General de Bono as commander-in-chief of the Italian forces in the invasion of Abyssinia, bringing the war to a successful issue. Created Marshal in 1936. (1871-).

Badrinath, a peak of the Himalayas in the United Provinces, India, 10,000 ft. high, much frequented by pilgrims for the sacred waters near it, which are believed to be potent to cleanse from all pollution.

Baedeker, Karl, a German printer in Coblenz, famed for the guide-books to almost every country of Europe that he published. (1801-1859).

Baekeland, Leo Hendrik, chemist; born in Ghent (Belgium), at the university of which he was educated. Studied electro-chemistry at Charlottenburg, taught at Ghent and Bruges. Emigrated to America 1889. Manufactured Vellox photographic paper. Invented Bakelite, an electric insulator. (1863-).

Bael (*Agile Marmelos*), a tree of the order Rutaceae, found in India. It grows wild, but is also cultivated for its fruit, which is a valuable remedy for dysentery.

Baer, Karl Ernst von, a native of Estonia; professor of zoology, first in Königsberg and then in St. Petersburg; styled the "father of comparative embryology"; the discoverer of the law that the embryo when developing resembles those of successively higher types. (1792-1876).

Baeyer, Johann Friedrich von, German chemist, professor at Strassburg (1872) and Munich (from 1875); carried out a large number of investigations into the structure of organic compounds, particularly indigo, which he prepared artificially. (1835-1917).

Baffin, William, an early English Arctic explorer, who, when acting as pilot to an expedition in quest of the NW. Passage, discovered Baffin Bay. (1584-1622).

Baffin Bay, or Sea, a strait stretching America and Greenland, open four months in summer to whale and seal-fishing; discovered by the expedition of 1615 of which William Baffin was pilot.

Baffin Land, Canada, separated from the mainland by the Gulf of Boothia, Foxe Channel, and Hudson Strait; very cold and with a small population of Eskimos only. Area 236,000 sq. m.

Bagamoyo, a seaport town of Tanganyika, E. Africa, the capital of a fruit-producing district of the same name. It was formerly a centre of Arab slave-trading. Pop. 5,000.

Bagatelle, an indoor game played on a special board or table, fitted with 9 numbered, cup-like receptacles. Nine balls are used, 1 black, 4 red and 4 white. They are played with a cue and must drop into the "holes." In ordinary bagatelle each player uses all the balls; French bagatelle is played with partners alternately; Mississippi bagatelle is played through a wooden bridge of numbered archways, and the balls must enter them off the rubber side-cushions with which the table is fitted.

Bagehot, Walter, an English political economist, born in Somerset, a banker by profession, and an authority on banking and finance; a disciple of Ricardo; author of, besides other publications, an important work, *The English Constitution*; was editor of *The Economist*. (1826-1877).

Bagenalstown, or Muine Bheng, a market town and railway junction of Co. Carlow, Ireland (Eire), on the R. Barrow. Its industries include flour-milling and malting, and it has a tobacco factory. Pop. 2,000.

Baggara, an Arab people in the Sudan; Mohammedans by religion, they formed part of the dervish armies in the Egyptian wars of 1881-1889.

Baggesen, Jens Emmanuel, a Danish poet, travelled a good deal, wrote mostly in German, in which he was proficient; his chief works, a pastoral epic, *Parthenais oder die Alpenreise*, and a mock epic, *Adam and Eve*; his minor pieces are numerous and popular, and are remarkable for their satiric humour. (1764-1826).

Baghdad, on the Tigris, 500 m. from its mouth, and connected with the Euphrates by canal, the capital of Iraq; dates, wool, grain, and horses are exported; red and yellow leather, cotton, and silk are manufactured; the transit trade, though much less than formerly, is still considerable. It is a station on the England to Indian telegraph route, and is served by a railway and a fleet of river-steamers plying to Basra. Formerly a centre of Arabic culture, it had belonged to Turkey since 1638, but was captured by the British under General Maude in the Mesopotamia campaign of 1917. The town now possesses all the amenities of a modern city. A university was opened in 1926. Pop. (liwa or political division) 359,000.

Baghdad Railway. In 1899 the Anatolian Railway obtained a concession from Turkey to build a railway from Konich to Koweit on the Persian Gulf, via Baghdad, a total length of 1,550 m. By a provisional agreement of 1903 preference was given to a German company for the construction of a railway from Konich to Baghdad and Basra. As a result of objection raised by Britain to the control of the railway by Germany, its construction was placed under international control. At the outbreak of the Great War 1,200 m. were operating, but there were gaps in the section in the hills NW. of Aleppo and in the desert W. and S. of Mosul. The line is open to Tell-Kochok on the Syro-Iraq frontier. Tell-Kochok and Kirkuk are connected by motor service. Since the Great War a line has been completed between Baghdad and Kirkuk.

Bagheria, a town in Sicily, 8 m. from Palermo, where citizens of the latter have stylish villas. Pop. 20,000.

Bagirmi, a Mohammedan kingdom in French Equatorial Africa, S.E. of Lake Tchad, 240 m. from N. to S. and 150 m. from E. to W.

Bagnères ("the baths"), two French towns (Bagnères-de-Bigorre and Bagnères-de-Luchon) in the Pyrenees, well-known watering-places, with hot mineral and sulphur springs.

Bagpipe, an ancient musical instrument constructed of a leather bag which, filled with air, gives the drone or bass, and a melody pipe. It is a favourite instrument with the Scotch and Irish. The Scotch pipes have a range of 9 notes, the Irish 12, and the Northumbrian 15. The most solemn dirge or the gayest dance can be played on the bagpipe. Bagpipes were brought into England by the Romans and from there were introduced into Scotland and Ireland.

Bagration, Prince, Russian general, distinguished in many engagements; commanded the vanguard at Austerlitz, Eylau, and Friedland, and in 1812 against Napoleon; achieved a brilliant success at Smolensk; fell at Borodino. (1765-1812).

BAGPIPES

Bagshot, a town of Surrey, England, on the Berkshire border, 3 m. S. of Ascot. Bagshot Heath runs into both counties. Bagshot Park is the residence of the Duke of Connaught. Pop. 3,000.

Bahamas, The, a group of low-lying coral islands (29), islets (about 650), and rocks (about 2,400) in the W. Indies between Florida and Haiti. They are a British possession, and were discovered by Columbus on his first voyage to America. The chief islands are New Providence, on which is Nassau, the capital, Andros, Eleuthera, Long I., Cat I., Abaco, Gt. Exuma, Acklin I., Bahama, Crooked I., Harbour I., and Great Inagua; only 20 are inhabited. There are sponge and turtle fisheries, and sisal and fruit (chiefly tomatoes) are grown for export. The climate is salubrious. Pop. 60,000, mainly negroes.

Bahia, or São Salvador, a fine city, one of the chief seaports of Brazil, in the Bay of All Saints, and originally capital of the country, now capital of a province of the name. Has a fine protected harbour. Pop. 850,000. Bahia the State has an area of 164,601 sq. m. and a pop. of 4,700,000. It lies within the tropics. Interior is mountainous, coast fertile; chief river the S. Francisco; produces sugar, coffee, cotton, tobacco.

Bahia Blanca, a city and one of the principal seaports of Argentina, S. America, on the left bank of the R. Naposta, about 425 m. S. of Buenos Aires, with which it is connected by rail. It serves a large area for the shipment of grain, wool, and frozen beef, and is also a petroleum-distributing base. It has a large modern harbour with two dry docks, and an air line connects it with Gallegos. Pop. 100,000.

Bähr, Hermann, Austrian journalist, author, and theatre-manager; settled in Vienna; plays include *Wienerinnen*, 1900; *Der Krampus*, 1902; *Das Konzert*, 1909. (1863-1934).

Bahraich, a town on the R. Sarju in the United Provinces of Agra and Oudh, India, centre of a district of the same name. The town contains a sacred tomb of the Moslems and is a place of pilgrimage.

Bahrain Islands, a group of islands, in the Persian Gulf,

independent under the rulership of Al Khalifa, but in treaty relations with the Government of India; the largest island, Bahrain by name, is 27 m. long and 10 broad, cap. Manameh. The islands produce dates and have long been famous for their pearl-fisheries, among the richest in the world. Pop. 120,000.

BAHRAIN ISLANDS
PEARL-FISHING BOAT

Bahr-el-Ghazal, an old Egyptian province including the district watered by the tributaries of the Bahr-el-Jebel (the White Nile) and the Bahr-el-Ghazal.

Baiæ, a small town near Naples, now in ruins, and nearly all submerged; famous as a resort of the old Roman nobility, for its climate and its baths. Julius Caesar, Hadrian, and Nero had villas here. Founded by Baius, a companion of Ulysses.

Baif, Jean Antoine de, a French poet, one of a group of seven known in French literature as the "Pléiade," whose aim was to accommodate the French language and literature to the models of Greek and Latin. (1532-1589).

Baikal, a clear, fresh-water lake, in Asiatic Russia, S. of Siberia, 397 m. long and from 13 to 54 wide, in some parts 4,500 ft. deep, and at its surface 1,550 ft. above the sea-level, the third largest in Asia; sledge-ply on it for six or eight months in winter, and steam-boats in summer; it abounds in fish, especially sturgeon and salmon, and contains several islands, the largest Olkhon, 32 m. by 10 m. It is skirted on the W. by the Baikal Mts.

Baikie, **W. Balfour**, an Orcadian, born at Kirkwall, surgeon in the Royal Navy; was attached to the Niger Expedition in 1854, and ultimately commanded it, opening the region up and letting light in upon it at the sacrifice of his life; died at Sierra Leone. (1825-1864).

Bail, the security given by a person that a person charged with an offence will surrender to the charge. In case of default the bail is forfeited. In felonies other than treason and in certain misdemeanours a magistrate may admit to bail. In all other misdemeanours and summary cases he must admit to bail. Bail is never allowed in murder cases. In treason, only a judge of the King's Bench Division or a Secretary of State can grant bail. In Scotland the only charges for which bail cannot be granted are treason and murder.

Bailey, **Philip James**, poet, born at Nottingham; author of *Festus*, which appeared in 1839. (1816-1902).

Bailey, **Samuel**, an English author, born in Sheffield, a liberal-minded man, a utilitarian in philosophy, who wrote on psychology, ethics, and political economy, and left a fortune, acquired in business, to his native town. (1791-1870).

Bailleul, an old Flemish town of France, in the dept. of Pas-de-Calais. It suffered great damage during the Great War, when occupied by the Germans. Hand-made lace is its chief product. Pop. 8,000.

Baillie, or **Baile**, a municipal officer of Scotland, whose functions are similar to those of an English alderman. The term formerly denoted an officer whose functions were similar to those of the English sheriff.

Baillie, **Lady Grizel**, an heroic Scottish lady of Covenanting days, famous for her songs; *And were my heart right I wad dee is well known*. (1665-1746).

Baillie, **Joanna**, a poetess, born at Perth, child of the Presbyterian manse there; produced a series of dramas entitled *Plays of the Passions*, besides many others, both comedies and tragedies, one of which, the *Family Legend*, was acted in the Theatre Royal, Edinburgh, under the auspices of Sir Walter Scott. (1762-1851).

Baillie, **Robert**, a Scottish Presbyterian divine who resisted Laud's attempt to thrust Episcopacy on the Scottish nation; became a zealous advocate of the national cause, and was sent to the continent to offer the Scottish crown to Charles II. (1599-1662).

Baillie, **Robert**, of Jerviswood, a zealous Scottish Presbyterian tried for complicity in the Rye House Plot, was unfairly condemned to death and barbarously executed the same day (in 1684).

Bailiff, an under-officer of a sheriff, whose duty it is to execute warrants, writs, distrains, etc., and to serve summonses and orders. The term is also used of an agent who looks after an estate for a landowner (farm bailiffs).

Bailly, **Jean Sylvain**, French astronomer, wrote a *History of Astronomy* in five volumes; elected president of the National Assembly; installed mayor of Paris; lost favour with the people; was imprisoned as an enemy of the popular cause and guillotined. (1736-1793).

Bailment, in law, the entrusting of the ballor, to another, the bailee, for a specific purpose and upon the understanding that the goods will be returned when the purpose for which they were bailed has been fulfilled. The usual division of bailments is into those bailments which are for the benefit of the bailor or of his representative, those for the benefit of the bailee or of his representative; and those which are for the benefit of both parties. In the first class the bailee is responsible, if damage occur, only for gross neglect; in the second he is responsible for even slight neglect; and in the third he is merely required to exercise ordinary care.

Baily, **Edward Hodges**, a sculptor, born in Bristol, studied under Flaxman; his most popular works were "Eye Listening to the Voice," the "Sleeping Girl," and the "Graces Seated." Executed the Nelson monument in Trafalgar Square, as well as many busts of famous people. (1789-1867).

Baily, **Francis**, astronomer; in business as stockbroker in London before devoting his time to science; founder of the Astronomical Society (1820); discovered "Baily's Beads" on the sun; started the reform of the *Nautical Almanac*. (1774-1844).

Bain, **Alexander**, born at Aberdeen, professor of Logic in the university, and twice Lord Rector. His chief works, *The Senses and the Intellect*; *The Emotions and the Will*; *Mental and Moral Science*. (1818-1903).

Bairam, a Mohammedan festival of the Ramadan, followed by another of four days, seventy days later, called the Greater Bairam, in commemoration of the offering up of Isaac, and accompanied with sacrifices.

Baird, **Sir David**, a distinguished English general of Scottish descent; entered the army at 15; served in India, Egypt, and at the Cape; was present at the taking of Seringapatam and the siege of Pondicherry; in command when the Cape of Good Hope was wrested from the Dutch, and wounded at Cornu. (1757-1829).

Baird, **John Logie**, inventor of television, was born at Helensburgh, Dumbartonshire. Superintendent, Clyde Valley Electrical Power Co., till end of Great War. Went to Trinidad for health, opened jam-factory. In broken health at Hastings 1921, experimented in television. Also invented noctovision, picturing what is hidden by darkness. (1888-).

Baize, a woollen cloth with long nap, usually dyed in plain colours. It is most commonly made as a coarse fabric for tablecloths and interior furnishings. Finer makes were once commonly used for suitings.

Bajazet I., Sultan of the Ottoman Turks, surnamed *Ilderim*, i.e., Lightning, from the energy and rapidity of his movements; aimed at Constantinople, but was met and defeated on the plain of Angora by Timur, who is said to have shut him in a cage and carried him about with him in his train till the day of his death. (1347-1403).

Bakelite, a carbon compound of formaldehyde and phenol invented by L. H. Baekeland. It is a substitute for wood in many articles of furniture, and for bone, celluloid, etc., in various uses. It is made in several colours, has a high polish, and may be handsomely grained.

MR. J. L. BAIRD

Baker, Mount, an extinct volcano in the Cascade range, in Washington, U.S.A., 11,000 ft.

Baker, Sir Herbert, R.A., architect, in Capetown from 1892; built Groote Schuur for Cecil Rhodes. After Union, built: Government House and Capital Buildings, Pretoria; Rhodes Memorial, Table Mountain; cathedrals at Capetown, Pretoria, and Salisbury (Rhodesia). Helped in designing buildings of new Indian capital at Delhi, and government houses at Nairobi and Mombasa. In England: rebuilt Bank of England, built India House, Aldwych, and S. Africa House, Trafalgar Square. Knighted, 1926; K.C.I.E., 1930; R.A., 1932. (1862-).

Baker, Sir Richard, a country gentleman, born in Kent, often referred to by Sir Roger de Coverley; author of *The Chronicle of the Kings of England*, which he wrote in the Fleet prison, where he died. (1568-1645).

Baker, Sir Samuel White, a man of enterprise and travel, born in London; discovered the Albert Nyanza; commanded an expedition under the Khedive into the Sudan; wrote an account of it in a book *Ismailia*; left a record of his travels in five books. (1821-1893).

Bakersfield, a city of California, U.S.A.; the centre of an agricultural and oil-producing district. Pop. 26,000.

Bakewell, a market town of Derbyshire, England, on the R. Wye. It has an ancient church and a Saxon cross; near by are Iladon Hall and Chatsworth. There are warm springs, and zinc and marble are worked. Pop. 3,000.

Bakewell, Robert, grazier, born at Dishley, Leicestershire, son of a farmer; travelled about England, studying live-stock; took over parental farm and popularised his new breed of Leicestershire sheep (now extinct) and his new Leicestershire long-horn cattle, also a breed of black horses. (1725-1795).

Baking Powder, a mixture of tartrate of soda used in cooking as a substitute for yeast. This mixture, when water is added, sets up a gas which renders the dough porous and lighter.

Bakony Wald, a mountainous region of Hungary, between Budapest and Lake Balaton. Marble is worked, and pigs are reared in the oak and beech forests.

Bakst, Leon, Russian painter, grew up in St. Petersburg (Leningrad). Attended Imperial Academy of Arts. For a while a fashionable portrait-painter. Visited Paris at time of the first Entente. Returning to Russia, became scene-painter in theatres, reviving the Russian tradition. Became famous 1908 as scene-painter of Russian ballet. (1856-1924).

Baku, a Russian port on the Caspian Sea and capital of the Azerbaijan S.S.R., in a district so impregnated and saturated in parts with petroleum that by digging in the soil wells are formed, in some cases so gushing as to overflow in streams, the wells, reckoned by hundreds, being connected by pipes with refineries in the town; a district which, from the spontaneous ignition of the petroleum, was long ago a centre of attraction to the Parsees or fire-worshippers of the East, and resorted to by them as holy ground. Belonged to Persia till the Russians captured it in 1736. Was the headquarters of Gen. Dunsterville's force in the Great War. Pop. 709,000.

Bakunin, Michael, an extreme and violent Russian anarchist and a leader of the movement; was banished to Siberia, but escaped; joined the International, but was expelled. (1814-1876).

Bala, the county town of Merioneth standing on Lake Bala, the largest in Wales, 4 m. long, 100 ft. deep, formed by the R. Ue. Pop. 1,400.

Balaam, a Midianitish soothsayer and prophet of God who was sent for by Balak, King of Moab, to curse Israel, but who could only speak the blessings that God put into his mouth; for the account of him see Num. xlii-xxiv, and Carlyle's essay on the *Corn-Law Rhymes* for its application to modern State councillors of the same time-serving type, and their probable fate. In the New Testament he is cited as a type of those who "loved the wages of unrighteousness."

Balaclava, a small port 6 m. S.E. of Sebastopol, with a large land-locked basin; the headquarters of the British during the Crimean War, and famous in that war, among other events, for the "Charge of the Six Hundred."

Balalaika, a stringed instrument like a guitar, popular in Russia.

Balance, an instrument for determining the weight, or comparing the masses, of bodies; the word is derived from the Latin *bi*, two, and *lanx*, a plate, and refers to the usual

BALALAIIKA

type of instrument, which has two plates or pans attached to a swiveling beam. Balances of this kind have been known for thousands of years, and were in common use among the ancient Egyptians and Greeks, particularly for weighing the precious metals.

A typical sensitive balance consists of a flat strip or beam of metal, pivoted half-way along its length upon a horizontal knife-edge of agate (or, less commonly, stainless steel or other hard alloy). A pan is suspended from a similar knife-edge at each end of the beam, equidistant from the central fulcrum; when the balance is not in use, the beam is generally lowered so that no load rests on any of the knife edges. A vertical pointer is attached to the centre of the beam and swings over a scale with suitable divisions. To ensure accuracy, the two arms of the beam must be exactly equal in length, and when the pans are empty the instrument should be in equilibrium.

Stability is ensured by arranging that the centre of gravity of the beam lies slightly below the fulcrum, while sensitiveness or delicacy is increased by eliminating friction as far as possible, by making the arms longer and of lighter material, and by lessening the distance between the fulcrum and the centre of gravity. Increased length of arm, however, causes an increased length of time of swing, and in practice a compromise has to be made. Should the arms of a balance be of unequal length, an accurate result may yet be obtained from it by weighing the object first in one pan and then in the other, and taking the geometric mean, i.e., by multiplying the two apparent weights together and taking the square root.

The type of balance used as a letter-scale is known after its inventor as Roberval's; observation will show that its mode of construction ensures that the bars supporting the pans are always vertical, and that an accurate weight is consequently obtained even when the object and weights are not in the centre of the pans. Owing, however, to the comparatively large friction, Roberval's balance is not very sensitive.

Balance of Power, preservation of the equilibrium existing among the States of Europe as a security of peace, for long an important consideration with European statesmen.

Balance of Trade, the difference in the value between the exports and the imports of a country, and said to be in favour of the country whose exports exceed in value the imports in that respect. Invisibile imports and exports, which have to be taken into account before the balance is arrived at, consist of payments for freight, insurance, interests on loans, etc.

Balata, a vegetable gum obtained from the tree *Mimusops balata* and used as a substitute for gutta-percha, being at once ductile and elastic.

Balaton, Lake, the largest lake in Hungary, 48 m. long, and 10 m. broad, 56 m. SW. of Budapest; slightly saline, and abounds in fish.

Balbo, *Italo*, Italian general and commander-in-chief of the Fascist militia. Air-marshal and governor-general of Italian Libya (Tripoli, etc.) since 1933. (1896-).

Balboa, a seaport of the Panama Canal Zone, at the Pacific end of the canal. The port for Panama City, and a U.S.A. navy yard. It has a dry dock, repair shops, coaling plant, etc. Pop. (with Ancon), 10,000.

Balboa, *Vasco Nuñez de*, a Castilian noble, established a settlement at Darien; discovered the Pacific; took possession of territory in the name of Spain; put to death by a new governor, from jealousy of consequent influence in the State. (1475-1517).

Balbriggan, a seaside resort of Co. Dublin, Ireland (Eire). It has a small fishing harbour, and makes linen, hosiery, and woollen goods. Pop. 2,000.

Baldachino, a tent-like covering or canopy over portals, altars, or thrones, supported on columns, suspended from the roof, or projecting from the wall.

Balder, the sun-god of the Norse mythology, "the beautiful, the wise, the benignant." Son of Odin and Frigg, no person or thing could hurt him except the mistletoe. Loki, the God of mischief, caused him to be killed by the throw of a piece of mistletoe, and refused to weep for him, thus refusing the universality of grief which alone could bring him to life again.

Baldness, an absence of hair, particularly upon the scalp. The latter condition is so common among civilised people that it is regarded as a symptom of age. Baldness may be caused by such diseases as fevers, syphilis, consumption; or by anxiety and worry. It is sometimes congenital. Cantharides, electricity, and massage are said to be the best stimulants to growth of the hair.

Baldock, a town of Hertfordshire, England, in a barley-growing district. Malting, brewing, and the making of hosiery are carried on. Six horse fairs are held annually. Pop. 3,000.

Baldrick, an ornamental belt worn hanging over the shoulder, across the body diagonally, with a sword, dagger, or horn suspended from it.

Baldung, *Hans*, or *Hans Grün*, a German artist, born in Suabia; a friend of Dürer; his greatest work, a masterpiece, a painting of the "Crucifixion," now in Freiburg Cathedral. (c. 1470-1545).

Baldwin I., King of Jerusalem; Godfrey de Bouillon; assuming said title, made himself master of most of the towns on the coast of Syria; contracted a disease in Egypt; returned to Jerusalem, and was buried on Mount Calvary; there were five of this name and title, the last of whom, a child some eight years old, died in 1186. (1058-1118).

Baldwin I., the first Latin emperor of Constantinople; by birth, count of Hainault and Flanders; joined the fourth crusade, led the van in the capture of Constantinople, and was made emperor; was defeated and taken prisoner by the Bulgarians. (1171-1206). **B. II.**, nephew of Baldwin I., last king of the Latin dynasty, which lasted only 57 years. (1217-1273).

Baldwin of Bewdley, (*The Rt. Hon. Earl, K.G., P.C., F.R.S.*, British statesman. Educated at Harrow and Cambridge, he entered Parliament as a Conservative for Bewdley in 1908, and first took office as Financial Secretary to the Treasury in the Coalition Govt. in 1917. In 1921 he became President of the Board of Trade, and the following year took an active part in replacing the Coalition by Bonar Law's Conservative Govt., taking the post of Chancellor of the Exchequer and succeeding to the Premiership in May 1923, on the death of Bonar Law.

He went to the country for a mandate for Protection in Nov., 1923, was defeated at the polls, and resigned when Parliament met in Jan. 1924. On the defeat of the Labour Govt. in Nov. 1924, he again became Prime Minister, and held office till his party was defeated at the election of May 1929. In politics he will be remembered for his funding of the American debt in 1923 and his handling of the General Strike situation in 1926. In 1931 he took office as Lord President of the Council in the National Govt. formed by Mr. Ramsay MacDonald. Headed the British Govt.'s delegation to the Imperial Economic Conference in Ottawa 1932. When Mr. MacDonald resigned in 1935, he took his place as Prime Minister. He played an important part in the events leading up to the abdication of Edward VIII. Retired 1937 and was raised to the peerage. (1867-).

Balearic Isles, a group of five islands off the coast of Valencia, in Spain. Majorca the largest; inhabitants in ancient times famous as expert slingers (whence the name Balearic), having been one and all systematically trained to the use of the sling from early childhood; cap. Palma. Pop. 376,000.

Balfe, *Michael William*, a musical composer, of Irish birth, born near Wexford; author of *The Bohemian Girl*, his masterpiece. (1808-1870).

Balfour, *Earl of (A. J. Balfour)*, British politician. Educated at Eton

and Cambridge; nephew of Lord Salisbury, and First Lord of the Treasury and leader of the House of Commons in his ministry. He became Prime Minister in 1902, was defeated in 1905, lost his seat in Manchester the following year and was elected for the City of London; till 1911 he was leader of the Conservative Opposition; served as Foreign Secretary in the Coalition, 1910-1919; in 1917 he visited the U.S.A. to seek war co-operation. Raised to the peerage in 1922, he acted as Lord President of the Council from 1924 to 1929. A keen philosopher, he was president of the British Association in 1904, and was the author of a *Defence of Philosophic Doubt* and a volume of *Essays and Addresses*. In politics he will be remembered for his coercion policy in Ireland (1887-1892); his successful negotiations with Russia concerning N. China; his part in forming the Committee of Imperial Defence; his conduct of the British Mission to the

LORD BALFOUR

U.S.A. in 1917; and as the author of the Balfour Declaration (q.v.). He was also prominent in the Washington Conference (q.v.). (1848-1930).

Balfour, Francis Maitland, brother of the preceding; a promising biologist who wrote on animal embryology. His career was cut short by death in attempting to ascend one of the peaks of Mont Blanc. (1851-1882).

Balfour Declaration, The, a statement made by the British Govt. in Nov. 1917, promising that Palestine should be made a national home for the Jewish people, as a result of which the League of Nations gave Great Britain a mandate for the country in 1919. Owing to Arab riots in 1936 a Royal Commission, under Lord Peel, was appointed to inquire into the manner in which the mandate was being carried out in relation to British obligations towards Arabs and Jews respectively, and a partition of Palestine between Arabs and Jews with a small portion under British government was recommended and placed before the League of Nations. In 1938 a technical Commission was sent to consider the practical possibilities of a scheme of partition.

Balfour of Burleigh, barony, was conferred, 1607, on Michael Balfour of Burleigh Castle, Orwell, Kinross-shire (Z. 1619); inherited by his daughter Margaret, whose husband Robert Arnot sat in Parliament as Lord Burleigh. The title passed lineally through a John and a Robert, to a Robert who was sentenced to death for murder, 1710, but who, escaping, and joining the rising of 1715, was attainted (d. 1757). A claim was kept up through the descendants of a nephew named Bruce—until, 1869, Alexander Hugh Bruce secured the title through reversal of the attainder. He was a representative peer, and held posts in Conservative governments; Secretary for Scotland 1895-1903; and he remained a free-trader in spite of Chamberlain. (1849-1921). He was succeeded by his son George John Gordon Bruce, a representative peer, who served in the Great War. (1883-).

Bali, or **Little Java**, one of the Lesser Sunda Is., forming with Lombok a Presidency in the Dutch East Indies; 75 m. long by 40 broad; produces cotton, rice, sugar, coffee, and tobacco. Pop. 950,000.

Baliol, Edward, son of the following. **Baliol**, invaded Scotland; was crowned king at Scone, supported by Edward III.; was driven from the kingdom and obliged to renounce all claim to the crown, on receipt of a pension; died at Doncaster 1369.

Baliol, John de, son of Sir John de; laid claim to the Scottish crown on the death of the Maid of Norway in 1290; was supported by Edward I., and did homage to him for his kingdom, but rebelled, and was forced publicly to resign the crown; died in 1315 in Normandy, after spending three years in the Tower; has been satirised by the Scots as King Toom Tabard, i.e., Empty King Cloak.

Baliol, Sir John de. See **Baliol College**.

Balkan Peninsula, the territory between the Adriatic and the Aegean Sea, bounded on the N. by the Save and the Lower Danube, and on the S. by Greece. The Balkan States are Turkey, Greece, Albania, Yugoslavia, Rumania, Bulgaria.

Balkan Wars, wars fought between States in 1912 and 1913. After the Balkan League had captured Macedonia and Albania, Greece continued the war alone from December 1912 to February 1913, when she was again joined by the other allies. On the

disintegration of the Balkan League in June 1913 a second Balkan war started. Serbia, Montenegro, and Greece fighting Turkey, Bulgaria, and Rumania.

Balkans, The, a mountain range extending from the Adriatic to the Black Sea; properly the range running through the middle of Bulgaria; mean height 6,500 ft.

Balkash, Lake, a lake in Siberia in the Kazak S.S.R. 780 ft. above sea-level, the waters clear, but intensely salt, 345 m. long and 55 m. broad.

Balkh, of Afghan Turkistan lying between the Oxus and the Hindu-Kush, 250 m. long and 120 m. broad, with a capital of the same name, reduced now to a village; birthplace of Zoroaster.

Ball, Albert, V.C., captain in Royal Flying Corps; b. at Nottingham, son of Sir Albert Ball. Enlisted in Sherwood Foresters on outbreak of Great War; transferred to R.F.C.; in Sept. 1916 began his series of single-handed triumphs (said to number 47) over enemy aviators; himself shot down less than two years later, May 7. (1896-1917).

Ball, John, a priest who had been excommunicated for denouncing the abuses of the Church; a ring-leader in the Wat Tyler rebellion; captured and executed at St. Albans in 1381.

Ball, Sir Robert Stawell, mathematician and astronomer, born in Dublin; Astronomer-Royal for Ireland from 1874 to 1892; appointed director of Cambridge Observatory 1892; author of works on astronomy and mechanics, the best known of a popular kind on the former science being *The Story of the Heavens*. (1840-1913).

Ballad, a story in verse, composed with spirit, generally of patriotic interest, and sung originally to the harp.

Ballade, a poem of one or more triplets of seven or eight lines, each with the same refrain. There is, or should be, an envoi. It is a form of poem which originated in France, and should not be confused with the English ballad. Villon is the acknowledged master of this particular lyric form. English examples are to be found in Swinburne.

Ballantrae, a fishing village and sea-side place of Ayrshire, Scotland, formerly a resort of smugglers. Herring and salmon are caught. R. L. Stevenson made the name familiar in *The Master of Ballantrae*. Pop. 1,000.

Ballantyne, James, a native of Kelso, became a printer in Edinburgh, printed all Sir Walter Scott's works; failed in business, a failure in which Scott was seriously implicated. (1772-1833).

Ballantyne, Robert Michael, author of many popular books for boys; nephew of James Ballantyne (above); for some time in Canada in the fur trade; afterwards in the publishing house of Constable of Edinburgh. (1825-1894).

Ballarat, a town in Victoria, Australia, about 100 m. N.W. of Melbourne; the centre of the chief goldfields in the colony; it is the seat of both a Roman Catholic and a Church of England bishopric, and has an observatory, a school of mines, gardens, and numerous industries. Pop. 38,000.

Ballast, that which is taken on board ship to increase the vessel's draft and steadiness. Ballast is carried when ships are insufficiently loaded with cargo. Some ships are provided with tanks for accepting water ballast. Balloons normally carry sand or gravel ballast the ejection of which allows the vessel to rise and so prolong its flight. Also stones and sand and similar material which, when mixed with cement, form concrete.

Ballater, village of Aberdeenshire, Scotland, on the Dee, a favourite summer resort; stands 668 ft. above sea-level. Pop. 1,200.

Balleny Islands, a cluster of volcanic islands in the Antarctic, discovered by John Balleny and H. Freeman in 1839. Peak Freeman, on one of the islands, is 1,200 ft. high.

Ballet, the art of expressing an idea or a dance, sometimes executed *sur les pointes*, and involving the art of mime, to the accompaniment of music, sometimes composed especially for the purpose.

Ballet proper originated in France in the 16th Century, and was later adapted to Italian and Greek mythology. From the 17th Century until the Revolution, ballet was greatly encouraged in Russia, where an imperial school was maintained from which many of the world's greatest dancers, including Nijinsky, Kshessinskaya, Karasvina, and Pavlova, graduated. The famous Mariinsky Theatre, where Taglioni and Elslser appeared, was connected with this school, and was for many years under the direction of Marius Petipa.

Music, decor, and choreography are essential factors in the formation of a ballet, and among the musicians who have composed especially for the ballet are Tchaikovsky, Stravinsky, and Rimsky-Korsakov. Fokine and Massine, also graduates of the imperial school, are two of the greatest living choreographers. Leon Bakst designed the scenery for many of the most famous ballets, especially those performed by Diaghileff's company.

Ball Flower, in architecture a form of a ball cupped in a flower. They were much used in English 13th- and 14th-Century buildings, placed in a row at regular intervals in a moulding.

Ballina, a seaport and market town of Co. Mayo, Ireland (Eire), on the Moy, across which is Ardara, its suburb, in Co. Sligo. It has a Roman Catholic cathedral. Salmon are caught. Pop. 5,000.

Ballinasloe, a market town of Co. Galway, Ireland (Eire). It has canal connection with the Shannon, and holds annual wool and cattle, sheep and horse fairs. Pop. 5,000.

Balliol College, a college of Oxford. It was founded by Sir John de Balliol of Barnard Castle, Co. Durham, who, as penance for having, about the year 1260, "unjustly vexed and enormously damaged" the church of Tyne-mouth and the church of Durham, undertook to provide a perpetual maintenance for certain poor scholars in the university. Under the influence of a Franciscan Friar, the widow of Sir John de Balliol placed this house on a sound footing.

Ballista. See **Ballistics**.

Ballistics. The ballista was in ancient times a military contrivance for hurling huge stones at the enemy; hence the term ballistics signifies the scientific study of the motion of projectiles, especially in the military sense. There are two main branches of the subject—viz., internal ballistics, which is concerned with the movement of the projectile before it leaves the barrel of the gun, and external ballistics which deals with its subsequent motion. The theory of ballistics which is of considerable mathematical complexity is supplemented by experimental research.

Balloch, a village of Dumbartonshire, Scotland; a terminus for steamers on Loch Lomond. Near by are remains of Balloch Castle, ancient seat of the Earls of Lennox.

Balloons. Ordinary free balloons are gas-filled envelopes, almost

circular in shape, with a basket below containing crew and passengers. The base of the envelope has a vent which prevents gas pressure exceeding that of the atmosphere. Beyond the employment of wind, which varies at different heights,

AN EARLY BALLOON
(TISSANDER'S)

balloons of this type have no control of speed and direction. Height is controlled by the release of gas and/or of ballast—generally sand—enabling the balloon to descend or ascend. The first practical use of balloons was in army observation service. A competition for free balloons for the Gordon-Bennett Cup is held annually. The duration record is held by H. Kaulen, who remained in the air for 87 hours in 1913. The distance record is held by Berliner who covered 1,890 m. in 1914. Meteorological experiments have long been carried out by small balloons carrying light recording instruments. See also **Aeronautics**.

Ballot, secret voting, usually by marking a ballot-paper and inserting it in a ballot-box. It was first used in England in 1870, becoming compulsory for elections by the Ballot Act, 1872. (See further under **Vote**.) Under that Act a voter who puts his cross in the wrong place may apply for a fresh paper. Ballot-papers may be marked on behalf of blind voters. At the close of a poll the presiding officer makes up into separate packets all the election documents—e.g., spoilt and unused papers—and delivers them, with the box, to the returning officer, who, before counting votes, may reject ballot-papers on certain specified grounds.

Ballycastle, a seaport of Northern Ireland, in Co. Antrim, on Ballycastle Bay. It has a sand-choked harbour and a wireless station, and is a popular seaside resort. Pop. 1,500.

Ballyclare, a market town of Northern Ireland, in Co. Antrim, with large paper-mills and bleaching-works. Pop. 3,000.

Ballymena, a market town of Northern Ireland, in Co. Antrim; has linen industries and iron-ore mines. Pop. 11,000.

Ballymoney, a town of Northern Ireland, in Co. Antrim. Linen-making, brewing, distilling, and soap-making are carried on. Pop. 3,000.

Ballymote, a market town of Co. Sligo, Ireland (Eire). Here are remains of a castle built in 1300 and of a Franciscan monastery where the Ballymote Book, a medieval MS., was made. Pop. 1,000.

Ballyshannon, a market town of Co. Donegal, Ireland (Eire), on Donegal Bay. Its harbour obstructed by a bar, is only accessible to small vessels. It has salmon fisheries. Pop. 2,000.

Balm, a species of Labiatae (*Melissa officinalis*) cultivated for the leaves, which are used medicinally. The properties are not of great value. Balm is grown in Europe, Asia, and in other parts. The stem is upright, leaves opposite and alternate, toothed and ovate. The flowers are nettle-shaped.

• **Balm of Gilead**, variety of the balsam tree and much in demand in Egypt in olden times for its aromatic and medicinal properties; produced in quantities in the mountainous region of Gilead, east of the river Jordan, in Palestine.

Balmain, an industrial and mining suburb of Sydney, New South Wales. It owns the deepest coal shaft in the world (3,000 ft.), and has soap-works and shipbuilding yards. Pop. 32,000.

Balmerino(ch), **Barony of**, was bestowed, 1606, on James Elphinstone, president of the Court of Session, attainted 1809 for having (1599) forged a letter purporting to be from King James to the Pope; died in prison. (1557-1612). The title was restored to his son John. Arthur, the sixth Baron, fought for Prince Charles, was captured at Culloden, and executed on Tower Hill. With him the barony became extinct. (1688-1746).

Balmoral, a castle on the upper valley of the Dee, at the foot of Braemar, 9 m. from Ballater; the Highland residence of the Royal Family since 1848, when it was purchased by Queen Victoria.

Balneology, the medico-scientific effects upon health and disease. The effects of baths of various descriptions are well understood to-day, and cold, tepid, hot, Turkish, and a wide variety of other forms are prescribed as required; thus mud baths are often recommended for gout and rheumatism. Balneotherapeutics includes the internal, as well as the external, application of spa or mineral waters, a common object being to tone up the skin, the intestines, and the kidneys. Celebrated watering-places are Bath, Harrogate, Cheltenham, Leamington Spa, and Droitwich in this country, while of those on the Continent, Aix-les-Bains, Vichy, Evian, Carlsbad, Marienbad, Bad Ems, and Vittel may be mentioned.

Balsam, a name given to various resins and oils of tonic and stimulant properties which are used in medicine and, for their perfume, in confectionery and perfumery. The principal varieties are those of Peru and Tolu, derived from leguminous plants.

Balta, a town in the Podolia District, Bug and Dniester; has trade in grain and soap and brewing industries. Pop. 30,000.

Baltic. The Baltic Mercantile and Shipping Exchange Ltd., St. Mary Axe, London, is a market for the purchase and sale of corn, etc. Its members are shipowners and shipbrokers trading in corn, and not limited to Baltic ports only. Business is carried on verbally within the exchange and contracts are completed outside. Membership numbers about 2,000.

Baltic Port, or **Baltiski**, a seaport of NW. Estonia on the Gulf of Finland, the outpost for Tallinn (Reval). It exports mainly timber and is seldom icebound. Pop. 1,500.

Baltic Provinces, regions bordering on the Baltic, previously forming part of Russia but now established as the independent states of Estonia, Latvia, and Lithuania.

Baltic Sea, an inland sea in the N. of Europe, 800 m. long and from 100 to 200 m. broad; comparatively shallow; has no tides; waters fresher than those of the ocean, owing to the number of rivers that flow into it and the slight evaporation that goes on at the latitude; the navigation of it is practically closed from the middle of December to April, owing to the inlet being blocked with ice.

Baltimore, the metropolis of Maryland, on an arm of Chesapeake Bay, 250 m. from the Atlantic; is picturesquely situated; not quite so regular in design as most American cities, but noted for its fine architecture and its public monuments. It is the seat of the Johns Hopkins University. The industries are varied and extensive, including textiles, flour, tobacco, iron, steel,

and canning of oysters. The staple trade is in broad-stuffs; principal exports, grain, flour, and tobacco. Pop. 806,000.

Baltimore Bird, (*Icterus Baltimore*), a N. American bird, resembling the finch, also called the American Oriole though it is not a true oriole, but classifies with the Icteridae or Hanageridae. It has long, pointed wings, a rounded tail, and is notable for its bright orange-and-black plumage.

Baltimore, **George Calvert, Baron**, a Secretary to Sir Robert Cecil. Engaged in government of Ireland, where he came to have estates. M.P. successively for Bossiney, Yorkshire, and Oxford University. Secretary of State, 1612-1613 and 1619-1625. Planted colony of Avalon, Newfoundland, 1621-1623. Obtained grant of land, 1632, for colony that became Maryland. (1580? -1632).

Baluchistan, a desert plateau lying between Persia and India, Afghanistan and the Arabian Sea; is crossed by many mountain ranges, the Suliman, in the N., rising to 12,000 ft. Rivers in the NE. are subject to great floods. The centre and W. is a sandy desert exposed to bitter winds in winter and sandstorms in summer. Fierce extremes of temperature prevail. There are few cattle, but sheep are numerous; the camel is the draught-animal.

Where there is water the soil is fertile, and crops of rice, cotton, indigo, sugar, and tobacco are raised; in the higher parts wheat, maize, and pulse. Both precious and useful metals are found; petroleum wells were discovered in the N. in 1887. The population comprises Baluchis, robber nomads of Aryan stock, in the E. and W., and Mongolian Brahuis in the centre. The large majority are Mohammedan.

It is divided into British Baluchistan, which includes territory ceded after the Afghan War, the Agency territories under direct control of British officers, and the states of Kalat and Las Bela. The NW. Railway serves Quetta and the N. part of the country. Kalat is the capital; its position commands all the caravan routes. Quetta (destroyed by an earthquake in 1936) in the N., is a British stronghold and health resort. Area 134,600 sq. m. Pop. 870,000.

Balzac, **Honoré de**, native of Tours, in France; a brilliant as well as

prolific novel-writer; his productions remarkable for their sense of reality; they show power of observation, warmth, and fertility of imagination, and subtle and profound delineation of human nature, his design in producing them being to make them form part of one great

work, the *Comédie Humaine*, the whole being a minute dissection of the different classes of society; is regarded as the father of realistic fiction, an honour which is now, however, usually assigned to his fellow-countryman, Flaubert. His best-known works include *Les Contes Drôlatiques*; *La Maison du Chat-qui-pétole*; *La Peau de Chagrin*; *Eugénie Grandet*; *Père Goriot*; *Les Illusions Perdues*. (1799-1850).

Balzac, **Jean Louis Guez de**, born at Angoulême, a French litterateur and gentleman of rank, who devoted his life to the refinement of the French language, and contributed by his *Letters to the classic form* it assumed under Louis XIV. (1594-1654).

HONORÉ DE
BALZAC

Bamangwato, a people of the Bantu stock, their country lying in the Bechuanaland Protectorate.

Bambarra, a district in the French Upper Niger, opened up to trade; the soil fertile; yields grain, dates, cotton, and palm-oil; the inhabitants are negroes of the Mohammedan faith, and are good husbandmen and workers in metal. Segu is the chief town.

Bamberg, a manufacturing town in Upper Franconia, Bavaria; once the centre of an independent bishopric; with a cathedral, a magnificent edifice, containing the tomb of its founder, the Emperor Henry II. Pop. 54,000.

Bambino, a figure of the infant Christ, the infant in pictures being surrounded by a halo and angels.

Bamboo (*Bambusa*), a genus of immense grasses which grow in many parts of the tropics. The stems are hollow and partitioned at the nodes. These are used in the building trade in the East as frames for houses, gutters, etc. Bamboos attain a height of well over 100 ft. and a diameter of 5 to 6 in. The young shoots are edible.

Bamburgh, a village of Northumberland, land, England, with an imposing castle, on a crag between it and the sea, which dates from Saxon times. Dismantled in the Wars of the Roses, it has since been restored. Grace Darling was born and buried here. Pop. 700.

Bamian, a high-lying valley in Afghanistan, 8,500 ft. above sea-level; out of the rocks on its N. side, full of caves, are hewn huge Buddhist figures, one of them 173 ft. high, all of ancient date.

Bampton, John, an English divine, Canon of Salisbury, and founder of the Bampton divinity lectures. These are preached in alternate years at Great St. Mary's and must be based on the "articles of the Christian Faith, as comprehended in the Apostles' and Nicene Creeds." (1690-1751).

Banana (*Musa sapientum*), a large herbaceous plant of the order Musaceae, sometimes over 20 ft. high. It grows throughout the tropics and subtropics. The leaves are very large, the flower is enveloped in a bract. The edible fruit is a long, seedless berry, either yellow or red, with soft skin over edible pulp.

Banat, was the name of a territory bounded by the rivers Maros, Theiss, Danube and the SE. border of Hungary. It was forfeited by Hungary under the Versailles Peace Treaty, and divided between Yugoslavia (one-third) and Rumania (two-thirds).

Banbury, a market town in Oxfordshire, England, celebrated for its cross and its cakes. Pop. 14,000.

Banca (*Bangka*), an island in the Malay Archipelago and a Dutch Presidency, with an unhealthy climate; rich in tin, worked by the government. Pop. 205,000 (chiefly Chinese).

Bancroft, Richard, Archbishop of Canterbury, a zealous Churchman and an enemy of the Puritans; represented the Church at the Hampton Court Conference; and was chief overseer of the Authorised Version of the Bible. (1554-1610).

Bancroft, Sir Squire, English actor, born in London, made his first appearance in Birmingham in 1861; married Miss Wilton, an actress; opened with her the Haymarket Theatre in 1880; retired in 1885. (1841-1926).

Band, a number of musical instruments played in combined performance. Bandmaster and bandsman are respectively leader and member of a military band. There are

various kinds of Bands—Brass Bands, Orchestras, Wind Bands, etc. The French word "bande" though applying to all bands generally, applies particularly to the Petits Violons and to the Vingt-Quatre Violons. A Brass Band is the smaller variety of Military Band employed by cavalry when on mounted duty. The English Military Band is composed of piccolo, flutes, clarinets, saxophones, bassoons, horns, cornets, trumpets, trombones, euphonium, tympani, side drum, bass drum and percussion instruments. The Royal Military School of Music is at Kneller Hall, Twickenham, Middlesex.

Banda Isles, a group of the Moluccas, some twelve in number, belonging to Holland; yield nutmegs and mace; subject to earthquakes. Pop. 12,000.

Bandana, a handkerchief, originally made in India, with pattern of diamonds or spots. Other countries also now manufacture it. The pattern is made by bleaching.

Bandar-Abbas, the port of entry for the Persian Gulf. It has considerable trade with Bombay and the E., and is connected with Kerman by motor-road. During the Great War it served as a British Naval station. Pop. 9,000.

Bandello, Matteo, an Italian Dominican monk, a writer of tales, some of which furnished themes and incidents for Shakespeare, Massinger, and others. (1480-1562).

Bandicoot,

an animal of the order Marsupials and native to Australia. Though much smaller, they resemble the kangaroo in the formation of their hind legs, the front legs being less disproportionate. They are about as big as a domestic cat.

LONG-NOSED
BANDICOOT

Bandinelli, a Florentine sculptor, tried and Collini; his work "Hercules Slaying Cacus" is the most ambitious of his productions. (1487-1559).

Band of Hope, The, a society for promoting temperance principles among the young, founded in 1855.

Bandon, a market town in Co. Cork, Ireland (Eire), on the R. Bandon. It has breweries, distilleries, tanneries, and textile factories. Pop. 3,000.

Bandy, the game of ice hockey, popular in the northern parts of the U.S.A.; known also as "shinty."

Banff, (1) county town of Banffshire, Scotland, on the Moray Firth, at the mouth of the Deveron; the county itself stretches level along the coast, though mountainous on the S. and SE.; fishing and agriculture the great industries; Pop. 3,500. (2) a township in Alberta, Canada, tourist resort with hot sulphur springs. Pop. 2,000.

Bangalore, the largest town in Mysore, India, and the capital; stands high; is concerned in manufacturing and trading. Hyder Ali resided here. It was taken by Cornwallis in 1791. Pop. 306,000.

Bangkok, the capital of Siam, on the Menam; a very striking city; styled, from the canals which intersect it, the "Venice of the East"; 20 m. from the sea; the centre of the foreign trade, carried on by Europeans and Chinese; includes the royal palace standing on an island, in the courtyard of which several white elephants are kept. Outside the royal palace and throne hall of marble the town is a mixture of large concrete buildings and wooden hovels. Pop. 455,000.

Bangor, (1) an episcopal city in Caernarvon, N. Wales, with large slate quarries; a place of summer resort, from the beauty of its surroundings. Pop. 11,000. (2) Seaport and watering-place of Co. Down, Northern Ireland, on Belfast Lough. Muslim embroidery is carried on. Here was a large abbey, destroyed by the Vikings. Pop. 13,000. (3) A lumber town in Maine, U.S.A. Pop. 29,000.

Bangorian Controversy, a controversy in the Church of England provoked by a sermon which Hoadley, Bishop of Bangor, preached before George I. in 1717, and which offended the sticklers for ecclesiastical authority.

Bangweolu, a lake in Northern Rhodesia discovered by Livingstone, and on the shore of which he died; 150 m. long, and half as wide; 3,690 ft. above sea-level.

Banian Days, days when no meat was served out to ships' crews in the Navy, probably an allusion to the Italians, Hindu ascetics.

Banim, John, Irish author, a native of Kilkenny, novelist of Irish peasant life on its dark side, who, along with his brother Michael, wrote 24 vols. of Irish stories, etc.; his health giving way, he fell into poverty, but was rescued by a public subscription and a pension; Michael survived him 32 years. (1798-1842).

Banishment, a state of being exiled from one's own country as a punishment for crime. It was a lawful sentence from the reign of Elizabeth to the 19th Century, and is still inflicted in some countries.

Banjermassing, the capital of Dutch Borneo, a seaport in the rice-producing province of Banjer-massing. It is built on piles as precaution against floods, and exports gold, precious stones, coal, iron, spices, cane, and drugs. Pop. 17,000.

Banjo, a musical instrument with long neck and drumhead body over which parchment is strained, and having five to nine catgut strings. The tuning peg of the melody string is placed half-way up the neck. The pitch of a banjo is an octave lower than the written notation.

Bank Holidays, established in 1871 through the efforts of Sir John Lubbock (Lord Avebury), fall in England on Easter Monday, Whit Monday, the first Monday in Aug. and Dec. 26 (or Dec. 27 if 26 is a Sunday).

Bank Note, any note or bill of exchange of the Bank of England or Bank of Ireland, or of any other person, body corporate, or company carrying on the business of banking. This old statutory definition was extended in 1914 so as to include currency notes. It also includes any bill of exchange or promissory note issued by any banker, other than the Bank of England, for the payment of money not exceeding £100 to the bearer on demand.

Bank of England, British national bank, founded by W. Paterson and M. Godfrey, and incorporated in 1694. It is a joint-stock bank, but has always been closely connected with the Government. For all practical purposes it is the only bank in England allowed to issue monetary notes.

Under the authority of Acts of Parliament, the management of the National Debt is entrusted to the Bank of England. It

conducts the issue and inscriptions of new loans and prepares and issues, under instruction from the Treasury, exchequer bills, bonds, and treasury bills. It makes advances to the Treasury, especially under the Exchequer and Audit Acts, at the end of each quarter to meet heavy payments for dividends upon public funds. It acts for the great revenue departments and conducts the banking business of public departments.

It stands at the basis of the country's credit system, holds the country's gold reserve, controls the note issue, and acts as banker's bank to the other banks, accepting deposits from them (without interest), the balance of account between them on settlement of cheques at the clearing-house being adjusted by alteration to the deposits at the Bank of England.

Bank Rate, the rate at which the Governors of the Bank of England are prepared to lend money. Fixed at their meeting every Thursday, it affects the price of money throughout the London market.

Bankruptcy, the status of a debtor woman and in some circumstances a foreigner, but not a company or corporation) who has been judicially declared incapable of paying his debts either on his own petition to the courts or on the petition of his creditors. Indebtedness must exceed £50 and proof of certain specified acts of bankruptcy during the three months preceding the petition must be given. Bankruptcy is now regulated by the Bankruptcy Act of 1914 (and the rules made under that Act, as amended by the Bankruptcy (Amendment) Act of 1926), which increased the stringency of conditions and placed on the debtor the onus of proving himself not guilty of fraudulent intent.

An undischarged bankrupt may not sit in the House of Commons or become a councillor unless the court grants a certificate that he is the victim of misfortune. He may apply for discharge if his assets were more than 10s. in the £, if no criminal intent has been proved. A discharge order releases him from all obligations with certain exceptions, such as debts to the Crown, etc.

Banks, Sir Joseph, a zealous naturalist, particularly in botany; a collector, in lands far and wide, of specimens in natural history; accompanied Captain Cook in his voyage round the world, and was one of the founders of Botany Bay settlement; left his collection and a valuable library and herbarium to the British Museum; President of the Royal Society for 41 years. (1743-1820).

Banks, Thomas, an eminent English sculptor, born at Lambeth; first appreciated by the Empress Catharine of Russia; his finest works, "Psyche" and "Achilles Enraged," now in the entrance-hall of Burlington House; he excelled in imaginative art. (1735-1805).

Banks and Banking. Banks are institutions where deposits of money are received and paid, where credit is manufactured and extended to borrowers, where the exchange of property is facilitated, and where loans and discount are negotiated. Further operations are the buying and selling of foreign exchange and the issuing of notes, though this latter operation is usually restricted to a central bank (like the Bank of England, in this country).

A bank deals with two classes of person: a depositor who wishes to obtain interest on his capital, and a borrower who is willing to pay a higher interest than that given to the depositor. The difference in interest constitutes the banker's profit. The bank obtains additional profit by commissions for services rendered to the customer, and also from the capital left upon current account.

The work of a bank includes the following: (a) The opening of deposit accounts with commercial houses and private individuals. (b) The opening of current accounts, from which money may be withdrawn on demand, and which usually bears no interest. (c) The discounting of Bills of Exchange and making of loans upon negotiable securities. (d) The establishment of agencies for foreign banks. (e) The purchase and sale of stocks, the collection of dividends on stocks, and the receipt of pay and pensions of customers. (f) The keeping of books of corporations and companies and paying of half-yearly dividends. (g) The issue of circular notes, travellers' cheques, and letters of credit. (h) The duties of executor or custodian trustee. (i) The collection of funds for new issues of capital by company customers. (j) The maintenance of a system of night banking whereby customers may deposit money to be credited in the morning, and (k) the issue of home safes with interest payable on deposits.

Deposit accounts are of three kinds: (1) Repayable at call or demand; (2) repayable subject to a specified notice; (3) fixed deposits. The usual specified notice is seven days, though present-day practice is to repay on demand and charge seven days' interest. Fixed deposits are in favour with colonial banks, especially Australian, due to the fact that colonial banks have to sink their funds into undertakings of a longer duration. Interest on Deposit accounts varies with the Bank Rate. Money paid into a bank is entered by the customer on a paying-in slip or voucher, and money withdrawn is usually by cheque.

The rapid growth of the cheque as a medium for cancelling debts has rendered a clearing system necessary. They are cleared through the London Clearing House, and during a year cheques to the value of £50,000,000,000 pass through its office. Other clearing houses are in the large commercial centres. Local clearings are operated by Local Exchanges. The most important section of clearing is town clearing, which acts as a reflex of the London Money market. The London Bankers' Clearing House is managed by a committee of influential bankers. A feature of post-war banking is the growth of new capital issues passing through the hands of bankers, due to the increase of new companies.

The principal banks of London, after the Bank of England (q.v.), sometimes called the "Big Five," are Barclay's Bank Ltd.; Lloyd's Bank Ltd.; Midland Bank Ltd.; National Provincial Bank Ltd.; and Westminster Bank Ltd. They are affiliated with a number of other banks. The Bank for International Settlements was formed under the League of Nations to provide a means for the settlement of Germany's obligations under the Reparations Plan, and a huge reparations loan was raised.

Bankside, a district of SE. London, bordering the Thames, a part of Southwark. Here in Elizabethan and Stuart times were the famous Globe, Swan, and Hope Theatres, a bear garden and a bull-baiting ring.

Bann, a river of Northern Ireland, rising in the Mourne Mts., Co. Down, and entering the Atlantic 4 m. from Coleraine. Above Lough Neagh, through which it passes, it is known as Upper Bann, below as Lower Bann. Salmon and eels are caught.

Bannatyne Club, a club founded by Sir Walter Scott to print rare works of Scottish interest, whether in history, poetry, or general literature, of which it printed 116, all deemed of value; dissolved in 1861. It was named after George Bannatyne, who collected much of Scotland's ancient poetry.

Banner, a piece of drapery usually attached to a staff, indicating both dignity and rank. Banners of military regiments are commonly known as colours. The national banner of England is that of St. George, a red cross on a white ground. The Union-flag is formed of it, the cross of St. Andrew and the cross of St. Patrick added.

Bannockburn, a manufacturing village 3 m. SE. of Stirling, Scotland, the scene of the victory, on June 24, 1314, of Robert the Bruce over Edward II., which reasserted and secured Scottish independence; it manufactures carpets and tartans. Pop. 4,000.

Banns of Marriage, the practice of churches on three successive Sundays the names of those who intend to marry, in order that objections can be made. The custom dates back to 1200.

Banshee, among the Irish, and in some parts of the Highlands and Brittany, a female fairy, believed to be attached to a family, who gave warnings by wailings of an approaching death in it, and kept guard over it.

Bantam, a chief town and decayed seaport in Java, abandoned as unhealthy by the Dutch; whence the Bantam fowl is thought to have come.

Bantam, a small domestic fowl of eastern origin. It weighs rather over one pound when fully grown. It is smooth-feathered and game. The hens lay well.

Banteng, a species of wild ox of Malaya. It has no dewlap. It has a hump behind the neck, rounded horns and a pointed head.

Banting, Sir Frederick Grant, K.B.E., D.Sc., F.R.S., born at Alliston, Ontario; wounded in Great War; practised medicine in London, Ontario, till 1921. At Toronto University in 1921, began, under J. J. R. Macleod, investigations

BANTENG

into internal secretion of the pancreas, which resulted in discovery of the insulin cure for diabetes. Nobel Prize, 1923. Professor of Medical Research, Toronto. (1891-).

Banting System, a dietary for keeping down fat, recommended by a Mr. Banting, a London tradesman, in a *Letter on Corpulence* in 1863; he advocated lean meat, and the avoidance of sugar and starchy foods.

Bantock, Sir Granville, M.A., D.Mus., (Edin.), was born in London, son of George Granville Bantock, M.D. Conductor to Gaiety Company America and Australia, 1894-1895. Musical director, New Brighton, 1896-1900. Professor of Music, Birmingham University, 1908-1934. His works include dramatic and choral compositions, and a setting of FitzGerald's *Omar Khayyam*. (1868-).

Bantry, a market and fishing town of Bantry, Co. Cork, Ireland (Eire), on Bantry Bay. It is a popular tourist resort and makes tweeds. Pop. 3,000.

Bantry Bay, a deep inlet on the SW. coast of Ireland (Eire); a place of shelter for ships; the scene of a naval fight between the French and British, ending in the French favour, on May 1, 1689.

Bantu, the name of most of the races, with their languages, that occupy Africa from 6° N. lat. to 20° S.; are negroid rather than negro, being in several respects superior; the name, however, suggests rather a linguistic than an ethnological

distinction, the language differing radically from all other known forms of speech—the infection, for one thing, chiefly initial, not final

Banville, Théodore Faullain de, a French poet, born at Moulins, with whom form was everything, and the matter comparatively insignificant; was the author of the play *Gringoire*, produced in London by Sir H. Boerbohm Tree under the title of *The Ballad-monger*. (1823–1891).

Banyan, the Indian fig; a tree whose branches, bending to the ground, take root and form new stocks, till they cover a large area and become a forest.

Baobab, a large African tropical tree, remarkable for the girth of its trunk, the thickness of its branches, and their expansion; its leaves and seeds are used in medicine.

Bapaume, a village in the dept. of Pas-de-Calais, France, captured by British troops in March 1917, recaptured by the Germans in March 1918; by New Zealand troops in Aug. 1918. Pop. 3,000.

Baphomet, a mysterious two-headed image, presumed to represent Mohammed, which the Templars were accused of worshipping.

Baptism, the Christian rite of initiation into the membership of the Church, identified by St. Paul (Rom. vi. 4) with that No to the world which accompanies Yea to God, but a misunderstanding of the nature of which has led to endless diversity, debate, and alienation all over the Churches of Christendom.

Baptistry, a circular building, originally detached from a church, in which the rite of baptism is administered; the most remarkable, that of Pisa.

Baptists, a denomination of Christians, who insist that the rite of initiation is duly administered only by immersion, and to those who are of age to make an intelligent profession of faith; they are a numerous body, particularly in America, and more so in England than in Scotland, and have included in their membership a number of eminent men.

Bar, *Confederation of the*, a confederation of Polish nobles, formed in 1763, at the fortress of Bar, in opposition to the Confederation of Radum, which later had called upon Russia for help. The outcome of the dispute was the first partition of Poland.

Bar, *General Council of the*, established 1895 in substitution for the Bar Committee. It is the accredited representative of the English Bar, its duty being to deal with all matters affecting the profession, such as the proposal of legal reforms, professional etiquette, etc., and to take such action as may be expedient in the circumstances. It consists of a number of K.C.'s and members of the Junior Bar, together with the law officers of the Crown and others. The offices are at 5 Stone Buildings, Lincoln's Inn, London.

Barabbas, mentioned in all four gospels as a prisoner (described in John xviii as a robber and in Mark xv as a murderer) whom the Jewish multitude chose that Pontius Pilate should release at the Passover in preference to Jesus of Nazareth.

Barbacan, or *Barbican*, a fortification to a castle outside the walls, generally at the end of the drawbridge in front of the gate.

Barbados, or *Barbadoes*, one of the Windward Is., rather larger than the Isle of Wight; almost encircled by coral reefs; the most densely peopled of the group; subject to hurricanes; healthy and well cultivated; it yields sugar, arrowroot, ginger and aloe, and has rum distilleries.

Codrington College (rebuilt in 1928) provides for a university education. Pop. (est.) 182,000 (70 per cent. negro).

Barbara, St., a Christian martyr of the 3rd Century; beheaded by her own father, a fanatical heathen, who was immediately after the act struck dead by lightning; she is the patron saint of those who might otherwise die impenitent; of artilleryists, and of the city of Mantua; her attributes are a tower, a sword, and a crown. Festival, Dec. 4.

Barbarians, originally those who could not speak Greek, and ultimately synonymous with the uncivilised and people without culture.

Barbarossa, the surname of Frederick I., Emperor of Germany, of whom there is this tradition that "he is not yet dead; but only sleeping, till the bad world reach its worst, when he will reappear." (1152–1190).

Barbarossa (i.e., Red-beard), *Horuk*, a native of Mytilene, turned corsair; became sovereign of Algiers by the murder of Selim the emir who had adopted him as an ally against Spain; was defeated twice by the Spanish general Gomarez and slain. (1473–1518).

Barbarossa, *Khair-ed-Din*, brother of the preceding; became viceroy of the Porte, made admiral under the sultan, opposed Andrea Doria, ravaged the coast of Italy, and joined the French against Spain; died at Constantinople in 1546.

Barbaroux, Charles, advocate, born at Marseilles, of which he became town clerk; went to Paris "a young Spartan," and became chief of the Girondins in the French Revolution; represented Marseilles in the Constituent Assembly and the Convention; joined the Rulands; sent "fire-eyed" message to Marseilles for six hundred men "who knew how to die"; held out against Marat and Robespierre; declared an enemy of the people, had to flee; was captured and guillotined. (1767–1794).

Barbary Ape, a tailless macaque habits, native of the mountainous parts of Barbary; there is a colony of them on the Rock of Gibraltar, the only one in Europe.

Barbary States, the four states of Tunisia, Morocco, Algeria, and Tripoli, so called from the Berbers who inhabit the region.

Barbecue, a feast in the open air on animals are roasted and dressed whole, formerly common in the SW. States of N. America.

Barbel, a genus of fish (*Barbus*) of the family Cyprinidae embracing several species. They are fresh-water fish with four appendages, or barbels, from the mouth, and are found in Asia, Africa and Europe.

B. barbus, common in Europe, grows to a weight of 20 lb. in English rivers and to 40 and 50 lb. in the Danube.

Barberini, an illustrious and influential of the members of which were cardinals, one being made pope in 1623 under the name Urban VIII.

Barberry, a species of Berberidaceae common in England. It bears flowers on long, hanging stalks and oval berries. The berries are made into jam. Barberry is productive of rust which attacks grasses and wheat.

BARBEL

Barbers, became an incorporated body in 1461, and in the reign of Henry VIII. were united with the company of surgeons, a union which continued until 1745. The work included tooth extracting and bleeding. The barber's pole signifies the arm bandage used in the latter operation.

Barberton, a mining town and important centre in the Transvaal. Also a manufacturing town in Ohio, U.S.A. Pop. 24,000.

Barbieri, Giovanni Francesco, nicknamed *Guercino* (Squint-eyed), painter, born at Cento near Bologna. Painted frescoes on cupola of Piacenza cathedral. (1591-1666).

Barbizon, a village in Seine-et-Marne, France, which has given its name to a school, or group, of realist artists among whom have been Millet, Corot, Diaz, and Daubigny.

Barbour, John, a Scottish poet and chronicler, Archdeacon of Aberdeen, his only extant work a poem entitled *The Bruce*, being a long history in rhyme of the life and achievements of Robert the Bruce. (c. 1316-1395).

Barbuda, a small island of the British West Indies, in the dependency of Antigua. Area 62 sq. m.

Barbusse, Henri, French novelist. Practically unknown before the Great War, he produced in 1916 *Le Feu*, one of the greatest indictments of war ever penned, and with it gained the Prix Goncourt. Other works include *Les Pleureuses* (poetry), *Les Suppliants*, *L'Enfer*, *Nous Autres*. He served in the infantry in the Great War and received the Croix de Guerre. Invalided, he returned to literature as editor of *L'Humanité*. Joined the communists and died in Moscow. Last work, *Stalin*. (1873-1935).

Barca, name of a Carthaginian family to which Hamilcar, Hasdrubal, and Hannibal belonged, and determinedly opposed to the ascendancy of Rome, hence known as the Barcine faction.

Barcarolle, musical composition written in imitation of the songs sung by the gondoliers of Venice. They are commonly characterised by alternating light and heavy beats, as representing the movement of the oars.

Barcelona, a large town and the chief port of Spain, capital of the maritime province of Barcelona, standing on the Mediterranean. It has a naval arsenal, and is the largest manufacturing town, called the "Spanish Manchester," the staple manufacture being cotton; is the seat of a bishopric and a university; has numerous churches, convents and theatres. The older part of the city, with narrow and irregular streets, offers a striking contrast to the modern part. There is a good harbour. Often besieged, it was captured by the Earl of Peterborough in 1706, by the Duke of Berwick in 1714, and by Napoleon in 1808. In the past twenty years it has often been the scene of riots and disorders, notably at the time the republic was formed, and again in 1936 during the anti-Government revolt under General Franco. In 1936 it was severely bombed by General Franco's air forces, over 3,000 persons being killed or wounded in the raids. Pop. (prov.) 2,000,000; (town) 1,148,000.

Another town of the same name is a seaport and capital of the State of Anzoategui, Venezuela. Pop. 16,000.

Barclay, Alex., a poet and prose-writer, of Scottish birth; bred a monk in England, which he ceased to be on the dissolution of the monasteries; wrote *The Ship of Fools*, partly a translation and partly an imitation of the German *Narrenschiff* of Brandt. (1475-1552).

Barclay, Robert, the celebrated apologist of Quakerism, born in Morayshire; his greatest work written in Latin as well as in English, and dedicated to Charles II., *An Apology for the True Christian Divinity, as the same is held forth and preached by the People, called in scorn Quakers*. (1648-1690).

Barclay de Tolly, Michael Andreas, a Russian general and field-marshal, of Scottish descent, and of the same family as Robert Barclay the Quaker; on Napoleon's invasion of Russia his tactics were to retreat till forced to fight at Smolensk; he was defeated, and superseded in command by Kutusov; on the latter's death was made commander-in-chief; commanded the Russians at Dresden and Leipzig, and led them into France in 1815; he was afterwards elevated to the rank of prince. (1761-1818).

Bard. The ancient bards were the sages and prophets, teachers of religion and administrators of justice among the Celtic peoples of Great Britain and Ireland. In early days they led the armies into battle. Their poetry, chiefly of the martial kind, and sung usually to the harp, had tenderness and refinement, and the bards became recognised as the national historians, especially in Wales after the times of Howell the Good and Gruffydd ap Iwan. They were allowed a regular stipend for their labour, and any misrepresentation rendered them liable to disgrace. The bards flourished from the earliest times, and in Ireland until the 17th Century. The Eisteddfodau or great gatherings at which they competed in Wales were revived in the early part of the 19th Century, and bardship has become again a distinction of the poets of Wales, bards being elected by popular vote at the annual gatherings.

Bardsey, a small island off the coast of Caernarvon, Wales, the legendary last home of the old Welsh bards; has a lighthouse and is remarkable for its distinctive bird life.

Barebone's Parliament, Cromwell's Little Parliament, met July 4, 1653; derisively called Barebone's Parliament, from one Praise-God Barbon, member for London and a wealthy leather merchant but by no means a prominent politician.

Barèges, a village in the Hautes-Pyrénées, France, at 4,000 ft. above the sea-level, resorted to for its mineral waters.

Bareilly, a city in NW. India, the chief town of Rohilkhand in the United Provinces, notable as the scene of an outbreak in the Indian Mutiny. Pop. 144,000.

Barents, Willem, an Arctic explorer, born in Friesland; discovered Spitzbergen, and doubled the NE. extremity of Nova Zembla, in 1597, and died the same year; gave his name to Barentz I. and Barentz Sea, in the Arctic.

Barère, de Vieuzac, Bertrand, French revolutionary, a member of the States-General, the National Assembly of France, and the Convention; voted in the Convention for the execution of the king, uttering the oft-quoted words, "The tree of Liberty thrives only when watered by the blood of tyrants"; became a spy under Napoleon; died in beggary. (1755-1841).

Baretti, Giuseppe, an Italian lexico-grapher, born in Turin; taught Italian in London, was patronised by Johnson, and became secretary of the Royal Academy. (1719-1789).

Barfleur, a seaport 15 m. E. of Cherbourg, France, where in May 1692 the battle began which ended in the naval victory of La Hogue.

Barfurush, or **Babal**, a town of Persia, in the province of Mazanderan, between the Elburz Mts. and Caspian Sea, from which it is 12 m. distant. It has a caravan trade in silk, cotton and rice, and trades with Russia through its port, Meshed-i-ser. Pop. 30,000.

Barge, flat-bottomed boats designed for canals and coastal waters. They vary according to their purpose. River and canal barges are usually pulled by horse from the tow-path or towed by tugs. When used for transshipping goods between merchantmen and the shore, they are termed "lighters." State Barges are highly ornamented ceremonial boats rowed by ten or more oars, and used on state occasions. Coastal barges are also flat-bottomed, but are provided with lee-boards and rigged as sailing-boats. The Thames sailing barges are the most famous of this type.

Bargeboard,

a board which covers the ends of rafters of a gable-end of a roof. Bargeboards are both plain and ornamented and, in ancient buildings, sometimes elaborately carved.

BARGEBOARD

Barguest, a goblin long an object of terror in the N. of England, frequently assuming the form of a dog.

Barham, **Richard Harris**, his literary name Thomas Ingoldsby, born at Canterbury, minor canon of St. Paul's; friend of Sydney Smith; author of *Ingoldsby Legends*, published originally as a series of papers in Bentley's *Miscellany*, (1788-1845).

Bari, ancient city of Apulia, Italy, capital of Bari province, on the Adriatic, seat of an Archbishop. Its fisheries are important now as in Greek and Roman days and there are important industries including olive oil, soap, wine and fruit. Here is Italy's high-power broadcasting station. Pop. (prov.) 840,000; (city) 190,000.

Baring, **Sir Francis**, founder of the great banking firm of Baring Brothers & Co., (1740-1810).

Baring, **Maurice**, British author. A son of Lord Revelstoke, he entered the diplomatic service and acted as war correspondent in the Russo-Japanese War. His writings include poems, essays, books of travel, novels, and plays. (1874-).

Baring-Gould, **Sabine**, rector of Lew-Trenchard, Devonshire; the author of *Onward*, *Christian Soldiers*; celebrated in various departments of literature, history, theology, and romance, especially the latter; a voluminous writer on all manner of subjects, and a man of wide reading. (1831-1921).

Baritone, the male human voice with the tenor and that of the bass.

Barium, a metallic chemical element related to calcium, strontium and radium. Symbol Ba, atomic number 56, atomic weight 137.36. It was first isolated by Davy in 1808, and occurs fairly abundantly in nature as the sulphate, barytes, or heavy spar (BaSO_4) and as the carbonate witherite (BaCO_3). Barium compounds are poisonous; the nitrate is used in pyrotechny to make green flares, whilst a precipitated mixture of the sulphate with zinc sulphide is known as lithopone (q.v.). The metal itself is fairly soft, and possesses a silvery-white lustre; its specific gravity is 3.8, and it readily tarnishes in moist air.

Bark, the dead matter formed on the exterior of a tree, serving to protect the tree from exterior moisture. It may remain for a long period or strip off in patches or rings. A thin layer of living cells below the bark, called cambium, is added annually to the inside of the bark and to the outside of the wood beneath it.

Barker, **Sir Herbert**, surgeon, who attained extraordinary skill in bone-setting. His methods were not always approved by the medical profession, in which for years he had no status. He was knighted in 1922. (1869-).

Barking, a market town and suffragan bishopric in Essex, 7 m. N.E. of London, England, with the remains of an ancient Benedictine convent; a high-power station in the grid system of the Central Electricity Board. Pop. 51,000.

Barlaam and Josaphat, a medieval legend, being a Christianised version of an earlier legend relating to Buddha, in which Josaphat, a prince like Buddha, is converted by Barlaam to a like ascetic life.

Barletta, a seaport of Italy in the province of Bari. It has a fine 12th-Century cathedral. Wine is produced in the neighbourhood. Pop. 50,000.

Barley, a cultivated and widely-disseminated cereal (*Hordeum vulgare*) of the order Gramineae. It was the drink-corn as rye was the bread-corn of the Middle Ages. It was of two kinds. The head with two rows of grain was used extensively for brewing; the coarser four-rowed head, known as "drudge," was used partly for brewing and partly for feeding pigs and poultry. A six-rowed variety is also grown. The malting barley of the country is now almost wholly Plumage Archer of a cross kind called Spratt-Archer.

Barmecide Feast, an imaginary feast, so called from a story in the *Arabian Nights* of a hungry beggar invited by a Barmecide prince to a banquet, which proved a long succession of merely empty dishes, and which he enjoyed with such seeming gusto and such good-humour as to earn for himself a real one.

Barmecides, a Persian family of the 8th Century, celebrated for their magnificence, which in the end met with the cruellest fate. Yāhyā, one of them, eminent for ability and virtue, was chosen by Haroun-al-Raschid to be his vizier; his four sons rose along with him to such influence in the government as to excite the jealousy of the caliph, whereupon the latter had the whole family invited to a banquet, and every man, woman, and child of them massacred at midnight in cold blood.

Barmen, a long town, consisting of a series of hamlets, in Rhenish Prussia; the population consists chiefly of Protestants; staple industry, the manufacture of ribbons. Administered jointly with Ellerfeld under the name of Wuppertal. Pop. 188,000.

Barmouth, a market town and tourist and seaside resort of Merionethshire, N. Wales. It stands in beautiful mountain country at the mouth of the Mawddach. Pop. 2,000.

Barnabas, St., a member of the first companion of St. Paul's, and characterised in the Acts as "a good man"; stoned to death at Cyprus, where he was born; an epistle extant bears his name, but is not believed to be his work; the Epistle to the Hebrews has by some been ascribed to him. Festival, June 11.

Barnabites, a proselytising order of monks founded at Milan, where Barnabas was reported to have been

bishop, in 1530; bound, as the rest are, by the three monastic vows, and by a vow in addition not to sue for preferment in the Church.

Barnacle, a group of marine crustacea of the order Cirripedia, of which there are many species. The stalked barnacles (*Pendunculate*) attach themselves to the bottoms of ships and to driftwood, as do the common goose-barnacles (*Lepas anatifera*). The sessile barnacles (or acorn-shells, *q.v.*) have no peduncle. They are found like incrustations on rocks between high and low tide. *Balanus balanoides* is the commonest English barnacle. Most barnacles are hatched from eggs.

Barnard, Lady Anne, daughter of Balcarras, born in Fife; authoress of *Auld Robin Gray*, named after a Balcarras herd. (1750-1825).

Barnard, Frederick, artist; illustrator of Dickens' works; contributor to many humorous periodicals. (1846-1896).

Barnard, George Grey, American sculptor, born at Bellefonte, Pa.; work includes bronze "Great God Pan" on the green of Columbia University, New York; all sculpture in state capital of Pennsylvania; the much-discussed "Abraham Lincoln" bronze statue, Lytle Park, Cincinnati. (1863-).

Barnard Castle, an old town W. of Durham, England; birthplace of John Balian, and the scene of Scott's *Rokeby*. Pop. 4,000.

Barnardo, Dr. Thomas John, founder of the home for waifs named after him; devoted his life to the care of destitute children. (1845-1905).

Barnato, Barnett Isaacs, financier, son of a general dealer named Isaacs, was born in Aldgate, London; educated at Jews' Free School, Spitalfields. In 1873 went to S. Africa to join an older brother, an entertainer professionally known as Barnato. Made fortune in diamonds. In 1888, amalgamated with Cecil Rhodes' company. Drowned himself off ship bound for England, near Madeira. (1852-1897).

Barnaul, an Asiatic town of the U.S.S.R. in W. Siberia, the centre of an agricultural and mining district. It stands at the point of confluence of the Barnaul and Ob Rs. Pop. 74,000.

Barnave, Antoine Pierre Joseph Marie, French lawyer, born at Grenoble; president of the French Constitutional Assembly in 1780; one of the trio in the Assembly of whom it was said, "Whatever those three have on hand, Dupont thinks it, Barnave speaks it, Lameth does it"; a defender of the monarchy from the day he gained the favour of the queen by his gallant conduct to her on her way back to Paris from her flight with the king to Varennes; convicted by documentary evidence of conspiring with the court against the nation; was guillotined. (1761-1793).

Barn-Burners, name formerly given (about 1844) to an extreme radical party in the United States, as imitating the Dutchman who, to get rid of the rats, burned his barns.

Barnby, Sir Joseph, English composer, wrote many popular hymn tunes, part songs, and the oratorio *Rebekah*; conducted Albert Hall Royal Choral Society from 1871 to 1896; principal of Guildhall School of Music. (1838-1896).

Barnes, an urban district of Surrey, England, a residential district of Greater London, on the Thames. Here is Ranelagh Club, housed in the old manor house, and Barnes Common. Pop. 42,000.

Barnes, Rt. Rev. Ernest William, British scholar and divine. Educated at Birmingham and Cambridge, where he was a Wrangler, he became Master of the Temple in 1915, Canon of Westminster in 1918, and Bishop of Birmingham in 1924. An F.R.S., he made a name as a modernist, holding that true religion is consistent with the teaching of modern science. (1874-).

Barnes, Rt. Hon. George Nicoll, British politician. For ten years Gen. Sec. of the Amalgamated Society of Engineers, he became Labour representative in the War Cabinet in 1916, acting as Minister of Pensions, and in 1919 as Minister without Portfolio. He retired in 1920. (1859-).

Barnes, William, a lyric poet, "the Dorsetshire Burns"; author of *Poems of Rural Life in Dorset*, in three vols.; wrote on subjects of philological interest. (1800-1886).

Barnet, a town in Hertfordshire, England, almost a suburb of London; has a large annual horse and cattle fair; scene of a battle in 1471, at which Warwick, the kingmaker, was slain. Pop. 15,000.

Barnett, Henrietta, English social worker, wife of Canon S. A. Barnett. Started the Children's Country Holiday Movement in 1878. In 1880 she founded the London Pupil Teachers' Association, of which she was president, 1891-1907. Worked for years at the formation of the Whitechapel Art Gallery, which was opened eventually in 1901. Co-operated in the foundation of Toynbee Hall. University Settlements both in England and in America owe their origin and development to her and her husband; also the State Children's Association and the Hampstead Garden Suburb. Created D.B.E. in 1924. (1851-1936).

Barnett, Samuel Augustus, Canon of Westminster (1906), was born at Bristol. Curate in London from 1867. From 1872, vicar of St. Jude's parish, Whitechapel; where, by his exertions, Toynbee Hall settlement was founded 1884. He was first warden, till 1906. Introduced libraries and picture-galleries to East End. (1814-1913).

Barneveldt, Jan van Olden, Grand Pensionary of Holland, of a distinguished family; fought for the independence of his country against Spain; concluded a truce with Spain, in spite of the Stadtholder Maurice, whose ambition for supreme power he opposed; was arrested and condemned to death as a traitor and heretic, and died on the scaffold at 71 years of age in 1619.

Barnsley, a manufacturing town in the R. Dearne, W. Yorkshire, England, on glass and machinery. Pop. 72,000.

Barnstaple, a municipal borough, sea-port, and market town of Devon, England, on the Taw estuary. A trading centre before Norman times, it remained a busy port until the silting-up of the harbour. It has many fine old buildings. Pottery (Barum Ware) is made, also gloves, lace and furniture. Pop. 15,000.

Barnum, Phineas Taylor, an American showman; began with the exhibition of George Washington's reputed nurse in 1834; picked up Tom Thumb in 1844; engaged Jenny Lind for 100 concerts in 1849, and realised a fortune, which he lost; started in 1871 with his huge travelling show, and realised another fortune, dying worth five million dollars. (1810-1891).

Baroda, a native state now included in the Gujerat States Agency and Residency of Baroda, India, with a capital of the same name, the ruling chief being called the Gaekwar; has Hindu temples and a considerable trade. Pop. (state) 2,443,000; (town) 113,000.

Barometer, an instrument for measuring the pressure of the air. That the air has weight and can exert a pressure was first surmised by Torricelli, a pupil of the celebrated Galileo, who conceived the experiment of filling a long glass tube, closed at one end, with mercury, and inverting it in a trough of mercury. A column of mercury some 30 in. high remained in the tube, the space above it being a vacuum. The Hon. Robert Boyle and Robert Hooke having just made the first efficient air-pump, Boyle was able to prove Torricelli's assumption beyond question, by attaching the trough to the pump and showing that as the air was exhausted the column simultaneously fell; on re-admitting air it rose again.

Boyle observed that the height of the column varied slightly from day to day, and by noticing how the variations in height were related to the climatic conditions, he discovered that, usually, a diminution in height was followed by rain and a rise in height by fine weather. Modern mercurial barometers are essentially similar to the early instruments of Torricelli and Boyle, improvements being in detail only.

An aneroid barometer consists of a thin, evacuated metal box, which alters in shape according to the pressure of the atmosphere; the alterations are magnified by a mechanical arrangement of levers, and are then indicated on a circular scale by means of a movable pointer. In barographs, the pointer of a barometer—generally aneroid—is inked, and makes a trace upon a cylinder of paper rotated by clockwork at a constant speed. In this way a continuous record of pressure variations is obtained.

BAROGRAPH

Baron, the lowest grade of peer. In very early times "barones" were those churchmen or laymen who held land of the King "per baroniam," but as early as Edward III.'s time the fact of holding "per baroniam" did not confer a right to be summoned by writ to the House of Lords. Baronry does not now depend on tenure. The equivalent title or description in Anglo-Saxon times was "thegn" or "thane," but the Normans either restored or introduced the term "baron," though it is doubtful whether at first "barons by tenure" constituted an order of nobility, some being merely leading citizens. Later, in the time of Simon de Montfort, their order grew to so commanding a position that we find the term "barons" used conventionally for the entire nobility and, as they grew in importance, they were summoned to attend the King's Great Council, the nucleus of our House of Lords. The dignitaries of the degree who supplanted "barons by tenure" were the "barons by writ," but since 1605 there have ceased to be any new creations by writ, and the only form by which new barons or any other peerages originate now is the patent.

Baron, Bernhard, tobacco magnate and philanthropist. Starting life penniless in America, he emigrated to England at 16, made a fortune, which he largely devoted to hospitals, and died leaving £4,000,000. (1851-1929).

Baronet, an hereditary title, ranking between the Peerage and the Knights, instituted in 1611 by James I., who conferred it upon those who supplied funds to keep 30 soldiers at 8d. a day for 3 years for the defence of Ulster. The Baronetage of Nova Scotia (not to exceed 150) was

created by Charles I. as a means of furthering the colonisation of Nova Scotia. The permissible number of creations was never reached, and new appointments ceased in 1707 on the Union of England and Scotland.

Baronius, ^{Cesar}, a great Catholic ecclesiastic, born near Naples, priest of the Congregation of the Oratory under its founder and ultimately Superior; cardinal and librarian of the Vatican; his great work, *Annales Ecclesiastici*, being a history of the first 12 centuries of the Church. (1538-1607).

Barons' War, a war in England of the barons against Henry III. Fighting commenced in 1261 (the Battle of Lewes) after the King had appealed to Louis IX. of France to arbitrate between him and the Barons. Louis gave a verdict favourable to Henry (The "Mise of Amiens," 1263). At Evesham in 1265 the Barons were defeated and de Montfort killed.

Baroque, ornamentation of a florid, bold, lavish character, reflecting the spirit of the counter-Reformation; much in vogue from the 16th to the 18th centuries in Central Europe.

Barotse Land, a territory in N. Rhodesia, in the Upper Zambezi, Central Africa, under British protectorate, the paramount tribe being the Barotse.

Barque, a sailing-ship with not less than three masts, and square-rigged on all except the last (the mizzen in a three-masted vessel), which is fore-and-aft rigged. A barquentine is a three-masted vessel square-rigged on the foremast only.

Barra, a small island, one of the Hebrides, 5 m. SW. of S. Uist, the inhabitants of which are engaged in fisheries.

Barrackpur, a town in India on the Calcutta, Hooghly, 15 m. above Calcutta, where the lieutenant-governor of Bengal has a residence; a health resort of the Europeans; was the scene of the outbreak of the Indian Mutiny, in Jan. 1857.

Barracks, permanent buildings for the accommodation of soldiers. The provision of barracks followed the unpopular system of billeting in the early part of the 18th Century. The earliest barracks were built at Portsmouth, but sickness and a high death rate developed there and it was not until 1792 that building was taken in hand on an adequate scale.

Barracks now have quarters for single officers, married officers, single men and married men. The officers' quarters consist of a dining-room, clubroom and billiard-room. Each officer has private rooms, with additional accommodation for married officers. The men have canteens, reading-rooms, billiard-rooms, and gymnasiums. Single soldiers have separate cubicles and the married men frequently have separate houses.

Barracuda, or *Sphyraena* (*Sphyraena barracuda*), a tropical fish

of large size and predatory habits, resembling the pike, found in the Atlantic from Brazil to Florida.

BARRACUDA
(*Sphyraena barracuda*)

It has a powerful jaw and strong, sharp teeth, grows as large as 8 ft., and is dangerous to swimmers. The edible Snook (*Thyrstites alim*) is known in Australia by the same name, but is unrelated.

Barrage, a barrier of shell-fire produced and made to precede them when attacking. The term is also applied to a dam across a river erected for the purpose of increasing the depth or regulating the flow.

Barranquilla, capital of the dept. of Atlantico, in the Columbia Republic, S. America. It stands near the mouth of the R. Magdalena, and is now accessible to ocean-going ships. It is a busy centre of manufacture and trade. Pop. 150,000.

Barras, Paul François, a member of the Jacobin Club, born in Provence; voted in the National Convention for the execution of the King; took part in the siege of Toulon; put an end to the career of Robespierre and the Reign of Terror; named general-in-chief to oppose the reactionaries; employed Bonaparte to command the artillery; was a member of the Directory till Bonaparte swept it away. (1755-1829).

Barratry, the offence of inciting and among the king's subjects. Also a fraud by a ship's captain on the owners of a ship.

Barrel Organ, a mechanical musical instrument which is played by rotating a handle, thus causing the revolution of a wooden barrel whose outside circumference contains pins which raise keys. This operation allows the inflow of wind from bellows to enter musical pipes and so produce the designed melody.

Barres, Auguste Maurice, French author and politician, was born in the Vosges. Educated at Nancy. Became a Paris journalist, 1882. Deputy for Nancy, 1889; for Paris, 1906. Individualist and extreme nationalist. Wrote: *Le Culte du Moi*, 1889-1892; *L'Ennemi des lois*, 1893; *L'Âme Française et la Guerre*, 1915. Edited *Souvenirs d'un Officier de la Grande Armée* (memoirs of his grandfather), 1923. (1862-1923).

Barrett, Wilson (William Henry Barrett), actor and playwright. His two great hits were in *The Silver King*, 1882; and his own play *The Sign of the Cross*, 1896. All his acting and playwriting were for broad effect. (1846-1904).

Barrehead, an industrial town of Renfrewshire, Scotland, 7 m. SW. of Glasgow. It has brass and iron foundries, cotton mills, bleaching and dyeing works and calico-printing and shawl-making factories. Pop. 11,000.

Barrie, Sir James Matthew, a writer with a rich vein of humour and pathos, born at Kilmculm (Thrum's) in Forfarshire; began his literary career as a contributor to journals; author of *André Lorrain*, *A Window in Thrums*, *The Little Minister*, *Margaret Ogilvy*, etc. As a dramatist was the author of *Peter Pan*, *Quality Street*, *The Admirable Crichton*, etc.; created a baronet in 1913.

Wrote *The Boy David* specially for Elisabeth Bernger, who appeared in the title rôle at Edinburgh and London in 1936. (1860-1937.)

Barrier Reef, The Great, a slightly interrupted succession of coral reefs off the coast of Queensland, of 1,200 m. extent, and 100 m. wide at the S., and growing narrower as they go N.; are from 70 to 20 m. off the coast, and protect the intermediate channel from the storms of the Pacific.

Barrington, John Shute, first Viscount, gained the favour of the Nonconformists by his *Rights of Dissenters*, and an Irish peerage from George I. for his *Disseverance from Jacobinism*. (1678-1734).

Barrington, Rutland (George Rutland, land Fleet), actor in comic-opera. First of his many famous

appearances in Gilbert and Sullivan was in *The Sorcerer*, 1877. At his best the personification of Gilbertian humour, preternaturally solemn. (1853-1922).

Barrington, Hon. Samuel, admiral, fifth son of first Viscount Barrington, entered Navy 1740, performed many feats of war against French: in Basque Roads Expedition, 1757; at Havre-de-Grâce, 1759; at Belle Isle, 1761; commander-in-chief W. Indies, 1778—took St. Lucia—superseded by Vice-admiral Byron. At taking of Grenada, 1779, and Gibraltar, 1782. Admiral, 1787. (1729-1800).

Barrister, a member of the highest branch of the law, having sole right to practise in the superior courts of England. He must be a member of one of the Inns of Court (Inner Temple, Middle Temple, Lincoln's Inn, Gray's Inn). Students of either sex are admitted as members of Inns on passing preliminary examination or its equivalent. Before being called to the Bar a member must "keep" twelve terms by dining in hall and pass the examination of the Council of Legal Education. A barrister must be instructed in "brief" by a solicitor. He is not punishable for anything said in court which is contained in instructions and relevant to the issue. To take "silk" (i.e., to practice "within the Bar" as a King's Counsel) a barrister must make application to the Lord Chancellor.

Barros, João de, a distinguished Portuguese historian; his great work *Ásia Portuguesa*, relates, in a pure and simple style, the discoveries and conquests of the Portuguese in the Indies; he did not live to complete it. (1498-1570).

Barrow, an artificial mound or tumulus, of earth and stones, piled up over the remains of the dead; such mounds were often made in ancient times in England and Scotland—in the latter country they are known as "cairns." One of the most notable barrows is that at Silbury Hill, near Marlborough.

Barrow, a river in Ireland (Eire) rising in the Slievebloom Mts.; falls into Waterford harbour, after a course of 114 m.

Barrow, Isaac, divine and mathematician, born in London, son of the king's linen draper. At Cambridge, Professor of Greek, 1660; Lucasian Professor of Mathematics, 1664—resigned in favour of Isaac Newton, 1669. Master of Trinity College, 1672. Wrote *Lectures Opticæ*, *Lectures Geometricæ*, and expositions of the Creed, Lord's Prayer, Decalogue and Sacraments. (1630-1677).

Barrow, Sir John, secretary to the Admiralty for 40 years, distinguished also as a man of letters; one of the founders of the Royal Geographical Society. (1764-1848).

Barrow-in-Furness, a town and Lancashire, England, of rapid growth, when the discovery of extensive deposits of iron in the neighbourhood led to the establishment of smelting works, large manufacture of steel, and a shipbuilding yard. Pop. 66,000.

Barry, a seaport of Glamorganshire, S. Wales, 7 m. SW. of Cardiff. Its excellent docks can accommodate the largest vessels; coal, coke, and cement are exported. Pop. 39,000.

Barry, Sir Charles, architect, born at Westminster; architect of the Houses of Parliament at Westminster, besides other public buildings. (1795-1860).

Barry, Spranger, Irish actor, who was the friend and, later, rival of David Garrick in London; most successful in emotional parts. (1719-1777).

SIR J. M. BARRIE

Barry Cornwall. See Procter.

Bart, or **Barth, Jean,** a distinguished French seaman, born at Dunkirk, son of a fisherman, served under De Bytler, entered the French service at 20, purchased a ship of two guns, was subsidised as a privateer, made numerous prizes; defeated the Dutch admiral, De Vries, for which he was ennobled by Louis XIV. (1650-1702).

Barter, the carrying on of trade by the simple exchange of commodities which has been practised by all nations during their growth and is still the practice of primitive peoples. Since the Great War barter agreements for the exchange of commodities have been arranged between some countries in order to avoid the difficulties created by exchange fluctuations.

Barth, Heinrich, a great African explorer, born at Hamburg; author of *Travels and Discoveries in North and Central Africa*, in five volumes. (1821-1865).

Barthélemy, The Abbé, Jean Jacques, a French historian and antiquary, born at Cassis, in Provence; educated by the Jesuits; had great skill in numismatics; wrote several archaeological works, in chief, *Voyage du Jeune Anacharsis en Grèce*; long treated as an authority in the history, manners, and customs of Greece. (1716-1795).

Barthez, Paul Joseph, a celebrated physician, physiologist, and encyclopedist, born at Montpellier, where he founded a medical school; suffered greatly during the Revolution; was much esteemed and honoured by Napoleon; is celebrated among physiologists as the advocate of what he called the Vital Principle as a physiological force in the functions of the human organism; his work *Nouveaux Eléments de la Science de l'Homme* has been translated into all the languages of Europe. (1734-1806).

Bartholdi, Frédéric Auguste, a French sculptor, born at Colmar; his principal works, "Lion de Belfort" and "Liberté éclairant le Monde," the largest bronze statue in the world, being 200 ft. high, presented by the French government to the U.S.A. to commemorate the centenary of the latter's independence, and erected at the entrance of New York harbour. (1834-1904).

Bartholomew, St., an apostle of Christ, and martyr; represented in art with a knife in one hand and his skin in the other; sometimes painted as being flayed alive, also as headless. Festival, Aug. 24.

Bartholomew Fair, an annual market held at Smithfield, London, and instituted in 1133 by Henry I., to be kept on the saint's day; once the chief cloth fair in England, it was abolished in 1855, when it had ceased to be a market and became an occasion for mere dissipation and riot.

Bartholomew's Day, St., Aug. 24, a memorable for the wholesale massacre of the Protestants in France at the instance of Catherine de Medici, then regent of the kingdom for her son, Charles IX., an event cruelly gloried in by the then Pope and the Spanish Court.

Bartholomew's Hospital, St., a hospital in Smithfield, London, founded in 1123, by Rahere, head of an adjoining priory of Augustinian canons; has a medical school attached to it, with which the names of a number of eminent physicians are associated.

Barthou, Jean Louis, French lawyer and statesman. Minister of public works, 1894 and 1906-1909. Held many other high offices, and was prime minister for a brief period in 1913. A firm

adherent of Poincaré during settlement negotiations after Great War. Foreign Minister when assassinated, together with King Alexander of Yugoslavia, in Marseilles. (1862-1934).

Bartók, Béla, Hungarian composer, born at Nagyszombat, now in Yugoslavia. His *Kossuth*, 1903, performed in Manchester, 1904. (1881-).

Bartolommeo, Fra, a celebrated sacred subjects, born at Florence; an adherent of Savonarola, friend of Raphael; "St. Mark" and "St. Sebastian" are among his best productions. (1475-1517).

Bartolozzi, Francesco, an eminent engraver, born at Florence; wrought at his art both in England and in Portugal where he died; his chief works "Clytie," after Annibale Caracci, and "Prometheus," after Michelangelo, and "Virgin and Child," after Carlo Dolce. (1727-1815).

Barton, a village and parish of the Isle of Wight, an E. suburb of Newport. Pop. 2,000. "Barton beds" or "Barton series" are the terms derivatively given by geologists to a series of beds or strata laid bare in Barton Cliff.

Barton, Bernard, the "Quaker poet," born in London; a clerk nearly all his days in a bank; his poems, mostly on homely subjects, but instinct with poetic feeling and fancy, gained him the friendship of Southey and Charles Lamb. (1784-1849).

Barton, Sir Edmund, Australian statesman. In New South Wales parliament from 1879; speaker, legislative council, 1883-1887. Attorney-general in government of Sir George Dibbs, 1889. Protectionist. In 1900, in London, head of delegation presenting Commonwealth Constitution Bill. First Prime Minister of Australia, 1901-1903. (G.C.M.G., 1902.) Thenceforward senior puisne judge. (1849-1920).

Barton, Elizabeth, "the Maid of Kent," a poor country servant-girl, born in Kent, subject from nervous debility to trances, in which she gave utterances ascribed by Archbishop Warham to divine inspiration, till her communications were taken advantage of by designing people, and she was led by them to pronounce sentence against the divorce of Catharine of Aragon, which involved her and her abettors in a charge of treason, for which they were all executed at Tyburn. (1506-1534).

Barton-upon-Humber, a market town of Lincolnshire, England, SW. of Hull; an ancient port, with two fine old churches. Tanning and malting are carried on, and bricks, pottery, rope, and sailcloth made. Pop. 8,000.

Baruch, (1) the friend of the prophet Jeremiah, and his scribe, who was cast with him into prison, and accompanied him into Egypt; (2) a book in the Apocrypha, instinct with the spirit of Hebrew prophecy, ascribed to him; (3) also a book entitled the Apocalypse of Baruch, affecting to predict the fall of Jerusalem, but obviously written after the event.

Baruch, Bernard Mannes, American war-finance, son of Dr. Simon Baruch. Practised on New York Stock Exchange until 1916. Member of advisory committee of Council of National Defence. Chairman of Committee on Raw Materials, Minerals and Metals; head of commission purchasing for Allies. Chairman of War Industries Board. (1870-).

Baryta, the monoxide of barium, a greyish-white, solid earth occurring in the mineral barytes, or heavy spar, and witherite. It can be formed by burning barium in air or by heating barium nitrate.

Basalt, a common basic rock formed from the solidification of volcanic lava.

Commonly the lava cooled in the shape of columns and such structures are found in the Giants Causeway in N. Ireland and Fingal's Cave in Staffa I. in the Hebrides.

BASALT COLUMNS AT STAFFA

Baseball, America's national summer sport, bearing a resemblance to both rounders and cricket. Played at fast pace with nine players a side, it abounds in thrills, and is watched by large crowds. High fees are paid for players, of whom the most famous has been "Babe" Ruth.

Basel (*Bâle*), a town in the NW. of Switzerland, on the Rhine, just before it enters Germany; has a cathedral, university, library and museum; was a centre of influence in Reformation times, and the home for several years of Erasmus; it is now a great money-market, and has manufactures of silks and chemicals; the people are Protestant and German-speaking. Pop. 148,000. The canton of the name is divided into 2 parts, Stadt and Land. Pop. (Basel-Stadt) 155,000; (Basel-Land) 92,000.

Basel, Council of, met in 1431, and laboured for 12 years to effect the reformation of the Church from within. It effected some compromise with the Hussites, but was hampered at every step by the opposition of Pope Eugenius IV. Asserting the authority of a general council over the pope himself, it cited him on two occasions to appear at its bar, on his refusal declared him contumacious, and ultimately endeavoured to suspend him. Failing to effect its purpose, it elected a rival pope, Felix V. Frederick III. supported Eugenius, and the council gradually melted away. At length, in 1449, the pope being dead, Felix resigned, and Nicholas V. was recognised by the whole Church. The decrees of the council were directed against the immorality of the clergy, the papal prerogatives and exactions, and dealt with the election of popes and the procedure of the College of Cardinals. They were all confirmed by Nicholas V., but are not recognised by modern Roman canonists.

Bases, the name given to those chemical substances which neutralise acids to give salts and water; the class includes the hydroxides and normal oxides of metals, as well as ammonium hydroxide and the hydroxides of organic ammonia derivatives (amines). Those bases which are soluble in water and turn red litmus blue are called alkalis. On the modern theory, a base is a substance which can readily combine with protons. The principal bases are sodium and potassium hydroxides, lime, and ammonia.

Bashahr, a native hill state in the Sulej, Punjab, India, traversed by the Sutlej; tributary to the British Government.

Bashan, a fertile and pastoral district extent, and at one time densely peopled; famous in Biblical times for its oaks and its cattle. Og, the king, was defeated by the Israelites and the country given to the tribe of Manasseh. Under Roman rule the district flourished but decayed thereafter; to-day only deserted ruins remain.

Bashi-Bazouks, irregular, undisciplined troops in the pay of the Sultan; rendered themselves odious by their brutality in the Bulgarian atrocities of 1876, as well as, to a lesser extent, in the time of the Crimean War.

Bashkir, autonomous Soviet Republic, in European Russia, adjoining the Urals. Ufa is the cap. Area, 40,000 sq. m. Pop. 2,695,000.

Bashkirs, originally a nomad race of E. Russia, professing Mohammedanism; they number some 500,000.

Basil, St., The Great, Bishop of Caesarea, in Cappadocia, his birthplace; studied at Athens; founded a monastic body, whose rules are followed by different monastic communities; a conspicuous opponent of the Arian heresy, and defender of the Nicene Creed; tried in vain to unite the Churches of the East and West. (328-379).

Basil I., the Macedonian, Emperor of the East; though he had raised himself to the throne by a succession of crimes, governed wisely; compiled, with his son Leo, surnamed the Philosopher, a code of laws that were in force till the fall of the empire. (d. 886).

Basilica, the code of laws, in 60 books, compiled by Basil I., and Leo, his son and successor, first published in 887, and named after the former.

Basilica, a spacious roofed hall, twice as long as broad, for public business and the administration of justice, with the judge's bench at the end opposite the entrance, in a circular apse added to it. They were first erected by the Romans, 180 B.C.; afterwards, on the adoption of Christianity, they were converted into churches, the altar being in the apse.

Basilicon Doron (*i.e.* Royal Gift), a work written by James I. in 1599, before the union of the crowns, for the instruction of his son, Prince Henry, containing a defence of the royal prerogative.

Basilides, a Gnostic of Alexandria, flourished at the commencement of the 2nd Century; appears to have taught the Oriental theory of emanations, which construes the universe as made up of a series of worlds, some 365 it is alleged, each a degree lower than the preceding, till we come to our own world, the lowest and farthest off from the parent source of the series, of which the God of the Jews was the ruler.

Basilisk, an animal fabled to have been hatched by a toad from the egg of an old cock, before whose breath every living thing withered and died, and the glance of whose eye so bewitched one to his ruin that the bravest could confront and overcome it only by looking at the reflection of it in a mirror; seeing itself in a mirror, it burst, it was said, at the sight.

Also a genus of edible lizards of the Iguanidae family, found in Central America, the male of which has a spiny crest on the back. They live in trees, but take to the water when alarmed.

BASILISK

Basingstoke, a market town and municipal and parliamentary borough of Hampshire, England. A railway junction and the terminus of the Basingstoke canal; it is an agricultural centre and makes farm implements, clothing, and beer. Pop. 14,000.

Baskerville, John, a printer and typographical founder, originally a writing-master in Birmingham; native of Wolverley, Worcestershire; produced editions of classical works prized for their pre-eminent beauty by connoisseurs in the art of the printer. (1706-1775).

Basket, a vessel made of willow, cane, or other materials. Specially grown willows are mostly used, the best being grown in Leicestershire and Nottinghamshire.

BASKET BALL

Basket Ball, a ball game played in an oblong field, not exceeding 3,500 sq. ft., by opposing teams of five. The goal each end consists of a pole 10 ft. high, with ringed net at top, 18 in. in diameter, fixed horizontally. The ball is put into play by the referee tossing it between the centre players. A player is out of bounds when any part of his body touches the boundary line, the floor or any object outside of the boundary line. A goal is made when the ball enters the net. The ball may be passed, rolled, batted, thrown, dribbled, in any direction.

Basking Shark (*Cetorhinus maximus*), a monster fish found in temperate seas. It has been known to grow to a length of more than 40 ft. It has a habit of basking near the surface, and is met off the W. coasts of Scotland and Ireland. It feeds on larval fish, crustaceans, etc., and is usually harmless unless attacked, when its great milk can render it dangerous to small boats.

Basnage, Jacques, a celebrated Protestant, testant divine, born at Rouen; distinguished as a linguist and man of affairs; wrote a *History of the Reformed Churches and in Jewish Antiquities*. (1653-1725).

Basoche, a former guild of clerks of the Paris Parliament.

Basque Provinces, a fertile and mineral district in N. of Spain, embracing the three provinces of Biscaya, Guipuzcoa, and Alava, of which the chief towns are respectively Bilbao, St. Sebastian, and Vittoria; the natives differ considerably from the rest of the Spaniards in race, language and customs.

Basque Roads, an anchorage between the Isle of Oléron and the mainland; famous for a British naval victory gained in 1809 over a French fleet under Vice-Admiral Allemand.

Basques, a people of the W. Pyrennes, partly in France and partly in Spain; distinguished from their neighbours by their speech, which is non-Aryan; a superstitious people conservative, irascible, ardent, proud, serious in their religious convictions, and pure in their moral conduct. They number about 600,000, of which total 120,000 are in French territory. Some 210,000 Basques are to be found as immigrants or descendants of immigrants in Argentine and Mexico.

Basrah, or **Bassorah**, a town in Iraq, at the mouth of the Euphrates and Tigris, used as a base by the British forces in Mesopotamia in the Great War. Site of an R.A.F. station and aerodrome, and on the England-India air route. Also a liwa (territorial division). Pop. (liwa) 248,000; (town) 80,000.

Bas-Relief, sculptural work, either little from the background, as distinguished from complete figure sculpture.

Bass, the name applied to any perch-like fish. The English variety is a sea fish; some are fresh-water fish. All are valued as food.

Bass, or **Base**, a musical term. In the base voice the compass is usually from F below the B clef to D above it. The base is the lowest part in the harmony of a composition, and the lowest pitched of a class of musical instrument.

Bass Rock, a steep basaltic rock, at Forth, 350 ft. high, tenanted by solan geese; once used as a prison, especially in Covenanting times.

BLACK BASS

BASTIAT

Bass Strait, strait between Australia and Tasmania, about 150 m. broad, named after George Bass, explorer, who accompanied Matthew Flinders on his voyage to Australia (1798).

Bassano, a town in Italy, on the Brenta, 30 m. NW. of Padua; formerly had a flourishing printing industry. Scene of a French victory under Napoleon over the Austrians (1796). Pop. 20,000.

Bassano, or **Jacopo da Ponte**, an eminent Italian painter, chiefly of country scenes, though the "Nativity" at his native town, Bassano, shows his ability in the treatment of higher themes. (1510-1592).

Bassein, a district in Lower Burma on the E. of the Irrawaddy delta; also the capital of the district. Rice is produced. Pop. 42,000.

Basses-Pyrénées, a dept. in the SW. of France which forms the boundary with Spain; among the mountain peaks passes to the number of over twenty lead from one country to the other, including the Pass of Roncaveaux (Roncesvalles) associated with Roland the paladin. Pop. 423,000.

Basset-Horn, a musical instrument, the tenor of the clarinet family, having more than three octaves in the compass, extending upwards from F below the bass stave. It differs from the shape of the clarinet in having a wider bell-mouth.

Bassompierre, **François de**, a marshal of France, born in Lorraine; entered military life under Henry IV., was a gallant soldier, and one of the most brilliant wits of his time; took part in the siege of Rochelle; incurred the displeasure of Richelieu; was imprisoned by his order twelve years in the Bastille; wrote his Memoirs there; was liberated on the death of Richelieu. (1579-1646).

Bassoon, a wood-wind musical instrument. It is a hollow, tapering cone some 8 ft. long, composed of five pieces called the crook, wing, butt, joint, and bell. The mouth-piece is a double reed of 4 in. The wing joint and the butt joint each contain three holes for the first three fingers, and the butt joint contains also a single hole on the back for the thumb, and the long joint a series of keys.

Bastard, a person born out of lawful wedlock. Such a child can become legitimate in England on the subsequent marriage of the parents, provided at the time of birth both were free to marry. The father of a legitimated child must, at the time of the legitimating marriage, be domiciled in England or Wales. The Act legitimating natural issue operates as from Dec. 15, 1926, and the rights of succession to property acquired by legitimation are confined to dispositions made after legitimation took place.

Bastia, a town in NE. Corsica, the most commercial in the island, and once the capital; exports oil, fruits, etc. Pop. 35,000.

Bastian, **Adolf**, German anthropologist, born at Bremen, and educated as a physician. Between 1851 and 1903 travelled in Central Asia, Loango (W. Africa), Equatorial America, Australasia, Central and S. America, Farther India, India and Ceylon. Professor of Ethnology, Berlin, and administrator of Ethnological Museum there, from 1868. Most important work: *Peoples of Eastern Asia*, 1866-1867. (1826-1905).

Bastiat, **Frederic**, an eminent political economist, born at Bayonne; a disciple of Cobden; a great advocate of Free Trade; wrote on behalf of it and against Protection, *Sophismes Economiques*; a zealous anti-Socialist. (1801-1850).

Bastide, Jules, French Radical writer, born in Paris; took part in the Revolution of 1830, and later became Minister for Foreign Affairs. (1800-1879).

Bastien-Lepage, Jules, an eminent of pastoral scenes of the realistic school; also painted portraits of King Edward VII., when Prince of Wales, and Sarah Bernhardt. (1848-1884).

Bastille (*the Building*), a State prison in Paris, built originally as a fortress of defence to the city, by order of Charles V., between 1369 and 1382, but used as a place of imprisonment from the first; a square structure, with towers and dungeons for the incarceration of the prisoners, the whole surrounded by a moat and accessible only by drawbridges; "tyranny's stronghold"; attacked by a mob on July 14, 1789; demolished, and the key of it sent to Washington; the taking of it was the first event in the Revolution.

Bastinado, a European name for an Eastern method of punishment. It is given by beating, generally the soles of the feet, with a thin lath.

Basutoland, a fertile, healthy, grain-inhabited by the Basutos, an intelligent and industrious race and under protection of the British Crown; yields great quantities of maize; the natives keep large herds of cattle. The soil suffers from erosion through overstocking of cattle.

The territory came under the British Crown in 1868, when Moshesh, the chief, sought British protection against the Orange Free State burghers. It is one of the three High Commission territories which the S. African Govt. has frequently asked should be incorporated in the Union of South Africa. Pop. 560,000. There are 1,600 whites.

Bat, an animal of the Chiroptera order, related to the hedgehog and shrew,

and able to fly. Its senses are well developed, especially that of sight. Between the long fingers is a skin which is joined to the hind legs and tail, forming wings, and there is a remarkably sensitive nerve structure in the membrane of the nose and the wings. The ears of bats are very large and movable.

They live everywhere except in very cold areas, are nocturnal and are classified according to the food they eat, into *Megachiroptera* (fruit-eating) and *Microchiroptera* (insect-eating). The Pipistrelle is the largest of the English bats. There are three blood-sucking species, which attack men and animals in their sleep, though none occurs in England.

Batangas, a port in the island of Luzon, one of the Philippine Is., which has a considerable trade. Pop. 40,000.

Batavia, the capital of Java, on the N. coast, and of the Dutch possessions in the Eastern Archipelago; the emporium, with a large trade, of the Far East; has a very mixed population. Also the ancient name of Holland; *Insula Batavorum*, it was called—that is, island of the Batavi, the name of the native tribes inhabiting it. Terminus of the Dutch air line to the East. Pop. (prov.) 2,780,000, (town) 290,000.

"Love and Life," considered his masterpiece, Queen Victoria statue at Dundee, and Lord Roberts statue at Calcutta. (1850-1899).

Bates, Henry Walter, a naturalist and traveller, born at Leicester; friend of, and a fellow-labourer with, Alfred R. Wallace; author of *The Naturalist on the Amazona*. (1825-1892).

Bath, the largest town in Somerset, England, on the Avon; a cathedral city; a place of fashionable resort from the time of the Romans, on account of its hot baths and mineral waters, of which there are six springs; it was from 1701 to 1750 the scene of Beau Nash's triumphs; has a number of educational and other institutions and a fine public park. Pop. 69,000. Also a town in Maine, U.S.A. Pop. 9,000.

Bath, Order of the, an English order of knighthood, traceable to the reign of Henry IV., consisting of three classes; the first, Knights Grand Cross (G.C.B.); the second, Knights Commanders (K.C.B.), and the third, Companions (C.B.); initiation into the order originally preceded by immersion in a bath, whence the name, in token of the purity required of the members by the laws of chivalry. It was originally a military order, and it is only since 1847 that civil Knights, Knights Commanders, and Companions have been admitted. The motto of the order is *Tria juncta in uno* (Three united in one), and the ribbon is crimson.

ORDER OF THE BATH
(GRAND CROSS)

Bath, Thomas Thynne, first Marquess of, son of second Viscount Weymouth, whom he succeeded 1751. Displaced Lord-Lieutenant of Ireland, 1765; never went there. Secretary of State, N. dept., 1768; acted vigorously in suppressing Wilkes's agitation. Transferred to S. dept.; resigned, 1770, after nearly precipitating war with Spain. Again Secretary for S. dept., 1775-1779 for N. dept. also, 1779. Created Marquess of Bath, 1780. (1734-1796).

Bath, William Pulteney, Earl of, son of Col. Wm. Pulteney, Whig M.P. for Hedon, 1705-1734. Secretary for War, 1714. Broke with Walpole, 1725, and formed "the patriots" party. Struck off list of P.C.s by George II., 1731; restored, 1742. M.P., Middlesex, 1734-1742. Earl of Bath, 1742. In 1746, Prime Minister for 2 days. (1684-1764).

Bathgate, largest town in Linlithgowshire, Scotland; a mining centre. Pop. 10,000.

Bathori, Elizabeth, a Polish princess, a woman of infamous memory, caused some 650 young girls to be put to death, in order, by bathing in their blood, to renew her beauty; immured in a fortress for life on the discovery of the crime, while her accomplices were burnt alive; d. 1614.

Bathsheba, a woman of great beauty, wife of Uriah the Hittite (2 Sam.), who became wife of David after he had secured the death of Uriah in battle; the mother of Solomon.

Bathurst, (1) the principal town on the western slopes of New South Wales, with gold mines in the neighbourhood, and in a fertile wheat-growing district. Pop. 10,000.

(2) The capital of British Gambia, at the mouth of the R. Gambia, in W. Africa; inhabited chiefly by negroes; chief export ground-nuts (for manufacture of margarine). The town is being greatly improved by a reclamation scheme. Pop. 9,000.

Bathybius (i.e. living matter in the deep), substance of a slimy nature found at great sea depth, over-hastily assumed by Huxley to be organic; proved by recent investigation to be inorganic and of no avail to the evolutionist.

Batley, a manufacturing town in the m. SW. of Leeds; a centre of the textile trade. Pop. 35,000.

Baton-Rouge, a city on the E. bank of the Mississippi, U.S.A., 130 m. above New Orleans, and capital of the state of Louisiana; originally a French settlement. Scene of Brockenridge's defeat in the Civil War. Pop. 31,000.

Baton-Sinister, a bend-sinister like an indication of illegitimacy.

Batoum (Batumi), a town in Georgia, Transcaucasia, on the E. of the Black Sea; capital of the autonomous Russian republic of Adjara, a place of some antiquity; has an excellent harbour, and is the terminus of the railway from Baku and Tiflis. Also connected with Baku by a petroleum oil-line. Pop. 41,000.

Batrachians, another name in zoology for the Amphibians (q.v.) the group of vertebrates which includes the frogs, toads, newts, etc.

Battalion, a military unit numbering 1,000 men at war strength and 860 at colonial garrison strength. It is formed of four or five companies, one of which is a machine-gun company. Battalions in other countries number 500 to 1,000 men. A British battalion is commanded by a lieutenant-colonel. The development of mechanisation is tending to reduce the numerical strength of a battalion even on active service.

Battas, a Malay race, native to Sumatra, now much reduced in numbers and driven into the interior. They are tillers of the soil, and have a written language. Cannibalism, practised until recent times, has been suppressed by the Dutch, under whose rule they are.

Batten, Jean Gardner, C.B.E., New Zealand aviator. First woman to fly non-stop solo, England to Rome, flew alone, England to India, 1932. In 1936 she flew from Lympne, England, starting on Oct. 5, and landing at Auckland in New Zealand, Oct. 16, thus completing in 11 days 56 min. the first direct flight from England to New Zealand and being the first woman to fly the Tasman Sea. In 1937 she flew from Australia to England in 5 days 18 hrs. 15 mins. (1910-).

Battenberg, name of a town in Hesse-Nassau; conferred, 1858, as a princely title on the wife and issue of themorganatic marriage of Prince Alexander of Hesse with the Polish Countess Julia Theresa von Hauke. There were four sons and one daughter of the marriage. Louis Alexander, eldest son, became a British admiral and Marquess of Milford-Haven. He married Victoria, daughter of Prince Louis IV. of Hesse, and granddaughter of Queen Victoria, and in 1917 renounced his German title in favour of the surname Mountbatten (q.v.). (1854-1921). Henry Maurice, third son, married Queen Victoria's daughter Beatrice, and died returning from Ashanti (1858-1896); his daughter Victoria Eugénie married Alfonso XIII. of Spain. The eldest son, Alexander, bears the title Marquess of Carlsbrooke.

Battering Ram, an engine of war cannon. It was constructed of a long wooden beam or spar with metal head and was designed for breaking through walls, etc. The operators were protected by a screen. It was put into motion by means of pulleys.

Battersea, a suburb of London, England, Thames, opposite Chelsea, and connected with it by three bridges; with a park 185 acres in extent. Has a large electric power station. Pop. 160,000.

Battery (military), the basic unit of field artillery, normally consisting of six guns and gun-carriages, ammunition and stores, horses, mules and motors; the personnel includes a major, with a captain second in command, other officers, non-commissioned officers and men.

Battery, a chemical generator of electricity consisting of two metallic plates immersed in certain solutions. The chemical action taking place inside the cell causes a current to flow if the two plates are connected by a wire. The simplest battery consists of two plates, one copper, one zinc, dipping into dilute sulphuric acid; such a cell ceases to act after a time owing to bubbles of hydrogen collecting on the plate, and the batteries in general use contain some substance which will remove the hydrogen as it is formed, e.g. nitric acid or potassium bichromate. Dry cell batteries in general use contain a paste of sal-ammoniac and manganese dioxide.

Batthyani, Count Louis, a Hungarian patriot, who fought hard but in vain to see his country reinstated in its ancient administrative independence; was arrested by the Austrians, tried by court-martial, and shot. (1804-1849).

Battle, a market town in Sussex, England, near Hastings, so called from the Battle of Senlac, in which William the Conqueror defeated Harold in 1066. It is famous for its abbey, which is now a girls' school. Pop. 3,500.

Battle-Axe, an instrument of warfare, in use from the earliest times. It was a cleaving weapon, the head being of stone in most primitive times, of bronze during the Bronze Age, and later of iron and steel. In the Middle Ages it was frequently attached to the wrist by an iron chain. It was with such a weapon that Robert the Bruce killed Henry de Bohun with a single blow at the Battle of Bannockburn.

BATTLE-AXE

Battle Creek, a city of Michigan, U.S.A., centre of an agricultural district; prepared foods are manufactured and there are extensive engineering works. Pop. 43,000.

Battle Honours, the name usually given to the names of campaigns, sieges, etc., worked on the regimental colours or standards of infantry and cavalry regiments and to regimental mottoes, badges, or other devices. All battle honours are granted by the King in Army Orders, and will be found recorded in the Army List. The names mostly begin about the end of the 17th Century. The nomenclature of battles of the Great War was settled by a departmental committee set up after the War.

Instances of distinctive badges, etc., are those of the Gloucestershire Regiment worn both in front and at the back of the cap to commemorate their defeat of the Invincible Legion of Napoleon at Alexandria, which attacked them both in front and in the rear; the "flash" of the Royal Welch Fusiliers, etc. The honours of Artillery units are given in the form of special titles of batteries.

Battlement, a protective parapet on a intervening space (called crenelles) at regular

intervals through which a soldier could shoot whilst remaining protected by the uprights or merlons.

Battle of the Books. See Swift, Jonathan.

Battle of the Spurs, (1) an engagement at Courtrai in 1302 where the burghers of the town beat the knighthood of France, and the spurs of 4,000 knights were collected after the battle; (2) an engagement at Guinegate, 1513, in which Henry VIII. made the French forces take to their spurs.

Battleship, the heaviest class of war-ship, often referred to as capital ships, a term which includes battle-cruisers, which are nominally faster boats, the extra speed being achieved at some slight sacrifice of armour. Armour plate was first used to protect warships by the French after Russian shore batteries had done some considerable damage to wooden ships in the Crimea. These true "Ironclads" were still built of wood, but were successfully protected with 4-in. wrought-iron plates.

England did not follow suit until 1859, when the building of an iron warship, the *Warrior*, was commenced. This ship was of 9,000 tons displacement, and was protected with 4-in. plates. Revolving turrets were introduced in the *Royal Sovereign* in 1862, and shortly became the standard main armament of a battleship, the type ship being the *Decastation*, with armour varying from 8 in. to 12 in. and two 2-gun turrets protected by 14-in. armour, a type which was followed, with improvements, for some 20 years.

Increase in gun-power has accounted for most subsequent developments. Larger vessels had to be built to carry the heavy armament. Heavier armour and improved substitutes for wrought-iron plates, with greater resisting power, were introduced to withstand the heavier fire. The *Dreadnought*, completed and commissioned in 1906, has been called the forerunner of the modern Navy. She was 490 ft. long, displaced 17,900 tons, carried ten 12-in. guns in five turrets and a number of smaller guns and had a speed of 21 knots.

To-day there are 15 capital ships in the British navy (three, including the *Hood*, the most powerful ship afloat, classifying officially as battle-cruisers) and five authorised in estimates. The Washington Conference attempted to limit the size and armaments of battleships, and a Treaty, signed there in 1922, prescribed a limit of 35,000 tons and 16-in. guns for battleships. At the London Naval Conference of 1935 it was hoped to devise means to continue the benefits of the Washington Treaty which, in the meantime, had become unacceptable to many of its signatories, especially the United States and Japan. But this hope proved ill-founded and Great Britain has been, in effect, compelled to follow the United States and Japan in notifying the other signatories of their intention to abrogate the Washington Treaty limits. The London Naval Treaty of 1936, however, provides for the interchange between signatories of information regarding their intended building programmes.

Battue, method of killing game after gathering, crowding them by cries and beating them towards the sportsmen.

Bauchi, an upland province of N. Nigeria, W. Africa, having an area of about 20,000 sq. m. Formerly a slave-trading centre, it was brought under British control in 1902. Its capital bears the same name.

Baudelaire, Charles Pierre, French school, born in Paris; distinguished among his contemporaries for his originality and his influence on others of his class; was a charming writer of prose and verse. (1821-1867).

Bauer, Bruno, a daring Biblical critic, and violent polemic on political as well as theological subjects; born at Saxe-Altenburg; regarded the Christian religion as overlaid and obscured by accretions foreign to it; denied the historical truth of the Gospels, and, like a true disciple of Hegel, ascribed the troubles of the 19th Century to the overmastering influence of the "Enlightenment" or the "Aufklärung" that characterised the 18th Century. (1809-1882).

Baumgarten, Alexander Gottlieb, professor of Philosophy at Frankfort-on-the-Oder; disciple of Wolff; born at Berlin; the founder of Aesthetics as a department of philosophy, and inventor of the name. (1714-1762).

Baur, Ferdinand Christian, head of the Tübingen school of rationalist divines, born near Stuttgart; distinguished by his scholarship and his labours in Biblical criticism and dogmatic theology; his dogmatic treatises were on the Christian Gospels, the Atonement, the Trinity, and the Incarnation, while his Biblical treatises were on certain epistles of Paul and the canonical Gospels, which he regarded as the product of the 2nd Century; regarded Christianity of the Church as Judaic in its origin, and Paul as the first apostle of pure Christianity. (1792-1860).

Bautzen, old town of Saxony, on the Spree, where Napoleon defeated the Prussians and Russians in 1813; manufactures textiles, tobacco, etc. Pop. 42,000.

Bauxite, a hydrated oxide of aluminium, and ferric oxide occurring as a mineral in most parts of the world and used in the manufacture of aluminium, alum, and cement.

Bavaria, next to Prussia the largest of the German States; is separated by mountain ranges from Czechoslovakia on the E. and the Tyrol on the S.; Württemberg, Baden, and Hesse lie on the W., Prussia, Thuringia, and Saxony on the N. The country is a tableland crossed by mountains, and lies chiefly in the basin of the Danube. It is a busy agricultural state; a third of the soil is tilled; the rest is under grass, planted with vineyards, or forest land. Salt, coal, and iron are widely distributed and wrought.

The chief manufactures are beer, coarse linen, and woollen fabrics. There are universities at Munich, Würzburg, and Erlangen. Munich, on the Isar, is the capital; Nuremberg, where watches were invented, and Augsburg, a banking centre, are the other chief towns. Formerly a dukedom, the palatinate, on the banks of the Rhine, was added to it in 1216. Napoleon I. raised the duke to the title of king in 1805.

Bavaria fought on the side of Austria in 1866, but joined Prussia in 1870-1871. On Nov. 22, 1918, it became a republic, but popular government was abolished in 1935 by the Nazis, and a governor (Statthalter) with absolute power appointed. Pop. 7,700,000.

Bax, Arnold Edward Trevor, composer; Bax, first composition performed at St. James's Hall, 1903. Published *A Celtic Song-Cycle*, choral works, symphonic poems, piano pieces, and songs; orchestral music, including *The Garden of Fand*, etc. (1883-).

Bax, Ernest Belfort, English socialist writer, born at Leamington, studied in Germany. In 1885, with William Morris, founded the Socialist League. Afterwards joined the Social Democratic Federation. Called to Bar, 1894. Wrote books on philosophy, essays on socialism, a Life of Murat, other works on revolutionary movements in France and Germany, and fierce anti-feminist diatribes. (1851-1926).

Baxter, Richard, an eminent Nonconformist divine, native of Shropshire, at first a conformist, and parish minister of Kidderminster for 19 years; sympathised

h the Puritans, yet stopped short of going full length with them; acted as chaplain one of their regiments, and returned to Westminster; became, at the Restoration, one of the king's chaplains; driven out of the arch by the Act of Uniformity, was thrown on prison at 70, released, spent the rest of his life in peace; his voluminous popular works include *The Saints' Everlasting Rest*, and his *Life of the Unconverted*. (1615-1691).

ayadere, a dancing-girl in India, dressed in loose Eastern tunic; of two classes, one attached to temples and associated with religious rites, the other (Nautch girls) travelling about the country.

ayard, a horse of remarkable swiftness belonging to the four sons of a man, which they sometimes rode all at once; also a horse of Amadis de Gaula, better known under the Italian form, Bayardo.

ayard, Chevalier de, an illustrious French knight, born in the 16th century, near Grenoble; covered himself with glory in the wars of Charles VIII., Louis XII., and Francis I.; his bravery and generosity procured for him the cognomen of 'The Knight sans peur et sans reproche'; his most brilliant feat was his defence, single-handed, of the bridge over the Garigliano, the face of a large body of Spaniards; mortally wounded defending a pass at Blategrasso. (1476-1524).

ay City, a place of trade, and of importance as a great railway centre in Michigan, U.S.A.; the third city in the State. Industries include chemicals and beet-sugar. Pop. 47,000.

ayeux, an ancient Norman city in the department of Calvados, France; manufactures lace, hosiery, etc.; is a bishop's see; has a very old Gothic cathedral of the 12th century. Pop. 7,000.

ayeux Tapestry, representations in tapestry of events connected with the Norman invasion of England, commencing with Harold's visit to a Norman court, and ending with his death at the Battle of Hastings; still preserved in a public library of Bayeux; is so called because originally found there. It is 230 ft. long by 20 in. wide, divided into 72 scenes, and contains a variety of figures. Whose work the tapestry was is unknown; its first historical mention was in an inventory of 69; its later discovery due to Bernard Montfaucon, who published reproductions 1729-1733.

ayle, Pierre, a native of Languedoc; first Protestant, then Catholic, then sceptic; professor of Philosophy at Sedan, then at Rotterdam, known chiefly as the author of the famous *Dictionnaire Historique et Critique*, which became the mainstay of the sceptical philosophy that reigned in France on the eve of the Revolution. (1647-1706).

aylis, Lillian Mary, manager of Old Vic Theatre, and Sadler's Wells theatres; born in London, niece of Emma Cons, whom she succeeded at the Old Vic, 1912. Introduced takespares as a permanent programme, 1914. Co-opened Sadler's Wells, 1931. Was violinist in the orchestra. C.H., Hon. LL.D. (1874-1937).

ayonet, a short, spear-like weapon, which can be attached to a shield and used for hand-to-hand fighting. It is supposed to have been first devised at Avonnes in France, whence the name. They were first introduced into the British army in the 17th century. Recently the bayonet fixed to the British army has been shortened and lightened.

ayonne, a fortified French town, trading centre, and manufacturing, in the department of Basses-Pyrénées, at the confluence of the Adour and Nive, 4 m. from the Bay of

Biscay; noted for its strong citadel, constructed by Vauban and one of his chief-d'œuvres, and its 12th-century cathedral church; it belonged to the English from 1152 to 1451. Pop. 31,000. Also a town in New Jersey. Pop. 90,000.

Bayreuth, the capital of Upper Franconia, in Bavaria, with a large theatre erected by the King for the performance of Wagner's musical compositions, and with a monument, simple but massive, to the memory of Jean Paul Richter, who died there. Liszt was also buried here. Has a large textile industry. Pop. 37,000.

Bay Rum, an aromatic liquid composed of oil of bay, alcohol, water, oil of orange peel, etc., and used for hair-dressing.

Bay Tree, a species of laurel, growing in Italy, Greece, and other Mediterranean countries. Its leaves are dried and used as flavouring for fish dishes and soups.

Bazaar, an Eastern name of a market where goods are displayed for sale. The bazaars of Egypt and Turkey attract all visitors. The name has been adopted by shopkeepers in the W., and sales of goods by religious organisations are commonly called bazaars.

Bazaine, François Achille, a marshal of France, born at Versailles; distinguished himself in Algiers, the Crimea, and Mexico; did good service, as commander of the army of the Rhine, in the Franco-German War, but after the surrender at Sedan was shut up in Metz, surrounded by the Germans, and obliged to surrender, with all his generals, officers, and men; was tried by court-martial, and condemned to death, but was imprisoned instead and made his escape to Madrid. (1811-1888).

Bazalgette, Sir Joseph William, Civil Engineer, born at Enfield. With William Haywood, projected reform of London drainage. Appointed chief engineer to Metropolitan Board of Works, 1855. Carried out his drainage plan, 1858-1875. Formed Thames Embankments, 1862-1874. Knighted, 1874. (1819-1891).

Bazard, Saint-Amand, a French socialist, founder of the *Charbonnière Française*; a zealous but unsuccessful propagator of St. Simonism, in association with Lafontaine from whom he at last separated. (1791-1832).

Bdellium, a gum-resin product, mentioned in Genesis, to which manna was likened; generally identified with the Greek *bdellion*, a transparent, yellow, wax-like substance exuded by a tree found in the Middle East, particularly Arabia.

Beaches, formerly seen on elevated lands, the result of upheaval, or left high by the recession of the sea, their origin being shown by the shells found in them and the nature of the debris.

Beachy Head, a chalk cliff in Sussex, 375 ft. high, projecting into the English Channel; famous for a naval engagement in 1690 between the allied English and Dutch fleets and that of France, in which the latter was successful.

Beacon, originally a fire lighted on a high eminence as a sign, usually one of warning. Warning is now given on rivers and at sea by illuminated beacons on rocks, sandbanks, and to denote channels. These beacons are made of concrete or iron, and are illuminated by oil or gas. Electrically illuminated beacons serve to denote air routes and by Act of 1934 beacons may be erected to show road crossings for pedestrians. Great numbers, yellow in colour and popularly known as Belisha beacons, have now been put up throughout the country. The name

Beacon has been given to some hills where beacons formerly burned, as Dunkery Beacon, Exmoor.

Beaconsfield, capital of the gold-mining district in Tasmania; also a town in Buckinghamshire, 10 m. N. of Windsor, from which Benjamin Disraeli took his title on his elevation to the peerage. Pop. 4,800.

Beaconsfield, Benjamin Disraeli, Earl of, British politician and novelist, born in London; son of Isaac D'Israeli, litterateur, and thus of Jewish parentage; educated under a Unitarian minister; studied law, but did not qualify for practice. His first novel, *Vivian Grey*, appeared in 1826, and thereafter, whenever the business of politics left him leisure, he devoted it to fiction. *Contarini Fleming*, *Coningsby*, *Tancred*, *Lothair*, and *Endymion* are the most important of a brilliant and witty series, in which many prominent personages are represented and satirised.

His first seat in Parliament was for Maidstone in 1837; thereafter he represented

Shrewsbury and Buckinghamshire. For 9 years he was a free-lance in the House, hating the Whigs, and after 1842 leading the Young England party; his onslaught on the Corn Law repeal policy of 1846 made him leader of the Tory Protectionists. He was for a short time Chancellor of the Exchequer under Lord Derby in 1852, and abandoned Protection.

Returning to power with his chief 6 years later, he introduced a Franchise Bill, the defeat of which threw out the Government. In office a third time in 1866, he carried a democratic Reform Bill.

In 1874 he entered his second premiership. The securing of the halt of the Suez Canal shares for Britain; the proclamation of the Queen as Empress of India; the support of Constantinople against Russia, afterwards justified by the Berlin Congress; the annexation of Cyprus; the Afghan and Zulu Wars, were its salient features. Defeated at the polls in 1880 he resigned, and died next year. (1804-1881).

Beadle, now a parish constable, but in 1858, Saxon times he was a messenger who summoned householders to the moot. From the time of the Norman Conquest he was an orderly officer of the church and manor. In the Scottish church he waits on the minister.

Beagle, a small English hound largely employed in the hunt. It is only 15 to 17 in. in height, with wide shoulders and deep chest. The coat is thick and variously coloured. Beagles have great staying power.

Beale, Dorothea, a pioneer in higher education for girls. In 1853 appointed first principal of the Ladies' College, Cheltenham, which she developed on new lines; her work served as a model for the many girls' high schools which followed. (1831-1906).

Beam Transmission, a system of short-wave wireless transmission whereby the waves sent out are confined to a beam in the direction of the receiving station, instead of being radiated equally in all directions.

Bean, the seed of many plants which in different varieties form a valuable article of food. The pods of the French bean, the scarlet runner, and of some others are eaten as green vegetable. The broad bean

has many varieties and the seed is eaten. The soya bean, eaten in Japan, also makes green fodder, and oil is extracted from the seed. The green gram and black gram are valuable horse feed. Beans are much valued because of their proteid content and fattening properties.

Bear, a mammal of the Ursidae order, of chumsy and strong appearance, and covered with thick fur, with a short neck, round head, pointed muzzle, and small eyes. It is "plantigrade," i.e., walks flat-footed like man and the toes have long, curved claws. It is equipped with canine and molar teeth, being a flesh- and vegetable-eater.

The wild bear hibernates for from 2 to 6 months during the winter, and different species are found throughout Europe, Asia, America and N. Africa. The N. American bear includes the black bear, grizzly bear, Alaskan bear, and Polar bear. Other varieties include the Himalayan bear and the Malayan or Sun bear.

Bear. See **Bulls and Bears**.

Bear, Great. See **Ursa Major**.

Bear-Baiting, a form of sport at one countries and common in Roman times. It was brought to England in the 11th Century and flourished until the 18th Century. Dogs were employed to worry the animal, and wagers on "favourites" were common at public bear-gardens on Sundays and Thursdays.

Beard Moss, a botanical name for a lichen (*Usnea barbata*); the name is suggested by the fact that the lichen creeps over stems to branches of trees; hanging down in thick spliths.

Beardsley, Aubrey Vincent, a distinguished black-and-white artist with a high sense of the decorative; illustrated many notable volumes, including the *Morte d'Arthur*, and was art editor of the *Yellow Book*. (1872-1898).

Bearn, an ancient province of France, fell to the crown with the accession of Henry IV. In 1589; formed a great part of the dept. of Basses-Pyrénées; cap. Pau.

Beatification, religious honour allowed by the Pope to certain who are not so eminent in sainthood as to entitle them to canonisation.

Beating the Bounds is carried out on Ascension Day in some parishes by ministers and officers of the church and choir-boys walking in procession to the parish boundaries, and there beating with a willow as a remembrance of the location. Sometimes the boys take the beating and money compensation.

Beatitudes, in theology, the nine on the Mount, each of which commences with the words "Blessed are . . ." (Matt. v).

Beaton, or Bethune, David, cardinal, Archbishop of St. Andrews, and primate of the kingdom, born in Fifie; an adviser of James V., twice over ambassador to France; on the death of James secured to himself the chief power in Church and State as Lord High Chancellor and Papal Legate; opposed alliance with England; persecuted the Reformers; condemned the preacher, George Wishart, to the stake, witnessed his sufferings from a window of his castle in St. Andrews, and was assassinated within its walls shortly after. (1494-1546).

Beaton, James, Archbishop of Glasgow preceding, a prominent figure in the reign of James V.; was partial to affiliation with France, and a persecutor of the Reformers; d. 1539.

LORD BEACONSFIELD

Beatrice, a beautiful Florentine maiden of the family of Portinari, for whom Dante conceived an undying affection, and whose image abode with him to the end of his days. She is the heroine of his *Vita Nuova* and *Divina Commedia*.

Beattie, James, a poet and essayist, born at Laurencekirk; became professor of Logic and Moral Philosophy at Marischal College, Aberdeen; wrote an *Essay on Truth* against Hume; his chief poem, *The Minstrel*, a didactic piece, tracing the progress of poetic genius. (1735-1803).

Beatty, David, Earl, Admiral of the Fleet; commanded the Battle Cruiser Squadron from 1912 to 1916, when he succeeded Lord Jellicoe as commander of the whole fleet after the Battle of Jutland. From 1919 to 1927 he was First Sea Lord; was raised to the peerage in 1919 and granted £100,000 by the nation. (1871-1936).

Beau Brummell (George Bryan Brummell), a notable leader of fashion in the Regency; an intimate friend of George IV.; owing to losses in gambling died in poverty. (1778-1840).

Beaucaire, a French town near Avignon, on the Rhône, which it spans with a magnificent bridge; once a great centre of trade, and famous for its annual fair.

Beaufort, Henry, cardinal, Bishop of Winchester, son of John of Gaunt, learned in canon law, was several times chancellor; took a prominent part in all the political movements of the time, lent immense sums to Henry V. and Henry VI., also left bequests for charitable uses, and founded the hospital of St. Cross at Winchester. (1377-1447).

Beaufort Scale, a table consisting of the numbers 0 to 12, to signify the strength of winds. It was evolved in 1806 by Admiral Beaufort, and classified winds at sea according to their variation from calm to a hurricane. The International Meteorological Committee adopted the scale in 1874 as a part of the code employed in communicating weather conditions. The numbers include 0 calm; 1-3 light breeze; 4-5 moderate; 8-9 gale; 12 hurricane.

Beauharnais, Alexandre, Vicomte de, born at Martinique, where he married a lady who afterwards, as wife of Napoleon, became the Empress Josephine; was secretary of the National Assembly and its president when Louis XVI. fled from the capital; was convicted of treachery to the cause of the Revolution and put to death. (1760-1794).

Beauharnais, Eugène de, son of the preceding and of Josephine, born at Paris, step-son of Napoleon, therefore was made viceroy of Italy; took an active part in the wars of the empire; died at Munich, whither he retired after the fall of Napoleon. (1781-1824).

Beaulieu, a village of Hants, England, in the New Forest, on the little Beaulieu R. Here are the ruins of an abbey founded by King John. Pop. 1,000.

Beaumarchais, Pierre Augustin Caron de, a dramatist and pleader of the most versatile, brilliant gifts, and French to the core, born in Paris, son of a watchmaker at Osen; ranks as a comic dramatist next to Molière; author of *Le Barbier de Séville* and *Le Mariage de Figaro*, his masterpiece. He was a zealous supporter of the Revolution, and made sacrifices on its behalf but narrowly escaped the guillotine; died in distress and poverty. (1732-1799).

Beaumaris, principal town in Anglesea, Wales, on the Menai Strait, near Bangor, a favourite watering-

place, with remains of a castle erected by Edward I. Pop. 1,700.

Beaumont, a lumbering and petroleum town of Texas, U.S.A. Pop. 57,000.

Beaumont, Francis, dramatic poet, born in Leicestershire of a family of good standing; bred for the Bar, but devoted to literature; was a friend of Ben Jonson; in conjunction with his friend Fletcher the composer of a number of plays, about the separate authorship of which there has been much discussion; buried in Westminster Abbey. Their masterpieces were *Philastre*; *The Knight of the Burning Pestle*, and *The Maid's Tragedy*. (1584-1616).

Beaumont Hamel, a village in the Somme dept. of France, 6 m. N. of Albert, near the R. Ancre. It was the scene of heavy fighting in the battles of the Somme and the Ancre, 1916. Beaumont Hamel was held by the Germans, who were afforded efficient protection for their forces by the large quarries. It was attacked July 1 (the Battle of the Somme) by British troops, which, after most severe fighting and little progress, were compelled to retire to their original positions. At the Battle of the Ancre, Nov. 1916, the 51st Highlanders (Territorial) Div. and the Royal Naval Div. (Infantry) stormed Beaumont Hamel, capturing 1,500 men and many machine-guns.

Beau Nash (Richard Nash), a Welshman who superintended the social activities of Bath; died in beggary. (1674-1762).

Beaune, a town in the dept. of Côte d'Or, France, famous for its burgundy wine. Pop. 12,000.

Beausobre, Isaac, a Huguenot divine, born at Poitou; fled to Holland on the revocation of the Edict of Nantes, settled in Berlin, and became a notability in high quarters there; attracted the notice of the young Frederick, the Great that was to be; author of a *History of Manichæism*, praised by Gibbon, and of other books famous in their day, including a translation of the New Testament. (1659-1738).

Beauvais, capital of the dept. of Oise, in France, 34 m. SW. of Amiens, an ancient town, noted for its cathedral, its tapestry-weaving, and the feat of Jeanne Hachette and her female following when the town was besieged by Charles the Bold in 1472. Near by the British airship R. 101 crashed in flames in Oct., 1930 with the loss of all on board. Pop. 19,000.

Beaver, an amphibious rodent related to squirrels and prairie dogs. There are two species, the European and N. American. They are chiefly valued for their fur, but also for castoreum, an extract from their glands used in medicine. Beavers grow from 1 to 2 ft. long in the body, with broad, flat tails and webbed feet. They burrow the banks of streams, where they build their homes of timber, twigs, and mud. To get timber to their homes they fell trees by gnawing at their base and float them, afterwards constructing dams. The bark forms their food.

BEAVER

Beaverbrook, Lord (W. M. Aikman), newspaper proprietor. Son of a New Brunswick minister, he was active in the organisation of the Canadian forces in France. From 1910 to 1917 he was Conservative M.P. for Ashton-under-Lyne, was knighted in 1911, and raised to the peerage in 1916. He acquired control of the *Daily Express* group of papers, and in 1918 served

for a short time as Chancellor of the Duchy of Lancaster. Advocated an Empire Free Trade policy. (1879-)

Bebek Bay, a fashionable resort, on the Bosphorus, near Constantinople (Istanbul), and at one time the site of a palace of the sultan.

Bebington, an urban district of Cheshire, England, on the Mersey, 3 m. S. of Birkenhead, a residential district for Liverpool. Pop. 35,000.

Bec, Abbey of, a Benedictine abbey of Normandy, near Bernay, which in the 11th Century, under Lanfranc and St. Anselm, was a famed seat of learning; now in ruins.

Beccaria, Cesare Bonesana, Marquis of, an Italian publicist, author of a celebrated *Treatise on Crimes and Punishments*, which has been widely translated and contributed much to lessen the severity of sentences in criminal cases. He was a utilitarian in philosophy and a disciple of Rousseau in politics. (1735-1794).

Beccles, a market town of Suffolk, England, on the Waveney. Printing, corn-milling, market-gardening, and the manufacture of farm implements are carried on. Pop. 7,000.

Bêche-de-Mer, or Trepang, a species of a celebrated *Treatise on Crimes and Punishments*, also known as sea-cucumbers, extensively used in the far East by the Chinese and Malay peoples in gelatinous soups.

Becher, Johann Joachim, chemist, born at Spires; distinguished as a pioneer in the scientific study of chemistry; wrote *Physica Subterranea* and originated the Phlogiston Theory (q.v.). (1635-1682).

Bechstein, Karl, pianoforte-maker, born at Gotha, Germany, founder in Berlin of the piano-factory that has become world-famous. (1826-1900).

Bechuanaland (British Bechuanaland and Bechuanaland Protectorate), an inland tract in S. Africa, extends from the Orange R. to the Zambesi. On a plateau 4,000 ft. above sea-level. The soil is fertile; extensive tracts are suitable for corn; sheep and cattle thrive; rains fall in summer; in winter there are frosts, sometimes snow. The whole country came under British protection in 1885. A Resident Commissioner was appointed in 1890. In 1895 that part S. of the Molopo R. which had already been declared a Crown Colony in 1885 was annexed to the Cape of Good Hope as British Bechuanaland.

The Northern part is at present administered by a Resident Commissioner under the title Bechuanaland Protectorate. It is one of the High Commission territories which under the South Africa Act 1909 seems destined to become incorporated in the Union of South Africa. The acting-chief (during the minority of Seretse), Tshekedi, of the leading tribe (Bamangwato), has proved a bitter opponent of this policy, besides resisting attempts to undermine his real or imaginary authority as the son of King Khama, who died in 1923. Pop. (1936) 266,000 (1,900 Europeans).

Bechuanas, a widespread S. African cattle, and growers of maize; are among the most intelligent of the Bantu peoples, and show considerable capacity for self-government.

Beck, Adolf, Norwegian, victim of a judicial mistake; sentenced in 1896 to 7 years' penal servitude for thefts from women. Released 1901, again convicted in 1904; but, upon discovery of the person he had been mistaken for, released and granted £5,000. Result: establishment of Court of Criminal Appeal. (1841-1909).

Beckenham, an urban district and residential district of Greater London. Pop. 44,000.

Becket, St. Thomas à, Archbishop of Canterbury, born in London, of Norman parentage; entered the Church; was made Lord Chancellor; had a large and splendid retinue, but on becoming archbishop cast all pomp aside and became an ascetic, and devoted himself to the vigorous discharge of the duties of his high office; declared for the independence of the Church, and at first refused to adhere to the Constitutions of Clarendon (q.v.); King Henry II. grew restive under his assumption of authority, and got rid of him by the hands of four knights, who, to please the king, shed his blood on the steps of the altar of Canterbury Cathedral, for which outrage the king did penance four years afterwards at his tomb. The struggle was one affecting the relative rights of Church and king, and the chief combatants in the fray were both high-minded men, each inflexible in the assertion of his claims; he was canonised in 1172, his festival being the day of his martyrdom, Dec. 29. (1118-1170).

Beckford, William, author of *Valhek*, London, who bequeathed him property to the value of £100,000 per annum; kept spending his fortune on extravagancies and vagaries; is alleged to have written *Valhek*, an Arabian tale, when a youth of 22 at a sitting of three days and two nights, a work on which his fame rests and which established his reputation as one of the first of the imaginative writers of his country; the story of its inception is now discredited. (1760-1844).

Becquerel, Antoine César, a French physicist; served as engineer in the French army in 1808-1814, but retired in 1815, devoting himself to science, and obtained high distinction in electro-chemistry, working with Ampère, Biot, and other eminent scientists. (1788-1878).

Becquerel, Antoine Henri, grandson of the preceding. He discovered that uranium gives off rays which affect a photographic plate, and carried out researches on magnetism and phosphorescence. His work on radioactivity won him a Nobel prize in 1903. (1852-1908).

Bedchamber, Lords or Ladies of the, officers or ladies of the royal household whose duty it is to wait upon the sovereign—the chief of the former called Groom of the Stole, and of the latter Mistress of the Robes. There are also Grooms in Waiting and Women of the Bedchamber.

Bedchamber Question, arose in 1839. It had been the custom at Court for the personal attendants of the sovereign to represent the opinions of the Government and, in the event of a change of Government, for the old attendants to give way to new. When Lord Melbourne's Ministry resigned in consequence of his failure to secure the passage of a Bill to suspend the Constitution of Jamaica by more than five votes, Sir Robert Peel attempted to form a Ministry, and wished for the Ladies of the Bedchamber to be changed in accordance with the usual practice. Queen Victoria refused, and he gave up the attempt. Melbourne returned to office with a weakened party behind him, and although the Jamaica Bill was reintroduced in a modified form, it was rejected.

Beddgelert, a village and tourist centre of Caernarvonshire, Wales, at the foot of Snowdon. Slate and copper are worked. It is named "grave of Gelert" after the legendary hound of King Llewellyn. Pop. 1,000.

Beddington, a parish and village of a residential district of Greater London. It was formerly the seat of the Carew family. Pop. 10,000.

Beddoes, Thomas Lovell, born at Clifton, studied first in medicine; an enthusiastic student of science; a dramatic poet, author of *The Bride's Tragedy*; got into trouble for his Radical opinions; his principal work, *Death's Jest-Book, or the Fool's Tragedy*, highly esteemed by Barry Cornwall. (1803-1849).

Bede, or Beda, surnamed "The Venerable," an English monk and ecclesiastical historian, born at Wearmouth, in the alder of which, together with that of Jarrow, he spent his life, devoted to quiet study and learning; his writings numerous and encyclopedic, in the shape of commentaries, biographies, and scientific and philosophical treatises; his most important work, the *Ecclesiastical History of England*, written in Latin, and translated by Alfred the Great; completed a translation of St. John's Gospel the day he died. (c. 672-675).

Bedesman, or Beadsman, a pensioner or almsman who was endowed, or whose duty it was, to pray for the soul or spiritual welfare of his benefactor. Bedesmen were attached to the churches. In Scotland they were public almsmen corresponding in number to the age of the King, by whom they were maintained.

Bedford, a midland agricultural county of England, generally level, with some flat fen-land; also the county town, on the Great Ouse, with a fine park and excellent educational institutions, famous in connection with the life of John Bunyan, where relics of him are preserved, and where a bronze statue of him by Boehm was erected to his memory by the Duke of Bedford. Manufactures agricultural implements, lace, and straw plaiting; Elstow, Bunyan's birth-place, is a mile distant. Pop. (county) 221,000; (town) 40,500.

Bedford College, a school of the University of London, founded in 1849 to provide a liberal education for women. Students are prepared for all examinations of the University of London in Arts and Science and in general courses of study.

Bedford, Dukedom of, was bestowed: first on John, third son of the Earl of Northumberland (c. 1157-1480); and again in 1485 on Jasper Tudor, son of the second) was bestowed, 1550, on John Russell (descended from one Stephen Russell, a Dorset landowner of Richard II.'s time), who had been made Baron Russell in 1539 (c. 1485-1555). His lineal descendant, the fifth earl, was made duke 1694 (1616-1700). The Duke of Bedford to-day is one of the largest landowners in London.

Bedford, John, Duke of, brother of the kingdom and regent of France during the minority of Henry VI., whom, on the death of the French king, he proclaimed King of France, taking up arms therefor and fighting for a time victoriously on his behalf, till the enthusiasm created by Joan of Arc turned the tide against him and hastened his death, previous to which, however, he prevailed over the Dauphin and burnt Joan at the stake. (1389-1435).

Bedford Level, a flat, marshy district, comprising part of six counties, to the S. and W. of the Wash, about 40 m. in extent each way, caused originally by incursions of the sea and the overflowing of rivers; received its name from the Earl of Bedford, who, in the 17th Century, undertook to drain it.

Bedlam, a lunatic asylum in Lambeth, priory "Bethlehem" in Bishopegate, first

appropriated to the purpose, Bedlam being a corruption of the name Bethlehem. It was founded in 1247, transferred to Moorfields in 1676, and moved to Lambeth in 1815. It has been moved to the country, and the building is now occupied by the Imperial War Museum.

Bedlingtonshire, or **Bedlington**, an urban district of Northumberland, England, on the Blyth. It has collieries and glass and iron works, and gives its name (Bedlington) to a breed of terrier. Pop. 27,000.

Bedlington Terrier, a rough, stiff-coated

game terrier. It is commonly grey-blue in colour, about 14 in. high and weighs 20-25 lb. The muzzle is long. It was first bred in Bedlington, Northumberland, England.

Bedloe's

Island, a small island at the entrance to New York harbour, on which stands the Statue of Liberty.

BEDLINGTON
TERRIER

Bedmar, Mar-quis de, Cardinal and Bishop of Oviedo, and a Spanish diplomatist, notorious for a part he played in a daring conspiracy in 1618 aimed at the destruction of Venice, but which, being betrayed, was defeated, for concern in which several people were executed, though the arch-delinquent got off; he is the subject of Otway's *Venice Preserved*; it was after this that he was made Cardinal and Governor of the Netherlands, where he was detested and obliged to retire. (1572-1656).

Bed of Justice, a formal session of the Parliament of Paris, under the presidency of the King, for the compulsory registration of the royal edicts, the last session being in 1788, under Louis XVI., at Versailles, whither the whole body now "refractory" rolled out in wheeled vehicles, to receive the order of the king.

Bedouins, Arabs who lead a nomadic life in the desert and subsist by the pasture of cattle and the rearing of horses, the one element that binds them into a unity being community of language, the Arabic, namely, which they all speak with great purity and without variations of dialect; they are generally of small stature, of wiry constitution, and dark complexion, and are divided into tribes, each under an independent chief. Their earliest place of settlement was probably in the Hejaz or in the Nejd, whence they migrated into Egypt, Mesopotamia (Iraq), and Syria.

Bedsore, sores which are liable to develop on all prominent parts of the body on any patient who is confined to bed for a considerable length of time and whose vitality is low.

Bedstead, a term employed to denote the framework of the bed. The early Egyptian bedstead was a low, wooden framework across which rushes were spread. Excavations at Pompeii have revealed bronze posts which supported wooden frames for bedsteads. The 12th Century introduced a slope in the bedsteads from head to foot, and the 16th Century the four-poster bedsteads with their elaborate carving. The tester bedstead, with canopy and slide curtains, of the 15th Century was reintroduced in the 17th Century. Bedsteads of various woods are the present vogue, to the exclusion of the brass and iron bedsteads of the 19th Century.

Bedstraw, or *Galium*, a genus of annual or perennial herbaceous plants of the order Rubiaceae, comprising some 200 species, of which 10 are found in Great Britain. The flowers are white, yellow, or red, in terminal panicles, sometimes in small clusters. *G. verum* (popular name, cheese rennet) may be used to curdle milk. *G. aparine* is the English goose-grass or cleavers.

Bedwellty, an urban district and parliamentary division of Monmouthshire, England, 7 m. W. of Pontypool. Here are coalmines and iron works. Pop. 30,000.

Bedworth, town of Warwickshire, England, on the Coventry Canal, 3½ m. S. of Nuneaton, with coal and iron mines, iron works and brick-fields. Pop. 12,000.

Bee, insect belonging to the order Hymenoptera. A colony of bees comprises three types of bees, the queen, drones and workers, and may number in all from 1,000 to 100,000. The queen is the only female in the colony, and she is produced from the worker egg by special feeding carried out by the young workers. The queen produces all the eggs for the maintenance of the colony.

She mates at from 3 to 10 days after emergence from the cell in which she is fed during her development from the egg. Mating takes place while in flight, and during the act the drone dies. The number of eggs deposited by the queen varies from a few hundred to 5,000 in 24 hours. The only function of the male individual drones is the fertilisation of the young queens, and the drones are allowed to exist only in times of prosperity. Anatomically the drone is not so fully developed as either the queen or the worker.

The worker bees collect the pollen and nectar required for the development of the colony and the winter stores, provide the wax for comb-building, and keep order in the hive. The worker is an undeveloped female, the egg-organs being atrophied. The hind legs of the workers are adapted for the purpose of carrying pollen and propolis. They possess wax-forming glands, and the mouth-parts enable them to knead wax and build combs.

Young bees take their first flight at the age of 5-8 days, and at the age of 14-21 days they assist in the collection of food. The life of a worker is 6-7 weeks in the summer working time; in winter they may live as long as 6 months.

Beech, the name of several species of *Fagus*. The common beech grows in all parts of Europe. It reaches a height of about 100 ft., but its timber is not durable and serves only inferior uses. Beeches bloom periodically. The male flowers are catkins, and the female flowers develop a cupule with two nuts. Stunted beeches serve as hedges. Other varieties of beeches are copper, purple, red, evergreen, and weeping.

Beecham, Sir Thomas, British conductor and composer. Educated at Rossall and Oxford, he came to the fore in 1910 during the Covent Garden opera season, and founded in 1915 the Albert Hall promenades. Associated with the London Symphony Orchestra, the Royal Philharmonic Society, and the British Broadcasting Corporation, he strove to popularise opera. Knighted 1916; succeeded to baronetcy the same year. (1879-).

Beecher, Henry Ward, a celebrated American preacher, born at Litchfield, Connecticut; pastor of a large Congregational church, Brooklyn; a vigorous thinker and eloquent orator; denied the eternity of punishment, considered a great heresy by some then, and his opinions led to his secession from the Congregational body. (1813-1887).

Beecher Stowe, Harriet Elizabeth. See Stowe, Harriet Elizabeth Beecher.

Beechey, Rear-Admiral, born in London, son of the following; accompanied Franklin in 1818 and Parry in 1819 to the Arctic regions; commanded the *Blossom* in the third expedition of 1825-1828 to the same regions; has given his name to Beechey Island in the Arctic Archipelago. (1796-1856).

Beechey, Sir William, portrait-painter, born in Oxfordshire; among his portraits were those of Lord Nelson, John Kemble and Mrs. Siddons. (1753-1839).

Beeching, James, of Great Yarmouth; from his designs, which won the Duke of Northumberland's prize of 100 guineas in 1851, was built the first self-righting lifeboat, taken as a model for the boats of the National Lifeboat Institution. (1788-1858).

Bee-eater, or Gnat-Snapper, a bird of the genus *Mecrops*, common

in Africa and in some parts of Europe, and occasionally a visitor to Britain. It is insectivorous. The adult is about 10 in. in length.

BEE-EATER

The male is of particularly bright plumage. It nests in holes in river banks.

Beefeaters, yeoman of the royal guard, whose institution dates from the reign of Henry VII., and whose office it is to wait upon royalty on high occasions; the name is also given to the warders of the Tower, though they are a separate body and of more recent origin; the name simply means (royal) dependant, a corruption of the French word *buffetier*, one who attends the sideboard.

Beefsteak Clubs, social clubs which have been established in London where steak, beer, and wine comprise the only refreshment. The first was formed in 1709, with the actor Richard Estcourt as providore. John Rich, then manager of the Covent Garden Theatre, formed the "Sablino Society of Steaks" in 1785, and many famous men were members. The Beefsteak Club, 9 Green Street, W.C., was founded by A. J. Stuart-Wortley at Toole's Theatre.

Beehive Houses, small stone structures, of ancient date, remains of which are found sometimes in clusters in Ireland and the W. of Scotland, with a conical roof formed of stones overlapping one another, undressed and without mortar; some of them appear to have been monks' cells.

Beelzebub, the god of flies, protector against them, worshipped by the Phœnicians; being a heathen deity, transformed by the Jews into a chief of the devils; sometimes identified with Satan, and sometimes his aide-de-camp, as in Milton's *Paradise Lost*.

Beeerbohm, Max, caricaturist and author. Educated at Charterhouse and Oxford, he first became prominent as a writer and later as a caricaturist. Socialists and modern art enthusiasts forming many of his subjects. (1872-).

Beerbohm Tree, Sir Herbert. See Tree, Sir Herbert Beerbohm.

Beersheba, a village in the S. of southernly, 27 m. from Hebron; associated with Dan, in the N., to denote the limit of the land and what lies between; lies in a pastoral country abounding in wells, and is frequently

mentioned in patriarchal history; means "the Well of the Oath." Captured by the British forces during the Great War on Oct. 11, 1917.

Beeston, town of Nottinghamshire, England, 3 m. SW. of Nottingham, with Stapleford an urban district (pop. 28,000). It has telephone works, and ace-making; malting, and iron-founding are carried on. Pop. 16,000.

Beeswing, a gauze-like film which forms on the sides of a bottle of good port.

Beet (*Beta*), a genus of plants of the order Chenopodiaceae, comprising some six species one of which *B. vulgaris* or *B. maritima* (sea-beet) is found in England. From this is derived the variety *Rapa*, the sugar-beet, and also the mangold-wurzel. The production of beet sugar on a large scale has been carried out for many years in the U.S.A., Germany, and elsewhere, and efforts have been made in recent years to stimulate the industry in Great Britain. With this end in view, a Government subsidy was granted after the Great War, and has been renewed recently. About a half of the world's supply of sugar is now produced from beetroot.

Beethoven, Ludwig van, one of the posers, born in Bonn, of Dutch extraction; the author of symphonies and sonatas that are known over all the world; showed early a most precocious genius for music, commencing his education as a musician at five; trained at first by a companion named Pfeiffer, to whom he confessed he owed more than all his teachers; trained at length under the tuition of the most illustrious of his predecessors, Bach and Handel; revealed wonderful musical talent; quitted Bonn and settled in Vienna; attracted the attention of Mozart; at the age of 40 was attacked with deafness that became total and lasted for life; continued to compose despite his affliction, to the admiration of thousands; during his last days was a prey to melancholy; died during a thunderstorm. (1770-1827).

Beetle, insects of the order Coleoptera species numbers over 150,000. They are four-winged insects which undergo complete metamorphosis, the larvæ being as a rule grubs with soft bodies. The body, the antennae, and the jointed limbs of the adult beetles are all invested in a coating of horny substance called chitin. The front, horny pair of wings, called elytra, are not used in flight, but serve as shields to protect the hinder pair when these are not in use. The mouth is always provided with biting jaws. The antennae may be either thread-like, clubbed, fan-like, or comb-like. Some beetles are carnivorous, others vegetarian, and many eat decaying substances.

Befana, an Italian female Santa Claus, who on Twelfth Night fills the stockings of good children with good things and those of bad with ashes.

Beghards, a religious order that arose in Belgium in the 13th Century, connected with the Beguines, a mystic and socialistic sect of women.

Bonia, a genus of tropical plants of the order Begoniaceae from S. America and India with fleshy, and sometimes richly coloured leaves and crimson stems. The flowers are pink. There are some 750 species.

U.E.

Beguines, a sisterhood confined now to France and Germany, who, without taking any monastic vow, devote themselves to works of piety and benevolence.

Begum, the Hindustani name given to the E. Indies to a princess, mother, sister, or wife of a native ruler.

Behaim, Martin, a geographer and cartographer, born in Nürnberg; accompanied Diego Cam on a voyage of discovery along W. coast of Africa; constructed and left behind him a famous terrestrial globe; some would make him out to be the discoverer of America. (1459-1506).

Behaviourism, the name given to the mental processes of man were like those of animals, though they were more intricate. It is the belief of behaviourists that man's actions are automatic responses to stimuli, and not dictated by will, sensation, perception, or consciousness, and that all action, animal or human, is in response to stimulus.

Beheira, an administrative division of the Nile, Egypt, part of the delta of the Nile. Area 1,700 sq. m. Pop. 392,000.

Behemoth, a large animal mentioned in Job, understood to be the hippopotamus.

Behistun, a mountain in Persia on which there are rocks covered with cuneiform inscriptions, the principal relating to Darius Hystaspes (d. 485 B.C.), bearing on his genealogy, domains, and victories.

Behn, Aphra (or Aphra), a licentious writer, born in Kent, for whom, for her free-and-easy ways, Charles II. took a liking; sent by him as a spy to Holland, and instrumental in discovering the intention of the Dutch to burn the shipping in the Thames. She wrote plays and novels. (1640-1689).

Behring Sea Question, a question of fishing rights in the Behring Sea. The U.S.A. purchased Alaska from Russia in 1867, and assumed the right formerly claimed by Russia to close the sea to foreign fishing. In support of their claim, the U.S.A. seized Canadian sealers fishing beyond the 3-m. limit. The British Government having claimed the right to fish outside the 3-m. limit, the dispute was referred to arbitration in 1892. The arbitrators met in Paris in 1893, and the award was favourable to Great Britain.

Behring Strait, a strait about 50 m. wide between Asia and N. America, which connects the Arctic Ocean with the Pacific; discovered by the Danish navigator Vitus Behring in 1728, sent out on a voyage of discovery by Peter the Great.

Beilby, Sir George, British scientist notable for researches in low-temperature carbonisation of coal. Chairman of Fuel Research Board during Great War. Originator of the therm system as basis of gas charges. (1854-1924).

Beira, (1) a central province of Portugal, comprising five administrative districts, mountainous and pastoral. Pop. 1,730,000; (2) a seaport town in Portuguese E. Africa (Mozambique) connected by rail with Mashonaland (Southern Rhodesia). Terminus of trans-continental Benguela-Beira railway and an important airport. Pop. 12,000.

Beirut, the most flourishing commercial city on the coast of Syria, French Mandated Territory and the port of Damascus, from which it is distant 55 m.; a very ancient place. Has a French and an American University. Pop. 135,000.

Beisan, Old Testament, Beth-shan; New Testament, Scythropolis. A town of Palestine in Northern District on the plain of Esdraelon.

Beit, Alfred, S. African financier and philanthropist, born in Hamburg; became a diamond merchant in Kimberley in 1879; was a warm friend of Cecil Rhodes, with whom he collaborated in the amalgamation of the Kimberley into the De Beers' Consolidated Mines, and made a fortune. Left large sums to charities and founded chairs in colonial history at Oxford. (1853-1906).

Beit, Sir Cecil John, Bart., connoisseur and philanthropist, brother of Alfred Beit, b. in Hamburg; entered service of Wernher, Beit & Co. diamond merchants, London. Went to S. Africa, 1890. Returned to England and became a stockbroker; retired 1906. Gave buildings for University of the Cape of Good Hope. Founded Beit Memorial Fellowship for Medical Research. K.C.M.G., 1920; baronet, 1924. (1865-1930).

Beith, a market town of Ayrshire, Scotland, 18 m. SW. of Glasgow. Coal is mined and there are works for making linen, leather, thread, rope, upholstery and furniture. Pop. 5,000.

Beith, John Hay. See Hay, Ian.

Bek, Antony, Bishop of Durham from 1283; assisted Edward I.'s Scottish expeditions; had long dispute with the Prior of Durham, and lost favour and possessions to Edward by making journeys to Rome about it. Edward II. made him sovereign of the Isle of Man, 1307. (d. 1310).

Beke, Dr. Charles Wilton, born in London; travelled in Abyssinia and Palestine; author of *Origines Biblicae* or researches into primeval history as shown not to be in keeping with the orthodox belief. (1800-1874).

Bel, in Babylonian myth, the son of Aa and Damkina, the lord, who in time created mankind. The elder Bel was Enlil of Nippur and the younger Merodach of Babylon. According to Damascius, the elder Bel came into existence before Aa.

Bela I., King of Hungary from 1060 to 1063; an able ruler; introduced a great many measures for the permanent benefit of the country, affecting both religion and social organisation.

Bela IV., King of Hungary, son of Andreas II., who had in 1222 been compelled to sign the Golden Bull, the *Magna Charta* of Hungarian liberty; reigned 1235-1241.

Bel and the Dragon, History of, one of the books of the Apocrypha, a spurious addition to the Book of Daniel, relates how David persuaded Cyrus of the vanity of idol-worship, and is intended to show its absurdity.

Belcher, Sir Edward, Admiral, was engaged in several exploring and surveying expeditions; sailed round the world, and took part in the operations in China. (1789-1877).

Belcher, James, prize-fighter, born at Bristol, victorious in six great fights, 1790-1803. Beaten by: Hon. Pearce (the Game Chicken), 1805; Cribb, 1807 and 1809. (1781-1811).

Belfast, capital and seat of the Parliament of Northern Ireland and county town of Antrim; stands on the Lagan, at the head of Belfast Lough, 112 m. N. of Dublin; is a bright and pleasant city, with some fine streets and handsome buildings, Presbyterian, Catholic, and Methodist colleges. It is the centre of the Irish linen and cotton manufacturers, the most important ship-building centre, and has also rope-making, whisky, and aerated-water industries. It is the headquarters of Presbyterianism in Ireland. Pop. 420,000.

Belfort, a fortified town in dept. of Belfort, France, and its capital, 33 m. W. by N. of Basel; capitulated to the

Germans in 1871; restored to France; its fortifications now greatly strengthened. The citadel was by Vauban. Pop. of the dept. is 99,000.

Belfry, the portion of a steeple or tower in which the bell is hung. Belfries were first watch-towers and a means of giving warning.

They later became bell-towers of churches, and were sometimes separate campaniles, as at Evesham and other places in Great Britain and in Italy, where there are many.

Belga, a Belgian silver coin of the value of 5 Belgian francs. It was created in 1926 in connection with the Government's endeavour to stabilise the currency.

Belgæ, Caesar's name for the Celtic family in Gaul N. of the Seine and Marne; mistakenly rated as Germans by Caesar.

Belgium, a small European State bordering on the North Sea, with Holland to the N., France to the S., and Rhenish Prussia and Luxembourg to the E.; is less than a third the size of Ireland, but the most densely populated country on the Continent. The people are of mixed stock, comprising Flemings, of Teutonic origin; Walloons of Celtic origin; Germans, Dutch, and French. Roman Catholicism is the predominant religion. Education is excellent; there are universities at Ghent, Liège, Brussels, and Louvain. French is the language of educated circles and of the State; but the prevalence of dialects hinders the growth of a national literature.

The land is low and level in the N. and W., undulating in the middle, rocky and hilly in the S. and E. Along the coast are lines of sand-dunes strengthened by artificial embankments. To drain the lowlands there are gaps in the dunes and embankments, Nieupoort, where the Yser enters the sea at the W. gap, Ostend at the central gap, and Zeebrugge, with its famous Mole, at the E. gap. The central plains are fertile, and intensive methods of farming are used, since the bulk of the people are small-holders. The Meuse and Scheldt are the chief rivers, the basin of the latter embracing most of the country.

Climate is similar to the English, with greater extremes. Rye, wheat, oats, beet, and flax are the principal crops. Agriculture is the most painstaking and productive of the world. The hilly country is rich in coal, iron, zinc, and lead. After mining, the chief industries are textile manufactures and making of machinery. The trade is enormous; France, Germany, and Britain are the best customers. Exports are coal to France; farm products, eggs, etc., to England; and raw material imported from across seas to France and the basin of the Rhine.

It is a small country of large cities. The capital is Brussels, in the centre of the kingdom, but communicating with the ocean by a ship canal. The most important towns after Brussels are Antwerp (seaport and trading centre), Liège (machinery, ordnance and steel goods), Ghent (at the tidal limit of the Scheldt, cotton and linen goods), Malines (Meehlin) (lace), Courtrai and Tournai (flax), Mons and Charleroi (coal), Namur (cutlery), Louvain, Bruges, etc.

By a convention concluded in 1921 an economic union was concluded between Belgium and Luxembourg, and the customs frontier was abolished in 1922. Belgium has long been a "buffer state" between France and Germany, and its corridor, the lowland plain and the Sambre-Meuse Valley, the meeting-ground of invading armies. Thus it

BRUGES
BELFRIY

has become known as the "cockpit of Europe." Belgium possesses an important colony in Africa, the Belgian Congo. The railways, canals, and river navigation are very highly developed. Water traffic on the canalised rivers and canals is more extensive than railway traffic. Artificial waterways connect Antwerp and Ghent with the Seine, the North Sea and the S.E., and the Meuse and Scheldt are linked up with the chief towns by canals, while canals also connect the Meuse, Rhine, and Seine.

The government is a limited monarchy; the King, Senate, and House of Representatives form the constitution. There is a conscript army of 50,000 men, but no navy.

Belgrade, the capital of Yugoslavia, on the confluence of the Save and Danube; a fortified city in an important strategic position, and the scene of many conflicts; a commercial centre; once Turkish in appearance, now becoming more European. Has a university, founded 1838. Headquarters of Yugoslav Air Service. Taken by the Austrians, Nov. 1914, re-taken by the Serbs Dec. 1914, taken by the Germans late in 1915, and held by them until the end of the War. Pop. 289,000.

Belial, properly a good-for-nothing, a child of worthlessness; an incarnation of iniquity and son of perdition, and the name in the Bible for the children of such.

Belisarius, a general under the Emperor Justinian, born in Illyria; defeated the Persians, the Vandals, and the Ostrogoths; was falsely accused of conspiracy, and imprisoned, but later restored to his dignities by the Emperor. (505-565).

Belize, the capital of British Honduras, in Central America; trade in mahogany, rosewood, etc. Largely destroyed by a hurricane in 1926, it is now gradually being rebuilt. Pan-American airways make this a regular daily (over-night) stop, on the way from Miami to Panama. Pop. 17,000.

Bell and Bell Founding. A bell is a hollow, metal, cup-shaped body containing a swinging hammer or ball suspended by its apex. Bells are cast of a mixture of copper and tin named bell-metal. Bells discovered in the palace of Nimrod on the site of the city of Nineveh were made of the same metal. The proportion of the metals has altered since that time, and is now approximately 4 copper to 1 tin. The earliest known bells were made of riveted sheets of hammered iron. The tone of bells depends both on their shape and composition. Approximate standard proportions are, thickness $\times 12 =$ height; thickness of edge $\times 10 =$ diameter.

Bell, Alexander Graham, inventor. Born in Edinburgh, he emigrated to America and became professor of vocal physiology at Boston. He invented the telephone and phonograph and devised improvements in the phonograph. (1817-1922).

Bell, Alexander Melville, an educationist, born in Edinburgh, lectured at Edinburgh University and in Canada and U.S.A.; devised the system of "visible speech" for teaching deafmutes. (1819-1905).

Bell, Andrew, noted educationist, born at St. Andrews; founder of the monitorial system of education, which he had adopted, for want of qualified assistants, when in India as superintendent of an orphanage in Madras, hence called "the Madras system"; bequeathed £120,000 for the endowment of education in Scotland. (1753-1832).

Bell, Sir Charles, Scottish surgeon and anatomist, carried out research on the nervous system. He was the first to make clear the distinction between the motor and sensory nerves, publishing his discoveries in *The Anatomy of Expression and The Nervous System of the Human Body*. (1774-1842).

Bell, Gertrude Margaret Lowthian, traveller and Arabian scholar, daughter of Sir Hugh Bell, Bart. Joined her uncle, Sir Frank Lascelles, Minister in Persia. With a single servant, crossed Arabia, 1913. Invaluable as an administrative coadjutor of Sir Percy Cox in Iraq after expulsion of the Turks. A brilliant archaeologist, her works include *The Desert and the Sown*, *The Thousand and One Churches*, *Review of the Civil Administration of Mesopotamia*. C.B.E., 1917. Died in Baghdad. (1868-1926).

Bell, Henry, brod a millwright, born in Linsithgowshire; the first who

applied steam to navigation in Europe, demonstrating it in a small steamboat called the *Comet*, driven by a three horse-power engine. (1767-1830).

THE COMET

Bell, Robert Anning, a painter, stained-glass artist, and illustrator, son of Robert George Bell, F.G.S. Prize works: Mosaics in Houses of Parliament; tympanum, Westminster Cathedral. For 7 years professor, Liverpool University. Professor of decorative art at Glasgow School of Art. R.A., 1922. (1863-1933).

Belladonna (*Atropa B.*, deadly nightshade), a perennial plant,

order Solanaceae. It grows wild in Europe and Asia, but it is also cultivated. Hyoscyne and atropine are prepared from it, both drugs being used as anodynes; an overdose, however, paralyses the heart. Atropine is used in ophthalmics; applied to the eye, it dilates the pupil.

BELLADONNA

Bellamy, Edward, American author and socialist; wrote *Looking Backward* in 1888, a provision of social conditions in the year 2000. (1850-1898).

Bellarmino, Cardinal, born in Jesuit, controversial theologian, and a valiant defender at all points of Roman Catholic dogma; the greatest champion of the Church in his time, and regarded as such by the Protestant theologians. (1542-1621).

Bellary, a district and town of Madras, India. Formerly an important military station, the town is built about a huge fort on a 450-ft. crag. Cotton is made and iron ore worked. Pop., district 862,000; town 40,000.

Bellay, Joachim du, French poet; author of sonnets, entitled *Regrets*; wrote the *Antiquités de Rome*; was called the Apollo of the Méiade. (1524-1560).

Bell, Book and Candle, a ceremony at one time attending the greater excommunication in the Roman Catholic Church; when after sentence was read from the "book," a "bell" was rung, and the "candle" extinguished.

Belleau Wood, NW. of Château Thierry in the dept. of Aisne on the Marne in France. In the Great War in May and June 1918 fierce fighting took place here between the American Expeditionary Force and the Germans, resulting in the capture of the wood by the Americans, and also the neighbouring town of Vaux.

Belle Isle, two British Islands; one, Labrador, at the entrance of Belle Isle Strait, has two lighthouses and a wireless station; the other, off the S.E. coast of Newfoundland, rich in iron ore. Also the name of an island on the W. coast of France, near which Sir Edward Hawke gained a brilliant naval victory over the French, under Marshal Conflans, in 1759. Pop. 6,600.

Belle-Isle, Charles Louis Auguste Fouquet, Count of, marshal of France; distinguished in the War of the Spanish Succession; an ambitious schemer mainly to blame for the Austrian Succession War; concluded a fast-and-loose treaty with Frederick the Great binding to neither party; found himself blocked up in Prague with his forces; had to force his way out and retreat. Was made War Minister after, and wrought important reforms in the army. (1684-1761).

Bellerophon, a mythical hero, son of Sisyphus; having unwittingly caused the death of his brother, withdrew from his country and sought retreat with Proetus, King of Argos, who, jealous of his guest, had him sent to Iobates, king of Lycia, with instructions to put him to death. Iobates, in consequence, imposed upon him the task of slaying the Chimæra. Bellerophon, mounted on Pegasus, the winged horse given him by Pallas, slew the monster, and on his return received the daughter of Iobates to wife.

Belles-Lettres, that department of literature which implies literary culture and belongs to the domain of art, whatever the subject may be or the special form; it includes poetry, the drama, fiction, and criticism.

Belligerent Rights, in international law, mean the rights of those in a condition of legally recognised warfare. Such rights cannot be recognised before a formal declaration of war. The Second Hague Peace Conference (1907) made this provision, and also provided that combatants should be placed under a responsible command, that the two or more sides should wear distinguishing emblems, and that operations should be carried out in accordance with the laws of war.

In a civil war belligerent rights may or may not be accorded to the insurgent forces by the Government of the country or by foreign Governments. In the Spanish Civil War (q.v.) such rights were withheld from the insurgent forces by the European Powers, except Germany and Italy, following their recognition of the rebel Government as the Government of Spain. Foreign volunteers who take part in a civil war have no claim to these rights, unless the volunteer force forms a definite part of the military organisation of the State, as, for instance, the French Foreign Legion.

Bellingham, a village of Northumberland, England, on the R. Tyne. It has an old church, and there are prehistoric remains in the neighbourhood. Coal and ironstone are found. Pop. 1,500. Also a city of Washington State, U.S.A., has saw-mills and paper-mills and a canning industry. Pop. 39,000.

Bellini, Gentile, the son of Jacopo Bellini, was distinguished as a portrait-painter; decorated with his brother, the council-chamber of the ducal palace; his finest picture the "Preaching of St. Mark." (c. 1421-1508).

Bellini, Giovanni, brother of the preceding, produced a great many works; the subjects religious, all nobly treated; had Giorgione and Titian for pupils; among his best works, the "Circumcision," "Feast of the Gods," "Blood of the Redeemer." (c. 1428-1516).

Bellini, Jacopo, a painter from Florence who settled in Venice, the father and founder of the family; d. 1470.

Bellini, Vincenzo, a musical composer, born at Catania, Sicily; his works, operas, more distinguished for their melody than their dramatic power; the best are *Il Pirati*, *La Sonnambula*, *Norma*, and *I Puritani*. (1802-1835).

Bell-Metal. See Bell and Bell Founding.

Belloc, Joseph Hilaire Pierre, British author, with G. K. Chesterton a champion of the Catholic position. His best-known book is *The Path to Rome*, and he has written several volumes of essays and novels satirising political life, of which he had four years' taste as M.P., from 1906 to 1910, as a Liberal. (1870-).

Bellona, the goddess of fury in war the poets to Mars as sister, wife, or daughter; inspirer of the war-spirit, and represented as armed with a bloody scourge in one hand and a torch in the other.

Bellot, Joseph René, a naval officer, born in Paris, distinguished in the expedition of 1845 to Madagascar, and one of those who went in quest of Sir John Franklin; drowned while crossing the ice. Bellot Strait in the Canadian Arctic is named after him. (1826-1853).

Bell Rock, or Inchcape Rock, a dangerous reef of sandstone rocks in the North Sea, 12 m. S.E. of Arbroath, on which a lighthouse 120 ft. high was erected in 1807-1810; so called from a bell rung by the sway of the waves, which the Abbot of Arbroath erected on it at one time as a warning to seamen; celebrated in a ballad by Southey.

Bells (nautical). Duty on board ship is divided into 6 four-hour watches, a period beginning at 12 o'clock; and a bell is rung at the end of each half-hour during each watch. At the end of the first half-hour the bell is rung once, at the end of the first hour twice, and so on, 8 bells marking the conclusion of the watch.

Belmont, a town of Cape Province, Kimberley, South Africa, 50 m. S. of Kimberley. Here was fought the first engagement of the Boer War.

Below, Otto von, German general, was born in Danzig. Commanded: 5th Army in Masurian battle, Feb. 1915; army of the Niemen, summer 1915; at the Macedonian front, 1916; at the victory over the Italians at Caporetto, 1917; 17th Army at battle of the Somme, 1918. Retired 1919. (1857-).

Belper, a market town of Derbyshire, England, on the Derwent. It has large cotton works, silk and hosiery are made, and coal and lead are mined. Pop. 13,000.

Belshazzar, the last Chaldean king of Babylon, slain, according to the Scripture account, at the capture of the city by Cyrus in 538 B.C.

Belt, Great and Little, gateways of the Baltic; the Great between Zealand and Fünen, 15 m. broad; the Little between Fünen and Jutland, half as broad; both 70 m. long, the former of great depth.

Beltane, or Beltain, an ancient Celtic sun-worship, and supposed to have marked the beginning of summer, observed about May 1, during which time fires were kindled on the tops of hills and various ceremonies gone through. In early days human sacrifices attended the festival.

Belting, a mechanical means of transmitting power from a power-driven shaft to shafts of the machines to be driven. Endless belts pass over pulleys or wheels on the driving-shaft and thence over

other pulleys on the machines. The advantage of belting is that power can be generated in a central power-house of a factory and used in any part of the building as required, without the loss and complexity of the older, cogwheel, system. Belting is itself, however, obsolescent, since the transmission of power can be so conveniently, cheaply, and efficiently achieved by the use of electrical energy.

Belt of Calms, the region in the Atlantic and Pacific, 4° or 5° latitude broad, where the trade-winds meet and neutralise each other, in which, however, torrents of rain and thunderstorms occur almost daily.

Beluga, the white whale, allied to the dolphins. It inhabits the seas off Greenland and in the Arctic and is found in herds. It measures some 10 or 15 ft. in length.

BELUGA (WHITE WHALE)

The name is also applied to the white sturgeon, from the roe of which caviare is made.

Belvedere, name given to a gallery of the Vatican at Rome, especially that containing the famous statue of Apollo, and applied to any room or gallery commanding a fine view.

Belzoni, Giovanni Battista, a famous traveller and explorer in Egypt, born at Padua, of poor parents; a man of great stature; figured as an athlete in Astley's Circus, London, and elsewhere, first of all in London streets; applied himself to the study of mechanics; visited Egypt as a mechanic and engineer at the instance of Mehemet Ali; commenced explorations among its antiquities, sent to the British Museum trophies of his achievements; published a narrative of his operations; opened an exhibition of his collection of antiquities in London and Paris; undertook a journey to Timbuctoo, was attacked with dysentery, and died at Gato. (1778-1823).

Bemba, Lake. See *Bangweolo*.

Bembo, Pietro, cardinal, an erudite man of letters and patron of literature and the arts, born at Venice; secretary to Pope Leo X.; historiographer of Venice, and librarian of St. Mark's; made cardinal by Paul III., and Bishop of Bergamo; a fastidious stylist and a stickler for purity in language. (1470-1547).

Bembridge, a village of Hants., England, on the E. Coast of the I. of Wight. A seaplane station during the Great War. It gives its name to a geological formation, the Bembridge Beds. Pop. 1,500.

Bemersyde, an estate and castle of Berwickshire, Scotland, on the Tweed. For 8 centuries it has been the home of the Haigs, and from it Field-Marshal Earl Haig took his title.

Ben, Gaelic for mountain, occurring elsewhere in Great Britain in the Cymric form "pen."

Benares, the most sacred city of the Hindus, and an important town of the state of Benares in the United Provinces, India, on the Ganges, 420 m. by rail NW. of Calcutta. It presents an amazing array of 1,700 temples and mosques, with innumerable towers and domes and minarets. The bank of the river is laid with continuous flights of steps, whence the pilgrims bathe. The city itself is narrow, crooked, crowded, and dirty. Many thousand pilgrims visit it annually.

It is a seat of Hindu learning, with a Hindu University college (constituted in 1916). There is an Agricultural College, founded in 1920. The river is spanned here by a magnifi-

cent railway bridge. There is a large trade in country produce, English goods, jewellery, and gems; while its brasswork, "Benares ware," is famous. Pop. 205,000 (of the state c. 365,000).

Benavente y Martinez, Jacinto, Spanish playwright, born in Madrid, studied law in university there. Travelled, managed a Russian circus, appeared on stage. Has written about 100 plays; among them: *Gente Conocida*, *Lo Cursi*, *El Hombrecito*, *Rosas de Otoño*, *La Malquerida*, *Por ser Todos Leal ser para Todos Traidor*. Nobel prize for literature, 1922. (1866-).

Benbecula, an island of the Outer Hebrides, S. of N. Uist, and separated from S. Uist by Benbecula Sound; belongs to Inverness-shire. Pop. 1,200.

Benbow, John, English admiral, born at Shrewsbury; distinguished himself in an action with a Barbary pirate; rose to the highest rank in the navy; gained fame in an engagement with a French fleet in the W. Indies, in which he lost a leg, and at this crisis some of his captains disobeyed orders and the enemy escaped. The captains were tried by court-martial, and two of them shot; the wound he received and his vexation caused his death. (1653-1702).

Bencoolen, a town and a Dutch residency in SW. of Sumatra; exports pepper and camphor. Pop. 250,000.

Bend, in heraldry, is one of the nine ordinaries, and crosses the field from dexter chief to the sinister base point of the escutcheon. Bend-sinister crosses from sinister chief to dexter base.

Bender (Benderi), a town in Bessarabia, Rumania, on the Dniester. Pop. 40,000.

Bendigo, a town in Victoria, Australia, the centre of a large gold-mining and agricultural district; the gold-field discovered in 1851. Pop. 29,000.

BEND

Benedek, Ludwig von, an Austrian general, distinguished himself in the campaigns of 1848-1849; was defeated by the Prussians at Sadowna; superseded and tried, but acquitted; retired to Graz, where he died. (1804-1881).

Benedicite ("Benedicite, omnia opera"), the first word of a Latin canticle, and the name by which it is known. Taken originally from the Latin Bible, where it appears as the *Song of Three* in the Book of Daniel, it has been sung at Divine Service since the 4th Century A.D. An English version (*O all ye works of the Lord, bless ye the Lord*) is included in the Book of Common Prayer.

Benedict, the name of 15 popes; **B. II.**, from 684 to 685; **B. III.**, from 855 to 858; **B. IV.**, from 900 to 903; **B. V.**, from 964 to 965; **B. VI.**, from 972 to 974; **B. VII.**, from 974 to 983; **B. VIII.**, from 1012 to 1024; extended the territory of the Church by conquest, and effected certain clerical reforms; **B. IX.**, from 1033 to 1048, a licentious man, and deposed; **B. X.**, from 1058 to 1059; **B. XI.**, from 1059 to 1064; **B. XII.**, from 1064 to 1072; **B. XIII.**, from 1072 to 1078; **B. XIV.**, from 1078 to 1084, a native of Bologna a man of marked scholarship and ability; a patron of science and literature, who did much to purify the morals and elevate the character of the clergy and reform abuses in the Church; **B. XV.**, from 1121 to 1123. Also **B. XIII.** (Pedro de Luna), elected antipope 1369 and died in conflict with the bulk of the Church in 1422.

Benedict Biscop, an Anglo-Saxon monk, born in Northumbria; made two pilgrimages to Rome; assumed the tonsure as a Benedictine monk in Provence; returned to England and founded two monasteries on the Tyne, one at Wearmouth and another at Jarrow, making them seats of learning. (628-690).

Benedict, St., the founder of Western monachism, born near Spoleto; left home at 14; passed three years as a hermit, in a cavern near Subiaco, to prepare himself for God's service; attracted many to his retreat; appointed to an abbey, but left it; founded 12 monasteries of his own; though possessed of no scholarship, composed his *Regula Monachorum*, which formed the rule of his order. (480-543). See *Benedictines*.

Benedict, Sir Julius, musician and composer native of Stuttgart; removed to London in 1835; author of, among other pieces, *The Gipsy's Warning*, *The Lily of Killarney*, *The Bride of Venice* and *The Crusaders*; conducted the performance of *Elijah* in which Jenny Lind made her first appearance before a London audience. (1804-1885).

Benedictines, the order of monks founded by St. Benedict and following his rule, the cradle of which was the celebrated monastery of Monte Casino, near Naples, an institution which reckoned among its members a large body of eminent men, who in their day rendered immense service to both literature and science, and were, in fact, the only learned class of the Middle Ages; spent their time in diligently transcribing manuscripts, and thus preserving for posterity the classic literature of Greece and Rome; the order has given 40 popes to the Church of Rome.

Benedictio, Latin for benediction or blessing. The term is usually applied to a blessing of a formal character, e.g., that uttered by the priest at the end of a religious service.

Benedictus, part of the musical service at Mass in the Roman Catholic Church; has been introduced into the morning service of the English Church. It is the song of Zacharias, who was filled with the Holy Ghost and prophesied. (Luke i. 68 *et. seq.*).

Benefice, a term applied to a provision for an ecclesiastical person, sometimes called temporalities, or livings in the modern sense. Benefices are *regular* in communities like monasteries and *secular* to those outside them. Generally applied to vicars and perpetual curates.

Beneficiary, in English law generally connotes a person entitled to the beneficial interest in property, though he may not have the legal estate. The interests of beneficiaries are generally protected by a trustee or trustees appointed under a will or deed *inter vivos*.

Benefit of Clergy, the system under which the clergy were immune from trial in a civil court, not finally abolished till 1779, though inoperative for a century before. In practice it was not confined to priests, and Ben Jonson was one to benefit by it.

Beneke, Friedrich Eduard, a German philosopher and professor in Berlin of the so-called empirical school—that is, the Baconian; an opponent of the methods and systems of Kant and Hegel; confined his studies to psychology and the phenomena of consciousness. (1798-1854).

Beneš, Eduard, Czechoslovakian statesman, man. Son of a Bohemian farmer, he became a professor at Prague. He worked in Paris during the Great War for the liberation of his country, and in 1918 became

Minister of Foreign Affairs in its first cabinet. From 1921 to 1922 he was Premier, and he also represented his country on the League of Nations. He succeeded Masaryk in office as President of the Czechoslovak Republic in 1935. (1884-).

Benetier, the vessel for holding the holy water in Roman Catholic churches.

Benevento, a cathedral town 33 m. N.E. of Naples, Italy, built out of and amid the ruins of an ancient one; capital of the province of the same name. Pop. 37,000.

Benevolence, the name given to a forced tax exacted from the people by certain kings of England, and which, under Charles I., became so obnoxious as to occasion the demand in the Petition of Right (*q.v.*), that no tax should be levied without consent of Parliament; first enforced in 1473, declared illegal in 1689.

Benfleet, an urban district of Essex, England, recently formed from the villages of S. Benfleet (7 m. W. of Southend, Pop. 12,000), Thundersleigh and Hadleigh. N. Benfleet is 10 m. NW. of Southend. Pop. 600.

Bengal, an autonomous province of India lying in the plain of the Lower Ganges and the delta of the Ganges-Brahmaputra, with the Himalayas on the N. The climate is hot and humid, and passing through every gradation up to the snowline. The people are engaged in agriculture, raising indigo, jute, opium, rice, tea, cotton and sugar. Coal, iron and copper mines are worked in Burdwan. The manufactures are of cotton and jute.

Education is further advanced than elsewhere; there are five colleges affiliated to Calcutta University, and many other scholastic institutions. Its area is 82,277 sq. m. Pop. 50,000,000. Low-lying alluvial plains are found by the Ganges and Brahmaputra. There is a remarkable network of waterways formed by the deltas of the two great rivers.

The lower half of the province, Sunderband, consists of half-submerged mangrove swamps with dense forests. The ports are all up stream on the two main river estuaries, the Hughli in the W., and the Padma in the E. Bengal is one of the most productive and populous parts of the world. Four-fifths of its area produces rice, and there are modern jute factories at Howrah. The forests are under scientific supervision. The population is made up of 53% Mohammedan, and 43% Hindu, the prevailing language being Bengali. Calcutta is the capital with a pop. of 1,132,000. Exports consist chiefly of jute and cotton.

Bengal, Bay of, part of the Indian Ocean, lying between India and Burma. The Ganges, Brahmaputra, Irrawadi, Godavari, and Kistna Rts. all empty into it.

Benghazi (Bengasi), the capital of the province of Benghazi, Italian Libya, on the Gulf of Sidra, in N. Africa, a caravan terminus from Egypt with a considerable trade. Pop. 44,000.

Benguella, a fertile Portuguese territory in Angola, W. Africa, with considerable mineral wealth; has sunk in importance since the suppression of the slave-trade. The town of the same name is the terminus of the railway to Beira on the opposite coast. Pop. 7,000.

Benicia, the former capital of California, 25 m. N.E. of San Francisco; has a commodious harbour and a U.S. arsenal.

Beni-Hassan, a village in Middle Egypt, on the right bank of the Nile, with remarkable catacombs that have been excavated.

Beni-Israel (i.e., Sons of Israel), a remarkable people, few in number, of Jewish type and customs, in the Bombay Presidency, who have existed there quite isolatedly for at least 1,000 years, with a language of their own, and even some literature; they do not mingle with the Jews, but they practise similar religious observances.

Benin, a densely populated and fertile country of Nigeria, W. Africa, between the Niger and Dahomey, with a city and river of the name; forms part of what was once a powerful kingdom; was captured by the British in 1897, who found in the city human remains in every direction, pits filled with bodies in various stages of decomposition, and altars dripping with fresh human blood. A second expedition went out in 1899, resulting in the capture of the town, the deposition of the king, and the execution of the chief responsible for the attack on the British mission in 1897. Yields palm-oil, rice, maize, sugar, cotton and tobacco.

BRONZE HEAD OF A GIRL FROM BENIN

Beni-Suêf, a town in Middle Egypt, on the W. bank of the Nile, 70 m. from Cairo; capital of an administrative division of the same name and a centre of trade, with cotton-mills and quarries of alabaster. Pop. (admin. district) 500,000, (town) 40,000.

Benjamin, Jacob's youngest son, by Rachel, who gave his name to one of the 12 tribes, settled in a small fertile territory between Ephraim and Judah; the tribe to which St. Paul belonged.

Ben Lawers, a mountain in Perthshire, 3,984 ft. high, on the W. of Loch Tay.

Ben Ledi, a mountain in Perthshire, Scotland, 2,873 ft. high, 4½ m. NW. of Callander.

Ben Lomond, a mountain in Stirlingshire, Scotland, 3,192 ft. high, on the E. of Loch Lomond.

Ben Macdhui, mountain in Britain, is in Aberdeenshire, Scotland, 4,296 ft. high.

Ben More, a mountain in Perthshire, Scotland, is a mountain 3,843 ft. high.

Benn, Rt. Hon. William Wedgwood, soldier and politician, second son of Sir John Williams Benn, Bart. Entered Parliament 1906 as Liberal member for St. George's division of Tower Hamlets. Junior Lord of the Treasury 1910-1915. In yeomanry and air-force, D.S.O.; Flying Cross for night work. M.P., Leith, 1918-1927. Joined Labour Party 1927. M.P. N. Aberdeen, 1928-1931. Secretary of State for India, 1929-1931. P.C. 1929. (1877-).

Bennett, Enoch Arnold, British novelist and playwright. Born near Hanley, he made the Potteries the scene of a number of his books, which he started to write after studying law. *Anna of the Five Towns* was his first success, in 1902; his *Old Wives Tale*, *Hilda Lessways*, *Clayhanger* and *Riceyman Steps* are among his best novels. Wrote the play *Milestones* in collaboration with Edward Knoblock. For some years he lived in France, and the period obviously influenced his style. (1867-1931).

Bennett, James Gordon, an American journalist, born in Banffshire, Scotland; trained for the Catholic priesthood; emigrated, a poor lad, in 1819 to America, got employment in a printing-office in Boston as proof-reader; started the *New York Herald* in 1835, at a low price, as both proprietor and editor, an enterprise which brought him great wealth and the success he aimed at. (1795-1872).

Bennett, James Gordon, son of preceding, proprietor of the *Herald*; sent Stanley out to Africa, and supplied the funds. He founded the balloon race named after him in 1899. (1841-1918).

Bennett, Rt. Hon. Richard Bedford, barrister, leader of Conservative party in Canada since 1927. Member of legislative assemblies, of NW. Territories and of Alberta, between 1898 and 1911. M.P. for Calgary in Dominion parliament, 1911-1917. Returned again for Calgary, 1925. Minister of Justice, 1921. Finance Minister, 1926. Presided Ottawa Conference, 1932. Attended World Economic Conference 1933. Prime Minister of Canada, Minister of Finance and of External Affairs 1930-1935, when his party was heavily defeated. (1870-).

Bennett, Sir William Sterndale, an English musical composer and pianist, born at Sheffield, whose musical genius recommended him to Mendelssohn and Schumann; became professor of Music in Cambridge, and conductor of the Philharmonic Concerts; was president of the Royal Academy of Music. (1816-1875).

Ben Nevis, the highest mountain in Great Britain, in SW. Inverness-shire, 4,406 ft. high, a sheer precipice on the NE. 1,500 ft. high, and with an observatory on the summit, supported by the Scottish Meteorological Society.

Ben Rhydding, a village in the W. Riding of Yorkshire, England, 15 m. NW. of Leeds, with a thoroughly equipped hydropathic establishment, once much resorted to.

Benson, Arthur Christopher, British Benson; he was educated at Eton and Cambridge, returned to the former to teach, and later to Cambridge as a don and Master of Magdalene. He published literary criticism, biographies, essays, novels, and poems. (1862-1925).

Benson, Edward Frederic, British novelist, brother of the preceding. Educated at Marlborough and Cambridge, he achieved fame with his *Dodo* in 1893. Has since published many other works. (1867-).

Benson, Edward White, Archbishop of Canterbury. After leaving Cambridge he became a master at Rugby and the headmaster of Wellington; was made Bishop of Truro in 1877, where he started the building of the present cathedral; succeeded Tait as Archbishop of Canterbury, and took a prominent part in the trial of Dr. King, Bishop of Lincoln, on a charge of using certain ceremonies. (1829-1896).

Benson, Sir Frank Robert, actor-manager, educated at Winchester and Oxford; founded repertoire company bearing his name; directed many Shakespearean Festivals at Stratford-on-Avon. Awarded civil list pension, 1934. (1853-).

Bent, James Theodore, African traveller and author; explored the ruins of Zimbabwe; later visited Arabia and Abyssinia. (1852-1897).

Bent Grass, a name given to various species of *Agrostis* which creep and take root by their wiry stems, whence it becomes very difficult to remove them from the soil. Four of the 125 species are found in England; one of them, the *Agrostis alba* (white bent or florin grass), makes valuable pasturage. *Apera* (*Agrostis*) *Sica-Ventii* is the British silky bent-grass.

Bentham, George, botanist, born near Jeremy Bentham and editor of his works; an authority on the British flora. His greatest work was *Genera Plantarum*, which took 20 years to write, in conjunction with Sir Joseph Hooker. (1800-1884).

Bentham, Jeremy, a writer on jurisprudence and ethics, born in London; trained for the legal profession but never practised; spent his life in the study of the theory of law and government, his leading principle on both these subjects being utilitarianism, or what is called the greatest happiness principle (hedonism), as the advocate of which he is chiefly remembered—a principle against which Carlyle never ceased to protest. (1748–1832).

JEREMY BENTHAM

Bentinck, Lord George (William George Frederick Cavendish), statesman and sportsman, a member of the Portland family; entered Parliament as a Whig, turned Conservative on the passing of the Reform Bill of 1832; served under Sir Robert Peel; assumed the leadership of the Party as a Protectionist when Peel became a Free-trader; the memory of him owes something to his life by Lord Beaconsfield. (1802–1848).

Bentinck, Lord William Henry Cavendish, Indian statesman, Governor of Madras in 1803, but recalled for an error which led to the mutiny at Vellore; was in 1827 appointed Governor General of India, which he governed wisely, abolishing many evils, such as Thuggerism and Sattos. Macaulay held office under him. He returned to England in 1835, became member for Glasgow in 1837. (1774–1839).

Bentinck, William, a distinguished statesman, first Earl of Portland, born in Holland; a favourite, friend, and adviser of William III., whom he accompanied to England, and who bestowed on him for his services great honours and large domains, which provoked ill-will against him; retired for a time to Holland after the King's death. (1649–1709).

Bentley, urban district (Bentley-with-Arksey), of Yorkshire, England, in W. Riding, 1½ m. W. of Doncaster. It has collieries. Pop. 16,000.

Bentley, Richard, scholar and philologist, born in Yorkshire; from the first devoted to ancient, especially classical, learning; rose to eminence as an authority on literary criticism, his *Dissertation upon the Epistles of Phalaris*, which he proved to be a forgery, commending him to all European scholars. (1662–1742).

Benué, an affluent of the Niger, 800 m. long, falling into it 230 m. from the mouth, described by Dr. Barth and explored by Dr. Baikie; it offers great facilities for the prosecution of commerce.

Ben Wyvis, a mountain of Scotland in Ross and Cromarty, 3,429 ft. high.

Benz, Karl, German engineer, built a motor-car in 1885 driven by benzine, which attained a speed of 15 m. an hour. His work formed the basis of many later improvements in internal combustion engines. (1844–1929).

Benzaldehyde, an aromatic compound prepared from bitter almonds, to which it gives the characteristic smell. It can be prepared from benzene or toluene on the industrial scale, and is used as a flavouring essence for "almond paste."

Benzene, a colourless, volatile, inflammable liquid discovered by Faraday in 1825. It occurs abundantly in coal-tar, which is its principal source, and from which it is obtained by fractional

distillation. It is of chemical importance as the parent substance of those compounds known as aromatic (q.v.), and in practice forms the starting-point in the manufacture of very large numbers of valuable compounds—dyes, drugs, perfumes, explosives, photographic chemicals, and so on. Is also employed as a fuel for internal-combustion engines, and is then known as benzol.

Benzine, should not be confused with benzene (q.v.). It is a mixture of low-boiling-point paraffins (q.v.), and forms a colourless, volatile, inflammable liquid used as a motor fuel and as a solvent. Alternatively it is known as benzoline, gasoline, or light petroleum.

Benzoic Acid, a white crystalline solid, melting at 121° C., usually obtained by the oxidation of toluene, but may also be prepared by heating the natural product gum benzoin. It has some use in medicine, and certain of its derivatives are employed as flavouring essences and perfumes.

Benzoin, a corruption of the Arabic *kubba jawat*, Javanese resin, is a gum ("gum benzoin") obtained from the Eastern tree *Styrax benzoin*. It is used in medicine and perfumery and as an incense. On heating it yields benzoic acid. Benzoin is also the name of a chemical substance, prepared by the action of potassium cyanide upon benzaldehyde.

Benzoline. See *Benzine*.

Benzyl Chloride, a liquid with an irritating smell obtained by passing chlorine through boiling toluene. It was used in the Great War in tear shells.

Beowulf, an old Anglo-Saxon romance consisting of 6,356 short alliterative lines, and the oldest extant in the language, recording the exploits of a mythical hero of the name, who wrestled Hercules-wise, at the cost of his life, with first a formidable monster and then a dragon that had to be exterminated or tamed into submission before the race to which the champion belonged could live with safety on the soil.

Béranger, Pierre Jean de, a celebrated French song-writer, born at Paris, of the lower section of the middle class. Lucien Bonaparte took him up, and under royal patronage a career was opened up for him; in 1815 appeared as an author, and the sensation created was immense, for his songs were in stirring accord with, and helped to influence, the great passion of the nation at the time; was, as a Republican, a great admirer of Napoleon as an incarnation of the national spirit, and contributed not a little to the elevation of his nephew to the throne. (1780–1857).

Berar, a district of India, E. of Bombay, formerly one of the Hyderabad Assigned Districts; transferred to Great Britain as such in 1853. It occupies a fertile, well-watered valley, and yields large quantities of grain and cotton. In 1902 a perpetual lease of Berar to the Government of India took the place of the Assignment, and since 1936 Berar and the Central Provinces (q.v.) have been administered as one under the Nizam of Hyderabad and Berar.

Berber, a town in the Anglo-Egyptian Sudan on the Nile, an important stopping-place on the Wady Halfa-Khartoum railway and formerly starting-point of Caravans for Suakin on the Red Sea. Pop. 5,000.

Berberah, the seaport of the British Somaliland Protectorate on the Gulf of Aden, with an annual fair lasting several months that brings together at times as many as 30,000 people.

Berbers, a race aboriginal to Barbary and N. Africa, predominant in Algeria and Morocco, and including the Kabyles and Tuaregs of the Sahara; of a proud and unruly temper; though different from the Arab race, are of the same religion.

Berbice, the eastern division of British Guiana; produces sugar, cocoa, tobacco, and timber.

Berchem (or *Berghem*), a celebrated landscape-painter of the Dutch school, born at Haarlem. (1624-1683).

Berchta, a German female bogey, the name signifying "the white lady," supposed to have dominion over enchantresses, elves, dwarfs, and held up as a terror before bad children. See *Bertha*.

Berchtesgaden, a town in the SE. of Bavaria, where Herr Hitler has a retreat and where important conferences have been held. Chief industry is toy-making. It is also a health resort. There are rock salt mines in the vicinity and several lakes including the Königssee.

Berchtold, Count Leopold von, Austro-Hungarian diplomat, successor to Aehrenthal as Foreign Minister in 1912, in which capacity he served until 1915, being responsible for foreign policy at the outbreak of the Great War. In face of threatened Serbian expansion, he favoured a final settlement with Serbia after the assassination of the Archduke Francis Ferdinand, even if it involved war with Russia and France. (1863-)

Bercy, a commune on the right bank of the Seine, outside Paris, included in it since 1860; is the great mart for wines and brandies.

Berdichev, a town of Russia, in the centre, with 4 great annual fairs. Its predominantly Jewish population gave it the name of Jerusalem of Volhynia. Pop. 56,000.

Bereans, a sect formed by John Barclay in 1778, who regard the Bible as the one exclusive revelation of God.

Berenger, or *Berengaricus of Tours*, a celebrated theologian, born at Tours; held an ecclesiastical office there, and was made afterwards Archdeacon of Angers; for denying the doctrine of transubstantiation he was condemned by successive councils of the Church and compelled publicly to retract, though he so often and openly recalled his retraction that the pope, Gregory VII., deemed it prudent at length to let him alone. After this he retired to an island on the Loire, where he gave himself up to meditation and prayer. (938-1088).

Berenger I., King of Italy, grandson of Louis the Débonnaire, and therefore of the Carolingian family, an able general; originally Marquis of Friuli; provoked the jealousy of the nobles, who dreaded the abridgment of their rights, which led to his assassination at their hands in 924. S. II., King of Italy, grandson of the preceding, was dethroned twice by the German Emperor Otto, who sent him a prisoner to Bamberg, where he died, 966.

Berenice, a Jewish widow, daughter of Titus was fascinated, and whom he would have taken to wife, had not the Roman populace protested, from their anti-Jewish prejudice, against it. The name was a common one among Egyptian as well as Jewish princesses, a famous Berenice being the queen of Ptolemy III., who, from a legend concerning the dedication of her hair to the war-gods, has given her name to the constellation "Coma Berenices," the seven stars near the tail of Leo.

Beresford (of Metammore and Curraghmore), Charles William de la Poer Beresford, Baron (best known as Lord

Charles Beresford), second son of the fourth Marquess of Waterford, British admiral and parliamentarian. In 1882, as captain, assisted at reduction of Alexandria. Was with naval brigade at Abu Klea, etc., 1885. At different times represented in parliament: Marylebone, York, Woolwich, Portsmouth. A lord of the admiralty, 1886-1888. Rear-admiral, 1897. Commanded Mediterranean and Channel squadrons. At variance with Fisher's naval reforms, addressed, 1909, controversial document to Prime Minister Asquith. Baron, 1916. (1846-1919).

LORD C. BERESFORD

Beresford, William Carr, Viscount, an English general, natural son of the first Marquis of Waterford; distinguished himself in many a military enterprise, and particularly in the Peninsular War, for which he was made a peer; he was a member of the Wellington administration, and master-general of the ordnance. (1768-1854).

Beresina, a Russian river, affluent of the Dnieper, into which it falls after a course of 350 m.; it is serviceable as a water conveyance for large rafts of timber to the open sea, and is memorable for the disastrous passage of the French in their retreat from Moscow in 1812.

Berg, *Alban*, Austrian musical composer, born in Vienna, and trained by Schönborg. His acknowledged masterpiece was the opera *Wozzeck*, which was produced in Berlin in 1925—a work unfamiliar in style, for he had abandoned traditional formality, but yet admirably adapted to the theme of the opera. (1885-1935).

Berg, *Duchy of*, on right bank of the Rhine, between Düsseldorf and Cologne, now part of Prussia; Murat was grand-duke of it by Napoleon's appointment when previously it had been ceded to France.

Bergamo, a Lombard town and episcopal see, in a province of the same name, and 34 m. NE. of Milan, with a large annual fair in August, the largest in Italy. Textiles are manufactured. Pop. (prov.) 585,000, (town) 85,000.

Bergamot, a variety (*Bergamia*) of *aurantium*, the sweet orange, *Citrus aurantium*, from the rind of which oil of bergamot is obtained.

Bergen, the old capital of Norway, on the Gulf Stream, and never frozen; the town, consisting of wooden houses, is built on a slope on which the streets reach down to the sea, and has a picturesque appearance; the trade, which is considerable, is in fish and fish products; manufactures gloves, porcelain, leather, etc.; the seat of a bishop, and has a cathedral; the birthplace of Ole Bull, the violinist, and Grieg, the composer. Pop. 98,000.

Bergen-op-Zoom, a town in N. Holland, once a strongly fortified place, and much coveted and frequently contested for by reason of its commanding situation; has a large trade in anchovies; sugar-beet manufactured. Pop. 24,000.

Bergerac, a manufacturing town in France, 60 m. E. of Bordeaux, celebrated for its wines; it was a Huguenot centre, and suffered greatly in consequence. Pop. 17,000.

Bergerac, Savinien Cyrano de, an eccentric man with comic power, a Gascon by birth; wrote a tragedy and a comedy; his best work a fiction entitled *Histoire Comique des États et Empires de la Lune et du Soleil*; a good swordsman, fought many duels in vindication, it is said, of his preposterously large nose, and is thereby the subject of a play by Rostand, the French dramatist. (1619-1655).

Bergner, Elisabeth, Austrian actress, born in Vienna, married to Dr. Paul Czinner; studied for stage at Vienna Conservatory, 1915-1919. First appearance City Theatre, Zurich, 1919; soon acted Ophelia in *Hamlet* and other Shakespearean heroines, Nora in *A Doll's House*, and St. Joan in Shaw's play—an international success. In Britain, first at Manchester and then London (Apollo), 1933 in *Escape Me Never*. 1936 played the title-role in Barrie's *The Boy David*. Has also appeared in films. (1900-).

Bergson, Henri Louis, French philosopher, of Jewish descent, he early studied metaphysics and became professor of Philosophy at the College of France. His system regards life as the ultimate reality, and his ideas of creative evolution are reflected in the writings of Bernard Shaw. (1859-).

Beri-beri, a disease common in the East due to a diet deficient in certain vitamins (q.v.). It is often due to an absence of fresh vegetables or to a diet mainly composed of rice with the husks removed. The discoverer of the cause was the late Sir Thomas Stanton (d. 1938), the expert in tropical medicine and medical adviser to the Secretary of State for the Colonies.

Berkeley, a town in Gloucestershire, England, in the Vale of Berkeley, a valuable pasture district. Pop. 800. Also a town in California, U.S.A., in which is located the University of California. Pop. 81,000.

Berkeley, George, Bishop of Cloyne, born in Kilkenny; a philanthropic man, who conducted in a self-sacrificing spirit practical schemes for the good of humanity which failed, but the interest in whom has for long centred, and still centres, in his philosophic teaching, his own interest in which was that it contributed to clear up our idea of God and consolidate our faith in Him; it is known in philosophy as Idealism, but it must be understood that his Idealism is not, as it was absurdly conceived to be, a denial of the existence of matter, but is an assertion of the doctrine that the universe, with every particular in it, as man sees it and knows it, is not the creation of matter, but the creation of mind, and a reflex of the Eternal Reason that creates and dwells in both it and him. The outer, as regards our knowledge of it, is within; such is Berkeley's fundamental philosophical principle. (1685-1753).

Berkhamstead, a market town of Hertfordshire, England; straw-plaiting the chief industry. Pop. 8,000.

Berkshire, a midland county of England, with a fertile, well-cultivated soil on a chalk bottom, in the upper valley of the Thames, one of the smallest but most beautiful counties in the country. In the E. part of it is Windsor Forest, and in the SE. Bagshot Heath. It is famous for its breed of pigs. Pop. 311,000.

Berkshire Hills, a mountainous district of W. Massachusetts, U.S.A., famed for its great natural beauty and a great holiday resort.

Berlichingen, Goetz von, nicknamed "Of the Iron Hand," a brave but turbulent noble of Germany, of

the 15th and 16th Centuries, the story of whose life was dramatised by Goethe, "to save," as he said, "the memory of a brave man from darkness," and translated from the German by Sir Walter Scott.

Berlin, capital of Prussia and Germany; stands on the Spree, in a flat, sandy plain. It is linked by canal to the Rs. Elbe and Oder and is the centre of the Great Prussian State railway system. Recent suburban expansion includes Potsdam, Charlottenburg and Spandau. The old royal and imperial palaces, the great library, which contains over 5,000,000 volumes, the university, national gallery and museums, and the arsenal are all near the centre of the city.

Its position between the Baltic and North Seas, the Spree and the numerous canals and railways which converge on it, renders it a most important commercial centre; its staple trade is in grain, cattle, spirits, and wool. Manufactures are extensive and very varied; the chief are woollens, machinery, bronze ware, drapery goods, and beer. Practically rebuilt since 1878, it is probably the most highly organised and best-administered city in the world. The pop. is 4,246,500, ranking next to London in European cities. Berlin is the seat of the Republican Parliament, the Reichstag, and the Prussian local administration.

Berlin Congress, held in 1878 to revise the terms of the Treaty of San Stefano which ended the Russo-Turkish War, and which appeared to give Russia sole control of the Balkan Peninsula. The President was Prince Bismarck, and the English plenipotentiaries were Lords Salisbury and Beaconsfield. Other countries represented were Austria-Hungary and Turkey. One of the results was the occupation of Bosnia and Herzegovina by Austria-Hungary, while Batoum was held by Russia.

Berlin Decree, a decree of Napoleon on the 21st of Nov. 21, 1806, declaring Britain in a state of blockade and vessels trading with it liable to capture.

Berlioz, Hector, a celebrated musical composer and critic, born near Grenoble, in the dept. of Isère, France; sent to study medicine in Paris; abandoned it for music, to which he devoted his life. His best-known works are the *Symphonic Fantastique*, *Romeo and Juliet*, and the *Damnation of Faust*; the *Symphonic*, which he produced while he was a student at the Conservatoire in Paris, so struck Paganini that the violinist presented him with 20,000 francs. (1803-1869).

Bermondsey, a busy SE. suburb of London, on the S. bank of the Thames, well known for its tanneries and its civic park. Pop. 111,500.

Bermuda Cedar

(*Juniperus Bermudiana*), a species of cedar which covers large parts of the Bermudas; the timber is useful for making boats and pencils.

Bermuda Grass

(*Cynodon dactylon*, dog's-tooth grass), a perennial grass found in Europe (including England), Asia and Africa. It has a creeping stem and erect flowering branches. It grows in sandy soil, and is useful for binding against wind and erosion. Also can be used for pasturage.

Bermudas, or Somers Islands, a

group of 400 coral islands (20 inhabited) in mid-Atlantic, 677 m. SE. of New York; have a

BERMUDA GRASS

delightful temperate climate and are a popular health resort for Americans. They produce a fine arrowroot and export onions. They are held by Britain as a crown colony, have a naval station, and are provided with docks and fortifications. Of the population (27,800) more than two-thirds are negroes, survivors of the old slave days. The islands are in direct steamer and air communication with New York, and are likely to play an important part in the England-America winter air-route.

Bern (or **Berne**), a fine Swiss town on the Aar, which almost surrounds it, in a populous canton of the same name; since 1848 the capital of the Swiss Confederation; commands a magnificent view of the Bernese Alps; a busy trading and manufacturing city. It is famous for its bear-pit. Bern was founded in 1191, and became a free imperial city in 1218. Pop. 689,000.

Bernadotte, **Jean Baptiste Jules**, a marshal of France, born at Pau; rose from the ranks; distinguished himself in the wars of the Revolution and the Empire, though between him and Napoleon there was constant distrust; adopted by Charles XIII., King of Sweden; joined the Allies as a naturalised Swede in the war against France in alliance with Russia; became King of Sweden himself under the title of Charles XIV. (1763-1844).

Bernard, **Claude**, a distinguished French physiologist, born at St. Julien; he studied at Paris; was Majendie's assistant and successor in the College of France; discovered that the function of the pancreas is the digestion of ingested fats, that of the liver the transformation into sugar of certain elements in the blood, and that there are nervous centres in the body which act independently of the great cerebrospinal centre. (1813-1878).

Bernard, **St.**, Abbot of Clairvaux, born at Fontaines, in Burgundy; pronounced one of the grandest figures in the Church militant; studied in Paris, entered the monastery of Cîteaux, founded in 1115 a monastery at Clairvaux, in Champagne; drew around him disciples who rose to eminence as soldiers of the Cross; prepared the statutes for the Knights-Templar; defeated Abelard in public debate, and procured his condemnation; founded 160 monasteries; awoke Europe to a second crusade. (1090-1153). Festival, Aug. 20.

Bernardin de Saint-Pierre.

See **Saint-Pierre**.

Bernardine, **St.**, of **Siena**, born at Massa Carrara in Italy, of noble family; founder of the Observantines, a branch, and restoration on strict lines, of the Franciscan order; established 309 monasteries of the said branch; his works, written in a mystical vein, fill five folio volumes. (1380-1444).

Bernburg, a town in Anhalt, Germany, on the R. Saale; chief industries, chemicals and machinery-making. Pop. 34,000.

Berners, **John Bouchier**, Lord, writer or translator of romance; was Chancellor of the Exchequer in 1516, and Governor of Calais from 1520; translated Froissart's *Chronicles*, and *Huon of Bordeaux*. (1467-1533).

Bernese Alps, a chain in the Middle E. half is called the Bernese Oberland; they form the watershed between the Aar and the Rhône, are a popular tourist district, and include such high peaks as the Jungfrau (13,669 ft.) and the Wetterhorn (12,160 ft.).

Bernhard, Duke of **Saxe-Weimar**, a distinguished himself on the Protestant side in the Thirty Years War; fought under the

standard of Gustavus Adolphus; held command of the left wing at the Battle of Lützen, and completed the victory after the fall of Gustavus; died, as alleged without sufficient proof, by poison and was buried at Breisach. (1604-1639).

Bernhardi, **Friedrich von**, Prussian general, and apostle of nationalism and war, born at St. Petersburg (Leningrad), son of the diplomat Theodor von Bernhardi, became corps-commander in Great War; before which he attained fame, 1913, with his book *Germany and the Next War*. He wrote also: *The War of the Future*, and *Germany's Heroic Fight*. (1849-1930).

Bernhardt, **Sarah**, a dramatic artiste, born in Paris; of Jewish descent, but baptised as a Christian; distinguished specially as a tragedienne, her most famous parts having been in *La Dame aux Camélias*, *Hernani*, *La Tosca*, and *L'Aiglon*; displayed abilities qualifying her to shine in other departments of the profession and of art, such as painting and sculpture. (1844-1923).

SARAH BERNHARDT

Berni, **Francesco**, an Italian poet, born in Tuscany, who excelled in burlesque, and to whom Italian as a literary language owes much; remodelled Boiardo's *Orlando Innamorato* in a style surpassing that of the original; gave his name to the type of poetry called *Bernesque*. (1497-1535).

Bernicia, an ancient British kingdom, afterwards included in Northumbria; founded by King Ida (547-559), it extended from the Tees in the S. to the borders of Strathclyde in Scotland.

Bernina, **Piz**, a mountain in the Rhaetian Alps, in the Swiss canton of Grisons, 13,290 ft. high, remarkable for its extensive glaciers. Also a pass between the Upper Engadine and the Adula Valley.

Bernini, **Giovanni Lorenzo**, an Italian, born at Naples; painter, sculptor, and architect; produced his "Apollo and Daphne" at 18, his masterpiece, was architect to the Pope, and designed the colonnade of St. Peter's; he died wealthy. (1598-1680).

Bernoulli, name of a Swiss family of mathematicians, born at Basel, though of Dutch origin. The most celebrated is **Jean** (1667-1748), professor at Basel, who discovered the exponential calculus and the method of integrating rational functions, as well as the line of swiftest descent. **Jacques** (1654-1705) is remembered for his applications of the calculus to various problems. Several other members of the family were distinguished mathematicians.

Bernstein, **Henry**, eminent modern French dramatist, born in Paris. Chief plays include *La Rafale*, *Le Voleur*, *Samson*, *Après moi*, *Le Secret*, *Judith*. (1876-).

Bernstorff, **Count Johann Heinrich**, German ambassador to the U.S.A. from 1908 until the entry of the U.S.A. into the Great War in 1917, when he went to Constantinople. As ambassador he received President Wilson's protests against submarine outrages and had to deliver his country's apologies though the outrages continued. (1862-).

Berri, an ancient province of France, forms dept. of Indre and Cher, which became crown property in 1100 under Philippe I., and a duchy in 1630, giving title to a succession of French princes.

Berri, Duc de, second son of Charles X. and father of Comte de Chambord, a benevolent man; assassinated by a fanatic, Louvel, as he was leaving the Opera House. (1778-1820).

Berri, Caroline Louise, Duchesse de, dowager of preceding, distinguished herself by her futile efforts to restore the Bourbon dynasty in the reign of Louis Philippe. The attempt failed and she was imprisoned, but released when the discovery of her secret marriage to the Italian Count Lucchesi-Palli deprived her of sympathy and support. (1798-1890).

Berry, a fleshy fruit, the only hard part of which is the seeds (e.g., the drupe), See Fruit.

Bersaglieri, the Italian name for sharpshooters formed originally in Sardinia during the reign of Victor Emmanuel. They fought conspicuously in the Crimean War and the Italian War of 1859, and were later employed in suppressing brigandage in Sicily; distinguished themselves on the Piave during the Great War.

Berserker, a Norse warrior who went whence his name (which means bare of sark or shirt of mail), and was said to have been inspired with such fury as to render him invulnerable and irresistible.

Bertha, goddess in the S. German mythology, of the spinning-wheel principally, and of the household as dependent on it, on behalf of which and its economical management she is often harsh to idle spinners.

Bertha, Big, the nickname of a long-range gun which shelled Paris from Coucy, 76 m. away, in March 1918, named after Frau Bertha von Bohlen, a proprietor of Krupp's arsenal. Its bore was 21 cm. and the trajectory 21 m. 256 people were killed.

Bertha, St., a British princess, wife of Ethelbert, King of Kent; converted him to Christianity.

Berthe, "au Grand Pied," (i.e., Long Foot), wife of Pépin the Short, and mother of Charlemagne, so called from her club foot.

Berthelot, Marcellin Pierre Eugène, a French chemist, born at Paris; professor in the College of France; distinguished for his researches in organic chemistry and his attempt to produce organic compounds; the dyeing trade owes much to his discoveries in the extraction of dyes from coal-tar; he laid the foundation of thermochemistry. (1827-1907).

Berthelot, Philippe Joseph Louis, French diplomat, born at Sévres, son of a celebrated chemist. Entered service 1889. In 1920 became Secretary-General of Foreign Office. In 1922, after an inquiry into affairs of the Industrial Bank of China, suspended for ten years, but re-appointed 1925 by Herriot. (1866-1934).

Berthier, Pierre Alexandre, Prince of Wagram and Marshal of France, born at Versailles; served with Lafayette in the American war, and rose to distinction in the Revolution; became head of Napoleon's staff, and his companion in all his expeditions; swore fealty to the Bourbons at the restoration of 1814; on Napoleon's return retired with his family to Hamberg; threw himself from a window, maddened at the sight of Russian troops marching to the French frontier. (1753-1816).

Berthollet, Claude Louis, Count, a Savoy, to whom we owe the discovery of the bleaching properties of chlorine, the employment of carbon in purifying water, and many improvements in manufactures. (1748-1822).

Berthon, Rev. Edward Lyon, inventor of the two-bladed marine propeller and of canvas collapsible boats for use in shipwreck. (1813-1899).

Bertillon Method, for identification of criminals; introduced by and named after Alphonse Bertillon, of Paris; comprises measurements of head and body, of the fingers, feet, and ears in particular.

Bertrand de Born. See Born.

Bertrand du Guesclin. See Du Guesclin.

Bertrand, Henri Gratien, Comte, a French general, and faithful adherent of Napoleon, accompanied him in all his campaigns, to and from Elba, as well as in his exile at St. Helena; conducted his remains back to France in 1840. (1773-1844).

Bervie, or Inverbervie, a seaport and Scotland, market town of Kincardineshire, Scotland, with an ancient castle. Pop. 1,000.

Berwick, James Fitz-James, Duke of, a natural son of James II., a naturalised Frenchman; defended the rights of his father; was present with him at the Battle of the Boyne; distinguished himself in Spain, where he gained the victory of Almanza; was made marshal of France; fell at the siege of Philippsburg. (1670-1734).

Berwickshire, a fertile Scottish Lowland county, inclusive, and the Tweed; is divided into the Merse, a richly fertile plain in the S., the Lammermuirs, hilly and pastoral, dividing the Merse from Mid and East Lothian, and Lauderdale, of hill and dale, along the banks of the Leader; Greenlaw the county town. Pop. 26,600.

Berwick-upon-Tweed, a town on the Scottish side of the Tweed, at its mouth, reckoned since 1885 in Northumberland, though at one time treated as a separate county; of interest from its connection with the Border wars, during which it frequently changed hands, till in 1482 the English became masters of it. Pop. 12,300.

Beryl, a silicate of aluminium and beryllium which crystallises in the hexagonal system. The clear varieties are classed as gems and include the emerald and aquamarine. The best come from Siberia.

Beryllium, or Glucinum, a rare metal of the magnesium group prepared by heating beryllium potassium fluoride with metallic sodium and excess of sodium chloride. Crystals of pure beryllium are obtained after treatment with water. It is a silver-white, stable metal, and occurs in nature as a silicate in beryl, helvite, and gascolite. It was discovered by Vauquelin in 1798. Its symbol is Be, and its atomic weight 9.1.

Berzelius, Johan Jakob, Baron, a celebrated Swedish chemist, one of the creators of modern chemistry; instituted the chemical notation by symbols based on the notion of equivalents; determined the equivalents of a great number of simple bodies, such as cerium and selenium; discovered selenium, thorium and zirconium; shared with Davy the honour of propounding the electro-chemical theory. (1779-1848).

Besançon, capital of the dept. of Doubs, in France; a very strong place fortified by Vauban; seat of an archbishopric; abounds in relics of Roman and medieval times; watchmaking a staple industry, employing some 15,000 of the inhabitants; manufactures also porcelain and carpets. Pop. 60,000.

Besant, Mrs. Annie, *née* Wood, born in London; of Irish descent; married to an English clergyman, from whom she was legally separated; took a keen interest in social questions and secularism; drifted into theosophy, of which she became an active propagandist. (1847-1933).

Besant, Sir Walter, a man of letters, born at Portsmouth; eminent chiefly as a novelist of a healthily realistic type; wrote a number of novels, some jointly with James Rice, of which *The Golden Butterfly*, *Ready-Money Mortiboy*, and *Dorothy Forster* are best known. One of his books, *All Sorts and Conditions of Men*, Utopian in character, was the cause of the People's Palace being built in the East End of London. He produced several valuable volumes on the history of London, and was the author of *French Humourists*. As champion of the cause of Authors versus Publishers he founded the Society of Authors in 1884. (1836-1901).

Besier, Rudolf, English playwright, but born in Java of Dutch parents. First play *The Virgin Goddess*. Wrote about a dozen other plays before becoming famous with *The Barretts of Wimpole Street*, founded on the history of Elizabeth Barrett Browning. (1878-).

Bessarabia, a province of Rumania to the SW. of Russia, between the Dniester and the Pruth; a cattle-breeding province; exports cattle, wool, and tallow. In 1918 it was added to Rumania. Pop. 3,042,000.

Bessarion, John, Greek cardinal, b. at Trebizond; contributed by his zeal in Greek literature to the fall of scholasticism and the revival of letters; tried hard to unite the Churches of the East and the West; joined the latter, and was made cardinal; too much of a student of Plato to recommend himself to the popehood, to which he was twice nearly elevated. (1395-1472).

Bessborough, Sir Vere Brabazon Ponsonby, ninth earl of: called to Bar, 1903. L.C.C. member for Marylebone E., 1907-1910. M.P. (Conservative), Cheltenham 1910; Dover 1913-1920. Served in Gallipoli with Imperial Yeomanry, 1915; in France on Staff, 1916-1918. Succeeded to title, 1920. P.C., 1931. Governor-General of Canada, 1931-1935. (1886-).

Bessel, Friedrich Wilhelm, Prussian astronomer, born at Minden; professor of Mathematics at Königsberg, and director of the Observatory; discovered the parallax of the fixed star 61 Cygni; his greatest work, *Fundamenta Astronomiæ*, on which he spent ten years, a marvel of toil and accuracy. (1784-1846).

Bessemer, Sir Henry, civil engineer and inventor, born at Charlton, Herts; of his many inventions the chief is the process, named after him, of converting pig-iron into steel at once by blowing a blast of air through the iron while in fusion till everything extraneous is expelled and only a definite quantity of carbon is left in combination, a process which revolutionised the iron and steel trade. (1813-1898).

Bessus, a satrap of Bactria under Darius, who assassinated his master after the battle of Arbela, but was delivered over by Alexander to Darius's brother, by whom he was put to death, 328 B.C.

Bestiary, a name given to a class of animals, medieval books treating of

Beta Particles, electrons (*q.v.*) certain radioactive changes. They are lighter, faster, and more penetrating than the alpha particles (*q.v.*); some beta particles have a velocity closely approaching that of light. See Radioactivity.

Betelgeuse, a variable giant star of constellation Orion, on the fringe of the Milky Way.

Betel Nut, the fruit of the *Areca* palm (*Areca catechu*), cultivated in India and the E. Indies. Is universally chewed by the native population. Has a disagreeable astringent flavour, and stains the saliva a brilliant red.

ARECA PALM

Bethany, a village on E. of the Mount of Olives, abode of Lazarus and his sisters; the scene of the ascension of Christ.

Bethel, a place 11 m. N. of Jerusalem, scene of Jacob's dream, and famous in the history of the patriarchs.

Bethesda, a town of shire, Wales, 5 m. SE. of Bangor, named from its Non-conformist chapel. The Penrhyn slate quarries are near by. Pop. 4,000.

Bethesda, Pool of, the public bathing-place in ancient Jerusalem, a public reservoir with five porches, where Christ healed the impotent man. Its exact position is unknown, though various possible sites have been identified.

Beth-Horon, two adjacent villages of the main route from Jerusalem to the coast. Here Judas Maccabeus defeated the Syrians. They are now known as Upper and Lower Beit-ur.

Bethlehem, a village 6 m. S. of Jerusalem, the birthplace of Jesus Christ and King David, with a convent containing the Church of the Nativity; near it is the grotto where St. Jerome translated the Bible into Latin. Pop. 7,000. Also a town in Pennsylvania, founded by the Moravian Brotherhood. In S. Bethlehem are located the works of the great Bethlehem Steel Corporation. Pop. 57,500. Also a town of the Orange Free State. Pop. 6,300 (whites).

Bethlehemites, a name given to 3 orders of the Catholic Church. (1) Dominican Friars at Cambridge who wore a red star; (2) A Knight-hood order established by Pius XI. in 1458; and (3) a nursing community in Central America, Mexico, and Lima.

Bethlen, Stephen, Count Bethlen von, Hungarian statesman. Entered Hungarian parliament as Liberal, 1901. In 1919 led counter-revolution that overthrew Béla Kún. Prime Minister, 1921-1931; obtained many benefits for Hungary from Powers and League of Nations. Since 1931 has been severe critic of succeeding governments. (1874-).

Bethmann-Hollweg. See **Hollweg**.

Bethnal Green, an eastern suburb of London, a parliamentary borough and populous district. Pop. 108,000.

Bethsaida, two villages of ancient Galilee. One, on the W. shore of the lake, was the birthplace of Peter, Andrew and Philip; the other, N.E. of the lake, was the scene of Christ's feeding of the five thousand.

Béthune, a town in the dept. of Pas-de-Calais, France, which served as a railway centre for the Allies in the Great War. Twice the Germans tried unsuccessfully to capture it, in Jan. 1915, and April 1918. Pop. 20,000.

Betony, *Betonica* (*Stachys betonica* or the young shoots of which, when cooked, are edible. Many varieties thrive in England.

Betting, or wagering by staking something to be lost or won on certain conditions, usually connected with sporting events, and especially horse-racing. There are many forms, from placing bets on races, etc., with a bookmaker or commission agent to football betting by means of "football pools," the latest variation of the hazard, and lotteries, which are as popular on the continent, where they are legalised, as they are in this country, where they are not. Betting has been well known as a practice in all times, and before horse-racing took the form of gambling upon the risks of card-playing.

Severe laws operate against illegal betting, particularly street-betting, lotteries, gaming in a public place, and keeping a common gaming house. Race-course betting is controlled by the Board of Control, and must take place in Tattersall's Ring. Under the gaming laws, bets are not recoverable by law from persons who refuse to carry out the terms of a wager.

The Finance Act of 1926 authorised a duty on bets and betting, and a certificate costing £10 must be held by a bookmaker. Totalisators were legalised in 1928. They are electrically worked machines for recording bets made, and show the amount of the stake money. In France the *pari-mutuel* is a device of a similar nature, except that it is manipulated by officials.

Betting Tax, a tax on bookmakers' turnover included in Winston Churchill's budget of 1926 and abolished by him in 1929, as it failed to produce the anticipated revenue.

Bettws-y-Coed, an urban district of Caernarvonshire, Wales, the centre for a beautiful district attracting many tourists and artists. There are trout and salmon fisheries. Pop. 900.

Betty, *W. Henry*, a boy actor, known as a fortune; the House of Commons once adjourned to see him act *Hamlet*. (1791-1874).

Beule, *Charles Ernest*, a French statesman and archaeologist; superintended excavations on the Acropolis of Athens; held office in the National Assembly under Macmahon. (1826-1874).

Beuthen, a manufacturing town in Prussian Silesia, in the centre of a mining district. Pop. 101,000.

Beveridge, *Sir William Henry*, London School of Economics, 1919-1937. Was born at Rangpur, Bengal. Educated Charterhouse and Balliol College, Oxford. Sub-warden, Toynbee Hall, 1903-1905. First director, Labour Exchanges, 1909-1916. During war, in Ministries of Munitions and of Food. K.C.B. 1919, when he became a senator of London University; vice-chancellor 1926-1928. (1879-).

Beverley, a Yorkshire manufacturing town, 8 m. N.W. of Hull, England, with a Gothic minster, which contains the tombs of the Percys. Pop. 14,000.

Beverley, *John*, a learned man, tutor to the Venerable Bede, Archbishop of York, and founder of a college for secular priests at Beverley; was one of the most learned men of his time; d. 721.

BETONY

Bevis of Southampton, *OR* *Sir*, a famous knight of English medieval romance, which was founded on an old Italian tale of chivalry; a man of gigantic stature.

Bewdley, a municipal borough and ancient market town of Worcestershire, England, on the Severn. Tanning and malting are carried on, and combs, rope, bricks, and brass are made. It has an old grammar school. Pop. 3,000.

Bewick, *Thomas*, a distinguished wood-engraver, born in Northumberland, apprenticed to the trade in Newcastle; showed his art first in woodcuts for his *History of Quadrupeds*, the success of which led to the publication of his *History of British Birds*, in which he established his reputation both as a naturalist, in the truest sense, and as an artist. (1753-1828).

Bexhill, a municipal borough and seaside resort of Sussex, England, 5 m. W. of Hastings. The old town lies inland. Pop. 21,000.

Bexley, a village and, with Bexley Heath, E. Wickham, and Wellington, urban district of Kent, England, 4 m. W. of Dartford. Pop. (urban district) 33,000.

Bey, *Nazim*, leader of the "Young Turks," Tried to impose a Turkish education on Macedonian schools, and Arabic script on the Albanians. Organised massacre of Armenians, 1925. For conspiring against Mustapha Kemal, hanged at Angora 1926.

Beyle, *Marie Henri*, French critic and novelist, usually known by his pseudonym "De Stendhal" or "Stendhal"; born at Grenoble; wrote in criticism *De l'Amour*, and in fiction *La Chartreuse de Parme* and *Le Rouge et le Noir*; an ambitious writer and a cynic. (1788-1832).

Beza, *Théodore*, a French Protestant theologian, born in Burgundy, of good birth; professor of Greek at Lausanne; deputed from Germany to intercede for the Huguenots in France, persuaded the King of Navarre to favour the Protestants; settled in Geneva, became the friend and successor of Calvin; wrote a book, *De Hereticis a Civili Magistratu Puniriendis*, in which he justified the burning of Servetus, and a *History of the Reformed Churches in France*. (1519-1605).

Bezants, Byzantine gold and silver coins of varying weight and value, introduced by the Crusaders into England, where they were current till the time of Edward III.

Béziers, a manufacturing town in the dept. of Hérault, France, 49 m. SW. of Montpellier; manufactures silk fabrics and confectionery. Pop. 71,000.

Bezique, a game played with two packs, threes, fours, fives, and sixes, and used as one. Usually two players. Chief objects to hold various combinations, to win aces and tens (called brisques) and win last trick. Cards are alternately played and drawn from stock.

Bezawada, a town of Madras, India, at the head of the delta of the Kistna, a centre of traffic; there are rice-mills, etc. Pop. 44,000.

Bhagalpur, a town in the province of Bihar, India, on the right bank of the Ganges, 265 m. N.W. of Calcutta; chief product of district indigo. Pop. 68,900.

Bhagavad Gita (i.e. Song of Krishna), a poem introduced into the Mahābhārata, divided into three sections, and each section into six chapters, called Upanishads; being a series of mystical lectures addressed by Krishna to his royal pupil Arjuna on the eve of a battle, from which he shrank, as it was with his own kindred;

the whole conceived from the point of view or belief, calculated to allay the scruples of Arjuna, which regards the extinction of existence as absorption in the Deity.

Bhamo, a town in Burma, on the R. Irrawadi, the chief centre of trade with China, conducted mainly by Chinese, and a military station, only 40 m. from the Chinese frontier.

Bhang, an intoxicating drink which contains narcotic properties, prepared from the hemp plant. The drink is consumed by Eastern peoples.

Bharatpur, a town in a native state of India, yielding wheat, maize, cotton, sugar, with quarries of building stone; 30 m. W. of Agra; carries on an industry in the manufacture of chowries. Pop. (state) 500,000; (town) 35,000.

Bhavnagar (*Bhaunagar*), one of the W. India States on the E. side of the Gulf of Cambay, in political relation with the Agent to the Governor-General. Area 2,960 sq. m. Pop. 500,000. The capital is a seaport of the same name with an extensive cotton trade. Pop. 59,000.

Bhils, an aboriginal pre-Aryan race of Central India, living in the hilly districts and still untrained to settled life; number 750,000; still noted as archers.

Bhiwani, a town in the Hissar district, Punjab, India, an important trading centre. Pop. 33,000.

Bhopal, a well-known native state in Central India, under British protection, with a capital of the same name; under a government that has been always friendly to Britain. Pop. (state) 730,000; (town) 45,000.

Bhutan, an independent state in the E. Himalayas, with magnificent scenery; subsidised by Britain; until 1907 had a government like that of Tibet, viz., a dual control by clergy and laity. In 1907 the temporal head resigned and an hereditary Maharajah was elected. Religion the same as in Tibet (viz. Bhuddism) though the people are at a low stage of civilisation; the country exports horses, musk, salt, and chowries. Pop. (est.) 300,000.

Biafra, *Bight of*, a large bay in the Gulf of Guinea in W. Africa; includes several islands, and receives into it the waters of the Calabar Rts.

Bialystok (or *Bielostok*), capital of a large county of the name in Poland. It fell to the Germans in 1915 after much fighting. Pop. (county) 1,040,000; (town) 91,000.

Biarritz, a bathing-place on the Bay of Biscay, in the dept. of Basses-Pyrénées, France, 6 m. S.W. of Bayonne; became a place of fashionable resort following the visits of the Empress Eugénie. Pop. 21,000.

Bias, one of the seven wise men of Greece, born at Priene, in Ionia; lived in the 6th Century B.C.; many wise sayings are ascribed to him; was distinguished for his indifference to possessions.

Bias Bay, a bay off the coast of China, infested with pirates.

Bible, *The* (i.e., the Book *par excellence*), and not so much a book as a library of books), a collection of sacred writings divided into 2 parts, the Old Testament and the New; the Old, written in Hebrew, comprehending 3 groups of books, the Pentateuch,

the Prophets, and the Hagiographa, bearing on the religion, the history, the institutions, and the manners of the Jews; and the New, written in Greek, comprising the four Gospels, the Acts of the Apostles, and the Epistles. The Old Testament was translated into Greek at Alexandria by 72 Jews, 280 B.C., and is known as the Septuagint; and the whole book, Old and New, was translated into Latin in a grotto near Bethlehem by St. Jerome, A.D. 385-404, and is known as the Vulgate, after which the two came to be regarded by the Church as of equal divine authority and as sections of one book.

No complete translation was made in England in Saxon times, though portions were rendered into Anglo-Saxon by Bede, the historian. Although printing was brought to England in 1474, no English Bible was printed till 1538, and that by a foreign press. William Tyndale translated a large portion, being assisted by Luther; and he completed the New Testament in 1526. Miles Coverdale produced a completely translated Bible in 1535. The Great Bible of Cranmer appeared in English churches in 1539. The Geneva Bible (a Breeches Bible) was produced in 1560 at Geneva by ministers exiled by Mary Queen of Scots. The authorised Bible of the Catholic church is the Douay Bible, consisting of a version of the Old Testament taken from the Vulgate and published at Douay in 1610, a version of the New Testament published at Rheims in 1582.

The uniform English Bible was prepared by ministers of James I. during 1607-1610, and is the first authorised version. Changes in the English language and the discovery of further information in hitherto unknown documents by eminent scholars led to formation of a committee in 1870 at the instigation of the Bishop of Winchester to revise the Authorised Version, for the elimination of errors. To avoid sectarian bias, experts of the Presbyterian and Nonconformist churches were invited, as well as representatives of the American Churches. The revised version was completed in 1885. The style of the language of the authorised version was left unchanged, and only errors rising from inaccurate translations of Greek words were removed.

At the present time the Christian Church is divided as far as the Old Testament is concerned, the Catholic Church retaining and the Protestant Church excluding the Apocrypha. It may be permitted to note that the Bible is written throughout, not in a speculative or a scientific, but in a spiritual interest, and that its final aim is to guide men in the way of life. The spirit in which it is composed is the spirit of conviction; its essence, both in the root of it and the fruit of it, is faith, and that primarily in a moral power above, and ultimately a moral principle within, both equally divine. The one principle of the book is that loyalty to the divine commands is the one foundation of all well-being, individual and social.

Bible Christians, a sect of Methodism founded in 1815 in Devon by William O'Bryan, and merged in 1907 with the United Methodists.

Bible Society, *The British and Foreign*, founded in 1804, with George Borrow (q.v.) as one of its agents. Has circulated the bible or portions of the bible in some hundreds of different languages. Millions of copies of the Scriptures are distributed every year.

Biblia Pauperum (i.e., Bible of the Poor), a book consisting of some 50 leaves, with pictures of scenes in the Life of Christ, and explanatory inscriptions in Latin verse, printed, from wooden blocks, in the 15th Century, before the invention of printing by movable types.

BHIL ARCHER

Bibliography (a term whose present use dates only from the 19th Century) means, as a system, "the description and history of books, their authorship, printing, publication, editions, etc." In practice now, a bibliography—i.e., a work containing such details—deals only with the literature of some one subject, period, locality, or author; or else it is a Bibliography of Bibliographies, a guide to works where the bibliography of each class will be found. The merest list of books of any class is sometimes called a bibliography.

Bibliomancy, a method of divination in which a book (e.g., the Bible) is opened at random and a chance passage interpreted as an omen applicable to present circumstances.

Bibury, a picturesque old village of Gloucester, England, in the Cotswolds, 7 m. N. of Cirencester. It has a church dating from Saxon times. Pop. 600.

Bi-carbonate, a salt of carbonic acid (H_2CO_3), is used as an antacid, and effervescing liquors are usually produced by mixing it with acids such as tartaric acid. It is also the chief ingredient in baking-powder.

Biceps, a two-headed muscle of the upper arm, the function of which is (on contraction) to flex the fore-arm and supine the hand. The shorter of the two heads is attached to the coracoid process of the scapula, the longer to the edge of the glenoid cavity.

Bicester, a market town in Oxfordshire, England, 12 m. NE. of Oxford. Cattle fairs are held there. There are remains of a 12th-Century abbey. Pop. 3,000.

Bichât, *Marie François Xavier*, an eminent French anatomist and physiologist; physician to the Hôtel-Dieu, Paris; one of the first to classify the structure of the human body into "cellular, vascular and muscular tissues"; his great work *Anatomie Générale appliquée à la Physiologie et à la Médecine*. (1771-1802).

Bickerstaff, *Isaac*, the pen-name adopted by Swift and Steele in many of their writings.

Bicycles, first used about 1800, feet ground to propel them. The "bone-shaker" came in 1865, and the "penny-farthing" about 1880, types which were followed by the "safety bicycle" with two wheels of the same size. Pneumatic tyres and free wheels were later improvements.

Biddery Ware,

were of tin, copper, lead and zinc, made at Bidar in Hyderabad, India.

Bidding Prayer, an exhortation to special reference, followed by the Lord's Prayer, in which the congregation joins.

Biddle, *John*, a Scottish writer in the Commonwealth; much persecuted for his beliefs, and was imprisoned, but released by Cromwell; regarded as the founder of English Unitarianism; wrote a *Confession of Faith touching the Holy Trinity*. (1615-1692).

Bideford, a municipal borough, sea-port and market town of N. Devon, England, on the Torridge, here crossed by a fine old bridge. Once an important port, it figures largely in Kingsley's *Weshead Ho!* Pop. 2,000.

Bidpai, or *Pilpai*, the presumed author of a collection of Hindu fables of ancient date, in extensive circulation over the East, and widely translated.

Biel (or *Bienne*), a town of Switzerland in the canton of Bern standing at the E. end of the Lake of Biel (or *Bienne*). Watchos are made. Pop. 37,000.

Biel (or *Bienne*), Lake of, in the Swiss canton of Berne; the Aar is led into it when in flood, so as to prevent inundation below; on the shores of it are remains of lake-dwellings, and an island in it, St. Pierre, the retreat of Rousseau in 1765.

Biela's Comet, discovered in 1826 by Biela, an Austrian officer, was found to have a period of 6½ years. On its appearance in Jan. 1846, it was found to have divided into two parts, which were farther apart when the comet was next observed in 1852. It was not visible in 1850 or 1856, but in 1872, at the time when the comet was expected (Nov. 10), an unprecedented shower of meteors fell upon the earth. Biela's comet had disintegrated and the earth had passed through the remains.

Bielefeld, a manufacturing town in Westphalia, Germany, with a large trade in linen. Pop. 121,000.

Biene, *Auguste van*, actor and violinist, born in Holland, but in London from childhood, became manager of companies touring with burlesques. A sentimental play by Herbert Keen and James T. Tanner, *The Broken Melody*, produced at the Prince of Wales's in 1892, with van Biene as musician playing his violincello in it, was performed more than 6,000 times. He died suddenly while playing in *The Master Musician*, at Brighton. (1850-1913).

Biene. See *Biel*.

Biennials, the name applied to plants during their "life-cycle," first in laying up a store of food, and second in flowering. Variations in climatic conditions cause delay, and the period is not fixed.

Bierce, *Ambrose*, short-story writer, born in Ohio, U.S.A., went to Mexico in 1913 during a civil war there, and disappeared. Rumour has it that he was shot by Villa. Chief work *Tales of Soldiers and Citizens*. (b. 1842).

Bier's Congestion Treatment.

It has long been known that, when unusually large demands are made upon an organ of the body, an increased amount of blood is delivered to it; this state is called hyperæmia. Bier conceived the idea of producing hyperæmia artificially in regions of the body affected by disease, and thus helping nature in her curative efforts. Two methods are employed, viz., the application of hot air (see *Aerotherapeutics*) to the appropriate region, which causes local congestion by increasing the flow of blood thither, and a more passive method which consists in lightly constricting the veins carrying the blood from the affected part, thus impeding its flow and giving it a longer time in which to perform its work. Under properly supervised conditions the Bier treatment has proved very successful.

Bigamy, the act of one who, being married, goes through the ceremony of marriage again during the life of the former husband or wife. Bigamy is an offence under the laws of most states. In England bigamy is a felony, punishable under the Offences against the Person Act of 1861 with penal servitude for any term not exceeding 7 years and not less than 3 years, or imprisonment with or without hard labour, not exceeding 2 years.

BICYCLE OF 1884

If the party's wife or husband shall have been absent continuously for 7 years, and is not known to be alive, no penalty is incurred, but the second marriage is void. Strict proof must be given of the first marriage; and the first wife or husband is not admissible as a witness for the prosecution, although the second is. It is not necessary to prove the second marriage would have been blinding but for the first.

In Scotland the punishment is less severe, being usually a short term of imprisonment. Bigamy is punishable on the continent of Europe and in the United States, the French "code pénal" providing the punishment of "travaux forcés à temps."

Big-Endians, a name given to the Catholics, as Little-endians is the name given to the Protestants, in the imaginary kingdom of Lilliput, in Swift's *Gulliver's Travels*, the former being regarded as heretics by the latter because they break their eggs at the big end.

Biggleswade, a market town of Bedfordshire, England; manufactures bicycles and farm implements; market-gardening is an important industry. Pop. 6,000.

Biglow, imaginary author of poems in the Yankee dialect, written by James Russell Lowell.

Bihar (Behar) and **Orissa**, formerly a province of British India, composed of Behar in the Ganges Valley, Orissa, rich delta lands, and between them the mountainous region of Chota-Nagpur. The native states of Chota, Nagpur, and Orissa were separated from the province in 1933. Under the Government of India Act, 1935, Bihar became a separate province from Orissa. Patna is the capital. Bihar is known as the "garden of India," and rice, wheat, barley, jute, and sugar-cane are the chief crops. Densely populated. The Cradle of Buddhism. Coal, iron, and mica are mined, and there are large iron and steel works and tobacco factories. Area (Bihar), 69,054 sq. m. Pop. 342,000,000, mostly Hindus.

Bijapur, city in the presidency of Bombay, India, once the capital of an extensive kingdom, and with remains of its former greatness. Pop. 33,000.

Bijawar, a small forested state of India, in the Bundelkhand Agency, of which the chief city is a town of the same name. Pop. (state) 130,000.

Bikaner, a native state of Rajputana, India, a desolate region without permanent rivers. Camels, sheep, and horses are reared, coal is mined, and goldsmith's work and ivory carving are carried on. Its capital (pop. 70,000) has the same name. Area, 23,317 sq. m. Pop. 900,000.

Bilaspur, a state in the Punjab, in political relation with the Punjab States Agent to the Governor-General. The capital is a town of the same name. Agricultural products are the chief sources of wealth of the state (rice in particular). Pop. (state) 100,000.

Bilbao, capital of the Basque province of Biscay, in Spain; a commercial city of ancient date, famous at one time for its steel, especially in Queen Elizabeth's time, when a rapier was called a "bilbo." There is a Basque University. Was captured by Gen. Franco's forces in 1937 after severe fighting. Pop. 176,000.

Bilberry, a berry-bearing shrub of the order Ericaceae abundant in the N. of the British Isles and hilly districts of the S. The berries are edible and are popular with cream in Devonshire.

Bile, a fluid secreted from the blood by the liver to aid in digestion, the secretion of which is most active after food.

Bilge, that part of a ship's bottom nearest the keel. The word is the same as bilge. When aground a ship usually rests upon the keel and one bilge.

Bilharziasis, otherwise schistosomiasis, a disease leading to discharge of blood and mucus from the rectum. It is caused by infection from a fluke parasite, the schistosome. It is prevalent in Africa, S. America, W. Indies, China, Japan, India, Burma and W. Australia.

Bill, the horny, toothless, and lipless jaw of birds, formed by the elongation of the front bones of the skull, and covered with a horny sheath. In birds of prey the upper mandible is larger than the lower.

The nostrils are usually at the back, but in some types, notably the puffin, they are placed forward. The bill is used for seizing food, nest-building, fighting, and the preening of feathers. They vary tremendously in size and shape.

BILLS
A, Falcon; B, Night-jar; C, Puffin; D, Woodpecker

Bill Brokers, people who deal in exchange bills, either for themselves or as agents. When selling Bills of Exchange, they are purely brokers, when buying to sell again, bill merchants, and when dealing with bills involving combined capital of depositors, they become "discount houses." The former term for bill-broking firms was commission houses.

Billerica, a market town of Essex, England, 5 m. E. of Brentwood. It has an ancient church with a fine tower. Bricks are made. Here a Zeppelin was brought down in 1916. Pop. 1,500.

Billeting, a method of provisioning and lodging soldiers when not in camp or barracks. Billeting was formerly in the hands of the chief magistrate of a town, who was to allot the billets as fairly as possible. A list of houses, usually inns, hotels, etc., was kept, and the innkeeper received a billeting allowance. The power of billeting is outlined in the Army Act of 1881, which was extended by the Act of 1909 providing for the billeting in cases of emergency, of troops, etc., on occupiers of all public buildings, dwelling-houses, warehouses, barns, and stables. The Act is renewed annually.

Billiards, a game known in England as long ago as the 16th century (cf. *Antony and Cleopatra*, Act 2, Sc. v.). It is believed to have been invented by a Spaniard, and has grown rapidly in favour since the middle of last century. J. Roberts, W. Cook, Mitchell, C. Dawson, Diggle, Stevenson, Inman, Reece, Davis, W. Smith, and Newman have been among the leading exponents of the game in this country, to whom must be added W. Lindrum, the Australian champion.

Billingham, an urban district and village of Durham, England. The British Oxygen Company has works here, and iron and steel are also worked. Pop. 8,000.

Billingsgate, a fish-market in London, below London Bridge; also a name given to low, coarse language indulged in there.

Billiton, or **Bilong**, an island of the Dutch East Indies between Borneo and Sumatra, chiefly notable for its many rich tin mines. Pandang is the capital. Area, 1,850 sq. m. Pop. 72,000.

Bill of Exchange, an "conditional order in writing, addressed by one person to another, requiring the person to whom it is addressed to pay on demand or at a fixed time a certain sum of money to a person specified." There are two classes: inland and foreign. Inland bills are those drawn and paid within the British Isles. Any other is foreign. A bill of exchange may be transferred. This operation is called negotiation. It must be stamped according to the terms of the Stamp Act. Bills afford a ready means of raising money to commercial bodies, and for adjusting commercial debts between interests in different countries. A bill may always be discounted either by a broker or through a bank.

Bill of Lading, an acknowledgment certifying the receipt of merchandise on board ship, and engaging to deliver the said merchandise safely at the port to which the ship is bound. If the ship is lost and the goods are insured, the underwriters accept a copy of the Bill of Lading as evidence of the shipment having been made and of the ownership of the goods. A Bill of Lading is negotiable.

Bill of Rights, the name given to the statute of William and Mary, embodying the Declaration of Rights and accepted by them with the crown in 1689. It declared the abdication of James II. and contained 13 clauses relating to freedom of parliamentary election, keeping a standing army in time of peace, levying of money, excessive fines, and illegality of dispensing with or suspending laws.

Bill of Sale, a deed or writing under seal, the evidence of the sale of goods, furniture, fixtures, etc. Such are generally used where the possession of the property is not intended to be parted with. Property is liable to be seized under a Bill when the debtor breaks the terms of an agreement, or if execution be levied against the goods of the debtor under a judgment.

Bilston, a market town of Staffordshire, England, 3 m. SE. of Wolverhampton. An iron-smelting and hardware centre, grindstones are made from local stone and casting is carried on. Pop. 31,000.

Bimetallism, the term describing a monetary system based on the use of gold and silver on level terms regarding legal tender and minting. Conferences met in Paris between 1873 and 1882 to fix the proportion for a bi-metal standard, but without effect. The last attempt to establish international bimetallism was in 1887 in U.S.A., and U.S.A. and France proposed that England should recommence minting silver in India and guarantee a purchase of £10,000,000 of silver annually. India refused, and in 1900 the agitation died down.

The monometallic standard of gold was established in England in 1900, and in 1914 all countries were included except China, on silver, and some small countries. Suggested proportions of a bimetallic standard have been fixed by experts at 1 of gold to 15½ of silver, but variations in currency demands in different countries and their respective silver mine possessions make the adoption unworkable.

Binary or Double Stars, were first studied by Sir Wm. Herschel (q.v.). These systems consist of one star revolving about another, giving rise in some cases to a variation in the apparent brightness. Though many of the binaries reveal their double nature in a powerful telescope, others are only identified by the spectroscope or by the variation in their brightness. Data obtained from the observation of double stars enable us to calculate their masses.

Bindweed, the name given to certain climbing hedgerow plants of the convolvulus family with attractive, bell-shaped flowers, common in England. *Convolvulus arvensis*, the lesser bindweed, bears sweet-scented flowers much visited by insects. *Calyptegia sepium*, larger bindweed, bears scentless flowers and is fertilised by the hawk-moth, the distribution of plant and moth being co-extensive.

Bingen, a manufacturing and trading town of Germany on the left bank of the Rhine, in Rhonish Hesse. Opposite it is the tower associated with the myth of Bishop Hatto (q.v.). Pop. 11,000.

Binghampton, a manufacturing town of New York State, U.S.A., county seat of Broome county, with a variety of commercial products. Pop. 76,600.

Bingley, a market town of Yorkshire, England, in the W. Riding, on the Aire, and has iron works and woollen, worsted, cotton, and paper factories. Pop. 20,000.

Binnacle, a term denoting the box or case used on board ship to contain the compass and its accessories, etc.

The word is an abbreviation of the French *habitable*, a small habitation, and the original name was *bittacle*.

Binocular, a telescope or microscope or field-glass, or opera-glass, having two eye-pieces; so that both eyes may use the instrument simultaneously.

BINNACLE

A binocular telescope is a pair of telescopes mounted on a stand, and having a parallel adjustment for the width between the eyes. Galileo made a binocular telescope in 1716. The invention of the binocular microscope was suggested by Wheatstone's invention of the stereoscope, with its exemplification of the value of binocular vision. The principle of the binocular is now applied by opticians in making spectacles.

Binyon, Laurence, English poet, won the Newdigate Prize at Oxford, and then worked as an assistant in the British Museum. Besides many war poems he wrote *The Death of Adam*. His line "They shall grow not old as we that are left grow old," is quoted on hundreds of war memorials. (1869-).

Biochemistry is that branch of chemistry in which special attention is devoted to the investigation of chemical changes and compounds characteristic of living matter. The beginnings of biochemistry may be traced to the school of iatrochemistry (medical chemistry) founded by Paracelsus (1493-1541), but until pure chemistry was well advanced, little progress could be made with biochemical problems, owing to their inherently difficult nature.

Priestley (1733-1804) and Lavoisier (1743-1794) were, however, able to elucidate the chemical changes involved in respiration, and when organic chemistry was developed by Dumas, Liebig, Wöhler, Bunsen and others during the course of the 19th Century, much light was thrown upon the structure of such typical products of living organisms as urea, sugar, alcohol, and even much more complex compounds.

Colloidal chemistry has done much to explain the behaviour of protoplasm, while the discovery of enzymes has had far-reaching results not only in furthering the bounds of knowledge, but also in industry. The molecular architecture of some of the highly

active secretions (hormones) of the ductless glands has been fully worked out, and the compounds themselves prepared artificially in the laboratory. A more recent success is the synthesis of certain vitamins (*q.v.*), while in the field of medicine, valuable prophylactic drugs with specific action upon diseases are annually synthesised in large numbers.

Biogenesis, name of the theory that is opposed to Abiogenesis (*q.v.*).

Biography, the art of writing the histories of individual persons. If the individual writing it is himself or herself the subject, the term used is autobiography. The chief difference between ancient biography such as Plutarch's *Lives* (1st Century A.D.), and the modern life is that the former was intended to teach standard morality, by way of either example or warning; while the latter is intended to gratify curiosity, more or less scientific. The old way was found to result in suppressions and hypocrisies; but although its conscious purpose has long been out of fashion, only in our own time has the conventional dressing of character been thoroughly superseded. The greatest biography in English—perhaps in any language—is James Boswell's *Life of Samuel Johnson*, whose own *Lives of the Poets*, though uneven, is valuable.

Biology, the science of living things, including man, animals and plants, though the particular study of man is more usually regarded as the province of medicine. As opposed to the old-fashioned "natural history," biology has a more rigid scientific discipline, and though it is far from its goal, it is nevertheless on the way to becoming an exact science like chemistry and physics.

The main divisions of biology are botany, the study of plants, and zoology, the study of animals; but there are several subsidiary branches of each of these, and at least one division—*viz.*, physiology—which may perhaps claim equal rank with botany and zoology, since it deals with problems largely common to both of them. Heredity and genetics, again, may perhaps be allowed autonomy within the realms of biology, while bacteriology has also become so highly specialised that the bacteriologist does not necessarily look upon himself as a botanist, though he is certainly a biologist.

The basis of life is protoplasm, but this term is to be understood in a generic rather than a specific sense, for the protoplasm of each species of plant or animal and probably of each individual, is different to a greater or less degree from the protoplasm of all others. Protoplasm is a complex colloidal solution of proteins and other substances, and has hitherto defied complete analysis, largely because the methods that have to be employed to analyse it invariably destroy it, or at least destroy those properties of it which we describe as symptoms of life.

Typical protoplasm may be conveniently observed in the microscopic animal called *Amoeba*; it is opalescent and jelly-like, contains a good deal of water, and coagulates when heated. Ultimate chemical analysis reveals the presence in it of carbon, hydrogen, oxygen, nitrogen, and occasionally other elements, while graduated decomposition produces first various proteins, then compounds known as polypeptides and finally amino-acids. Fairly complex polypeptides have been synthesised by Emil Fischer and other chemists, but even the most complex of the synthetic products is far simpler in constitution than the simplest protein, so that the synthesis of protoplasm itself is not yet within the remotest horizon of science. Moreover, living protoplasm is in constant

chemical and physical change, and has several characteristics entirely different from those of non-living matter.

Some of the features which distinguish living material are as follows:—Contractility, which consists in a spontaneous and, in the higher forms of animals, a purposive change of shape—*e.g.*, the use of muscles; Irritability, which in biology implies a response to stimuli such as heat or cold, light, food, and changes of environment; respiration, the basis of which is the slow oxidation of protoplasm, with liberation of energy available for vital purposes; assimilation or feeding, whereby foreign matter is used to build up the body of the feeding organism; excretion, or the removal of waste products, especially nitrogenous compounds; reproduction, or the production of new individuals of the same kind. All these functions are manifested by both animals and plants, a fact which affords support for the theory that all living organisms had a common origin.

It was at one time believed that life could originate *de novo*, a belief reflected in the old tales of hairs turning into worms and eels, and a host of similar legends; but at the present day every biologist believes that all life is from previously existing life. That is not to say that he rejects the ultimate possibility of success in creating living matter artificially, but merely that, so far, no case of spontaneous generation has been authenticated.

The old belief in occasional abiogenesis was gradually abandoned with the advance of more accurate knowledge, and especially through the work of Pasteur, who definitely proved that decay and decomposition are caused by living organisms.

The more rational outlook adopted by biologists in the 19th Century was greatly stimulated by the publication in 1859 of Charles Darwin's epoch-making book, *The Origin of Species*, in which he amassed evidence to combat the theory of special creation and to show that the vast diversity of living organisms had arisen in the course of the ages by a process of evolution. The heated controversies aroused by Darwin's views, and by Huxley's spirited propaganda in support of them, have long since lost their bitterness, and the fact of evolution is no longer disputed by anyone in a position to weigh the evidence. The actual method of evolution suggested by Darwin is not accorded the same degree of assent, but the facts he accumulated remain. See the individual articles on biological subjects: *e.g.*, **Botany**; **Carbon Assimilation**; **Cell**; **Genetics** and **Heredity**; **Physiology**; **Zoology**.

Bion, a Greek pastoral poet of 3rd Century B.C., born at Smyrna; a contemporary of Theocritus; settled in Sicily; was poisoned, it is said, by a rival; little of his poetry survives.

Biot, Jean Baptiste, an eminent French mathematician, astronomer, and physicist, born at Paris; professor of Physics in the College of France; took part with Arago in measuring an arc of the meridian; made observations on the polarisation of light by liquids such as turpentine and solutions of sugar and tartaric acid. (1774-1862).

Birch, a tree widely distributed throughout Europe, N. America, and Asia. The several species include silver-birch (*Betula alba*), common birch (*Betula pubescens*) and the drooping birch (*Betula pendula*). In Russia its oil is used in dressing leather. Baskets, boxes, etc., are made from the bark as well as the birch canoes.

Birchington, a seaside resort of Kent, Margate. There is good bathing, and a golf course. D. G. Rossetti died, and is buried, here. Pop. 2,000.

Bird, *Isabella*. See *Bishop*.

Bird-Catching Spiders, a genus of the family *Aviculariidae*, found in the tropics. They do not spin webs, but live in burrows on the ground or in trees and catch their prey by springing on it. They feed chiefly on insects, but have also been known to catch small lizards, mice and birds. The largest, though no more than 2 in. broad in the body, occupy, with legs outstretched, a span of 6 to 8 in.

Bird-Lice, an order of wingless insects, parasitic chiefly on birds. They are small, have flat bodies, and belong to the order Mallophaga. Some species affect fowls, and can be transferred to cats and dogs.

Bird of Paradise, a family (*Paradisæidae*) of birds of extremely handsome plumage found in N. Guinea and Australia. There are 10 chief varieties. Their food is fruit and insects. They are closely related to the crow family.

Birdoswald,

the Roman *Ambo-glanno*, largest fort on Hadrian's Wall, in Cumberland, England, 4 m. E. of Greenhead.

MARQUIS RAGGIS
BIRD OF PARADISE

Birds, warm-blooded, oviparous vertebrates, clothed with feathers, and possessing four limbs of which the anterior pair are organs of flight, though in some cases they are rudimentary, and in others aquatic paddlers. The bones of the skeleton are hollow. There are no teeth, the work of chewing being done by the gizzard. Birds eat an amount of food, in proportion, greatly exceeding that consumed by man owing to a far higher bodily temperature.

The species of birds number thousands, and classification is according to their structure. The orders include the *Saururæ*, containing one species only, the extinct *archæopteryx* or lizard-tailed bird, the *Anseriformes* (ducks, geese, swans), the *Galliformes* (pheasants, partridges, quails, etc.), the *Pelecaniformes* (pelicans, gannets, cormorants), the *Accipitriformes* (birds of prey—vultures, eagles, hawks, etc.), *Psittaciformes* (parrots), *Coraciiformes* (kingfishers, hoopoes, hornbills, humming-birds, etc.), and the *Passeriformes* (the largest order, including the sparrow, warblers, thrush, wren, starling, nightingale, etc.).

Birds are carnivorous, insectivorous, granivorous, or omnivorous, and the digestive organs are modified accordingly. The eyes of birds are very highly developed in order to assist in their search for small insects and pursuit of rapidly moving prey. They have a great economic value in their ceaseless search for food, resulting in the wholesale destruction of pests in crops. Observation has shown that birds consume enormous quantities of insects and their grubs.

Nests of birds during egg-laying vary from a simple platform of sticks in trees, such as herons use, to the highest type of nest used by the weaver-bird and the tailor-bird of India. With the evolution of nests, protective colouring of eggs has become modified. An egg takes about 24 hours to form, at usually one is laid at a time, until the required number is complete. The number varies according to the dangers to which the eggs and young are exposed. Many sea-birds lay one egg, but game-birds and waterfowl lay from 10 to 20. The size of eggs

varies from that of the humming-bird, which resembles a small bean, to that of the ostrich, which is between 5 and 6 in. in diameter.

Birdwood, Field Marshal Sir William, entered Army in 1883, served on the NW. Frontier in 1898 and in the Boer War. In 1915 he was in command of the forces in the Dardanelles campaign, and succeeded General Gough as commander of the 5th Army on the Western Front. He was appointed Commander-in-Chief in India in 1925. (1865—).

Biren, Duke of Courland, son of a peasant, favourite of the Russian Empress Anne; held the reins of government even after her death; ruled with great cruelty; was banished to Siberia, but recalled, and had his honours restored to him, which six years after he relinquished in favour of his eldest son. (1687—1773).

Biretta, a cap worn by the Catholic clergy, varying in colour with the rank of the wearer, the pope's being white, cardinal's red, bishop's purple, and a priest's black.

Birkbeck, George, a Yorkshireman, was a zealous promoter all over the country of mechanics' institutes, and founder of the Mechanics' Institute, London, afterwards known as Birkbeck College, in association with Brougham and others interested in the diffusion of useful knowledge. (1776—1841).

Birkenhead, in Cheshire, England, on the Mersey, opposite Liverpool and a suburb of it; a town of rapid growth, due to the vicinity of Liverpool; has large shipbuilding yards and docks. A new road-tunnel linking the town with Liverpool was opened in 1934. Pop. 148,000.

Birkenhead, Earl of (F. E. Smith), British politician. Educated at Birkenhead and Oxford, he rose rapidly at the Bar, entered Parliament as Conservative for Liverpool in 1906, and won a name as "The Galloper" in support of the Ulster Unionists in 1914. He became Attorney-General in 1915, Lord Chancellor in 1919, and was Secretary for India from 1924 to 1928, when he left politics for a commercial career. In the field of legal reform he achieved much by his Law of Property Act, 1922, which rids our law of real property of numerous feudal archaisms. (1872—1930).

"Birkenhead," The, a British troop-ship which in 1852 struck a rock off Simon's Bay and sank. 454 officers and men were drowned. The discipline of the troops, who fell in as on parade on the deck while the ship sank, is often quoted.

Birkett, William Norman, K.C., English barrister, born at Ulverston, and educated at Harrow-in-Furness and Emmanuel College, Cambridge. President, Cambridge Union, 1910. Called to Bar, 1913. K.C., 1924; M.P. (Lib.) N. Nottingham, 1923—1924 and 1929—1931. Has been engaged as counsel in many famous cases. (b. 1883).

Birmingham, in the NW. of Warwickshire, shire, England, 112 m. NW. of London by rail; is the chief town of the Midlands, and celebrated all over the world for its metal ware, and as the "home of a thousand trades." All kinds of engines and machinery, fine gold, silver, copper, and brass ware, cutlery and ammunition are made here; steel pens, buttons, nails, and screws are specialties. It is a picturesque town, with many fine buildings, libraries, art gallery and museums, educational institutions, a cathedral, and a great town-hall. Of this town Burns-Jones was a native, and Priestley, George Dawson, and Dale were dissenting ministers, while it sent the Chamberlains to Parliament. Pop. 1,003,000. Also a city in Alabama, U.S.A., with iron industries. Pop. 260,000.

Birnam, a hill near Dunkeld, in Perthshire, Scotland; contains part of a forest mentioned in *Macbeth*.

Biron, Sir Henry Chartres, London magistrate who became standing counsel to the Post Office, then Metropolitan Magistrate (1906), and finally Chief Magistrate at Bow Street (1923-1933). A great magistrate, kindly, a firm opponent of flogging, yet effective in stamping out organised hoodlunism in parts of London. Published his *Impressions of Life and Law* in 1936. (1863-).

Birrell, Rt. Hon. Augustine, British politician and essayist. Entering Parliament as a Liberal in 1889, he served as Minister of Education in Campbell-Baunerman's Government in 1906. In 1907 he became Secretary for Ireland, a post he resigned in 1916 on account of the Dublin Easter rebellion. His *Life of Charlotte Brontë* and his *Other Dicta* are among his best known literary efforts. (1850-1933).

Birstall, a market town of Yorkshire, England, in the W. Riding, 7 m. SW. of Leeds. Cotton, woollens and worsted are made, and there are iron-foundries and coal and ironstone mines. Pop. 7,000.

Birth, the act of delivery of a newly-born child alive. A child is considered to have been born if it has been proved to have a separate existence from the mother, even if only for an instant, and as such is legally competent to inherit property and transmit it. Children are sometimes born after only 7 months from conception, but the normal period is 9 months.

Birth, Concealment of. In English law it is a misdemeanour to conceal the birth of a child by disposing of the body, if dead, whether the child died before, during, or after birth. Under the Act of 1861 the penalty is a sentence of two years' hard labour.

Birth Control, a general term for the restriction of birth by unnatural means, including the use of chemical or mechanical contraceptives or abstinence from intercourse. Considerable popular interest has been roused in the subject in recent years, particularly as a result of the publication of books on the subject by such authors as Dr. Marie Stopes, and as a result of the efforts of some unsocial workers who regard a high and uncontrolled birth rate as a drain on the health and meagre resources of the poorer classes. The practice of contraception is, however, severely frowned on by the Catholic Church, and by some elements of the Anglican Church, and the subject must be regarded as a controversial one.

Birth Rate, the rate of births in a country expressed annually per 1,000 of the population. Many causes, such as the varying degree of fertility at different ages, affect the significance of the figure, which is called "crude." From 18 to 22 fertility is highest, and at a minimum after 45. Recent years show a continuous and decline in most European countries, and bonuses to parents of families and other measures have been taken in some countries (notably Germany and Italy) to stimulate the birth rate.

Birtley, colliery town of Durham, England, 6 m. SE. of Gateshead. Here, during the War, was a projectile factory and a Belgian refugee colony. Pop. 11,000.

Biscay, Bay of, a bay in the Atlantic, extending from Cape Ortegal, in Spain, to Cape Finisterre, in France, and to 400 m. broad, of depth varying from 20 to 200 fathoms, and, under SW. winds particularly, one of the stormiest of seas.

Bisceglie, a seaport and episcopal see of Italy, on the Adriatic in the province of Bari. Pop. 33,000.

Bishop, a minister in the Christian Church who exercises superintendence over the ordinary pastors in a certain district, usually called the see or diocese, and to whom belongs the performance of ordination, consecration of persons and places, and, when the occasion arises, excommunication. The title dates from apostolic times.

Many reformed churches on the continent have discontinued the title, but the system is prominent in Eastern and Roman churches and the Church of England, where the bishops are a constituent of the House of Lords. In England a bishop is nominated by the King, and the consecration is performed by the Archbishop. He is regarded as a suffragan of the Archbishop in whose province he is, though that term is in a particular sense applied to a rank corresponding to assistant bishop or country bishop.

Bishop, Sir Henry Rowley, an English composer, born in London, composer and director of music in Covent Garden Theatre for 14 years; was for a brief space professor of Music in Edinburgh University, and eventually held a similar chair at Oxford. (1786-1855). r. ♪

Bishop, Isabella (Bird), distinguished lady traveller and authoress; visited N. America, Japan, China, Malaysia, and Korea; the first woman elected a member of the Royal Geographical Society; interested herself in medical missions abroad; wrote *Unbeaten Tracks in Japan*, *The Englishwoman in America*, etc. (1832-1904).

Bishop Auckland, a town on m. SW. of Durham, and in the county of Durham, England. It contains the Bishop's palace, or castle, which was built in Edward I.'s reign. Chief industries, coal-mining and engineering. Pop. 12,000.

Bishop's Castle, a market town of Shropshire, England. Here was once an ancient castle of the Bishops of Hereford. Pop. 1,500.

Bishop's Ring, the name given to the sky forming a halo near the sun, and caused by fine, diffused volcanic dust, which gives rise to coloured diffraction of light. First observed by the astronomer Bishop in 1883, after the eruption of Krakatoa.

Bishop's Stortford, a market town of Hertfordshire, England. In Norman times it was owned by the Bishop of London. Brewing and malting are carried on. Pop. 9,500.

Bishop's Waltham, a market town of Hampshire, England, 9 m. SE. of Winchester. Its ancient palace of the Bishops of Winchester is now in ruins. Pop. 2,500.

Biskra, an oasis town of Algeria, in the Sahara, a popular French winter resort, with a delightful climate. It was known to the Romans. Pop. 12,000.

Bisley, a village in Surrey, England, noted for the annual meeting of the National Rifle Association in the summer, when the best shots in the world compete for the King's Prize and teams from the public schools for the Ashburton Shield. Pop. 1,100.

Bismarck Archipelago, a group of islands N.E. and E. of New Guinea, numbering more than 100, and administered as part of the Mandated Territory of New Guinea (Australian Mandate). Under German flag since 1884, they were occupied by Australian forces in Sept. 1914. The chief islands are New Britain (14,600 sq. m.), New Ireland (2,800 sq. m.), Lavongai (460 sq. m.), Duke of York Is. and Admiralty Is. Chief industries coconut-growing (copra), coffee, cocoa, pearl- and shell-fisheries. Pop. 154,700.

Bismarck, Otto Eduard Leopold, Prince von, born at Schönhaußen; roused in civil life by the events of 1848; took a bold stand against revolutionary ideas and measures; conceived the idea of freeing the several States of Germany from foreign control and welding them into one under the crown of Prussia. Summoned in 1862 by King William to be his political adviser, his influence was at first distrusted, but the annexation of Schleswig-Holstein by force of arms in 1863 raised him into general favour. His next feat, the humiliation of Austria at Königgrätz in 1866, and the consequent erection of a German Confederation, with Prussia at its head, made him the idol of the nation. His treatment of Napoleon III. provoked the latter into a declaration of war, and to an advance on the part of the French against Berlin. To the surprise of nearly all Europe, the Germans proved to be a nation of soldiers, organised an invincible army, and beat the French ignominiously back from the Rhine. Count Bismarck had the satisfaction of seeing the power of France, that still threatened, as well as that of Austria, helpless at his feet. The German empire restored under a Hohenzollern king, and himself installed as chancellor of the monarchy, he had served so well. Nothing he did after this—though he reformed the coinage, codified the law, established protection, increased the army, and repressed Socialism—equalled this great feat. He ceased to be chancellor of Germany on the accession of William II., because the young king felt he would have a freer hand with a minister more likely to be under his control. (1815–1898).

Bismuth, a gray metal similar to antimony used for many alloys; its compounds are used extensively in medicine.

Bison, the name given to two species of the ox family, of which the

European branch is almost extinct. The North American Bison was once in danger of being exterminated, but remnants of herds were collected by the Canadian government, and these are now preserved and are

NORTH AMERICAN
BISON

multiplying in parts of the NW. The bison is remarkable for the development of the fore part of its body, for its heavy mane and beard.

Bissagos, a group of some 20 volcanic islands off the coast of Portuguese Guinea (W. Africa), of which they form a part. They have a large negro population and yield tropical products.

Bissextile, the name given in the Roman Calendar, at its reformation by Julius Caesar, to the intercalary day which he inserted after the 24th of February every fourth year.

Bissing, Moritz Ferdinand, Baron, Prussian general. Became Governor-General of Belgium in 1915. Signed warrant for execution of Edith Cavell, 1915. Died in Brussels. (1844–1917).

Bithur, a town in India, on the right bank of the Ganges, 12 m. above Cawnpore, where Nana Sahib lived and concocted the conspiracy which developed into the mutiny of 1857.

Bithynia, a country in the NW. of Asia Minor, anciently so called; the people of it were of Thracian origin.

Bitlis, a high-lying town in Asiatic Turkey, near Lake Van; stands in a high valley, 4,700 ft. above the sea-level; has a population of Kurdish Mohammedans and Armenians. Pop. 31,000.

Bitonto, a town and episcopal see of Italy, in the province of Bari; has a fine Romanesque cathedral. Pop. 32,000.

Bitter Lakes, two stretches of water in Egypt which form part of the Suez Canal.

Bittern (*Botaurus*), a genus of wading birds of the heron family. They are poor in flight, but active in the marshes where they are found. They are characterised by their buff-striped breasts, their habit of concealing themselves amongst the reeds by pointing neck and bill vertically upwards so that they are almost indistinguishable (in which their coloration helps them), and by their loud "booming" in the mating season. The Common Bittern (*B. stellaris*) is widely spread in Europe, Asia and Africa. It is rare in England, a few pairs only nesting in E. Anglia. It inhabits marshes, and consumes small mammalia, birds, fishes, frogs, newts and insects, chiefly at night. The Little Bittern inhabits SW. Asia, S. Europe and Africa.

BITTERN

Bitters, beverages, usually alcoholic, containing bitter flavouring substances. The bitter flavouring is usually obtained from such substances as orange-rind, gentian, rhubarb, angostura, etc. In general they stimulate the digestive processes, and some of them in virtue of this have medicinal value.

Bittersweet (*Solanum dulcamara*), a British perennial climbing plant, of the order Solanaceae, sometimes called woody nightshade. It grows in wet and shady places, especially hedges. The twigs have a medicinal value, and the taste, at first bitter, then acid, then sweet, is indicated by the name.

Bitumen, inflammable mineral substances, presumably of vegetable origin. The term properly comprises all the natural hydrocarbons, including liquid hydrocarbons (petroleum), Maltha, a viscid hydrocarbon, and the solid Asphalt. They are widely distributed in nature.

Bivalves, the name commonly applied to the Lamellibranchia, a class of aquatic (and chiefly marine) molluscs (shell-fish) which possess a shell composed of two pieces or valves. There are four orders of Lamellibranchia, and included in the class are the scallop, oyster, mussel, cockle, and shipworm. Certain species of crustacea which are anatomically quite unrelated to the molluscs also have bivalved shells—e.g., the order Conchostraca and the water-fleas (*Daphnia*) of the order Cladocera.

Bivouac, a temporary encampment of soldiers in the open without tents, usually only employed when troops are, or are about to be, engaged.

Biwa, the largest lake in the island of Honshu (Mainland), Japan.

Bizerta, a seaport and naval station of the French dependency, Tunisia, northernmost town in Africa, 38 m. NW. of the capital, with an excellent harbour. Pop. 23,000.

Bizet, Georges, an operatic composer, born at Paris; his greatest work *Carmen*; died of heart-disease shortly after its appearance. (1838–1875).

Björnson, Bjørnstjerne, Norwegian poet, novelist and playwright. Director, Bergen theatre, 1857–1859; Christiania (Oslo) theatre, 1865–1867. Travelled widely in Norway and on the continent. In politics played the rôle of radical and reformer

1, being implicated in treason charge (dor of Peasant Party), took refuge abroad, 13-1888. Was a fervent nationalist, and yed a part in the events that led to the erence of Norway from Sweden. His blished works include *Poems and Songs*; epic *Arnljot Gelline*; many plays, inding the *Sigurd* trilogy, *Mary Stuart in Mland*, *Leonarda*, *Beyond our Strength*; d numerous novels including *Synnöve Ibakken*, and *Mary*. Awarded Nobel prize literature, 1903. (1832-1910).

lack, Joseph, a physician and celebrated chemist, born at Bordeaux, of ottish parents, formulator of the theories what has been called latent heat, but what really transformed energy, and also of ecific heat; professor of Chemistry, first Glasgow, then in Edinburgh. (1728-1799).

lack, William, novelist, born in Glasgow; started life as a journalist in nnection with the *Morning Star*; wrote me 30 novels, about the West Highlands of otland, rich in picturesque description; e best known, *A Daughter of Heth*, *Madcap iole*, *Macleod of Dare*, *The Strange Advenres of a Photon*, and *A Princess of Thule*. 841-1898).

lack Acts (Scottish) are so named from being printed in black tters. They consist of the Acts of the ottish Parliament during the times of the meses. In English law an Act of 1722 ected against a band of ruffians who ackened their faces.

lack and Tan, a terrier sometimes being printed in black tters. They consist of the Acts of the ottish Parliament during the times of the meses. In English law an Act of 1722 ected against a band of ruffians who ackened their faces.

Also the popular name of a force raised in 1920 r the suppression of the I.R.A. in Ireland nd for the maintenance of order. It was rculated from ex-army men. The uniform orn was khaki, with black hat and arm-band.

lack Assize, a plague at Oxford f 300 victims; caught at the assize from the risoners under trial.

Blackberry (*Rubus fruticosus*), a common species of the ramble of the order Rosaceae. It is a hook- lamber, and is found all over Europe, especially d hedges, thickets, and woods. The fruit is opular in jam, and the shoots are used by hatcher for binding their straw and making echives.

Blackbird, a species of the thrush, a permanent resident in ritain and S. Europe. It migrates i winter from the northern regions. It feeds pon shuns, shelled snails, worms and insects, nd fruit trees, etc. White varieties are met.

Black Book of the Admiralty, The, was lost at the end of the 18th Century, but was found n 1874 at the bottom of a chest elonging to a former Registrar of the Admiralty Court, and is now kept in a locked, lass-topped table in the room of the President f that court. It contains the most ancient awe of the sea in force in this country, which vere based on the Laws of Oléron in use uring the Crusades, which were in turn based n the Sea Law of Rhodes.

Blackburn, a manufacturing town in Lancashire, England, 24 m. W. of Manchester, a centre of the cotton ndustry; the birthplace of Hargreaves, the nventor of the spinning-jenny. Pop. 123,000.

Blackburn Rovers, an Association Football Club, founded in 1874. They have won the F.A. cup 6 times and have held the championship of the League twice. The ground is Erwood Park.

Black-Cap, a migratory song bird of the family, inhabiting N. Europe, Africa, and Asia. It arrives in England in April, and leaves in September. Food is grubs and fruit; prefers to nest in woods and orchards. The male bird has a cap of deep black feathers on the head, the female of brown, the general colouring of the bird being grey.

Black Cock, one of the English names for the male bird of the common black grouse, widely spread over Central Europe and Denmark, Sweden, Norway and Russia, and highlands of Scotland. In the early autumn they moult heavily, lose their tail-feathers, and become incapable of flight. Their normal black head and neck-feathers are particularly conspicuous, and during the moulting period are replaced by temporary feathers of brown like the hens. The flesh is much esteemed.

Black Country, a mining and manufacturing district partly in S. Staffordshire, and Warwickshire, where iron smelting and manufactures are carried on. Towns include Wolverhampton, Walsall, W. Bromwich.

Black Death, a succession of fatal epidemics that devastated the world from China to Ireland in the 14th Century, believed to be the same as the Oriental plague, though attended with peculiar symptoms; the most serious was that of 1348, which, as is reckoned, stripped England alone of one-third of its inhabitants.

Blackfeet, a tribe of Algonquin Red Indians of Alberta and Montana, N. America. Originally about 90,000, they now number no more than 5,000 in the Indian Reserves.

Black Forest, a wooded mountain chain 4,000 ft. high (so called from the black pines that cover it), which runs parallel with the Rhine, and E. of it, through Württemberg and Baden, from the Swiss frontier to Karlsruhe; is remarkable for its picturesque scenery and its mineral wealth; it possesses many health resorts, as Baden-Baden and Wildbad, where are mineral springs; silver, copper, cobalt, lead, and iron are wrought in many places; the women and children of the region make articles of wood-work, such as wooden clocks, etc.

Black Friars, monks of the Dominican order; name of a district in London where they had a monastery, this having stood near the north end of the present Blackfriars Bridge over the Thames.

Black Friday, the name applied to certain Fridays of disastrous memory, e.g., Dec. 6, 1745, when the Young Pretender advanced as far as Derby; in the U.S.A., Sept. 24, 1745, when there was a big stock-exchange crash in New York; and May 11, 1866, when a popular London bank failed.

Black Hand, a society notorious for New York, composed mostly of Italians, and specialising in various forms of blackmail and extortion. The rapid spread of the society was due to their methods of intimidation, and took the form of stabbing, shooting, incendiarism, and child kidnapping. The symbol was a black hand clutching a dagger. The society was dispersed with difficulty in 1914.

Blackheath, a common 7 m. S.E. of Lewisham, London, in the borough of Lewisham, once a favourite haunt of highwaymen, now a place of holiday resort for

Londoners; scene of Wat Tyler's and Jack Cade's meetings; for long provided one of the two old golfing-courses in England.

Black Hills, a group of mountains in South Dakota and Wyoming, U.S.A., largely forested with pine and rich in minerals.

Black Hole of Calcutta, a compartment 20 ft. square, into which 146 English prisoners were crammed by the orders of Suraj-ud-Dowlah, Nawab of Bengal, on June 20, 1756; their sufferings were excruciating, and only 23 survived till morning.

Blackie, John Stuart, Scottish author, born in Glasgow; he studied German; executed a metrical translation of Goethe's *Faust*, Part I.; held the chair of Humanity in Aberdeen, and afterwards that of Greek in Edinburgh; was a zealous educational reformer; founded a Celtic Chair in Edinburgh University; translated *Æschylus* and Homer's *Iliad* in verse. (1809-1895).

Blacking, a compound of charcoal or lamp-black, sugar, oils and fat used either in the form of a thick paste or a liquid to preserve and give a high black polish to leather. The actual constituents and the proportions vary according to the brand.

Black Lands, lands in the heart of Russia, extending between the Carpathians and the Urals, constituting one-third of the soil, and consisting of a layer of black earth or vegetable mould, of from 3 to 20 ft. in thickness, and a chief source, from its fertility, of the wealth of the country.

Blacklead, or graphite, a form of nearly pure carbon obtained from plumbago, and used in the manufacture of stove-polish and lead pencils. It is found in Cumberland, Austria, Czechoslovakia, Siberia, and in Ceylon. When finely powdered it is used in polishing the coarser varieties of gunpowder to render it damp-proof. It is also used in the melting of steel and other metals which require great heat for fusion.

Black Letter, the name usually given in England to those types of the earliest printed books commonly called on the continent Gothic. Black-letter books are rare and highly prized. Gothic characters passed out of use generally after the 16th Century, though still found in Germany.

Black List, a name familiarly applied to certain printed lists of bankruptcies, liquidations by arrangement, registers of protested bills, decrees in absence, offers of composition, and other matters relating to the credit of firms and individuals, which are circulated for the guidance of men of business. They are issued only to subscribers.

Blackmail, once a legal term for rent paid in kind as a substitute for silver (white). Later a form of tribute in coin or cattle by extortion as a deterrent against Border raids from the Scots. Nowadays it means an attempt to extort money or goods on the threat of exposure.

Black Monday, Easter Monday in 1380, remarkable for the extreme darkness that prevailed, and an intense cold, under which many died.

Blackmore, Richard Doddridge, novelist, born in Berks; educated for the Bar; wrote several novels, the best known *Lorna Doone*, which, though coldly received at first, became highly popular. (1825-1900).

Blackpool, a watering-place on the coast of Lancashire, England, 18 m. NW. of Preston, sometimes called the "Brighton of the North." Has an Eiffel Tower, 500 ft. high, a 7 m. promenade and several piers. Pop. 106,000.

Black Prince, Prince of Wales, son of Edward III., so called, it is said, from the colour of his armour; distinguished himself at Crécy, gained the Battle of Poitiers, but involved his country in further hostilities with France; returned to England, broken in health, to die. (1330-1376).

Blackrock, a seaside resort and urban district, forming a S. suburb of Dublin, Eire (Ireland). Pop. 10,000.

Black Rod, Gentleman Usher of, an official of the House of Lords, whose badge of office is a black rod surmounted by a gold lion; summons the Commons to the House; is also Usher of the Order of the Garter.

Black Saturday, name given in Scotland to Saturday, Aug. 4, 1621; a stormy day of great darkness, regarded as a judgment of Heaven against Acts then passed in the Scottish Parliament tending to establish Episcopacy.

Black Scab, variously called wart, potato canker, cauliflower disease, a wart disease of potatoes causing large outgrowths resembling cauliflowers which become black. The disease must be notified to the Ministry of Agriculture. Flowers of sulphur and gas lime dug into the soil of unaffected plants act as a deterrent.

Black Sea, or Euxine, an inland sea, lying 700 m. in greatest length and 400 m. in greatest breadth; communicates in the N. with the Sea of Azov, and in the SW. through the Bosphorus, the Sea of Marmora, and the Dardanelles, with the Mediterranean. It washes the shores of Turkey, Rumania, Bulgaria and Russia, receives the waters of the Danube, Dnieper, Bug, Dniester and Don, from Europe, and the Kizil-Irmak and Sakaria from Asia.

It has but one island, Adassi, off the mouths of the Danube; no reefs or shoals; hence in summer navigation is very safe. In winter it is harassed by severe storms. Among the chief ports are Odessa, Kherson, Batum, Trebizond, and Sinope; the first two are ice-bound in January and February.

For three centuries the Turks excluded all other nations from its waters; but the Prussians (1774), Austrians (1784), French, and English (1802) secured trading rights. Its waters are fresher than those of the ocean, and it has no noticeable tides. Under the Treaty of Paris, 1856, the sea was closed to all warships. In 1871 this was modified so as to allow both Turkish and Russian fleets in it. In the Great War, Turkey was compelled, under the Mudros Armistice, to admit Allied Fleets. Under the Lausanne Treaty, 1923, the Dardanelles were demilitarised, but at a convention at Montreux this policy was reversed at the request of the Turkish Government.

Blacksod Bay, a stretch of water, N. of the Achill Is, in Co. Mayo, Ireland (Eire).

Blackstone, Sir William, an eminent London, the son of a silk-mercator, was Fellow of Pembroke College, Oxford, and in 1746 called to the Bar; became first Vinerian professor of Law at Oxford; had Jeremy Bentham for one of his pupils; author of the well-known *Commentaries on the Laws of England*, a legal classic. (1723-1780).

Lackthorn, or *Stoe* (*Prunus spinosa*), a common shrub of the roseaceae order (genus *Prunus*). It is common in hedgerows and thickets in England, Europe, W. Asia, and N. Africa. The fruit is small, purple, and very bitter-taste. The stems are black and bear sharp spines.

BLACKTHORN

Blackwall, a riverside district of London, England, in the metropolitan borough of Croydon. Here are the East India Docks and the Thames Tunnel Works. Blackwall Tunnel under the Thames connects it with E. Greenwich.

Black Watch, a Highland regiment, late the 42nd and 3rd of the line, so called from the dark colour of the tartan; the 42nd raised originally for the preservation of the peace in the Highlands.

Blackwater, several rivers of the British Isles. One, the second longest of Ireland (100 m.), flows to the Atlantic at Youghal; another, rising near Saffron Walden, Essex, flows 40 m. to the sea at Marsea I.

Blackwater Fever, a disease, similar to and closely associated with (in fact, described as a complication of) malaria, prevalent in tropical countries. It is an affliction of Europeans chiefly, its chief symptom being hemoglobinuria. The nature of the disease is obscure, and has been supposed to be due to excessive use of quinine to combat malaria, though the cause is more probably a virus associated with the malarial parasite.

Blackwell, Elizabeth, a lady doctor, first to hold a medical diploma in the United States; was admitted into the Maternity Hospital in Paris, and to St. Bartholomew's in London, and distinguished herself as a social reformer. The first woman to be admitted to the register of the General Medical Council. (1821-1910).

Blackwood, Sir Henry, British admiral, distinguished at Aboukir Bay and Trafalgar, was present at Nelson's death; held subsequently high naval positions. (1770-1832).

Blackwood, William, born in Edinburgh, burgh, originator of *Blackwood's Magazine*; began as a bookseller; started *Maga*, as it was called, in 1817, his principal literary advisers being Professor Wilson and Lockhart; conducted it as editor till his death. (1776-1834). John, his third son, his successor, no less distinguished in the cause of literature; publisher of Lord Lytton's and George Eliot's books. (1818-1879).

Bladder, a musculo-membranous bag or reservoir for the urine. It communicates with the kidneys by means of the ureters, and opens externally by means of the urethra. It is in the pelvis.

Bladderwort (*Utricularia vulgaris*), a small submerged water plant which has no roots and finely-divided leaves growing from the surface. The submerged leaves bear curious bladders which open inwards only and which serve to trap the small crustaceans, etc., from which the plant derives its nourishment. Yellow flowers are borne on stems which rise out of the water 4 to 6 in.

Blaenavon, a market town of Monmouthshire, England, with collieries, iron and steel works, and blast-furnaces. Pop. 11,000.

Blagovyeshehensk, a town of Asiatic Russia on the Amur R. near the Manchuria (Manchukuo) border, a centre of trade in gold, tea, cattle, and grain. Pop. 63,000.

Blaine, James Gillespie, American statesman, born in Pennsylvania, elected as a Republican to the State Legislature of Maine, 1858; entered Congress, 1862; Speaker of the House of Representatives, 1869-1874. Secretary of State under Garfield; ran for the Presidency as a Republican in 1884, but was defeated by Grover Cleveland. (1830-1893).

Blair, Robert, author of *The Grave*, born in Edinburgh, minister of Athelstaneford. His poem was illustrated by William Blake. (1699-1746).

Blair Atholl, a village of Perthshire, Scotland, 3 m. N.W. of Killiecrankie Pass. Near is Blair Castle, ancient seat of the Duke of Atholl. Pop. 1,500.

Blairgowrie, a town and summer resort of Perthshire, Scotland, 20 m. N.E. of Perth, on the Erich. Flax-spinning and engineering are carried on; there are salmon and trout fisheries, and fruit, mainly raspberries, is grown. Pop. 3,000.

Blake, Robert, the great English admiral and "Sea King," born at Bridgewater; successful as a

ADMIRAL
ROBERT BLAKE

soldier under the Commonwealth, before he tried seamanship; took first to sea in pursuit of Prince Rupert and the royalist fleet, which he destroyed; beat the Dutch under Van Tromp, De Ruyter, and De Witt; sailed under the great guns of Tunis into the harbour, where he fired a fleet of Turkish pirates; and finally his greatest feat, annihilated a Spanish fleet in Santa Cruz Bay under the shadow of the Peak of Teneriffe, "one of the fiercest actions ever fought on land or water." (1699-1657).

Blake, William, poet, painter, and engraver, born in London, where, with rare intervals, he spent his life, a mystic from his very boyhood; apprenticed to an engraver, whom he assisted with his drawings; started on original lines of his own as illustrator of books and a painter; devoted his leisure to poetry; wrote *Songs of Innocence*, *Marriage of Heaven and Hell*, *Gates of Paradise*, and *Songs of Experience*; was an intensely religious man of deep spiritual insight, most vivid feeling and imagination; illustrated, among many notable works, Young's *Night Thoughts*, Blair's *The Grave*, and *The Book of Job*. He was a man of stainless character but eccentric habits, and had for wife Catherine Boucher, who under his tuition assisted him in his art work. (1757-1827).

Blakeney, William, Baron, British soldier, born in Ireland; as Lieutenant-Governor defended Minorca against the French during the Seven Years War. Owing to Admiral Byng's failure to relieve him (for which Byng was executed), he was compelled to surrender the fortress after a gallant defence. (1672-1761).

Blanc, Mont, the highest mountain in the Alps, 15,780 ft., almost entirely within France; sends numerous glaciers down its slopes; was first ascended in 1786 by Paccard and Balmat.

Blandford, or Blandford Forum, a municipal borough of N.E. Dorset, England. Roman and British remains are found in the neighbourhood. Pop. 3,000.

Blanesburgh, Sir Robert Younger, Baron, fifth son of James Younger of Alloa, (Clackmannan. Judge of the Chancery Division, 1914-1919; Lord-Justice of Appeal, 1919-1923; Principal British delegate to Reparations Commission, 1925-1931. P.C., 1919. Lord of Appeal in Ordinary and life-peer, 1923. (1861-1937).

Blankenberghe, a Belgian seaside resort in W. Flanders, 13 m. N.E. of Ostend. Fishing and ship-building are carried on. It was occupied by the Germans, 1914-1918. Pop. 7,000.

Blanket, at one time an undyed woollen cloth, but to-day a large sheet chiefly of woollen material used as a covering. The best blankets are of pure wool, but generally they are manufactured from cotton warp and woollen weft, the surface of the material being "teased" to give it a fluffy appearance.

Blanketeers, a name given to a body of cotton-mill workers who, in 1817, attempted to march to London from St. Peter's Field, Manchester, to seek redress of wrong treatment. The leaders were imprisoned. Each person carried a blanket, hence the name.

Blank Verse, verse without rhyme or syllables, used by the Greek and Roman poets. The first English blank verse appeared in 1547 in a translation of the first and fourth books of the *Aeneid* by Lord Surrey. When Shakespeare began to write for the stage, blank verse had become familiar, though it was confined to dramatic literature for most of the 17th Century. It reached its highest form, perhaps, in Milton's *Paradise Lost*. The most successful form, and the commonest in the English language, is iambic pentameter, consisting of a line of 10 syllables (5 iambs).

Blanqui, Louis Auguste, a French republican, said to be the first advocate of the dictatorship of the proletariat. A leader of the socialist movement of his time and, for a few hours in 1870 after the French defeat at Sedan, head of the provisional Government. Spent nearly half of his life in gaol. (1805-1881).

Blantyre, the chief town of Nyasaland in direct railway communication with Beira. Pop. (white) 600. Also the name of a parish of Lanarkshire, Scotland, a coal-mining centre. Birthplace of David Livingstone. Pop. 17,000.

Blarney, a village of Co. Cork, Ireland (Eire), 4 m. N.W. of Cork. It possesses an ancient castle, about 20 ft. from the summit of which is the famed Blarney stone, the kissing of which is said to confer the gift of persuasive eloquence. Pop. 800.

Blasphemy, a mode of speech which, was made to a person's face in a reproachful and insulting manner. To-day it takes the form of profane scoffing at the Scriptures. Writings or utterances maliciously designed to outrage the feelings of the Christian religion are "blasphemous libels," and are offences against the common law, though the law is seldom invoked.

Blatchford, Robert, author and journalist, founder of *The Clarion*, socialist weekly, 1891. His socialism, atheism, and determinism in *Merry England, God and My Neighbour*, and *Not Guilty* brought him fame. (1851-).

Blavatsky, Mme. Helena Petrovna, born in Russia; a great authority on theosophy, the doctrines of which she professed to derive from the fountain-head in Tibet. Founded the Theoso-

phical Society in 1875 in New York. Her publications include *Isis Unveiled*. (1831-1891).

Blaydon, a market town of Durham, England, at the head of navigation of the Tyne, here spanned by a bridge. There are collieries and iron-foundries. Bottles, fire-bricks, chemicals, etc., are made. Pop. 33,000.

Blazon and Blazonry, the art of announcing and describing the coats of arms worn by Knights. The "blazoning forth" was performed by a herald during the introduction of a contestant usually for honours of combat in tournaments during the "romantic" age of chivalry. The arms were borne on a heraldic shield, and the proper rules and terms of heraldry were observed by the announcer; only those who were educated in blazonry could understand the various terms. The field of the coat of arms was called first, then the tinctures, which varied in colour and area, and then the charges or symbols in each division or quarter (rule).

Bleaching, the removal of colour from an object, but sometimes implying in addition the removal of certain impurities. Bleaching has been effected by the use of sunlight from time immemorial, and the nations of antiquity also employed various chemicals such as plant ashes, soap, and sulphur dioxide. Chlorine, bleaching-powder (which contains calcium hypochlorite as the active ingredient), and sodium hypochlorite are the principal substances used now in bleaching, though for delicate fabrics sulphur dioxide and hydrogen peroxide are preferred.

Bleaching-powder, a whitish powder made by passing a stream of chlorine over dry, slaked lime; its chemical constitution is roughly represented by the formula CaOCl_2 , but it contains also varying amounts of lime; commonly it is known as "chloride of lime." Its principal use is in bleaching, but it finds application as a disinfectant and deodoriser (e.g., for drains and swimming-baths). It should be preserved in air-tight containers, since on exposure to air it gradually loses much of its chlorine content. On treatment with a dilute acid it yields gaseous chlorine.

Bleak, a small, fresh-water fish of the (Cyprinidae) family found in British as in other European rivers. Its silvery scales are used in France for the manufacture of artificial pearls.

Bleeding, a surgical remedy greatly in use for many centuries, but now obsolete except in certain cases of heart and lung disease when venous blood is taken from the arm. In olden times "cupping," or removal of blood by placing a heated cup over a puncture in the skin, was extensively used, as was bleeding with leeches.

Blekinge, a small maritime province in the S. of Sweden, formerly a part of Denmark. Chief town Carlskrona. Area 1,173 sq. m. Pop. 146,000.

Blende, the name given to zinc sulphide, an important ore of zinc. Also called "Black Jack" by English miners. Found in Derbyshire, Cumberland, Cornwall. There is also manganese and antimony blende, etc.

Blenheim, a village in Bavaria, on the Danube a few miles from Höchstädt, famous for Marlborough's victory over the French and Bavarians in 1704, and giving name to the battle.

Blenheim Park, near Woodstock, (Oxfordshire), the gift, with the Woodstock estate, of the country to the Duke of Marlborough, for his military services in the Spanish Succession War; it was designed by Vanbrugh.

Blenny, the name given in general to any of the blennoid fishes in all of which the pelvic fin is jugular—i.e., placed far forward in front of the pectoral fins. The skin is usually scaleless. The type includes the shanny in British seas, the great wolf fish in N. seas, etc. The family Blenniidae includes the blennies and rock-skipper, most of which are small shore-dwelling fish. The viviparous blenny or Eel Pout (*Zoarces viviparus*) of the Zoarcidae family is common round the shores of the British Isles.

BLENNY

Blériot, Louis, French aviator and owner of plane factory. He was the first man to fly an aeroplane over the English Channel, which he did in 1909. (1872-1936).

Blessington, Marguerite, Countess of, for her beauty and wit; figured much in intellectual circles in London; had her salon at Kensington; was on intimate terms with Byron, and published *Conversations with Byron*, and several novels; being extravagant, fell into debt, and had to flee the country. (1789-1849).

Bletchley, a village of Buckinghamshire, England, in the urban district of Fenny Stratford. It has a fine old church. Pop. 6,000.

Blickling, a village of Norfolk, England, on the Bure. Here is Blickling Hall, now the residence of the Marquess of Lothian, formerly the manor of the Boleyn family. Anne Boleyn is said to have married Henry VIII. here. Pop. 300.

Blida, a walled town of Algeria, 32 m. from Algiers, with considerable orange groves. Pop. 39,000.

Bligh, William, a naval officer; served the *Bounty* at Tahiti, when his crew mutinied under his harsh treatment and set him adrift, with 18 others, in an open boat, in which, after incredible privations on a 4,000-m. voyage, he reached Timor; was afterwards Governor of New South Wales, but was imprisoned after a mutiny caused by his severity. He was also present at the mutiny of the *Nore*, and fought in the battles of Camperdown and Copenhagen. (1754-1817).

CAPTAIN BLIGH

Blind (*Blindness*), those who have lost the sense of sight. Most blindness results from disease, accident, senility, or is congenital. The chief inducing diseases are amaurosis or paralysis of the optic nerve, cataract, purulent ophthalmia, scarlet fever, scrofula, smallpox, and measles. Hereditary blindness is infrequent, and many cases of persons thought to be born blind have proved to be erroneously diagnosed.

Instruction of blind persons began with Valentin Haüy of Paris in 1784. He had noticed the remarkable delicacy of touch in blind persons, and introduced raised printing, raised geographical maps, etc. This reading of raised characters has developed to-day in the triumph of the Braille and the Moon methods. In the Braille method symbols can be read and written. The basis of the system is six dots, and the same system is applied to music. The Moon system is based upon a simple line, the characters following the outline of ordinary Roman lettering. It is used with advantage by the old and mentally backward patients. The method, however, is slow to learn, and the books are bulky.

There are many associations for the blind,

including the National Institute for the Blind, which maintains home and hostels, massage schools, a college for blind girls, a special school for blind children, Braille and Moon publications, an employment bureau and technical research; the Blind Sailors and Soldiers' Hostel at St. Dunstan's, inaugurated by Sir Arthur Pearson; the Incorporated Association for Promoting the Welfare of the Blind, the National League of the Blind in Westminster, possessing many thousands of volumes in Braille and Moon type. In 1936 the state pension to the blind at the age of 50 was made payable at the age of 40, and under the Blind Persons Act of 1920 domiciliary assistance is rendered to blind incapable persons as distinct from public assistance. The number of registered blind persons in England and Wales in 1936 was over 75,000.

Blind Spot, that part of the retina the spot where the optic nerve enters the eye is blind.

Blind-worm. See *Slow-worm*.

Bliss, Arthur, composer. Educated: Rugby, Pembroke College, Cambridge. B.A. and Mus. Bac. 1913. Composed *Madam Noë*, 1918; *Idiot*, 1920; *Méléc Fantastique*, 1920; music to *The Tempest*, 1921; *Colour Symphony*, 1922, *Introduction, Allegro for Orchestra*, 1926; *Morning Hours*, 1930; film music to *Whither Mankind*, 1934; *Music for Strings*, 1935; songs, symphonies, etc. (1891-).

Blister, a bladder or vesicle containing an exuded serous fluid, raised upon the skin through some irritation; also the application given when blistering is caused artificially as a counter-irritant in pneumonia and other disorders, such as inflammation of the stomach. The substance usually employed is cantharides. Mustard is sometimes used. In modern warfare mustard gas has a similar, though more horrible result.

Bloch, Jan (Ivan Stanislavovich), Judeo-Polish banker and opponent of war. Educated at Industrial High School of Warsaw. Administrator of the railway system connecting Black Sea with Baltic, head of lumber and sugar trades in Poland. In 1898 published *La Guerre* in 6 volumes, which led Nicholas II., to propose the Hague Peace Conference. (1836-1902).

Blockade, Laws of, those laws which of a blockade, i.e., a military or naval operation whereby a fort or port is enclosed against the arrival of supplies or assistance—briefly, a kind of siege. Latterly the manœuvre is always naval.

A blockade was defined by the Declaration of Paris in 1856 to be in force only when it was effective by the maintenance of a sufficient force, and all countries were to be included impartially. The Hague Conference of 1909 extended the definition and terms, and the Declaration of London in the same year stated that neutral countries have the right to trade with a blockaded town in non-contraband goods (armaments and munitions), but "absolute contraband" goods were liable to seizure by the blockading navy. During the Great War the blockade of Germany was rendered ineffective because she was able to obtain supplies from Scandinavia and Denmark, and in 1916 neutral countries were informed that the Declaration of London was withdrawn, and that the terms would be disregarded in the economic war to be pursued. Protests were made by America at the decision that no neutral ships would be permitted to enter an enemy port, whether carrying goods contraband or otherwise.

An important condition included by the Declaration of London was that a blockade must not extend beyond ports or coasts

belonging to or occupied by the enemy, as well as the condition that goods intended for the enemy might be unloaded in neutral ports and carried by rail to the enemy. In order to overcome the leakage of supplies, the Ministry of Blockade, set up in London in 1916 (and dissolved in 1919), limited imports of neutral countries to pre-war extent. The result was an attempt by Germany to interrupt Great Britain's own merchant shipping, and several successful attempts were made to "run the blockade." Among others, the German ships *Morue* and *Wolf* escaped, and caused not a little hindrance. Later the submarines *Deutschland* and *U.53* made a spectacular and successful dash through the blockading ships.

Many British ships were sunk, but, as many American passengers were killed, the final consequence was the intervention of the U.S.A. in the war and the ultimate defeat of the Central Powers. During the Spanish Civil War in 1936 the question of Blockade Law was raised when a German merchant ship with goods alleged to be intended for the rebels was stopped and searched by Spanish Government vessels outside the territorial sea limit. But as no state of war existed between Germany and Spain, blockade conditions did not exist.

Block Books, books printed in early days by the use of engraved wooden blocks. The practice was known in China five centuries before its use in Europe in the 15th Century, when block books were produced in Germany and the Netherlands. The pages consisted generally of half illustration, half text.

Block-House, a military building constituting a miniature fort and pierced with loopholes to facilitate defensive rifle fire. Many were built of wood in America in early settler days. Brick block-houses are used to-day on the borders of Afghanistan.

Bloemært, a family of Flemish painters and engravers in 16th and 17th Centuries.

Bloemfontein, capital of the Orange Free State on the R. Modder, founded in 1846. The town has a cathedral, museum, library and theatre, and is the seat of the Supreme Court of the Union. Lord Roberts captured it from the Boers in 1900. Pop. 65,000 (Europeans 30,000).

Blois, capital of the dept. of Loir-et-S. of Orleans; contains the Château of the family of Orleans, once a favourite residence of Francis I. and Charles IX.; the scene of events of interest in the history of France. Pop. 24,000.

Blok, Alexander Alexandrovich, Russian poet, born in St. Petersburg, son of a professor of Mathematics at Warsaw. First book of poems, *Songs of the Beautiful Lady*, he afterwards condemned. He took to drink, and wrote *Nocturnal Hours*, 1911. Became patriotic in Great War; but the Bolshevik Revolution inspired him with his remarkable short poem *The Twelve*, 1918. (1880-1921).

Blomfield, Sir Arthur William, architect, fourth son of J. Blomfield, was born in Fulham Palace. Articled to Philip Charles Hardwick. President, Architectural Association; Architect to Bank of England. Built Law-Courts branch of Bank of England. Built and restored churches; notably rebuilt nave and south transept, St. Saviour's, Southwark, 1890-1897. (1829-1899).

Blomfield, Sir Reginald Theodore, British architect. He specialised in garden design and civil architecture. Elected A.R.A. in 1905, he was made R.A. in 1914. Knighted 1919. (1856-).

Blondel, a troubadour of the 12th Century; a favourite of Richard Cœur de Lion, who, it is said, discovered the place of Richard's imprisonment in Austria by singing the first part of a love-song which Richard and he had composed together.

Blondin, Charles, an acrobat and rope-dancer, born at St. Omer, France; celebrated for his feats in crossing Niagara Falls on the tight-rope and taking a woman over in a wheelbarrow. (1824-1897).

Blood, a connective tissue in animals, differing from most connective tissues in possessing a fluid basis. This fluid is called the plasma and is yellowish in colour; it contains a large number of red corpuscles or erythrocytes, a smaller number of white corpuscles or leucocytes, and a variable number of small platelets or thrombocytes.

The red corpuscles, of which there are approximately 500 times as many as of the white corpuscles, are biconcave discs without nuclei in mammals; in other vertebrates they are biconvex and nucleate. They characteristically group themselves together in rouleaux, and owe their colour to the red colouring-matter haemoglobin; their principal function is to transport oxygen from the lungs to all parts of the body. A cubic millimetre of human blood normally contains about four to five million red corpuscles, the life of each of which is probably a few weeks, after which disintegration occurs and the remains of the corpuscles collect in the spleen.

The leucocytes are of at least five different types, the most numerous and important being the phagocytes, which destroy bacteria and similar foreign bodies by engulfing them. The plasma, which is alkaline in reaction and contains dissolved substances such as proteins, salts and hormones, deposits fine interlacing strands of fibrin when the blood is withdrawn from the body. In the meshes of this network the corpuscles become entangled, and a clot is formed, further loss of blood thus being prevented or hindered.

An adult man contains about a gallon of blood, and may lose as much as a pint without more inconvenience than a feeling of faintness. That the blood undergoes a regular circulation in the body, from the heart to the lungs, thence to all parts of the body, and finally back to the heart, was discovered by William Harvey (1578-1657) and announced by him in 1628 in his *Exercitatio de motu cordis et sanguinis*.

Blood, Thomas, Colonel, an Irish desperado, noted for his daring attempts against the life of the Duke of Ormonde, and for carrying off the regalia in the Tower; unaccountably pardoned by Charles II., and received afterwards into royal favour with a pension of £500 per annum. d. 1680.

Blood, Avenger of, an early custom in male relative of a murdered man took up the duty of vengeance. In the Mosiac law the custom was permitted under conditions and survives in some Eastern tribes.

Bloodhound, of a hound celebrated for its keen scent and perseverance. A true bloodhound is muscular, compact, and powerful. The muzzle is long and deep, with pendulous lips and ears. The colour is a reddish tan. Once kept for detection of deer and sheep-stealers, and later employed as a man-hunter, especially in slave countries like N. America in the 18th Century. The police sometimes employ them to follow a scent given by clothing, etc. The voice of the bloodhound is deep and mellow, and can be heard at a long distance.

HEAD OF A
BLOODHOUND

Blood Pressure, the force with which the blood is driven along the arteries by the pumping of the heart. Normal blood pressure varies according to the age of the subject and is reckoned at 100° plus a half the age. In certain conditions of the body such as anemia and heart failure blood pressure may be lower than normal; in others it may rise above normal. Blood pressure recordings may be of great value in effecting a correct diagnosis.

The instrument used to-day is the sphygmomanometer which consists of a bag into which air may be pumped. The bag is strapped round the arm above the elbow and inflated until the pulse in the wrist becomes imperceptible. The pressure of the air in the bag is registered on a gauge.

Blood Root, (*Sanguinaria canadensis*), a plant of the Papaveraceae (poppy) family. Has narcotic, emetic, and purgative properties, and is found in N. America.

Bloodstone, a variety of crystalline with red spots, also known as hellotrope, found in large quantities in the Deccan, India.

Blood Transfusion, the transfusion of blood from one living subject to another, practised upon animals since the 17th Century, but first applied to human beings in the 18th Century. Fatal results often occurred in early days, largely because—as was discovered by Jansky in 1907—there are four types of human blood, and incompatibility is likely to manifest itself unless the blood of the donor is of the same type as that of the recipient; one type, however, is of more general application and may as a rule be used safely with any of the other three.

Transfusion is sometimes affected directly, by connecting an artery of the donor with a vein of the recipient, and sometimes indirectly, by drawing off blood from the donor, preventing it from clotting by adding sodium citrate, and then pumping it into the appropriate vein. Transfusion is employed in cases of anemia, hæmophilia, hæmorrhage, and shock.

Bloody Assizes, the judicial massacres and cruel injustices perpetrated by Judge Jeffreys during circuit in 1685.

Bloomers, a costume for women devised by an American, Mrs. Bloomer, and consisting of a short skirt and bodice, with loosely made trousers; although of short popularity it led to the adoption of a national feminine dress for cycling and other sports.

Bloomfield, Robert, an English poet, shoemaker; born in Suffolk, by trade a shoemaker; author of the *Farmer's Boy*, a highly popular production, translated into French and Italian; spent his last days in ill-health, struggling with poverty, which brought on dejection of mind. (1766-1823).

Bloomsbury, a district, chiefly residential, of west-central London, between Euston Road, Tottenham Court Road, Holborn and Gray's Inn Road. Here are the British Museum, University College, University College Hospital and the new central institution or administrative establishment of London University.

Blow, John, composer, was one of the children of the Chapel Royal when re-established, 1660. Organist, Westminster Abbey, 1669; of Chapel Royal also, 1676. Resigned Westminster Abbey in favour of Purcell, 1680. Master of Choristers of St. Paul's 1687-1693. At his Hampton residence composed celebrated anthem *I was glad when they said unto me, for opening of St. Paul's* 1697. (1648-1703).

Blow Fly. See under *Blue Bottle*

Blowpipe, a contrivance by which a current of air is driven through a flame, and the flame directed upon some fusible substance to fuse or vitrify it.

Bloxwich, an ecclesiastical district and village of Staffordshire, England, 3 m. NW. of Walsall. Coal and ironstone is worked in the neighbourhood. Pop. 9,000.

Blubber, the name of the fat found under the skin of the whale, and at one time the chief source of profit in whaling. It is melted into oil.

Blücher, Gebhard Leberecht von, Prussian field-marshal, familiarly named "Marshal Forwards," born at Rostock; served first in the Swedish army, then in the Prussian; distinguished as a leader of cavalry, and met with varying fortune; at the age of 70 commanded the centre of the Allied army in 1813; distinguished himself at Lützen and Leipzig; pursued the French across the Rhine; pressed forward to Paris at the time of Napoleon's abdication; defeated by Napoleon at Ligny, June 16, 1815; arrived on the field of Waterloo just as the French were preparing to make their last charge, and contributed to decide the fate of the day. (1742-1819).

Blue, one of the highest honours in sport, awarded at Oxford and Cambridge to those who play against the other University. Blues for rowing, cricket, and both codes of football are the most highly prized. Oxford is a dark blue, and Cambridge a light.

Blue (colour), as used by artists is made from native and artificial ultramarine, cobalt, indigo, and Prussian blue. True ultramarine is obtained from lapis-lazuli, a mineral, and with cobalt blue is permanent. Mixtures of cobalt blue with other bases give Saxon blue, royal blue, cerulean blue and azure blue.

Bluebell, the English name of a common hyacinth (*Scilla festalis*). The term also includes in Scotland the *Campanula rotundifolia*, or harebell, while in some parts of the U.S.A. it refers to a variety of valerian.

Blue-Bird (*Sialia sialis*), migratory bird of N. America, its return heralding spring. It equals the robin in its familiarity with man, and stands as high in the United States in the popular affection.

Blue-Books, Parliamentary documents bound in blue paper, as the corresponding documents in France are in yellow; they have been published regularly since the beginning of the 18th Century, those of a single session now forming a collection of some 60 folio volumes.

Blue Bottle, the name of a wild flower common in corn fields (the cornflower, *Centaurea cyanus*); the blue bottle fly is closely related to the common house-fly. It is common in England and in Europe. It lays its eggs in meat.

Blue Boy, The Thomas Gainsborough's (g.r.) famous portrait of Master Buttall, painted in 1770.

Blue-Coat School, a name given to Hospital, West Horsham, founded by Edward VI., from the blue coats worn by the boys.

Blue Ensign, a blue flag of the Royal Naval Reserve, in the upper left quarter of which is the Union Jack.

Blue Fish (*Pomatomus saltatrix*), a ferocious and voracious fish found on the Atlantic coast of the United States. They feed on other fishes, often scarcely inferior in size, hunt in large schools, and destroy untold quantities of fish.

Blue-Gown, in Scotland a beggar, a bedesman of the King, who wore a blue gown, the gift of the king, and had his licence to beg; abolished in 1663.

Blue Mountains, a range of thickly wooded mountains traversing Jamaica from E. to W., from 5,000 to 7,000 ft. in height; also a chain of mountains in New South Wales of two parallel ranges, with a deep chasm between, and full of gloomy ravines and beetling precipices, the highest 4,100 ft.

Blue-Peter, a flag with a blue ground and a white square in the centre, hoisted as a signal that the ship is about to sail, a recalling signal to the crew.

Blue Sharks, or *Requiem Sharks*, a genus of sharks found in temperate and tropical seas. Some grow to a large size, and can be dangerous, though the species (*Carcharias glaucus*), which occurs not infrequently in British seas, is smaller and is not regarded as dangerous. It is destructive to fishing and fishing-nets.

Blue-Stocking, a female pedant or *femme savante*, a name which originated from the literary circles established in London about 1750 by a Mrs. Elizabeth Montagu at which a Mr. Benjamin Stillingfleet wore blue worsted stockings, but said to be ultimately derived from a learned coterie, formed in the 15th Century at Venice, who wore blue stockings as a badge.

Blue-Throat, a bird of the Turdidae (Thrush) family, with a tawny breast marked with a sky-blue crescent, inhabiting N. Europe and Asia. It is a bird of passage, and is taken in France for the table. It is found only as an occasional visitor in England.

Blum, Léon, French statesman, born in Paris, of Alsatian-Jewish parents. Studied law; entered Conseil d'Etat, 1895. Joined Socialists, 1899. Dramatic critic, *Comœdia* and *Le Matin*, 1905-1914. Deputy for Seine, 1919. Real power behind Herriot ministry, 1924-1925. Brutally assaulted in Paris, February, 1936. After May elections, became prime minister; various leagues of violence were disbanded, and many reforms carried. Resigned, 1937. Again became Prime Minister in 1938 but his ministry lasted only a few weeks. (1872-).

Blundellsands, an ecclesiastical district and holiday resort of Lancashire, England, 6 m. NW. of Liverpool on the estuary of the Mersey. Pop. 4,000.

Blundell's School, a public school in Tiverton, Devonshire, made famous in Blackmore's novel *Lorna Doone*. It was founded by Peter Blundell in 1604.

Blunden, Edmund Charles, poet and prose-writer. Served in Great War with Royal Sussex Regiment (M.C.). Hawthornden prize, 1922. Professor of English Literature, Tokyo University, 1924-1927. Chief work, *Undertones of War*, 1928. (1896-).

Blunderbuss, an obsolete firearm, short and with a wide muzzle. It fires a number of balls. The name is of Dutch origin, but meaning a gun and donder, thunder.

Blunt, Wilfrid Scawen, English poet and traveller; born at Petworth; in diplomatic service for some years; championed cause of Arabi Pasha in 1882; author amongst other works of *The Future of Islam*. (1840-1922).

BLUE PETER

Blyth, a seaport and watering-place of Northumberland, England, at the mouth of the R. Blyth. It exports coal. Ship-building, fishing, and the making of rope, cables, and sails are its main industries. Pop. 32,000.

Boa, the name given in particular to a genus of constricting, non-venomous serpents found in tropical America; included with pythons and anacondas (*q.v.*) in the family Boidae. The Boa Constrictor is one of the commonest and grows to a length of 10 ft.

Boabdil or **Abu-Abdallah**, surnamed "The Unfortunate," the last Moorish King of Granada, from 1482 to 1492; expelled from his throne by Ferdinand of Castile and Aragon.

Boadicea (**Boudicca**), a British heroine, Queen of the Iceni, who occupied Norfolk and Suffolk; routed by indignity done to her and her people by the Romans, gathered round her an army, who, with a murderous onslaught, attacked their settlements and destroyed them; but being attacked and defeated in turn by Suetonius Paulinus, the Roman governor, she, in her despair, put an end to her life by poison, A.D. 62. Cowper made her the theme of one of his poems.

Boanerges (i.e., Sons of Thunder), the name applied by Christ to James and John sons of Zebedee for the vehemence of their zeal. See Mark iii.

Boar, the adult male of the pig (*Sus scrofa*). The wild boar is larger than the domestic pig (*Sus scrofa domestica*), and is a fierce animal, having long tusks, and a stiff, bristly mane. The wild pigs feed on roots and fruit; they do damage, pushing up the earth in fields. They are hunted for this reason, and for sport and food. They are found in Central and S. Europe. Other species are found in Central and W. Asia, and N. Africa.

Board of Trade, The, embracing of Overseas Trade and the Mines Department, looks after national trade affairs, including the mercantile marine, marine survey, the coastguards, bankruptcy, joint-stock companies, weights and measures, patents, trade marks and copyright, the cinema industry, mines and quarries, etc. The President is a member of the Cabinet with a salary of £5,000 a year. The Parliamentary Secretary receives £1,500 a year, the Secretary for Mines £1,500 a year, for Overseas Trade £2,000 a year. Nominally it is the Committee of the Council of Trade, supervised by a President and instituted in 1786.

Boar's Hill, a residential district and village of Berkshire, England, 4 m. N. of Abingdon. Near, on the top of Boar's Hill (550 ft.), is Ripon Hall, a church of England college for candidates for Holy Orders.

Boat, a small open vessel usually propelled by oars or by sail, though engines are a common mechanical aid to propulsion to-day even in the smallest. The origin of the boat is in the dug-out canoe and in a raft composed of logs of wood fastened together; both exist in primitive parts of the world to this day. In the process of evolution in different countries many types have been produced and bear distinctive names. Boats built with overlapping planks are termed clinker-built. Those with the planks laid flush on the sides carvel-built.

The front of a boat is called the bow, the back the stern, the bottom edge is the keel and the top running along the sides of the boat is the gunwale (pronounced "gun'le"). A small rowing boat or dinghy is from 8 ft. to 15 ft. long. A pram-dinghy is one built with a square bow. In the Royal Navy every ship possesses boats propelled by oars, *e.g.*, the gig and cutter. A lifeboat is a specially constructed vessel fitted with buoyant tanks which it is almost impossible to sink.

BLUNDERBUSS

Boatbill, a species of heron with a broad boat-shaped bill, of nocturnal habits, found in Brazil.

Boatfly, an aquatic insect of the family Notonectidae. It is able to take in a supply of air when diving. The commonest species (*Notonecta glauca*) found in Great Britain is the water-busman.

Boat Race, the annual rowing match on the Thames in March or April between Oxford and Cambridge Universities from Putney to Mortlake. The first race was rowed in 1829 at Henley, and it became an annual fixture in 1856.

Boatswain (pronounced "bo's'n"), a warrant officer in the Royal Navy whose duty is to summon the crew. For this purpose he uses a pipe or whistle. He is also charged with looking after the anchors, rigging, cables, etc.

Boaz, a wealthy landowner in Bethlehem, the benefactor, and then the husband of Ruth; he was an ancestor of David and so of Christ. (See Ruth ii and iv; Matthew i and Luke iii).

Boaz and Jachin, the names of the two pillars of brass at the entrance of Solomon's Temple.

Bobolink, one of the finest song-birds of N. America, of the order Icteridae. Is in appearance something like the starling. Its middle toe, however, is longer and its tail more pointed.

BOBOLINK

Bobruisk, a town of 64,000 inhabitants on the R. Bevesina in White Russia, formerly fortified.

Boccaccio, Giovanni, the celebrated Italian raconteur, born probably in Paris and brought early to Florence; showed a youthful passion for literature; sent by his father to Naples to pursue a mercantile career; gave himself up to story-telling in prose and verse; fell in love with Maria, a beautiful woman, daughter of the King, styled by him Fiammetta, for whom he wrote several of his works and his greatest, the *Decameron*; early formed a lifelong friendship with Petrarch with whom he contributed to the revival and study of classic literature; lectured on Dante in Florence; Petrarch's death deeply affected him, and he died the year after. (1313-1375).

Boccherini, Luigi, a celebrated Italian musical composer, born at Lucca; was associated with Manfredi, the violinist; his works were numerous; was a fine cellist, and was treated with favour by the King of Spain's brother and by Frederick William II. of Prussia. (1743-1805).

Bochum, town of Westphalia, Germany, with coal-mines and iron and steel works. Pop. 314,000.

Boc-land, or **Bookland** (Anglo-Saxon boc, a book), a form of tenure of manor-land in early England. Boc-land was originally land held by the King or in ecclesiastical possession, and was given into private ownership in return for rent and service. It is the origin of the modern freehold.

Bode, Johann Elert, an astronomer, born at Hamburg; was professor of Astronomy and director of Observatory at Berlin; produced a number of astronomical works, one of his best being *An Introduction to the Knowledge of the Starry Heavens*; gave name to the law of the planetary distances, called Bode's Law, although it was observed by Kepler long before his day. [1747-1826].

Bodensee, another name for the Lake of Constance (q.v.).

Bodiam, a village of E. Sussex, England, on the Rother. Here is the ruin of a fine 14th-Century moated castle.

Bodleian Library, the university of Oxford, founded, or rather restored, by Sir Thomas Bodley in 1598; enlarged from time to time by bequests, often munificent. A copy of every book published in the United Kingdom has to be sent there. Owing to congestion a new building has recently been added to the library.

Bodley, Sir Thomas, born at Exeter; employed on embassies by Elizabeth on the Continent, where he collected a number of valuable books; bequeathed them and his fortune to the university library of Oxford, named after him. (1545-1613).

Bodmer, Johann Jacob, a distinguished the first, by study of the masters in literature of Greece and Rome, France, England, and Italy, to awaken Germany to a sense of its poverty in that line, and thus aided, along with others, in the inauguration of a new era, which he did more by his republication of the *Nibelungen Lied* than by his advocacy. (1698-1783).

Bodmin, the county town of Cornwall, England, superseded Truro as capital, an important agricultural centre; has large annual fairs for cattle, horses, and sheep. Pop. 5,500.

Bodoni, Giambattista, an Italian printer; settled at Parma, where his press was set up in the ducal palace, whence issued magnificent editions of the classics, Horace, Virgil, Tacitus, Tasso, and, last of all, Homer. (1740-1813).

Body-Snatchers, those engaged in the removal of the dead from churchyards with the object of the sale of the corpses to medical students and surgeons for anatomical purposes, a practice stopped by the Anatomy Act of 1832. The iron railing seen in Greyfriars churchyard, Edinburgh, is a relic of the practice, such bars being employed to frustrate body-snatchers.

Boece, Hector, known also as Boethius, a humanist and Scottish historian, born at Dundee; professor of Philosophy at Paris; friend of Erasmus; was principal of university at Aberdeen; wrote *History of Bishops of Morlack and Aberdeen*, and *History of Scotland* in Latin. (1465-1536).

Boehm, Sir Joseph Edgar, sculptor, parentage; born in Vienna, of Hungarian parentage; settled in England; executed a colossal statue of Queen Victoria at Windsor, a seated statue of Carlyle, and a statue of Bunyan at Bedford; patronised by the Queen and royal family. (1834-1896).

Boehme, Jacob, a celebrated German mystic, born at Görlitz; spent his whole life in meditation on divine things; saw in the Bible a revelation of these as in no other book. His philosophy would seem to have anticipated the secret of Hegel, who acknowledges him as one of the fathers of German philosophy. His writings embody a scheme of mystical theology, setting forth the Trinity in Unity of the Hegelian system. (1575-1624).

Bæotia, a country of ancient Greece, N. of the Gulf of Corinth; the natives, though brave, were mere tillers of the soil under a heavy atmosphere, innocent of culture, and regarded as bores and dullards by the educated classes of Greece, and particularly of Athens, although Hesiod, Pindar, and Plutarch were natives of Bæotia.

Boers (i.e., husbandmen), Dutch colonists of an independent republican temper, who in the 17th Century settled in S. Africa; gave themselves to agriculture and cattle-rearing; settled at length in the Transvaal in a self-governed community by themselves, the independence of which was recognised after the war of 1880-1881.

Boer War, The, started in Oct. 1899, when the Boers invaded Natal, and was ended by the Treaty of Pretoria in May 1902. Britain suffered heavily in the opening six months of the war, but with the appointment of Lord Roberts as Commander-in-Chief, with Lord Kitchener as Chief of Staff, the tide turned. Kimberley was relieved in Feb. 1900. The relief of Ladysmith and Mafeking were other successes leading to the surrender of the Boer leaders.

Boëthius, **Anicius Manlius Severinus**, a Roman statesman, of Consular rank, a profoundly learned man, held the highest offices, Consul, among others, under Theodoric the Goth; his integrity and opposition to injustice procured him enemies, who accused him of treason; he was cast into prison, and finally put to death; wrote in prison his *De Consolatione Philosophiæ*, in five parts, employing verse and prose alternately, which King Alfred translated into Anglo-Saxon; he was canonised as a martyr, and his influence was great during the Middle Ages. (470-524).

Bog, land saturated with water. The vegetation in consequence decomposes and forms peat. They are found in N. Europe, and particularly in Ireland. Bogs are more easily drained when they are not level.

Bog Asphodel (*Narthecium ossifragum*), a yellow-flowered plant of the order Liliaceæ, found in England and Scotland in wet moorland districts.

Bog-Bean, **Marsh Trefoil**, or **Buckbean**, a bog plant, order Gentianaceæ. The native species, *Menyanthes trifoliata*, is worth cultivating in a water-garden. It needs to be rooted in mud in shallow water. The rhizome has bitter tonic properties.

Bog Butter, a fatty substance of hydrocarbon, found in Irish peat-bogs. It is either of vegetable or of animal origin.

Bogermann, **Johann**, Dutch divine, translated the Bible into Dutch, and was President of the Synod of Dort. (1576-1633).

Bogie, the term given to the under-carriage of a locomotive bearing the front four wheels when this is attached to the body of the engine by a pivot. Being less rigid, it adjusts itself to the curves of the line, and so diminishes the likelihood of the train leaving the line, and lessens vibration.

Bog Iron Ore, a variety of limonite or ferric hydrate. It is found in a loose or porous state in marshy places. Semi-fossilised wood and leaves are often found enclosed in it.

Bog Moss, a name given to various species of Sphagnum, found in marshes. The leaves and roots absorb water. The roots decay, and are a constituent of peat.

Bog Myrtle, or **Sweet Gale**, a shrub in Britain, especially in Scotland, the leaves

of which secrete a fragrant wax and emit a sweet odour when crushed. It bears flowers in short catkins and a wax-secreting drupe as fruit. Its botanical name is *Myrica gale*, order Myricaceæ.

Bognor Regis, a seaside resort of W. Sussex, England. It received the name Regis when King George V. passed his convalescence there in 1929, after his dangerous bronchial illness. Pop. 14,000.

Bog Oak, a hard black wood found in the bogs of Ireland. It has obtained its characteristic hardness and colour from having been preserved for centuries in the peat. It is used for carving.

Bogota, capital of the Republic of Colombia, S. America, situated on a remarkable, almost mountain-encircled plateau, on the R. Bogota, 65 m. S.E. of its port, Honda, the highest navigable point of the Magdalena; is 8,600 ft. above sea-level, and has a spring-like climate. It is regularly built, with many churches, a mint, university, library and observatory, and several schools. Pop. 350,000.

Bohemia, the chief province of Czechoslovakia; is encircled by mountains, and drained by the upper Elbe and its tributaries. The Erzgebirge separate it from Saxony; the Riesengebirge, from Prussia; the Böhmerwald, from Bavaria; and the Moravian Mountains, from Moravia. The mineral wealth is varied and great, including coal, the most useful metals, silver, sulphur, and porcelain clay. The climate is mild in the valleys, the soil fertile; forests are extensive. Dyeing, calico-printing, linen, and woollen manufactures are the chief industries. The glassware is widely celebrated; there are ironworks and sugar refineries. The transit trade is very valuable.

The people are mostly Czechs, of the Slavonic race, Roman Catholics in religion; there is a large German minority (Sudetendeutsche, q.v.). There is a university at Prague. In the 16th Century the crown was united with the Austrian, but in 1619 religious questions led to the election of the Protestant Frederick V. This was followed by the Thirty Years War, the extermination of the Protestants, and the restoration of the Austrian House. The independence of Czechoslovakia was proclaimed in 1918. Area, 20,000 sq. m. Pop. 6,700,000.

Bohemian Brethren, a fraternity of an extreme sect of the Hussites, organised as United Brethren in 1455; broken up in the Thirty Years War, met in secret, and were invited, under the name of Moravians or Heremites, by Count Zinzendorf to settle on his estate in Silesia.

Bohemian Forest, or **Böhmerwald**, a mountain range in Bohemia (Czechoslovakia) and Bavaria, and dividing the two, is heavily forested and in parts broken and rugged. Highest point, Arber, 4,780 ft. high.

Bohemond, first Prince at Antioch, son of Robert Guiscard; set out on the first crusade; besieged and took Antioch; was besieged in turn by the Saracens, and imprisoned for two years; liberated, he collected troops and recaptured the city. (1056-1111).

Bohn, **Henry George**, publisher, son of a German bookbinder in London, became a secondhand bookseller; issued "guinea" catalogue of his large stock, 1841. Dealt in "remainders." From 1846 published cheap editions of valuable works of many kinds; many that were in foreign languages he translated. (1796-1884).

Bohol, an island of the Philippine group of 1,534 sq. m., between Cebu and Leyte. Pop. 400,000 (approx.).

BOG-BEAN

Bohr, Niels Henrik ^{DAN.}, professor of Physics at Copenhagen, a distinguished mathematical physicist. His greatest work has been in connection with the application of the quantum theory (q.v.) to the structure of the atom (q.v.). His work was based upon the planetary conception of the atom put forward by Rutherford. Awarded Nobel Prize for Physics, 1922. (1885-).

Bohun, the name of a family the founder of which, Humphrey de Bohun, surnamed Barbu, accompanied William the Conqueror to England, and which subsequently played an important part in English history. One, Henry, was granted the earldom of Hereford by John in 1199. The family estates were on the Welsh borders, and the family itself from now on became one of the most important on the border. Henry's son Humphrey became Earl of Essex also, 1236; he was one of the barons who obtained Magna Charta (d. 1274). His great-grandson, Humphrey, Earl of Hereford and Essex, was a lord ordainer temp. Edward II. (1276-1322). The line ended with his grandson Humphrey, Earl of Hereford, Essex, and from 1360) Northampton. (d. 1373).

Boiardo, Matteo Maria, Count of "Flower of Chivalry", an Italian poet, courtier, diplomatist, and statesman; author of *Orlando Innamorato* (1450), the model of Ariosto's *Orlando Furioso*, which eclipsed it. (1434-1494).

Boieldieu, Adrien François, a distinguished French musical composer of light operas; author of the *Café de la Hôpital*, *Télémaque*, and *La Dame Blanche*, reckoned his masterpiece; called the French Mozart. (1775-1834).

Boileau, Nicolas (surnamed Despréaux, to distinguish him from his brother), poet and critic, born in Paris; brought up to the law, but devoted to letters, associating himself with La Fontaine, Racine, and Molière; author of *Satires* and *Epistles*, *L'Art Poétique*, *Le Lutrin*, etc., in which he attacked and employed his wit against the bad taste of his time; did much to reform French poetry, as Pascal did to reform the prose, and was for long the lawgiver of Parnassus; was an imitator of Pope, but specially of Horace. (1636-1711).

Boiler, a vessel in which liquids are boiled, but refers especially to a vessel in which steam is generated by boiling water under pressure. Two main types are in use—viz., the water-tube boiler and the fire-tube boiler. In fire-tube boilers, the water is contained in a cylindrical drum, through which pass numerous tubes conveying the hot gases from the furnace; such boilers are used in locomotive engines, for raising steam for heat in large buildings, and for much of the mercantile marine. Water-tube boilers are, so to speak, the converse of the fire-tube variety; in them the steam is generated within the tubes, which are heated from the outside. They are much more suitable for high-pressure steam, such as is required, for example, in the Navy, in great liners, and for raising power in power-stations and factories.

Boiling Point, is the temperature at which a liquid, when heated, turns to steam. The boiling point of water, at normal pressure, for instance, is 212° F. or 100° C. The boiling point is raised by increased pressure, lowered by decreased pressure.

Boils and Carbuncles are skin affections caused by the microbe staphylococcus. They frequently imply ill-health or general debility, and are treated by fomentations, lancing, and vaccine.

U.E.

Bois-de-Boulogne, a large park along the W. side of Paris from the Porte Maillot to the Porte d'Auteuil, and from Paris to St. Cloud.

Boise, capital of Idaho, U.S.A., on Boise R., is a mining centre. Pop. 22,000.

Bois-le-Duc. See 'Hortogenbosch.

Boito, Arrigo, Italian composer and librettist; born at Padua; produced *Meistersale* and other operas; wrote librettos for works of Verdi and other composers. (1842-1918).

Bokhara (Bukhara), formerly a Mohammedan State in Central Asia, N. of Afghanistan, now part of the Uzbek and the Turkmenistan S.S.R. of Soviet Russia. The surface is arid, and cultivation possible only near the rivers—the Oxus, Zerafshan, and Karshi. In the sands of the Oxus, gold and salt are found. Rice, cotton, and cereals are grown; silk, cotton-thread, jewellery, cutlery, and firearms are manufactured. The people are of Turkish and Persian origin. In 1866 the Russians defeated the Emir, and though the country remained nominally an independent emirate, it became dependent on Russia. In 1920 revolution broke out and the Emir fled to Afghanistan. A counter-revolution under Enver Pasha came to an end with his death in action in 1922. Bokhara and Khiva were subsequently in association with the U.S.S.R. A re-grouping of the territories of Turkistan took place in 1924. Bokhara being included partly in Uzbekistan and partly in Turkmenistan, both of which in 1925 became member states of the U.S.S.R.

The capital, Bokhara, is on the plain of the Zerafshan, a walled, mud-built city, 3 or 9 m. in circumference, with numerous colleges and mosques, the centre of learning and religious life in Central Asia. It has important trade markets. Pop. 70,000.

Bolan Pass, a high-lying, deep, narrow gorge, with a torrent running through it, extending between Quetta (Baluchistan) and Kandahar (Afghanistan), sloping upwards at an inclination of 90 ft. a mile; is traversed by a military road.

Bolas, a weapon used by S. American natives, consisting of stone balls (either 2 or 3) attached to the ends of a piece of strong rope. It is whirled and thrown in such a way as to entangle the legs of the quarry.

Bole, a hydrous aluminium silicate, in form resembling clay; is of varying colours, red, dull yellow, brown, and is used as a pigment. Red letters in old manuscripts were painted with bole.

Bolero, a lively Spanish dance, usually 3-4 time. Also its music or any composition of a like nature.

Boleyn, or Bollen, Anne, second wife of Queen Elizabeth; daughter of Sir Thomas Bollen (afterwards Earl of Wiltshire); after a three years' residence at the French Court became maid of honour to Queen Katherine; attracted the admiration of Henry; was married to him, and became Queen; charged with adultery and conspiracy, was found guilty and beheaded; was of the Reformed faith; her marriage with Henry had important bearings on the English Reformation. (1507-1536).

ANNE BOLEYN

Bolingbroke, Henry St. John, Viscount, English statesman, orator, and political writer, born at Battensea; Prime Minister of Queen Anne in the Tory interest, after her dismissal of the Whigs; on the accession of George I. fled to France and joined the Pretender; was impeached and attainted; returned in 1733 to his estates, but denied a seat in the House of Lords, an indignity which he resented by working for the overthrow of Walpole; was the friend of Pope and Swift, and the author of *Letters*, bearing upon politics and literature. The *Letter to Windham*, a sort of apology, and the *Ideal of a Patriot King* exhibit him at his best. It was he who suggested to Pope his *Essay on Man*. (1678-1751).

Bolivar, (1) A thickly-wooded dept. of Colombia Republic, S. America, with a coastline on the Caribbean Sea. Area 23,000 sq. m. Pop. 640,000. Cap. Cartagena. (2) An inland province of Ecuador, S. America, area 1,160 sq. m. Pop. 80,000. Cap. Guaranda. (3) A large inland state of Venezuela, well watered and heavily wooded, but sparsely inhabited. Area 91,900 sq. m. Pop. 98,000. Cap. Ciudad Bolivar.

Bolivar, the monetary unit in Venezuela, divided into 100 centimos, the old par value being 25-25 to the \$1.

Bolivar, Simon, surnamed the Liberator, general and statesman, born at Caracas, Venezuela; a man of good birth and liberal education; seized with the passion for freedom during a visit to Madrid and Paris, devoted himself to the cause of S. American independence; freed from the yoke of Spain Venezuela and New Granada, which, in 1819, he erected into a republic under the name of Colombia; achieved in 1825 the name of Upper Peru, henceforth called Bolivia, after his name; accused of appealing to the Dictatorship, he abdicated, and was preparing to leave the country when he died of fever, with the sage reflection on his lips, "The presence of a soldier, however disinterested he may be, is always dangerous in a State that is new to freedom"; he has been called the Washington of S. America. (1783-1830).

Bolivia, an inland republic of S. America, occupying lofty tablelands E. of the Andes and surrounded by Peru, Brazil, Paraguay, Argentina, and Chile. The S. is chiefly desert. In the N. are Lake Titicaca and many well-watered valleys. The very varied heights afford all kinds of vegetation, from wheat and maize to tropical fruits. Agriculture, however, is backward, and bark and hides are the chief products. In the lower plains coffee, tobacco, cotton, and coconuts are cultivated. The most important industry is mining, tin being easily the most important mineral output. Tin is the chief export; manufactured goods are imported.

The country has been independent since 1825; it lost its sea provinces in the war with Chile 1879-1883. A protracted war with Paraguay broke out in 1865 over the boundary through the Gran Chaco. After heavy fighting peace was ratified in 1872. The capital is Sucre, but La Paz (actual seat of the government) and Cochabamba are larger towns. Rather more than half the population is Indian (Aymaras and Quechuas), and a large proportion of the rest is of mixed blood. Language of the educated classes is Spanish. Pop. 3,000,000.

Bolland, John, a Jesuit of Antwerp, born in Bolland; compiled five vols. of the *Lives of the Saints* called *Acta Sanctorum*, which was continued by others, called after him "Bollandists." (1596-1665).

Bollington, market town of Cheshire, England, 2½ m. N.W. of Macclesfield. Silk manufacture is the chief industry. Pop. 5,000.

Boll Worm, the name of the larvae of various moths, including *Heliothis armigera*, which eat away the seed pods (the boll) of the cotton-plant.

The cotton boll-weevil has done a tremendous amount of damage to cotton crops in the U.S.A. during the last 40 years and is a serious plague. It lays its eggs in the cotton boll and the larvae feed on the cotton destroying the boll. The adult beetle is a very small insect—only ½ in. long, including its long proboscis.

COTTON BOLL WEEVIL (much enlarged)

Bologna, an ancient walled city of Italy, and capital of a dept. of the same name, on a fertile plain, at the foot of the Lower Apennines, 82 m. N. of Florence; has many fine buildings, a university, one of the oldest in Europe, schools of music and art, libraries and art collections. There are some silk and other industries and considerable trade. Pop. 267,000.

Bolometer, an instrument designed by Prof. Langley of Washington in 1881 for the study of the distribution of heat in the solar spectrum. It is extremely sensitive to very feeble heat rays, its action depending upon the change of resistance of a thin strip of metal with varying temperature.

Bolsena, a small town in Italy, on the E. shore of Lake Bolsena. The lake is in a hollow crater of a volcano and abounds in fish, but has an unhealthy atmosphere.

Bolshevism, an extreme form of Russian revolutionary socialism, and violently opposed to capitalism and religion; the political and economic doctrines of the Bolshevik or majority party as opposed to the Menshevik or minority party. Under Lenin and Trotsky its adherents took control of Russia in 1918.

The term originated from a conference of Russian socialists in London in 1903. The various groups were agreed as to principles laid down by Karl Marx, but opposed on the method of bringing them into operation. Lenin's party urged that the existing Government in Russia should be overthrown by violence and a communistic administration be forced upon the people without waiting for education by propaganda—in other words, revolutionary socialism to come from the top.

In 1921 the revolutionary Socialist Government was established and the theories of the Bolsheviks were developed in practice. The leading doctrine of Bolshevism is the Dictatorship of the Proletariat, based on the idea that producers (workers) are the class which merits most consideration, and since the proletariat never gets justice under ordinary democratic government, democracy must be abolished. The doctrine, both political and economic, have been modified in some directions by force of circumstances, but the experiment has been successful in so far that Soviet Russia is to-day one of the strongest nations. Many classes, however, who actively opposed or who failed to co-operate in the communistic experiment (A.C., the Kulaks) have been "labeled."

Bolsover, a town of Derbyshire, England, 6 m. E. of Chesterfield. It has a Norman church and castle ruins. Coal is mined here and a building stone—Bolsover stone—is quarried. Pop. 12,000.

Bolthead, a headland of S. Devon, England, W. of the Salcombe estuary. Here is a wireless station.

Bolton, a large manufacturing town of the cotton industry, with iron-works, bleaching and chemical works. There are coal mines in the neighbourhood. Arkwright and Crompton, inventors of spinning machinery, were born here. Pop. 175,000.

Bolton Abbey, an old abbey in Yorkshire, England, 6 m. E. of Skipton, founded in 1121 by the Augustinian canons and moved to its present site in 1151.

Bolton-upon-Deerne, an urban district and ancient village of Yorkshire, England, in the W. Riding, 7 m. NE. of Rotherham. Pop. 14,000.

Boma, a station in Belgian Congo on the mart and until 1923 cap. of the Colony.

Bomarsund, a fortress of the island of Aland, occupied by Russia and destroyed by the Anglo-French fleet in 1854; the Russians bound by the Treaty of Paris not to restore it. In 1917 with the rest of the Aland Is. it fell within the new Republic of Finland.

Bomb, an explosive weapon originally intended to be thrown by hand in close-range fighting. It was first used in the 15th Century, being a ball of baked earth filled with explosives. They were used by grenadiers, and were extensively employed during the Great War, the commonest type being the Mills hand grenade. They were adapted to be fired by a rifle, and made to explode by a fuse ending in a rim-fire percussion-cap. The bomb speedily became an effective aircraft weapon, aerial bombs including incendiary, gas, and explosive types.

Bombardier, the lowest rank of non-Royal Artillery, so called because formerly they handled a primitive canon called a bombard.

Bombardment, the direction of artillery fire against a fortress, a fortified position held by troops, or against a town. When against the latter, the purpose of bombardment is either to induce the town to surrender or to demoralise the population. At the Hague Peace Conference of 1899 it was laid down that opportunity should be allowed for the inhabitants of a threatened town to evacuate; that undefended open towns should not be exposed to bombardment, and that notable buildings, works of art, etc., should be spared.

In trench warfare the enemy's position is usually bombarded before, and right up to, the time of an infantry attack. Modern range-finding is so accurate that troops are able to advance under cover of the bombardment of their objective.

Bombay, the western Presidency of India, embraces 26 British districts and 19 feudatory states. N. of the Nerbudda R. the country is flat and fertile; S. of it are mountain ranges and tablelands. In the fertile N. cotton, opium, and wheat are the staple products. In the S., salt, iron, and gold are mined; but coal is wanting. The climate is hot and moist on the coast and in the plains, but pleasant on the plateaux. Cotton manufacture has developed extensively, and cotton cloths, with sugar, tea, wool, and drugs are exported. Area of Presidency, 77,271 sq. m. Pop. 18,000,000.

Bombay, the chief city, stands on an island, connected with the coast by a causeway, and has a magnificent harbour and docks. It is rapidly surpassing Calcutta in trade, and is one of the greatest of seaports; its position promises to make it the most important

commercial centre in the East, as it already is in the cotton trade of the world. It swarms with people of every clime, its merchandise being mainly in the hands of the Parsees, the descendants of the ancient fire-worshippers. It is the most English town in India. It came to England from Portugal as dowry with Catherine of Braganza, wife of Charles II., who leased it to the East India Company for £10 a year. Its prosperity began when the civil war in America afforded it an opening for its cotton. Pop. 1,161,000.

Bona, a seaport and naval station in French Algeria, in the province of Constantine, on a bay of the Mediterranean, with an excellent harbour and a growing trade; is much improved since its occupation by the French in 1832. Near it are the ruins of Hippo Regius, the episcopal city of Augustine. Pop. 69,000.

Bona Dea (the good goddess), a Roman goddess of fertility, worshipped by women; her priestesses vestals and her worship by rites from which men were excluded. Her symbol was a serpent, but the name under which she was worshipped is not known.

Bonaparte, name of a celebrated family of Italian origin settled in Corsica; the principal members of it were: **Charles Marie**, b. at Ajaccio, 1746; d. at Montpelier, 1785; married 1764. **Leticia Ramolino**, b. at Ajaccio, 1750; d. at Rome, 1836; of this union were born 8 children; **Joseph**, became King of Naples, 1806; King of Spain from 1808 to 1813; retired to United States after Waterloo; returned to Europe, and d. at Florence, 1844. **Napoleon I. (g.r.)**, **Lucien**, b. 1775; became President of the Council of the Five Hundred, and Prince of Canino; d. in Viterbo, 1840. **Mariannne-Elise**, b. 1777; married Felix Bacciochi, who became Prince of Lucce; d. at Trieste 1820. **Louis**, b. 1778; married Hortense de Beauharnais; father of Napoleon III.; King of Holland (from 1806 to 1810); d. at Leghorn 1846. **Marie Pauline**, b. 1780; married General Leclerc, 1801; afterwards, in 1803, Prince Camillo Borghese; became Duchess of Guastalla; d. at Florence, 1825. **Caroline-Marie**, b. 1782; married Murat in 1800; became Grand-duchess of Berg and Cleves, then Queen of Naples; d. at Florence, 1839. **Jerome**, b. 1784; King of Westphalia (from 1807 to 1813); Marshal of France in 1800; married, by second marriage, Princess Catherine of Württemberg; d. 1860; his daughter, Princess Mathilde, (1820-1904); his son, Prince Napoleon, called Jerome (1822-1891), married Princess Clothilde, daughter of Victor Emmanuel, of which marriage was born Prince Napoleon Victor (1862-1920), whose son Louis became head of the family.

Bonar Law. See Law, Andrew Bonar.

Bonchurch, picturesque village of the Isle of Wight, 1 m. E. of Ventnor, a favoured winter resort for invalids. Near by is Pulpit Rock. Pop. 500.

Bond, A certificate of ownership of capital lent to a government, municipality, company or corporation. Interest bonds are those whose interest, if not paid in any year, is carried forward as a lien on future profits. In law, a document binding the signatory to do or not to do a certain act. They are used as a guarantee of another's fidelity, and in other ways. Post obit bonds are those given to be realisable after someone's death. A bonded warehouse is one in which goods may be stored without payment of customs or excise duties, the depositor of the goods giving a bond as security.

Bond, The Rt. Hon. Sir Robert, Canadian statesman, born in Newfoundland; entered the House of Assembly in 1889 and

motive force in the work of charging the accumulators in an electric power-station. They may, on the other hand, be used to help discharge the accumulators so that the continuous supply of current from the larger dynamo may be unimpeded.

Boot, an instrument of torture used in Scotland and England down to the early 18th Century. It was a boot made of wood and iron which was fitted on to the victim's leg. Wedges were then driven in, by hammer blows, between the boot and the calf.

Boötes (the ox-driver or waggoner), a son of Ceres; inventor of the plough in the Greek mythology; translated along with his ox to become a constellation in the northern sky, the brightest star in which is Arcturus.

Booth, Edwin Thomas, son of Junius Brutus Booth, greatest of American tragedians, famous for Shakespearian impersonations; appeared with success in England. (1833-1893).

Booth, Evangeline Cory, General of the Salvation Army, born on Christmas Day at Cambridge Heath, Hackney, seventh child of the Army's founder, William Booth. She had charge of the Army's work, successively, in Great Britain, Canada, Newfoundland, and (1904-1934) U.S.A. Succeeded Edward John Higgins as General in 1934. (1865-).

Booth, John Wilkes, actor, another son of J. B. Booth; served with the Southern forces in the American Civil War and, after their defeat, assassinated Lincoln; he was shot by his captors. (1839-1865).

Booth, Junius Brutus, actor, born in St. Pancras, London, son of Richard Booth, lawyer, who had fought for Americans in War of Independence. First appearance, 1813. Covent Garden, 1815; rival of Kean. Went to U.S.A., 1821; revisited England, 1825 and 1836-1837. Popular in Shakespearian villainous and tragic parts. Lived on farm near Baltimore. Died on voyage up Mississippi. (1796-1852).

Booth, William, founder and general of the Salvation Army, born in Nottingham; published *In Darkest England*; a man of singular self-devotion to the religious and social welfare of the race. (1829-1912).

Booth, William Bramwell, General of the Salvation Army. He succeeded his father after 32 years as Chief of Staff. In 1928 he was taken ill, and the High Council removed him from office despite strenuous opposition on the part of the Booth family. He died a few months later. (1856-1929).

Boothia, a peninsula of N. Canada, W. of the Gulf of Boothia, in which the N. magnetic pole of the earth is situated; discovered by Sir James Clark Ross in 1829.

Bootle, a borough of Lancashire, England, at the mouth of the Mersey, just N. of Liverpool. It has immense docks, and iron and engineering works, also timber yards, jute factories, tanneries, and corn mills. Pop. 77,000.

Bootlegger, a person engaged in the supply and sale of illicit liquor, with special reference to the business organisations which grew up in the U.S.A. during the era of National Prohibition. Bootleggers were organised on the plan of a gang and its leader, and with the exception that violence took the place of law in the settlement of disputes, their procedure was based on usual commercial practices. The word was derived from the method of concealing forbidden liquor in the tops of heavy boots, a practice in early colonial days when liquor was sold illegally to the Indians.

Bopp, Franz, a celebrated German philologist and Sanskrit scholar, born at Mayence; was professor of Oriental Literature and General Philology at Berlin; his greatest work, *A Comparative Grammar of Sanskrit, Zend, Greek, Latin, Lithuanian, Old Slav, Gothic, and German*; translated portions of the *Mahabharata* (q.v.). (1791-1867).

Bora, Katharina von, the wife of Luther, born in Meissen, originally a nun, who, with eight others, was at Luther's instance released from her convent; proved "a pious and faithful wife" to Luther, as he says of her, and became the mother of six children, three sons and three daughters. (1499-1552).

Boracic Acid, is found in free form in the U.S.A., Tuscany, etc., and is also chemically produced. It is best known as a white powder or in the form of small crystals, and is almost tasteless. It is a mild antiseptic, and as such is used in medicine chiefly in ointment and lint. On account of its mild antiseptic properties it has also been used as a preservative, but in 1927 this was forbidden by law in Great Britain.

Borage (*Borago officinalis*), an exceedingly hispid plant, cultivated in England as a garden flower, though sometimes found wild; with brilliant blue flowers and rough stem; it was once regarded as a cordial and used in claret-cup; the young leaves may be used as a salad. It is bee-fertilised, and is cultivated as a honey plant for feeding bees.

BORAGE

Borah, William Edgar, U.S. constitutional lawyer and senator for Idaho since 1907, was born at Fairfield, Ill. Practised law in Lyons, Kans., 1889-1891, then removed to Boise, Idaho. He was forward in opposing entry into League of Nations and World Court. Became chairman, Senate Foreign Relations Committee, 1924. (1865-).

Borax, the borate of soda, found in the mineral colemanite. It is used for enamels, glazes, etc., for softening hard water, and as an antiseptic.

Bordeaux, a great industrial and commercial city, the chief seat of the wine trade in France and the fourth seaport; on the Garonne; capital of the dept. of Gironde; the birthplace of Rosa Bonheur and Richard II., his father, the Black Prince, having had his seat here as Governor of Aquitaine. There are sugar refineries, potteries, foundries, glass and chemical works, also shipbuilding and motor industries. The cod-fishing industry has its base here. Exports include wine, chemicals, fish, and glass. The cathedral dates from the 11th Century. There are schools of science, art, theology, medicine, and navigation, a library, museum, and a rich picture-gallery. There is a new port at Balacou. It became the seat of the French Government in 1914, when the fall of Paris seemed imminent. Pop. 263,000.

Borden, Rt. Hon. Sir Robert Laird, Canadian statesman. Entered the Canadian Parliament in 1896, succeeding to the leadership of the Conservative Party in 1901, after a distinguished legal career. He became Prime Minister in 1911, and held the post till 1920, frequently visiting London during the war to co-operate with the British Cabinet. (1854-1937).

Borders, The, the shifting boundary between Scotland and England before the Union, a centre of endless fighting and marauding on the opposite sides for centuries.

Bordighera, a town of Italy on the Riviera, in the dept. of Liguria, a popular winter pleasure resort on a hill overlooking the Mediterranean. It is divided into an old, and a new, or Visitors' Town. Pop. 6,000.

Bordone, Paris, an Italian painter, born at Treviso, a pupil of Titian and Giorgione; his most celebrated picture, "The Gondolier presenting the Ring of St. Mark to the Doge." (1500-1571).

Bore, or **Eagre**, a watery ridge rushing violently up an estuary, due to a strong tidal wave travelling up a gradually narrowing channel. Bores are common in the estuary of the Ganges and other Asiatic rivers, in those of Brazil, and at the mouth of the Severn, in England.

Boreas, the god of the North wind, and of Aurora, son of the Titan Astræus and of Aurora.

Borecole (*Borecole acephala*), Scotch kail, curly kail, or cow-cabbage, a cruciferous winter vegetable related to and derived from the cabbage (*Brassica oleracea*). Its curly leaves are used for table purposes.

Borghese, name of a family of high position and great wealth in Rome; Camillo, having become Pope in 1605 under the title of Paul V.; and Prince Borghese having married Pauline Bonaparte, sister of Napoleon, who separated himself from her on the fall of her brother (1775-1832); the palace of the family one of the finest in Rome, with a rich collection of paintings; it was built by Cardinal Scipio Caffarelli-Borghese on the Cenci estate, and many of its works of art are now in the Louvre.

Borgia, **Cæsar**, fourth son of Pope cardinal at the age of 17, an honour he relinquished to become a soldier, in which capacity it is alleged he gave himself up to deeds of inhumanity which have made his name a synonym for every action that is most crafty, revolting, and cruel; a portrait of him by Raphael, in the Borghese gallery, is a masterpiece. Notwithstanding the execration in which his memory is held, he is reputed to have been just as a ruler in his own domain, and a patron of art and literature. (1476-1507).

Borgia, **Francesco**, third general of the Order of the Jesuits, a post he filled with great zeal as well as prudent management; was beatified by Urban VIII., and canonised by Clement X., 1671. (1510-1572).

Borgia, **Lucrezia**, sister of Cæsar Borgia, born at Rome; her father annulled her first marriage, and gave her to a nephew of the King of Naples, who was murdered by her brother's assassins. She then married the Duke of Ferrara; was celebrated for her beauty and her patronage of letters, though she has been accused of enormities as well as her brother. (1480-1519).

Borgu, or **Barba**, fertile and densely peopled district in Africa traversed by the Niger, partly in Nigeria but largely in Dahomey, French W. Africa; in one of the chief towns Mungo Park lost his life.

Boris III., Tsar of Bulgaria, son of Ferdinand; succeeded his father on his abdication in October 1918. Married Princess Giovanna of Italy, 1930. (1894-).

Borkum, one of the E. Frisian Is., Germany, near the mouth of the Ems, in Hanover province. Cattle are

reared, and in the summer it is a popular holiday resort. Pop. 3,000.

Born, **Bertrand de**, one of the most celebrated troubadours of the 12th Century, born in Périgord aggravated the quarrel between Henry II. of England and his sons; is placed by Dante in the *Inferno*.

Borneo, an island in the Malay Archipelago, the third largest on the globe, its length 800 m. and its breadth 700; covered with mountains in the interior, Kinabalu, the highest (13,500 ft.), has no volcanoes; bordered all round with wide plains and low, marshy ground; rich in vegetation and in gold and precious stones; its forests abound with valuable timber, teak, ebony, etc.; all tropical crops and spices are cultivated; the population is Dyak, Malay and Chinese. Politically it is divided into Dutch Borneo, British N. Borneo, Brunel, under British Protectorate since 1888, and Sarawak, recognised by Britain as independent in 1888 but ruled by the "White Rajah," Sir Charles Vyner Brooke, and in close relationship with England. Pop. Dutch Borneo, 2,169,000; British N. Borneo, 270,000; Brunel, 30,000; and Sarawak, 475,000.

BORNEO
WOMAN
WEAVING
THREAD

Borneo, **British North**, a British protectorate occupying the N. part of Borneo. Mainly mountainous (Mt. Kinabalu is 13,500 ft. high) and thickly forested; its area is 31,000 sq. m. and coastline 900 m. The chief towns are Sandakan and Jesselton. The chief products are timber, tobacco, rubber, camphor, fruits, etc., birds' nests, seed-pearls, and bêche-de-mer. Coal and gold are mined. The country is under the jurisdiction of the British N. Borneo Co. (chartered 1881). A Governor is appointed by the Company with the approval of the Colonial Secretary, and a Court of Directors meets in London. Cap. Sandakan.

Bornholm, an island belonging to Denmark, in the Baltic; has no good harbour; agriculture, cattle-breeding, and fishing the occupation of the inhabitants. Chief town, Rønne. Pop. 45,000.

Bornu, a district partly in Nigeria, W. and S. of Lake Chad; famed for a breed of horses; population mostly negroes; the ruling race of Arab descent, called Shuwas; climate hot and unhealthy in the low ground, but temperate in the high. Formerly an independent Sultanate, it was divided between England (Nigeria), France (French W. Africa), and Germany (Cameroons). Since the war that part which fell within the German Cameroons has been administered under British Mandate. Bornu is to-day a large province of British Nigeria. Pop. 700,000.

Boro Budor, the ruin of a magnificent Buddhist temple in Java, ornamented with figures of Buddha and scenes in his life, with representations of battles, processions, chariot races, etc.

Borodin, **Alexander Perfyrievich**, Russian chemist and musical composer, was born and died in St. Petersburg, (Leningrad) where he studied medicine and practised as a military doctor until made professor of chemistry. A natural musician, took to composition in 1862. Was composing the opera *Prince Igor* when he died. (1834-1887).

Borodino, a village 70 m. W. of Moscow; the scene of a bloody battle between Napoleon and the Russians, Sept. 7, 1812.

Boron, an element present in a natural state only in compounds. It can be produced by heating boric acid with a powerful reducing agent, e.g., potassium or magnesium. The boron obtained is in a powder form, dark red in colour. There are several compounds of boron, used considerably in commerce and industry, e.g., boric acid, borax (one of the borates).

Bororos, an important native Brazilian race in the Matto Grosso between Cuyaba and Goyaz, noted for the height of its people.

Borotra, Jean, Basque lawn-tennis player, born in Biarritz; member of French team in Davis Cup contest, U.S.A., 1925; played in Finals of the Cup 1933. Men's Singles champion at Wimbledon 1924 and 1926; won Men's Doubles (with J. Brugnon) in 1932 and 1933. Many years Singles champion of France. Decorated with the Legion of Honour 1930. A volatile and very popular player. (1898-).

Borough, in Scotland **Burgh**, is in its town, modern sense primarily a town that sends a representative to Parliament; but it is further an area of local government, under a mayor and corporation, exercising police, sanitary, and sometimes educational supervision, and deriving its income from rates levied on property within its bounds, and in Scotland sometimes from "common good" and petty customs. Its charter may be held from the Crown or granted by Parliament.

Boroughbridge, a market town of Yorkshire, England, 10 m. N. of Harrogate. Here Edward II. defeated his uncle, Earl of Lancaster. Three huge monoliths near by are known as "The Devil's Arrows." Pop. 800.

Borromean Islands, four islands in Lake Maggiore, Italy, of which three were converted into gardens by Count Borromeo in 1671, on one of which, Isola Bella, stands a palace of the Borromeos, enriched with fine paintings and other works of art.

Borromeo, St. Carlo, cardinal and Archbishop of Milan, a prominent member of the Council of Trent, who contributed to the Tridentine Catechism; conspicuous by his self-sacrificing offices during a plague in the city of which he was the archbishop; canonised by Pope Paul V. in 1628. (1538-1584).

Borromeo, Frederigo, Count, nephew of the preceding, of equal status in the Church, and similar character. Founder of the Ambrosian Library. (1564-1631).

Borrow, George Henry, traveller and philologist, born in Norfolk; early showed a passion for adventure and a facility in languages; was appointed agent for the Bible Society in Russia and Spain; in his fondness for open-air life, associated much with the gipsies; wrote an account of those in Spain, and a famous book, entitled *The Gipsies in Spain*; also *The Itinerary of a Gipsy* (a gipsy designation applied to him, meaning "word-master") which is chiefly autobiography, *Wild Wales*, and a *Word-book of English-Gypsy*. (1803-1881).

Borrowstouness, or **Bo'ness**, a Lothian, Scotland, on the Firth of Forth. Shipbuilding, coal-mining, iron-smelting, brewing, soap-making, and salt-refining are carried on, and there is a brisk coastal trade. Pop. 10,000.

Borsippa (mod. *Birs-Nimrud*), an ancient Babylonian city, the temple-tower of which, rebuilt later by Nebuchadnezzar II., may have been the Tower of Babel. Excavations on the site have revealed many antiquities.

Borstal, a system of reformatory schools for youthful offenders. The system was first tried in Borstal, Kent, hence the name. In 1908 Parliament passed the "Borstal" Act, so called, under which convicted juveniles between 16 and 21 may be sent to one of the four institutions (one of them for girls) and dealt with by a specially chosen staff of officials with the idea of reclamation. Two-thirds of the cases respond to this treatment. Duration of detention is 2 to 3 years.

Borzoi, a dog of the greyhound variety. It is of elegant, aristocratic appearance with a long and silky coat. Points of the breed are: head long and bent, ears small, muscles highly developed, back arched, forelegs lean and straight, hindlegs long and muscular, tail long and well feathered. Its height is from 27-32 in.

BORZOI

Bosboom, Jan, Dutch painter who specialised in local landscapes and church interiors. Married (1851) Anna Louisa Bosboom-Toussaint (1812-1886), a Dutch historical novelist. (1817-1891).

Boscastle, a small seaport of N. Cornwall, England, a popular holiday resort, with a little sheltered harbour. A hill near by is the site of a Norman castle. Pop. 4,000.

Boscawen, Sir Edward, a British admiral, known from his fearlessness as "Old Dreadnought"; distinguished himself in engagements at Puerto Bello, Cartagena, Cape Finisterre, and the Bay of Lagos, where, after a "sea hunt" of 24 hours, he wrecked a fine French fleet, eager to elude his grasp. (1711-1761).

Boscobel, a parish of Shropshire, England, 7 m. from Wolverhampton, the manor house of which sheltered Charles II. after his defeat at Worcester.

Bose, Sir Jagadis Chandra, a distinguished Indian botanist, devoted himself to the study of the nervous system in plants and obtained many remarkable results. Founder of Bose Research Institute, Calcutta. Fellow of the Royal Society. Knighted, 1917. (1858-1937).

Bosna-Serai, the Turkish name of Bosnia and Herzegovina.

Bosnia and Herzegovina, since part of Yugoslavia, lying at the NW. of the Balkans and adjoining Croatia and Slavonia on the N. Formerly part of Turkey in Europe, in 1908 the district was annexed by Austria-Hungary. Sarajevo, the capital of the district, was the scene of the assassination in June 1914 of the Archduke Francis Ferdinand and his consort, an event leading directly to the outbreak of the World War.

Bosphorus, or **Bosporus**, (1) (Ox-ford) a channel 18 m. long, from 1 to 3 m. broad, and averaging 30 fathoms deep, extending from the Sea of Marmara to the Black Sea. It derives its name from the channel which, according to the Greek myth Ixion crossed in the form of a black cow. By a treaty of 1841 all warships except Turkish were excluded. In 1918 it was demilitarised. In 1936 a new Straits Convention was ratified permitting remilitarisation by Turkey. (2) Ancient name for the Straits joining the Black Sea with the Sea of Azov.

Boss, an architectural term for a round, slightly raised ornament used to disguise the joints of ribs in ceilings. Later it became the central ornamentation of a ceiling.

Bossuet, Jacques Bénigne, Bishop of Meaux, born at Dijon, one of the greatest of French pulpit orators, and one of the ablest defenders of the doctrines of the Catholic Church; took a leading part in establishing the rights of the Gallican clergy, or rather of the Crown, as against the claims of the Pope; proved himself more a time-server than an outspoken champion of the truth; and he is not clear of the guilt of the Revocation of the Edict of Nantes; wrote largely; his *Discourse on Universal History* is on approved lines, and the first attempt at a philosophy of history; his *Funeral Orations* are monuments of eloquence; his *Politique Sacrée* founded on Holy Scriptures a defence of the divine right of kings. (1627-1704).

Boston, a seaport of Lincolnshire, SE. of Lincoln; exports coal, machinery, corn, and wool, and imports timber and general goods. There is a large cattle and sheep market, also canvas and sailcloth works. Fox, the martyrologist, was a native. It has a spacious church, which is a conspicuous landmark and beacon at sea. Pop. 17,000.

Boston, on Massachusetts Bay, is the capital of Massachusetts, U.S.A., and the chief city of New England. With an excellent harbour and eight converging railways it is an emporium of trade, and very wealthy. Sugar, wool, hides, and chemicals are imported; farm produce, cattle, cotton, and tobacco exported; boot- and shoe-making is one of many varied industries. The many educational institutions and its interest in literature and art have won for it the title of American Athens. Among famous natives were Franklin, Poe, and Emerson; while most American men of letters have been associated with it. Among its historically famous buildings are Faneuil Hall, called the "Cradle of Liberty" from the fact that the revolutionaries assembled there, Old State House, and Old North Church. The Boston riots of 1770 and 1773 were the heralds of the revolution, and the first battle was fought at Bunker Hill, not far off, now included in it. Pop. 781,000.

Boston Orators, a school of Orators in America at the time of the American War of Independence and after. The style of oratory was formal and the speeches were charged with sincere convictions. Daniel Webster was the most famous exponent of this school.

Boston Tea-Party, the insurgent American colonists who, disguised as Indians, boarded, on Dec. 16, 1773, three English ships laden with tea, and hurled several hundred chests of it into Boston harbour.

Boswell, James, the biographer of John-son, son, born in Edinburgh, showed early a penchant for writing and an admiration for literary men; fell in with Johnson on a visit to London in 1763, and conceived for him the most devoted regard; made a tour with him to the Hebrides in 1773, the *Journal* of which he afterwards published; settled in London, and was called to the English Bar; succeeded, in 1782, to his father's estate, Auchinleck, in Ayrshire, Johnson dying in 1784. *Boswell's Life* of him appeared five years after, a work unique in biography, and such as no man could have written who was not a very ardent hero-worshipper. He succumbed in the end to intemperate habits, aggravated by the death of his wife. (1740-1795).

JAMES BOSWELL

Bosworth, a town in Leicestershire, England, near which Richard III. lost both crown and life in 1485, an event which terminated the Wars of the Roses and led to the accession of the Tudor dynasty to the throne of England in the person of Henry VII.

Botanic Garden, a garden laid out in aid to the study of botany. The equipment includes hothouses where tropical plants may be grown under the conditions in which they thrive when wild. Probably the finest and best known in the world are the Kew Botanic Gardens, which were planned in 1780. Since 1841 Kew Gardens have become a centre for the distribution of commercial plants to new areas in the colonies, two of the most important examples of this work being the introduction of quinine to India, and of Para rubber to the Malay states.

Botany, the scientific study of plants. In ancient times and the Middle Ages botany was studied very largely for the sake of medicinal substances derived from plants, and though much careful observation was made, there was no successful attempt at a systematic classification. After the Renaissance the study of botany was revived in Europe by such men as Fuchs, Cesalpini, Gerard, and Ray; but the first scientific classification of plants was made by the Swedish botanist Carl von Linné, better known as Linnaeus (1707-1778). His system was based upon the nature of the "sexual" organs of flowers—that is, their stamens and pistils—it proved of inestimable value in the development of botany, but has now been superseded by a system in which account is taken of other important features of plants as well.

To Linnaeus is due also the credit of having introduced the binomial system of nomenclature, according to which every plant has both a "family" or generic name, and a specific name—e.g., the botanical name of the creeping buttercup is *Ranunculus repens*, indicating that it is the creeping species of the genus *Ranunculus*.

At the present day the chief groups or phyla of the plant kingdom are described as follows: *Schizophyta* (e.g., bacteria); *Thallophyta* including Algae (seaweeds, diatoms, etc.) and Fungi (moulds, mildews, mushrooms, toadstools, etc.); *Bryophyta*, including Hepaticae or liverworts and Musci or mosses; *Pteridophyta*, including Filicales or Equisetals or horsetails, and Lycopodia club-mosses; and *Spermophyta*, including Gymnosperms—e.g., conifers, and sperms. The Spermophyta are still referred to as the Phanerogams, because their (wrongly named) sexual reproduction is comparatively "hidden"—i.e., less obvious.

The principal branches of botany are *morphology* (the study of the forms of plants, whether living or extinct), *physiology* (the study of the chemical and physical changes occurring in plants, the reaction of plants to stimuli, and so on), *ecology* (the study of plants in relation to their surroundings, plant associations, etc.), *phytopathology* (the study of the diseases of plants), and *genetics* (the study of heredity and plant breeding). Applied botany is practised in horticulture, agriculture, afforestation, the production of special crops, and the control of plant pests.

The typical flowering plant consists of root, stem, leaves, and flowers. The flower consists usually of four whorls—viz., the calyx or sepals, the corolla or petals, the androecium or stamens, and the gynoecium or pistil. The stamens produce pollen which, transferred to the pistil by insects, wind, or other agency, fertilises the ovules or potential seeds and converts them into actual seeds. The transference of pollen to pistil is called pollination.

The study of heredity in plants was greatly advanced by Charles Darwin's book *The Origin of Species* (1859) and by the work of later investigators such as Mendel and Bateson. The application of the principles so discovered has led to the production of new and valuable strains—as, for example, in wheat.

Botany Bay, an inlet in New South

Wales, 5 m. S. of Sydney; discovered by Captain Cook in 1770; so called, by Sir Joseph Banks, from the variety and beauty of its flora; convict settlement at Sydney, known by the name, abolished in 1840.

Botfly, a large, hairy

insect, order Eristidae, the larva of which is parasitic mammals. One species, *Gastrophilus equi*, the gadfly of the horse, lays its eggs on the horse's coat. They are licked off and pass into the horse's stomach, where the larvae remain, finally being passed out. Another species, *Estrus ovis*, develops in the nasal organs of the sheep.

Botha, General Louis, South African statesman. One of the leading Boer generals in the South African war; he became first Prime Minister of the Transvaal in 1907 and of the Union in 1910. He took up his military career again in 1914 and led the South Africans against the German colonies, besides stamping out a rebellion fomented by Germany. He attended the 1919 Peace Conference. (1862-1919).

Bothnia, a former province of Sweden, divided into E. and W. by a gulf of the name. The eastern part is now included in Finland and the western is the Swedish province of Norrland.

Bothnia, Gulf of, a large inlet, part of the Baltic Sea, dividing Sweden from Finland. The Åland Is. stand at the entrance. It is some 400 m. long and 140 m. broad.

Bothwell, a village in Lanarkshire, Scotland, on the Clyde, 8 m. S.E. of Glasgow; scene of a battle between Monmouth and the Covenanters in 1679. Near is the ruin of a great Norman castle.

Bothwell, James Hepburn, Earl of, one of the envoys sent in 1560 to convey Mary Queen of Scots, from France home; was made Privy Councillor the year after; had to flee to France for an act of conspiracy; was recalled by Mary on her marriage with Darnley; was a great favourite with the queen; was believed to have murdered Darnley, though when tried was acquitted; carried off Mary to Dunbar Castle; was pardoned and made Duke of Orkney, and married to her at Holyrood; parted with her at Carberry Hill; fled to Norway, and was kept captive there at Malmø; after ten years of misery he died, insane, it is believed. (c. 1536-1578).

Botley, a parish and railway junction of Hampshire, England, on the Hamble, 8 m. N.E. of Southampton. Here William Cobbett lived. Strawberries and other fruit are cultivated. Pop. 1,000.

Botocudos, a wandering wild tribe in the forests of Brazil, near the coast; a very low type of men, and at a very low stage of civilisation; are demon-worshippers, and are said to have no numerals beyond one.

Botosani, a town of Rumania and a province of the same name, 50 m. distant from Czernowitz. Pop. 30,000.

Bo-Tree, a species of *Ficus* (*F. religiosa*), also known as the Peepul tree, sacred to the Buddhists as the tree under

which Buddha sat when the light of life first dawned on him. It is found in wet tropical forests. The leaves have a long apex from which rain drops rapidly. See Buddha.

Botticelli, Sandro or Alessandro, a celebrated painter of the Florentine school; began as a goldsmith's apprentice; a pupil of Fra Lippo Lippi; the best-known examples of his art are on religious subjects, though he was no less fascinated with classical-mythological conceptions; is distinguished for his attention to details and for delicacy, particularly in the drawing of flowers. His "Fortitude" is in the Uffizi gallery; his still more famous "Primavera," painted for his patron Lorenzo de Medici, was finished in 1478; and other great pictures are "The Birth of Venus," "The Magnificat" and "The Annunciation." (1447-1510).

Bottomry Bond, a method of the bottom of a ship (i.e., the ship itself) is pledged as mortgage against a loan. The lender has first claim for the return of his loan, but has no claim if the ship is lost. Bottomry bonds date back to the Roman Empire and have continued up to the present day, although now rarely used.

Botulism, a very dangerous kind of poisoning, usually fatal. It has been traced to a microbe which can live without oxygen, so can be present in food preserved in tins and jars. It is a rare disease, and the symptoms are nervous, and not gastric, and fever is absent.

Bouches-du-Rhône, a dept. of S. France, at the mouth of the Rhône, with a Mediterranean seaboard of 120 m. Salt is obtained; wheat, olives and vines are grown and coal and iron mined. Cap. Marseilles. Area 2,025 sq. m. Pop. 1,225,000.

Boucicault, Dion, actor, dramatic writer, and author of popular Irish plays, e.g., *The Colleen Bawn* (adapted from Gerald Griffin's *Collegians* and produced by him) and *The Shaughraun*. (1822-1890).

Boufflers, Marquis de, marshal of France, of Namur (1695) and of Lille (1708), and his masterly retreat from Malplaquet. (1645-1711).

Bougainville, Louis Antoine de, a French navigator, born in Paris; voyaged round the world, which occupied him two years and a half; his travels as described by him in *Un Voyage autour du Monde* had a remarkably stimulating effect on the imaginations of the "philosophes." (1729-1811).

Boughton, George Henry, R.A., illustration painter, and genre and landscape painter, born near Norwich, son of a farmer, was taken as an infant to America. Without teaching, able to exhibit at American Art Union's Exhibition. In Paris 1860-1862, thenceforward in London. R.A., 1886. Two chief subjects: peasant-life in Brittany and Holland; New England history. Illustrated Washington Irving and Hawthorne. (1833-1905).

Boughton, Rutland, English composer, born at Aylesbury. Projected an Arthurian cycle, items of which are: *The Birth of Arthur*, *The Round Table*, and *The Queen of Cornwall*. In this connection, founded, 1914, Glastonbury Festival School of Music-Drama: Most famous works *The Immortal Hour* and *Behlehem*. Awarded a Civil List pension in 1938. (1878-).

Bouille, Marquis de, a French general, born in Auvergne, distinguished in the Seven Years' War, in the West Indies and during the Revolution; favoured the flight of Louis XVI.; did his utmost for royalty,

CAPTAIN COOK

failed, and quitted France; died in London, and left *Memoirs of the French Revolution*. (1739-1800).

Bouillon, district in Belgium, originally a German duchy; belonging to Godfrey, the crusader, who pledged it to raise funds for the crusade. Now the name of a small fortified town in the province of Luxembourg, Belgium.

Boulanger, Jean Marie, a French general, born at Rennes; of note for the political intrigues in which he was involved during the last years of his life, and the dangerous popular enthusiasm which he excited; accused of treason; fled the country, and committed suicide at Brussels. (1837-1891).

Boulder, a mining town of W. Australia, 350 m. N.E. of Perth. It stands on the Kalgourlie gold field. Pop. 7,000. Also a gold mining town of the same name in Colorado, U.S.A. Pop. 11,000.

Boulder Clay, the clayey material containing rocks and stones, which forms the deposits of the Pleistocene Age. It was formed as a result of glacial action during the Ice Ages.

Boulder Dam, U.S.A., a dam of the Colorado R. at Black Canyon, the purpose being to store up a vast quantity of water sufficient to maintain irrigation of about 2,000,000 acres. The dam is over 700 ft. above the bed of the river and raises the level of the water some 600 ft. It was begun in 1933 and was completed in 1936.

Boulders, Erratic, the name applied to boulders that differ in composition from the rocks or soil amongst which they are lying, and which must have been carried some considerable distance by the action of glaciers. The boulders themselves are large rounded blocks of stone. They are larger as they near the poles.

Boulevard, a word similar in derivation to the English "bulwark," referred originally to the fortifications of a town, later to walks constructed along dismantled fortifications and shaded by trees; hence any street lined with trees. The long line of streets of this kind stretching across Paris are in particular known as "the Boulevards."

Boulogne-sur-Mer, a fortified seaport in France, on the English Channel, in the dept. of Pas-de-Calais, one of the principal ports for debarkation from England; where Napoleon collected in 1803 a flotilla to invade England; is connected by steamer with Folkestone, and a favourite watering-place; the chief station of the North Sea fisheries; is the centre of an important coasting trade. It was used as a port of landing for part of the British Expeditionary Force and by British troops throughout the Great War. Pop. 52,000.

Boulogne-sur-Seine, France, a town of the right bank of the Seine, 5 m. S.W. of Paris, from which it is separated by the Bois-de-Boulogne. Produces chemicals, linen and aeroplanes. Pop. 97,000.

Boult, Sir Adrian Cedric, D.Mus., musical conductor, born at Chester. Became well known as conductor of Royal Philharmonic Society's concerts, 1918-1919. On staff of Royal College of Music, 1919-1930, for long conductor of its orchestra. Conductor, Birmingham City Orchestra, 1924-1930. Musical director of B.B.C. Knighted 1937. (1889-).

Boulton, Matthew, an eminent engineer, born in Birmingham; entered into partnership with James Watt, and established with him a manufactory of steam-engines at Soho, on a barren heath near his native place; contributed to the improvement of the coinage. (1728-1806).

Bounty, a grant paid by a government industry to encourage production and export, to further development, and to enable those engaged to compete successfully with foreign industries of the same nature. A bounty on growing corn existed in England for over a century, being granted as far back as 1688. The industry which since the Great War has been developed most notably as the result of a bounty is the growing of sugar-beet and the manufacture of beet-sugar. During the "economic war" with England, Mr. de Valera made use of bounties to enhance the price of Irish agricultural produce.

Bounty, Mutiny of the, a mutiny which took place on the ship *Bounty*, on April 28, 1789, bound from Tahiti to the West Indies, on the part of 25 of the crew, who returned to Tahiti after setting the captain (Bligh) adrift with others in an open boat. Bligh (q.v.) reached England after a time, his report leading to the seizure at length of certain of the offenders and the execution of others. Those who escaped founded a colony on Pitcairn I.

Bourbon, a family of French origin, hailing from Bourbonnais, members of which occupied for generations the thrones of France, Naples, and Spain, and who severally ruled their territories under a more or less overweening sense of their rights as born to reign. Two branches, both of which trace back to Henry IV., held sway in France, one beginning with Louis XIV., eldest son of Louis XIII., and the other, called the Orleans, with Philip of Orleans, second son of Louis XIII., the former ending with Charles X. and his family, and the latter ending with Louis Philippe and his line. The branches of the family ruling in Spain and Naples began with Philip V., grandson of Louis XIV., the former branch ending with the flight of Alfonso XIII. in 1931, the latter ending with Francis II. in 1860.

Bourbon, Charles de, styled the Conqueror, immense wealth by the death of an elder brother and by his marriage, and lived in royal state; was for his daring in the field named Constable of France by Francis I.; offended at some, perhaps imaginary, injustice Francis did him, he clandestinely entered the service of the Emperor Charles V., defeated the French at Pavia, and took Francis captive; parted from Charles, laid siege to Rome, and fell in the assault, mortally wounded, it is said, by Benvenuto Cellini. (1490-1527).

Bourbonnais, an ancient province in the centre of France, being the duchy of Bourbon; united to the crown in 1531; cap. Moulins.

Bourchier, Arthur, English actor-manager born in Berkshire. Educated at Christ Church, Oxford. Founded O.U.D.S. Acted with Wyndham and George Alexander and in America with Ada Rehan. Managed Garrick Theatre, 1900-1910 and 1912-1913. Was the king in Tree's production of *Henry VIII.* (1863-1927).

Bourdaloue, Louis, a French Jesuit, born at Bourges; one of the most eloquent pulpit orators of France; did not suffer by comparison with Bossuet, his contemporary, though junior. His sermons are ethical in their matter from a Christian standpoint, carefully reasoned, and free from ornament, but fearless and uncompromising. (1632-1704).

Bourrée, a dance form popular in Auvergne, France, and in N. Spain; also the name of a musical movement commonly used in a suite by earlier composers.

Bourg-en-Bresse, a railway centre, of Ain, France. It has some manufactures and a trade in grain, cattle, etc. The Church

of Notre-Dame is chiefly in the Renaissance style. The Church of Brou, a suburb, is a fine specimen of late Gothic. Pop. 23,000.

Bourgeois, **Leon Victor Auguste**, French statesman. Prefect of Police, 1887; Deputy (Seine) and Under-Secretary for Interior, 1888; Minister of Public Instruction, 1890; of Justice, 1892; Senator, 1906. Minister for Foreign Affairs, 1906. Member of Permanent Court of Arbitration, Hague, 1903. Chairman, drafting-committee to form League of Nations, 1919. (1851-1925).

Bourgeoisie, the name given in France to the middle class, professional people, and merchants, as distinguished from the nobles and the peasants, but applied by the Socialists to the capitalists as distinct from the workers.

Bourges, a French town in the dept. of Cher; birthplace of Louis IX. and Bourdieu. Has a military arsenal. Seat of an archbishop. Notable for the Cathedral of St. Etienne. Pop. 36,000.

Bourget, **Paul**, an eminent French novelist and essayist, born at Amiens of a Russian father, a subtle analyst of character, with a clear and elegant style, his novels are what he called "psychological," and distinct from the romanticist and naturalistic. His *Mensonges* brought him fame, and his critical studies, *Essais* and *Essais de Psychologie Contemporaine*, are notable for their keen analysis. Other notable works include *Cruelle Enigme*, *André Cornélis*, *L'Étape*, etc. (1852-1935).

Bourget, **Le**, village of France, in the dept. of Seine, 5 m. N.E. of Paris, an important military and civil airport. Pop. 6,500.

Bourlon Wood, near Cambrai, in France, was a point of great strategic importance during the Great War. It was captured by General Byng, in a surprise attack without preliminary bombardment, in Nov. 1917. Only a few days later, however, the Germans compelled the British to evacuate the position.

Bourne, a market town of Lincolnshire, England, in the Parts of Kesteven. Hereward the Wake had a castle here. Pop. 5,000.

Bourne, **Francis**, cardinal, born at Clapham, son of a postal official. Was a curate at Blackheath and Mortlake, became Bishop of Southwark in 1897. In 1903 he succeeded Cardinal Vaughan as Roman Catholic Archbishop of Westminster. Cardinal 1911. (1861-1935).

Bourne, **Hugh**, founder of the Primitive Methodists, and a zealous propagator of their principles; he was a carpenter, and appears to have wrought at his trade while prosecuting his mission, which he did extensively both in Britain and America. (1772-1852).

Bournemouth, a town in Hampshire, England, on Poole Bay, 37 m. SW. of Southampton, with a fine sandy beach; a great health resort; is of recent, and has been of rapid growth. Notable for its Pavilion and gardens, its chimes, the Russell-Cotes Museum and Undercliff Promenade. Pop. 118,000.

Bournville, a garden city of Worcestershire, England, 4 m. SW. of Birmingham, built by George Cadbury to house employees of his firm.

Bourrienne, **Louis Antoine Fauvelet**, a school friend, born at Sens; held the post for five years, but dismissed for being implicated in disgraceful money transactions; joined the Bourbons at the Restoration; the Revolution of 1830 and the loss of his fortune affected his mind, and he died a lunatic at Caen; wrote *Mémoires* disparaging to Napoleon. (1769-1834).

Bourse, the French name for what in London Stock Exchange. Most Continental Stock Exchanges have now taken the name; the most important besides Paris, being Berlin, Frankfurt, Amsterdam, Brussels, Zurich and Geneva. The word is derived from the Latin, *bursa*, meaning "a purse."

Boussa (or Bussa), a town in N. Nigeria, where Mungo Park, the explorer, in 1806, lost his life as he was going up the Niger. Pop. 11,000.

Bouvet Island, in the Southern Ocean, uninhabited, but used as a whaling-station, possession of which lies with Norway after being disputed with England.

Bouvines, a village of France, in the dept. of Nord, between Lille and Tournai. Here in 1214 Philip Augustus of France defeated the combined armies of the Emperor Otto IV. of Germany and King John of England. Pop. 600.

Bovey Tracey, a village of Devon, England, its church said to have been built, in penance, by a murderer of Thomas a Becket. A local clay is used to make pottery. Pop. 3,000.

Bovidae, a sub-family of mammals of the order Ungulata. It includes the different species of antelopes, gazelles, sheep, goats, and oxen. Various species are native to all parts of Europe, Asia, and Africa. They are all artiodactylate. The horns of the males are hollow. There are nearly 50 genera and some 200 species.

Bow, or **Scrattford-le-Bow**, a district of E. London, in the borough of Poplar. With Bromley it returns a member to Parliament. Bow (in full, St. Mary-le-Bow) Church in Cheapside is a Wren church, with the famous Bow Bells in the steeple.

Bowdler, **Thomas**, an English physician; edited expurgated editions of Shakespeare and Gibbon in the interest of moral purity; added in consequence a new term to the English language, Bowdlerism. (1754-1825).

Bowdoin, **James**, an American statesman, born in Boston of French extraction; a zealous advocate of American independence; author of *Discourse on the Constitution of the United States*. Also interested in scientific research. (1726-1790).

Bowel, one of the divisions of the alimentary canal below the stomach. The word is rarely found in the singular except in medical use. In the plural it means intestines or entrails.

Bower-Bird, a family of birds (Ptilonotidae), closely

allied to the crows and the Birds of Paradise, found in Australia and New Guinea. The birds of all species except one (the Green Cat-Birds) clear a piece of ground, in which both sexes meet to play and court, and ornament it with shells, stones, flowers, and bright objects. These bowers may be distant from the nests, which are built in trees.

BOWER-BIRD

Bowie-knife, an American hunting-knife invented by Col. James Bowie. The point is double-edged, and the blade then straight and single-edged to the hilt. It has a cross-piece and strong handle.

Bow-legs, a condition in which the legs are bowed outwards. Frequently the whole leg is bowed, the knees being widely separated and the ankles touching, though the curvature may be of

the shin bones only. One leg only may be affected. It is sometimes congenital, though more often it is caused by the weight of the body being placed on the legs at a time when they are not strong enough to support it, as, e.g., in the case of a heavy child starting to walk too early, or after rickets, when the bones are weakened. Treatment is by keeping the child off its feet, and, in the case of rickets, by attention to diet.

Bowles, William Lisle, an English poet, born in Northamptonshire; his sonnets were much admired by Coleridge, and their appearance is believed to have inaugurated a new era in English poetry, as developed in the Lake School. (1762-1850).

Bowling, an indoor game played with wooden balls, ten wooden pins in alleys 41 ft. wide by 80 ft. long. The object is to knock down the pins by rolling the balls. The usual game is 3 balls to a player though in first-class play two only are used. Balls may not exceed 27 in. in circumference and 16½ lb. in weight, three balls to a frame and ten frames a game. The number of players is unlimited. The game is of German origin, but is most popular in the U.S.A., where it was introduced by Dutch immigrants.

Bowls, one of the oldest and most popular of English outdoor games. It is played on a green of about 40 sq. yds, which is divided into strips (rinks) of about 20 ft. in width. The bowls or "woods" made of hignum vitae, are from 4½ to 5½ in. in diameter, and not more than 3½ lb. in weight. They are biased—i.e., slightly more convex on one side than the other—and should draw about 6 ft. in 30 yds. The "jack," an earthenware ball of 2½ to 2¾ in. diameter, is placed by bowling towards the end of a rink and the player endeavours to bring his woods to rest nearer to the jack than his opponent. Each player uses 4 woods in a single-handed game and only 2 in matches. 21 points or 81 ends is the usual match game. Henry VIII. was an exponent, and Francis Drake played at it just before the arrival of the Armada.

Bowness, a town and pleasure resort of Lake Windermere, Westmorland, England, on Lake Windermere. Pop. 3,000.

Bowring, Sir John, linguist and political writer, born at Exeter; friend and disciple of Bentham, as well as editor of his works; first editor of *Westminster Review*; was an M.P. (1835-1837 and 1841-1849); became Governor of Hong-Kong; ordered the bombardment of Canton, which caused dissatisfaction at home. (1782-1872).

Bow Street, in W.C. London, with a famous police station which owes its origin to Col. Sir Thomas de Veil, who, being on the Commission of the Peace as an acting justice, established himself in a house in Bow Street in 1735, and became first of the Bow Street magistrates. The post was next held by Henry Fielding, the novelist, who organised the first body of constables.

Up to 1829 the functions of the Bow Street magistrate included executive responsibilities which are now vested in the Commissioner of the Police of the Metropolis. Extrajudicial warrants under the Foreign Jurisdiction Acts are issued at this court. Many famous criminals have appeared and have been committed for trial by the Bow Street magistrates.

Box, a small evergreen shrub of the genus *Buxus* (order Buxaceae). Some varieties are of very great value for commercial purposes—e.g., in turning, the manufacture of musical instruments, etc., *B. sempervirens*, a slow-growing shrub, is widely cultivated in England as a border-plant in gardens. It lends itself to topiary work.

Box-Elder, the name applied in parts of maple, of the U.S.A. to a species

Boxer Rising, The, an outburst of feeling in China, which broke out in riots in 1900. The *Empress* was largely in sympathy with the rioters, who besieged the legations in Peking, and attacked Europeans, especially missionaries. European troops and naval forces were sent out to end the trouble.

Box Hill, a height of the North Downs, in Surrey, England, 1 m. N. of Dorking, a famous beauty spot, vested in the National Trust, part is open downland, part heavily wooded, there being many box trees.

Boxing, fighting with the fist as a form of exercise or sport, has been practised from the earliest times. In ancient Greece and Rome a glove was used. At first this consisted of strips of hide bound round the hand as a protection against injury.

Later a pad of thick leather round the knuckles was used, and when this came to be loaded with lead, as it sometimes was, it became a terrible and often fatal weapon.

In England the history of boxing goes back to the early 18th Century, when bare-knuckle fighting became popular, gloves being used only in practice. The brutality of this prize-fighting resulted in legislation against it, and though it survived for many years in spite of police action, it was eventually superseded by the present form of the sport.

The rules of present-day boxing are based on those first drawn up by the Marquis of Queensberry in 1867, and the conduct of professional boxing contests is controlled by the British Board of Boxing Control, while amateur boxing is directed by the Amateur Boxing Association. Contests are either for a certain number of rounds for a score of points, or to a finish by a knock-out (K.O.), or until one of the combatants retires.

A round lasts three minutes, with one minute rest between rounds for the shorter bouts, and a longer interval between the later rounds of lengthier contests. Gloves of not less than 6 oz. must be worn. Foul blows include those below the belt or with the open glove. The principal weights are bantam, light, middle, heavy, and welter (or any weight). After the Great War a great revival in interest in boxing took place.

Boxmoor, an ecclesiastical district of Hertfordshire, England, 2 m. SW. of Hemel Hempstead. Here Roman remains have been found. Pop. 7,000.

Box Thorn (*Lycium*), a genus of the order Solanaceae. They are allied to the deadly nightshade, and bear small purple flowers followed by scarlet or orange berries. *L. afrum* is a native of the Cape of Good Hope, where it is used as a hedge-plant. It grows to a height of 10 ft., and was introduced into Britain in 1712. *L. halimifolium* (*Europerum*) is a native of S.E. Europe and Asia; *L. Chinense* (*barbarum*), or Chinese Box-tree is the so-called Cottage Tea-plant.

Boyers, the old nobility of Russia, whose undue influence in the State was broken by Peter the Great; also the landed aristocracy of Rumania.

Boy Bishop, a boy chosen on Dec. generally out of the choir, to act as bishop until Dec. 28, Holy Innocents Day, and do all his episcopal duties, except celebrate Mass. For the term of his office was treated as bishop, and if he died during his tenure of it was buried with episcopal honours. The

ROMAN BOXING-GLOVE

term of office was limited in 1279 to 24 hours, and the custom of the election abolished in Elizabeth's reign.

Boyce, William, composer, chiefly of church music, born in London; published a collection of the *Cathedral Music of the Old English Masters*; composed *Hearts of Oak*, a naval song sung by ships' crews at one time before going into action. (1710-1779).

Boycotting, is an offence under the Crimes Act, 1887. It is a method of coercion by conspiracy whereby all dealings with an individual, company or group cease. It was first adopted against Capt. C. C. Boycott of Co. Mayo in 1880. Boycotting has become an instrument in international warfare.

Boyd, Andrew Kennedy Hutchison, a Scottish clergyman and writer; educated for the Bar, but entered the Church; known to fame as A.K.H.B.; author of *Recreations of a Country Parson* and of *Reminiscences* of his life. (1825-1899).

Boyd, Zachary, a Scottish divine; regent of a Protestant college at Samur, in France; returned to Scotland in consequence of the persecution of the Huguenots; became minister of Barony Parish, Glasgow, and rector of the University; preached before Cromwell after the battle of Dunbar; author of the *Last Battell of the Soule in Death* and *Zion's Flowers*, being mainly metrical versions of Scripture, called *Boyd's Bible*. (1585-1653).

Boydell, John, an English engraver and print-seller, famous for his *Shakespeare Gallery*, with 96 plates in illustration of Shakespeare, and the encouragement he gave to native artists; he issued also Hume's *History of England*, with 196 plates in illustration. (1719-1804).

Boyer, Jean Pierre, president of Hayti, born at Port-au-Prince of a negress and a Creole father; secured the independence of the country; held the presidency for 25 years from 1818, but was driven from power by a revolution in 1843; retired to Paris, where he died. (1776-1850).

Boyle, Richard, first and great Earl of Cork, distinguished among Irish patriots and landlords for what he did to improve his estates and develop manufactures and the mechanical arts in Ireland, also for the honours conferred upon him for his patriotism; when Cromwell saw how his estates were managed he remarked that had there been one like him in every province in Ireland rebellion would have been impossible. (1566-1643).

Boyle, Robert, a distinguished natural philosopher, born at Lismore, of the Orrery family; devoted his life to science and contributed greatly to it, especially chemistry and pneumatics; was one of the originators of the Royal Society; showed that an acid combined with a base to form a salt; enunciated Boyle's law (q.v.); was the first to prepare methyl alcohol; author of *The Skeptical Chymist*. (1627-1691).

ROBERT BOYLE

Boyle Lectures, the lectureship founded by Robert Boyle in 1691, and held for a tenure of three years, the endowment being £50 per annum; the lecturer must deliver eight lectures in defence of Christianity, and some of the most eminent men have held the post.

Boyle's Law, that the volume of a gas varies inversely as the pressure, if the temperature remains constant.

Boyne, a river in Ireland (Eire), which flows through Meath into the Irish Sea; gives name to the battle in which

William III. defeated the forces of James II, on July 1, 1690.

Boys' Brigade, The, an organisation founded in 1883 in Glasgow by Sir William Smith, aiming at the development of character and discipline on a religious basis. Numbers about 100,000 officers and boys, between ages 13-18.

Boy Scouts, an international organisation founded by Lord (then Sir Robert) Baden-Powell in 1908. Its motto is "Be Prepared," and it inculcates principles of citizenship, with instruction in sport, first aid, etc., for which badges are awarded. The movement spread to all parts of the world, and at the coming of age Jamboree at Birkenhead in 1929, 50,000 Scouts from all nations attended. To-day there are about 480,000 Scouts in Great Britain and N. Ireland. Elsewhere in the British Empire there are 390,000. The total membership in all parts of the world exceeds 2,000,000.

Boz, a nom de plume under which Dickens wrote at first, being his nickname when a boy for a little brother.

Brabançonne, La, Belgium's national anthem, written at the time of the revolution, 1830; music by Van Campenhout.

Brabant, in medieval times was an important province of the Low Countries, inhabitants Dutch, cap. Broda; is now divided between Holland and Belgium. It comprises three provinces, the N. or Dutch Brabant; Antwerp, a Belgian province, inhabitants Flemings, cap. Antwerp; and S. Brabant, also Belgian, inhabitants Walloons, cap. Brussels; the whole mostly a plain.

Bracelet, an arm ornament. The custom of wearing bracelets is of great antiquity, and has existed among all nations, both civilised and uncivilised. It is recorded as of Eastern origin, and the Bible has references to the custom. Bracelets were worn by the ancient Egyptians, and were bestowed upon Roman soldiers as a reward for valour. Metals, both base and valuable, wood, ivory, and other materials are all used in the manufacture of the innumerable designs.

Brachiopods, a group of bivalves, especially in the Lower Palaeozoic rocks. There are comparatively few living species, the best known being *Lingula*.

Brachycephalic, the name given to skulls of which the transverse diameter is more than four-fifths of the long diameter. This type of skull (roundhead) is found in the Alpine type of Europeans and distinguishes them from both the Nordic and Mediterranean peoples; a certain proportion of brachycephalic skulls is found among the populations of most of the countries of Central Europe. The roundheaded peoples appear to have been invaders from Central Asia after the Nordic and Mediterranean stocks were settled in Europe.

Bracken, or *Brake*, a common name for *Pteris aquilina*; also known as fern. Grows freely in woods, parks, and by roadsides, covering large areas in temperate regions and spreading rapidly. Its encroachment on hill pastures in Central Scotland, where it grows to a height of over 6 ft., presents a problem. *P. caudata*, of Australasia, is regarded by some as a separate species.

Bract, or *Hypophyll*, in botany, a leaf in the axil of which a flower arises.

BRACT (A-A)

BRADBURY OF WINSFORD

Bradbury of Winsford, Sir John Bradbury, Baron, was an Insurance Commissioner, 1911-1913; Joint Parliamentary Secretary to the Treasury, 1913-1919 (name became familiar through its appearance on first treasury notes); principal British representative at Reparations Commission, Paris, 1919-1925; chairman, National Wood Council, 1925-1929; president, British Bankers' Association, 1929-1930 and 1935-1936. Ennobled, 1925. (1872-).

Braddon, afterwards Maxwell, Mary Elizabeth, novelist, born in London; became famous with *Lady Audley's Secret*, 1862. Married John Maxwell, publisher. Wrote eighty novels; sensational, never great, but possessing the vitality of the Dickensian age. (1837-1915).

Bradford, a manufacturing city of Yorkshire, England, on a tributary of the Aire, 9 m. W. of Leeds; it is the chief seat of worsted spinning and weaving in England, and has an important wool market; coal and iron mines are at hand, and ironworks and machinery-making are its other industries. Created a city in 1897. Pop. 290,000. Also a town in Pennsylvania, U.S.A., with petroleum refineries. Pop. 20,000.

Bradford-on-Avon, a market town of Wiltshire, England, 9 m. S.E. of Bath. It has a Saxon church and other old buildings. Noted for its cloth-making in Stuart times, it now makes beer and rubber goods. Pop. 3,000.

Bradlaugh, Charles, a social reformer on secularist lines, born in London; had a chequered career; had for associate in the advocacy of his views Mrs. Annie Besant; elected M.P. for Northampton three over, but not allowed to sit till he took the oath, which he did in 1886; died respected by all parties in the House of Commons. (1833-1891).

Bradley, Andrew Cecil, literary critic was born at Cheltenham, brother of the philosopher F. H. Bradley. Educated: Cheltenham and Balliol College, Oxford. Fellow of Balliol, 1874; lecturer, 1875-1881. Professor of Modern Literature: University College, Liverpool, 1881-1889; Glasgow University, 1889-1900. Professor of Poetry, Oxford, 1901-1906. Wrote: *Commentary on "In Memoriam," Shakespearean Tragedy, Oxford Lectures on Poetry, A Miscellany*. (1851-1935).

Bradley, Francis Herbert, British philosopher, brother of A. C. Bradley, born in Brecknockshire, educated at Oxford and Fellow of Merton College; author of *Principles of Logic, Appearance and Reality*; awarded O.M. in 1924. (1846-1924).

Bradley, Henry, biographer, born in Manchester. Became known as the authority on place-names. Began editorial work on Oxford Dictionary, 1889. Editor-in-chief on Murray's death, 1915. President, Philological Society, 1890-1893. (1845-1943).

Bradley, James, astronomer, born in Gloucestershire; professor of Astronomy at Oxford, and astronomer-royal at Greenwich; discovered the aberration of light and the nutation of the earth's axis. (1693-1762).

Bradman, Donald George, Australian cricketer, was born near Sydney, N.S.W. No regular training; played in matches for school and town clubs, Bowral. Reached 1st-grade cricket in Sydney for St. George Club, 1926. Played for N.S.W., 1927. In Australian eleven, 1928. At Sydney, 1929-1930, made 452 not out against Queensland. In England, at Leeds, 1930, broke individual record with score of 334. Made 1,000 in May 1930, and in 1938. Captain Australian team Test Matches 1936-1937, and in England in 1938. (1908-).

BRAHMAPUTRA

Bradshaw, George, an engraver of maps in Manchester; published maps illustrative of certain canal systems, and did the same service for railways, which developed into the well-known *Railway Guide*. (1801-1853).

Bradshaw, John, president of the High Court of Justice for trial of Charles I.; a friend of Milton; a thorough republican, and opposed to the Protectorate; became president of the Council on Cromwell's death; was buried in Westminster; his body was exhumed and hung in chains at the Restoration. (1602-1659).

Braemar, a Scottish Highland district, Braemar, SW. of Aberdeenshire; much frequented by tourists, and resorted to for summer country quarters. Castles include Balmoral and Abergeldie. It is famous for its annual Highland games.

Braga, a city, 34 m. N.E. of Oporto, the Primate; the capital of Minho. Pop. 22,000.

Bragança, capital of a district of Trás-os-Montes, in Portugal; gives name to the royal dynasty of Portugal, called the House of Braganza, the eighth Duke of Braganza having ascended the throne in 1640 on the liberation of Portugal from the yoke of Spain. Pop. (town) 5,000; (district) 185,000. Also a seaport in Para, Brazil. Pop. 50,000. There is another town in Brazil of the same name in São Paulo. Pop. 60,000.

Bragg, Sir William Henry, physicist, London. He carried out research on radioactivity and X-rays, his greatest work being in connection with crystal structure, which he investigated by means of X-rays. In 1923 he was appointed Director of the Royal Institution. Awarded (with his son) Nobel Prize for Physics, 1915. K.B.E., 1920. President British Association, 1928. O.M., 1931. (1862-).

Bragi, the Norse god of poetry and eloquence, son of Odin and Frigg; represented as an old man with a long flowing beard and unwrinkled brow, with a mild expression of face; received in Valhalla the heroes who fell in battle.

Brahé, Tycho, a Swedish astronomer, of noble birth; spent his life in the study of the stars; discovered a new star in Cassiopeia; had an observatory provided for him on an island in the Sound by the King, where he made observations for 20 years; he was, on the King's death, compelled to retire under persecution at the hand of the nobles; accepted an invitation of the Kaiser Rudolf II. to Prague, where he continued his work and had Kepler for assistant. (1546-1601).

Brahma, in the Hindu religion and philosophy, the Hindu religion and philosophy, the spirit of the Universe, from which all beings issue and into which they all merge, and as such is not an object of worship, but a subject of meditation; and at another the creator of all things, of which Vishnu (q.v.) is the preserver and Shiva (q.v.) the destroyer, killing that he may make alive.

Brahman, or Brahmin, one of the sacred caste of the Hindus that boasts of direct descent from, or immediate relationship with, Brahma; its members are custodians and mediators of religion, and therefore of high-priestly rank.

Brahmanas, treatises on the ceremonial system of Brahminism, with prescriptions bearing upon ritual, and abounding in legends and speculations.

Brahmaputra (i.e., son of Brahma), a river which rises in Tibet, circles round the E. of the Himalayas, and, after a course of some 1,800 m., joins the Ganges, called the Teampo in Tibet, the Dihong in Assam, and the Brahmaputra in

British India; it has numerous tributaries, brings down twice as much mud as the Ganges, and in the lower part of its course overflows the land, particularly Assam, like an inland sea.

Brahma-Samaj (i.e., church of God), a secession from traditional Hinduism, originated in 1830 by Raja Ram Mohun Roy, and developed by Debendra Nath Tagore and Keshub Chandra Sen; founded on theistic, or rather monotheistic—i.e., unitarian—principles, and the rational ideas and philosophy of Europe, as well as a profession of a sense of the brotherhood of man no less than the unity of God.

Brahminism, the creed and ritual of the social, political, and religious organisation which developed among the Aryans in the valley of the Ganges under the influence of the Brahmins. According to the religious conception of this class, Brahma, or the universal spirit, takes form or incarnates himself successively as Brahma, Vishnu, and Shiva, which triple incarnation constitutes a trimurti or trinity. In this way Brahma, the first incarnation of the universal spirit, had four sons, from whom issued the four castes of India—Brahmans, Kshatriyas, Vaisyas, and Sudras—all the rest being outcasts or pariahs. See *Caste*.

Brahms, Johannes, a distinguished composer, born at Hamburg; of great promise from a boy; settled in Vienna; famous as a performer as well as a composer. (1833-1897).

Braila, a town and river-port of Rumania on the Danube about 100 m. from its mouth. It has a large trade in grain and timber. During the Great War it was occupied by Russians, Germans, and Bulgarians. Pop. 60,000.

Braille, Louis, a blind Frenchman, invented printing in relief for the blind. (1809-1852).

Brain, may be defined as the specialised front end of the central nervous system of vertebrate animals, including man. It consists basically of three regions or vesicles, viz., the prosencephalon or fore-brain, the mesencephalon or mid-brain, and the metencephalon or hind-brain. The fore-brain is divided into the cerebral hemispheres, corpus striatum, olfactory lobes, pineal body, pituitary body, thalamus, and infundibulum; the mid-brain into the optic lobes and crura cerebri; and the hind-brain into the cerebellum and medulla oblongata.

From the brain arise several pairs of cranial nerves, among them being the first or olfactory, the second or optic, the fifth or trigeminal, the seventh or facial, and the eighth or auditory. In man, the hemisphere which constitutes the cerebrum are so large that they hide the remaining portions of the brain, and this condition is found also in the anthropoid apes. The cerebrum is covered by a thin layer (about 3 to 5 mm. in thickness) of grey matter (cerebral cortex); this consists mainly of about 2,000 million nerve-cells, and is the region in which many of the higher mental processes take place. The interior is composed chiefly of white matter or nerve-fibres.

The weight of the human brain shows considerable variation, but at birth is roughly 400 gm., rapidly increasing to nearly its maximum during the first 7 years, and afterwards more slowly up to the age of 18-20. The average weight in an adult male is approximately 1,400 gm. (50 oz.), and in adult females 1,300 gm. (45 oz.), but since the female body is on the whole smaller than

the male, the proportion of brain is roughly the same in both sexes.

Though exceptions are numerous, it is generally true that a large brain accompanies high intelligence, and it is also true that certain areas of the brain have specialised functions; but the pretensions of phrenology find no support in the ascertained facts of brain anatomy. The essentially human characters are associated with the great development of a special area or organ of the cerebral cortex called the neo-pallium. This is not found in the lower vertebrates, and in mammals other than man is present only in a very rudimentary form. Even in the gorilla it is not more than a sixth to a quarter of the size it reaches in man, and since it serves as a unifying centre, correlating the information received from all the sense-organs and issuing commands to the muscles, the great gap in intelligence between even the cleverest ape and the stupidest child is readily understood. The human brain must be regarded as the most complex structure that evolution has produced, though it is not without interest that, in the words of the late Sir Grafton Elliot Smith, "no structure found in the brain of an ape is lacking in the human brain, and, on the other hand, the human brain reveals no formation of any sort that is not present in the brain of the gorilla or chimpanzee."

Braintree, a market town of Essex, England, 12 m. N.E. of Chelmsford. Brewing, straw-plaiting, corn-milling, and the making of silk, crepe, fibre mats, and brushes are carried on. Pop. 9,000. Also a town in Massachusetts, U.S.A. Pop. 16,000.

Brake, a means of restricting speed by friction on a wheel or on a rail. The early form was a block, slipper, or band; the block was of wood pressed against the rim of the wheel; the slipper, a metal shoe which, fitting on to the wheel, controlled motion down-hill, and the band, used in winches or cranes, is a metal belt capable of being tightened round the shafting of the machine.

Hydraulic brakes attached to hydraulically worked machines act by water pressure in a cylinder and are used in hydraulic lifts. Electric brakes in trains are operated by the momentum of the vehicle when current is cut off. The impetus generates a current which applies a frictional brake by electro-magnets.

Railway brakes are usually worked by air-pressure, and were invented by Westinghouse in 1869, and the modern type is automatic and continuous through a "train-pipe." Another type is the vacuum brake, which works by causing varying air-pressure. Vacuum gauges are placed in the engine cab, and the guard's van, and on the breaking of a coupling the resultant change of air-pressure automatically operates the brakes piston which controls the clamps by the two sides of the wheel.

Bramah, Joseph, an engineer, son of a Yorkshire farmer; author of many mechanical inventions, 18 of which were patented, among others the hydraulic press and the lock, named after him. (1748-1814).

Bramah's Press, is a hydraulic machine for pressing and for lifting heavy bodies. It was invented by Pascal, who did not succeed in making water-tight the moving parts, a task which Joseph Bramah accomplished in 1796, and the machine has thus acquired his name. It is a single-acting force-pump, in connection with which is a cylinder, containing a ram which is forced upwards from the cylinder through a tight collar by the pressure of the water delivered into the cylinder from the force-pump. At the top of the ram is the platform on which material, such as cotton seed, for pressing is placed.

JOHANNES
BRAHMS

Bramante, Donato, architect; laid the foundation of St. Peter's at Rome, which he did not live to complete. (1444-1514).

Bramble or **Blackberry** (*Rubus fruticosus*), a species of rosaceae.

The plant is a hook climber and the fruit, conical in form is composed of a number of single-seeded drupelets.

BRAMBLE

Bramley,

Frank, R.A., painter, of the Newlyn school, born near Boston, Lines. Studied at Lincoln School of Art, and at Antwerp. Exhibited at Academy from 1884. R.A., 1911. "A Hopeless Dawn," 1888, is in the Tate Gallery. (1857-1915).

Brampton, Lord (Sir Henry Hawkins), British judge. As counsel he took part in the Tichborne trial among others, and was made a judge in 1876. He retired in 1898 and was raised to the peerage. (1817-1907).

Bran, the husk of grain separated from the cattle food, and it is an ingredient of brown bread.

Bran, son on Llŷr, and a lord of the underworld of Welsh Celtic mythology; presided over bardic music and poetry, and generally figured as a giant. In later medieval legend he becomes metamorphosed in the "Bran the Blessed," who first brought the cross to the isle of Britain from Rome, where he had dwelt for a period, as a hostage for his son Caradoc. According to an ancient British myth, his head was buried under the White Tower of London, the eyes directed towards France as a spell against foreign invasion; but Arthur unearthed it, saying that Britain must rely upon her own inherent strength.

Branker, Sir William Sifton, English soldier and Director of Civil Aviation, son of an artillery officer; was a cadet at the Royal Military Academy, Woolwich. When the Great War began he was made Deputy Director of Military Aeronautics, having been trained for some years previously in flying. Controller General of Equipment and Director of personnel on the Air Council, 1918; finally Director of Civil Aviation. Lost his life in the R.101 airship disaster in 1930. (1877-1930).

Brand, Sir Jan Hendrik, president of Orange Free State, was born in Cape Town, son of Sir Christoffel Brand, speaker of the House of Assembly there. Educated, Leyden. Called to Bar, 1849. President of Free State from 1863. Fought Basutos, 1865-1866 and 1867. Accepted C.G.M.G. from British Government, 1866. (1823-1888).

Brandan, St., island of, an island reported by St. Brendan, the Irish saint (d. 577), who founded a monastery at Clonfert, as lying W. of the Canary Is. It figured on charts as late as 1753, and voyages of discovery were undertaken in quest of it as recently as the beginning of the 18th Century, up to which time it was believed to exist.

Brandeis, Louis Dembitz, American judge, born in Louisville, Ky, U.S.A. Specialties: industrial matters and public rights. First Jew to be made judge of U.S.A. Supreme Court, 1916. Wrote *Other People's Money and Business as a Profession*. (1856-)

Brandenburg, in the great N. plain Prussian province, and the nucleus of the Prussian state; most of it a sandy plain, with fertile districts and woodlands here and there. Pop. 2,726,000. The cathedral town of Brandenburg, formerly Brennibor, is built on the Havel R. The cathedral stands on an island in mid-river. Pop. 64,000.

Brandenburg, illustrious German family dating from the 10th Century; from it descended the Kings of Prussia.

Brandes, Georg Morris Cohen, Danish literary critic, of Jewish parentage, was born and died in Copenhagen, at whose university he graduated, 1864. His scepticism prevented his appointment as professor. Greatest work *Main Literary Currents of the Nineteenth Century*. Returned, 1925, to the agnostic charge, with *The Jesus Myth*. (1842-1927).

Branding, the impressing of an indelible mark on property to betoken ownership; usually done by burning a mark on with a branding-iron. Cattle are often so marked. Branding was sometimes used as a form of punishment in the past.

Brandon, a market town of Suffolk, England, chiefly remarkable for its flint-chipping or knapping industry which had been carried on since the Stone Age to 1917. Pop. 2,500.

Brandt, or Brant, Sebastian, a German satirical writer, born at Strassburg; author of the *Narrenschiff* or *Ship of Fools*, of which there have been many translations and imitations. (1458-1521).

Brandy, a spirit distilled from wine. Distillation improved in the 13th Century, and brandy then became better known. It was also called burnt wine. It is a product of many countries, but the most famous comes from Cognac, on the R. Charente, France.

Brandywine Creek, a small Pennsylvania and Delaware; scene of a victory near Wilmington of the British over the Americans in 1777.

Brangwyn, Frank, British artist. Born in Bruges, of Welsh extraction, he early became familiar with Flemish tapestry, a study that brought him in contact with William Morris. At 16 he went to sea and added shipping to his studies. Has done much decorative work for public buildings. R.A., 1919; awarded Albert Medal of the Royal Society of Arts, 1932. (1867-)

Branks, a name for the scolding bridle at one time in use in England and Scotland as a punishment for scolds and women convicted of petty offences. It consisted of a hoop arrangement fixed over the head, which rendered speech impossible or painful.

Brantford, a city of S. Ontario, Canada, on the R. Grand; the centre of a rich agricultural country, and an important manufacturing town. Pop. 29,000.

Branting, Karl Mjalmer, Swedish statesman, was born and died in Stockholm. Astronomer, Stockholm Observatory, 1882. Edited *Societetsdemokraten*, 1886-1917. Principal founder of Labour Party, 1889; leader from 1907. Entered Second Chamber, 1896, first socialist to do so. Finance Minister, 1917. Prime Minister, 1920, 1921-1923, 1924-1925. Nobel Peace Prize, 1921. On Council of League of Nations, 1922. (1860-1935).

Brantôme, Pierre de Bourdeille, a French chronicler, contemporary of Montaigne, born in Périgord; led the life of a knight-errant, and wrote *Mémoires* remarkable for the free-and-easy,

faithful, and vivid delineations of the characters of the most celebrated of his contemporaries. (1640-1614).

Brasenose College, Oxford, founded in 1509 by William Smith, Bishop of Lincoln, and Sir Richard Sutton of Prestbury. It is believed to have taken its name from an ancient knocker in the shape of a nose which formerly belonged to a house in Stamford by the name of Brasenose Hall.

Brasidas, a Spartan general, distinguished in the Peloponnesian War; his most celebrated action, the defeat at the expense of his life, in 422 B.C., of the flower of the Athenian army at Amphipolis, with a small body of helots and mercenaries.

Brass, proportion of two to one.

Brasses, sepulchral tablets of a mixed slab of stone, and insculptured with figures and inscriptions of a monumental character; the oldest in England is at Stoke d'Abernon, in Surrey.

Brassey, Thomas, a great railway contractor, born in Cheshire; contracted for the construction of railways in all parts of the world. (1805-1870).

Brassey, Thomas, First Earl, son of the preceding; born at Stafford and educated at Rugby and Oxford. Entered the Commons as Liberal M.P. for Hastings (1868-1886), and was Civil Lord of the Admiralty for part of that time. Wrote many works on naval questions, and was president of the Institute of Naval Architects from 1893 to 1895. Works: *British Seamen* and *The British Navy*. Toured the world with Lady Brassey in their yacht the *Sunbeam*, an account of which was written by Lady Brassey. Created a baron in 1886, Earl Brassey and Viscount Hythe in 1911. (1836-1918).

Brassica, a genus of plants of the Cruciferae order, 85 species of which are known, 7 in Britain. Many are cultivated as table vegetables. The cabbage and all its varieties are included, also the turnip, rape, etc.

Bratislava, town and river-port of Danube, here crossed by a bridge. Its German name is Pressburg, and Magyar name Pozsony. A Hungarian town before the War, it was the crowning-place of the Kings of Hungary, and had a royal palace, now in ruins. Seat of a University and a Court of Justice. Petrol refining, tanning, and the making of tobacco, furniture, and machinery are carried on. Pop. 93,000.

Braun, Karl Ferdinand, Austrian physicist, born at Fulda. Director of Physical Institute, Strassburg, from 1895. In 1898 patented a system of radio-telegraphy utilising coupled circuits both in transmitters and in receivers. Invented method of increasing sending energy at will, and one of the first means of sending in a particular direction. With Marconi obtained Nobel Prize for physics, 1909. Died an interned enemy in New York. (1850-1918).

Braun, Otto, Prussian statesman, born at Königsberg, son of a railwayman, became a printer and lithographer. Led E. Prussian landworkers' movement. Social-democratic member of Prussian Chamber, 1913. Prime Minister of Prussia, 1920-1921, 1921-1925, 1925-1932. The last two terms were as head of a coalition with Centre. Was proposed for candidature for presidency of republic on Ebert's death, 1925, but was outvoted within party. Relieved of office on coming of Hitler, 1933. (1872-)

Bravura, a musical term indicating a passage, or brilliance which calls for special skill on the part of a singer.

Brawling, creating a disturbance in a church, either by quarrelling or by wilfully interrupting the service. During the Reformation an Act was passed making the offender liable to a fine not exceeding £5 or imprisonment for not more than 2 months.

Bray, a Berkshire village famous for Simon Aleyn, its vicar from 1540 to 1588, who, to retain his living, never scrupled to change his principles; the well-known song makes him live during the five reigns from Charles II. to George I. Pop. 3,000. Also the name of a market town of Co. Wicklow, Ireland (Kilre), 12 m. S. of Dublin. Its beautiful position by the sea beneath Bray Head, and its vicinity to the Wicklow Hills, make it a popular seaside resort. Pop. 8,000.

Brazil, the largest S. American State, almost equal to Europe, with an area of 3,275,510 sq. m. and a population of 48,000,000; occupies the eastern angle of the continent, and comprises the Amazon basin, the table-lands of Matto Grosso, and the maritime highlands with the valleys of the Parana and San Francisco.

Great stretches of the interior are uninhabitable swamp and forest lands, forests tenanted by an endless variety of brilliantly plumed birds and insects. The coasts are often humid and unhealthy, but the upper levels have a fine climate. The red soil (terra rossa) of the hillsides is well drained and fertile, and great coffee plantations are numerous.

Almost all the country is within the tropics. The population at the seaports is mostly white; inland it is negro, mulatto, and Indian. Vegetable products are indescribably rich and varied; timber of all kinds, rubber, cotton, and fruit are exported; coffee and sugar are the chief crops. The vast mineral wealth includes diamonds, gold, mercury, and copper. Recently, at Itabira, a new iron-ore deposit was discovered promising to be the richest in the world, and at Bahia most of the world's monazite is mined. The most important manufacturing industry is cotton-weaving.

Inland communication is mostly by waterways, including the Rr. Parana, Madeira, San Francisco, and Iguaçu; while the great Central Railway, State-owned, joins up Uruguay, Argentina, and Paraguay. Most of the trade is with Britain and America. The language is Portuguese, the religion Roman Catholic; education is backward, and government unsettled.

Discovered in 1500, the country was annexed by Portugal; the Portuguese King, expelled by the French in 1808, fled to Brazil, which became a separate kingdom in 1815, and an empire in 1822. The Emperor, Pedro II., was driven out in 1889, and a republic established on the federal system, which has been harassed since by desultory civil war.

The industries are chiefly agricultural, though only a small fraction of the soil is under cultivation, and the country imports large quantities of wheat and flour. The crop of greatest importance is coffee, comprising 78% of the world's output. The chief states concerned in the industry are São Paulo, Rio de Janeiro, Espírito Santo, and Minas Geraes. Another great natural product is rubber, especially in the Acre territory and the States of Amazonas and Para. Other important forest exports are pine, quinine and nut-oil, and ipecacuanha.

Brazil Nut, the seed of the *Bertholletia* S. American tree of the order Lecythidaceae.

The triangular nuts are packed together in a thick, hard, globular fruit. This fruit is closed at one end by the hardened calyx and it is here that the seedlings escape when they germinate. To obtain the nut for commercial purposes the fruit is opened with an axe.

Brazil-wood, a wood obtained from certain species of *Casalpinia* (trees of order Leguminosae) found in Brazil, of great value for dyeing red, the colouring principle being named Brasilin. The pods of *Casalpinia coriaria* from Venezuela and the *W. Indica* are used for tanning.

Brazza, an island in the Adriatic on the Dalmatian coast of Yugoslavia; is richly wooded; noted for its wines; yields marble. Pop. 20,000.

Breach of Promise, the non-fulfilment of a promise to marry. When such a promise is broken without just and sufficient reasons, according to law, an action may be brought to recover damages by the injured person. A promise of marriage is not binding if it be obtained under false pretences, or if important particulars concerning the life or circumstances of one of the contracting parties have been concealed. As a rule an action is brought by the woman, based upon loss of money due to purchase of furniture and trousseau in preparation for the marriage. No plaintiff in any action for breach of promise of marriage can secure a verdict unless her (or his) evidence is corroborated by some other material evidence.

Bread, food prepared from dough made from a cereal flour of wheat, rye, millet, barley, oats, maize, etc. Early types of bread were made from flour and water and were "unleavened." Present-day bread, however, is lightened, or leavened, by a process of fermentation set up by the introduction of yeast or barm. The "rising" is due to the liberation of bubbles of carbon dioxide in the interior, and the bread is rendered easier of digestion and more palatable. Baking-powders are often employed for this purpose, including sodium bicarbonate, tartaric acid, and latterly phosphoric acid or alum, and potassium bisulphate.

White bread, which is more popular, though less nourishing, than "brown" or wholemeal, is prepared from the huskless centre of the wheat-grain, but in brown bread the whole of the grain is used. Aerated bread is made by first dissolving carbon dioxide under pressure in water, the flour being mixed while still under pressure. Bread is sold by weight in Britain. It is also prescribed by law what substances may be used and what adulterants may not be used in the making.

Breadalbane, a mountainous district of W. Perthshire, Scotland, covering an area of over 1,000 sq. m. In it are Lochs Tay and Rannoch, and several high peaks of the Grampians, Ben Lawers (3,843 ft.) being the highest. Its lochs and rapid streams give excellent fishing, and there are deer-forests and much game.

Breadfruit-Tree, *Artocarpus incisa*, a South Sea Island tree producing a fruit which, when roasted, is used as bread.

BREADFRUIT

Bread - Tree, the name of several species of *Encephalartos* whose pith, rich in starch, is made into meal by the Kaffirs. The tree is an African genus of Cycadaceae.

Breakspeare, Nicholas, the only Englishman to become Pope; elected as Adrian IV.; born at Abbots Langley, Herts., entered monastic life in France, created cardinal in 1146, Pope in 1154. (1100-1159).

Breakwater, a work constructed in serve as a protection against the violence of the waves. The name may also be given to any structure which is erected in the sea with the object of breaking the force of the waves and producing a calm within its limits. They are usually constructed by sinking loads of unwrought stone along the proposed line and allowing it to find its angle of repose under the action of the waves. When the mass reaches the surface, or near it, it is surmounted with a pile of masonry, sloped outwards in such a manner as will best enable it to resist the action of the waves.

The great breakwaters are those at Cherbourg and Marseilles in France, Plymouth, Portland, and Holyhead in Britain, Alexandria in Egypt, and Delaware Bay in N. America. In less important localities floating breakwaters are occasionally used. These are built of strong, open woodwork, partly above and partly under the water, divided into several sections and secured by chains attached to fixed bodies. The breakers lose nearly all their force in passing through the beams of such a structure. A breakwater of this kind may last for twenty-five years.

Probably the best-known breakwater is the famous mole at Zeebrugge, Belgium, the scene of the daring exploit of the British Navy during the Great War, when Zeebrugge harbour, a submarine base, was blocked. Modern material employed in breakwater construction is usually concrete of Portland cement.

Bream, the name of several species of the family Cyprinidae and the sea-breams (or boops, q.v.) of the family Sparidae being quite distinct. The former are carp-like fishes having elongated anal fins. The latter are mostly edible.

BREAM (FRESH-WATER)

Breastplate, a metal plate, usually of iron or steel, formerly worn as protection in ancient warfare. They are now worn in the British Army only by the Horse Guards as part of their full-dress uniform.

Breasts, the mammary glands of animals from which the young are fed. In woman they extend from the second rib to about the sixth rib below. In the centre is the nipple, which is surrounded by the areola. On the nipple are the milk-conveying ducts.

Breccia, a rock composed of angular fragments cemented together, which are not water-worn, but probably the debris from surrounding rocks which has fallen into water and been consolidated.

Brechin, a town in Forfarshire, Scotland, W. of Montrose, on the S. Esk, with a cathedral and an old round tower near it, 85 ft. high. Burned in 1645 by Montrose. Pop. 6,800.

Brecon, or Brecknock, a municipal borough and county town of Breconshire, Wales, in beautiful country at the junction of the Usk and Honddu. It has a ruined Norman castle, Norman churches and Roman and British remains near by. Here Mrs. Siddons was born. Woollen goods and hosiery are made. Pop. 5,600.

Breconshire or **Brecknockshire**, an inland, thinly-populated, mountainous county of S. Wales. The Black Mts. and the Brecon Beacons include the highest points. On the uplands sheep, cattle and ponies are reared, and in the valleys oats and other grains, turnips and potatoes are grown. Coal and iron are mined and there are iron works, tanneries, and factories for woollen goods and flannels. The Wye and Usk are the chief rivers, and Brecon, Brynmawr, and Builth Wells the chief towns. Area 169,381 acres. Pop. 58,000.

Breda, a fortified town, the capital of N. Brabant; a place of historical interest; Charles II. resided here for a time during his exile, and issued hence his declaration prior to his restoration. Pop. 49,000.

Breech-loader, a rifle invented (1867) by Jacob Snider, an American. It resulted from an open invitation by the British Government to individuals to submit proposals for the conversion of the Enfield rifle to the breech-loading principle. This invention was followed by the Martini-Henry breech-loading rifle.

Breeding. See **Genetics** and **Heradity**.

Brehon Laws, a body of judge-made laws, created laws that for long formed the common law of Ireland, existing from prehistoric times till Cromwell's conquest. The origin of the code is unknown.

Bremen, the chief seaport of Germany, after Hamburg; is on the Weser, 50 m. from its mouth, and is a free city, with a territory less than Rutlandshire. Its export and import trade is very varied; half the total of emigrants sail from its docks; it is the headquarters of the North German Lloyd Steamship Company. Textiles, tobacco, and paper industries add to its prosperity; was one of the principal cities of the Hanseatic League. Charlemagne made it an archiepiscopal see. There is a statue of Roland in front of the ancient town-hall. The Cathedral of St. Peter stands on the site of the old medieval cathedral. It entered the German Empire in 1867. Pop. 323,000.

Bremen, a free state of NW. Germany, consisting of the city of Bremen, its environs, and two detached portions, Bremerhaven and Vegesack. Agriculture is the chief industry. Area, 99 sq. m. Pop. 371,000.

Bremerhaven, the port of Bremen, on the estuary of the Weser, founded for the accommodation of large vessels in 1830, with a large hospice for emigrants. Pop. 26,000.

Brendan, St. See **Brandan**, St., **Island** of.

Brenner Pass, pass in the central Tyrolean Alps, 4,500 ft. high, between Innsbruck and Bolzano, crossed by a railway, which facilitates trade between Venice, Germany, and Austria.

Brennus, a Gallic chief, who in 390 B.C., after taking and pillaging Rome, invested the Capitol for so long that the Romans offered him 1,000 lb. weight of gold to retire; as the gold was being weighed out he threw his sword and helmet into the opposite scale, adding *Vae victis*, "Woe to the conquered." A second Gallic chief of the same name invaded Greece 279 B.C., and though strongly opposed, secured the pass Thermopylae by treachery and advanced to Delphi, where he was defeated and took his own life.

Brentano, **Clemens**, German poet of the romanticist school, dramatist and writer of short novels, born at Ehrenbreitstein, brother of Goethe's Bettina von Arnim; was a roving genius; his finest work is to be found in *Romanzen von Rosenkrantz*, published posthumously. (1778-1842).

Brentford, market town and county town of Middlesex, on the Brent, 10 m. W. of London, has figured in history and literature; has docks, and some manufactures. Pop. (with Chiswick) 63,000.

Brentford, 1st Baron (Sir William Joynson-Hicks), British politician; held many Government positions and was Home Secretary in Baldwin's 1924 Government, a post he held till 1929, in which year he was raised to the peerage. An ardent Low Churchman, he was largely responsible for the House of Commons' rejection of the new Prayer Book of 1927. (1865-1932).

Brent Goose (*Bronia bernicla*), a small, dark-coloured

goose, dark in neck and whitish-grey or dark grey or brown below. It breeds in Arctic regions and migrates southwards. It is common on the coasts of Britain, especially on the east.

BRENT GOOSE

Brentwood,

a market town of Essex, England, 10 m. SW. of Chelmsford. It has an old grammar school. Brewing and brick-making are carried on, and here is the county lunatic asylum and a Catholic cathedral. Pop. 25,000.

Brescia, a city of Lombardy, on the Mella and Garza, 50 m. E. of Milan, capital of a province of the same name, has two cathedrals, an art gallery and library, and a Roman temple of Vespasian excavated in 1822 and now a classical museum; its manufactures are woollens, fire-arms, silks, leather, and wine. Pop. (prov.) 710,000; (town) 121,000.

Breslau, the capital of lower Silesia, and third city in Prussia; an important commercial and manufacturing centre; is on the Oder, 150 m. by rail SE. of Frankfurt; it stands in the centre of the Baltic, North Sea, and Danube trade, and has a large woollen industry, silk, linen and cotton industries, and manufactures earthenware and machinery; also has a large grain market. Pop. 625,000.

Brest, a strongly fortified naval station in the extreme NW. of France, with a magnificent harbour, and one of the safest, first made a marine arsenal by Richelieu; has large shipbuilding yards and arsenal; its industries are chiefly related to naval equipment, with leather, waxcloth, and paper manufactures. Pop. 79,000.

Brest-Litovsk, a fortified town of the Bug, and important junction both of railways and inland waterways. It is the seat of an Armenian bishop. There is trade in flax and hemp, wood, grain, and leather. Pop. 56,000.

Brest-Litovsk, Treaty of, an agreement and Germany signed in March 1918, ending the War after a preliminary armistice the previous December.

Brétigny, a village of France in Eure-et-Loir, 6 m. SE. of Chartres. Here, in 1360, a treaty was drawn up by which Edward III. of England, in exchange for large territories in France and a ransom for the French King, John II., gave up his claim to the French crown.

Breton (language), one of the Celtic dialects of the Indo-European group. It is spoken in Brittany, NW. France, and is similar in many respects to the Welsh and old Cornish tongues. It consists of four main dialects, of which the original is that of Léon, where the Celts of Brittany still speak it.

The other dialects are Cornouailles, Tréguier, and Vannes. The language is thought to have been taken to Brittany by the Britons who fled there in the 5th and 6th Centuries, and there is little variation from it in the language spoken in Lower Brittany to-day.

Bretwalda, a title apparently of some Breve, a kind of acknowledged supremacy among the Anglo-Saxon kings, and bestowed upon a leader in war.

Breve, a note of music of the time value of two semibreves. It is sometimes written by two tied semibreves.

Breviary, a book containing the daily services in the Roman Catholic Church and resembling the English Prayer Book; differs from the "Missal," which gives the services connected with the celebration of the Eucharist, and the "Pontifical," which gives those for special occasions.

Brewing, the making of beer and ales, has been practised from very early times; in this country, the Brewers' Company was well established as long ago as the 15th Century. The manufacture of beer, as opposed to ale, was an importation into this country from Flanders, probably about 1400, but the new drink was slow in finding popular favour.

At the present time the words "beer" and "ale" are practically synonymous, but formerly "ale" signified the malt liquor prepared from malt, water, and ale-yeast only, the term "beer" referring to the liquor brewed with hops. "Beer" is sometimes taken to include stout and porter, while a distinction is always made between "ale" and "lager beer."

In broad outline the manufacture of beer is as follows. Selected barley of the variety known as "two-rowed" (because the ripe ear has two rows of grain) is mixed with a smaller proportion of the "six-rowed" variety, and the mixed grains are then soaked in water so that they may be ready for germination. The steeped barley is spread in heaps on the floor of the malting-house, which is dark, well ventilated, and maintained at a temperature of about 66° Fahrenheit.

Here germination begins, and the heaps are sprayed with water from time to time until the process has reached the desired stage—i.e., until some of the starch in the grain has been converted into sugar and dextrin (a gummy substance) and there has been a sufficient secretion of the enzymes or ferment diastase for the subsequent stage of mashing. The partially germinated grain or "malt" is then kilned—i.e., heated to such a temperature (160–170° F.) that the germ is killed but the diastase remains unaffected.

The malt is now coarsely crushed, and the "grist" or crushed malt is mixed to a thick gruel with hot water in the mashing machine. The mash next flows into the mash-tun, which is a large vessel having a perforated false bottom slightly above the actual bottom; the size of the perforations is such that the spent grains are held back when the liquid in the tun is run off. In the mash-tun the mash is mixed with warm water by "spargers" or revolving sprinklers, and the diastase performs its work of converting the remaining starch into sugars—chiefly maltose or malt sugar—and gum or dextrin. Soluble proteins are also formed.

The liquid or "wort" is afterwards run off from the mash-tun and boiled for about 3 hours in large copper vessels, varying amounts of hops being added according to the kind of beer to be brewed. Boiling serves to concentrate the wort, to sterilise it, and to precipitate albuminoid matter, as well as to destroy the diastase; at the same time the substances extracted from the hops impart flavour and bitterness to the liquor. The latter is next

cooled and strained, the cooling generally being affected by means of refrigerators, and the stage of fermentation is entered upon. After the yeast has been removed the beer is racked—i.e., run into casks ready for sale.

The characteristic difference between the typical English beer and the Continental lager beer is due to several factors. In the first place, the mashing processes are dissimilar, the Continental method being of the "decoction" type instead of the "infusion" type described above. Secondly, a different kind of yeast is employed, which sinks to the bottom during fermentation instead of remaining at the top.

In Great Britain an excise duty, graduated upon the specific gravity (which in turn depends on the alcoholic content, the greater the proportion of alcohol the smaller the specific gravity), is levied upon wort. The receipts from beer duties in 1937 amounted to £57,000,000. The world's largest breweries are those of Guinness and Co. in Dublin, Bass and Co. in Burton-on-Trent, and Schultheiss-Patzsch in Berlin.

Brewster, Sir David, an eminent Scottish natural philosopher, born at Jedburgh; edited the *Edinburgh Encyclopedia*, a work on which Carlyle served his apprenticeship; specially distinguished for his discoveries in connection with the polarisation of light, his studies in optics, and for his optical inventions, such as the kaleidoscope and the stereoscope; wrote a *Life of Newton*, as well as *Lives of Euler, Kepler*, and other scientists; Principal of the United Colleges of St. Andrews, and afterwards of Edinburgh University. (1781–1868).

Brewster, William, born in Nottinghamshire, shire, England, leader of the Pilgrim Fathers in the *Mayflower*, which conveyed them to Plymouth, Massachusetts, in 1620. (1566–1644).

Brewster Sessions, the annual meetings of magistrates to hear applications for licences by retailers of intoxicating liquors, held during the first 14 days of February.

Brialmont, Henry Alexis, Belgian general and military engineer. Director of Antwerp fortifications and Inspector-General of Fortifications, 1875. Designed fortifications of Bucharest for Rumanian Government, 1883; those of Liège and Namur, 1887. (1821–1903).

Brian Boroinhe, an Irish chief, who early in the 10th Century established his rule over a great part of Ireland, and made great efforts for the civilisation of the country; killed in 1014 by the Danes at Clontarf, said to have been the twenty-fifth battle in which he defeated them.

Briand, Aristide, French statesman, born at Nantes, son of a small Breton farmer. Began his career in Paris as a journalist and advocate. Edited *La Lanterne* and, later, *La Petite République*, and then with Jaurès founded *L'Humanité*; his writing always manifesting socialist and anti-clerical views. Only entered the Cabinet in 1906, when he was made Minister of Public Instruction. Yet later he was to become one of the foremost European statesmen of his time, being several times Premier of France, the arch-exponent of the idea of a super-state to ensure peace on the Continent, and the apostle of European federation. He was Foreign Minister when the Locarno Treaties were negotiated, and this and his other work for the reconstruction of Europe won him many honours, including the Nobel Peace Prize. A great orator, a born Parliamentarian, yet, above all, a good Frenchman. Wrote on the separation of Church and State. (1862–1932).

Briar (*Rosa rubiginosa*), a flowering plant belonging to the rose family.

It is well known as the sweet briar or eglantine and is common in England. The word is also sometimes used of other members of the rose family, *e.g.*, of the dog rose. The briar-root is a hard wood obtained from a heath plant in S. France and used for the manufacture of pipes.

SWEET BRIAR

Briareus, a Uranid with 50 heads and 100 arms, son of Uranos and Gaia, *i.e.*, Heaven and Earth, whom Poseidon cast into the sea and buried under Etna, but whom Zeus delivered to aid him against the Titans.

Bribery, the offer or receipt of a gift to influence unduly a person's judgment or corrupt his conduct, and at one time frequently employed in business to solicit orders or secure contracts or appointments, and in public life to escape justice or influence election results. In business the bribe is called "commission." The law is strict on the matter, and the Act of 1906 (Prevention of Corruption) empowers a punishment, if guilty, of imprisonment up to 2 years and a fine of £500. In public life bribery and corruption, as defined by the Public Bodies' Corrupt Practices Act, 1889, entails a similar penalty. Bribery in connection with parliamentary elections is defined as bargaining for employment or reward in consideration of a vote and various penalties are incurred.

Brice, St., Bishop of Tours in the beginning of the 5th Century, and disciple of St. Martin. Festival, Nov. 13. (On St. Brice's day in 1002, by command of King Ethelred, a desperate attempt was made to massacre all the Danes in England; it was avenged by the Danish King, Sweyn.)

Brick (and **Brickwork**), the well-known substitute for stone in building and paving, usually a mass of clay mixed with sand, etc., shaped in a mould, usually 9" x 4 1/2" x 3", subsequently dried, either in the sun or baked in a kiln. Brick-making involves the processes of crushing, purging (stirring), and moulding, and is performed in recent times largely by machinery. Shale (refuse of coal mines), when pulverised, makes durable bricks resembling the fire-clay bricks of Stourbridge. Ordinary building bricks are made extensively in Essex and Kent, Somersetshire and Bedfordshire, while the coal-field areas of the North of England produce fire-bricks. Bath-bricks are made principally of sand taken from the river at Bridgwater.

Brickwork is the art of the bricklayer, and consists of the arrangement or fitting together of bricks to form a wall, etc., so that the bricks mutually support each other when joined with cement. Wall foundations, always wider than the wall, are called "footings," and garden walls are usually buttressed at intervals of 10 or 12 ft. Mortar, the cement usually used in brickwork, is composed either of grey or white lime (grey is preferred) and sand mixed in a proportion of 1 to 2.

Bride of the Sea, Venice, so called in which her espousals were celebrated by the Doge casting a ring into the Adriatic.

Bridewell, a house of correction in called from St. Bridget's Well, near it; demolished in 1863.

Bridge, a construction which continues a ravine, or above other roads. Those carrying water are called aqueducts. The main types

of bridges are girder bridges, arch bridges, cantilever bridges, and suspension bridges, though many other types of construction are necessary, according to the circumstances of the site.

Girder Bridges.

A log over a stream is of the girder type, and two beams with crosspieces laid over them make the common highway bridge of this kind.

With steel beams and trusses very substantial bridges of this type can be built, but construction is limited to comparatively short spans. Many viaducts built to carry railways over valleys in various parts of the world are of this kind.

Arch Bridges are perhaps the most common and most beautiful. Construction consists of an arch or series of arches carrying the roadway. Almost any material may be used. Sydney Bridge has the largest arch in the world.

Cantilever Bridges are most successful for spanning great distances. Such erections can be built out from the balancing piers without scaffolding to support them, for the network of braces makes them self-supporting at each step of the work. The Forth Bridge, with two spans of 1,710 ft., is of this type. The cantilevers are the double brackets which project out on each side of the piers, one over the stream and the other towards the bank.

Suspension Bridges support the weight of the actual bridge by great cables held by suspension towers. The ends of the cables are anchored to concrete bases in the ground. The New York and Brooklyn Bridge is a good example; a recent construction of this kind is that over the R. Zambesi, opened in 1936. The type is specially suited to wide stretches where intervening piers are impracticable.

Another construction is the bascule bridge, built where a movable type is required. The Tower Bridge is of this kind. It opens like a jack-knife in the middle to allow free passage of the river to shipping. The movement is usually electrically operated. In others a central span turns on a pivot.

Pontoon Bridges consist of a path resting on floating supports, once boats, now metal pontoons. They are often used in military manoeuvres, and can be rapidly thrown across a stream and as rapidly removed.

In cantilever and arch bridges the securing of a good foundation is essential. Where the bed is soft, piers of wood are driven in by piling. When stone or concrete bases are used, the water is excluded by caissons in which a few courses of masonry are built, the whole being then sunk to the required position. In the Quebec Bridge the S. Caisson is sunk to a depth of 110 ft. to solid rock. In the sandy beds of Indian rivers brick cylinders are used.

Bridge, a card game for four players, see **Auction Bridge** and **Contract Bridge**.

Bridge, Sir John Frederick, composer and organist, born at Oldbury, Worcs., was in choir-school of Rochester Cathedral. Organist: Trinity Church, Windsor, 1866-1869; Manchester Cathedral, 1869-1875; Westminster Abbey, 1875-1913. Knighted 1897. King Edward Professor of Music, London University from 1902. Conductor, Royal Choral Society, 1896. Composed sacred music; *Boadicea cantata*, 1880; settings for songs. (1844-1924).

Bridgehead, in military warfare, is a position, fortified position taken up at the farther side of a bridge to assure command of the passage of a river or canal.

Bridgeman of Leigh, William

Bridgeman, First Viscount, was grandson to second Earl of Bradford. Conservative M.P. Oswestry, 1906-1929. Parliamentary Secretary to Ministry of Labour from 1916; to Board of Trade from 1918. Secretary of Mines Dept. and P.C., 1920. Home Secretary, 1922-1924. First Lord of the Admiralty, 1924-1929. Viscount, 1929. Governor, British Broadcasting Corporation, 1933-1935. (1864-1935).

Bridgend, market town of Glamorgan-shire, Wales, 17 m. W. of Cardiff. Iron, coal and stone are worked, and there are tanneries, joinery works, brick-yards, etc. Pop. 10,000.

Bridge of Allan, a village on the R. Stirling, Scotland, with a mild climate and mineral waters. Pop. 3,000.

Bridge of Sighs, a covered way in from the Ducal Palace to the State prison, over which culprits under capital sentence were transported to their doom, whence the name.

Bridgeport, a thriving town and seaport of Connecticut, U.S.A., 58 m. NE. from New York. Sewing-machines, fire-arms, iron and bronze goods, etc., manufactured. Pop. 147,000.

Bridges, Robert, British poet. He became a doctor on leaving Oxford, retiring in 1882 to devote his time to poetry: produced numerous volumes of verse, including lyric and narrative poems, sonnets, etc., and essays; was appointed Poet Laureate in 1913. His chief works are *Eros and Psyche*, *Demeter: A Masque*, *Prometheus the Firegiver* and *The Testament of Beauty*. (1844-1930).

Bridget, St., an Irish saint, born near Dundalk; entered a monastery at 14; founded monasteries; takes rank in Ireland with St. Patrick and St. Columba. Festival, Feb. 1 (453-523). Also the name of a Swedish saint in the 14th Century; founded the "Order of Syon" for monks and nuns.

Bridgetown, a seaport and capital of Barbados, seat of the government and the bishop; suffers from hurricanes and fever. Pop. 15,000.

Bridgewater, Francis Henry Egerton, Third Duke of, celebrated for his self-sacrificing devotion to the improvement and extension of canal navigation in England, in which he was aided by the skill of Brindley. (1736-1803).

Bridgewater, Francis Henry Egerton, Eighth Earl of, educated for the Church, bequeathed £8,000 for the best work on natural theology, which his trustees expended on the production of eight works by different eminent men, called "Bridgewater Treatises," all to be found in Bohn's Scientific Library. (1756-1829).

Bridgnorth, a town of Shropshire, England, on the Severn. Has nail and worsted factories. Pop. 5,000.

Bridgwater, a seaport town in Somersetshire, England, 29 m. SW. of Bristol. Bath-brick is manufactured and exported. Pop. 17,500.

Bridle, part of the harness of a horse fitting on to the head and mouth. A part called the bit fits into the mouth, and the whole is kept in place by means of a headstrap behind the ears, a front strap in front of the ears, a nose-band, and a throat-band. The reins are attached to the bit, and by varying strains on the bit control over the horse is maintained.

BRIDLE

Bridlington, a watering-place in Yorkshire, England, 6 m. SW. of Flamborough Head, with a chalybeate spring. Pop. 12,700.

Bridport, an ancient market town of Dorset, England, 18 m. W. of Dorchester. Sallcloth, thread, twine, and nets are made, and some trade in timber, flax, and hemp is carried on from its little port of West Bay, 1 m. distant. Pop. 6,000.

Bridport, Sir Alexander Hood, Viscount, a British admiral, distinguished in several engagements, notably the "Glorious First of June." (1727-1814).

Brienzen, Lake of, in the Swiss canton of Bern, part of the R. Aar, 9 m. long, 2 m. broad, over 1,800 ft. above sea-level, and of great depth in certain parts; abounding in fish. Town of B., a favourite resort for tourists and centre of wood-carving district.

Brierley Hill, town of Staffordshire, England, in the Black Country. Coal, iron, and fireclay are worked, and there are important iron foundries and blast-furnaces, and other factories. Pop. 14,000.

Brieux, Eugène, French playwright, and was afterwards on other papers. Académicien, 1909. Plays include: *Les Trois Filles de M. Dupont*, *La Robe Rouge* (in English *The Arm of the Law*), *Les Avariés* (in English *Damaged Goods*), *Maternité*, *Les Américains chez nous*, *La Famille Lavollette*. (1858-1932).

Brig, a square-rigged vessel with two masts. A brigantine is a small two-masted vessel, square-rigged on the fore-mast, fore-and-aft rigged on the other.

Brigade, a term applied to the union of regiments of infantry, cavalry, or artillery in one corps. In infantry usually four battalions; in cavalry of two or three regiments. Two or more brigades form a division.

Brigadier-General, the officer in command of a brigade, either of infantry, cavalry, or artillery. After the War the title Colonel-Commandant was substituted in the British army in its place, but since 1928 that has been replaced by "Brigadier."

Brigantes, a powerful ancient British tribe that occupied the country between the Humber and the Roman Wall.

Briggs, Henry, a distinguished English mathematician; first Savilian Professor of geometry at Oxford; made an important improvement on the system of logarithms, which was accepted by Napier, the inventor, and is the system now in use. (1556-1630).

Brighouse, municipal borough of Yorkshire, England, in the W. Riding, 6 m. N. of Huddersfield. Woollens, cotton, silk and worsted are made, also carpets, wire, soap, machinery, etc. Pop. 20,000.

Bright, Sir Charles Tilston, engineer and electrician, a pioneer in telegraphy. He laid a cable across the Irish Sea in 1853, the first cable across the Atlantic from Ireland to Newfoundland in 1858, and the first cable to India, as well as inventing a number of improvements for land telegraphy. (1832-1885).

***Bright, John**, English statesman, son of a near Rochdale; of Lancashire cotton spinner, born near Rochdale; of Quaker birth and profession; engaged in manufacture; took an early interest in political reform; he joined the Anti-Corn-Law League on its formation in 1839, and soon was associated with Cobden in its great agitation; entering Parliament in 1843, he was a strong opponent of protection, the game laws, and later of the Crimean War; he advocated financial reform and the reform

of Indian administration; and on the outbreak of the American Civil War supported the North, though his business interests suffered severely; he was closely associated with the 1867 Reform Act, Irish Church Disestablishment, 1869, and the 1870 Irish Land Act; his Ministerial career began in 1868, but was interrupted by illness; in 1873, and again in 1881, he was Chancellor of the Duchy of Lancaster; he succeeded from Gladstone's Government on the Egyptian policy in 1882, and strenuously opposed Home Rule in 1886; in 1880 he was Lord Rector of Glasgow University. (1811-1889).

Brightlingsea, a seaport and urban district of Essex, England, on the Colne estuary. It has oyster-fisheries, makes ships and boats and is a yachting station. Pop. 4,000.

Brighton, a much-frequented watering-place in Sussex, England, 50 m. S. of London, of which it is a favourite resort; a place of fashionable resort ever since George IV. took a fancy to it; a fine parade extends along the whole length of the sea front; has many handsome buildings, an aquarium, a museum, schools of science and art, public library, and public gallery; the principal building is the Pavilion or Marine Palace, originally built for George IV., bought by the town for £50,000 and now used as a museum and concert hall. Pop. 147,000. Also the name of a suburb of Melbourne, Australia.

Bright's Disease, a disease of the kidneys, so called from Dr. Richard Bright, who first investigated its nature. It is medically known as nephritis.

Bril Brothers, Matthew and Paul, born at Antwerp; employed in the 16th Century by successive Popes to decorate the Vatican at Rome; of them Paul, the younger, was the greater artist; his best pictures are in Rome.

Brill, a flat fish of the turbot family, though smaller, caught both in sandy bays and deep water off coasts of Britain and valuable for food.

Brillat-Savarin, Anthelme, a French gastronomist, author of *Physiologie du Gout*, a book full of wit and learning published posthumously; was professionally a lawyer and for some time a judge. (1755-1826).

Brindisi, a seaport of S. Italy, on the Adriatic coast; has risen in importance since the opening of the Overland Route as a point of departure for the East; it is 60 hours by rail from London, and 3 days by steam from Alexandria; it was the port of embarkation for Greece in ancient times, and for Palestine in medieval. Pop. 41,000.

Brindley, James, a mechanic and engineer, born in Derbyshire; at first a millwright; devoted his skill and genius to the construction of canals, under the patronage of the Duke of Bridgewater. (1716-1772).

Brioni, a group of small Italian islands, in the Adriatic, off Istria. Venice is largely built of stone from Brioni. Here the Genoese defeated the Venetians in 1379. Maggiore, the largest, is a holiday resort.

Brisbane, capital of Queensland, on the Brisbane R., 25 m. from the sea, the chief trading centre and seaport of the State; it has communication with Australian ports and London, and railway communication with Sydney, Melbourne, and Adelaide; prosperity began when the colony

to free settlement in 1842; it was founded from New South Wales and the city incorporated in 1859. Is the seat of Queensland University. Its fine Victoria Bridge across the Brisbane R. was built in 1897 to replace one destroyed by flood. Pop. 317,000.

Brisbane, Admiral Sir Charles, a naval officer of distinction under Lords Hood and Nelson; captured in 1796 Dutch warships, including three ships of the line, in Saldanha Bay, and in 1807 the island of Curaçao; was made Governor of St. Vincent. (1769-1829).

Brisbane, Sir Thomas Makkdougall, British general, a man of science and an astronomer, born near Largs, Ayrshire; saw service as a soldier; was appointed Governor of New South Wales, to the profit of the colony; gave name to the capital of Queensland; catalogued over 7,000 stars; succeeded Scott as president of the Royal Society of Edinburgh, and was president of the British Association in 1834. (1773-1860).

Briseis, a young virgin priestess, who fell to the lot of Achilles among the spoil of a victory, but whom Agamemnon carried off from him, whereupon he retired to his tent and sullenly refused to take any further part in the Trojan war.

Brissot (de Warville), Jacques Pierre, a French revolutionary, born at Chartres, son of a pastry-cook; trained for the Bar, took to letters; became an outspoken disciple of Rousseau; spent some time in the Bastille; liberated, he joined the Girondists; became leader of a party of his own, named after him Brissotins, midway between the Jacobins and Girondists; fell under suspicion, was arrested, tried, and guillotined. (1754-1793).

Bristol, on the Avon, 6 m. from its mouth, and 118 m. W. of London, is the largest town in Gloucestershire, the seventh in England, and a great seaport, with Irish, W. Indian, and S. American trade; it manufactures tobacco, boots, and shoes; it has a cathedral, university, library, and many educational institutions; by a charter of Edward III. it forms a county in itself. It has extensive docks. Pop. (including Avonmouth port and Portishoad dock) 402,000.

Bristol Channel, an inlet in SW. of England, between S. Wales and Devon and Cornwall, 80 m. in length, from 5 to 43 in breadth, and with a depth of from 5 to 40 fathoms; is subject to very high tides, and as such dangerous to shipping; numerous rivers flow into it.

Britain, the name given to England, Scotland, and Wales from the earliest times. Traces of the paleolithic and neolithic inhabitants of the country have been found in many places. Celtic civilisation and languages were brought to the country by invaders from the Continent before the close of the Bronze Age. These were in turn conquered by the Romans, the first Roman invasion being that of Julius Caesar in 55 B.C. The Romans, however, never displaced the Celtic peoples nor became absorbed by them, and when their legions were withdrawn Britain, or at least the low-lying part of Britain, fell a prey to the invading Angles, Saxons, and Jutes, who drove out, slaughtered, or absorbed the Celts.

Britannia, a name for Britain as old as the days of Caesar, when the island was inhabited by Celts, as Gaul also was.

Britannia Metal, a metallic alloy of tin and antimony with a small amount of copper; largely used for making cheap coffee pots, spoons, water-jugs, etc.

Britannia Tubular Bridge,

a railway and foot suspension bridge spanning the Menai Strait, Wales, designed by Robert Stephenson, and completed in 1850; consists of hollow tubes of wrought-iron plates riveted together, and took five years to erect. During heavy storms in 1936 it proved unsafe, and is being rebuilt at considerable cost.

British Association, an association, of Sir David Brewster's suggestion, founded in 1831, of men of all departments of science for the encouragement of scientific research and the diffusion of scientific knowledge. It holds its meetings annually, under the presidency of some distinguished scientist, now in this, now in that, selected provincial centre of the country, and sometimes in the Dominions. It is divided into 13 sections—mathematics and physics, chemistry, geology, geography, anthropology, zoology, physiology, engineering, agriculture, botany, education, economics and statistics, and psychology.

British Broadcasting Corporation. See **Broadcasting.**

British Columbia, a western fertile province of British N. America, extending between the Rocky Mts., and the Pacific, and from the United States on the S. to Alaska on the N., being 800 in. long and four times the size of Great Britain; rich in timber and minerals; rain is abundant, and cereals do well. Vancouver Island is in the province. Cap. Victoria. Area 366,000 sq. m. Pop. 740,000.

British Empire, or **British Commonwealth of Nations,** occupies a quarter of the known surface of the globe, and its population a quarter of the human race. The Constitution rests upon no fundamental law, but is based upon self-government, self-support, and self-defence, the third principle of which is the outcome of the Imperial Conference, consisting of the prime ministers and other ministers of the U.K., Canada, Commonwealth of Australia, New Zealand, Union of South Africa, Ireland, Newfoundland, and the Secretary of State for India.

The British Empire comprises: (1) the United Kingdom, i.e., England, Wales, Scotland, and Northern Ireland, together with the Channel Is. and the Isle of Man. (2) Territories having Dominion Status, e.g., Canada, Newfoundland, Australia, New Zealand, Union of South Africa and Ireland (Eire). (3) Territories in which there is a governor representing the Crown, who nominates the council, e.g., Ceylon, Falkland Isles, Gibraltar, Straits Settlements, etc. (4) Those where there is a legislative assembly as well as an executive council nominated by the Crown, e.g., Bahamas, Jamaica, British Guiana. (5) Those where the governor has control over legislative and executive powers, e.g., St. Helena. (6) Protectorates, e.g., Swaziland, Somaliland, Uganda. (7) Spheres of Influence, e.g., in Arabia. (8) Mandatory Spheres such as Tanganyika, Palestine and former German colonies. (9) India, including the Indian States and British India for which the Government of India Act (1935) provided a Federation with Provincial autonomy limited by safeguards.

British Empire, Order of the, a distinction awarded to men and women for services to the Empire at home and abroad. Established 1917. Civil and military divisions were separated in 1919. There are six classes: Knights Grand Cross or Dames Grand Cross (G.B.E.); Knights Commanders (K.B.E.); Dames Commanders (D.B.E.); Commanders (C.B.E.);

Officers (O.B.E.); Members (M.B.E.), of which the first two rank as knight-hoods.

British Expeditionary Force, landed in France on Aug. 16, 1914, under the command of Sir John French, the first British troops to take part in the Great War.

British Gazette, The, was published in the offices of the now defunct *Morning Post* for the duration of the General Strike of May, 1926 (q.v.), by the Government, with Winston Churchill as controlling editor.

British Isles, a geographical term for the NW. of Europe, including England and Wales, Scotland, and Ireland. Politically only Northern Ireland is included in the term since the establishment of Ireland (Eire), and it has been superseded in official use by "Great Britain and Northern Ireland."

British Legion, an organisation of ex-servicemen established in 1921 by Earl Haig (q.v.), who remained its president until his death, and incorporated by Royal Charter in 1925. Its object is to take care of disabled and unemployed ex-soldiers. Many disabled men are employed in the manufacture of poppies for sale on Remembrance Day, Nov. 11.

British Museum, a national institution in London for the collection of MSS., books, prints and drawings, antiquities, and objects of natural history, ethnology, etc.; founded as far back as 1700, though not opened in Montagu House, till 1759; a public lottery helped to raise the necessary funds.

Briton Ferry, a seaport of Glamorgan-shire, Wales, at the mouth of the Neath, now a ward in the borough of Neath. It has good docks owned by G.W.R., collieries and iron and steel works. Pop. 9,000.

Brittany, an old French province, land of the Bretons, comprising the peninsula opposite Devon and Cornwall, stretching westward between the English Channel and the Bay of Biscay; was in former times a duchy; a third of its inhabitants still retain their Breton language.

Brixham, a seaport, market town, and holiday resort of Devon, England, on Torbay, opposite Torquay. It has fishing and ship-building industries. Here William of Orange landed in 1688 when he entered England. In a cave near have been found Old Stone Age remains. Pop. 8,000.

BRIXHAM TRAWLER

Brixton, an suburb of London, England, on the Surrey side, noted for its remand prison.

Brno, city of Czechoslovakia, generally known by its German name of Brünn (q.v.).

Broad Arrow, a stamp like an arrow-head to indicate Government property, and used on convicts' dresses; originally a royal mark on stores used by authority of the Earl of Romney, a Master-general of Ordnance (1693-1703).

Broad-Bottom Ministry, a coalition ministry under Peelham, in office from Nov. 1744, to Mar. 1755, so called from the wide variety of parties represented in it.

Broadcasting, or the dissemination of news, musical and dramatic entertainment, etc., by wireless, in England began officially in 1921, but earlier attempts had met with success. In 1904 a speech was broadcast by Mr. Joseph Chamber-

lain from the Guildhall to certain playhouses by an electrophone system. In America broadcasting had been inaugurated two years previously, but the European situation after the War hindered the authorities in this country. The first station was at Chelmsford, and was licensed by the Post Office.

In 1922 the Marconi Company opened the London Station (2LO), and concerts were regularly transmitted. Other wireless concerns at this time included British Thomson-Houston, the General Electric, Metropolitan-Vickers, and the Radio Communication Company. Collaboration came with the forming of the Collishaw Broadcasting Company in 1922, under the general management of Sir John Reith, with Mr. Arthur Burrows as director of programmes.

In 1925 Daventry 5XX was opened, and the company became the British Broadcasting Corporation. In 1926 the B.B.C. licence was extended for 10 years from Jan. 1, 1927, and a Royal Charter was granted, a board of Governors being appointed by the Government, under the chairmanship of Lord Clarendon, with Sir John Reith as Director-General. A new Charter came into force on Jan. 1, 1937, continuing the life of the Corporation for a further 10 years.

The B.B.C. organisation consists roughly speaking of a Head Office and 5 provincial regions—Midland, Regional, Northern Regional, Scottish Regional, Western Regional, and Belfast. The Head Office administers the London region, which supplies the National programmes as well as the London Regional programme. The B.B.C. has a monopoly of broadcasting in this country, with public service as its fundamental idea. The principal source of revenue is a share (75 per cent.) of the licence fees collected by the Post Office from listeners, while further revenue comes from royalties on sets and parts sold to the public.

The need for controlling the wave-lengths used by different countries with the advent of powerful transmission caused the formation of an International Broadcasting Union in 1925, and annual meetings take place. Empire broadcasts are radiated from Daventry to the Dominions and the Colonies by short-wave transmission. Television programmes were regularly broadcast in England for the first time from a special transmitting station at Alexandra Park in Aug. 1936.

Broadmoor, a state lunatic asylum certified, after trial for murder, etc., as criminally insane. It is at Sandhurst in SE. Berkshire and was opened in 1863.

Broads, The Norfolk, are a series of county, inland lakes in the E. of that county, apparently formed by expansions of the rivers; they are favourite holiday resorts on account of their wealth of fine scenery, abundant vegetation, keen air, fishing, and boating attractions.

Broadsheet, or **Broadside**, a large page printed on one side, containing a ballad, proclamation or other popular matter. In George IV.'s day they became pamphlets, known sometimes as chap books, and circulated among the poor.

Broadstairs, seaside resort of Kent, of Thanet, 2 m. NE. of Ramsgate. Pop. (with St. Peter's) 15,000.

Broadway, important avenue of Manhattan, New York City, U.S.A., in its S. part a financial and business street, further N. a shopping centre.

Broccoli, a variety of cabbage (*Brassica oleracea*), of the Cruciferae family, producing its young flowers in compact masses called heads. It originally came from Italy.

Brochs, dry-stone circular towers, called also **Piots**, towers and **Duns**, with thick Cyclopean walls, a single doorway, and open to the sky, found on the edge of straths or lochs in the N. and W. of Scotland.

Brock, Sir Thomas, sculptor, born at Worcester; executed many notable monuments, including Lord Canning statue at Calcutta, statues of Sir Richard Owen and the Black Prince (at Leeds) and the National Memorial to Queen Victoria. (1847-1922).

Brocken, or **Blocksberg**, the highest peak (3,740 ft.) of the Harz Mts. in Germany, cultivated to the summit; famous for a "Spectre" so called; long an object of superstition, but which is only the beholder's shadow projected through, and magnified by, the mists.

Broglie, Albert, son of the following, a Conservative politician and litterateur, author of *The Church and the Roman Empire in the 4th Century*. He was Premier of France in 1873 and 1877. (1821-1901).

Broglie, Charles Victor, Duc de, a Paris; a Liberal politician; was of the party of Guizot and Royer-Collard; held office under Louis Philippe; negotiated a treaty with England for the abolition of slavery; was an Orleanist, and an enemy of the Second Empire; retired after the coup d'état. (1785-1870).

Broglie, Victor Francois, Duc de, marshal of France, distinguished in the Seven Years War, being "a firm disciplinarian"; was summoned by royalty to the rescue as "war god" at the outbreak of the Revolution; could not persuade his troops to fire on the rioters; took command of the Emigrants in 1792. (1718-1804).

Brogue, a coarse and light kind of shoe entire piece and gathered round the foot by a thong, formerly worn in Ireland and the Highlands of Scotland. The term also refers to a mode of pronunciation peculiar to the Irish.

Broke, Sir Philip Bowes Vere, rear-admiral, born at Ipswich, celebrated for the action between his ship *Shannon*, 38 guns, and the American ship *Chesapeake*, 49 guns, in June 1813, in which he boarded the latter and ran up the British flag; one of the most brilliant naval actions on record. (1776-1841).

Broken Hill, mining town of New Here is the biggest silver mine in the world, and gold, lead, and zinc are also worked. Pop. 27,000.

Broker, a person employed in the negotiation of commercial transactions between other parties, generally engaged in the interest of one of the principals. There are separate brokers for nearly all the great articles of consumption. Ship brokers procure goods on freight or charter for ships outward bound and clear vessels at the customs, as well as acting as insurance brokers. Exchange brokers negotiate the sale and exchange of bills of exchange drawn upon foreign countries. A stock broker buys and sells for others stock in public funds and shares in the capital of joint-stock companies.

Bromberg (Polish *Bydgoszcz*), a busy town on the Braho, in Poznan, Poland. Being a frontier town, it suffered much in times of war. Pop. 90,000.

Brome, Alexander, a cavalier, writer of wit, whims, and lampoons; of his songs some are amatory, some festive, and some political. (1620-1666).

Brome, Richard, an English comic playwright, contemporary with Ben Jonson, and a rival; originally his servant; his plays are numerous, and were characterised by his enemies as the swoonings of Jonson's study. (d. 1632).

Bromide, a salt of potassium, resembling the chloride formed by dissolving bromine in a solution of caustic potash or by decomposing bromide of iron by carbonate of potassium. It is used in photography, but with more importance in medicine as a gentle anodyne to promote sleep, in large doses for epilepsy.

Bromine, a liquid element of a dark colour and a disagreeable smell, extracted from bittern, a liquid which remains after the separation of salt. Symbol Br; Atomic weight 79.92.

Bromley, a borough in Kent, England, 10 m. S.E. of London, where the Bishops of Rochester had their palace. Pop. 47,700.

Brompton, SW. district of London, also called S. Kensington; a once rustic locality, which became a fashionable district, with several museums and the Oratory.

Bromsgrove, a market town of Worcestershire, England, 12 m. N.E. of Worcester. Nails and buttons are made. Pop. 10,000.

Bronchitis, inflammation of the bronchial tubes which form part of the windpipe system. It is generally caused in young children and old persons by exposure to cold, especially a sudden chill, but attacks can be brought on by inhaling dust or cotton fibre and other irritants. Its symptoms are irritation in the nose, causing frequent sneezing, watering of the eyes, shivering, headache, and a feeling of oppression in the chest. A cough sets in with paroxysms, accompanied by much thick mucus. The breathing becomes noisy, owing to the lining of the bronchi becoming thick.

Bronte, a town in Sicily, on the W. slope of Etna, which gave Nelson his ducal title. Pop. 20,000.

Brontë, the name of three sisters, Charlotte, Emily and Anne,

daughters of a Yorkshire clergyman of Irish extraction: Charlotte, born at Thornton, Yorkshire; removed with her father, at the age of four, to Haworth, a moorland parish, in the same county, where she lived most of her days; spent two years at Brussels as a pupil-teacher; on her return, in conjunction with her sisters, prepared and published a volume of poems under the pseudonyms respectively of "Currer, Ellis, and Acton Bell," which proved a failure. Nothing daunted, she set to novel writing, and her success was instant; first *Jane Eyre*, then *Shirley*, and then *Villette*, appeared, and her fame was established. In 1854 she married her father's curate, Mr. Nicholls, but her constitution gave way, and she died (1816-1855). Emily (Ellis), two years younger, poet rather than novelist; wrote *Wuthering Heights*, a remarkable production, showing still greater genius, which she did not live to develop. (1818-1848). Anne (Acton), four years younger, also wrote two novels, very ephemeral productions. (1820-1849).

Brontosaurus, a large dinosaur, re-b found in Wyoming, U.S.A. It was a type of now extinct reptile, had a length of 80 ft., weighed over 30 tons, and lived in swampy places, being herbivorous, unlike some other species of dinosaur.

CHARLOTTE
BRONTË

Bronx, The, a borough of New York City, separated from Manhattan by the Bronx R. Formerly it was a district in Westchester county. In it is Bronx Park, with its fine zoological gardens, and also the buildings of New York University. Pop. 1,265,000.

Bronze, an alloy of copper, tin, and zinc in varying proportions. The metal used for British coins contains 95 per cent. copper, 4 per cent. tin, and 1 per cent. zinc.

Bronze Age, an age in the history of many races when weapons and tools were made of bronze.

Bronzing, the name given to the process whereby articles of metal, wood, porcelain, plaster, etc., are given a bronze-like superficial appearance. Various methods are used, according to the nature of the material.

Brooch, a fastening for the dress consisting of a clasp fitted with a hinged pin. The use of such fastenings is of the greatest antiquity, and many have been of great beauty.

Brooke, Sir James, Rajah of Sarawak, born near Bath; entered the Indian army; was wounded in the Burmese war, returned in consequence to England; conceived the idea of suppressing piracy and establishing civilisation in the Indian Archipelago; sailed in a yacht from the Thames with that object; arrived at Sarawak, in Borneo; assisted the Sultan in suppressing an insurrection, and was made rajah; brought the province under good laws and swept the seas of pirates, for which he was rewarded by the English Government; was appointed Governor of Labuan; finally returned to England and died, being succeeded in Sarawak by a nephew. (1803-1868).

Brooke, Rupert, British poet. Educated at Rugby and Cambridge; lived near Grantchester. In 1914 he received a commission in the Naval Division, and died of blood-poisoning in hospital at Scyros in April 1915. His *Collected Poems*, containing the well-known war sonnets, South Sea poems, and earlier work, all displaying the promise of his great gifts, were issued in 1925. (1887-1915).

Brooke, Stopford, preacher and writer, born in Donegal; after other clerical appointments became incumbent of Bedford Chapel, Bloomsbury, and Queen's chaplain; seceded from the Church, but continued to preach in Bloomsbury; wrote the *Life of F. W. Robertson of Brighton*, a *Primer of English Literature*, *Theology in the English Poets*, and a *Life of Milton*, all works evidencing critical ability of a high order. (1832-1916).

Brooklands, the famous racing track used for motor-car racing and testing engines as well as for attempts at world speed records. It has a circuit of 3½ m. and a width of 100 ft. It was opened in 1907.

Brooklyn, a borough of New York, on Long Island; separated from Manhattan by the East R. a mile broad, and connected with it by a magnificent suspension bridge, the largest in the world, as well as by some 12 lines of ferry-boats pulled by steam; the Williamsburg Bridge (1½ ft. wide), joining the borough with Manhattan and Broadway is the largest of its kind. Has 10 m. of water-front, extensive docks and warehouses, and does an enormous shipping trade; has the chief navy yard in U.S.A.; manufactures include glass, clothing, chemicals, metallic wares, and tobacco; has many fine buildings, parks, and pleasure grounds. Has two fine recreation grounds: Prospect Park (nearly 600 acres in extent) and Washington Park. Pop. 2,560,000.

Brookwood, a district in the parish of Woking, Surrey, England. Here is the London Necropolis cemetery, and a crematorium, the first to be built in England; here also is a pauper lunatic asylum.

Broom, the name of several species of leguminous plants, native to Europe and the Mediterranean. The Common Broom (*Cytisus scoparius*) found in England is an evergreen shrub with scale leaves. It grows in poor soil and bears bright yellow flowers. The fruit is explosive. Besoms are made from the branches.

Broomrape, a parasitic plant of the genus *Orobanchae*, whose roots prey on those of other plants. *O. ramosa* is found on hemp, *O. major* on centaurea, *O. minor* on clover.

Brother Jonathan, a nickname for an American citizen corresponding to "John Bull." George Washington used to say, "we must consult Brother Jonathan," meaning John Trumbull, a Governor of Connecticut.

Brothers, Richard, born in Newfoundland, a mystic and "prophet"; he was one of the founders of the belief that the English people represent the ten lost tribes of Israel. (1757-1824).

Brougham, a covered carriage for four persons, with a box seat for the driver and a footman, with one or two horses; a coupe, for two persons, was called a doctor's brougham. It was designed by Lord Brougham.

BROUGHAM

Brougham,

Henry, Lord Brougham and Vaux, born in Edinburgh, and educated at the High School and University of that city; admitted to the Scottish Bar in 1809; excluded from promotion in Scotland by his liberal principles, he joined the English Bar in 1808, speedily acquired a reputation as a lawyer for the defence in Crown libel actions, and by his eloquence in the cause of Queen Caroline, 1820, won universal popular favour; entering Parliament in 1810, he associated with the Whig Opposition, threw himself into the agitation for the abolition of slavery, the cause of education, and law reform; became Lord Chancellor in 1830, but 4 years afterwards his political career closed; together with Horner, Jeffrey, and Sidney Smith, one of the early contributors to the *Edinburgh Review*, also one of the founders of London University, and the Society for the Diffusion of Useful Knowledge; a writer on many themes, but his violence and eccentricity reduced his influence; spent his last days at Cannes, where he died. (1778-1868).

Broughton, Lord. See *Hobhouse*.

Broughton, Rhoda, novelist, her best work *Not Wisely but Too Well*; wrote also *Comeh Up as a Flower*, *Red as a Rose is She*. (1840-1920).

Broughty Ferry, a watering-place near Dundee, Scotland, and a favourite place of residence of Dundee merchants. Pop. 8,000.

Broussa (Brusar or Bursa), a city in the extreme NW. of Turkey, at the foot of Mt. Olympus, 12 m. from the Sea of Marmara; the capital of the Turkish empire till the taking of Constantinople in 1453; abounds in mosques and is celebrated for its baths. Pop. 12,000. Capital of a vilayet of the name. Pop. 441,000.

Brouwer (or Brasser), Adrian, a Dutch painter, mostly of low, vulgar life, which, as familiar with it, he depicted with great spirit. (1605-1638).

Brown, Sir Arthur Whitten, British aviator, born at Glasgow. With Sir John Alcock (q.v.) he first flew across the Atlantic in an aeroplane from Newfoundland to Ireland in June, 1919. (1866-).

Brown, Ford Medox, an English painter, born at Calais; his subjects nearly all of a historical character, one of which is "Chaucer reciting his Poetry at the Court of Edward III."; anticipated Pre-Raphaelitism. (1821-1893).

Brown, John, American slavery abolitionist; settled in Kansas, and resolutely opposed the project of making it a slave state; in the interest of emancipation, with 18 others, seized on the State armoury at Harper's Ferry in hope of a rising, enthroned himself armed in it, was surrounded, seized, tried, and hanged. It was of him that the song *John Brown's Body* was written, which served the Union forces as a marching song in the Civil War. (1800-1859).

Brown, John, a Highlander, born at Crathie in Aberdeenshire, who became gillie to the Prince Consort during the reign of Queen Victoria and later personal servant to Victoria herself at Balmoral, Buckingham Palace, and Windsor, where he died. (1825-1883).

Brown, John, Scottish physician and author, born at Biggar, educated in Edinburgh High School and at Edinburgh University; author of *Horae Subsecivae*, *Rab and his Friends*, *Pet Marjorie*, *John Leech*, and other works. (1810-1882).

Brown, John, founder of the Brunonian system of medicine, born in Berwickshire; reduced diseases into two classes, those resulting from redundancy of excitation, and those due to deficiency of excitation; author of *Elementa Medicinae*. (1735-1788).

Brown, Lancelot ("Capability Brown"), landscape-gardener and architect, born in Northumberland, was a kitchen gardener at Lord Cobham's Stowe. Laid out grounds at Kew and Blenheim. (1715-1783).

Brown, Robert, a distinguished botanist, born at Montrose, son of an Episcopal clergyman; accompanied an expedition to survey the coast of Australia in 1801, returned after 4 years' exploration, with 4,000 plants, mostly new to science, which he classified and described in his *Prodromus Florae Nova Hollandiae*; became librarian to, and finally president of, the Linnean Society. (1773-1858).

Brown Willy, the highest peak (1,375 ft.) in Cornwall, England, 10 m. NE. of Bodmin.

Browne, Charles Farrar, a humorist and satirist, known by the pseudonym of "Artemus Ward," born in Maine, U.S.A.; his first literary effort was as a "showman" to an imaginary travelling menagerie; travelled over America lecturing, carrying with him a whimsical panorama as affording texts for his numerous jokes, which he brought with him to London, and exhibited with the same accompaniment with unbounded success; he spent some time among the Mormons, and wrote humorous accounts of that community. (1834-1867).

Browne, Hablot Knight, artist born in London; illustrated Dickens' works, *Pickwick* to begin with, under the pseudonym of "Phiz," as well as the works of Lever, Alsworth, Welding, and Smollett, and the Abbotsford edition of Scott; he was skilful as an etcher and an architectural draughtsman. (1815-1882).

Browne, Robert, founder of the Brownists, born in Rutland; the first seceder from the Church of England, and the first to found a Church of his own on Congregational principles, which he did at Norwich, though his project of secession

proved a failure, and he returned to the English Church; died in jail at Northampton, where he was imprisoned for assaulting a constable; he may be accounted the father of the Congregational body in England. (1550-1633).

Browne, Sir Thomas, physician and London; resided at Norwich for nearly half a century, and died there; was knighted by Charles II.; "was." Professor Saintsbury says, "the greatest prose writer perhaps, when all things are taken together, in the whole range of English"; his principal works are *Religio Medici*, *Inquiries into Vulgar Errors*, and *Hydrotophia, or Urn-Burial*. (1605-1682).

Browne, William, English pastoral poet, born at Tavistock; author of *Britannia's Pastorals* and *The Shepherd's Pipe*, a collection of eclogues, and *The Inner Temple and Masque*, or the story of Ulysses and Circe, with some exquisitely beautiful opening verses, "Steer higher, steer," among them; was an imitator of Spenser, and a parallel has been instituted between him and Keats. (1591-1645).

Brownhills, an urban district in Staffordshire, England, not far from Lichfield. Coal is mined in the neighbourhood. Pop. 18,000.

Brownian Movement, the motion observed in the particles of a colloidal solution when seen under a microscope; the motion is due to molecular vibrations. The phenomenon was first observed by Robert Brown, a botanist, in 1827.

Brownie, a good-natured household elf, believed in Scotland to render obliging services to good housewives. The name has been adopted by the junior section of the Girl Guides, once called Rosebuds.

Browning, Elizabeth Barrett, née Barrett, poetess, born at Carlton Hall, Durham; a woman of great natural abilities, which developed early; suffered from injury to her spine; went to Torquay for her health; witnessed the death by drowning of a brother, that gave her a shock the effect of which never left her; published in 1838 *The Seraphim*, and in 1844 *The Cry of the Children*; married Robert Browning in 1846, who immediately took her abroad, settling in Florence. *Sonnets from the Portuguese* appeared in 1850. *Cana Guidi Windsor* in 1851, and in 1856 *Aurora Leigh*, "a novel in verse," and in 1860, *Poems before Congress*; ranks high, if not highest, among the poetesses of England; she took an interest all through life in public affairs; her work is marked by musical diction, sensibility, knowledge, and imagination. (1806-1861).

Browning, John M., an American inventor born in the State of Ulan, U.S.A., who patented many inventions and improvements of firearms including the Colt machine-gun and the revolver named after him. (1854-1926).

Browning, Robert, poet, one of the two greatest in the Victorian era, born in Camberwell; early given to writing verses; prepared himself for his literary career by reading through Johnson's Dictionary; his first poem *Pauline*, published in 1833, which was followed by *Poems* in 1835, *Sordello* in 1840; after a time, in which he was not idle, published, with some of his *Dramatic Romances and Lyrics*, in 1855 his *Men and Women*, and in 1868 *The Ring and the Book*, his longest poem, and more analytic than poetic;

ROBERT BROWNING

this was succeeded by a succession of others, finishing up with *Asolando*, which appeared the day he died at Venice; was a poet of great subtlety, deep insight, creative power, and strong faith; lies buried in Westminster Abbey; of Browning it has been said by an eminent writer, "Timor mortis non conturbabat," the fear of death did not trouble him. *James Lee*, *Rabbi Ben Ezra*, and *Prosper* are among the greatest poems of the century. His creed was an optimism of the brightest, and his restful faith "God's in His heaven, All's right with the world." (1812-1889).

Brown-Séguard, Charles Edward, physiologist, born in Mauritius, of American parentage; studied in Paris; practised in New York, and became a professor in the Collège de France; made a special study of the nervous system and nervous diseases, and published works on the subject. He was the first to show that organs can supply to blood secretions which affect other parts of the body. See *Hormones*. (1817-1894).

Broxburn, a town of Linlithgowshire, Scotland, 31 m. W. of Edinburgh. Here are large shale oil-works. Pop. 8,000.

Bruce, a family illustrious in Scottish history, descended from a Norman knight, Robert de Bruis, who came over with the Conqueror, and who acquired lands first in Northumberland and then in Annandale.

Bruce, James, traveller, called the "Abyssinian," born at Kinnaird House, Stirlingshire; set out from Cairo in 1768 in quest of the source of the Nile; believed he had discovered it, though his quest took him to the head waters of the Blue Nile; stayed two years in Abyssinia, and returned home by way of France, elated with his success; felt hurt that no honour was conferred on him, and for relief from his chagrin wrote an account of his travels in 5 quarto vols., the general accuracy of which, as far as it goes, has been attested by subsequent explorers. (1730-1784).

Bruce, Robert, King of Scotland, died but joined the national party; member of a regency of four with Comyn for rival; stabbed Comyn in a quarrel at Dumfries, 1306, and was that same year crowned king at Scone; was defeated by an army sent against him, and obliged to flee to Rathlin, Ireland; returned and landed in Carrick; cleared the English out of all the fortresses except Stirling, and on June 24, 1314, defeated the English under Edward II. at Bannockburn, after which, in 1328, the independence of Scotland was acknowledged, as well as Bruce's right to the crown; suffering from leprosy, spent his last two years at Cardross Castle, on the Clyde, where he died in the thirty-third year of his reign. (1274-1329).

Bruce, Sir Mon. Stacey Melbourne, Australian statesman. Educated at Cambridge, where he won a rowing Blue in 1904; he returned to Europe during the Great War to serve with the forces, and won the M.C. In 1923 he became Nationalist Prime Minister of Australia, and was defeated in Sept. 1929 on his Bill to abolish federal jurisdiction on wage arbitration cases. P.C., O.H., 1923. Became Resident Minister in London in Joseph Lyons' first Cabinet (1932) and, later, High Commissioner for Australia in London. President, Council of League of Nations, 1936. (1882-).

Bruce, William Speirs, polar explorer, son of an Edinburgh surgeon. With Scottish expedition to Antarctica, 1892; Coats's to Nova Zembla, etc., 1893; Prince of Monaco's to Spitzbergen, 1898, 1899, and 1906. Zoologist with Jackson-Harmsworth expedition to Franz Josef Land, 1896-1897. Commanded Scottish National Antarctic ex-

pedition, 1802-1804, discovering Coats's Land. Surveyed Spitsbergen between 1806 and 1812. (1867-1891).

Brucine, an alkaloid, allied in action weaker, being only a twenty-fifth of the strength.

Bruges, cap. of W. Flanders, in Belgium, intersected by canals crossed by some 50 bridges, whence its name, "Bridges"; one of these canals connects it with Ostend, another with Zeebrugge; many of them are now, however, as well as some of the streets, little disturbed by traffic, and in a decayed condition; has a number of fine churches, one specially noteworthy, the church of Notre-Dame; it has several manufactures, textile and chemical, as well as distilleries, sugar-refineries, and ship-building yards. It was used by the Germans during the Great War as a submarine base, the North Sea being reached by way of the canal to Zeebrugge; to block the route the British raided Zeebrugge Mole on April 23, 1918. Pop. 52,000.

Bruises, contusions, caused by injuries from a blow or pressure without breaking the skin, accompanied by discoloration as the result of the rupture of small blood-vessels. Bruises range from a black eye to badly crushed muscles. Swelling is sometimes considerable, especially in lax parts, such as the eye. Successive blows can result in paralysis following the bruising, and abscesses sometimes form. Soft skin easily bruises and marked discoloration is not necessarily a sign of any severe injury.

Brumaire, Napoleon, on his return from Egypt, overthrew the Directory and established himself in power. Equivalent in the French Revolutionary Calendar to Nov. 9, 1799.

Brummell. See Beau Brummell.

Brunanburh, the scene of a great breaking between Athelstan, King of Wessex, and a united force of Danes, Scots, and Northern Celts; the site doubtful, variously placed in Scotland, Northumberland, and Yorkshire; the victory commemorated in the *Anglo-Saxon Chronicle*.

Brunck, Richard François, an able scholar, and critic, born at Strassburg; edited several classical works, played a perilous part in the French Revolution; was imprisoned, and, on his release, had to sell his library in order to live. (1729-1803).

Brune, Guillaume Marie, French marshal, saw service in the Vendean war and in Italy, distinguished himself under Napoleon in Italy and Holland; submitted to Bourbons in 1814; joined Napoleon on his return from Elba; was appointed to a post of command in the S. of France, but had to surrender after Waterloo, and was attacked by a mob of Royalists at Avignon as he was setting out for Paris, and brutally murdered, his body being thrown into the Rhône. (1763-1815).

Bruneau, Louis Charles Bonaventura Alfred, French composer, born in Paris, studied under Massenet. Compositions, chiefly operas founded on Zola's works, — *Le Hâve*, *L'Attaque du Moulin*, one of the best war operas; *Messidor*; *L'Ouvrag*; *L'Enfant-Roi*. (1857-1934).

Brunel, a British protectorate in NW. Borneo. The interior is mainly jungle containing valuable timber, and cutch, rubber and sago are produced. In the capital Brunel (pop. 12,000) on the R. Brunel, silverware is made, other native industries being brass-founding, boat-making, and cloth-weaving. Area 2,500 sq. m. Pop. 30,000.

Brunel, Isambard Kingdom, son of father in his engineering operations, in particular the Thames tunnel; was engineer of the Great Western Railway; designed the *Great Western* steamship, the first to make regular voyages across the Atlantic; was the first to apply the screw propeller to steam navigation; designed with Scott Russell the *Great Eastern*; constructed bridges and naval docks. (1806-1890).

I. K. BRUNEL

Brunel, Sir Marc Isambard, engineer, born in Rouen, emigrated to the United States; was chief engineer of New York; settled in England, and invented many mechanical tools; constructed the Thames tunnel, begun in 1825 and finished in 1843. (1769-1849).

Brunelleschi, Filippo, Italian architect, born in Florence, trained as goldsmith, studied at Rome; returned to his native city, built the Duomo or Cathedral, the Pitti Palace, and the churches of San Lorenzo and Spirito Santo. (1379-1446).

Brunhilda, a man-like queen in the *Nibelungen Lied* who offered to marry the man who could beat her in feats of strength, was deceived by Siegfried into marrying Gunther, and meditated the death of Siegfried, who had married her rival Kriemhilda; this she accomplished by the hand of Hagen. Also a queen of Austrasia, who, about the 7th Century, had a lifelong quarrel with Fredegunde, Queen of Neustria, the other division of the Frankish world, which at her death she seized, but was overthrown by Clothaire II., Fredegunde's son.

Bruni, Leonardo, Italian humanist and historian, born at Arezzo, hence called Aretino; was papal secretary; settled in Florence, and wrote a history of it; did much by his translations of Greek authors to promote the study of Greek. (1369-1444).

Brünn (now Brno), an ancient city, capital of Moravia, Czechoslovakia, beautifully situated, with large manufactures; woollens the staple industry of the country; about one-half of the population Czechs; seat of a Czech University. Pop. 265,000.

Bruno, Giordano, a bold and fervid original thinker, born at Nola, in Italy; a Dominican monk, attached himself to Calvin for a time, went to Paris, attacked the scholastic philosophy, had to leave France; spent two years in England with Sir Philip Sidney, propagated his views in Germany and Italy, was arrested by the Inquisition, and after 7 years spent in prison was burned as a heretic; he was a pantheist, and regarded God as the living omnipresent soul of the universe, and Nature as the living garment of God. (1548-1600).

Bruno, St., born at Cologne, retired to a lonely spot near Grenoble with 6 others, where each lived in cells apart, and they met only on Sundays; founder of the Carthusian Order of Monks, the first house of which was established in the desert of Chartreuse (1030-1101). Festival, Oct. 6.

Brunonian System, a system and treats diseases as due to defective or excessive excitation, as sthenic or asthenic. See Brown, John.

Brunswick, a Free State (formerly duchy) of N. Germany, made up of 9 detached parts, mostly in the upper basin of the Weser; is mountainous, and contains part of the Harz Mts.; climate and crops are those of N. Germany generally. Pop. 513,000. Brunswick, the capital, a busy commercial town, once a member of the Hanseatic League, which fell into comparative decay after the winding of the League; on the Oder, 140 m. SW. of Berlin; an irregularly built city, it has a cathedral, and manufactures lace, chemicals, and machinery. Pop. 187,000.

Brunswick, Frederick William, Duke of, brother of Queen Caroline; raised troops against France, which, being embarked for England, took part in the Peninsular War; fell fighting at Ligny two days before the battle of Waterloo. (1771-1815).

Brusa. See *Broussa*.

Brush, Charles Francis, American electrician, inventor of the Brush dynamo, and series arc-lamp, 1878. Registered many other patents. Founded Brush Electric Company in Cleveland, U.S.A. (1840-1929).

Brussels, on the Senne, 27 m. S. of Belgium, in the heart of the country. The old town is narrow and crooked, but picturesque, and is dominated by the Palace of Justice; the town-hall is a magnificent building. The new town is well built, and one of the finest in Europe. There are many parks, boulevards, and squares; a cathedral, art gallery, museum and library, university, and art schools. It is Paris in miniature. The manufactures include lace, linen, silk, ribbons, cotton goods, and paper; a ship-canal and numerous railways foster commerce. German troops captured the city on Aug. 20, 1914, and King Albert returned in Nov. 1918. Pop. (with suburbs comprising 15 distinct communes) 900,000.

Brussels Sprouts, one of the cultivated varieties of cabbage, having an elongated stem 3-4 ft. high with small, clustering heads like miniature cabbages.

Brussiloff, Alexei Alexeievich, Russian general, of noble family, served in Russo-Turkish War, 1877-1878. Director, cavalry school, St. Petersburg, 1800. In Great War invaded Galicia, 1914, 1915. Succeeded Ivanov in command of armies S. of Pripiet Marshes, 1916. In June 1917 became Commander-in-Chief under the Provisional Government. Took no part in Bolshevik revolution; but during it was wounded by explosion at his flat. (1853-1926).

Brutus, Lucius Junius, traditional founder of Republican Rome, in 6th Century B.C.; affected idiocy (whence his name, meaning stupid); it saved his life when Tarquin the Proud put his brother to death; but when Tarquin's son committed an outrage on Lucretia, he threw off his disguise, headed a revolt, and expelled the tyrant; was elected one of the two first Consuls of Rome; sentenced his two sons to death for conspiring to restore the monarchy; fell in a hand-to-hand combat with Aruns, one of the sons of the banished king.

Brutus, Marcus Junius, nephew of Cato of Utica, though Caesar's friend, was persuaded by Cassius and others to believe that Caesar aimed at the overthrow of the republic; joined the conspirators, and was recognised by Caesar among the factionists as party to his death; forced to flee from Rome after the event, was defeated at Philippi by Antony and Augustus but escaped capture by falling on his sword. (85-42 B.C.).

Bruyère, Jean de la, a French writer of *Charactères de Théophraste*, a satire on various characters and manners of his time; was attached to the household of the Prince de Condé. (1645-1696).

Bryan, William Jennings, American statesman, born in Salem, Illinois; trained for the Bar and practised at it; entered Congress in 1891 as an extreme Free Silver man; lost his seat from his uncompromising views on that question; was twice nominated for the Presidency in opposition to McKinley, but defeated. (1860-1925).

Bryant, William Cullen, American poet; his poems were popular in America, the chief, *The Ages*, published in 1821; was 50 years editor of the *New York Evening Post*; wrote short poems all through his life, some of the later his best, particularly *Thanatopsis*. (1794-1878).

Bryce, Rt. Hon. James, First Viscount, a historian and politician, born at Belfast; Fellow of Oriel College, Oxford; trained for the Bar; for a time professor of Civil Law at Oxford; entered Parliament in 1880; was member of Gladstone's last Cabinet; from 1907 to 1913 he was Ambassador in America. His chief literary productions, *The Holy Roman Empire* and *The American Commonwealth*. (1838-1922).

Brynmawr, an urban district and market town of Brecknockshire, Wales, 8 m. SW. of Abergavenny. Here are large iron works. Pop. 7,000.

Bryony, a common name for a family of climbing plants (order Cucurbitaceae) called *Bryonia*. White Bryony (*B. dioica*) is found in English hedges. It is poisonous, but has a medicinal value as a purgative and emetic. The cucumber is a relative. The Black Bryony (*Tamus communis*), a climbing plant, also found in English hedges, belongs to the order Dioscoreaceae. It also is poisonous.

WHITE BRYONY

Bubonic Plague, a disease carried exclusively by the rat flea. It was this plague which killed 25 million people in Europe in the Black Death of the 14th Century. During the first decade of the present century nearly a million people died annually from this disease, but it has decreased since.

Bucaramanga, a town of Colombia, Llobría R., capital of the province Santander. It has a coffee market and there are gold, copper, and iron mines in the vicinity. Manufactures include tobacco and hats. Pop. 80,000.

Buccaneers, an association of piratical adventurers, chiefly English and French, in the 16th and 17th Centuries, with their headquarters in the Caribbean Sea, organised to plunder the ships of the Spaniards in resentment of the exclusive right the latter claimed to the wealth of the S. American continent, which they were carrying home across the sea. Their name was taken from the "boucan," or dried meat, which they prepared on their island refuges in the Indies.

Buccleuch, a glen 18 m. SW. of Selkirk, Scotland, with a stronghold of the Scott family, giving the head the title of earl or duke.

Buccleuch (title). David Scott became baron of Buccleuch, Selkirkshire, 1488. His great-grandson, Sir Walter Scott, was killed by Kerr in Edinburgh, 1562. Sir Walter's great-grandson, Sir Walter,

deliverer of Kinnmont White from Carlisle, was made Lord Scott of Bucclouch, 1603. (c. 1565-1611). His son Walter was made Earl of Buccleuch, 1619. James, Duke of Monmouth (q.v.), married Anne Scott, Countess in her own right, took the surname Scott, and was made Duke of Buccleuch, 1663. On the death of "Old Q." 1810, the dukedom of Queensberry came to Henry Scott, third Duke of Buccleuch. (1746-1812). Walter John Scott, eighth duke, born 1894, succeeded 1935. Lady Alice Montagu-Douglas-Scott (b. 1901), his sister, married the Duke of Gloucester (Prince Henry), Nov. 6, 1935.

Bucentaur, the state galley, worked by 168 rowers, in which the Doge of Venice used to sail on the occasion of the annual ceremony of wedding the Adriatic Sea by casting a ring in it, the ceremony marking Venice's rule over the seas.

BUCENTAUR

Bucephalus (i.e., ox-head), the horse which Alexander the Great, while yet a youth, broke in when no one else could, and on which he rode through all his campaigns; it died in India from a wound. The town, Bucephala, on the Hydaspes, N. India, was built near its grave.

Bucer (Butzer), Martin, a German Reformer, born in Alsace; originally a Dominican, adopted the Reformed faith; differed in certain matters from both Luther and Zwingli, while he tried to reconcile them; invited by Cramer to England, he became professor of Divinity at Cambridge, where he died. (1491-1551).

Buchan, a district in the N.E. of Aberdeenshire, Scotland, between the Rs. Deveron and Ythan; abounds in magnificent rock scenery. The Comyns were earls of it till they forfeited the title in 1309.

Buchan, Alexander, the son of a Scots weaver, who started life as a schoolmaster, and later gave up his time to the study of the weather. He discovered the "Buchan's Cold Periods," 6 in number, which occur in February, April, May, June, August, and November; secretary of the Scottish Meteorological Society and connected with the Meteorological Office in London. (1829-1907).

Buchan, John (First Lord Tweedmuir), novelist. Of Scottish birth, he went in for law, served in France in the Great War, and became a Conservative M.P. in 1927. *Frederic John*, published in 1910, was his first novel to catch attention, and *Greenmantle*, probably his most popular, has been followed by several romances. Lord High Commissioner to the Church of Scotland in 1933 and 1934. Appointed Governor-General of Canada in 1935 and raised to the peerage. P.C. 1937. (1875-).

Buchanan, George, a most distinguished scholar and humanist, born at Kilsnoo, Stirlingshire; became tutor to James V.'s illegitimate sons; imprisoned by Cardinal Beaton for satires against the monks, escaped to France; driven from one place to another, imprisoned in a monastery in Portugal at the instance of the Inquisition, where he commenced his celebrated Latin version of the Psalms; came back to Scotland, was appointed in 1562 tutor to Queen Mary, principal of St. Leonard's College at St. Andrews, and moderator of the General Assembly, in 1576 tutor to James VI., and

had several offices of State conferred on him; wrote a *History of Scotland*, and *De Jure Regni*, against the tyranny of peoples by kings; died in Edinburgh, was buried at the public expense in Greyfriars churchyard. (1506-1582).

Buchanan, James, statesman of the United States, was ambassador in London in 1853, became President in 1856, the fifteenth in order, at the time when the troubles between the North and South came to a head, favoured the South, after Lincoln's election in 1860 to the Presidency, retired into private life. (1791-1868).

Buchanan, Robert Williams, a writer in prose and verse, born in Warwickshire, educated at Glasgow University; his first work, *Undertones*, a volume of verse published 1860; wrote *The Wandering Jew*, which attacks the Christian religion, and a number of novels, of which *God and the Ant* and *The Shadow of the Sword* are the best; also some plays. (1841-1901).

Bucharest, capital of Rumania, picturesque, situated on the Dimbovitza, a tributary of the Danube, in a fertile plain, 180 m. from the Black Sea; there is a Catholic cathedral and a university; it is the emporium of trade between the Balkans and Austria; textiles, grain, hides, metal, coal, and cattle are the chief articles in its markets. Has a daily air service to Paris and Istanbul. Pop. 640,000.

Büchner, Ludwig, German physician and materialist, born at Darmstadt; lectured at Tübingen University; wrote a book entitled *Kraft und Stoff*, i.e., Force and Matter, and had to retire into private practice as a physician on account of the materialistic philosophy which he insisted on teaching. (1824-1899).

Bucket-shop, a term used to a broker not a member of the Stock Exchange, and therefore not subject to its rules and penalties. Deals are made in stocks and shares of a speculative character and often involve swindling. There are "outside" brokers, of course, who carry on a perfectly legitimate business. The word originated from the small lift or "bucket" by which members of a gambling exchange reach a Chicago office.

Buckfastleigh, an urban district of Devon, England, 5 m. NW. of Totnes. Here an abbey was founded in Saxon times, and has recently been restored by a community of French Benedictines. Pop. 2,000.

Buckhaven, a seaside resort of Fifeshire, Scotland. It has a harbour used by fishing-boats; fishing-nets are made and coal is exported. Pop. (with Methil, with which it forms a burgh), 18,000.

Buckhound, a name of a staghound bred at one time for buck-hunting. Buckhounds under a master were kept by royal persons, but the hunt was abolished in 1801.

Buckie, a fishing town of Banffshire, Scotland, on Moray Firth, the centre of the fishing district between Banff and Findhorn. It has a fine harbour. Pop. 9,000.

THE DUKE OF BUCKINGHAM

Buckingham, George Villiers, Duke of, favourite of James I. and Charles I., born in Leicestershire; rose under favour of the former to the highest

offices and dignities of the State; provoked by his conduct wars with Spain and France; fell into disfavour with the people; was assassinated at Portsmouth by Lieutenant Pelton, on the eve of his embarking for La Rochelle. (1592-1628).

Buckingham, George Villiers, Duke of, of, son of the preceding; served under Charles I. in the Civil War, was at the Battle of Worcester; became minister of Charles II.; a profligate courtier and an unprincipled man. (1627-1688).

Buckingham, James Silk, traveller near Falmouth; conducted a journal in Calcutta, and gave offence to the East India Company by his outspokenness; had to return to England, where his cause was warmly taken up; by his writings and speeches paved the way for the abolition of the Company's charter. Wrote *Travels in Mesopotamia*, a book full of archaeological information, but owing something to Diodorus Siculus. (1786-1855).

Buckingham and Chandos, Richard Plantagenet Temple-Nugent-Brydges-Chandos-Grenville, Second Duke of, son of First Duke, succeeded 1839. Known as Earl Temple. 1813-1822; Marquess of Chandos, 1822-1839. M.P. Bucks., 1818-1839. Introduced into Reform Act clause enfranchising tenants-at-will paying £30; Privy Seal, 1841-1842. Bankrupt, 1847. Wrote on agricultural distress, and memoirs of court-life. (1797-1861).

Buckingham Palace, the London residence of the King, built in 1703, and considerably enlarged since, a new front being erected in 1913.

Buckingham Palace Conference, was held in July 1914 at the instance of King George, to see whether some way could be found to meet Jister's objections to the Asquith Home Rule Bill (q.v.). The conference broke down after three days.

Buckinghamshire, English S. midland county, lying E. of Oxford, W. of Bedford and Hertford, is full of beautiful and varied scenery, hill, dale, wood, and water. The Thames forms the southern boundary, the Ouse flows through the N., and the Thame through the centre. The Chiltern Hills cross the county. Agriculture is the prevailing industry; dairy produce, cattle and poultry raising, and sheep rearing the sources of wealth. Pop. 271,400. County town, Aylesbury. The small town of Buckingham, on the Ouse, is 50 m. NW. of London. Pop. 3,000.

Buckland, Francis (Frank), naturalist, son of the succeeding, studied medicine; devoted to the study of animal life; was inspector of salmon fisheries; wrote *Curiosities of Natural History*, *Natural History of British Fishes*, etc.; contributed largely to journals such as the *Field*, and edited *Land and Water*, which he started in 1866. (1826-1886).

Buckland, William, a distinguished geologist, born at Tiverton, Devon; had a predilection from boyhood for natural science; awoke in Oxford University an interest in it by his lectures on mineralogy and geology; he was president of the British Association in 1839; exerted himself to reconcile the teachings of science with the accounts in Genesis; was made Dean of Westminster by Sir Robert Peel. (1784-1858).

Buckle, George Earle, man of letters, editor of *Times*, 1884-1912, born at Twerton, near Bath. Deceived into U.E.

publishing Pigott's forgery (which accused Parnell of being responsible for outrages in Ireland), tendered resignation 1889; for 23 years longer struggled against paper's ill-fortune, culminating in its sale to Northcliffe. Completed, 1920, *Life of Disraeli* begun by Monypenny; edited Queen Victoria's *Letters*. (1854-1935).

Buckle, Henry Thomas, historian of civilisation; born at Lee, Kent; son of a shipowner; was too delicate for regular schooling. Travelled widely and learned to read 19 languages. Published 2 volumes of *History of Civilisation in England*, which were intended as part of a greater plan, but which was never completed. It had a tremendous contemporary reputation. (1821-1862).

Buckmaster of Chedington, Stanley Owen Buckmaster, First Viscount, Lord Chancellor, 1915-1916, was son of a science master at S. Kensington. Called to Bar, 1884. K.C., 1902; Chancery practice. M.P. (Lib.) Cambridge, 1906-1910; Keighley, 1911-1915. Solicitor-General, 1913-1915. Ennobled 1915. Viscount, 1933. Opposed capital punishment and advocated divorce law reform. (1861-1934).

Buckram, a term once used to describe a rich woven cloth used in church vestments. To-day, a stiff wide-meshed cotton or linen material for stiffening belts, collars, etc., also book covers.

Buckskin, a kind of soft leather made but now usually from sheep skins. The name is also given to a twilled woollen material without pile.

Buckthorn, the common name of certain shrubs of the Rhamnaceae order. The common or purging buckthorn (*Rhamnus cathartica*) berries are of medicinal value and sap-green is manufactured from the juice. Another English variety is the Alder buckthorn (*R. frangula*), the bark of which (official) is also of value as a cathartic and the wood of which yields an excellent charcoal.

BUCKTHORN

Buckwheat

(*Fagopyrum esculentum*), a plant allied to the rhubarb, and cultivated especially in America for its flour. The flower produces honey, and in England poultry food is made from the grain. It also serves for green fodder.

Bucolics, a name for pastoral poetry, of which Theocritus may be said to be the founder. Virgil used the word as an alternative name for his Eclogues, and critics have suggested that he wished to compare favourably with Theocritus.

Budapest, a twin city, the capital of Hungary, on the Danube; Buda (Ger. Ofen) on the right bank and Pesth on the left, the two cities being connected by a suspension bridge, the former standing on a rocky elevation and the latter on level ground. Pop. 1,061,000.

Buddha, Gautama, or Sakya-Muni, the founder of Buddhism about the 6th Century B.C., born a Hindu, of an intensely contemplative nature, son of a ruler of the Sakyas in N. India; retired into solitude when about 30; consulted religious books, could get no good out of them, till at the end of ten years, having abstracted himself more and more from everything external,

as he sat brooding under the Bo-tree alone with the universe, the light of truth rose upon him, and he became Buddha, i.e., the Enlightened; he became a preacher to others of what had proved salvation to himself, continuing to do so for 40 years, and dying of dysentery when nearly 80.

Buddhism, the religion of Buddha, eschewing all speculation about God and the universe, set itself solely to the work of salvation, the end of which was the merging of the individual in the unity of being, and the "way" to which was the mortification of all private passion and desire, which mortification, when finished, was the Buddhist Nirvana. Buddha wrote nothing himself, but some 300 years after his death his teachings assumed a canonical form, being collected in the Tripitaka, or "triple basket."

Buddhism from the first was a proselytising religion; it at one time overran the whole of India, and is understood to be the religion of 340 millions of the human race to-day. The sacred writings of Buddhism are in three parts: (1) for the laity; (2) for the devotees and (3) a metaphysical section. The principal texts are the Chinese and Japanese translations of Sanskrit MSS. and the books of Ceylon Buddhists in the Pali language.

Buddhism embraces Four Sublime Verities: (1) that Suffering exists; (2) that it is caused by Desire; (3) that there is a way to end it, and (4) that this way consists in following the 8-fold path of Right Doctrine, Right Purpose, Right Discourse, Right Behaviour, Right Purity, Right Thought, Right Lowliness, Right Rapture. In India Buddhism has declined after about a thousand years before a popular preference for Brahminism.

Budding, a process in horticulture whereby plants are reproduced and new varieties bred. The general process is to take a bud from the tree which it is wished to propagate (the parent plant) in July or August and insert it in a T-shaped cut in the bark of the stock-plant near the ground. This is tightly bound with raffia and left for the bud to unite with the stock-plant. In order to divert the strength of the plant into the bud the stock-plant is cut away the next spring just above the bud. It is essential that the bud shall be transferred to a closely related stock—e.g., roses to roses, apples to pears, apricots to plums, etc.

Bude, a seaside resort of N. Cornwall, England. Pop. 4,000.

Budějovice (formerly **Budweis**), a trading town in Bohemia, Czechoslovakia, Black lead pencils, porcelain, chemicals, etc., manufactured. Pop. 44,000.

Budget, the annual account of national finances submitted to the House of Commons every April by the Chancellor of the Exchequer, and so called from the "bougette" or leather bag he used to carry. The statement falls into two parts: an account of the results of expenditure and revenue, and an estimate for the next 12 months.

Budleigh Salterton, a seaside resort of S. Devon, England, 4 m. E. of Exmouth. Pop. 3,000.

Budweis. See **Budějovice**.

Buenos Aires, federal capital of the Argentine Republic, stands on the right bank of the broad but shallow R. Plate, 150 m. from the Atlantic; it is a progressing city, improving in appearance, with a cathedral, several Protestant churches, a university and military school, libraries and hospitals; printing, cigar-making, cloth and book manufacture are the leading industries; it is the principal Argentine port, and the centre of export and import

trade; the climate is mild and moist; a great deal of the foreign trade is conducted through Montevideo, but it monopolises all the inland trade. The entrances to the docks require constant dredging owing to the shallowness of the R. Plate. The city has 5 boulevards, along which are imposing buildings and spacious parks. Pop. 2,230,000. Also the largest province of the Argentine Republic, its coast-line extending between the mouths of the Plate and Rio Negro. Fertile and well-watered, enabling vast numbers of cattle and sheep to be reared. Pop. (excluding the federal capital) 13,300,000.

Buffalo, a ruminating horned animal, resembling an ox, but larger and

more powerful, native to India and Central S. Africa. The Indian buffalo is as a rule domesticated as a beast of burden and in cultivation of rice-fields. It has spread to Egypt and S. Europe. The Cape buffalo of

CAPE BUFFALO

S. Africa is larger and fiercer than the Indian variety, and has short, flat horns. Its skin affords material for native shields. The water-buffalo of the Philippine Is. is a smaller species.

Buffalo, a city of New York State, U.S.A., at the E. end of Lake Erie, 300 m. due NW. of New York; is a well-built, handsome, and healthy city; the railways and the Erie Canal are channels of extensive commerce in grain, cattle and coal; while immense ironworks, tanneries, breweries, and flour-mills represent the industries; electric power for lighting, traction, and factories is supplied from Niagara. Pop. 573,000.

Buffon, **George Louis Leclerc, Comte de**, a great French naturalist, born at Montbard, in Burgundy; his father one of the *noblesse de robe*; studied law at Dijon; spent some time in England studying the English language; devoted from early years to science, though more to the display of it, and to natural science for life on being appointed keeper of the Jardin du Roi (now Jardin des Plantes); assisted by Daubenton and others, produced 15 vols. of his world-famous *Histoire Naturelle* between the years 1749 and 1767. The saying "Style is the man" is ascribed to him, and he has been measured by some according to his own standard. Neither his style nor his science is rated of any high value now. (1707-1788).

Bug, a parasitic insect of which there are over 20,000 species. They feed on the juices of plants or the blood of animals. Many kinds are winged, and the chief characteristic is the biting or sucking mouth-organs. Many types possess stink-glands which emit an unpleasant smell. They multiply rapidly.

Bug, two rivers of E. Europe, the S. or Black Sea Bug, flowing S. through the Ukraine, the W. or Polish Bug, N. through the Ukraine and Poland, to the Vistula.

Buganda, a province of the Uganda Protectorate NW. of Lake Victoria, a native kingdom under a "Kubaka" and governed by three native ministers and a native assembly or "Lukiko."

Bugeaud de la Piconnerie,

Thomas, marshal of France, born at Limoges, served under Napoleon; retired from service till 1830; served under Louis Philippe; contributed to the conquest of Algiers; was made Governor-General and created Duke for his victory over the forces of the Emperor of Morocco at the Battle of Isly in 1844. (1784-1849).

Buggy, a word of Indian origin applied to various types of carriage, a light, four-wheeled, hooded vehicle in the U.S.A.; a two-wheeled carriage with no hood in England, but with a hood in India.

Bugle, a wind instrument of copper with brass soldered to exposed parts. Widely used in armies, because of its penetrating note, for conveying various orders by certain calls.

Bugloss, the popular name for certain plants, common in England, which have rough, bristly leaves resembling an ox tongue, hence the name. It appears as a weed particularly in cornfields. *Lycopsis arvensis* is the small bugloss; *Echium vulgare* the viper's bugloss.

Buhl, ornamental work for furniture, which takes its name from the inventor (see below), consisted in piercing or inlaying metal with tortoiseshell or enamel, or with metals of another colour; much in fashion in Louis XIV.'s reign.

Buhl, or **Boule**, **Charles André**, an Italian cabinet-maker, inventor of the work which bears his name. (1642-1732).

Building Society, a society formed for the purpose of raising subscriptions from the members for a stock or fund from which to grant advances upon freehold or leasehold property by means of mortgage, and to provide a means of investment of small savings. Building Societies were originally intended to assist the working classes to purchase dwelling-houses, and their growing usefulness produced an Act in 1836 for their encouragement and protection. Membership is now no longer restricted to the working classes. A Terminating Building Society fixes a date, according to its rules, for the termination of its activities, or it may cease to function when all the members have received advances. Permanent Building Societies, as the name indicates, have no terminating clause in their rules.

The majority of Building Societies are incorporated by certificate from the Registrar of Friendly Societies, who is also Registrar of Building Societies. Many restrictions as to the inflow of new money for investment were relaxed during 1934. Rate of interest to investors is about 3½% free of income-tax. The extraordinary growth in Building Societies of recent years is due to the housing shortage following the war and a more popular desire on the part of wage-earners to own their houses.

Altogether there are over 900 Building Societies in Great Britain. The amount advanced by all Building Societies in 1936 was £140,000,000. The total resources of the Societies amount to no less than £855,000,000.

Building Stone, stone quarried from the earth for constructional purposes. Such stone should be able to resist weather, carry the weight of the building, and be cut with reasonable ease. The most suitable are granite, sandstone and limestone. Granite is used largely in Aberdeen, is strong and impervious to moisture. Sandstone, of which the best is Craigleith sand, is white or yellow and easily dressed. Limestone weathers easily and includes Portland stone, which furnished much of the material for St. Paul's Cathedral and the Houses of Parliament. Bath stone and marble.

Builth Wells, a spa and market town 15 m. N. of Brecon. It has saline, chalybeate, and sulphurous springs. Pop. 1,700.

Bukoba, port and district of Tanganyika Territory, E. Africa, on the W. bank of Lake Victoria. It is 3,750 ft. above sea-level and stands amidst large coffee plantations. It is the natural harbour

of the Ruanda district, but the port is much exposed during rough weather, though better landing facilities have now been provided.

Bukovina, a mountainous, forested and fertile district of Rumania, bounded on the W. by the Carpathian Mts.; formerly an Austrian duchy; the scene of much fighting during the Great War, being occupied by Russia. Cap. Cernault (Czernowitz). Area 4,000 sq. m. Pop. 900,000.

Bulawayo, or **Buluwayo** (lit. "the place of slaughter"), trading town of Matabeleland, S. Rhodesia, very near the kraal of Lobengula, King of the Matabele; connected by rail with Cape Town and Beira. Its Government House was formerly the property of Cecil Rhodes, of whom there is a large bronze statue by John Tweed in Main Street. Near are the Matoppos Hills, where are buried Rhodes and Jameson. Pop. 33,000 (13,000 Europeans).

Bulb, a modified leaf-bud, formed on a plant, or beneath the surface of the ground, emitting roots from its base. It is formed of fleshy leaf-scales or of closely-packed concentric coats or layers of leaves, containing a reserve supply of food. Many spring flowers are bulbs, including the narcissus, daffodil, etc. They are to be distinguished from the corns, such as the crocus, in which the swollen part is a thickening of the stem.

Bulbul, a family of thrush-like birds belonging to the Pycnonotidae family, common to Abyssinia, India and Malaya. They are usually poor in flight, frequent jungles, gardens, etc., and are as much admired in the E. for their song as the nightingales among ourselves.

Bulford, village of Wiltshire, England, 2 m. NE. of Amesbury. A stone said to be similar to those of Stonehenge lies in the Avon. Here is a large military camp. Pop. (incl. military) 4,000.

Bulgaria, a Balkan kingdom, with the N. mountains and fertile plains in the N., mountains and forests in the S.; Turkey and Greece the southern boundary, Yugoslavia the western, the Danube and the Dobruja (Rumania) the northern, while the Black Sea washes the eastern shores. The climate is mild, the people are industrious; chief exports are tobacco, eggs, fruit and cereals; vines, cotton, beetroot (for sugar) and roses (for attar of roses) are also grown. The production of silkworm cocoons is also considerable. Sofia, the capital, is the seat of a university. Varna, on the Black Sea, is the principal port. Bulgaria was cut out of Turkey and made independent in 1878, and E. Roumelia incorporated with it in 1885. In 1896 Bulgaria declared her independence of Turkey, and Prince Ferdinand (abdicated 1918) became Tsar of the Bulgarians. Bulgaria entered the Great War in Oct. 1915, on the side of the Central Powers. With the help of a powerful Austro-German army, she overran Serbia. In 1918 the Bulgarian army was defeated and an armistice signed on Sept. 30, 1918. The present Tsar, Boris III., is Ferdinand's son. Area 39,300 sq. m. Pop. 6,000,000.

Bulkheads, a term generally used for the interior space of a ship. Usually they are water-tight and built transversely. They serve to restrain the inrush of water when damage results to a ship either in naval action or by collision. Many are automatically closing. Certain standards are laid down by Lloyd's. The term also includes the sea-wall which lines the shore and from which jetties, etc., obtrude, and partitions in mines and tunnels.

Bull, an edict of the Pope, so called from **Bull**, a leaden seal (Latin *bulia*) attached to it.

Bull, John, a humorous impersonation of the collective English people, conceived of as well-fed, good-natured, honest-hearted, justice-loving, and plain-spoken; the designation is derived from Arbuthnot's satire, *The History of John Bull* (1712), in which the Church of England figures as his mother.

Bull, Ole Bornemann, a celebrated violinist, born in Bergen, Norway, pupil of Paganini; mostly performed his own compositions, and made tours in Europe and America with immense success. (1810-1880).

Bulldog, a species of dog used during the Middle Ages in bull-baiting. It is said to have descended partly from the mastiff. They are safe and good-natured, especially with children. White is the standard colour, though there are brindle, fawn and brown varieties. The lower jaw protrudes, and the face is set well back. The chest and legs are well developed, and the neck is short and thick.

Bullen, Frank Thomas, author, served at sea on whaling-ships, and wrote several notable books on sea life, among them *The Cruise of the Cachalot*, *The Log of a Sea Waif*, and *Creatures of the Sea*. (1857-1915).

Buller, General Sir Redvers Henry, Africa, Egypt and the Sudan, with distinction, in the 60th King's Royal Rifle; held staff appointments, and was for a short time Under-Secretary for Ireland. On the outbreak of the Boer War he was made commander of the British forces, but was superseded by Lord Roberts owing to the number of reverses; he later relieved Ladysmith, and in 1901 he was retired on half-pay. (1839-1908).

Bullet, a projectile discharged from small arms such as a gun, rifle or revolver. At first a heavy, ball-shaped lead shot, the bullet was improved when gun-barrels were rifled or grooved, and a greater degree of accuracy as well as range resulted. The bullet of to-day is pointed, and consists of a lead core enclosed in a case of harder metal. Dum-dum or expanding bullets are forbidden in civilised warfare.

Bull-fighting, a sport popular with the Latin races, especially in Spain, and consisting of a combat between men and bulls. Bulls are specially bred for fighting, and the best are Andalusian and Castilian. The most famous bull-ring is at Madrid—the Plaza de Toros. Mounted picadors, armed with lances, attack the animal until it is goaded to a sufficient frenzy. The banderilleros further excite it by planting banderillas (barbed darts with gaily coloured ribbons) in its neck. Finally the bull is distracted by the waving of red and yellow capes and a matador on foot armed with a sword stabs it to death by severing the vertebrae of the neck. In Spain the sport has necessarily waned during the Civil War. The worst abuses are avoided in France.

Bullfinch, a bird of the finch (Fringillidae) family, common in England. Its head and neck are thicker than those of other finches. It frequents wooded districts of N. and Middle Europe, feeds on seeds in autumn and fruit-tree buds in spring; breeds in England.

Bull Frog (*Rana palustrana*), a large species of frog found in N. America, 8-12 in. long, of a dusky brown colour. The croaking uttered by it in the breeding season when the males congregate resembles the lowing of cattle.

Bullinger, Heinrich, a Swiss Reformer, successor of Zwingli; assisted in drawing up the Helvetic Confession; was a correspondent of Lady Jane Grey. (1504-1575).

Bullion, uncoined silver or gold, in bars, plate or other forms, but the term is frequently employed to signify the precious metals, coined and uncoined, especially with reference to imported and exported bullion.

Bull Run, a stream in Virginia, U.S., 25 m. from Washington, where the Union army was twice defeated by the Confederate, July 1861 and Aug. 1862.

Bulls and Bears, a term used on the Stock Exchange referring to those speculators who, in the former case, buy stock in order to sell it, before it must be subscribed or paid for, at a profit. In the latter case, the term means those who sell stock before they have bought it, hoping for a fall in price before settlement.

Bull Terrier, a dog larger than a strain of the bulldog. Its coat is short, close, and fine, and the colour is generally white. The dog has great strength and courage.

Bülow, Bernhard, Prince

von, Chancellor of the German Empire; early entered the Foreign Office. Was secretary to several embassies and Chargé d'Affaires to Greece during the Russo-Turkish War. He reinked the Kaiser for his indiscreet *Daily Telegraph* interview in 1908 and resigned in 1909 as a result of a budget defeat. During the Great War he was recalled as Ambassador to Italy. (1849-1929).

Bülow, Friedrich Wilhelm, Baron von, a Prussian general; served his country in the war with Revolutionary France; defeated the French under the Empire in several engagements, and contributed to the victory at Waterloo, heading the column that first came to Wellington's aid at the decisive moment. (1755-1816).

Bülow, Karl von, German general. He distinguished himself in the Franco-Prussian War and was in charge of the 2nd German Army, which invaded Belgium in 1914; retired in 1916 after the Battle of the Aisne. (1846-1921).

Bulrush, the popular name in England of several species of marsh plants, the inflorescence of which is the familiar dense spike. The principal species are two of the genus *Typha*, *T. latifolia* and *T. angustifolia*, and the *Scirpus lacustris*, the stems of which are sometimes used for matting and caning chair seats.

Bulwark, that part of the side of a ship which projects above the deck, affording protection against heavy seas, bullets, etc.

Bumboat, a term for small boats, generally managed by women, which ply between vessels and the land, carrying provisions, stores, etc. Erroneously applied to the native trading-boats often seen in the East on the arrival of a liner.

Bunbury, a seaport and summer resort of W. Australia, in Wellington Co. Coal, tin, agricultural produce and timber are exported from its fine harbour in Koombah Bay. Pop. 6,000.

Buncombe, a district in N. Carolina, U.S.A., the representative of which many years ago delivered a dull speech in the U.S. Congress, whence the phrase to "talk Buncombe," i.e., to please one's constituency.

BULL TERRIER

Bundaberg, a river port and town of the Burnett, 10 m. from its mouth. Sugar is grown and made, and it exports chiefly sugar, treacle and timber. Pop. 11,000.

Bundelkhand, a territory in India, Provinces and Central Provinces, including a number of small states; has been extensively irrigated at great labour and expense. Diamonds are found.

Bungalow, a one-storied dwelling, roof and a verandah, in use in India by Europeans. In England a house with one floor, or a light structure for holiday occupation.

Bungay, market town of Suffolk, England, on the Waveney. Flour-milling, malting and printing are carried on. It has an ancient castle and two interesting old churches. Pop. 3,000.

Bunhill Fields, an old cemetery off the City Road, London, first used by dissenters in 1685, and containing the graves of Bunyan, Defoe, Isaac Watts and William Blake.

Bunion, a swelling consisting of a membranous sac, called a bursa, over the head of the bone at the base of the great toe. The most common cause is ill-fitting footwear.

Bunker Hill, an eminence of 112 ft., now included in Boston, U.S.A., the scene on June 17, 1776, of the first great battle in the American War of Independence.

Bunsen, Robert Wilhelm, distinguished Chemist at Heidelberg; invented the charcoal pile, the magnesium light, and the burner named after him; discovered the antidote for arsenical poisoning, hydrate of iron, and studied the cacodyl compounds. He founded the study of spectrum analysis, discovered the salts of rubidium, and isolated metallic magnesium, and lithium. (1811-1899).

Bunsen Burner, invented by R. W. Bunsen, is a burner in which a determined amount of air

can be admitted to mingle with the gas before combustion. The result is a non-luminous flame leaving no deposit. It is largely used in chemical operations and for incandescent gas-burners, etc. The airholes on the side, the opening of which can be adjusted by means of a revolving regulator, are its essential features.

BUNSEN BURNER.

Bunter, a series of rocks forming the lowest division of the Triassic system, consisting of red sandstones and conglomerates; found in Germany and the English Midlands.

Bunting, a group of birds (the *Emberizinae*) of the Fringillidae (Finch) family, well represented in the British Is., the Corn-, Yellow-, Reed-, and Snow-buntings breeding there and a number of other species being found as visitors.

Buntingford, market town of Hertfordshire, 10 m. N. of Ware, the centre of the Puckeridge Hunt. Pop. (rural dist.) 5,000.

Bunyan, John, author of the *Pilgrim's Progress*, born in Elstow, near Bedford, the son of a tinker, himself followed that humble craft; after an early conversion

was imprisoned for preaching to his poor neighbours, a confinement which extended first and last over twelve and a half years, and it was towards the close of it, and in the precincts of Bedford jail, in the spring of 1678, that he dreamed his world famous dream, the *Pilgrim's Progress*; encouraged by the success of it—for it leapt into popularity at a bound—Bunyan wrote some sixty other books, but except this, his masterpiece, not more than two, *Grace Abounding* and the *Holy War*, continue to be read. (1628-1688).

Buoy, any floating body employed to point out the particular situation of a ship's anchor, a shoal, the direction of a navigable channel, etc. They are made of wood, or more commonly to-day of wrought-iron plates riveted together and forming hollow chambers.

Burbage, Richard, English tragedian, Shakespeare, took the chief rôle in *Hamlet*, *King Lear*, *Richard III.*, etc. (1587-1619).

Burckhardt, John Ludvig, traveller, sent out from England by the African Association to explore Africa: travelled by way of Syria; acquired a proficiency in Arabic, and assumed Arabic customs; pushed on to Mecca as a Mussulman pilgrim—the first Christian to risk such a venture; returned to Egypt, and died at Cairo just as he was preparing for his African exploration; his travels were published after his death. (1784-1817).

Burdekin, river of Queensland, Australia, emptying into Upstart Bay after a course of 350 m.

Burdett, Sir Francis, a popular member of the House of Commons, married Sophia, the youngest daughter of Thomas Coutts, a wealthy London banker, and acquired through her a large fortune; becoming M.P., he resolutely opposed the Government measures of the day; advocated radical measures of reform, many of which have since been adopted; was prosecuted for a libel, fined £1,000 for condemning the Peterloo massacre, and imprisoned 3 months; joined the Conservative party in 1835, and died a member of it. (1770-1844).

Burdett-Coutts, Angela Georgina, daughter of Sir Francis Burdett, inherited the wealth of Thomas Coutts, her grandfather, which she devoted to all manner of philanthropic as well as patriotic objects; was made a peeress in 1871; received the freedom of the City of London in 1874, and in 1881 married Mr. William Lehmann Ashmead-Bartlett, an American, who obtained the royal licence to assume the name of Burdett-Coutts. (1814-1906).

Burdock (*Arctium lappa*), a plant of the Compositae order, often found growing by roadsides. The leaves (bracts) are hooked and woody, and assist in dispersing the fruit when it is ripe by clinging to the fur of animals, etc. It occurs in Europe and Asia, and is common in England.

Bureaucracy, a form of government where every special need is controlled and supplied by officials. The term is used to imply criticism of a Government which allows its departments to assume too great an authority, in which sense "red tape" is also often employed.

Burette, a graduated, cylindrical tube fitted with a tap, used in practical chemistry for delivering measured quantities of liquids.

BURDOCK.

Burgas, one of the chief seaports of Bulgaria, on the Black Sea; exports include wheat, wool, etc. Pop. 36,000.

Burgenland, a province of Austria, bordering on Hungary, chiefly agricultural. Area 1,532 sq. m. Pop. 299,000. Cap. Eisenstadt.

Burger, **Gottfried August**, a German lyric poet, author of the ballads *Lenore*, which was translated by Sir Walter Scott, and *The Wild Huntsman*, as well as songs; led a wild life in youth, and a very unhappy one in later years; died in poverty. (1747-1794).

Burgess, a citizen of a borough, sometimes called a burgher. First mentioned with significance in 1264 at the formation of Simon de Montfort's Parliament, when two burgesses from each borough were included in its composition. To-day a burgess is qualified by his inclusion on the roll of burgesses as a rate-paying occupier of a house or business premises. Women are eligible as burgesses. The receipt of poor relief does not disqualify a burgess from any voting privilege. An honorary burgess is one who for some public service is granted the freedom of the city or borough.

Burgh, **Hubert de**, probably born in Magna Charta. Justiciar of England from 1215. Defended Dover, 1217. Under Henry III. opposed Peter des Roches, Bishop of Winchester. Earl of Kent, 1227. Disgraced through intrigues of foreign clerics, 1232. (d. 1243).

Burglary, consists, at common law, in the dwelling-house of another in the night (i.e., between the hours of 9 p.m. and 6 a.m.) with intent to commit a felony. But it is extended by statute to include anyone who (a) shall enter a house with intent to commit any felony therein, or (b) being in such house, shall commit a felony in it; and in either case, breaking out of the house in the night. The breaking must be of some part of the house (e.g., an outer or an inner door or window) and may be constructive (e.g., the gaining admission under the pretext of taking lodgings); and the slightest entry (e.g., putting in a finger or a hooked stick) is sufficient. The dwelling-house need not be occupied at the time (e.g., the tenant may have locked it up and gone to the seaside for a holiday). The crime is always a felony, and punishable by penal servitude up to life. Simple cases of burglary can be tried at Quarter Sessions (q.v.). If the offence is committed by day, or if it be in some place other than a dwelling-house it is called housebreaking.

Burgomaster, the title of the chief municipal town, answering to the English Mayor. In German towns the *burgenmeister* is the president of the executive council. The Scottish "provost" is a similar title. In Swiss Cantons there is a *burgomaster*, and the title is employed in Belgium.

Burgos, a province of N. Spain in Old Castile extending from the Cantabrian Mts. in the N. to the Duero in the S. and crossed by ranges of mountains. It is well watered and heavily forested; corn and cattle-raising are the chief industries. Area 5,500 sq. m. Pop. 363,000.

The cap. of the province and ancient cap. of Old Castile is a town of the same name on the Arlanzón, 225 m. N. of Madrid by rail; boasts a magnificent cathedral of the Early Pointed period, and an old castle; was the birthplace of the Cid, and once a university seat; it has leather and woollen industries. Here on July 30, 1936, General Franco set up an insurgent Government under the title "Junta de Defensa Nacional." Pop. 43,000.

Burgoyne, **John**, English general, and distinguished as the last sent out to subdue the revolt in the American colonies; after a victory or two was obliged to capitulate to General Gates at Saratoga and fell into disfavour; defended his conduct with ability and successfully afterwards; devoted his leisure to poetry and the drama, the *Heiress* being his best play. (1723-1792).

Burgundy, a Teutonic duchy of varying extent in the SE. and E. of France; annexed to France as a province in the 6th Century. In the 9th Century it again became an independent kingdom, but on the death of Rudolph III. was reduced to the status of a duchy, and returned finally to the French crown in 1361. The country is noted for its wines.

Burgundy wines, the produce of the vineyards situated in the depts. of Yonne, Saône-et-Loire, and Côte-d'Or, in France. Beaune is the centre of the trade. The alcoholic strength is about 12 per cent., and the ordinary wines are stouter, rougher, and sweeter than claret. The finest have a velvety softness.

Burhanpur, a town in the Central Provinces of India, in the Nimar district, 280 m. NE. of Bombay; was at one time a centre of the Mogul power in the Deccan, and a place of great extent; is now in comparative decay; formerly famous for its muslins, silks and brocades, which are still produced in small quantities. Captured by Gen. Wellesley in 1803 and ceded to Britain in 1860. Pop. 35,000.

Burial Acts, laws relating to burial, burial-places and modes of interment consolidated by the Burial Laws Amendment Act of 1880. Amendments were made in 1900. Under these Acts a coroner's order or registrar's certificate is to be delivered to the burial authorities, and the person who carries out the burial must give notice to the registrar within 7 days. The time of burial must be between 10 a.m. and 6 p.m. between April 1st and Oct. 1st, or between 10 a.m. and 3 p.m. between Oct. 1st and April 1st.

Buridan, **Jean**, a scholastic doctor of the 14th Century, born in Artois, and famous as the reputed author, though there is no evidence of it in his works, of the puzzle of the hungry and thirsty ass (called after him Buridan's Ass), between a bottle of hay and a pail of water, a favourite illustration of his in discussing the freedom of the will.

Burke, **Edmund**, orator and philosophic writer, born at Dublin, and educated at Dublin University; entered Parliament in 1765; distinguished himself by his eloquence on the Liberal side, in particular by his speeches on the American war, Catholic emancipation, and economic reform; his greatest oratorical efforts were his speeches in support of the

impeachment of Warren Hastings; he was a resolute enemy of the French Revolution, and eloquently denounced it in his *Reflections*; wrote in early life two small but notable treatises, *A Vindication of Natural Society*, and another on our ideas of the *Sublime and Beautiful*, and some time after planned the *Annual Register*, to which he was to be the last chief contributor. (1729-1797).

Burke, **Sir John Bernard**, genealogist, born in London, of Irish descent, author of the *Peerage and Baronetage of the*

United Kingdom; produced, besides editing successive editions of it, a number of works on aristocratic genealogies. (1814-1892).

Burke, Robert O'Hara, Australian explorer, born in Galway; conducted an expedition across Australia, but on the way back both he and his two companions perished after terrible sufferings from privation and drought. (1820-1861).

Burke, William, a notorious murderer, native of Ireland; executed in 1820 for wholesale murders of people in Edinburgh by suffocation, after intoxicating them with drink. Their bodies he sold for dissection to an Edinburgh anatomist of the name of Knox, whom the citizens mobbed; he had an accomplice (William Hare) as bad as himself, who, becoming informer, was pardoned. His crimes gave rise to the expression "to burke."

Burleigh (or Burghley), William Cecil, Lord, a great statesman, born in Lincolnshire, educated for the legal profession, and patronised and promoted by the Protector Somerset; managed to escape the Marian persecution; Queen Elizabeth recognised his statesmanlike qualities, and appointed him Chief Secretary of State, an office which, to the glory of the Queen and the good of the country, he held for forty years, till his death. He was made a baron in 1571 and in 1572 succeeded the Marquises of Winchester as Lord High Treasurer. His administration was conducted in the interest of the common weal without respect of persons. (1521-1598).

Burlesque, the art of distorting, exaggerating, and ridiculing a work of art in a humorous manner in writing, acting, or speech, to be distinguished from satire, in which the element of malice is present, and parody, which is a closer imitation of style and manner.

Burlington House, a public building in Piccadilly, London, headquarters of several learned societies; here each year the Royal Academy holds its annual exhibition of pictures. It consists of old Burlington House, bought by the State in 1854, and New Burlington House built subsequently.

Burma, India, now separated, the executive authority being vested in a Governor (acting on behalf of the Crown) and an Advisory Council of Ministers. There is a bi-cameral legislature, the Lower Chamber being elective, the Upper partly elective (from the lower Chamber) and partly nominated by the Governor. The country lies E. of the Bay of Bengal, and is bounded landward by Bougal, Assam, Tibet, China and Siam; the country is mountainous, drained by the Irrawaddy, Salween, and Sittang Rs., whose deltas are flat, fertile plains; the heights on the Chinese frontier reach 15,000 ft.

The climate varies with the elevation, but is mostly hot and trying; rice is the chief crop; the forests yield teak, gum, and bamboo; the mines, iron, copper, lead, silver and rubies.

Burma is now divided into 7 administrative divisions under Commissioners (4 in Lower Burma and 3 in Upper). The Shan States in the E. of Upper Burma, the Arakan Hills and a few other districts are under special administration. Lower Burma consists of the coastal tract from Bengal to Siam. Upper Burma, cap. Mandalay, an empire nearly as large as Spain, was annexed in 1886. Area (including the Shan States, etc.) 291,000 sq. m. Pop. 15,000,000. Cap. Rangoon.

Burnaby, Frederick Gustavus, a traveller of daring adventure, born at Bedford, a tall, powerful man; Colonel of the Royal Horse Guards; travelled with Gordon in the Sudan; distinguished

for his ride to Khiva in 1875 across Tartary, of which he published a spirited account, and for his travels, the next year, in Asia Minor and Persia, and his account of them in *On Horseback through Asia Minor*; killed, pierced by an Arab spear, at Abu Klea; a daring aeronaut, he crossed the Channel to Normandy in a balloon in 1882. (1842-1885).

Burnand, Sir Francis Cowley, editor of *Punch*; studied for the Church, and became a Roman Catholic; an expert at the burlesque, and author of a series of witty papers entitled *Happy Thoughts*, wrote several plays, of which *Black-eyed Susan* is the best known. (1830-1917).

Burne-Jones, Sir Edward, artist, of Welsh descent; came early under the influence of the Pre-Raphaelite movement; he was one of the foremost, if not the foremost, of the artists of his day; imbued with ideas that were specially capable of art-treatment; William Morris, Dante Gabriel Rossetti and he were bosom friends from early college days at Oxford, and Rossetti's influence is evident in his early work. The Tate and other public galleries possess some of his finest paintings. (1833-1898).

Burnes, Sir Alexander, born at Montrose, his father a cousin of Robert Burns; was an officer in the Indian army; appointed Resident at Kabul; was murdered, with his brother and others, by an Afghan mob. (1805-1841).

Burnet, Gilbert, born at Edinburgh, of an old Aberdeen family; professor of Divinity in Glasgow; afterwards preacher at the Rolls Chapel, London; took an active part in supporting the claims of the Prince of Orange to the English throne; was rewarded with a bishopric, that of Salisbury; wrote the *History of the Reformation*, an *Exposition of the Thirty-nine Articles*, and the *History of His Own Times*. (1643-1715).

Burnett, Mrs. Frances Eliza Hodgson, novelist, born in Manchester, resident for a time in America; wrote *That Lass o' Lowrie's*, *Little Lord Fauntleroy*, and several other novels, characterised by shrewd observation, pathos and descriptive power. (1849-1924).

Burney, Sir Cecil, Admiral of the Fleet. He first saw service in 1832, and was in charge of the Atlantic Fleet in 1911. In 1914 he was in command of the Channel Fleet, and later acted as second in command of the Grand Fleet, in which capacity he served at Jutland. Second Sea Lord, 1917; Admiral of the Fleet, 1920. Created a Baronet, 1921. (1858-1922).

Burney, Frances. See **D'Arbly**.

Burnham, Sir Edward Levy-Lawson, First Baron, born in London, son of Joseph Moses Levy, printer. Assumed uncle's name of Lawson, 1875. Took over management of *Daily Telegraph* from his father, 1885. A Liberal paper, it became Unionist that year. (1833-1916).

Burnham, Sir Harry Lawson Webster, Second Baron, called to Bar, 1891. M.P., 1885-1892; 1893-1895 and 1905-1906; 1910-1916. Also served on the L.C.C. Mayor of Stepney, 1908-1909. Succeeded to Barony, 1916. Viscount, 1919. Sold *Daily Telegraph*, 1927. (1862-1935).

Burnham Beeches, a wood of large girth in Buckinghamshire, England, 3 m. from Maidenhead. It was acquired by the City of London Corporation in 1879 and is open to the public. Burnham, the village close by, has remains of an old abbey and the gateway to a former market place dated the middle of the 12th Century. Pop. 4,100.

Burnham-on-Crouch, a town of Essex, England, on the N. estuary of the Crouch; a yachting resort; has oyster beds. Pop. 3,416.

Burnham-on-Sea, a seaside resort of Dorset, England, 7 m. N. of Bridgwater, with wide expanses of sand. Pop. 5,000.

Burnley, a manufacturing town in Lancashire, England, 27 m. N. of Manchester; with cotton mills, foundries, etc. Pop. 98,300.

Burnouf, Eugène, an illustrious Orientalist, born in Paris; professor of Sanskrit in the Collège de France; an authority on Zend or Zoroastrian literature; edited the text of and translated the *Biagavata Purana*, a book embodying Hindu mythology; made a special study of Buddhism; wrote an introduction to the history of the system. (1801-1852).

Burnous, a hooded cloak worn by Arabs, a full, loose garment, the hood resembling somewhat that worn by Capuchin friars. It is usually white, but occasionally brown and fawn.

Burns, Robert, born at Vauxhall, of humble parentage; trained to be an engineer, imbibed socialistic ideas from a fellow-workman, a Frenchman, a refugee of the Commune from Paris; became a platform orator in the interest of Socialism, and popular among the working class; was 4 times elected member of the London County Council for Battersea; and represented Battersea in Parliament, 1892-1918; was President of the Local Government Board, 1903, in Campbell-Bannerman's administration, a post which he held until 1914; became president of the Board of Trade in 1914, and resigned on the outbreak of war. Never joined the Labour Party; retired to private life, 1918. (1858-)

Burns, Robert, celebrated Scottish poet, born at Alloway, near Ayr, son of an honest, intelligent peasant, who tried farming in a small way, but did not prosper; began farming himself on his father's decease in 1784, but took to rhyming by preference; meditated emigrating to Jamaica, after publishing a few poems composed to raise money for that end, when friends and admirers persuaded him to stay; he was invited to Edinburgh; his poems were reprinted, and money came in; soon after he married, and took a farm, but, failing, accepted the post of excise-man in Dumfries; fell into bad health, and died in 1796, aged 37. Among his most famous poems are *The Cotter's Saturday Night*, *Tam o' Shanter*, *Hallowe'en*, and *The Two Dogs*. (1759-1796).

ROBERT BURNS

Burns and Scalds, injuries to tissue heat in burns, or moist heat in scalds. Burns are classified as follows: (1) where the skin is reddened and the condition rapidly heals; (2) where the outer skin is destroyed and a new skin forms without a scar; (3) where the true skin is partly destroyed and sloughing occurs with a possibility of septic complications; (4) where the true skin is wholly destroyed; (5) where the muscles have been destroyed and (6) where the bones are charred, needing amputation. Shock may be treated by stimulants, clothes should be removed with care and wounds treated with an antiseptic and a plume acid dressing applied. Blood-poisoning is liable to set in and medical aid should be sought in serious cases.

Burrtisland, a seaport on the Firth of Forth, in Fifeshire, Scotland, 6 m. from Kirkcaldy. There is a good harbour with considerable shipping. Pop. 5,809.

Burr, in botany is a hooked fruit, or like process which catches in the fur of passing animals and aids in the distribution of the fruit. Also the name of a hard, siliceous rock much used for millstones.

Burr, Aaron, born at Newark, N.J., U.S.A. Called to the Bar; Attorney-General, New York State, 1789-1791. U.S. Senator, 1791-1797. Tied with Jefferson on first vote, presidential election, 1800. Vice-President, U.S.A., 1801-1805. Defeated in contest for governorship of N.Y. through influence of Alexander Hamilton, whom he killed in a duel, 1804. Arrested on suspicion of treason concerning Texas; acquitted 1808. (1756-1836).

Burritt, Elihu, a blacksmith, born in Connecticut; devoted to the study of languages of which he knew many, both ancient and modern; best known as the unwearied advocate of Peace all over America and a great part of Europe; organised first international Peace Congress in 1848 at Brussels, and another at Paris the following year. (1810-1879).

Burry Port, an urban district of Carmarthenshire, Wales, 4 m. from Llanelli. Coal is exported. Pop. 5,700.

Bursa, the medical name of certain sticky fluid found in the body at places where friction would otherwise be present, e.g., round joints. Inflammation of a bursa is known as bursitis, one of the commonest examples being "housemaid's knee."

Bursar, the holder of an endowment in a Scottish University, now awarded after competitive examination. The term also applies to a student holding a scholarship with a grant of financial help from a municipal authority.

Burslem, a pottery-manufacturing town in Staffordshire, England, and the "mother of the Potteries"; manufactures porcelain and glass. It is now part of the borough of Stoke-on-Trent. Birthplace of Josiah Wedgwood, who is commemorated here in the Wedgwood Institute.

Burton, John Hill, historian and miscellaneous writer, born at Abodeen; an able man, trained for the Bar; wrote articles for the leading reviews and journals, *History of Scotland*, *The Book-Hunter*, *The Scot Abroad*, etc.; characterised by Lord Herschell as a "dispassionate historian"; was Historiographer-Royal for Scotland. (1809-1881).

Burton, Sir Richard Francis, traveller, born in Hertfordshire; served first as a soldier in Sind under Sir C. Napier; visited Mecca and Medina as an Afghan pilgrim; wrote an account of his visit in his *Personal Narrative of a Pilgrimage*, etc.; penetrated Central Africa with Captain J. H. Speke and discovered Lake Tanganyika; visited Utah, and wrote *The City of the Saints*; travelled in Brazil, Palestine, and Western Africa, accompanied through many a hardship by his devoted wife; translated the *Arabian Nights*; his numerous works on his travels show him to have been daring and adventurous. (1821-1890).

Burton, Robert, an English clergyman, born in Leicestershire; scholar of Christ Church, Oxford; lived chiefly in Oxford, spending his time there for some 50 years in study; author of *The Anatomy of Melancholy*, which he wrote to alleviate his own depression of mind, a book which is a perfect mosaic of quotations on every conceivable topic, familiar and unfamiliar, from every manner of source. (1577-1640).

Burton-upon-Trent, a town in Staffordshire, England; brews and exports large quantities of ale, the water of the place being peculiarly suitable for brewing purposes. Pop. 49,500.

Bury, a manufacturing town in Lancashire, shire, England; 10 m. NW. of Manchester; originally a small place engaged in woollen production, but cotton is now the staple manufacture, in addition to paper-works, dye-works, etc. Sir Robert Peel and John Kay, inventor of the flying shuttle, were both natives of the town. Pop. 58,400.

Bury, John Bagnall, historian; son of a canon of Clogher; educated at Trinity College, Dublin; wrote concise histories of various stages of Roman Empire, and of Greece to death of Alexander; edited Gibbon; collaborated in *Cambridge Ancient History*. Professor at Dublin of Modern History, 1893-1904, and Regius Professor of Greek, 1898-1902. (1861-1927).

Bury St. Edmunds, a market town in Suffolk, England, 25 m. NW. of Ipswich, named after Edmund, King of East Anglia, martyred by the Danes in 870, in whose honour it was built; famous for its abbey, of the interior of which in the 12th Century there is a matchlessly graphic account in Carlyle's *Past and Present*. Pop. 16,700.

Busaco, a mountain ridge in the province of Beira, Portugal, where Wellington with 40,000 troops beat Massena with 65,000 in 1810.

Bushel, an English dry measure of capacity used for grain, potatoes, fruit, etc. It contains 4 pecks or 8 gallons.

Bushey, an urban district of Hertfordshire, shire, England, on the outskirts of Watford. Here is the Royal Masonic Institute for boys. Near by is Bushey Heath. Pop. 11,243.

Bushey Park, a Royal Park in Middlesex, England, on the Thames. In it there is the famous triple avenue of horse-chestnut trees which was planted by William III. The National Physical Laboratory is here. The grounds of Hampton Court Palace adjoin.

Bushido, the code of knighthood of Japan, setting forth the highest ideals of honour and courage, and still an influence among the Japanese people; literally, the word signifies "the way of the warrior."

Bushire, the chief port of Iran on the Persian Gulf, and a great trading centre. Pop. 18,000.

Bushmen, or *Bosjesmans*, aborigines of SW. Africa; a rude, nomadic race, at one time numerous, but now fast becoming extinct; they are small in stature and with scarcely any culture, their language being very defective.

Bushrangers, in Australia, gangs made up at first of convicts who escaped to the bush, and there associated with other desperadoes; these were succeeded by others who caused a great deal of trouble by their marauding, attacks on gold escorts, and murders. Among the most notorious of these Australian bushrangers were the Kellys.

Busiris, in Greek mythology, a King of Egypt who used to offer human beings in sacrifice; soised Hercules to bound him to the altar, but Hercules spared his bonds, and thereupon sacrificed udis himself.

BUSHMAN

Buskin, a kind of half-boot worn after the custom of hunters as part of the costume of actors in tragedy on the ancient Roman stage, and a synonym for tragedy.

Busoni, Ferruccio, Italian composer and pianist, born at Empoli, near Florence, played at a Vienna concert when nine. At 15 had his cantata *Il Sabato del Villaggio* performed at Bologna. Won Rubinstein prize; professor at St. Petersburg, 1890. Toured abroad considerably, but returned to Berlin, where he died. Chief opera *Die Brautwahl*. In year of death completed music drama *Dr. Faustus*. (1866-1924).

Buss, Frances Mary, shares with Dorothea Beale (q.v.) the honour of having laid the foundations of high-school education for girls. She founded the North London Collegiate School. (1827-1894).

Bustards, a group of birds (Otididae family) found in the plains and deserts of Europe, Asia Minor, and N. Africa. They are large birds with thick legs and toes somewhat resembling the Ostriches, but powerful in flight.

The Great Bustard (*Otis tarda*), the Little Bustard (*Tetrax tetrax*) and the Houbara Bustard (*Houbara macqueni*) are occasional winter visitors to England. The Great Bustard was formerly a resident. The largest species is the African Koria Bustard. The Great Bustard measures 8 ft. across the wings. The male bird has a peculiar way of bending its head back almost to the upturned tail when courting.

GREAT BUSTARD

Butane, a gas yielded during the heating of petroleum and forming the principal constituent of liquid oxygen used in freezing machines. Can be made by treating ethyl iodide with zinc at 300° C. It belongs to the hydrocarbons.

Butcher Bird, a name for the shrike family (Laniidae). In particular it applies to the true shrikes (genus *Lanius*) which impale the small animals (birds, frogs, mice, and bees and other insects), upon which they feed on thorax, thus creating a sort of larder of reserve food. Four species are visitors to England. The Red-backed (*Lanius collurio*), at least, breeds here. The woodchat does occasionally. The Great Grey and the Lesser Shrikes are also occasional visitors.

Bute, an island in the Firth of Clyde, Scotland, about 16 m. long and from 3 to 5 broad, N. of Arran, nearly all the Marquis of Bute's property, with his seat at Mount Stuart; separated from the mainland on the N. by a romantic winding arm of the sea called the "Kyles (the narrows) of Bute." Pop. 19,000.

Bute, John Stuart, Third Earl of, statesman, born of an old Scottish family; Secretary of State, and from May 1762 to April 1763, Prime Minister under George III., over whom he had a great influence; was very unpopular as a statesman, his leading idea being the supremacy of the King; spent the last 24 years of his life in retirement, devoting himself to literature and science. (1713-1792).

Buteshire, a county of Scotland comprising the islands of Bute, Arran, Great Cumbrae, Little Cumbrae, Holy Isle, Inchmarnock and Fladda. Area 219 sq. m. The inhabitants are largely engaged in agriculture (cattle and potatoes being main crops), cattle-raiding and fishing.

The islands were taken from the Norwegians by Alexander III., King of Scotland. Pop. (estimated) 18,800.

Butler, Joseph, an eminent English divine, born at Wantage, in Berks; at first a Dissenter, conformed to the Church of England; became preacher at the Rolls, where he delivered his celebrated *Sermons*; was raised to the See of Bristol; made Dean of St. Paul's and finally Bishop of Durham; his great work was *The Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature*. (1692-1752).

Butler, Josephine Elizabeth, social reformer, born at Glendale, Northumberland, daughter of John Grey of Dilston. Married, 1852, Rev. George Butler, headmaster of Liverpool College, 1866-1882. A befriender of friendless girls, agitated from 1869 against State regulation of prostitution. (1828-1906).

Butler, Samuel, born in Worcestershire, the son of a small farmer; author of *Hudibras*, a poem of about 10,000 octosyllabic lines, in which he subjects to ridicule the ideas and manners of the English Puritans of the Civil War and the Commonwealth; it appeared in three parts, the first in 1663, the second soon after, and the third in 1678; the book was an especial favourite with Charles II., who was never weary of quoting from it. (1612-1680).

SAMUEL BUTLER

Butler, Samuel, novelist, painter, and satirical musical composer. He wrote in satirical vein on modern civilisation and largely inspired Bernard Shaw. *Erewhon*, published in 1872, his best-known work, in which he points his criticism by reversing the procedures of modern society (e.g., in the land of Erewhon criminals are sent to hospital and sick people to prison), is still read with considerable enjoyment. His *Way of All Flesh* foreshadowed the modern novel. (1835-1902).

Butt, Dame Clara, operatic singer, born in Sussex; made her debut in London at the Albert Hall in the *Golden Legend* and in *Orfeo* at the Lyceum, after which appearances she was much in demand as a singer. (1872-1936).

Butt, Isaac, Irish patriot, distinguished for his scholarship at Dublin University; entered Parliament, and at length took the lead of the "Home Rule" party, but could not control it, and retired. (1813-1879).

Butte, the county seat of Silver Bow county and the largest city of Montana, U.S.A., in the centre of a very rich mining district, copper being the chief output. Pop. 89,500.

Butter, a substance consisting of the fatty ingredients of milk, together with a small proportion of salt and other substances, and used as a food. It is made by separating the cream from milk and churning it until the particles adhere together in a fairly solid mass. Mechanical cream separators are now used, and the separation occupies only a few minutes. After separation the cream is "ripened" by allowing the multiplication of lactic bacilli to take place. It is then rapidly agitated in a churn until the butter forms, when it is "worked" to get rid of excess of water, by pressure. Most imported butter comes from Denmark, New Zealand, and Australia.

Buttercup, the name given to various species of *Ranunculus* (the Crowfoot family). Under the antique names

of Crowfoot, King-cup, Gold-cup, and other quaint but suggestive titles, these flowers were formerly much praised by our poets. *R. acris*, the common or meadow Buttercup, *R. bulbosus*, the bulbous buttercup, and *R. repens*, the creeping buttercup or crowfoot, are all common in England.

Butterfield, William, architect, was born and died in London. Built numerous churches; in London especially. All Saints', Margaret Street, St. Alban's, Holborn, are his work. Put in practice remarkable theories as to colour. In Oxford built Balliol College chapel, Keble College, and parts of Merton College. Designed churches for Australia, India, and S. Africa. (1814-1900).

Butterfly, the common name of all diurnal Lepidoptera insects. The family is a very extensive one. The insects undergo a series of transformations before reaching the perfect state. The female lays a large quantity of eggs, which produce larvae, commonly called caterpillars. After a short life these assume a new form and become chrysalids or pupae. Within the covering the insect develops, to emerge as the active and brilliant butterfly. They suck nectar from plants and are short-lived. The largest butterflies are found in the tropics. They differ from moths by having their wings erect when at rest and by the possession of knobbed antennae. Some of the species simulate a remarkable likeness to other objects, such as green leaves, flowers, bark, etc., a feature (known as "mimicry") which serves to protect them from enemies. The order Lepidoptera, to which they belong, is usually divided into Lepidoptera Rhopalocera (the butterflies) and the Lepidoptera Heterocera (the night-flying moths).

Buttermere, a lake in Cumberland, England, 8 m. SW. of Keswick. It is 330 ft. above sea-level and 1½ m. long and ½ m. wide. It is situated among beautiful scenery.

Buttermilk, the fluid residue remaining after butter has been taken from cream. It is usually given as food to pigs, but is a nourishing drink easily digested. Some inferior cheeses often contain buttermilk.

Butterwort, a plant of the *Pinguicula* genus, three species of which grow in Britain. It grows in damp places and is carnivorous. The leaves secrete a sticky fluid to which insects adhere. When stimulated the leaves curl over and enclose the insect, which is then digested by an acid ferment. *P. vulgaris*, *P. lusitanica*, and *P. alpina* occur in Britain.

Buttress, in architecture, especially Gothic, a projection on the outside of walls to give additional support and prevent them from spreading under pressure from the roof. Flying buttresses are often arched.

Butyric Acid, an acid originally obtained from butter and also present in perspiration. It is a colourless liquid, smells like rancid butter, and is prepared by the fermentation of certain sugars.

Buxton, a high-lying town in Derbyshire, England, noted for its calcareous and chalybeate springs, and a resort for invalids; is also famous for its rock crystals, its stalactite cavern, and its fine scenery. Pop. 15,400.

Buxton, Sir Sydney Charles Buxton, Earl, grandson of Sir Thomas Fowell Buxton. Member, London School Board, 1876-1882. Liberal M.P. Peterborough, 1883-1885; Poplar division of Tower Hamlets, 1886-1914. Under-Secretary for Colonies, 1892-1895. Postmaster-general, 1905-1910. President, Board of Trade, 1910-1914; G.O.M.G., 1914. Governor-

General, S. Africa, 1914-1920. Viscount Buxton, 1914; Earl, 1920. (1853-1934).

Buxton, Sir Thomas Fowell, a philanthropist, born in Essex, made his fortune as a brewer; was conspicuous for his interest in benevolent movements, such as the amelioration of criminal law and the abolition of slavery; represented Weymouth in Parliament. (1786-1845).

Buzancy, a town in the Ardennes dept., France, 20 m. S. of Sedan. It was a German base during the Great War and fell to the American Army under General Pershing in the Allied general offensive in Oct. 1918.

Buzau, a town of Rumania, capital of a dept. of the same name, stands on the lt. Buzau. It is the seat of a bishop, and a market town for the petroleum, wheat, etc., which are produced in the neighbourhood. Pop. 36,000.

Buzzard, a genus of birds of the Hawk family, resembling eagles in their manner of flight and in their general habits. They prey on rabbits, mice, rats, moles, insects, etc. Some species are common in England—e.g., the common Buzzard (*Buteo buteo*). Other species are found in almost every part of the world.

COMMON BUZZARD

Byblis, in the Greek mythology a daughter of Miletus, in love with her brother Caunus, whom she pursued into far lands, till, worn out with sorrow, she was changed into a fountain.

Byfleet, a town in Surrey, 2½ m. from Woking. It has a 14th-Century church. Pop. 4,819.

By-law, a law made by an incorporated or other body for the regulation of its own affairs, or the affairs entrusted to its care. Town councils, railway companies, etc., enact by-laws which are binding upon all coming within the sphere of the operations of such bodies. By-laws must, of course, be within the scope of the charter of incorporation and in accordance with the law of the land, and the powers conferred by Parliament under the Act for the regulation of municipal corporations. By-laws passed under the Joint Stock Companies Act of 1862 must be registered as a condition of their being in force. By-laws of the Railway Companies are subject to the approval of the Board of Trade. A period of forty days must elapse before a by-law may be enforced. The term by-law is of Anglo-Saxon origin, "by" meaning "town."

Byng, George, Viscount Torrington, admiral, favoured the Prince of Orange, and won the navy over to his interest; commanded the squadron that took Gibraltar in 1704; conquered the Spaniards off Cape Passaro; was made First Lord of the Admiralty in 1727, an office he held continuously till his death. (1663-1733).

Byng, John, admiral, fourth son of the preceding; having failed to compel the French to raise the blockade of Minorca, was recalled, in deference to popular clamour, and, being tried and condemned as guilty of treason, was shot at Portsmouth, "pour encourager les autres," a fate it is now believed he did not deserve. (1704-1757).

Byng of Vimy, Baron, British general, saw service in the Sudan and the Boer War and in Nov. 1917, as Sir Julian Byng, led the great attack on the Hindenburg line (q.v.), his outstanding success being the capture of Vimy Ridge.

He also led the attack on Cambrai, 1917. For the greater part of the war he commanded the Canadian Corps, and was made Governor-General of Canada in 1921. In 1919 he was created a baron and granted £30,000 in recognition of his services. In 1928 he became Chief Commissioner of the Metropolitan Police. (1862-1935).

By-product, an article of commerce produced in the process of manufacturing the main article. In recent years they have become very important, and in some cases have exceeded in value the original product. They are of particular value in counteracting adverse market conditions which affect the main product. Chemical research has led to the conversion of what was formerly waste into marketable goods. When a large number of by-products result in value equalling or exceeding the main product they are all spoken of as joint-products. Legislation has sometimes been employed to insist upon the utilisation of waste products when they are likely to become offensive.

Byrd, Richard Evelyn, American aviator, born at Winchester, Va. Began aviation, 1917. Accompanied Floyd Bennett in flight over North Pole, 1926. Then made Commander. Flew New York to France, in 42 hours, 1927. Flew over South Pole, 1929. Explored Antarctic in 1935. (1888-).

Byrd, or Bird, William, the greatest composed madrigals, music for the virginal (published in *Parthenia*) and much sacred music; *Non Nobis, Domine* is ascribed to him. (c. 1542-1623).

Byrom, John, poet and stenographer, a system of shorthand, now superseded, which he had the sole right of teaching for 21 years; contributed as "John Shadow" to the *Spectator*; author of the pastoral, *My Time, O ye Muses, was Happily Spent*; his poetry satirical and genial. (1692-1763).

Byron, George Gordon, Sixth Lord, an English poet, born in London, son of Captain Byron of the Guards, and Catherine Gordon of Gight, Aberdeenshire; spent his boyhood at Aberdeen under his widowed mother, until he succeeded his grandfather in the title and estates and removed to Newstead Abbey, Notts.; was educated at Harrow and Cambridge, spending, when at the latter, his vacatious in London, where his mother had taken a house; wrote *Hours of Idleness*, a poor first attempt, which called forth a severe criticism in the *Edinburgh Review*, which latter he satirised in *English Bards and Scotch Reviewers*, and soon afterwards left England and spent two years in foreign travel; wrote first part of *Childe Harold*; "awoke one morning and found himself famous"; produced the *Giaour*, *Bride of Abydos*, *Hebrew Melodies*, and other works. In his school days he had fallen in love with Mary Chaworth, but she had not returned his affection, and in 1815 he married Miss Milbanke, an heiress, who in a year left him never to return, when a storm raised against him on account of his private life drove him from England, and he never came back; on the Continent, moved from place to place, finished *Childe Harold*, completed several short poems, and wrote *Don Juan*; threw himself into revolutionary movements in Italy and Greece, risked his all in the emancipation of the latter, and, while fighting there, died at Missolonghi in a fit, at the age of 36. (1788-1824).

Byron, John, naval officer, grandfather of the poet, nicknamed from his misfortunes "Foulweather Jack"; accompanied Anson in his voyage round the world, but was wrecked in his ship the *Wager*; suffered almost unexampled hardships, of which he wrote a classical account on his safe return home; he rose to the rank of admiral,

and commanded the squadron in the W. Indies during the American War; died in England. (1723-1786).

Byzantine Art, a decorative style of the Romans after the seat of empire was removed to the East. It has been described by Fairholt as "an engraftment of Oriental elaboration of detail upon classic forms ending in their debasement." When Constantine the Great adopted the Christian faith in Byzantium, the arts, in those days the hand-maids of religion, developed from the new Christian standpoint, and Byzantine Art may be called Early Christian.

It expressed itself in architecture, sculpture, painting and mosaic work, and reached its golden age in the reign of Justinian (A.D. 527-565). The churches of St. Sophia, SS. Sergius and Bacchus, and the Holy Apostles were erected during this period. The movement westwards is seen in the churches of St. Mark at Venice, St. Vitals at Ravenna, St. Front at Périgueux, etc.

The arch appeared, the dome became a feature, and classical columns were also developed. Internal ornament was a striking feature. The walls were sheathed with marble, the vaults being covered with coloured mosaics on a gold background. Painting, as well as mosaic, rose to great technical excellence. In design the forms are stiff, conventional, and the draperies rigid, with sometimes magnificent colour.

Byzantine Empire, called also the Eastern, the Lower or the Greek Empire; dates from A.D. 395, when, on the death of Theodosius, the Roman Empire was divided between his two sons, Arcadius and Honorius, the Eastern section falling to the share of the former, who established the seat of his government at Byzantium, later known as Constantinople (now known as Istanbul). The empire included Syria, Asia Minor, Pontus, Egypt, Thrace and Greece.

The Byzantine Empire proper may be said to have begun with the founding of the great city of Constantinople, where the character and ideals of the Roman Empire were continued for 1,000 years after the Western portion of the Roman Empire had perished. For centuries it formed a bulwark of Christianity against paganism, after Constantine had adopted that faith.

The empire suffered many onslaughts by barbarians, especially the Slavonic tribes of the Balkans, but endured. It was strengthened by the great emperor Justinian I. Vandal enemies were overcome and his code of Roman Law, the Justinian code, remained for centuries. Under his successors until Heraclius (610) a dark period followed of wars with the Lombards, Persia and the Saracens, and a period of anarchy. Heraclius was able to restore in some part the empire's greatness, but Asiatic provinces rebelled, and after his death the empire was beset with enemies. The Saracens conquered most of the Asiatic provinces and the Bulgars brought the empire to its knees. Egypt was conquered, N. Africa was lost, and twice the capital was besieged by Mohammedans.

By this time the Byzantine Empire had become essentially Greek, and under the Isaurian dynasty, which succeeded Heraclius, some measure of order and prosperity returned. Varying fortunes followed, the Bulgars being a source of constant danger. For a time the division of the empire and the states made it subordinate to the Latin emperors, the first of whom was Baldwin of Flanders. Meanwhile the Turks had gradually won possession after possession, and eventually the whole of the Balkan peninsula fell into their hands during the 14th century. In 1453 the siege of Constantinople and its subsequent sacking occurred, and with it the Byzantine Empire ended.

Byzantium, the ancient name of Constantinople (Istanbul), founded by Greek colonists in 657 B.C.

C

Caaba, an ancient Arab temple, a small square structure in the grand mosque of Mecca, with a mysterious black stone, probably an aconite, built in it, on which all pilgrims who visit the shrine imprint a kiss.

Cab, the name given to one-horse public vehicles, being a contraction of "cabriolet." The first cab was licensed in 1833, and the two-wheel type invented by Joseph Hansom, and named after him, came soon after.

Cabal, a secret intriguing faction in a State, a name applied to a junta of five ministers of Charles II. in power from 1667 to 1673, the initials of whose names go to make up the word; their names were Clifford, Ashley, Buckingham, Arlington, and Lauderdale; derived from caballa (q.v.).

Cabbage, an edible vegetable native to Britain, and universally used as food. Varieties include the Savoy, Jersey, cauliflower, broccol, Brussels sprouts, etc. Cultivated cabbage is very different from the wild kind, which is still seen on the Mediterranean coast. The botanical name is *Brassica oleracea* (Cruciferae family).

Cabbala, a secret science alleged to have been divinely imparted in remote times and preserved by tradition, by

means of which the Rabbis affected to interpret the mystic sense of the words, letters and very accents of the Hebrew Scriptures. The name comes from a Hebrew word suggesting "to receive," and denotes "that which is received" or tradition.

Cabet, Étienne, a French communist, born in Dijon, a leader of the Carbonari; author of the *Voyage en Icarie*, in description of a communistic Utopia, which became the textbook of a communistic sect called "Icarians," a body of whom set out in 1848 to carry out his schemes in America, but failed. Cabet himself went out in 1849, transferred the settlement to Nauvoo, but died at St. Louis broken-hearted. (1786-1856).

Cabinet, the, in Great Britain the centre of the executive power, consisting of the Prime Minister and his principal colleagues. In origin it is a committee of the Privy Council, and came into being at the same time as the office of Prime Minister when George I. came to the throne, unable to speak English. The modern tendency has been for Cabinets to increase in size and adhere to a policy of collective responsibility for individual actions and words.

To-day the Cabinet in England is a committee of the most influential members of the two Houses of Parliament, appointed by

the Crown on the recommendation of the Premier who has been commissioned to form a Cabinet. Most members are chiefs of government departments, exceptions being the Lord President of the Council, the Lord High Chancellor and the Lord Privy Seal.

The Ministers of the Crown Act, 1937, provides that there shall be not more than 14 Cabinet Ministers entitled to sit in the House of Commons and not fewer than three in the House of Lords. With the exception of the Prime Minister and First Lord of the Treasury and the Lord High Chancellor (£10,000 a year each), all receive £5,000 a year. The same Act provided that there shall be not more than 21 Under-Secretaries of State in the House of Commons.

The King, constitutionally, must take the advice of the Cabinet and accord to it his moral and social support. The Prime Minister alone has the exclusive right to see the sovereign personally on important affairs of state, but other Ministers may discuss with the sovereign departmental matters. The Cabinet is a secret body and no non-member may be present at its sittings, except very occasionally when some departmental official is summoned to give special information. Since 1916 minutes of Cabinet proceedings have been preserved.

Cable, a large, strong rope or chain, such as is used to hold a vessel at anchor. It is usually made of hemp or steel. A ship's cable is usually 120 fathoms or 720 ft. in length. An electric-cable is composed of one or more copper wires enclosed in a compound of gutta-percha and resinous substances. This cover is called insulation. A lead covering is often superimposed on the insulation to keep out moisture, etc. Outside the lead is a layer of specially wound steel wire covered with jute, etc., to prevent corrosion.

Cabot, Giovanni (John), a Venetian pilot, born at Genoa, settled in Bristol, entered the service of Henry VII., and discovered Cape Breton I., Nova Scotia, about 1497; sailed in 1498 on another expedition and reached Greenland, Baffin Land, Newfoundland, and Nova Scotia. (1450-1498).

Cabot, Sebastian, son of the preceding; accompanied his father to N. America; sought service as a navigator in Spain, and though a projected expedition to Newfoundland did not mature, was appointed Pilot Major. He rejected also an offer of employment by Wolsey, and returned to Spain; attempted under Charles V. to plant colonies in Brazil, with no success, for which he was imprisoned and banished; was the first to notice the variation of the magnetic needle, and, as founder of the Merchant Adventurers, to open up to England trade with Russia. (1474-1557).

Cabral, Pedro Alvarez, a Portuguese navigator; sailing for the Indies, drifted on the coast of Brazil, on which he planted the Portuguese flag, 1500, and of which he is accounted by some the discoverer; continued his course, and established a factory at Calicut. This was destroyed by the Moslems, however, and after bombarding Calicut he established a new factory at Cochim. He returned to Portugal in 1501 with a cargo of great value. (1460-1526).

Cabrera, Ramon, Count, a Spanish general, born at Tortosa, Catalonia, a zealous supporter of the claims of Don Carlos, took up arms in his behalf and fought with considerable bravery and ferocity until driven into France; after some months' imprisonment he came to England, where he died after a further abortive effort. In 1875 he advised the supporters of Don Carlos to adhere to Alfonso XII. (1810-1877).

Caceres, a Spanish province in the S. of Extremadura; the name also of its capital, famous for its bacon and

sausages. The province is noted for its pasturage (pigs, sheep and goats reared). Phosphates are produced. Pop. (prov.) 466,700; (town) 25,500.

Cachalot, or **Sperm Whale**, the largest of the toothed whales, often

attaining 60 ft. in length with a head of abnormal size; hunted for the oil obtained from its blubber, for spermacetti, and the ambergris found within its intestine. It feeds chiefly on cuttle-fish and is found in warm waters from Iceland to the Antarctic.

CACHALOT

Cachar, a great tea- and rice-growing district in Assam. Pop. 500,000.

Cache, a name given in North America to a hole in the ground for hiding provisions when they prove cumbersome to carry, or as a source of supply for others.

Cachet, *Lettre de*. See *Lettre de Cachet*.

Cactus, prickly exogenous plants, varying in form and size, and often of abnormal shape; found mostly in Mexico, California and S. America. They are grouped together in the natural order Cactaceae, in which there are some 25 genera and 1,000 species. In general, they are plants with thick, fleshy stems and leaves in which respiration is reduced to a minimum and water is stored, often in great quantities—features which are most essential in arid climates. They usually bear a solitary flower, which is as a rule large and brilliantly coloured.

Cacus, a mythological brigand of gigantic stature, the son of Vulcan, who occupied a cave in Mount Aventine, represented by Virgil as breathing smoke and flames of fire; stole the oxen of Hercules as he was asleep, dragging them to his cave tail foremost to deceive the owner; strangled by Hercules in his rage at the deception quite as much as the theft.

Cadamosto, a Venetian in the service of Portugal, discovered the Cape de Verde Is. in 1482, and sailed as far as the mouth of the Gambia; wrote the first book giving an account of modern voyages, published posthumously. (1432-1477).

Cadbury, George, philanthropist and Quaker and Liberal, a prominent business man. He was the head of the important cocoa firm bearing his name, in connection with which he was a pioneer of industrial welfare in establishing the model village of Bourneville. He also owned the *Daily News* (1839-1922).

Caddis Fly, an order of insects (Trichoptera) allied to the

dragonfly. The grub lives in ponds and streams, enclosed in a sheath of sticks, gravel, sand, etc., which serves as a protection for the soft body. The adult is a four-winged insect feeding on plant-juices. Many species are found in England.

CADDIS FLY:
ADULT AND LARVA

Cade, Jack, an adventurer, headed an insurrection in Kent, in 1450, in the reign of Henry VI.; escaped with his following on Blackheath; demanded of the king redress of grievances; was answered by an armed force, which he defeated; entered the city; the citizens retreating, he had to flee, but was overtaken and slain.

Cader Idris, a mountain in Merionethshire, Wales, S. of Dolgelly. It rises 2,920 ft. and commands a beautiful view embracing Cardigan Bay.

Cadet, a younger or youngest son of a noble family; also the name given to a young man in training for the rank of an officer in the Navy or Army. In Britain military cadets are trained at Woolwich or Sandhurst; naval cadets at Dartmouth, and air force cadets at Cranwell. A naval cadet holds the lowest grade as a candidate for a commission in the Royal Navy. A Cadet Corps is a body of youths trained (mostly at Public Schools) on military lines. Service is voluntary.

Cadi, an Arabic title of an inferior judge (in courts of summary jurisdiction) who was required to be a Muslim of adult years, free, of upright character, and learned in the Koran.

Cadiz, a fertile maritime province of the N. and W. Ceuta, in Morocco, is included in the province for administrative purposes. Chief products: olives, vines, fruit (oranges in particular), cork, fish. Area 2,834 sq. m. Pop. 506,000.

The capital of the province is a town of the same name, one of the chief commercial ports in Spain, standing at the NW. extremity of the Isle of León, and separated from the rest of the island by a channel crossed by bridges. It is 50 m. from Gibraltar, and carries on a large export trade. Has a naval wireless station. In 1936, at the outbreak of the Spanish Civil War, Cadiz became one of the insurgent strongholds. Pop. 75,000.

Cadmium, a chemical metallic element belonging to the same group as zinc. Symbol Cd, atomic number 48, atomic weight 112.41. It was discovered by Strohmeyer in 1817, and occurs naturally as its sulphide, CdS, in the mineral known as greenockite. It also occurs in most zinc ores, from which most of the cadmium of commerce is extracted. It is a soft, bluish-white metal, and is used as a protective plating on iron and steel, as an ingredient of various alloys (e.g., anti-friction bearings), as the cathode of the Weston standard voltaic cell, and, in the form of its sulphide, as a bright yellow paint ("cadmium yellow").

Cadmus, a semi-mythological personage, founder of Thebes, in Boeotia, to whom is ascribed the introduction of the Greek alphabet from Phoenicia and the invention of writing; in the quest of his sister Europa, was told by the oracle at Delphi to follow a cow and build a city where she lay down; arrived at the spot where the cow lay down, he sent, with a view to its sacrifice, his companions to a well guarded by a dragon, which devoured them; slew the dragon, sowed its teeth, which sprang up into a body of armed men, who spared each other to death, all but five, who, the story goes, became the forefathers of Thebes.

Cadogan, **Earls**. (1) **William Cadogan**, son of an Irish barrister; attended the Duke of Marlborough throughout his campaigns; Colonel of "Cadogan's Horse," and Quartermaster-General, 1701. In 1712 accompanied Marlborough into retirement; reinstated by George I. and served against the Jacobites in the 1715 rebellion. Created an Earl, 1718. (1675-1726). (2) **George Henry Cadogan**, Fifth Earl of second creation (1800); succeeded father as Earl, 1813. Under-Secretary for War, 1875-1878; Lord Privy Seal, 1886-1892; Lord Lieutenant of Ireland, 1895-1902. (1840-1905).

Cadorna, **Count Luigi**, Italian general, born at Pallanza, son of Count Raffaele Cadorna. His failure on the Isonzo front culminating in the disaster

of Caporetto (Nov. 1917), was chiefly due to circumstances beyond his control. Attended Allied Military Council, Versailles; but placed on half-pay, 1918. Published *The War on the Italian Front*, 1921. Marshal, 1924. (1850-1928).

Cadoudal, **Georges**, chief of the Chouans (q.v.), born in Brittany, the son of a farmer; took up arms to restore the Bourbons in the teeth of the Republic, but was defeated; refused to serve under Bonaparte, who would have enlisted him; came over from London, whither he had retired, on a secret mission from Charles X.; was arrested, and, after a short trial, condemned and executed, having confessed his intention to overthrow the Republic and put Louis XVIII. on the throne. (1774-1804).

Cadoxton, a town in Glamorganshire, S. Wales, situated in an iron- and coal-mining area. It has been absorbed by the town of Barry, where many find employment at the docks. Pop. 6,548.

Cadre, corps, usually taken to refer to the permanent officers from the lance-corporal and subaltern to the highest rank, on whom the regiment or corps is centred and who form a nucleus for expansion in emergency.

Caduceus, originally a herald's wand in ancient Greece, it became the attribute of Hermes as messenger and herald of the Gods. As such it is usually represented as a winged rod entwined with two serpents.

Cæcum, a large closed pouch, the first part of the large intestine and opening into the colon. The appendix is attached to it.

Cædmon, an English monastic poet of the 7th Century, concerning whom our knowledge is derived from Bede's *Ecclesiastical History*, and the fragment of a hymn by whom, preserved by Bede, is the oldest specimen extant of English poetry. Wrote a poem on the beginning of things at the call of a voice from heaven, saying as he slept, "Cædmon, come sing me some song"; thereupon he began to sing the story of Genesis and Exodus, many other tales in the sacred Scriptures, and the story of Christ and the Apostles, and of heaven and hell to come.

Caen, a fine old Norman town, capital of the dept. of Calvados, France, on the R. Orne, about 65 m. SE. of Cherbourg; lace the chief manufacture; the burial-place of William the Conqueror. It is a well-built town and has fine old public buildings, a university and a large library. It is connected with the sea by canal, has considerable trade, and manufactures which include lace, cotton, etc. Pop. 58,000.

Caerlaverock, or **Carlaverock**, a village in Dumfriesshire, Scotland, on the Solway Firth. The ruins of the castle, formerly the seat of the Maxwells, Earls of Nithsdale, is near by at the mouth of the R. Nith. Pop. 850.

Caerleon, a small old town in Monmouthshire, England, on the Usk, 2½ m. NE. of Newport; celebrated by Tennyson in connection with Arthurian legend. It is a very ancient place, and contains baths, sections of walls, and other relics of Roman times. It is the site of a Roman fortress which has been excavated since 1926, and has the finest Roman amphitheatre in England. Pop. 2,300.

Caernarvon, a maritime county in N. Wales, with the highest mountains (including Snowdon) and grandest scenery in the Principality, and a capital of the same name on the Menai Strait; with the noble ruins of a castle, in which Edward II., the first Prince of Wales, was born. Area (county), 569 sq. m. Pop. (county) 121,000; (town) 8,500.

Caerphilly, a parish and market town of Glamorganshire, S. Wales, 7 m. from Pontypridd. It has wool and textile manufactures, ironworks, and is the centre of a coal-mining district. There are ruins of Caerphilly Castle, once the greatest stronghold in Wales. Pop. 35,760.

Cæsar, name of an old Roman family from the Trojan Aeneas. The Emperors of Rome from Augustus to Nero of right inherited it (Augustus in virtue of the fact that he was the adopted son of Julius Cæsar), though the title, together with that of Augustus, was applied to succeeding emperors and to the heirs-apparent of the Western and the Eastern Empires. It survived in the titles of the German Kaiser and the Czar of Russia and in that of the sar of Bulgaria.

Cæsar, Gaius Julius, the greatest of Roman statesmen and soldiers, by birth and marriage connected with the democratic party; early provoked the jealousy of Sulla, then dictator, and was, by an edict of proscription against him, obliged to quit the city; on the death of Sulla returned to Rome; was elected to one civic office after another, and finally to the consulship. United with Pompey and Crassus in the First Triumvirate (60 B.C.); was appointed

JULIUS CÆSAR

to the government of Gaul, which he subdued after nine years to the dominion of Rome; his successes awoke the jealousy of Pompey, who had gone over to the aristocratic side, and he was recalled; this roused Cæsar, and, crossing the Rubicon with his victorious troops, he soon saw all Italy lying at his feet (49 B.C.); pursued Pompey, who had fled to Greece, and defeated him at Pharsalia (48 B.C.); was thereupon elected dictator and consul for five years, distinguishing himself in Egypt and elsewhere; returned to Rome (47 B.C.); conceived and executed vast schemes for the benefit of the city, and became the idol of its citizens; was assassinated on the Ides (the 15th) of March, 44 B.C., at the age of 58. (102-44 B.C.).

Cæsarea, a village and seaport of Palestine, 30 m. N. of Joppa, built in honour of Augustus Cæsar by Herod the Great; now in ruins, though a place of note in the days of the Crusades. The modern spelling is Kaisariëh. Also *Cæsarea Philippi*, at the source of the Jordan, whence Christ turned to go up to Jerusalem, and so by His sacrifice perfect His disciples' faith in Him. To-day it is a village of Syria called Banias. Also the former name of Jersey.

Cæsarian Section, or **Operation**, the removal of the child from the mother's body through an opening cut in the abdominal wall, necessary sometimes when the child cannot be born in the natural way. It does not involve serious difficulties or dangers, and is often the means of saving the lives of both mother and child. Julius Cæsar is said to have been born thus.

Cæsium, a rare chemical metallic element, belonging to the same family (alkali metals) as lithium, sodium, potassium, and rubidium. Symbol Cs, atomic number 55, atomic weight 132.81.

Caffeine, or **Theine**, a white, crystalline compound known chemically as 1:3:7-trimethylxanthine, with the formula $C_8H_{10}N_4O_2$. It is the active principle in coffee, tea, kola, and maté, dry tea containing as much as 3½ per cent. It stimulates the action of the heart, has a restorative effect, and is somewhat diuretic. It has been pre-

pared synthetically, but is usually obtained commercially from tea or coffee.

Cagliari, capital of the Italian island of Sardinia, chief town of a province of the same name, and the chief port, on the S. coast, standing on the Gulf of Cagliari; lies on the slopes of a hill, and is on the site of an ancient Carthaginian town. Has a State University. Exports lead, zinc and salt. Pop. (prov.) 476,000; (town) 105,000.

Cagliostro, Count Alessandro di, assumed name of an arch-impostor, his real name being Giuseppe Balsamo; born in Palermo of poor parents; early acquired a smattering of chemistry and medicine, by means of which he perpetrated the most audacious frauds; married a pretty woman named Lorenza Feliciano, who became an accomplice, and wrung large sums from his dupes wherever he went; thrown into the Bastille for complicity in the Diamond Necklace affair; later he was arrested again and committed to the fortress of San Leone, where he died at 52, his wife having retired into a convent. (1743-1795).

Cagots, a race of uncertain origin in the Basque Provinces in the SW. of France and also found in Bearn, Gascony, and Brittany; treated as outcasts in the Middle Ages, owing, it has been supposed, to some taint of leprosy, from which, it is argued, they were by their manner of life in course of time freed.

Cahir, or **Caher**, a town in Co. Tipperary, Ireland (Eire), 11 m. from Clonmel, on the R. Suir, at the foot of the Galtee Mts., amidst beautiful scenery. Cahir Castle stands on an island in the river. Pop. 1,000.

Caiaphas, the High-Priest of the Jews before whom Christ was hailed and who found Him guilty of blasphemy.

Caicos, a group of small islands numbering 30 in all, of which only eight are inhabited. They were annexed to Jamaica in 1874 and with Turks Is. form a Dependency. Pop. 5,700.

Caillaux, Joseph Marie Auguste, French politician. Trained as a lawyer, he entered the Civil Service, and was elected to the Chamber of Deputies in 1898. He acted as Minister of Finance four times before the Great War, and from 1911 to 1912 he was Prime Minister. Arrested in 1918, he spent two years in prison on a suspicion of treason, but in 1925 he returned to politics as Finance Minister to handle the franc depreciation question, and held the same post again in 1926, making debt agreements with Britain and the U.S.A. Two years later he brought about the fall of the Poincaré Government. (1863-).

Caiman, or **Cayman**, the name of certain species of alligator (q.v.), differing from them in having a shield of bony plates in the skin of the under parts of the body. They are found in Central and S. America.

Cain, according to Genesis, the first-born of Adam and Eve, and therefore of the race. He murdered his brother Abel out of jealousy because Abel's sacrifice was accepted by God, whereas his own was rejected. For which he was condemned to be a fugitive and a vagabond on the earth, and a mark put on him lest any meeting him should slay him in ignorance. He left Eden and dwelt in the Land of Nod on the E. (Gen. iv.).

Caine, Sir Thomas Henry Hall, novelist, born in Cheshire, of Manx blood; began life as architect and took to journalism; author of a number of novels bearing on Manx life, such as *The Deemster* and *The Manxman*; his most famous novel, *The Christian*, his greatest but most ambiguous work, has been translated into most of the languages of Europe. (1853-1931).

Cainozoic, or Tertiary Period, of geologists, in which were deposited the rocks which contain fossils of the early forms of mammals. In England the age is represented by the London Clay, Barton, and Bagshot Beds (Eocene) and the Pliocene Beds which cover most of East Anglia. During this period we find an increasing number of fossils of birds and mammals, including those of some still surviving species.

Caird, John, an eloquent Scottish preacher, born at Greenock, Principal of Glasgow University, famous for a sermon entitled *The Religion of Common Life*, preached before Queen Victoria at Crathie in 1855; made a special study of the philosophy of religion, and wrote eloquently on it. (1820-1898).

Cairn, a heap of stones often, though not generally by way of a prehistoric sepulchral monument, and it would seem sometimes in exorcism of some foul deed. To-day they are sometimes erected as landmarks or as memorials. In the Middle Ages they frequently marked the resting-place of the coffin of a distinguished man on his way to the cemetery.

Cairngorm, a yellowish brown variety of rock-crystal, so called from being found, among other places, on one of the Scottish Grampians, in Aberdeenshire, bearing the name.

Cairns, seaport of N. Queensland, Australia, exporting from its excellent harbour mainly sugar, timber, fruit, and gold, tin, silver, etc. Pop. 13,000.

Cairns, Hugh MacCallmont, Earl, lawyer and politician, born in Co. Down, Ireland; called to the English Bar; entered Parliament, representing Belfast; became Lord Chancellor in Disraeli's Government in 1868 and again in 1874; appointed Solicitor-General and knighted, 1858. Lord Justice of Appeal, 1866. Became Baron Cairns of Garmoyne, 1897; Viscount Garmoyne and Earl Cairns, 1878; a fine parliamentary orator and one of the most distinguished lawyers of his day. (1819-1885).

Cairn Terrier, a type of short-haired terrier, small and active, and grey, brindle, or sandy in colour. The coat is hard, but not coarse.

Cairo, capital of Egypt and largest city in Africa; on the right bank of the Nile, 12 m. S. of the head of the Delta, and 120 m. SE. of Alexandria, covers an extensive area on a broad, sandy plain, and presents a strange agglomeration of ancient and modern elements. The modern city is the fourth founded in succession on the same site, and remains of the former cities are included in it, old walls, gateways, narrow streets, and latticed houses, palaces and many mosques, the most striking of which are those of Tulun, Kalaun, Barbuk, and of Sultan Hasan.

There are three gates of the city, Bab-en-Nar, Bel-el-Futuh, and Bab-Zuweyeh, which are fine examples of Mohammedan architecture. These, though much spoiled by time and tourists, still represent the brightest period of Saracenic art. The most modern part of the city consists of broad boulevards, with European-built villas, hotels, etc. There is a museum possessing a remarkable collection of Egyptian antiquities, especially Pharaonic relics, and a unique library containing over 100,000 volumes of Eastern literature. Modern improvements include new bridges over the Nile, new motor roads

A CAIRN TERRIER

and suburbs. At one, Heliopolis, there is now an air station of the N. African air-route from Cairo to Cape Town. There is also a university with 2,000 students.

Extensive railway communication and the Nile waterway induce a large transport trade, and the town serves as a depot for goods of every variety from Sudan, Upper Egypt, India, Persia, Asiatic Turkey and for many European manufactures, but there is little industry, and what there is consists chiefly of cotton-weaving and printing, an industry established by Mehemet Ali in Bulak. There are also paper-mills and gunpowder works.

The population is mixed, consisting to-day of 1,064,567 persons. The townsfolk are half Arab, half Egyptian, while Copts, Turks, Jews, Italians and Greeks are numerous; it is a centre of Mohammedan learning, and since 1882 the centre of British influence in Egypt. During the Great War it was the administrative headquarters of the Allied leaders in the operations in Egypt and Palestine.

Caisson, in engineering, a chamber of sheet-iron or wood used in laying the foundations of piers of bridges, quay walls, etc., to allow excavation in water-tight conditions.

Caithness, a level, except in the W. barren county in the N.E. of Scotland, with a bold and rocky coast; fishing the main industry, of which Wick is the chief seat; the inhabitants are to a great extent of Scandinavian origin, and English, not Gaelic, is the language spoken. Area, 685 sq. m. Pop. 25,600.

Caius College, Cambridge, originally called Gonville Hall, was re-founded in 1558 by Dr. John Caius. (1510-1573).

Cajamarca, an inland department of Peru, bounded on the N. by Ecuador. It is mountainous, watered by tributaries of the Amazon; chief industries cattle-raising and silver-mining. Area 12,500 sq. m. Pop. 212,760. The capital is a city of the same name with ruins of the palace of Atahualpa, the last of the Incas. Pop. 14,000.

Cajeput, a small evergreen tree (*Melaleuca leucadendron*) of the Myrtaceae order, with spikes of white flowers; a native of tropical Australia, the Malay Peninsula, and the Indian Archipelago, and often cultivated elsewhere in hot-houses. An aromatic oil is distilled from its leaves.

Calabar, a Southern province of Nigeria, the country flat and the climate unhealthy. Pop. 899,000. Also the chief town of the province. Exports consist chiefly of palm-oil and palm kernels. Pop. 15,000. New Calabar is a port 100 m. E. of Old Calabar.

Calabar Bean, poisonous seed of an African bean (the fruit of the *Physostigma venenosum*, a plant of the Leguminosae order), employed in medicine; known as the Ordeal Bean, having been used in W. Africa to test the innocence of people charged with witchcraft.

Calabash, the hard shell of the fruit-gourd trees of India and W. Africa, the epicarp of the *Crescentia cujate* (Bignoniaceae) being used in tropical America, that of the *Lagenaria vulgaris* (Cucurbitaceae) in India.

Calabria, a fertile dept. embraced in the Italy, and traversed by the Apennines; has tunny and anchovy fisheries; yields grains and fruits and a variety of minerals; is inhabited by a race of somewhat fiery temper; is much subject to earthquakes. Pop. 1,751,000. In Roman times it was the name of a district in the S.E. peninsula (the heel) of Italy, lying between the Adriatic and the Gulf of Taranto.

Calais, a fortified seaport in the dept. of Pas-de-Calais, France, on the Straits of Dover, where it is 21 m. across; was in possession of the English from 1347 to 1558, and the last town held by them on French soil; is one of the chief landing-places for travellers from England to the Continent, and has considerable export trade, as well as cotton and tulle manufactures. It was one of the landing-ports of the British Expeditionary Force in 1914. It has a population of 70,000.

Calamander, a rare and valuable cabinet-wood resembling rose-wood, derived from the *Diospyros quercifolia*, a tree of the Ebenaceae (Ebony) order, found in Ceylon; yields veneers of exceptional quality.

Calamine, a name for (1) zinc carbonate, (2) the native hydrous silicate of zinc, used as a pigment in painting pottery, and (3) an alloy of zinc, lead, and tin.

Calas, Jean, a tradesman of Toulouse, who was charged with murdering him to prevent his going over to the Catholic Church; was tried, convicted, and sentenced to torture and death on the wheel; after which his property was confiscated, and his children compelled to embrace the Catholic faith, while the widow escaped into Switzerland. Voltaire took up her case, proved to the satisfaction of the legal authorities in France the innocence of the victims, got the process revised, and Louis XV. granted a sum of money out of the royal bounty for the benefit of the family. (1698-1762).

Calaveras, an inland county of California, E. of San Francisco, rich in minerals, with copper and gold mines, and remarkable for its forests of giant pines, the *Sequoia gigantea*, which occur there, including some of the largest and oldest trees in the world.

Calcareous Rocks, those sedimentary rocks composed almost entirely of compounds of lime, especially the carbonate. They are abundant in all parts of the world as chalk or limestone. They are chiefly of organic origin, being formed of the remains of animals with lime skeletons. Some limestones have been laid down as the result of denudation of earlier calcareous rocks, whilst others contain a certain amount of non-calcareous matter. Some chalk beds contain many flints.

Calceolaria, a genus of ornamental plants of the order Scrophulariaceae. Most have yellow flowers, and most of those in cultivation are hybrids. They are of S. American, Mexican, and W. Indian origin. There are 200 species.

Calchas, the soothsayer painted Agamemnon to the siege of Troy; enjoined the sacrifice of Iphigenia to propitiate the gods, foretold the length of the war, and advised the construction of the wooden horse, a device by means of which Troy was surprised and taken.

CALCEOLARIA

Calcination, a term in metallurgy for the process of burning or roasting an ore. It can be done either in an air-blast in order to obtain the oxide, or without air to free any volatile constituent.

Calcite, or Iceland Spar, a form of carbonate of lime, abundant as crystals in many igneous rocks. It exhibits the phenomenon of double refraction.

Calcium, a chemical metallic element, belonging to the same family as strontium, barium and radium. Symbol Ca, atomic number 20, atomic weight 40.07. First isolated by Sir Humphry Davy in 1808; it does not occur in nature as the free element, but is widely distributed in the form of its compounds—e.g., Calcium carbonate, CaCO_3 (limestone, chalk, marble), Calcium sulphate, CaSO_4 (gypsum, alabaster, anhydrite) and Calcium phosphate, $\text{Ca}_3(\text{PO}_4)_2$ (the main constituent of bones).

Calculating Machines, instruments for counting mechanically, now much used in banks, insurance offices, and large mercantile establishments. In a common type of machine the sums to be worked are set by means of keys like typewriter keys, and the machine adds columns of numbers, or of pounds, shillings and pence, and prints the result. The British mathematician, Babbage (1792-1871), planned many machines for more difficult operations. One, in unfinished form, may be seen in the S. Kensington Museum. Besides Babbage other inventors include Gunter (the sliding scale), Viscount Mahon, Charles Xavier, Thomas of Colmar and Burroughs. The ancient abacus, still in use among Eastern traders, is the simplest surviving form of mechanical aid to calculation.

Calculus, a branch of mathematics, largely developed by J. Bernoulli (1645-1705), G. W. Leibnitz (1646-1716), and Sir Isaac Newton (1642-1727) and, in the 19th Century, by Karl Weierstrass (1815-1887). Though it has many subdivisions, it may be roughly defined as the methods by which we discuss the properties of continuously varying quantities.

A typical method and the necessity for it may be indicated by a simple example, the motion of a train along a track or of a planet in its orbit. If we know the successive positions of the moving body at successive short intervals of time, the differential calculus enables us to calculate the speed, the change of speed, the change of direction of motion (i.e., the curvature of the path), and the effective force acting on the body.

Conversely, given the force at every point, and the initial position and velocity, the rules of the integral calculus assist us in calculating the position and velocity of the body at any future time. Expressed somewhat crudely, the differential calculus has to do with the differentials (increments or decrements) of varying quantities; while the integral calculus is a process of summation or integration of those differentials.

In medicine a calculus is a stone-like body formed round a central core in any part of the body by the accretion of various substances, such as uric acid, phosphate, or calcium.

Calcutta, in India, on the left bank of the Hugli, the largest and westernmost branch of the Ganges delta, about 80 m. from the sea; it is the cap. of Bengal and formerly of the Indian Empire, and the residence of the Governor-General; the Government buildings, Bishop's College (now an engineering school), High Court, town hall, bank, museum, university, St. Paul's Cathedral, and many other English buildings have earned for it the name "city of palaces"; but the native quarters, though being improved, are still squalid, the houses of mud or bamboo.

An esplanade, numerous quays, an excellent water-supply, gas, electricity, and tramway services add to the amenities; there are extensive dockyards, ironworks, timber yards, and jute mills; extensive railway and steamboat communications make it the chief emporium of commerce in Asia; ships of 5,000 tons enter the docks; founded in 1690, Calcutta was captured by Surajah Daulah, and

the "Black Hole" massacre perpetrated in 1756; became the capital of India in 1772; has suffered frequently from cyclones; the population are two-thirds Hindus, less than a third Mohammedan, and 4 per cent. Christian and number 1,197,000 (including Howrah) 1,485,000.

Calcutta Cup, the trophy for which England and Scotland compete annually at Rugby football, presented by the Calcutta Club.

Calcutta Sweep, a gigantic sweepstake, the chief prizes in which run into thousands of pounds, organised on the Derby each year by the Calcutta Club.

Calder, river in the W. Riding of Yorkshire, England. It rises near Burnley and joins the R. Aire at Castleford. It forms part of the canal system of England known as the Aire and Calder Navigation.

Calderon, Philip Hermogenes, painter, ancestry, came born at Poitiers, of Spanish ancestry, came to England aged 12. His masterpiece is "Her Most High, Noble and Puissant Grace" (a little princess). R.A., 1807; he painted 1891 "The Renunciation of St. Elizabeth of Hungary," which is now in the Tate Gallery. (1833-1898).

Calderon de la Barca, the greatest Spanish dramatist, born at Madrid; entered the army, and served in Italy and Flanders, producing the while dramas which were received with great enthusiasm; took holy orders, and became a canon of Toledo, but to the last continued to write poems and plays; he was a dramatist of the first order, and has been ranked by the more competent critics among the foremost of the class in both ancient and modern times. (1600-1681).

Caldey, an island of Pembrokeshire, Wales, 2½ m. S. of Tenby. It has an abbey of the Cistercian monks and an agricultural college.

Caleb, son of Jephunneh the Kenazite—understood to mean one of a pre-Israelitish tribe of S. Canaan, descended from Kenaz (Num. xxxii. 12) and adopted by or mixed with the tribe of Judah. He was colleague of Joshua in the spying expedition sent by Moses (Num. xiii. 6), and upon the conquest Hebron became his inheritance (Josh. xiv. 14). When 85 he conquered the Anakims there. (Josh. xv. 13-19).

Caledon, a town in the Cape Province, Union of S. Africa, 65 m. from Cape Town. It has mineral springs. The products of the district are agriculture, fruit, sheep and cattle. European population of town nearly 2,000. District, Europeans 11,000. The Caledon R. flows through the S. part of the Orange Free State to join the Orange R.

Caledonia, the Roman name for Scotland, N. of the Wall of Antoninus, since applied poetically to the whole of Scotland.

Caledonian Canal, a canal across Scotland, executed by Telford, for the passage of ships between the Atlantic and the North Sea, 60 m. long, 40 m. of which consist of natural lakes; begun 1803; finished 1823; cost £1,300,000; has 28 locks; was constructed for the benefit of coasting vessels to save the risks they encountered in the Pentland Firth.

Caledonian Market, (strictly the Metropolitan Cattle Market), a market held in Caledonian Road, Holloway, London, and consisting of stalls, stands, etc., where almost every conceivable article of portable size can be purchased, especially second-hand goods. Prior to the advent of imported frozen and chilled meat, it performed its original function of a cattle-market.

Calendar, a distribution of the year register, the order of days, weeks, months, festivals, etc., as they occur; so called from the Roman "Calends." The ancient Egyptians used one of 365 days, divided into twelve months of thirty days. The Jews use a Calendar dating from 3760 B.C., when, according to their tradition, the world was created. It varies in length from 354 to 384 days. The Greek Calendar divided the years into twelve lunar months, and an extra month was added every alternate year. The resultant error was rectified by omitting the extra month every seven or eight years.

The Roman Calendar of Romulus was of ten months, consisting of 304 days—38 weeks of eight days each. It was altered by Julius Caesar with the help of Sosigenes, and is called the Julian or Solar Calendar, and forms the basis of Calendars in Christian countries to-day, though a new style Calendar was adopted by a regulation of Pope Gregory XIII. in 1582 to meet a demand for greater accuracy in the date of Easter. The Mohammedan Calendar began with the flight of Mohammed from Mecca in A.D. 622, and is purely lunar.

Calender, a machine consisting of two revolving so nearly in contact that paper or cloth passed between them is smoothed or glazed by their pressure. The rollers are composed of compressed paper or steel.

Calends (Kalends), the first day of the Roman month.

Calgary, a flourishing town in the province of Alberta, Canada; an important junction on the Canadian Pacific Railway and centre of a corn and stock-raising district. It has saw-mills, tanneries, iron foundries. Pop. 84,000.

Calibration, the principle of scientific measurement of bores of tubes, originally of the bore or "calibre" of a gun where the dimensional measurement is not constant throughout the length of the tube. It is a method of correction, and is illustrated in the measurement of a thermometer tube which is first divided into equal distances between freezing and boiling points. The marks are then corrected by observing the length of the mercury column at different points, thus checking the slight variations which cannot be entirely prevented during manufacture.

Calibre, the internal diameter or bore of a gun. Larger guns are distinguished by their calibre and are referred to as 7-in. guns, 12-in. and so on.

Calico, a trade name for a cotton fabric, woven upon a simple system of equal numbers of fibres at right angles. The material is usually prepared in the "grey" state—i.e., the natural colour and is used for domestic purposes and often bleaching, dyeing, and printing applied for clothing and household uses.

Calicut, chief town on the Malabar coast, in the Madras Presidency of India, the first port at which Vasco da Gama landed in 1498, whence the cotton cloth first imported from the place got the name "calico." Exports include coconuts, coffee, tea and pepper. Pop. 82,000 (largely Moplahs).

California, the most south-westerly State in the U.S.A., occupies the Pacific seaboard between Oregon and Mexico, and is bounded landward by Nevada and Arizona. It is the second largest State, larger by a quarter than the United Kingdom. In the N. the rainfall is excessive and winters severe; in the S. there is little rain and a delightful climate.

Hay, wheat, barley, rice, oats, and maize are the most important products; the grape and all manner of fruits grow luxuriantly.

The live-stock industry (cattle and sheep) is also very important, and there are considerable fisheries and a big output of timber. It is the foremost State for gold and quicksilver, copper, lead, silver, zinc and many other minerals abound. It is one of the most important petroleum-producing states in the Union. The industries include fruit-canning and preserving and meat-packing. At Hollywood a film industry employing thousands of people has been established. The chief ports are San Francisco and Los Angeles. Sacramento is the capital. The Yosemite Valley, in the Sierra Nevada, through which falls the Merced R., is the most wonderful gorge of its kind in the world.

First settled in 1769, California was from its discovery down to 1846 politically associated with Mexico. Ceded by Mexico in 1848 to the U.S.A., the discovery of gold next year raised great excitement, and brought thousands of adventurers from all over the world. Admitted to the Union in 1850, the original lawlessness gradually gave way to regular administration, and progress has since been steady and rapid. Pop. 5,677,000.

California, Lower (*Baja California*), an extensive, mountainous, dry, and scarcely habitable peninsula, stretching southward from the State, in Mexican territory. Agriculture is carried on in some of the valleys, and pearl and whale fisheries support some coast towns. Copper is an important mineral product. Gold and silver are also mined. It is divided, for administrative purposes, into the two territories of the N. (Cap. Mexicali) and the S. (Cap. La Paz). Pop. 95,000.

Californian Poppy, a genus of perennial herbs of the poppy family, native of the valleys and foothills of the Sierra Nevada mountains and cultivated as an ornamental annual. The name is less often given to the *Platystemon*, another genus of Papaveraceae native to California.

Caligula (*Calus Caesar*), Roman Emperor from A.D. 37 to 41, youngest son of Germanicus and Agrippina, born at Antium; having ingratiated himself with Tiberius, was named his successor; ruled with magnanimity at first, while he lived in the unbridled indulgence of every lust, but after an illness due to his dissipation, gave way to acts of cruelty and impiety; declared himself a god, and had divine honours paid to him, till a conspiracy was formed against him on his return from an expedition into Gaul, when he was assassinated. (12-41 A.D.).

Calipers, an instrument for measuring (internal) of objects; some forms resemble a compass with bent legs. The micrometer calipers are used for minute dimensions of such instruments as the telescope and microscope.

Caliph (*Caliphate*), the name assumed by the successors of Mohammed in the government of the faithful and in the high priesthood. The holder of the title is supreme in both civil and religious matters. The principal caliphates are: (1) the Caliphate of the East, established by Abubekr at Mecca, transferred to Bagdad by the Abbasides (632-1258); (2) the Caliphate of Cordova, established at Cordova by Abd-el-Rahman (756-1031); (3) the Caliphate of Egypt, established by the Fatimites (909-1171). It was at Bagdad that Moslem civilisation achieved its final develop-

ment. The most celebrated of the Caliphs of Bagdad was Haroun al Raschid (Aaron the Just) (786-808), under whom learning, science and art flourished. The most brilliant period of the Western Caliphate was during the 9th and 10th Centuries. The Eastern Caliphate lingered on till 1258, when Bagdad was sacked by the Mongols. The title was abolished in 1924 in Turkey by the National Assembly of Angora, when Mustapha Kemal was re-elected President.

Callander, a market town and tourist resort of Perthshire, Scotland, near the Trossachs. It is the scene of Scott's *Lady of the Lake*. Pop. 1,570.

Callao, the chief port of Peru, 7 m. from Lima, with a fine harbour, the safest on the coast, if not in the world; its prosperity depends on trade, which is less than it was before the annexation of the nitrate fields to Chile. Chief exports include sugar, cotton, hides, wool, vanadium, etc. Pop. 70,000.

Callernish, a district in the W. of Scotland, 13 m. from Stornoway; noted for its circles of standing stones, from 10 to 17 ft. in height, the whole being in cruciform arrangement.

Callimachus, Greek grammarian and poet, born in Cyrene; opened a school at Alexandria and had distinguished pupils; was keeper of the library there; of his writings, which are said to have been on a variety of subjects and very numerous, only a very few epigrams and hymns remain.

Calliope, the muse of epic poetry and eloquence, is represented with a tablet and stylus, and sometimes with a paper roll. See *Muses*.

Calms, The regions of calm weather at sea, just N. of the equator, on the confines of the trade winds. These calms, which last for weeks at a time, are also known as the doldrums.

Calne, ancient market town of Wiltshire, England, 5 m. S.E. of Chippenham. Bacon-curing is the chief industry. Pop. 3,000.

Calomel, HgCl₂, mercurous chloride, a preparation of mercury much used in medicine. It is prepared by sublimation of a mixture of mercury and mercuric chloride. It is used in a variety of ailments, as a purgative, a vermifuge, etc.

Calorescence, the name given by Professor Tyndal to the production of light from the invisible rays beyond the red end of the spectrum. These rays are the hottest, and magnesium can be burned and platinum brought to white heat by them. The action of the platinum renders the invisible rays visible, hence, "calorescent."

Caloric Theory, a theory of heat which postulated a weightless fluid "caloric," the presence of which caused a body to be hot. When a hot and cold body were placed in contact it was supposed that "caloric" flowed from the hot to the cold body. The theory was abandoned in favour of the kinetic or dynamical theory, as the result of the conclusive experiments of Count Rumford (Benjamin Thomson) in 1789-1799.

Calorie, the name given by physicists to the unit quantity of heat; the heat required to raise one gram of pure water from 15° to 16° C.; for certain practical purposes the calorie is taken to be 1,000 times this value.

Calorimeter, an apparatus for measuring quantities of heat. In its simplest form—viz., a copper can containing water—the rise of temperature caused by the immersion of a hot body in the

water is employed to measure specific and latent heats. A more complicated apparatus is necessary in determining the calorific values of fuels.

Calpurnia, the last wife of Julius Caesar, daughter of the consul Piso, who, alive to the danger of conspiracy, urged Caesar to stay at home the day he was assassinated.

Calshot, a promontory of Hampshire, England, at the W. extremity of Southampton Water, since the Great War an important seaplane station.

Calumet, among the American Indians a pipe for smoking, which, if accepted when offered, was an emblem of peace, and, if rejected, a declaration of war.

Calvados, a maritime dept. in N. of France, skirted by dangerous rocks of the same name, with a fertile soil and a moist climate. Area 2,197 sq. m. Pop. 401,000.

Calvary, the place of the Crucifixion, identified with a hill on the N. of Jerusalem, looked down upon from the city, with a cliff from which criminals were cast down prior to being stoned; also name given to effigies of the Crucifixion in Catholic countries, erected for devotion.

Calverley, Charles Stuart, a clever English parodist, Fellow of Christ's Church, Oxford; wrote *Fly Leaves* and *Perses and Translations*; his parodies were among the most amusing of the century. (1831-1884).

Calvin, or Cavin, John, the great Reformer, born at Noyon, in Picardy; devoted for a time to the law, was

sent to study at the university of Orleans, after having mastered Latin as a boy at Paris; became acquainted with the Scriptures, and acquired a permanently theological bent; professed the Protestant faith; proceeded to Paris; became the centre of a dangerous religious excitement; had to flee for his life from France; retired to Basel, where he studied Hebrew and wrote his great epoch-making book, the *Institutes of the Christian Religion*; making after this for Strasbourg, he chanced to pass through Geneva, was arrested as by the hand of God to stay and help on God's work in the place, but proceeded with such rigour that he was expelled, though recalled after three years; on his return he proposed and established his system of Church government, which allowed of no license in faith any more than conduct, as witness the burning of Servetus for denying the doctrine of the Trinity; for twenty years he held sway in Geneva, and for so long he was regarded as the head of the Reformed Churches in Scotland, Switzerland, Holland and France. Besides his *Institutes*, he found time to write Commentaries on nearly all the books of the Bible; was a man of masculine intellect and single-hearted devotion to duty. His greatest work was his *Institutes*, published in Basel in 1535-1556. It was written in Latin, and four years after translated by himself into French. (1509-1564).

JOHN CALVIN

Calvinism, the theological system of Calvin, the chief characteristic of which is that it assigns all in salvation to the sovereign action and persistent operation of Divine Grace.

Calydon, a famous town of Aetolia, near the R. Evenus, and reputed to have been founded by Calydon, son of Aetolia. The walls have a circuit of over two miles. Meleager and other heroes

hunted the famous Calydonian bear in the district, Artemis having sent it to lay waste the fields.

Calypso, in the Greek mythology a nymph, daughter of Atlas, Queen of the island of Ogygia, who by her fascinating charms detained Ulysses beside her for 7 of the 10 years of his wanderings home from Troy; she died of grief on his departure.

Calystegia, the bindweeds, a genus of some 10 species of plants of the natural order Convolvulaceae. Two species are found in Britain—viz. *C. soldanella* (sea bindweed), which is found on the coasts, and *C. Sepium* (the larger bindweed), which is found in hedges and which is pollinated by the hawk-moth; the distribution of the two being almost the same. They are twining plants.

Calyx, the outside set of floral leaves, called sepals, and affording protection to the vulnerable parts of the flower. They are *caducous* if they fall before the flower opens, *deciduous* if afterwards, and *persistent* if they remain until the fruit is ripe.

Cam, formerly Granta, a river of Cambridgeshire, England, 40 m. long, which joins the Ouse near Ely. It is navigable to Cambridge, 15 m.

Camalodunum, the Roman name of Colchester, Essex, England, which is the site of a large Roman encampment.

Camargue, *île de la*, an island in the delta of the Rhône, France, about 150 sq. m. in area, and producing wine and cereals and pasture for sheep and cattle. It is low-lying, and much is lake and marshland.

Cambacérès, Jean Jacques Régis de, Duke of Parma, born at Montpellier; took a prominent part as a lawyer in the National Convention; after the Revolution of the 18th Brumaire, was chosen second consul; Napoleon made him High Chancellor of the Empire as well as Duke of Parma; his *Projet de Code* formed the basis of the *Code Napoléon*. (1753-1824).

Cambay, the name of a small Mohammedan *Salute State* in the Gujarat States Agency, India. The chief town of the State, Cambay is a seaport N. of Bombay, on a gulf of the same name, which is fast silting up, in consequence of which the place, once a flourishing port, has fallen into decay. Pop. 87,700.

Camberley, a residential district SW. of Ascot. Here is the military Staff College, and near is Sandhurst.

Camberwell, residential suburb of London, S. of the Thames, returning four members to Parliament. It includes Peckham, Nunhead and Dulwich. Pop. 251,000.

Cambodia, a province of French Indochina, occupying an area as large as Scotland, in the plains of the Lower Mekong. The coast-line is washed by the Gulf of Siam; the landward boundaries touch Siam, Laos, Annam, and French Cochinchina; in the N. are stretches of forest and hills; a branch of the Mekong flows backward and forms the Great Lake; most of the country is inundated in the rainy season, and rice, tobacco, cotton and maize are grown in the tracts thus irrigated; pepper, kapok, salted fish, cattle, hides and timber are also exported; foreign trade is done through the port Kampot. The capital is Pnom-Penh, on the Mekong. The kingdom was formerly much more extensive; remarkable ruins of ancient grandeur are numerous. It has been under French protection since 1863. Its present King is Sisowathmonivong. Pop. 2,806,000.

Cambon, *Pierre Paul*, French ambassador in London 1808-1820. Selected to smooth matters with England by becoming ambassador there after the Fashoda incident, he signed the Anglo-French agreement of 1904, and in 1912 exchanged with Sir Edward Grey letters regarding co-operation in the event of war. (1843-1924).

Camborne, market town of Cornwall, England, in a district rich in copper, tin and lead. Here the first locomotive was made by Richard Trevithick. Pop. 14,000.

Cambrai, a city in the dept. of Nord, France, on the Scheldt; famous for its fine linen fabrics, hence called *cambries*. Pop. 28,000. It was the scene of intensive fighting in the Great War during two battles in Nov. 1917 and Oct. 1918.

In the first battle, a British offensive under General Byng commanding the 3rd Army was planned in order to prevent the transfer of German reinforcements to the Italian front. For the first time tanks were extensively used, and after a resolute resistance by the enemy at Bourlon Wood, Cambrai was taken. In vigorous counter-attacks, however, most of the ground was lost.

In the second battle, which formed part of the final offensive of the war, the recapture of Cambrai was allotted to General Horne with the 1st Army and a Canadian Corps under General Currie. After violent fighting, it was finally captured on Oct. 3.

Cambria, the ancient name of Wales, the Celtic race to which the Welsh belong.

Cambrian, a system of rocks forming the series, and containing many forms of primitive animal life. The deposits, consisting of grits, sandstones, shales and slates, present considerable uniformity over the whole earth. Rocks of this age are particularly abundant in Wales. The principal fossils are trilobites and brachiopods.

Cambrie, a linen fabric made from the finest quality yarns, and extensively used in the manufacture of handkerchiefs, collars, underclothing, etc. It was first made at Cambrai, France, whence comes the name.

Cambridge, county town of Cambridgeshire, England, stands in flat country, on the Cam, 58 m. N. of London; an ancient town with interesting archaeological remains; there are some fine buildings, the oldest round church in England, Holy Sepulchre, and a Roman Catholic church. The glory of the city is the University, founded in the 12th century, with its colleges housed in stately buildings, chapels, libraries, museums, etc., which shares with Oxford the academic prestige of England. It lays emphasis on mathematical and scientific as Oxford on classical, culture. Among its eminent men have been Bacon, Newton, Cromwell, Pitt, Thackeray, Spenser, Milton, Dryden, Wordsworth, Tennyson and Darwin. Pop. 86,800.

Cambridge, a suburb of Boston, U.S.A., one of the oldest towns in New England; Old Cambridge is the seat of Harvard University; the town is the centre of the book-making trade; here Longfellow resided for many years. Pop. 114,000.

Cambridge, *Adolphus Charles*, first of the Prince and Duke of Teck, whom he succeeded in 1900, and Princess Mary of Cambridge, and elder brother of Queen Mary. A soldier in the British army, he served in the S. African War; became Lieutenant-colonel of Life Guards, 1914. Renowned continental titles and assumed name of Cambridge, 1917, when he became Marquess of Cambridge. (1868-1927).

Cambridge, *Adolphus Frederick*, First Duke of, seventh and youngest son of George III.; served as volunteer under the Duke of York in the campaign of 1794-1795; became Duke of Cambridge, 1801, was appointed Field-Marshal in 1813; was made Vicaroy of Hanover in 1816, and continued so till, in 1837, the crown fell to the Duke of Cumberland. (1774-1850).

Cambridge, *George William Frederick*, Charles, Second Duke of, son of the preceding, and cousin to Queen Victoria; born in Hanover; served in the army; became Commander-in-Chief in 1856 on the resignation of Viscount Hardinge; Field-Marshal in 1862; retired in 1895, was succeeded by Lord Wolseley. (1819-1904).

Cambridgeshire, an inland agricultural county of England, one of the chief grain-producing counties, wheat being the chief crop, barley, oats, potatoes and beetroot also being important. Dairy-farming is also carried on and sheep-raising. The county is very flat and marshy in the N., with a range of chalk-hills, the Gog-Magog in the S.; is rich in Roman remains. Pop. 140,000.

Cambridge University, contains the following colleges: Peterhouse, founded 1284; Clare College, 1326; Pembroke, 1347; Gonville and Caius, 1348; Trinity Hall, 1350; Corpus Christi, 1352; King's, 1441; Queen's, 1448; St. Catharine's 1473; Jesus, 1496; Christ's, 1505; St. John's, 1511; Magdalene, 1542; Trinity, 1546; Emmanuel, 1584; Sidney Sussex, 1596; Downing, 1800; Selwyn, 1882; and Fitzwilliam House, 1889. There are 2 colleges for women: Girton, founded 1869, and Newnham, 1875. Each college is a corporation by itself, governed by statutes sanctioned by the crown, and capable of holding landed or other property.

Cambuskenneth, a ruined abbey Scotland. The first Scots Parliament met here in 1326, and here James III. and his Queen were buried.

Cambuslang, a town of Lanarkshire, Scotland, on the Clyde, 5 m. SE. of Glasgow. Here are large steel works and collieries. Pop. 25,000.

Cambyses, King of Persia, succeeded his father, the great Cyrus; invaded and subdued Egypt, but afterwards suffered serious reverses, and in the end gave himself up to dissipation and vindictive acts of cruelty, from which not only his subjects suffered, but the members of his own family; d. 521 B.C.

Camden, a busy town in New Jersey, U.S.A., on the left bank of the Delaware, opposite Philadelphia; industries, which are varied, include shipbuilding. Pop. 119,000.

Camden, *William*, a learned English antiquary, born in London; second master, and eventually headmaster in Westminster School, during which time he gave proof of his antiquarian knowledge, which led to his appointment as Clarenceux King-at-Arms; author of *Britannia*, a historical and topographical account of the British Isles, and *Annals of Elizabeth's Reign*, written in Latin. (1551-1623).

Camel, a beast of burden used in Arabia, Central Asia, N. Africa and India. They are ungulates of the sub-order Artiodactyla (i.e., "even-toed") and section tylopoda (i.e.,

BACTRIAN CAMEL

"pud-footed"). The two characteristics which make them of such great value for desert travel are the structure of their feet, which are two-toed, stiff and wide-spreading, and the structure of the stomach, which contains a set of large cavities or water-cells enabling the animal to go three days at a stretch without water. There are two distinct species: the one-humped Arabian dromedary and the two-humped Asiatic bactrian. Their powers of endurance are well known, but they are vicious by nature, and are docile from stupidity rather than affection when trained by man. Some breeds will carry a load of 1,000 lb. The swiftest racing camels are Arabian. The flesh is edible and milk is nutritious, while the hair can be woven into clothing material.

Camelford, an ancient market town of Cornwall, England, 12 m. N. of Bodmin. Nearby are slate quarries. Pop. 1,500.

Camellia, a genus of evergreen plants with showy flowers and elegant, dark green, shining, laurel-like leaves, mostly natives of India, China, and Japan. There are eight species, *C. japonica* being a celebrated feature of Japanese and Chinese scenery, and the origin of many double varieties in British gardens. They belong to the tea order (Theaceae). Oil is obtained from some species.

Camelpt, the ancient town where variously identified with Carleon-upon-Usk (q.v.); Winchester, in which town old encroachments are associated with the legend; Queen's Camel, Somersetshire; and Camelford, Cornwall.

Cameo, a general name for all gems a gem composed of several different-coloured layers having a subject in relief cut on one or more of the upper layers, an under layer of a different colour forming the ground. For this purpose the ancients used onyx, sardonyx, agate, etc. The shells of various molluscs are now much used for making cameos, and they are also imitated on glass.

Camera, primarily a box used in a film or sensitive plate at one end and a lens and focussing apparatus at the other; a development of the camera obscura by which, centuries ago, cellipses were observed. For photography requiring delicate adjustments a stand-camera is used, but the popular hand-camera, which takes rollfilms, is employed for press work and snapshots. A cap or shutter is fitted to the lens to regulate exposure, and the quantity of light to be admitted can be determined by stops of different sizes.

The various lenses include *verruinear*, which correct errors of refraction, *achromatic* which correct the aberration of different-coloured rays, *aplanatic*, which counteract spherical aberration, and the modern *anastigmatic*, which ensure a wide field and a faithful image with rapidity of exposure.

Camera Lucida, an optical instrument, by means of which the image of an object may be made to appear on a light or white surface.

Camera Obscura, an optical contrivance, by means of which the images of external objects are exhibited distinctly on a surface in the focus of the lens.

Cameron, Sir David Young, British artist, born in Glasgow. He made a name for himself as an etcher, and later as a landscape painter, especially of Scottish scenes. He was made A.R.A. in 1911, and R.A. in 1920, and was knighted in 1924. In 1938 he was appointed Painter-Linman to the King's Household in Scotland. (1865-).

Cameron, Verney Lovett, African explorer, born near Weymouth; commanded the expedition sent to help Livingstone but met the natives who were bearing his body to the coast; traversed Africa all the way from E. to W. (1873-1875); explored Lake Tanganyika, and traced the sources of the Zambezi R.; wrote *Across Africa*; killed in the hunting field. (1814-1894).

Cameronians, (1) a Presbyterian body in Scotland who derived their name from Richard Cameron, contended like him for the faith to which the nation by covenant had bound itself, and even declined to take the oath of allegiance to sovereigns such as William III. and his successors, who did not explicitly concede to the nation this right. (2) Also a British regiment, originally raised in defence of Scottish religious rights; for long the 26th Regiment of the British line, now the Scottish Rifles.

Cameroon, (1) a wide estuary in the Bight of Biafra. (2) a mountain range, a volcanic group, the highest peak nearly 14,000 ft., NW. of the estuary.

Cameroons, a former German protectorate on the W. coast of Africa, between French Equatorial Africa and Nigeria, formerly known as the Oil Coast. It is on the whole high-lying, but has a strip of lowland near the coast. During the war possession of this territory was taken by French and British forces, and in July 1919 Germany renounced sovereignty. The greater part was then placed under a French League of Nations mandate, a strip on the E. border of Nigeria being placed under British mandate. The French mandate extends over 166,000 sq. m.; Pop. 2,200,000. The area of the British mandated territory is 34,000 sq. m. Pop. 817,000. The chief products are bananas, palm kernels, palm oil, ground nuts, etc.

Camilla, a virgin queen of the Volsci, one of the heroines in the *Æneid*, noted for her preternatural swiftness on the race-course, and her grace. She gave Turnus assistance against Æneas, and was mortally wounded in the breast by Aras.

Camillus, Marcus Furius, a famous patrician of early Rome; took Veii, a rival town, after a ten years' siege; retired into voluntary exile at Ardea on account of the envy of his enemies in Rome; recalled from exile, saved Rome from destruction by the Gauls under Brennus, was five times elected dictator, and gained a succession of victories over rival Italian tribes; died at eighty of the plague, in 365 B.C.

Camisards, Huguenots of the Cevennes, who took up arms by thousands in revolt against Louis XIV., in which others joined, under Joan Cavalier their chief, after, and in consequence of, the revocation of the Edict of Nantes (1685); so called because they wore a *camise* (Fr. a chemise), or white blouse, over their armour; were partly persuaded and partly compelled into submission by Marshal Villars in 1704.

Camoens, Luiz de, the poet of Portugal, Coimbra; fell passionately in love with a lady of high rank in Lisbon, as she with him, but whom he was not allowed to marry; left Lisbon, joined the army, and fought against the Moors; volunteered service in India, arrived at Goa, and got into trouble with the Portuguese authorities; was banished to Macao, and consoled himself by writing his *Lusiads*; coming home was shipwrecked and lost everything but his poems; died neglected and in poverty; the title of his greatest work is properly *The Lusiads*, or the Lusitanians, i.e., the Portuguese, and is their national epic, called, not inaptly, the "Epos of Commerce." (1524-1580).

Camomile, a herb with medicinal W. Europe, and the Mediterranean districts. It belongs to the genus *Anthemis* of the order Compositae, the most important species being the *Anthemis nobilis*. The flower-heads contain oil, camphor and a bitter substance, and by infusion a bitter stomachic of value in the treatment of coughs and infantile colic is prepared.

CAMOMILE

Camorra, a secret society in Naples with wide ramifications, which was at first instituted for brigandage and smuggling, but which in 1848 adopted revolutionary political ideas and by sheer terrorism gained considerable political influence in the country; when steps were taken by Francis II. to suppress it, the members of it joined the revolutionary party, and had their revenge in the expulsion eventually of the Bourbons from Italy. A double murder by members, resulting in trial, at Viterbo, in 1911 of a large number of them virtually brought the end of the society.

Camp, a number of huts or tents forming shelter for troops on service or manœuvres, and to-day including holiday accommodation for those who prefer the freedom of camp life. Military camps can afford lodgement only for comparatively small and mobile units, since baggage problems are a hindrance to organisation. Camps of military exercise consist of permanent barracks near a suitable exercise-ground; such camps are established at Salisbury Plain, Aldershot, Catterick, etc., for infantry, while artillery training camps exist elsewhere.

Campagna di Roma, an unhealthy, flat district round Rome, co-extensive with ancient Latium, infested with malaria, the unhealthiness of many of the towns having been noted by Livy, Cicero and Strabo. Steps to drain the district and to rid it of the malaria mosquito have been taken in recent years.

Campania, an ancient province in the W. of Italy, of great fertility, yielding corn, wine and oil in great abundance. It was of smaller extent than the present Italian dept. of Campania. Capua was the capital, the other chief towns being Naples, (Neapolis) and Salerno (Salernum); it was a favourite resort of the wealthy families of ancient Rome.

Campanile, a tower for bells constructed beside a church, but not attached to it; very common in Italian cities, the leaning tower of Pisa being one, and that of Florence one of the most famous. That of St. Mark's, Venice, collapsed in 1902 and was rebuilt in exact facsimile.

Campanology, bell-lore, the art of bell ringing, the art of bell founding, etc. See *Bells*.

Campanula, a large genus of flowering plants of the natural order Campanulaceae. They are generally herbaceous, and bear bell-shaped flowers. They are common in temperate climates, in the Mediterranean districts, in N. America, and on mountains in the tropics. There are 300 species, of which eight are found in England and Scotland, *C. rotundifolia* being the harebell (or blue-bell of Scotland). *C. medium* is the biennial Canterbury bell.

Campbell, a celebrated Scottish Highland clan, the members of which have played an important rôle in English and Scottish history.

Campbell, Beatrice Stella (Mrs. Patrick Campbell), musician and actress, maiden name Tanner; established her reputation as an actress with her performance in the name part in Pinero's *Second Mrs. Tanqueray* at St. James's Theatre, 1893; subsequently appeared in Ibsen and other advanced drama. (1868-).

Campbell, Sir Colin, Lord Clyde, born in Glasgow, son of a carpenter; entered the army, and rose rapidly; served in China and the Punjab; commanded the Highland Brigade in the Crimea; won the day at Alma and Balaclava; commanded in India during the Mutiny; relieved Lucknow, and quelled the rebellion; was made field-marshal, with a pension of £2,000, and created Lord Clyde. (1792-1863).

Campbell, John, Lord, Lord Chancellor of England, born at Cupar, Fife; a son of the manse; destined for the Church, but embraced the study of law; was called to the bar; did journalistic work and law reports; was a Whig in politics; held a succession of offices both on the Bench and in the Cabinet; wrote the *Lives of the Chancellors and the Lives of the Chief Justices*. (1779-1861).

Campbell, Capt. Sir Malcolm, British motorist, who set up what was a world's speed record of 174 m.p.h. at Pendine in 1927, and another of 202 m.p.h. at Daytona, in 1928. At Daytona Beach in 1931 he reached a mean average speed of 246 m.p.h. In 1933, also at Daytona, he did 272 m.p.h. and 5 m. at 251 m.p.h. Also in 1935 he established a new world's record of 301 m.p.h. over a measured mile. Knighted 1931. He has had an active life; amongst other exploits has led a treasure-hunting expedition to Cocos I. (1884-).

Campbell, Thomas, poet, born in Glasgow; studied with distinction at the University; when a student of law in Edinburgh wrote *The Pleasures of Hope*; the success of the work, which was great, enabled him to travel on the Continent, where he wrote the well-known poems *Ye Mariners of England*, *Hohenlinden* and *The Exile of Erin*; married, and settled in London, where he did writing, lecturing, and some more poetry, in particular *The Last Man*; a pension of £200 was awarded him through the influence of Fox; he was three times elected Rector of Glasgow University. (1777-1844).

Campbell-Bannerman, Sir Henry, British statesman. He entered Parliament as a Liberal in 1868, holding his seat at Stirling Burghs till his death; first took office in 1871 as Financial Secretary to the War Office, and became Secretary for War in 1886. He succeeded to the leadership of the Liberal Party in 1899, and in 1905, on the fall of the Balfour administration, he became Prime Minister. (1836-1908).

Campbeltown, a town in Kintyre, with a fine harbour; is a great fishing centre, and has whisky distilleries. Pop. 6,300.

Campeche (Campechy), a southern state of Mexico, bordering on the N. on the Gulf of Mexico and on the S. on Guatemala. It is in the tropics and unhealthy, sparsely inhabited, for the most part flat, and heavily forested in parts, though other parts offer good grazing ground. Chief exports, timber, hides, etc. The capital of the state is a seaport of the same name. Area (state), 19,600 sq. m. Pop. (state) 84,000; (town) 17,000.

Camperdown, a tract of sandy hills on the coast of N. Holland, near which Admiral Duncan defeated the Dutch fleet under De Winter in 1797.

"Camperdown," The, the name of the British battleship which rammed and sank the *Victoria* with great loss of life during manoeuvres in the Mediterranean in 1893.

Camphor a colpurian aromatic crystalline substance, distilled from the wood and leaves of the camphor laurel (*Cinnamomum camphora*). Camphor can be prepared synthetically from pinene, which is present in oil of turpentine.

CAMPHOR LAUREL

Campo-Fornio,

a village near Udine, in Venetia, Italy, where a treaty was concluded between France and Austria in 1797, by which the Belgian provinces and part of Lombardy were ceded to France, and certain Venetian States to Austria in return.

Campos, a trading city of Brazil, in the province of Rio de Janeiro on the Parahyba R. Sugar is produced in the neighbourhood. Pop. 48,000.

Campsie, a district of Stirlingshire, Scotland, including Lennoxtown, near which is the picturesque resort of Campsie Glen. Pop. 5,000.

Campus Martius, a large plain of Rome, ornamented with statues, arches, columns, etc. It was sacred to Mars, and here were held military exercises and games and chariot races in honour of Mars. Here also the Comitia of the people was held.

Camwood, a wood obtained from a tree (*Baphia nitida* of the order Leguminosae), found in Brazil and Africa; yields a red dye and affords material for knife-handles, etc. The wood is white when first cut, but turns red on exposure to the atmosphere.

Caná, the village of Galilee in which Christ performed His first miracle (turning water to wine, see John ii). Here also He healed the nobleman's son (John iv). It was the birthplace of the Apostle Nathanael. The position of its site is disputed.

Canaan, the name of the fourth son of Ham, the father of Sidon (Zidon), the progenitor of the Phœnicians, and of Heth and the Jebusite, the Amorit, and the founders of other peoples of the Palestine sea coast, whence the name was applied to the country itself, and eventually to the whole of Palestine W. of the Jordan.

Canaanites, a civilised race with dependent on agriculture; worshippers of the fertilising powers of nature; the original inhabitants of Palestine, from which they were never wholly rooted out.

Canada, The Dominion of, occupies the whole of the N. half of N. America with the exception of Alaska (U.S.A.) and Newfoundland and Labrador, and stretches from the Atlantic to the Pacific, from the United States to Alaska and the Arctic Ocean. It comprises a lofty and a lower tableland W. and E. of the Rocky Mts., the peninsulas of Labrador and Nova Scotia, and between these a vast extent of prairie and undulating land, with rivers and lakes innumerable, many of them of enormous size and navigable, constituting the finest system of inland waterways in the world. The Rocky Mt. system, which includes the Selkirk and the Coast Range, rises to 19,000 ft., but there are several gorges, through one of which the Canadian Pacific railroad runs. The area of the dominion is 3,466,000 sq. m. Pop. 10,380,000.

The chief rivers are the Fraser, Mackenzie, Saskatchewan, and St. Lawrence. Great Slave, Great Bear, Athabasca, Winnipeg, Manitoba, in the interior and Superior, Huron, Erie, and Ontario between Canada and the U.S.A. are the largest lakes. The climate is varied, very cold in the north, very wet west of the Rockies, elsewhere drier than in Europe, with hot summers, long, cold, but bracing and exhilarating winters. The corn-growing land is practically inexhaustible; the finest wheat is grown without manure, year after year, in the rich soil of Manitoba, Saskatchewan, and the western prairies, while an abundance of other cereals, including oats and barley, are produced.

The forests yield maple, oak, elm; pine, ash and poplar in immense quantities, and steps are taken to prevent the wealth of timber ever being exhausted; they cover an area of over 14 million sq. m., and Canada is the world's greatest exporter of timber for newsprint. The most important timber areas are in N. Ontario, Quebec, and British Columbia, where Douglas Fir are a feature. Over 80 per cent. of the surplus is exported to the U.S.A.

Gold, coal, iron, and copper are widely distributed, and Nova Scotia, British Columbia, Quebec, N. and W. Ontario, Alberta, and the Yukon are the chief mining districts. Canada produces the greater part of the world's nickel and asbestos. Fisheries, both on the coasts and inland, are of great value and include the great canning industry of the salmon-bearing Rs. Fraser and Mackenzie, and the vast cod, haddock, and halibut fisheries off the Newfoundland coast, as well as the world's greatest lobster industry.

Agriculture and forestry are the most important industries; while fruit-farming flourishes in many parts, especially the Annapolis Valley of Nova Scotia, the St. John Valley of New Brunswick, the Niagara Peninsula of Ontario, and the Okanagan and other interior valleys of British Columbia. Apples are the most important orchard fruit, though peaches, pears, plums and cherries are abundant. A comparatively new industry in Canada is fur-farming.

A plentiful supply of water-power has assisted Canada's recent commercial progress. Most of the manufactures are connected with local products, and include flour-milling, meat-packing, butter, cheese, fish-packing, lumber, pulp, paper, cotton, wool, artificial silk, leather, agricultural machinery, motor-cars, soap, sugar and tobacco.

There are two great railway systems: the Canadian National and the Canadian Pacific. Each has a trans-continental line and a network of branch lines connecting urban and rural centres. The Hudson Bay railway, recently constructed, is of importance to the wheat traffic via Churchill, and brings the wheat fields 1,000 m. nearer Europe than by the St. Lawrence route. Wireless "beam" stations are operated at Drummondville, Quebec, for direct communication with Australia and Great Britain. The chief trade is with England and the U.S.A.

The Dominion is a federation of nine provinces and two territories. Each of the nine provinces (Quebec, Ontario, New Brunswick, Nova Scotia, Prince Edward I., British Columbia, Manitoba, Saskatchewan and Alberta) has its own Provincial Government administered by a Lieutenant-Governor and a Legislative Assembly. The Yukon is administered by a Comptroller and a Territorial Council of three, the Northwest Territories by a Commissioner, Deputy Commissioner and Council of five appointed by the Governor-General. The Dominion Parliament meets at Ottawa, the federal capital, and consists of a Senate and a House of Commons. The Governor-General is the Viceroy of the King. Nearly every province

has its university, that of Toronto being the most important. The largest town is Montreal; Toronto, Quebec, Hamilton, and Halifax are all larger than the capital.

Canadian Mounted Police,

Royal, an armed constabulary maintained by the Dominion Government for service anywhere in Canada, but primarily for enforcing the observance of law in the Yukon, the unorganised NW. Territories, Indian Reserves, and National Parks. At present the force numbers 2,700 officers and men, including 207 in the Marine section stationed in cruisers and patrol-boats on the Atlantic and Pacific coasts and inland waters. It was first organised in 1873, being then known as the North-West Mounted Police. The present title was adopted in 1920.

Canal, an artificial water-course for the transport of goods or passengers by boat, ship, or barge, or for purposes of drainage or irrigation. The most familiar are for navigation. They consist usually of a number of sections, each on one level throughout its course, but differing in relative height from the others. Access from one section to another is secured by means of locks, inclines, or lifts.

The lock is a water-tight compartment with gates at either end. When the gate at the upper end is closed and that at the lower end opened, the water falls to the level of the lower section of the canal. When the lower gate is closed and the upper opened, the water rises to the level of the upper reach. Rivers, the level of which is liable to fall to an inconveniently low level in summer, are frequently "canalised" by the construction of weirs which artificially restrain the waters and maintain the level. In such a case also access from one reach to another is by means of locks.

The canal system of Britain (including "canalised rivers") extends to nearly 4,000 m., of which more than one quarter is owned by the railways. The chief are the Caledonian, the Manchester Ship, the Crinan, the Clyde and Forth, the Gloucester and Berkeley, and the Grand Union. In recent years the inland canals have tended to fall into disuse owing to excessive road and rail competition. Other countries also have extensive systems, especially Holland, Belgium, France, Germany and Canada. Some of the many notable canals abroad are the Suez (104 m. long), the Panama (41 m.), the Corinth, the Kiel, the Welland (Canada), the Bruges, etc.

Canary, a singing-bird, a species of finch, native to the Canary Is. and Madeira, introduced into Europe in the latter part of the 15th Century. The colour in nature is green, but selective breeding has produced the popular yellow varieties. They breed readily with allied species of birds, especially with the goldfinch, siskin, linnet, etc., though the hybrids are usually sterile.

Canary Grass, a hardy annual grass (*Phalaris canariensis* of the order Gramineae) with beautiful flowering spikes in summer. The seed obtained from its fruit is used as canary food, hence the name.

Canary Islands, a group of mountainous islands with rocky coasts, and wild, picturesque scenery, in the Atlantic, off the NW. African coast, belonging to Spain, and for administrative purposes considered part of Spain. On the lower levels the climate is delightful, and sugar, bananas, and dates grow;

farther up there are zones where wheat and cereals are cultivated. The rainfall is low, and water often scarce. Sugar, wine and tobacco are exported; the islands are a health resort of growing favour. Off these islands in 1797 Nelson sustained his one defeat, losing an arm; two of his flags are still hanging in Santa Cruz church. Chief ports are Las Palmas and Santa Cruz. Chief islands are Tenerife, Grand Canary, Palma, Hierro, Gomera. Area, 2,807 sq. m. Pop. 565,000.

Canberra, a tract of land, formerly in New South Wales, now the federal capital of Australia; ranks as the Federal Capital Territory, with an area of 940 sq. m. In 1927 the Duke of York (now King George VI.) performed the ceremony of opening the Parliament House there. Pop. (territory) 11,558; (town) 9,823.

Cancer, a term now applied to any malignant growth, including the two large groups carcinoma and sarcoma, in which the cancer attacks respectively the skin or lining tissues of the body and the connective tissues or flesh. Carcinoma are the more common and more dangerous.

The rapidity with which a malignant tumour becomes fatal depends first of all on its rate of growth, and secondly on the amount of harm done by its spreading through the blood or lymph to other parts of the body. Operation, to be successful, requires not only complete removal of the tumours and surrounding parts, but also of the glands in the region to which the tumour cells may have been carried. In cases treated in time this may be successful.

The causes of cancer are not properly understood. Irritation is responsible in the case of the "trade" cancers—e.g., the particular forms incident to chimney-sweeps, cotton workers, etc. Chronic inflammations, under-nourishment and injury by a blow have also been blamed in particular cases. The orthodox treatment has not altered fundamentally during the past twenty-five years, although great improvements in technique have been made. This fact has tended to obscure the great progress made in our knowledge of the disease.

None of the claims made to have isolated a cancer bacillus have been proved valid; but a new direction to the study of cancer has been given by the discovery that the disease may be produced experimentally by the application to animals of synthetic compounds of known molecular structure.

Cancer, or **The Crab**, the sign of the zodiac, which the sun enters on June 21, when it is overhead at noon at all places on the Tropic of Cancer, the Tropic of Cancer marking on the globe the N. limit of places where the sun at any time of the year is vertically overhead.

Candia (Herakleion), the name of the capital of the dept. of Herakleion, in the centre of the N. coast of Crete, anciently giving name to the whole island. Pop. 33,000.

Candle, a solid cylindrical rod of some fatty substance, with a wick or small bundle of loosely twisted threads placed longitudinally through its centre, used as a portable light. The chief material used in the past was tallow, sometimes mixed with palm-oil or wax, etc. Paraffin-wax candles came into general use about 1850. Candles can be made by "dipping" the wick in the fatty substance (as in the case of "tallow-dips"), alternate cooling and dipping taking place until the desired thickness is achieved, or by moulding (as in the case of paraffin candles). The wicks usually consist of cotton yarn braided and "pickled," or impregnated in such a way as to ensure complete consumption when burnt.

CANARY GRASS

Candlemas, a festival observed in the Armenian churches in commemoration of the purification of the Virgin Mary; held on Feb. 2, and celebrated with lighted candles.

Candlenut (*Aleurites triloba*), a tropical nut-bearing tree of the order Euphorbiaceae, grown for the oil and dyeing qualities contained in the nut, which is the size of the walnut. The flowers are large and white.

Candle Power, the unit of luminous intensity based on the standard sperm candle weighing six to the pound and burning 120 grains per hour.

Candytuft, a large genus (*Iberis*) of perennial herbs or shrubs of the order Cruciferae, common in Britain, Europe and Asia. There are some 30 species, including *I. amara* which grows wild in England and is also cultivated as an ornate garden flower. *I. umbellata* is also common in gardens, as is *I. coronaria* (rock-rose candytuft). The feature which gives the plant its peculiar beauty is the flowers, which grow in corymbs, the outer petals of each flower being of greater length than the others.

CANDYTUFT
(*Iberis amara*)

Cane, a general term for such plants as the bamboo, sugar-cane, and especially the rattan-palm, the stems of which, called rattans, are long and trailing and are exported from India and the East, being employed in wicker-work, chair-seats, ropes, etc. or *Khasia*, the capital and chief town of Assam, the capital and chief town of the NW. coast, built on the ancient site of Cydonia by Venetian settlers; trades in soap, oil and leather. Capital also of a dept. of the same name. Pop. (town) 27,000; (dept.) 112,000.

Cang(ue), a Chinese instrument of punishment consisting of a wooden yoke which prevents the victim from lying down or feeding himself.

Canker, the name applied to (1) a disease of trees, especially apple trees, due to a fungus, the *Nectria galligena*, the spores of which gain access through small wounds, made by insects, develop and cause the bark to crack; treatment is by control of the insects causing the wounds, by cutting away affected parts and smearing with pruning paint; (2) a disease of the ear of dogs, and occasionally of cats, an ulceration of the inner lining due to dirt or parasites.

Cannæ, ancient town in Apulia, near the mouth of the Aufidus, where Hannibal, in a great battle, defeated the Romans in 216 B.C.

Cannel Coal, a coal containing an unusual amount of ash and volatile ingredients, and burning with a clear, candle-like flame. It is valuable as a source of gas and oil, and occurs in British coalfields.

Cannes, a French watering-place and health resort on the Mediterranean, in the S.E. of France, where Napoleon landed on his return from Elbe. Pop. 42,000.

Cannes Conference, the meeting in 1922 at Cannes of the Supreme Council of the Allies with the main object of considering Anglo-French suggestions for reparations demands from Germany and her allies. Mr. Lloyd George stated that Great Britain was unwilling to incur military commitments in Central and E. Europe, and wanted Russia and the U.S.A. to be invited to a General

Reconstruction Conference. M. Briand of France opposed, and his resignation ended the conference.

Cannibalism, the eating of human flesh, still known to exist among the tribes of W. and Central Africa, New Guinea and northern S. America. Various causes are thought to have given rise to Cannibalism:—economic, when the supply of animal flesh is scarce, even civilised races having been reduced to it in cases of siege, famine, etc.; superstitious and religious, it being considered that the courage of an enemy would pass to the eater of his corpse, and make him immune from being haunted by his spirit. Certain tribes in Australia devoured the flesh of the dead as a form of refined interment of the dead relative, while among Mexicans and Fiji natives offerings to the Gods took the form of human sacrifices, the offering afterwards being eaten by the devotees. The Niam-Niam and Monbutter tribes of Africa exposed corpses of relatives in the market-place for sale as food.

Canning, Charles John, Earl, son of in Cabinet offices, was made Governor-General of India, 1856, in succession to Lord Dalhousie; held this post at the time of the Mutiny in 1857; distinguished himself during this trying crisis by his discretion, firmness and moderation; became Viceroy on the transfer of the government to the Crown in 1858; died in London without issue, and the title became extinct. (1812-1862).

Canning, George, a distinguished British statesman and orator, born in London; studied for the bar; entered Parliament as a protégé of Pitt, whom he strenuously supported; was rewarded by an under-secretaryship; married a lady of high rank, with a fortune; satirised the Whigs by his pen in his *Anti-Jacobin*; on the death of Pitt became Minister of Foreign Affairs; under Portland distinguished himself by defeating the schemes of Napoleon; became a member of the Liverpool ministry, and once more Minister of Foreign Affairs; on the death of Liverpool was made Prime Minister, and after a period of unpopularity became popular by adopting, to the disgust of his old colleagues, a liberal policy; was not equal to the opposition he provoked, and died at the age of 57. (1770-1827).

Canning Town, an industrial district in Essex, in the borough of West Ham. Here are the Victoria Docks.

Cannock, a market town of Staffordshire, shire, England. Near is Cannock Chase, a district rich in coal and iron, formerly a wooded royal game preserve. Pop. 35,000.

Cannon, a gun, or any piece of ordnance fired from a "carriage" or fixed mounting; "heavy," as distinct from "small arms."

See Artillery.

Cannon-Ball Tree, the *Couroupita guianensis* of the order Lecythidaceae, allied to the Brazil

16th CENTURY
ITALIAN CANNON

nut, found in tropical S. America. The fruit is a large, round, woody container packed with seeds, hence the name. The wood is useful.

Canoe, a general term for a small, light boat, pointed at both ends and propelled by hand paddles. They are of many types, the most primitive being the dug-out or hollowed-log canoes of the South Seas, W. Africa, etc. In other types a light

framework is covered with skins (e.g., the Eskimo kayak) or with birch-bark (e.g., the N. American Indian canoe). The kayak has a covered deck, only a small opening (or well) being left for the passengers, and is propelled by a double-blade, a single-bladed paddle only being used as a rule on the birch-bark type. Canoes of both types are made to-day for pleasure purposes, the open birch-bark being mostly confined to river use, the covered-in type being constructed for river, and even for long-distance sea work. Many are fitted with sails. Canvas is the usual covering for the framework. Canoeing as a sport was given its initial impulse by the adventurous voyages of John Macgregor in the *Rob Roy*, a canoe built of oak with a cedar deck. The Royal Canoe Club was founded in 1866.

Canon, the name given to the body of Scripture accepted by the Church as of divine authority.

Canon, a church dignitary, especially one connected with a cathedral. They comprise residentiary canons, who form part of the chapter and whose duties include residence at the cathedrals, preaching, etc., and minor canons appointed by the dean and chapter, who sing the services. Originally the life of a canon was according to a rule (canon) such as the Augustinian Canons. The regular canons were confined to their own monasteries, while secular canons visited the laity. During the Reformation many foundations were abolished. A canon in the English church is sometimes called a Prebendary.

The word canon also means rules of faith put forward by the councils of the Church, such as the Canons of Nicaea A.D. 325. The term also describes the list of saints and the central portion of the Liturgy, including the consecration of the sacred elements.

In music a canon is a particular form of composition where the melody is taken up and repeated in succession at set intervals by the other parts and overlapping. Such canons date from the 12th Century, and include the chorale circle canon, canon canonicus, etc. Examples occur in the hymn tune *Tallis' Canon*, the grace *Non Nobis, Domine*, by Byrd, and the quartette in the first act of Beethoven's *Fidelio*.

Cañon, a deep, narrow gorge with nearly vertical sides, at the bottom of which flows the river which has eroded the gorge. They occur in rainless districts, as in Arizona, U.S.A., the lack of rain accounting for the vertical sides of the gorge, which would otherwise be eroded to a V-shape. The R. Colorado, Arizona, flows for some 300 m. through such cañons, the greatest being the Grand Cañon, with a wall from 3,000 to 6,000 ft. in perpendicular height.

Canoness, a member of an association of women instituted as a chapter, vowed to obedience and chastity, but not to poverty, and engaged in religious work, including the recitation of the Breviary, education, translation of religious works and embroidery of vestments. They were not cloistered, but shared a dormitory and a common table. At the Reformation many became Protestant.

Canonisation, in the Roman Catholic Church, the solemn declaration by the Pope that a servant of God, renowned for virtue and for miracles he has wrought, is to be publicly venerated by the whole church, termed Saint, and honoured by a special festival. A preparatory stage is beatification, and the beatification and canonisation of a saint are promoted by a long, tedious and costly process, much resembling a suit at law.

Canon Law, the body of laws by which the government of the Church is administered. The canons

in which these laws are embodied are enacted by general church councils or provincial synods. Eastern canonical law is coded in the Nomocanon of Photius of Constantinople (800) and the Synodikon of Bishop Beveridge (1672). Various editions of Western Canonical Law were collected together at Basle as *Corpus Juris Canonici*, based upon the initial work of Gratian, a Benedictine Monk (1154), but many additional decrees, etc., have to be added. A new code, the *Codex Juris Canonici*, was imposed in 1917 in the Catholic Church. During the Middle Ages the study of Canon Law was the chief work of candidates for Church offices.

Canopus, (1) the blue vault of heaven with its stars; (2) a star in the constellation Argus, one of the brightest and largest of all stars; (3) an ancient town of Egypt, 15 m. N.E. of Alexandria, famed for its temple of Serapis.

Canossa, a town N.W. of Bologna, Italy, in the courtyard of the castle of which the German Emperor Henry IV. stood three days in the cold, in Jan. 1077, bare-headed and barefooted, waiting for Pope Gregory VII. to remove from him the sentence of excommunication which he had incurred in what has generally been called the "investiture dispute."

Canova, Antonio, a great Italian sculptor, born near Venice; his first important work, which established his fame, was the group of "Theseus and the Minotaur," which was succeeded by his "Cupid and the Psyche," distinguished by a tenderness and grace quite peculiar to him, and by "Perseus with the Head of Medusa," perhaps the triumph of his art; his works brought him a large fortune. (1757-1822).

Cantal, an inland dept. of France; part of the old province of Auvergne and crossed by the Auvergne Mts. Cattle and sheep are reared, rye and buckwheat grown, and coal is mined. Area, 2,230 sq. m. Pop. 191,000. Cap. Aurillac.

Cantaloupe (*Cucumis melo*), a variety of the musk-melon (*Cucumis* order), but smaller and with a ribbed covering named from Cantalupo, a town near Rome in Italy, where it was first grown.

Cantata, a form of musical composition, usually to-day resembling an unacted opera when secular, or a short oratorio when sacred. In the 18th Century they were composed for one singer.

Canteen, a military refreshment place, where the rank and file of a regiment may purchase alcoholic drink, groceries and tea, coffee, etc. Formerly run by civilians, they are now in the charge of a department of the War Office, but during the Great War the Y.M.C.A. established canteens. Canteens are also frequently provided in connection with large commercial and industrial undertakings; by Act of Parliament the Home Secretary has power to compel employers to provide canteens for employees where necessary.

Canterbury, in E. Kent, on the Stour, by rail 62 m. S.E. of London; is the ecclesiastical capital of England; the cathedral was founded A.D. 597 by St. Augustine; the present building belongs to various epochs, dating as far back as the 11th Century; it contains many interesting monuments, statues and tombs, among the latter that of Thomas à Becket, murdered in the north transept, 1170; the cloisters, chapter-house and other buildings occupy the site of the old monastic houses; the city is rich in old churches and ecclesiastical monuments; there is an art gallery; trade is chiefly in hops and grain. Christopher Marlowe was a native. Pop. 25,000.

Canterbury, a provincial district of the centre of the South I., on the E. side of which are the Canterbury Plains or Downs, a great pastureland for sheep of over three million acres and the source of Canterbury lamb. Pop. 233,000.

Canterbury Bell (*Campanula medium*), a species of campanula (q.v.), and a native of Central Europe, a biennial with many varieties. The flowers are bell-shaped.

Cantharides, a drug prepared from the dried bodies of the Spanish Fly, or blister beetle (the coleopterous *Cantharis vesicatoria*). The drug contains a powerful and poisonous chemical principal called cantharidin, which has blistering properties and is of great value in medicine as a counter-irritant, though its use requires great care under medical direction.

Canticles, a book in the Bible erroneously ascribed to Solomon, and called in Hebrew the Song of Songs, about the canonicity and interpretation of which there has been much debate, though, as regards the latter, recent criticism inclines, if there is any unity in it at all, to the conclusion that it represents a young maiden seduced into the harem of Solomon, who cannot be persuaded to transfer to the King the affection she has for a shepherd in the northern hills of Galilee; the aim of the author presumed by some to present a contrast between the morals of the south and those of the north, in justification possibly of the secession. It is by some still believed to be an allegory in which the Bridegroom represents Christ and the Bride His Church.

Cantilever, a support largely used in bridge-construction and consisting of projecting portions of buildings, and consisting of a projection of iron or stone which acts as a "bracket," the "free" end carrying the weight to be supported, the other end being itself supported and made fast to a wall or pier. See Bridges.

CANTILEVER BRIDGE

Canton, chief commercial city and port of S. China; stands on a river, almost on the seaboard, 90 m. NV. of Hong-Kong, and is a healthy town, but with a heavy rainfall; it is surrounded by walls, has narrow, crooked streets, 125 temples, mostly Buddhist, and two pagodas, 10 and 13 centuries old, respectively; a great part of the population live in boats on the river; the fancy goods, silk, porcelain, ivory and metal-work are famous; its river communication with the interior has fostered an extensive commerce; exports tea, silk, sugar, cassia, etc.

After the expulsion of the Manchu emperors from China in 1911, Canton became a seat of the revolutionary movement. Here Dr. Sun-Yat-Sen established the Kuomintang or People's Party. The Nationalist forces of S. China, with their focus here, declared a separate republic in 1920. In 1925 they began to march northwards, and in 1927 captured Shanghai, Nanking, and Hankow, after which success the Nanking troops broke away from the Hankow Government. Canton has been one of the principal centres of the movement against the Treaty Ports. In 1938 havec was wrought by bombing and on Oct. 21 it was occupied by the Japanese. Pop. 861,000.

Canton, in Switzerland, a territorial division administered by a separate government which has control of taxation and public money, but not foreign policy or the army, these being left to the Federal Parliament at Berne.

Canton, a thriving manufacturing city of Stark county, Ohio, U.S.A., county seat and was buried there. Pop. 105,000.

Canute, or **Canst**, The Dane, called the Great; son of Sweyn, King of Denmark; invaded England, and after some success was elected king by his fleet; the usurpation was repudiated by the English Ethelred, and he had to flee; returned in 1015, and next year, though London held out for a time, carried all before him; Ethelred died in 1016, Edmund "Ironside," his son, after some successes, was defeated at Assington in Essex the same year, and Edmund and Canute agreed on a division of the country. When later in the year Edmund was murdered, Canute became undisputed King of all England, and ruled it wisely and well, though the care of governing Denmark and Norway lay on his shoulders as well; died in England, and was buried in Winchester Minster. His great ambition was the establishment of a great northern Empire to include England, Denmark, Norway and Sweden. Denmark was his by right of birth, England by conquest. Norway he also conquered in 1028. On his death this empire came to an end. (King of England 1017-1035).

Canvas, a strong cloth made of jute, hemp, or flax, and woven like linen. The best sailcloth is made of the strongest quality flax canvas. Artists' canvas are of the finest quality, and are specially prepared to take oils.

Canvey, an island in the Thames estuary off Essex, England, reclaimed from the sea in the 17th Century. At low tide a causeway connects it with Benfleet.

Canyon, an English form of the Spanish word cañon (q.v.), a gorge or deep, narrow chasm or valley.

Capablanca, José Raúl, noted chess player. Of Cuban birth, he started to play at the age of five; champion of the world from 1921 (when he defeated E. Lasker) until defeated by Alekhine in 1927. (1888-).

Capacity, the power of containing a number of units of volume (cubic inches or cubic centimetres, etc.) in a solid body or an enclosed space. The capacity for heat (thermal capacity) is the amount of heat required to raise the temperature through 1° Centigrade.

Cape Breton, the insular portion of Nova Scotia, Canada, from which it is separated at its eastern extremity by the Strait of Canso. 110 m. long and 85 m. broad; is covered with forests of pine, oak, etc., is rich in coal, and exports timber and fish. Pop. 88,000.

Cape Coast, seaport and former capital of the Gold Coast colony; trades in palm oil. Pop. 13,000.

Cape Cod, a sandy peninsula, 65 m. long, of Massachusetts, U.S.A., between which and the coast lies Cape Cod Bay. Served by rail and canal, it is a popular holiday resort with a number of centres. Plymouth, where the Pilgrim Fathers originally landed, stands on the Bay.

Cape Gooseberry (*Physalis peruviana*), the name of a species of Solanaceae, a native of S. America, but now naturalised to S. Africa; also called the strawberry or gooseberry tomato. It bears a whitish flower, and the fruit, which is enclosed in the red persistent calyx, is edible.

Cape Horn, the most southerly point of S. America, a black, steep, frowning rock at the S.E. extremity of the Fuegian Is., much dreaded at one time by sailors, on account of the heavy weather encountered there.

Capek, *Karel*, Czechoslovakian author. Son of a Bohemian doctor, he was educated in Prague, Berlin and Paris, and became a journalist. In 1919 he was producer at Prague Municipal Theatre, and wrote *R.U.R.* (Rossum's Universal Robots) and, in collaboration with his brother, *The Insect Play*, both of which came to London. His latest play is *Power and Glory*, produced in London in April 1938. (1890-).

Capella, a bright red star of first magnitude in constellation Auriga, the fifth or sixth brightest in the sky, discovered to be a binary star.

Cape of Good Hope Province, comprises British Bechuanaland and the extremity of the African continent S. of the Orange R. and Natal, and is nearly twice the size of the United Kingdom. The Nieuwveld Berge, running E. and W. divides the country into two slopes, the N. slope long and gradual to the Orange R., the S. shorter and terraced to the sea; two-thirds of the country is arid plain; the climate is dry and healthy, but hot in summer; the prevalent vegetation is heath and bulbous plants.

Sheep- and ostrich-farming are the chief industries; wool, goats' hair, ostrich feathers, hides, diamonds from Kimberley, and copper from Namaqualand are the chief exports; two-thirds of the people are of African race, chiefly Bantus, who flourish under British rule; the remainder are of Dutch, English, French and German origin. In 1910 the colony of the Cape of Good Hope was merged in the Union of S. Africa, thereafter forming an original province of the Union.

Cape Town is the seat of the Provincial Administration. Kimberley, Port Elizabeth, and E. London are the only other large towns, but there are many small towns. The government is in the hands of an administrator appointed by the Governor-General of the Union of S. Africa, aided by a Council of sixty-one members and an executive committee of five; local government is in force all over the country. Discovered by the Portuguese, Diaz, in 1486, the Cape was taken possession of by the Dutch in 1652, from whom it was captured by Great Britain in 1805. Pop. (European) 788,000; total pop. 3,500,000.

Caper, the *Capparis spinosa*, a trailing herb or shrub of the order Caparidaceae cultivated in Sicily and S. France. When pickled with vinegar the unexpanded flower-bud is used in sauces.

Capercailzie, the wood-grouse, a large game-bird found in fir woods in mountainous districts, as in Sweden and Scotland, and highly esteemed for table. Four species are known, the common Capercailzie being *Tetrao urogallus*. It was exterminated in the British Is. in the 18th Century, but has been reintroduced with success to Scotland.

Capernaum,

a town on the N. side of the Sea of Galilee, the centre of Christ's labours, the exact site of which is uncertain.

Capet, the surname of Hugh, the founder in 987, of the third dynasty of French kings, which continued to rule France till 1328, though the name is applied both to the Valois dynasty, which ruled till 1589, and the Bourbon, which ruled till 1848.

Louis XVI. having been officially designated as a Capet at his trial, and under that name sentenced to the guillotine.

Cape Town, situated at the head of Table Bay, on the SW. coast, with Table Mt. rising behind it; is a regularly built, flat-roofed, imposing town, with handsome buildings and extensive Government gardens; well drained, paved and lit, and with a good water supply. The Government Buildings of the Union, and law courts, museum and art gallery, bank and exchange are its chief architectural features. It has docks, and a graving-dock, and is a port of call for vessels of all nations. Pop. (European) 165,000.

Cape Verde, the most westerly headland of Africa, first seen by the Portuguese in 1443.

Cape Verde Islands, a group of volcanic islands belonging to Portugal, and administered by a Governor, 300 m. from Cape Verde, on the W. of Africa. 10 are inhabited, the largest and most productive being Santiago and São Vicente, a coaling station with an excellent harbour, most frequently visited. The islands are unhealthy; cattle-breeding the chief industry. Area 1,560 sq. m. Pop. 157,000.

Cape Wrath, a bold headland, and Sutherlandshire, Scotland, 523 ft. high.

Capillarity, name given to the phenomenon that liquids rise in very narrow tubes against the force of gravity, owing to surface tension. In this way moisture rises up the narrow channels in plants.

Capital, wealth set aside for the production of further wealth. It includes, besides money, the stock of a trader or manufacturer, buildings, machinery and equipment.

In a more extended sense capital embraces the accumulated resources of a whole community, and may be defined as the products of industry possessed by the community. In social polemics capital forms the subject of opposing theories by two schools of thought, one, that its ownership should be individual, and the other that capital should be owned and directed by the State for the benefit of the State as a whole, and the two schools have come to be regarded as capitalist and labour.

The former theory holds that the individual trader, by postponing or denying himself the present enjoyment of a portion of his means of consumption, is entitled to claim the appropriate reward of profit, either as rent or interest, and that no progress can be made industrially without reserve funds controlled by persons who risk them for the sake of such progress. It is further argued that the incentive of individual competition among owners of capital is productive of greater industrial development than under a system where capital is the property and concern of the State collectively.

The opposite point of view, usually called the "labour" attitude, contends that privately owned capital is the product of the labour it employs, and that theoretically the workers pay their own wages, since it is by their labour that the profits of the "capitalist" are made. This view is expressed by the economist Henry George in *Progress and Poverty*, while Karl Marx considered that private property based upon the labour of the owner had become, by the evils of our industrially advancing conditions, replaced by a capitalism which exploited other people's labour for the owner's advantage.

Capital, in architecture, the portion crowning the top of a column, pillar or pilaster, and forming its most characteristic part.

CAPERCAILZIE
(MALE)

Capital Levy, a tax on all owners of a certain sum of capital. Bonar Law had some sympathy with it as a suggested means of paying for the Great War, and it was advocated by the Labour Party at the General Elections of 1922, 1923 and 1924, after which it was dropped. Capital levies have been made in Italy as a compulsory contribution on the part of employers to the Abyssinian campaign, payment having been allowed in some cases and in some circumstances in the form of a transfer of shares to the Government. Such a levy also passed the French Chamber of Deputies during the Blum regime of 1938, but was rejected by the Senate.

Capital Punishment, the punishment by death, the offences which are so punishable in England including murder, treason, dockyard arson and piracy. In actual practice in England murder is the only capital offence, there having been only two cases of execution for treason this century (one during the Boer War and one during the Great War), and no case of execution for dockyard arson or piracy. The method of execution varies. In pre-Norman times it took the form of hanging, decapitation, burning and hurling from rocks. Modern methods include hanging, decapitation by the guillotine (in France), or axe (for some offences in Germany), or electrocution in the U.S.A. Capital punishment has been abolished in a few countries, and its removal here is a frequent theme for agitation.

Capitol, the temple of Jupiter Capitolinus, the most famous and most splendid temple of ancient Rome. It stood on the SW. peak (called the Capitolium) of the Capitoline Hill (Mons Capitolinus), which was sometimes also called the Tarpeian Rock (Mons Tarpeius), though that name was usually reserved for that cliff face down which criminals were thrown to destruction. On the NE. peak (the Arx) stood the temple of Juno Moneta. The Capitol was founded by Tarquin, and dedicated in 507 B.C. It was twice burned down and rebuilt, the last time by Domitian. The Sibylline books were kept there, and there the Consuls entering office made sacrifices and took their vows. On the site there stands to-day the Capitoline Museum, the Senatorial Palace, the Campidoglio designed by Michelangelo, and the Church of S. Maria in Ara Coeli. Capitols elsewhere have been modelled on that at Rome, notable examples being those at Toulouse and at Washington, U.S.A.

Capitularies, collections of royal edicts issued by the Frankish kings of the Carolingian dynasty, with sanction of the nobles, for the whole Frankish empire, as distinct from the laws for the separate peoples comprising it, the most famous being those issued or begun by Charlemagne and St. Louis.

Capitulation, the making of terms for surrender of a fortress, territory or body of troops. A capitulation concluded by an officer who has not the proper authority is called a spousion, and must be ratified to be binding. The word in the plural denotes the terms of an agreement securing foreigners immunity from the jurisdiction of the courts of the country agreeing to such infringement of its sovereignty. Such arrangements are in operation in China, Morocco, Persia, and Egypt, but those of the last-named country were much modified in 1928.

Capri, a village in Italy, in the Great War, the scene, during the first 50 in. front between Piesszo and Tolmino, 10,000 prisoners were captured on 24, 1917. The advance was finally held

up on the R. Piave by the Italian forces under Generals Cadorna and Caviglioglio. A final effort to drive back the Italian line of defence was made on Nov. 22, by Krauss's Bosnian and German troops, but a counter-attack in which the Italian Commander Laderchi with the IX corps was prominent, was successful and the retreat was arrested.

Cappadocia, an ancient country in the heart of Asia Minor, between the Halys, the Euphrates and the Euxine, and separated from Galatia by the R. Cappadox; of varied political fortune, being at one time a province of Persia (which divided it into two satrapies), and later of Rome. The people had a reputation among the ancient Greeks for meanness, perfidy, lack of eloquence, and servility. Famous natives were the geographer Strabo and St. Basil. The country was a plateau with pastures for immense flocks, its horses being held in some esteem.

Caprera, a small, barren island off the N. coast of Sardinia, the home of Garibaldi, where he died, and his burial-place.

Capri, a small Italian island at the entrance from the S. of the Bay of Naples, with a cap. of the same name on the E. side; a favourite retreat of the Emperors Augustus and Tiberius, and noted for its fine air and picturesque scenery. Pop. 7,500.

Capricornus, or the Sea-Goat, the sign of the zodiac which the sun enters on Dec. 21, when it is overhead at noon at all places on the Tropic of Capricorn.

Caprifoliaceae, a large family of shrubs and trees, including some 275 species found chiefly in N. temperate regions and mountain regions of the tropics. There are 18 genera, of which the chief are *Sambucus* (20 species including the English Elder), *Laburnum* (110 species including the Guilder Rose), *Linnaea* (20 species), *Lonicera* (100 species including the English Honeysuckle).

Caprifolium, the name by which is sometimes known the genus *Lonicera* of the natural order Caprifoliaceae (q.v.).

Capsicum, a genus of 30 species of plants of the order Solanaceae, found in Central and S. America. *C. annuum* is cultivated for its fruit, known as chillies or red peppers, and when dried and ground as Cayenne pepper (q.v.).

CAPRIFOLIUM (HONEYSUCKLE)

Capstan, a contrivance originally of wood, now usually of iron, used on ships and in docks for manipulating heavy ropes, cables, etc. It consists of a heavy cable-holder of cylindrical shape mounted on a vertical axis, the shaft being coupled below to worm-gearing by means of which power is applied. Hand capstans were worked by means of bars inserted in holes at the top.

Captain, (1) The military officer who commands a company of infantry, or is second-in-command of a six-gun battery of artillery, or second-in-command of a squadron of cavalry. Since the introduction of the double-company system in 1914, a company is commanded by a major, or mounted captain. (2) An officer in the navy commanding a ship of war, and next in rank to a commander. The officer commanding an admiral's ship is called a flag-captain. (3) The master of a merchant vessel.

Capua, a city in the dept. of Campagna, Italy, on the Volturno, 17 m. N. of Naples, of great wealth and power in Roman times, where Hannibal retired with his army to spend the winter after the Battle of Cannæ, 216 B.C., and where, from the luxurious life they led, his soldiers were enervated. It was taken later by the Romans, and finally destroyed by the Saracens in 840. A modern city has since been built on the site, though relics of the former splendour still exist. Pop. 13,000.

Capuchins, monks of the Franciscan Order, founded in 1520 by Matteo di Bassi, so called from a cowl they wear. They were a mendicant order, led an austere life in great poverty, and engaged largely in missionary work. They still exist chiefly in Austria and Switzerland, and have missions abroad.

Capulets, a celebrated Ghibelline family of Verona at mortal feud with that of the Montagues, familiar to us through Shakespeare's *Romeo and Juliet*, Romeo being of the latter and Juliet of the former.

Capybara, or **Carpincho**, the water-hog, the largest rodent extant, in appearance like a small pig; found in S. America. It belongs to the Cavy group of animals, is aquatic, and similar to the hippopotamus in habits. Its hind-legs, which are three-toed, are webbed. The forefeet are four-toed. It has no tail and a cleft upper lip like the guinea-pig's.

Carabineer, or **Carbineer**, formerly the name of light horse (mounted infantry) armed with a carbine and specially trained in skirmishing. The title was abolished in the French army in 1870. The 6th Dragoon Guards in the English army are so called.

Caracal, a species of the lynx family found in Africa and S. Asia; of a somewhat fierce disposition. It is reddish brown, has a comparatively short tail and tufted ears.

CARACAL LYNX

Caracalla (Marcus Aurelius Antoninus), a Roman emperor, son of Septimius Severus, born at Lyons; on the death of Severus at York in 211 he succeeded to the throne with his brother Geta, whom he murdered in 212; his reign (211-217) was a series of crimes, follies, and extravagances. He put to death 20,000 persons whom he suspected of attachment to his brother, among others, the jurist Papinianus, and was himself assassinated by one of his guards, named Macrinus, at Edissa. (188-217).

Caracas, the capital of the Republic of Venezuela, standing in the federal district of the same name, in the Andes, 3,000 ft. above sea-level; subject to earthquakes, in one of which (1812) 12,000 perished and a great part of the city was destroyed; it was the birthplace of Simon Bolivar. Pop. (federal district) 195,000.

Caracci, or **Carracci**, a family of painters, born at Bologna; Ludovico, the founder of a new school of painting, the principle of which was eclecticism, or imitation of the styles of the best masters (1555-1619). Annibale nephew and pupil, went to Rome and painted the celebrated Farnese gallery, a task which occupied him four years (1560-1609). Agostino, brother of above, assisted him in the frescoes of the gallery. (1557-1602).

Caractacus, or **Caratacus**, a British chieftain, King of the Silures, maintained a gallant struggle against the Romans for nine years, but was overthrown

by Ostorius, A.D. 50, taken captive, and led in triumphal procession through Rome, when the Emperor Claudius was so struck with his dignified demeanour that he set him and all his companions at liberty.

Caramel, the substance produced by loaf-sugar when slowly heated. The process rids the sugar of water and other substances, leaving, after cooling, a dark-coloured, brittle mass. It is soluble in water and is used as a colouring-material for wines, beers, gravy, etc.

Carat, the seed of the Mediterranean carob-tree (*Ceratonia Siliqua*), which is supposed to have been the first measure of weight for gold and precious stones, used by jewellers owing to their remarkable uniformity. To-day the term signifies a standard of weight for gold and jewellery, the standard carat being of 3.16 grains troy in London and of 200 milligrams in the U.S.A. and the other principal world centres. It is also used to express the proportionate fineness of gold. Thus, if a mass of gold contains 22 parts of pure gold out of 24, it is 22-carat gold.

Caravaggio, Michelangelo Amerighi da, an Italian painter, disdained the ideal and the ideal style of art, and kept generally to reality, often in its grossest forms; a man of a violent temper, which hastened his end; his "Christ and the Disciples at Emmaus" is in the National Gallery, London. (1569-1609).

Caravan, the name for large parties of grims, particularly in N. Africa and Asia, banded together for protection against brigands. Camels are largely used, sometimes numbering as many as 600. The name is also applied to a sort of house on wheels used by itinerant gypsies, while the motor-caravan is a modern adaptation.

Caravanserai, a large unfurnished inn, with a court in the middle for the accommodation of caravans and other travellers at night in the East.

Caravel, a sailing-ship of Portuguese origin bearing three or four

masts and much employed by navigators of the 15th and 16th Centuries. The earliest forms of caravel were entirely lateen rigged, the foresail being the largest; later square sails were fitted to the foremast. A square stern was another characteristic feature.

CARAVEL

Caraway, the dried ripe fruit of the umbelliferous plant *Carum carvi*, which grows wild in N. and Central Europe and Asia, and has been naturalised in England. The seed, which is laterally compressed and has an aromatic flavour when bruised, is extensively used as flavouring for bread, cakes, etc. A volatile oil (caraway oil) is also derived from the seeds, and is of value for flavouring liqueurs, etc., and in medicine as a carminative.

Carberry Hill, the place in Scotland where in 1567 Mary, Queen of Scots, was taken in battle by the revolting nobles. She was forced to abdicate, and was imprisoned in Lochleven Castle.

Carbide, a compound of carbon with calcium, certain other metals, including calcium, manganese, and aluminium, etc. Calcium carbide is commercially important for the production of steel, generated from

it by the addition of water. Silicon carbide, prepared by heating sand and coke in an electric arc, is used as a substitute for emery.

Carbohydrates, a class of substances, such as the sugars, starches, and celluloses, consisting of carbon, hydrogen and oxygen. They are important in the life of animals and plants as structural elements and in maintaining functional activity. They furnish many materials of modern manufacture, including the cellulose used in the making of paper, films, varnishes and artificial silk. Glucose is obtained from dextrose or grape-sugar, milk, cane-sugar, etc.

Carbolic Acid, the popular misnomer for hydroxybenzene or phenol, C_6H_5OH . It occurs in coal-tar, from which it is extracted by fractional distillation, but the supply is augmented by synthetic preparation from benzene. The benzene is treated with fuming sulphuric acid, which converts it into benzene-sulphonic acid, and the latter is then fused with caustic soda. A sodium derivative of carbolic acid is thus formed, from which the carbolic acid itself is liberated by fractional distillation.

It is a colourless crystalline solid, melting point $43^\circ C$, boiling point $181^\circ C$; on exposure to air it turns pink and gradually liquefies owing to the absorption of water from the atmosphere. It is a poisonous substance with a characteristic smell, and the solid produces burns if left in contact with the skin. It has pronounced germicidal powers, and is used as an antiseptic and disinfectant, though to a decreasing extent, since the discovery of better agents. It finds extensive application in the manufacture of plastics (*q.v.*), and is also the starting-point in the manufacture of lyddite (see *Explosives*). It is not an acid, though it possesses certain acid properties.

Carbon, a chemical non-metallic element, belonging to the same family as silicon, tin and lead. Symbol C, atomic number 6, atomic weight 12. Nearly chemically pure carbon occurs naturally in two crystalline forms—*viz.*, diamond (S. Africa, Brazil, etc.), and graphite (Ceylon, Czechoslovakia, and other places). It is also widely and abundantly distributed in the form of its compounds, *e.g.*, carbon dioxide (0.03–0.04 per cent. by volume of the air), limestone and chalk rocks (containing about 12 per cent. by weight of carbon and composed of impure calcium carbonate), coal (a complex mixture of various carbon compounds such as hydrocarbons), and petroleum (mixtures of hydrocarbons—*i.e.*, compounds consisting of carbon and hydrogen only). Carbon is also the essential element of living tissues, and occurs in most products of living or dead organisms.

It is a comparatively unreactive element, its most striking property being the capacity of its atoms to join together to form straight or branched chains, often of considerable length, and rings. These structures form the skeletons of the vast number of carbon compounds studied in the branch of chemistry known as "organic chemistry."

Impure forms of carbon of a non-crystalline ("amorphous"), or at least micro-crystalline character, are: (1) lampblack, a kind of soot obtained by the partial combustion of natural gas or petroleum, and largely used for imparting strength to rubber for motor-car tyres, and for making printer's ink; (2) wood charcoal, which, especially when "activated,"

is in a current of superheated steam, has the power of absorbing great quantities of gases or vapours, and is therefore used in gas-masks, in the recovery of volatile oils, etc.; (3) animal charcoal or bone-which is the residue left after the dis-

tilation of bones, and consists of about 10 per cent. of carbon with 90 per cent. of mineral matter, chiefly calcium phosphate; it is used in the refinement of sugar to remove the brown colour of the crude product; (4) gas carbon, a hard substance lining the retorts in which coal has been distilled, and finding its chief use in the carbons for arc-lamps and dry cells.

All forms of carbon burn in air or oxygen if sufficiently heated, yielding carbon dioxide (with carbon monoxide if the supply of air or oxygen is insufficient for complete oxidation). Compounds of carbon with metals are known as carbides; the most important is calcium carbide, CaC_2 . The principal uses of carbon depend on: (a) the heat given out during its combustion, hence its value as a fuel, and (b) its affinity for oxygen, hence its use in metallurgy, to reduce metallic ores of the oxide type to the metallic state.

Carbonari, (lit. *charcoal burners*), a secret society that, in the beginning of the 19th Century, originated in Italy and extended itself into France, numbering hundreds of thousands, including Lord Byron, Silvio Pellico, and Mazzini among them, the object of which was the overthrow of despotic governments; they were broken up by Austria, and absorbed by the Young Italy party.

Carbon Assimilation, or photosynthesis, the feeding process by which green plants convert water (obtained via their roots from the soil) and carbon dioxide (obtained from the air via the minute holes or stomata on the under-surface of the leaves) into sugars, starches and other complex organic compounds, with evolution of oxygen as a waste product. The changes involved require a supply of energy, and this is derived from the energy of sunlight, part of which—chiefly the red and orange rays—is trapped by the green colouring-matter or chlorophyll (*q.v.*) and applied to bring about the reactions.

Carbon assimilation should be carefully distinguished from respiration or "breathing," which, in plants as in animals, consists in using atmospheric oxygen for the slow combustion or oxidation of carbonaceous material to carbon dioxide and water, with liberation of energy. There are thus two opposing processes going on in green plants during daylight, but since the carbon assimilation is much more extensive than the respiration, the latter is masked; during darkness, however, or even in the light with those plants that possess no chlorophyll, such as germinating barley grains, respiration can easily be detected.

Carbon assimilation is the basic condition of the existence of all life upon the earth, since animals, including man, are dependent for their food upon previously elaborated carbonaceous material. Carbon assimilation, by removing carbon dioxide from the air and returning oxygen to it, helps to keep the proportion of gases in the atmosphere constant. See *Carbon Dioxide*.

Carbonate, a salt of carbonic acid—*e.g.*, $CaCO_3$, calcium carbonate; Na_2CO_3 , sodium carbonate; $BaCO_3$, barium carbonate; $NaHCO_3$, sodium bicarbonate. Many of the carbonates are extensively used in the arts and medicine.

Carbon Dioxide, a gaseous oxide of carbon with the formula CO_2 ; it is present in the atmosphere to the extent of approximately 3 parts in 10,000 by volume, and this proportion remains remarkably steady, since, though much is used as food by green plants (see *Carbon Assimilation*), much is thrown into the air by the combustion of carbonaceous fuels, by the respiration of living organisms, and by volcanoes.

It is a heavy gas, rather more than 1½

times as dense as air, and often collects on the floors of caves, valleys, etc., in volcanic regions—e.g., the Grotto del Cane near Naples and the Valley of Death in Java. It has no smell, but its solution in water (see **Carbonic Acid**) has a prickly taste, and is used as "soda-water." It is detected by its reaction with lime-water, with which it yields a white precipitate of calcium carbonate. The lime-water "turns milky." It will not support life or combustion, but is not actively poisonous.

It may be prepared by pouring a dilute acid upon a carbonate (e.g., dilute hydrochloric acid upon marble), and is evolved from a lime-kiln during the "burning" of limestone. Commercially it is obtained during fermentation processes—e.g., brewing—and is placed on the market compressed in steel cylinders.

Carbonic Acid, a weak and unstable acid present in an aqueous solution of carbon dioxide (q.v.). It has never been isolated, but its salts, the carbonates and bicarbonates, are well known, and some of them—e.g., calcium carbonate (limestone, marble and chalk)—are very abundant. Its chemical formula is H_2CO_3 . "Carbonic acid gas" is an obsolete name of carbon dioxide.

Carboniferous, the geological strata above the Devonian and below the Permian strata. The rocks include limestones and grits, as well as most of the coal measures of the period. The Carboniferous Age had a hot, wet climate that gave rise to luxuriant forests, the remains of which form the coal beds. In rocks of this age remains of the earliest amphibians are found.

CARBONIFEROUS (COAL) FOSSIL

Carbonisation, the process of producing coal-gas and coke from coal by the application of heat at a temperature of $1,000^{\circ}C$. The process was invented by William Murdoch in 1792. Later processes involve low-temperature carbonisation at $600^{\circ}C$, which produces semi-coke and yields a higher liquid product. The Fuel Research Station at Greenwich, founded by Sir George Beilby, is examining low-temperature carbonisation possibilities.

Carbon Monoxide, a compound of carbon and oxygen of the chemical formula CO . It is a colourless, odourless gas of approximately the same density as air, and is formed by the incomplete combustion of carbon or carbon compounds in a limited supply of air or oxygen. It is very poisonous on account of the fact that it forms a bright red compound, carboxy-haemoglobin, with haemoglobin, the red colouring-matter of the blood, and thus prevents it from performing its function of carrying oxygen to all parts of the body. Its accidental production when a motor-car engine is allowed to run in a closed garage, and when a gas geyser is burning in a small room without a flue, has led to many deaths.

In the laboratory it is made by passing carbon dioxide over red-hot carbon, or by abstracting the elements of water from formic acid or oxalic acid by means of concentrated sulphuric acid. Industrially it is an important reducing agent, as well as one of the principal gaseous fuels. It readily combines with oxygen to form carbon dioxide (CO_2), and in virtue of this can be used to reduce the oxides of certain metals—e.g., ferric oxide to iron. When steam is passed over white-hot coke a mixture of this gas and of hydrogen, known as Water Gas, is produced.

U.E.

and this is commonly mixed with coal gas for domestic and other uses. When coke is heated in a limited supply of air, a mixture of carbon monoxide and nitrogen, known as Producer Gas, results, its chief use being as an industrial gaseous fuel.

Carbonyl Chloride, or **Phosgene**, the acid chloride derived from carbon monoxide and chlorine which unite directly in sunlight; used in the Great War as a poison gas.

Carborundum, or **Silicon Carbide** (see **Carbide**). It is prepared from sand and coke, which are heated together in an electric furnace. The resultant solid is black and crystalline, and is of exceptional hardness—greater than that of the ruby. It is of great commercial value in engineering as an abrasive, and is used in the place of emery. The word is a trade name.

Carbuncle, the name of a precious stone, a variety of the garnet; of a dark red colour. It is relatively soft, and is found in E. Asia, especially Burma and Ceylon, and in Brazil. The word is also the name of an eruption of the skin, resembling a boil, but much more severe. It appears usually on the shoulder, neck, abdomen, and sometimes on the leg, and is due to the infection of the staphylococcus germ.

Carburettor, that part of an internal-combustion engine,

running on an easily vaporised fuel like petrol, the function of which is to project minute droplets of fuel into the air passing into the cylinders, so that a suitable explosive mixture may be formed for ignition by the spark. It consists of a float-chamber where the level of the petrol arriving from the tank is kept constant by a float-and-needle valve, and—usually—two jets from which the petrol is discharged into the air-stream. One jet delivers at a constant rate, while the other gives more fuel when the engine speed is greater; under the latter conditions, therefore, the petrol-air mixture is less rich.

CARBURETTOR

Carcassonne, a city of France, capital of the dept. of Aude, and a centre of the wine trade. It is famed for its ancient fortifications, which include two encircling walls guarded by many towers. The old town within the walls has a cathedral begun in the 11th Century, the new town across the Aude, has a 13th-Century cathedral. Carcassonne was a city before the Romans invaded Gaul. Pop. 35,000.

Carchemish, ancient city of the Hittites, on the Euphrates. Identified as Jerablus (Hierapolis), excavations have yielded remarkable architectural and other remains.

Cardamoms, the dried ripe fruit of several plants, used in India as a spice. The chief species which yield these fruits are the *Elettaria cardamomum*, found in India and Malaya, and the *Amomum cardamomum*, both plants belonging to the ginger (Zingiberaceae) order.

Cardiff, county town of Glamorganshire, S. Wales, on the R. Taff, the sea outlet for the mineral wealth and products of the district, a town that has risen more rapidly than any other in the kingdom, having had at the beginning of the 19th Century only 2,000 inhabitants; it has a university, a number of churches, few of them belonging to the Church of England, and the National Museum of Wales. Pop. 223,600.

Cardigan, seaport of Cardiganshire, S. Wales, on the Teifi. It has a small harbour and salmon fisheries and ruins of an old castle. Pop. 3,300.

Cardigan, Seventh Earl of, a British officer; commanded the Light Cavalry Brigade in the Crimean War, and distinguished himself in the famous charge of the Six Hundred, which he led; his favourite regiment, the 11th Hussars, on the equipment of which he lavished large sums of money. (1797-1868).

Cardigan Bay, a wide semi-circular inlet on the W. coast of Wales, with a coast-line of 130 m.

Cardiganshire, a county in S. Wales, low-lying on the coast and mountainous in the interior, but with fertile valleys where sheep and cattle are reared; the county is remarkable for its many early British remains and other antiquities. Area 693 sq. m. Pop. 55,000.

Cardinal, the highest rank, next to the Pope, in the Catholic Church. The title is reserved for members of the Sacred College of Rome who form the Pope's council and are appointed only by him. They meet in consistory, and number 70; on the death of the Pope they name his successor, usually one of themselves. He is crowned by the cardinal deacon and consecrated by a cardinal bishop, of whom there are six. Cardinals wear a scarlet biretta and dress, and receive a ring from the Pope. Most cardinals are of Italian birth and live in Rome. English-speaking cardinals include the archbishops of Sydney, Baltimore, Westminster, and Armagh.

Cardinal, or Red-bird, the popular name with a black throat, found in N. and S. America, of the species *Cardinalis*. They belong to the Grosbeaks of the Fringillidae family.

Carding, an operation in textile manufacture for removing all impurities and withdrawing imperfect fibres, thus preparing the perfect ones for spinning. It is performed by a series of cylinders furnished with wire teeth. The "fleeces" after being combed, pass through a funnel, and are narrowed into "slivers" ready for "drawing."

Cardoon (*Cynara Cardunculus*), a plant of the order Compositae, closely allied to the artichoke, and found over wide areas of the Panopas of S. America. It is cultivated for the leaves, which are blanched and eaten like celery.

Cardross, a village of Dumbartonshire, Scotland, the birthplace of Smollett. Robert Bruce died in Cardross Castle. Pop. 12,000.

Cards, playing, pieces of thick paper or cardboard with devices on them, used in card games of skill and chance. A full pack contains four suits—viz., hearts, diamonds, spades and clubs—each suit containing 13 cards—viz., the Ace, King, Queen, Jack, and nine others with from ten down to two pips on them. They are of uncertain origin, but in the past have lent themselves (especially the court cards) to decorative treatment and to use for illustration of prominent people.

Cardwell, a town and seaport of Queensland, Australia. Cedar-wood is exported, and there are dugong fisheries and meat-canning works. Pop. 5,000.

Cardwell, Edward Cardwell, Viscount, statesman, son of a Liverpool merchant. M.P. with virtually no break,

1842-1874. He followed Peel, Aberdeen, and Palmerston; was President of the Board of Trade (passing the Merchant Shipping Act, 1854), Secretary for Ireland, Colonial Secretary, Chancellor of the Duchy of Lancaster, and finally, 1868, Secretary for War. He carried out army reforms for which as Colonial Secretary he had made preparations. The abolition of purchase of commission, the short service and the linked battalion systems, 1871, were part of his plan. (1813-1886).

Carew, Thomas, English courtier poet; his poems, chiefly masques and lyrics of a sensuous nature. (1598?-1638?).

Carey, Henry, English poet and musician, excelled in ballads; composed *Sally in Our Alley*. (d. 1743).

Carey, William, celebrated Baptist missionary, born in Northamptonshire; founder of the Baptist Missionary Society, and its first missionary; founded the mission at Serampore and directed its operations, distributing by thousands Bibles and tracts in native languages, as well as preparing grammars and dictionaries; was 29 years Oriental professor in the College of Fort William, Calcutta. (1761-1834).

Caria, an ancient maritime country in Archipelago, of which the Mæander was the chief river and Halicarnassus the chief town. It was originally inhabited by the Carians, but colonised by the Greeks, later subdued by the Persians, and finally became a province of the ancient Roman empire. The district to-day forms part of Turkey in Asia Minor.

Caribbean Sea, a great arm of the Atlantic, lying between the Greater and Lesser Antilles and Central and S. America, subject to hurricanes; it is connected with the Pacific by the Panama Canal, with the Gulf of Mexico by the Yucatan Strait, and with the Atlantic by Windward, Mona, and other Passages.

Caribou, the wild reindeer of Arctic districts of the New and Old World. There are two types, the Woodland Caribou, found in moose-inhabited forests, and Barren Ground Caribou, which is smaller, roaming Arctic wastes. Both male and female have antlers, these being not as a rule evenly developed on both sides of the head.

Caribs, a race of Indians, once inhabiting the West Indies, now confined to the southern shores of the Caribbean Sea, as far as the mouth of the Amazon; ethnologically they originated in Central Brazil; they are a fine race, tall, and of ruddy-brown complexion, but have lost their distinctive physique by an amalgamation with other tribes; give name to the Caribbean Sea.

Caricature, a representation or description bearing a resemblance to the original, is exaggerated so as to be ridiculous, and often employed, especially by artists, to give point to satirical comment. Such burlesques date from a very early period, and appear in the plastic and pictorial art of Greece and Rome. In England pictorial caricature reached its zenith in the work of Hogarth (q.v.) and of Max Beerbohm and Rowlandson, Doyle, Cruickshank, Leech, E. T. Reed, Furniss, Raven-Hill and Partridge, made political caricature popular. The art is a feature of the modern newspaper as well as journals like *Punch*, the most striking work to-day in England being that of Low and Strube.

CRESTED
CARDINAL

CARIBOU

Caries, a disease of the bones, set up by inflammation generally caused by an injury. It resembles ulceration; the more vulnerable parts, and often accompanies scrofula, syphilis and tubercle. The chief centres attacked are the vertebrae, and the hands and feet. A lesser and different form attacks the teeth causing chronic decay.

Carillon, a large peal of bells, suitable for playing somewhat elaborate music; also the tunes so played. A peal for ringing does not exceed 12, but those of Belgium are extensive, and number from 40 at Antwerp to 48 at Ghent. The bells are struck by hammers, usually by mechanical apparatus, called chiming machinery. Carillon recitals are popular in Belgium, especially at Antwerp.

Carinthia, an Alpine province in the S. of Austria, adjoining Italy and Yugoslavia. The R. Drave flows through it from W. to E. Much is clad in pine forests, and horses and cattle are reared. It has rich mines of lead, zinc, iron and coal, and its industries include the making of steel, iron, wire, machinery and rails. Klagenfurt is the capital. It became Austrian in 1335. Small parts passed to Italy and to Yugoslavia, by whom it was occupied, after the Great War. Area 3,680 sq. m. Pop. 349,000.

Carisbrooke, a village in the Isle of Wight, in the castle of which, now partly in ruins, Charles I. was imprisoned for 13 months before his trial; it was at one time a Roman station.

Carlile, **Prebendary Wilson**, founder, in 1882, of the Church Army. Companion of Honour, 1926. (1847-).

Carline Thistle, the *Carlina vulgaris*, common in Britain on heaths, a species of compositae with purple flowers and prickly leaves and bracts.

Carlingford, a seaport and pleasure resort of Co. Louth, Ireland (Eire), on an arm of the Irish Sea called Carlingford Lough. It has oyster fisheries. Pop. 600.

Carlisle, county town of Cumberland, England, on the Eden; a great railway centre; with an old castle of historical interest, and a cathedral founded by William Rufus and dedicated to Henry I. Once a Roman station; ruins of Hadrian's Wall are close to it. Pop. 57,000.

Carlists, a name given in France to the partisans of Charles X. (1830), and especially in Spain to those of Don Carlos (1833), and those of his grandson. (1872-1876).

Carlos I., King of Portugal, son of Luiz I. and Maria Pia daughter of Victor Emmanuel II. of Italy. The kingdom fell into financial straits, and his minister Franco became a dictator governing by decree. Carlos and his eldest son were assassinated in Lisbon. (1863-1908).

Carlos, Don, son of Philip II. of Spain, born at Valladolid, and heir to the throne; but from incapacity, or worse, excluded by his father from all share in the government; confessed to a priest a design to assassinate someone, believed to be his father; was seized, tried and convicted, though sentence against him was never pronounced; died shortly after; his story has formed the subject of tragedies, especially one by Schiller. (1545-1568).

Carlos, Don, the brother of Ferdinand VII. of Spain, on whose death he laid claim to the crown as heir against Isabella, Ferdinand's daughter, who by the Salic law, though set aside in her favour by her father, had, he urged, no right to the throne; his cause was taken up by a large party, and the struggle kept up for years; defeated at length, he abdicated in favour of his son. (1785-1855).

Carlos, Don, grandson of the preceding, and heir to his rights; revived the struggle in 1870, but fared no better; took refuge abroad. (1848-1909).

Carlovingians, or **Carolingians**, the name of the second dynasty of Frankish kings, in succession to the Merovingian, which had become *faible*; bore away from 752 to 987, Pépin le Bref the first, and Louis V. the last; Charlemagne was the greatest of the race, and gave name to the dynasty.

Carlow, a small inland farming country of Leinster, Ireland (Eire). Area 346 sq. m. Pop. 34,000. Also the county town. Pop. 7,000.

Carlowitz (now **Karlovce**), a town of Yugoslavia on the Danube, 30 m. NW. of Belgrade, where a treaty was concluded in 1699 between Turkey and other European Powers, very much to the curtailment of the territories of the former. Has a metropolitan see of the Serbian Church.

Carlsbad (**Karlsbad**; Czech. **Vary Karlovy**), a celebrated watering-place formerly in Czechoslovakia but since Oct. 1938 incorporated in Germany, the springs being the hottest in Europe, the temperature varying from 117° to 165°; population nearly trebled in the season; the inhabitants are engaged in industries which minister to the tastes of the visitors. Pop. 24,000.

Carlskrona (**Karlskrona**), a Swedish town, strongly fortified, on the Baltic, with a spacious harbour, naval station and arsenal; built on five rocky islands united by dykes and bridges. Pop. 28,000.

Carlton, urban district of Nottinghamshire, England, 3 m. N.E. of Nottingham. Mining and brick-making are the chief industries, and there are large railway works. Pop. 22,000.

Carluke, an industrial town of Lanarkshire, shire, Scotland, with coal and iron mines, limestone quarries, foundries and engineering works, etc. Pop. 10,000.

Carlyle, **Thomas**, born in the village of Dumfries-shire; son of

THOMAS
CARLYLE

James Carlyle, a stonemason and afterwards a small farmer, and of Janet Aitken; educated at the parish school and Annan Academy; entered the University of Edinburgh at the age of 14, distinguished in mathematics; a student in the theological department; became a teacher first in Annan Academy, then at Kirkcaldy; threw up both schoolmastering and the Church; removed to Edinburgh, and took to tutoring and working for an encyclopedia, and later to translating from the German and writing criticisms for the Reviews, the latter of which were collected afterwards in the *Miscellanies*; wrote a *Life of Schiller*; married (1826) Jane Welsh, a descendant of John Knox; removed to Craigenputtock, in Dumfriesshire, where his original work began with *Sartor Resartus*, written in 1831, a radically spiritual book, and a symbolical; removed to London in 1831, where he wrote his *French Revolution* (1837), a book instinct with the all-consuming fire of the event which it pictures, and revealing "a new moral force" in the literary life of the country and century; delivered three courses of lectures to the elite of London Society (1837-1840), the last of them *Heroes and Hero-Worship*, afterwards printed in 1840; in 1840 appeared *Chartism*, in 1842 *Past and Present*, and in 1850 *Later-Day Pamphlets*; all on what he called the "Condition-

of England-Question," which to the last he regarded as the most serious question of the time; in 1845 he published *Letters and Speeches of Oliver Cromwell* and concluded (1858-1865) his life's task with *The History of Friedrich II. of Prussia, called Frederick the Great*. (1795-1881).

Carman, William Bliss, Canadian journalist and poet, born at Fredericton, New Brunswick. His earliest volume of poetry was *Low Tide on Grand Pré*, 1893. With Richard Hovey, and afterwards alone, he issued volumes of *Songs from Vagabondia*. Discussed his philosophy of nature-worship in a prose work called *The Kinship of Nature*. (1861-1929).

Carmarthenshire, a county in S. Wales, and the largest in the Principality; contains part of the coalfields in the district; capital Carmarthen, on the right bank of the Towy, a river which traverses the county. Area 920 sq. m. Pop. 179,000.

Carmel, Mount, a NW. extension of the limestone ridge that bounds on the S. the Plain of Esdraelon, in Palestine, and terminates in a rocky promontory 500 ft. high; forms the southern boundary of the Bay of Acre; its highest point is 1,810 ft. above the sea-level. It is an attractive region, perennially green. At its N. end are several hotels and pensions, and it is a popular residential area for inhabitants of Haifa, which is at the foot of the Mount.

Carmelites, a monastic order, originally an association of hermits on Mount Carmel, afterwards mendicant, called the Order of Our Lady of Mount Carmel, i.e., the Virgin, in consecration to whom it was founded by a pilgrim of the name Berthold, a Calabrian, in 1156; known formerly as the "White Friars." The Order is said to have existed from the days of Elijah.

Carmen Sylva, the *non-de-plume* of Elizabeth, Queen of Rumania; having lost an only child, she took to literature for consolation; evinced an active interest in the elevation and welfare of her race. (1843-1916).

Carminatives, name given to those drugs used on account of their stimulating effect on the stomach.

Carmine, a red colouring-matter obtained from the dried bodies of the cochineal insect, and used in water-colours, cosmetics, etc.

Carnac, a fishing-village in the Bay of Quiberon, in the dept. of Morbihan, France, with interesting historical remains of menhirs and mounds of Celtic and pre-Celtic days.

Carnarvon, George Edward Stanhope, Fifth Earl of, Egyptologist. Most of his life and much of his money were spent in excavations, his most notable discovery being Tutankhamen's tomb at Luxor in 1922, just before his death. (1866-1923).

Carnatic, an old province in the Madras Presidency of India that extended along the Coromandel coast from Cape Comorin, 600 m. N.

Carnation, the popular name of the varieties of the clove pink, *Dianthus Caryophyllus*. Rabbits greedily eat them, as also do birds. Those of the florist are much prized for their beautiful colouring and sweet-scented double flowers.

Carnegie, Andrew, ironmaster, born at Dunfermline, the son of a weaver; made a large fortune from his iron and steel works at Pittsburgh, U.S.A., out of which he liberally endowed institutions and libraries, both in America and his native country. (1835-1919).

Carnelian, sometimes cornelian, a semi-precious stone of a red colour, often cut for beads, seals, etc. It is semi-transparent.

Carniola, a district in Yugoslavia, SW. of Austria, on the Adriatic, S. of Carinthia (once an Austrian duchy); contains quicksilver mines, second only to those of Almaden, in Spain; the surface is mountainous, and the soil is not grain productive, though in some parts it yields grapes and fine fruit.

Carnival, in Roman Catholic countries the name given to a season of feasting and revelry immediately preceding Lent, akin to the Saturnalia of the Romans.

Carnivora, an order of mammals, called flesh-eating, though some members (e.g., some bears) are vegetarian feeders. Their geographical distribution is world-wide, except Australia and New Zealand. They are characterised by sharp teeth, small incisors, well-developed brain and simple stomach. The order is divided into two sub-orders: the *Fissipedia* (land types, including the cat tribe, dog tribe, civets, wolves, foxes, weasels, otters, bears, etc.), and the *Pinnipedia* (the fin-footed or aquatic types, including seals and allied species).

Carnot, Lazare Nicolas Marguerite, French mathematician and engineer, born at Nolay, in Burgundy; a member of the National Convention; voted for the death of the king; became member of the Committee of Public Safety, and organiser of the armies of the Republic, whence his name, the "organiser of victory"; Minister of War under Napoleon; defender of Antwerp in 1814; and afterwards Minister of the Interior. (1753-1823).

Carnot, Marie François Sadi, civil engineer and statesman, born at Limoges, nephew of the preceding; Finance Minister in 1875; became President of the French Republic in 1887; was assassinated at Lyons by an anarchist. (1837-1894).

Carnot, Nicolas Léonard Sadi, son of Lazare, founder of thermodynamics; in his *Réflexions sur la Puissance du Feu* enunciated the principle of Reversibility, considered the most important contribution to physical science since the time of Newton. (1796-1832).

Carnoustie, a seaside resort of Forfarshire, Scotland, 10 m. NE. of Dundee. Near is Barry Links, a military camping and manœuvring ground. Pop. 6,000.

Carnwath, a village of Lanarkshire, Scotland, in a coal-mining district, 7 m. NE. of Lanark. Pop. 5,200.

Carob, the *Ceratonia Siliqua*, a tree found in the Mediterranean countries, the only species of its genus of Leguminosae, the pods of which are nutritious and reputed to have been eaten by St. John the Baptist. See *Carat*.

Carol, a religious song, the most common being those heard at Christmas and sung by the common people. Dancing and singing were probably combined in the earliest times.

Carol II., King of Rumania. Son of the throne, King Ferdinand; as heir to the throne, he married in 1921 Princess Helen of Greece, by whom he had one son, Michael. In 1925 he renounced his claim to the throne, and on the death of Ferdinand Michael became king. Subsequently Carol, after abortive attempts to claim the throne, was successful in 1930, when King Michael abdicated and became Crown Prince. (b. 1892).

Carolina, North, one of the original 13 States of N. America, on the Atlantic, S. of Virginia; 480 m. from E. to W. and 180 m. from N. to S.; has a fertile, well-watered sub-soil in the highlands; is rich in minerals and natural products; chief industry, agriculture (crop and stock-raising); chief

products maize, cotton, tobacco, peanuts. Chief mineral output mica, felspar and residual kaolin clay. Area 52,400 sq. m. Pop. 3,170,000 (918,000 negroes). Cap. Raleigh.

Carolina, South, S. of North Carolina, is alluvial with swamps extending 100 m. inland from the coast, and is well watered; produces cotton in large quantities and of a fine quality, also maize, oats, peanuts and tobacco. Area 30,990 sq. m. Pop. 1,739,000 (793,000 negroes). Cap. Columbia.

Caroline, Queen of George II. of England, was the daughter of the Margrave of Brandenburg-Anspach, married (her second husband) George Augustus, Electoral Prince of Hanover, and son of George I. of England, in 1705; became Queen Consort on his accession in 1727, and acted as regent in his absence from the country; exercised considerable influence in affairs of state. (1683-1737).

Caroline Islands, a stretch of 2,000 m. from E. to W., N. of New Guinea and E. of the Philippines; the soil of the western islands is fertile, and there is abundance of fish and turtle in the lagoons; products, copra, beche de mer, turtle and pearl shell. They were discovered in the early 16th Century by Diego da Rocha, Portuguese navigator, who named the group the Sequeira Is.; bought from Spain by Germany in 1899; in 1919 mandated to Japan under League of Nations. Pop. 31,000 (chiefly Kanakas). Ponapé I. has 10,000, and Yap and Parao, 7,000 and 11,000 respectively.

Caroline of Brunswick, of George IV. and daughter of the Duke of Brunswick; married George then Prince of Wales, in 1795; gave birth to the Princess Charlotte the year following, but almost immediately after her husband abandoned her; she retired to a mansion at Blackheath; on the accession of her husband she was offered a pension of £50,000 if she stayed out of the country, but rejected it and claimed her rights as queen; was charged with adultery, but after a long trial acquitted; on the day of the coronation sought admission to Westminster Abbey, but the door was shut against her; she died a fortnight after. (1766-1821).

Carp, a genus of soft-finned fishes with a small mouth, toothless jaws, and gills of three flat rays. They have one dorsal fin and frequent fresh, quiet water. They feed chiefly on vegetable matter, worms, and insects. The common carp (*Cyprinus carpio*) is said to live to a great age, even 100 years.

COMMON CARP

Carpaccio, Vittoria, a Venetian painter of great celebrity, particularly in his early pieces, for his truth of delineation, his fertile imagination, and his rich colouring; his works have nearly all of them sacred subjects. (c. 1450-1522).

Carpathians, a range of wooded mountains in Central Europe, 880 m. long, which, in two great masses, extend from Presburg (Bratislava) to Orsova, both on the Danube, circling round the greater part of Hungary, particularly the whole of the N. and E., the highest of them Tatra, 8,740 ft.; they are rich in minerals, and their sides are clothed with forests, principally of beech and pine.

Carpentaria, Gulf of, a broad, deep Australia; contains several islands, and receives several rivers.

Carpenter, Mary, a philanthropist, born at Exeter, daughter of Dr. Lant Carpenter, Unitarian minister; took an active part in the establishment of reformatory and ragged schools, and a chief promoter of the Young Offenders Act; her philanthropic efforts extended to India, and she was the founder of the National Indian Association. (1807-1877).

Carpentier, Georges, a famous French boxer, born at Lens and employed as a boy in the mines; took to boxing early, and in 1914 defeated Gunboat Smith, who was disqualified for a foul; served with the French aviation corps during the War; defeated Joe Beckett in 1919, knocking him out with two blows; beaten by Jack Dempsey in New York in 1921. (1894-).

Carpentry, the art of combining pieces of timber to support a weight or sustain pressure. The work of the carpenter is intended to give stability to a structure, that of a joiner to give finishing and decoration. The term *frame* in carpentry is applied to any assemblage of pieces of timber firmly connected together, the points of meeting being called the *joists*.

Lengthening a beam consists of uniting pieces of timber into one length by joining their extremities. When neatness is not required, this is done by *fishing*—i.e. by fastening a piece of timber on each side of the point where the beams meet. When the width of the beam must be the same throughout, *scarfing* is employed. This consists of cutting from each beam a part of the thickness of the timber, and on opposite sides, so that the pieces may be jointed together, or bolted or hooped. When greater strength is required, *building* or *trussing* is the operation employed, building being the combining of two or more beams so as to have the effect of one large one. In trussing, the beam is cut in two in the direction of its length, and supported with cross-beams, as in roofing. *Mortise and tenon* is a mode of joining timber. An excavation called a mortise is made in one piece, and a projecting tongue to fit it, called the tenon, in the other piece.

Carpet, a floor-covering usually of wool or woollen base. Axminster carpets are usually made in one piece on strong linen, and small tufts of different-coloured worsted or wool are tied or fastened under the warp and are brought to the surface by a comb. Kidderminster carpets are made by intersecting two or more cloths of different colours, and, being made in layers, may be either two- or three-ply. The back of the carpet is the reverse pattern of the front.

Wilton or pile carpets have a velvety appearance, the loops of the coloured wool being cut through, and an extra velvety effect is obtained in some varieties by throwing in as a shoot a coloured chenille, afterwards cut at the surface. A cheap substitute for Wilton carpet is the tapestry carpet. Instead of several coloured yarns being used, a single coloured yarn is employed, the pattern being produced by dyeing the yarn in various colours at intervals of its length. Felt carpet, often used for stairs, landings and bedrooms, is made by printing colours on felt. In recent years Indian and Persian carpets have become popular, and are imported in large quantities.

Carpet Bagger, a derivative term for a candidate who seeks election in a constituency where he is a stranger, especially if sent down by the central party organisation.

Carrageen, an edible seaweed, Irish moss (*Chondus crispus*), reddish brown in colour, found on the shores of N. Europe and N. America.

CASCADE MOUNTAINS

Cascade Mountains, a range of mountains stretching through Oregon and Washington in the U.S.A. into British Columbia, Canada. They slope down towards the Pacific from the W. Plateau, of which the Rocky Mts. form the E. boundary; they are nearly parallel with the coast, and more than 100 m. inland.

Cascara Bark, the bark of the N. American buckthorn tree, *Rhamnus Purshiana*. The bark is dried, and the fluid, Cascara Sagrada, extracted from it. This fluid is used in medicine as a purgative, on account of its action on the muscles of the intestine.

Casein, a protein present in milk and cheese; it forms the basis of most of the patent foodstuffs obtained from milk and has extensive uses in the cotton industry.

Casemate, in fortifications, a vault built into the rampart of a fortress, with loopholes through which guns may be fired. On warships a similar armoured protection for firing guns. In architecture, a hollow moulding.

Casement, Roger, Irish spy. Knighted in 1911 after years in the British consular service; he worked among Irish prisoners in Germany in 1915, and the following year landed in Ireland from a German boat to start a rebellion. For high treason he was deprived of his knighthood and hanged. (1864-1916).

Cashel, a town in Tipperary, Ireland (Eire), 49 m. N.E. of Cork; a bishop's see, with a "Rock" 300 ft. high, occupied by interesting ruins; it was formerly the seat of the kings of Munster. Pop. 2,900.

Cashew-nut, the fruit of the tree (order Anacardiaceae), grown in the W. Indies, Central and S. America for the sake of the kernels of the nuts, which are eaten raw and roasted, and for the sake of the culinary oil derived from the kernels.

CASHEW-NUT TREE

Cashmere, or **Kashmir**, a native Indian State, bordering upon Tibet, 120 m. long and 80 m. wide, with beautiful scenery and a delicious climate, in a valley of the Himalayas, forming the basin of the Upper Indus, hemmed in by deep-gorged woods and snow-peaked mountains, and watered by the Jhelum, which spreads out here and there near it into lovely lakes; shawl-weaving and lacquer-work are the chief occupations of the inhabitants. Cashmere, which had been under Hindu and Mohammedan sultans, became part of the Mogul Empire under Akbar from 1581. After a period of Afghan rule in the 18th Century it was taken by the Sikhs, and after the Battle of Sobraon, 1846, Lord Hardinge entrusted its rule to a feudatory prince, subject to British supremacy. Pop. (with Jammu) 3,646,000.

Cash on Delivery, the C.O.D. system was first introduced by the Swiss Post Office in 1849. It provides an advantageous means of trading to both buyer and seller, with no risk to either party. In 1885 the Postal Congress made regulations for the delivery of parcels and in 1891 for letters. In 1877 the service had been established in India and Australia. The United Kingdom was considerably later in using the new facilities owing to the opposition of retail traders in 1904. However, the system was adopted eventually between the U.K. and the various

Dominions and Protectorates, and in 1919-1920 the scheme was in operation with European and other nations. In 1926 an inland parcel service was adopted. The service by rail is worked with the four big railway companies, the Post Office doing the paying, and the Railways the conveyance.

Cash Register, a machine registering and calculating cash paid into it. It has keys marked with particular amounts, which, on being struck, record them on the face of a dial for the customer to see. One machine can be worked by many assistants, each having a separate adding total and cash drawer.

Casimir, the name of five kings of Poland; the most eminent, Casimir III., called the Great; elected king in 1333; recovered Silesia from Bohemia in two victories; defeated the Tartars on the Vistula, and annexed part of Lithuania; formed a code of laws, limiting both the royal authority and that of the nobles. (1310-1370).

Casimir-Perier, Jean Paul Pierre, President of the French Republic, born in Paris; a man of moderate views and firm character; was premier in 1893; succeeded Carnot in 1894; resigned 1895. (1847-1907).

Casino, a club-house or public building with rooms for social gatherings, music, dancing, billiards and gambling.

Casket Letters, eight letters, of disputed authenticity, attributed to Mary Queen of Scots, and held as proof of her having conspired at the murder of her husband, Lord Darnley. They were found in 1567, but the French originals are lost.

Caslon, William, typefounder; born in Worcester; was the father of modern types in printing. (1692-1766).

Caspian Sea, an inland sea between Europe and Asia, Russia and Iran, the largest in the world, being 600 m. from N. to S. and from 130 to 270 m. in breadth, with the Caucasus Mts. on the W. and the Elburz on the S.; is the fragment of a larger sea which extended to the Arctic Ocean; shallow in the N., deep in the S.; the waters, which are not so salt as the ocean, abound in fish, especially salmon and sturgeon. Chief rivers Volga, Ural, Emba, Terck, Kura and Atrek.

Casquets, a group of rocks in the English Channel off the W. coast of Alderney, the scene of many wrecks until the construction of a lighthouse.

Cassandra, a beautiful Trojan princess, daughter of Priam and Hecuba, whom Apollo endowed with the gift of prophecy, but, as she had rejected his suit, doomed to utter prophecies which no one would believe, as happened with her warnings of the fate and the fall of Troy, which were treated by her countrymen as the ravings of a lunatic; her name is applied to anyone who entertains gloomy forebodings.

Cassation, Court of, a court of highest appeal, and last appeal in France, appointed in the case of appeal to revise the forms of a procedure in an inferior court; it consists of a president and vice-president, 49 judges, a public prosecutor called the *procureur-général*, and six advocates-general; it consists of three sections: first, one to determine if the appeal should be received; second, one to decide in civil cases; and third, one to decide in criminal cases.

Cassava, the name of two species of (Bitter Cassava) and *M. Aipi* (Sweet Cassava), both of the order Euphorbiaceae. The roots of *M. utilisima* are poisonous, but by treatment an edible starch is extracted, as from the roots of *M. Aipi*, from which tapioca is made.

Cassel (*Kassel*), capital of Hesse-Nassau, an interesting town with some important manufactures, 120 m. from Frankfurt-am-Main. Pop. 175,000.

Cassia, genus of tropical Leguminosae, including many varieties of trees, shrubs and herbaceous plants. The drug senna is extracted from the leaves of several of the species, and senna-poda, also a purgative, are the seed-vessels of *Cassia fistula*.

Cassiopeia, in Greek legend, Queen of Ethiopia, mother of Andromeda, placed after death among the constellations; a constellation well N. in the northern sky, of five stars in the shape of a W.

Cassiterides, islands in the Atlantic, which the Phœnician sailors visited to procure tin; presumed to have been the Scilly Isles or Cornwall, which they adjoin.

Cassiterite, a mineral occurring in metamorphic rocks; it is the chief ore of tin and is mined where the rock has been weathered and laid down in deposits. The chief workings are in Malaya, Dutch East Indies, Bolivia and Nigeria.

Cassius, Calus, chief conspirator against Cæsar; won over Brutus to join in the plot; soon after the deed was done fled to Syria, and made himself master of it; joined his forces with those of Brutus at Philippi; repulsed on the right, thought all was lost; withdrew into his tent, and called his freedmen to kill him; Brutus, in his lamentation over him, called him the "last of the Romans." (d. 42 B.C.).

Cassivelaunus, a British warlike chieftain, chief who unsuccessfully opposed Cæsar on his second invasion of Britain, 54 B.C.; surrendered after defeat, and became tributary to Rome.

Cassowary, a brevi-pinnate (short-they are flightless) bird, genus *Casuarus*, the second largest bird after the ostrich, which it resembles. The head is protected by a curious horny growth, and the inner toe has a long, powerful claw. It is a very fast-running bird, native of Malacca, Java and Pacific Is.

CASSOWARY

Castalia, a fountain at Parnassus sacred to Apollo and the Muses; named after a nymph who drowned herself in it to escape Apollo.

Castanea, a genus of trees of the beech (Fagaceae) order, *C. vulgaris* being the edible sweet chestnut tree.

Castanets, two hollow, pear-shaped together by a cord and held in each hand, used as musical instruments of percussion, especially by dancers in Spain to mark the rhythm of the music.

Caste, rank in society of an exclusive nature due to birth or origin, such as prevails among the Hindus especially. Among them there were originally two great classes, the twice-born and the once-born, i.e., those who have passed through a second birth, and those who have not; of the former there are four grades, Brahmans, or the priestly caste, from the mouth of Brahma; Kshatriyas, or the soldier caste, from the hands of Brahma; Vaishyas, or the agricultural caste, from the loins of Brahma; and the Sudras, menials, from the feet of Brahma; notwithstanding which distinction often members of the highest class sink socially to the lowest level, and members of the lowest rise socially to the highest.

Castellammare, a port on the coast S.E. of Naples, the scene of Pliny's death from

the eruption of Vesuvius in A.D. 79. It takes its name from a castle built on it by the Emperor Frederick II.; has a cathedral, arsenal and manufactures.

Castellon, a maritime province of a coastline on the Mediterranean. Area 2,495 sq. m. Pop. 309,000. The capital is Castellon de la Plana, a town with a pop. of 37,000.

Castelnau, Noël Marie Joseph Edouard, French general, born at Saint Afrigue, Aveyron. Captain 1876, Commandant 1889, General of Division 1910. In 1914 commanded second army in Lorraine, became chief of staff Dec. 1915. In Feb. 1916 resisted attack on Verdun and safeguarded right bank of Meuse. In Chamber of Deputies for Aveyron till 1924. (1851-)

Castiglione, Baldassare, an accomplished Italian born near Mantua; author of *Il Cortegiano*, a manual for courtiers, called by the Italians, in admiration of it, *The Golden Book*; had spent much of his time in courts in England and Spain, as well as Rome. (1478-1529).

Castile, a central district of Spain, divided by the mountains of Castile into Old Castile in the N., and New Castile in the S.; the former, consisting of a high bare plateau, bounded by mountains on the N. and on the S., with a variable climate, yields wheat and good pasturage, and is rich in minerals; the latter, also tableland, has a richer soil, and yields richer produce, breeds horses and cattle, and contains besides the quicksilver mines of Almaden. Both were at one time occupied by the Moors, and were created into a kingdom in the 11th Century, and united to the crown of Spain in 1469 by the marriage of Ferdinand and Isabella.

Casting, process of giving a substance a required shape by melting it and pouring it into a mould, the shape of which it takes after cooling and hardening. For casting in iron or bronze a sectionalised plaster mould of the object to be cast is first made. From that is cast a plaster model. Alternatively wood models are used. By pressing the model into a sand-pit, a sand mould is made. The molten metal is poured into this. Type for printing is cast by machinery in a metal mould.

Castle, a fortified building, or fortress. The earliest remains of a castle built in England is Richborough Castle in Kent, probably of Roman origin. After the Norman Conquest castles were built by the feudal Barons as their homes and strongholds. To aid defence, they were built preferably on a hill (e.g., Corfe Castle, Dorset), and many were surrounded by a moat filled with water (e.g., Bodiam Castle, Sussex), over which a drawbridge was lowered.

The main stronghold of the castle was the inner tower or keep (q.v.). The keep of Carisbrooke Castle and the White Tower of the Tower of London are characteristic Norman keeps. The keep was usually surrounded by two courtyards, divided by battlemented wall, strongly fortified at the corners by round towers or bastions. Towers also protected the gateway. The gate was also protected by an outwork, a parapet edging the moat, called the barbican.

Castlebar, a county and town of Co. Mayo, Ireland (Eire), the centre of an agricultural district. Here an English garrison was massacred during the Civil War. Pop. 4,200.

Castlecary, market town of Somerset, England, 12 m. N.E. of Yeovil. There is an old round-house in the market-place and remains of a castle. Pop. 2,000.

Castle Donington, a town of Leicestershire, England, on the Trent. Here baskets, hosiery and silk are made. Pop. 3,000.

Castle Douglas, borough, market town, and holiday resort of Kircudbrightshire, Scotland, the chief business centre of Galloway. Pop. 3,000.

Castleford, a town in the W. Riding of Yorkshire, England, 10 m. SE. of Leeds, with extensive glass-works. Pop. 24,200.

Castlemaine, a town of Talbot Co., Victoria, Australia, a railway junction and a health resort. There are gold mines near. Pop. 7,000.

Castlereagh, Lord, entered political life as a member of the Irish Parliament, co-operated with Pitt in securing the Union, after which he entered the Imperial Parliament, became War Minister (1805), till the ill-fated Walcheren expedition and a duel with Canning obliged him to resign; became Foreign Secretary in 1812, and the soul of the coalition against Napoleon; represented the country in a congress after Napoleon's fall; succeeded his father as Marquis of Londonderry in 1821, and committed suicide the year following; his name has been unduly defamed, and his services to the country as a diplomatist have been largely overlooked. (1759-1822)

Castle Rising, village of Norfolk, important town and seaport. Here are remains of a magnificent castle. Pop. 230.

Castleton, village of Derbyshire, England, land in the Peak District. Here are the ruins of a Norman castle, and famous caves and fluor spar mines. Pop. 600.

Castletown, a seaport in the Isle of Douglas and the former capital. Pop. 1,800.

Castor, or *Castoreum*, a brown substance, with a strong odour and bitter taste, obtained from the beaver, used in medicine and especially for perfumes.

Castor and Pollux, the Dioscuri, the twin sons of Zeus by Leda; the former great in horsemanship, and the latter in boxing; famed for their mutual affection, so that when the former was slain the latter begged to be allowed to die with him, whereupon it was agreed they should spend a day in Hades alternately, were raised eventually to become stars in the sky, the Gemini, twin signs in the zodiac, rising and setting together; the name is also given to the electric phenomenon called St. Elmo's Fire.

Castor Oil, a natural oil obtained from *Ricinus communis*, the crushed seeds of the plant which grows in India. It is mostly used as a purgative, but in India for other purposes, such as lubricating and as an oil for lamps.

Casual Ward, a ward in an institution where any vagrant or person out of work may obtain food and shelter for the night. Some work is usually required to return. It is usual, but not necessary, to get an admittance order from the relieving officer.

Casistry, the science of solving moral problems and cases of conscience by the application of rules derived from the Scriptures, or from the laws of society, or the accepted moral laws, or from common-sense and reason. In a legal aspect, an attempt to reconcile existing laws with an apparent breach of the same may be termed casuistical. The works of the Schoolmen, of Thomas Aquinas, and a 17th-Century book, *The Penitential*, were in their time favoured as the basis of casistry in cases of conscience.

Casus Belli, a Latin term meaning cause of war. It has become a legal term, referring to one or other of the causes laid down by international law

as sufficient to justify a declaration of war by one nation on another.

Cat, in zoology, a family or tribe of carnivorous mammals (Felidae) which includes the lions, tigers, leopards, etc. Usually, however, the term is restricted to the domestic species, *Felis domestica*, which are probably descended not from the wild cat, *Felis catas*, but from the cat worshipped as sacred in Egypt, *Felis cypria*. Domestic cats, although smaller, retain the characteristics of the wilder species—flexible and strong spine, supple claws, and easy movement. The eyes react to the light by an expansion or contraction of the pupils.

In England various kinds of domestic cats are common: pure white, pure black, tabbies of different markings, grey, blue-grey and chinchilla. Persian cats, usually black or blue-grey, are long-haired and much prized. Siamese cats are short-haired, light fawn-coloured, and with black muzzle, ears and feet.

SIAMESE CAT

Annual cat-shows are held in England. The National Cat Club was founded in 1887, its annual show being held usually in September; the Scottish Cat Club in 1891, its annual show being held in Edinburgh or Glasgow. Besides the championship held by the National Club in London, other championships are held in various parts of the country.

Catacombs, originally underground quarries, afterwards used as burial-places for the dead, found beneath Paris and in the neighbourhood of Rome, as well as elsewhere; those around Rome, some 40 in number, are the most famous, as having been used by the early Christians, not merely for burial but for purposes of worship, and are rich in monuments of art and memorials of history.

Catalepsy, a form of hysteria which causes the limbs and muscles to become rigid. Sometimes the sufferer becomes insensible, and may show hardly any signs of life. Women are more prone to attack than men. The symptoms can also be produced by hypnotism.

Catalonia (*Castellon*), old province of Spain, on the NE., including the modern provinces of Barcelona, Gerona, Lerida and Tarragona; has a most fertile soil, which yields a luxuriant vegetation; chief seat of manufacture in the country; the people specially distinguished from other Spaniards by their intelligence and energy. When the republic was inaugurated in 1931, Catalonia, which had long struggled for its ancient autonomy, was allowed to have its own language and flag, but in 1932 the Spanish Government gave Catalonia its own autonomy, and a new Catalan parliament was set up in that year. After a rebellion in 1934 the Spanish cortes suspended the Statute of Autonomy of Catalonia for an indefinite period. During the Civil War the four provinces stood firm on the Government side, and an autonomous government was again set up in Catalonia in Aug. 1936. The whole province put up a fierce resistance to General Franco in 1936, when, with the help of Italian forces and by extensive aerial bombardment, he broke into the provinces and, by driving a salient through the Government forces to the sea, cut Catalonia off from the Valencia Government. Area 12,427 sq. m. Pop. 3,018,000.

Catalpa, a genus of trees, family Bignoniaceae, growing in N. America and E. Asia. *O. syriacaefolia* has

large leaves and white flowers, *C. bignonioides* yields a useful durable wood.

Catalysis, an alteration (usually acceleration) in the rate at which a chemical reaction is proceeding, caused by the presence of another substance (known as a catalyst), which itself remains unchanged in weight and in chemical composition, though often undergoing some physical change. Upon gaseous reactions, metals and metallic oxides frequently exert a marked catalytic effect, and the use of such substances is of considerable commercial importance.

In solution, catalysis is a common effect of oxonium ions ("hydrogen ions"), while organic catalysts of unknown composition ("enzymes") play an important part in fermentation and biological chemical changes in general. The action of a catalyst has been likened by the German chemist Ostwald to that of lubricating oil upon a machine; but it should be noted that certain catalysts exert a retarding action upon the chemical processes they are used to catalyse. Whether a catalyst can actually initiate a reaction is still a subject of controversy.

Catamaran, an Indian vessel, used chiefly in Madras, as it can be paddled through surf without capsizing. It is built of 3 logs, lashed side by side, the longest being in the middle and curved upwards at the fore-peak.

Catamarca, NW. province of the in minerals, especially copper. Pop. 105,000. Also the capital of the province. Pop. 22,000.

Catania, an ancient city of Sicily at the foot of Etna, and on the E. coast of the island, on a fertile plain known as the Granary of Sicily, chief town of a province of the same name; has been several times devastated by the eruptions of Etna, particularly in 1169, 1669, and 1693; manufactures silk, linen and articles of amber, etc., and exports sulphur, grain, fruits, nuts and oil. Pop. 212,000.

Catapult, a siege engine, used in the 3rd Century B.C., and later by the Greeks and Romans. Two wooden arms twisted into stretched hanks of cord or hide were drawn back by cords attached to a propelling bolt which slid back along a grooved piece of wood. The twisted hanks of cord provided sufficient resistance to bring the bolt forward, when released, with power to send projectiles along the groove with considerable force. The Roman siege catapults were constructed on huge frames.

Cataract, an eye disease, a cloudy or opaque state of the liquid contained in the lens of the eye. Operation is the only treatment. A hard lens is removed. If soft, the fluid is drained. Spectacles compensate for the absent lens. Without spectacles the patient remains blind.

Catarrh, inflammation of the mucous membranes of the body, including those of the bowel and stomach (gastritis and colitis), and of the gall-bladder (cholecystitis). The term is in particular used of inflammation of the mucous membranes of the nose (nasal catarrh), which is a frequent concomitant of a cold, and which may also be due to malformation, or to the presence of polyp. When the cause is known, the cause is curable.

Cat-bird

(*Galeoscoptes*)

(AMERICAN)

carolinensis), the common name of an American species of mocking-bird (Mimidae: family) a well-known songster which can utter notes

like the meowing of a cat. The Green Cat-bird (*Helminthophila viridis*) is an Australian bird of the genus *Helminthophila* of the Ptilinorhynchidae (Bower-bird) family allied to the Birds of Paradise and crows, but the only one that does not build a bower.

Catch (music), a light form of vocal music, sung in concert, several voices entering at equal intervals of time. Once very popular. There is still in existence a Catch Club founded in 1781.

Catchment Areas, the areas in which water, from rainfall or otherwise, collects to form the supply of a river, stream or drainage area, the boundaries of any particular catchment area being those heights or ridges of land which separate it from another drainage area. A certain proportion of the rainfall is always lost by evaporation and absorption. The "run-off" is that water which actually reaches the stream or river.

Cateau, Le (Battle of), fought Aug. 25th and 26th, 1914, by General Smith-Dorrien's Second Army Corps against Von Kluck's Army during the retreat from Mons. The stand enabled the main Allied forces to retreat safely. The Corps lost nearly 8,000 men and 38 guns, but with the help of French, territorials and cavalry, withstood the enemy, the survivors being able to retire unmolested. In the course of this now historic battle there were many heroic incidents, notably the desperate bravery of the men of the "L" battery R.H.A., 3 of whom were awarded the V.C.

Catechism, a set form of question and answer whereby the Christian Church has sought to instruct the young in the tenets of religion. There are various forms prevailing in the different churches. Most include the Creed, the Lord's Prayer and the Ten Commandments. A *Smaller Catechism* was published by Luther, while the Presbyterian Church also uses a shorter form, giving some explanation of the doctrines and duties of a Christian. The Catechism used in the English Church differs only slightly from the one drawn up in 1549.

Catechu (Cutch), an extract obtained from the leaves of certain trees in the E. Indies, India, etc., which have astringent properties and are useful in dyeing and tanning. Black Catechu is prepared from the leaves of an acacia tree of India (*Acacia catechu*). Pale Catechu from those of the E. Indian *Uncaria Gambier*, a tree of the order Rubiaceae. Though both have similar properties and uses, only Gambier or Pale Catechu is used in medicine in England.

Categorical Imperative, Kant's name for the self-derived moral law, "universal and binding on every rational will, a commandment of the autonomous, one and universal reason."

Categories which all our notions of things may be grouped, or classes under which all our Thoughts of things may be grouped: the former called *Logical*, we owe to Aristotle, and the latter called *Metaphysical*, we owe to Kant. The Logical are derived, that group our notions, are ten in number: Substance or Being, Quantity, Quality, Relation, Place, Time, Position, Possession, Action, Passion. The Metaphysical, so derived, that group our thoughts, are: (1) as regards *quantity*, Totality, Plurality, Unity; (2) as regards *quality*, Reality, Negation, Limitation; (3) as regards *relation*, Substance, Accident, Cause and Effect, Action and Reaction; (4) as regards *modality*, Possibility and Impossibility, Existence and Non-existence, Necessity and Contingency. John Stuart Mill resolves the categories into 5: Existence, Co-existence, Succession, Causation, and Rosenplance.

Caterham, urban district of Surrey, England, 7 m. SE. of Croydon. Here are the Guards' barracks, and a lunatic asylum. Pop. (with Warlingham) 20,000.

Caterpillar, the worm-like larva of butterflies and moths. They are made up of 13 sections and have a number of true jointed legs (6 on the first, 3 on thoracic segments) and curious pseudo-legs (a varying number but always on the last 10 or abdominal segments). It often closely resembles the plants on which it is feeding, and is capable of eating an enormous amount of food, thus supplying itself with sufficient nourishment to maintain itself through the chrysalis stage.

Catesby, Robert, born in Warwickshire, a Catholic of good birth; concerned in the famous Gunpowder Plot; shot dead 3 days after its discovery by officers sent to arrest him. (1573-1605).

Cat-fish, a large order (the Siluridae) of smooth-skinned, scaleless fish (some species have the body protected with overlapping bony plates). There are some hundreds of species, mostly freshwater fish, inhabiting rivers in Europe, Africa and America, though 2 families are marine. They usually have barbels.

AMERICAN LAKE CAT-FISH

Catford, a suburb of SE. London, in the Lewisham, metropolitan borough of

Catgut, a cord prepared from the intestines of sheep, cattle, horses, etc., used for the strings of violins and other stringed musical instruments, also for tennis rackets, etc., and by surgeons for putting stitches in wounds. The best comes from Italy.

Cathartic, in medicine, drugs used to produce free motion of the bowels, there being many different drugs used for the purpose according to whether a mild aperient is required or a drastic purgative.

Cathay, the name given to China by medieval writers, introduced to Europe by Marco Polo, and derived from Khital, a name still given to China in some parts of Central Asia.

Cathedral (from the Latin *cathedra*, meaning a "seat"), is the name given to the church in which the throne of the bishop of the diocese is placed. In early times the position of the bishop's throne was in the apse behind the altar, but now it is usually kept on the S. side of the choir.

When cathedrals were first founded in England, they were of 2 kinds—either served by monks or by secular canons. The cathedrals which belonged to a monastery were of more elaborate architecture than those of the secular clergy. They generally contained a cloister-court, chapter-house, refectory, dormitory, infirmary and guest-hall. The cathedral church itself usually consists of a nave with aisles, a central tower, N. and S. transepts, presbytery and choir. Most cathedrals are cruciform in plan.

English cathedrals may be classified in 3 groups: (1) Old Foundation, (2) New Foundation, (3) those founded since the Reformation. A group (1) are London (St. Paul's), York, Exeter, Salisbury and Lincoln, while those belonging to the New Foundation, founded at the time of the Reformation, include Oxford, Gloucester and Peterborough, as well as monastic cathedrals that survived such as Canterbury, Winchester, Rochester, Ely, Norwich and Durham.

Among those founded since the Reformation,

many originally parish churches, may be named, Truro, Newcastle and Birmingham. The finest example of a modern cathedral is at Liverpool, built in modern Gothic to the design of Sir Gilbert Scott.

Catherine I., wife of Peter the Great, daughter of a Livonian peasant; married first to a Swedish dragoon, became afterwards the mistress of Prince Menshikoff, and then of Peter the Great, who eventually married her; succeeded him as empress, with Menshikoff as minister: in the end gave way to dissipation. (1680-1727).

Catherine II., The Great, empress of Russia, born at Stettin, daughter of Prince of Anhalt-Zerbst; "a most clever, clear-eyed, stout-hearted woman"; became the wife of Peter III., a scandalous person, who was dethroned and then murdered, leaving her empress; ruled well, and though her character was immoral and her reign despotic, her efforts at reform, the patronage she accorded to literature, science and philosophy, and her diplomatic successes, entitle her to a high rank among the sovereigns of Russia; it was during her reign, and under the sanction of it, that Europe witnessed the three partitions of Poland. (1729-1796).

Catherine, St., of Alexandria, a virgin martyrdom after torture on the wheel, which has since borne her name; Festival, Nov. 25.

Catherine de' Medici, daughter of Lorenzo de' Medici, wife of Henry II., of France, and mother of his three successors; on the accession of her second son, Charles IX., for the reign of her first, Francis II., was very brief—acted as regent during his minority; joined heart and soul with the Catholics in persecuting the Huguenots, and persuaded her son to issue the order which resulted in the massacre of St. Bartholomew; on his death, she acted as regent during the minority of her third son, Henry III. (1519-1589).

Catherine of Aragon, fourth daughter of Ferdinand and Isabella of Spain, and wife of Henry VIII. of England, her brother-in-law as widow of Arthur, from whom and at whose instance, after 18 years of married life, and after giving birth to five children, she was divorced on the plea that she had been his brother's wife before; after her divorce she led an austere religious life. The refusal of the Pope to sanction this divorce led to the final rupture of the English Church from the Church of Rome. (1485-1536).

Catherine of Braganza, the wife of Charles II. of England, of the royal house of Portugal; was unpopular in the country as a Catholic and neglected by her husband, on whose death, however, she returned to Portugal, and did the duties ably of regent for her brother Don Pedro. (1638-1705).

Catherine of Sienna, born at Sienna, a sister of the Order of St. Dominic, and patron saint of the Order; celebrated for her ecstasies and visions and the marks which by favour of Christ she bore on her body of His sufferings on the Cross. (1347-1380).

Catherine of Valois, daughter of Charles VI. of France, and wife of Henry V. of England, who, on his marriage to her, was declared heir to the throne of France, with the result that their son was afterwards, while but an infant, crowned king of both countries; becoming a widow, she married Owen Tudor, a Welsh gentleman, whereby a grandson of his succeeded to the English throne as Henry VII. and the first of the Tudors. (1401-1438).

Catherine Parr. See Parr, Catherine.

Catheter, an instrument used in medicine for withdrawing liquid from a cavity the opening of which is a narrow channel. They are of rubber or metal, the most common being the urethral catheter used for passing through the urethra to empty the bladder.

Cathetometer, an instrument for measuring the difference of levels between two near points. It consists of a graduated vertical rod upon which slides a horizontal telescope, the distance the telescope travels on the rod marking the difference in height of the objects under observation.

Cathode, the negative pole of an electric cell; the conductor by which an electric current leaves an electrolyte, and passes over to the negative pole; the opposite of the Anode, which is the positive conductor.

Catholic Apostolic Church, a religious movement begun in 1830, and finally formed in 1835 with the designation of twelve "Apostles." The inspiration of the sect was the teaching of the Scottish preacher Edward Irving, whose vast popularity in the Scottish Church ended in a trial for heresy in 1831 when he was deposed. He believed in the divine origin of his utterances. There are at present over a thousand communicants in the United Kingdom. Their liturgy is based on that of the Anglican and Catholic Churches.

Catholic Emancipation, the name given to the movement in England for freeing Roman Catholics from disabilities, and to the final law passed in 1829 emancipating them from disabilities which precluded their election to office in the State, so that they are eligible now to any save the throne itself, the Lord Chanceryship of England and the Lord High Commissionership in the Church of Scotland.

Catholic Epistles, the name, equivocal, given to certain epistles in the New Testament not addressed to any community in particular but to several, and given eventually to all not written by St. Paul.

Catiline, or **Lucius Sergius Catilina**, a Roman patrician; an able man, but unscrupulous and ambitious; frustrated in his political designs, he formed a conspiracy against the State, which was detected and exposed by Cicero, a discovery which obliged him to leave the city; he tried to stir up hostility outside; this too being discovered by Cicero, an army was sent against him, when an engagement ensued, in which, fighting desperately, he was slain, 62 B.C.

Catkin, a wind-fertilised inflorescence which is usually pendulous, either male or female. The best-known trees which bear catkins are the willow, hazel, birch, oak, poplar and sweet-chestnut.

Catmint, the common name for certain species of plants of the genus *Nepeta*, order Labiatae, on account of the fondness of cats for them. In particular the name is given to *N. Cataria*, which bears white flowers spotted with pink.

Cato, **Marcus Porcius**, or **Cato Major**, **sur-**named Censor, Priscus and Sapiens, born at Tusculum, of a good family, and trained to rustic, frugal life; after serving occasionally in the army, removed to Rome; became in succession censor, ædile, prætor, and consul; served in the second Punic War, towards the end of it, and subjugated

Spain; disliked and denounced all innovations; sent on an embassy to Africa, was so struck with the increasing power of Carthage that on his return he urged its demolition, and in every speech which he delivered afterwards he ended with the words, *Ceterum censeo Carthaginem esse delendam*. But, be that as it may, my opinion is Carthage must be destroyed." (234-149 B.C.).

Cato, **Marcus Porcius**, or **Cato the Younger**, or **Uticensis**, great-grandson of the former; devoted himself to study of the Stoic philosophy; conceived a distrust of the public men of the day, Caesar among the number; preferred Pompey to Caesar, and sided with him; after Pompey's defeat retired to Utica, whence his surname, and stabbed himself to death rather than fall into the hands of Caesar. (95-46 B.C.).

Cato-street Conspiracy, a significant, abortive plot, in 1820, headed by one Thistlewood, to assassinate Castlereagh and other ministers of the Crown; so called from their place of meeting off the Edgware Road, London.

Catrail, an old earthwork of uncertain origin, 50 m. long, passing S. from near Galashiels through Selkirk and Roxburgh to Peel Fell in the Cheviots; it is known also by the name of the "Devil's Dyke."

Cat's-eye, a semi-precious stone, of a variety of variety of quartz or of chrysoberyl. A perfect specimen when cut has a line of colour within it resembling the light to be seen in a cat's eye. Most varieties are hard and semi-transparent.

Catskill Mountains, a group of steep ascent and with rocky summits, in New York State, U.S.A., W. of the Hudson; none of them exceeding 4,000 feet; celebrated as the scene of Rip Van Winkle's long slumber; belong to the Appalachians.

Cat's Tail, the popular name of a grass, species of rush, the *Typha* (also called reed-mace and bulrush), of which there are 2 species, the inflorescence being a dense spike, yellow at the top (male flowers), brown below (female). The name is also sometimes given to the Timothy grass (*Phleum pratense*).

Cattaro, or **Kattaro**, a fortified seaport, slavia, in Dalmatia, standing on the Gulf of Cattaro, an arm of the Adriatic 20 m. long. It was formerly in Austria, but was occupied by Italy in 1918, and ceded to Yugoslavia in 1919. Pop. 5,000.

Cattegat, an arm of the North Sea, 150 m. in length and 84 m. at its greatest width, between Sweden and Jutland; a highway into the Baltic, all but blocked up with islands; is dangerous to shipping on account of the storms that infest it at times.

Catterick, village of Yorkshire, England, in N. Riding, 4 m. SE. of Richmond. Near by is a large camp of the British army. There is a racecourse here. Pop. 600.

Cattle, a general term for livestock, usually held to include bulls, cows, bullocks, calves, and heifers. Cattle may be divided into 3 main classes: beef, milk, and dual purpose. Beef cattle include such breeds as Aberdeen Angus, Sussex, Hereford, Devon, Longhorn and W. Highland. As a rule short-horned varieties are preferred

POPLAR CATKINS

SHORTHORN BULL

the long-horned, as there is less likelihood of damage in transit.

Milk cattle are Guernseys, Jerseys, Alderneys and Keries, the last being termed the *cow*, owing to its hardness, rolling, and small size. The main breed of dual-purpose cattle is the Shorthorn; British Shorthorns have been used in cattle breeding all over the world. Other breeds in this division, both good milkers and producing beef, are Red Polls and Dexters, the latter a small but excellent breed.

Cattle Plague, or Rinderpest, a disease which affects ruminants, but especially bovine cattle; indigenous to the East, Russia, Persia, India and China, and imported into Britain only by contagion of some kind; the most serious outbreaks were in 1865 and 1872.

Cattleya, a genus of orchids (Orchidaceae), of which there are some 30 species native to tropical America (Brazil), but cultivated in England as stove plants, especially in hybrid forms.

Catullus, Gaius Valerius, the great Latin lyric poet, born at Verona, a man of wealth and good standing, being, it would seem, of the equestrian order; associated with the best wits in Rome; fell in love with Clodia, a patrician lady, who was the inspiration of many of his effusions and whom he addresses as Lesbia; the death of a brother was the occasion of the production of one of the most pathetic elegies ever penned; in the civic strife of the time he sided with the Senate, and opposed Caesar. (87-54? B.C.).

Cauca, a river in Colombia, S. America, after a northward course of 600 m.

Caucasian Race, a name adopted by Blumenbach to denote the Indo-European race, from the fine type of a skull of one of the race found in Georgia.

Caucasus, an enormous mountain range, 750 m. in length, extending from the Black Sea ESE. to the Caspian, in two parallel chains, with tablelands between; bounded on the S. by the valley of the Kur, which separates it from the tableland of Armenia; snowline higher than that of the Alps; has fewer and smaller glaciers; has no active volcanoes, though there is abundant evidence of volcanic action. As the result of the Great War, the Caucasus became a unit of the Soviet Union of Republics, with the title of Transcaucasian Federated S.S.R. and comprises the 3 republics, Azerbaijan, Armenia and Georgia.

Caucus, a political term, especially used in the U.S.A., denoting a meeting of a party to nominate a candidate, or deal with organisation or policy. Originally applied to a club in Boston, U.S.A.

Caudine Forks, a narrow mountain gorge in Samnium, in which, during the second Samnite war, a Roman army was entrapped and caught by the Samnites, who obliged them to pass under the yoke in token of subjugation, 321 B.C.

Caul, a close heat-covering made of net. Anatomically, it is part of the membrane covering the lower intestines; also the membrane or amnion enveloping the fetus. If the child was born with the caul remaining round its head, it was formerly considered lucky.

Cauliflower, *Botrytis cauliflora*, a variety of cabbage or *Brassica oleracea*. It belongs to the order Cruciferae. The white flowering head is eaten as a vegetable.

Causeway, originally also *causway*, a paved roadway higher than the natural level of the ground, being raised on an artificial bank of stones, earth, etc., or on timber. It is built either to traverse a

marsh or wet ground or to enclose a pond to prevent overflow on to lower ground.

Caustic, in medicine, a substance that burns and destroys animal tissue. In chemistry a name given to certain alkalis which have the same properties, viz., to caustic soda (sodium hydroxide, NaOH) and to caustic potash (potassium hydroxide, KOH). In optics, certain rays of light reflected on a surface or mirror.

Cauterets, a fashionable watering-place in the dept. of the Hautes-Pyrénées, 3,250 ft. above the sea, with sulphurous springs of very ancient repute, 24 in number, and of varying temperature.

Cautery, the process of burning or searing animal tissue in order to destroy dead tissues or promote healing; also the instrument used which in *actual cautery* is a white-hot iron, in *button cautery* an iron heated in water; in *galvanic cautery* a platinum wire heated by electricity.

Cauvery, a river of S. India, 415 m. long, rising in the W. Ghats and falling into the Bay of Bengal after traversing Mysore and Madras. It is not navigable, though it waters a fertile plain and provides electric power for Mysore (from the Cauvery Falls).

Cavaignac, Louis Eugène, a distinguished Paris; appointed Governor of Algeria in 1848, but recalled to be head of the executive power in Paris the same year; appointed dictator, suppressed the insurrection in June, after the most obstinate and bloody struggle the streets of Paris had witnessed since the first Revolution; stood candidate for the Presidency to which Louis Napoleon was elected; was arrested after the *coup d'état*, but soon released; never gave his adherence to the Empire. (1802-1857).

Cavaliers, the royalist partisans of Charles I. in England in opposition to the parliamentary party, or the Roundheads as they were called.

Cavalry, in history the horse-soldier has taken turns with the foot-soldier in being the more important arm of the army. Cavalry have been most used by nations with open territory, and infantry have been most used in hilly countries. Both arms, however, have had their special value, and found their greatest effectiveness when working together. In the Great War, 1914-1918, large forces of cavalry were assembled, but it was only in the Palestine campaign of 1918, under General Allenby, that they were of outstanding use. The conditions of fighting on the Western front practically immobilised cavalry.

Warfare in the future will depend much more on mechanised forces and highly-mobile forces, as cavalry must disappear. The future of the arm seems to lie in mechanisation, which is being rapidly adopted by all countries. Not long after the Great War there were cavalry amalgamations in the British Army tantamount to the elimination of some of the then existing 30 cavalry regiments. Since then new schemes of army organisation have involved the conversion of most of the rest of the cavalry (excepting, especially, Indian regiments) into cavalry-armed-car or cavalry-light-tank units.

Cavan, inland county of Ireland (Eire), bounded by Fermanagh (Northern Ireland), Monaghan, Meath, etc.; with a poor soil; has minerals and mineral springs. Pop. 76,600. Also a market town, capital of the same county. Pop. 3,000.

Cavan, tenth Earl of, British soldier. Entering the Grenadier Guards, he first saw service in the Boer War, and took command of the Guards division in France in 1915. In 1917 he went to the Italian front, taking command there in 1918. He was

made Chief of the Imperial General Staff in 1922. Field-Marshal, 1932. (1865-).

Cave, Edward, a London bookseller, born in Warwickshire; projected the *Gentleman's Magazine*, to which Dr. Johnson contributed; was the first to give Johnson literary work, employing him as parliamentary reporter. (1691-1754).

Cave, Viscount, British politician. He entered Parliament as a Conservative in 1906, and from 1916 to 1919 was Home Secretary in the Coalition Govt. He was Lord Chancellor in 1922 under Bonar Law, and in 1924 under Baldwin. (1856-1928).

Caveat, in law, a notice or warning to prevent judicial steps being taken against him. It is used especially to stop the grant of probate of a will.

Caveat Emptor, a legal expression denoting that a buyer purchases at his own risk, unless there is an express warranty. Literally it means "Let the buyer beware." The Sale of Goods Act of 1893, however, established that the goods must correspond to their description, and must be fit for their purpose, provided the purpose for which they are required has been made quite clear.

Cavell, Edith Louisa, the British nurse who was shot by the Germans at Brussels on Oct. 12, 1915, for harbouring refugees and facilitating their escape into Holland. After the war she was buried in Norwich Cathedral, near which town she was born. She had been matron of a Brussels hospital since 1906. (1865-1915).

Cavendish, the name of the Devonshire ducal family, traceable back to the 14th Century.

EDITH CAVELL

Cavendish, Lord Frederick Charles,

Duke of Devonshire, educated at Trinity College, Cambridge, and a Liberal; was made Chief Secretary for Ireland in 1882, but chancing to walk home one evening through the Phoenix Park, he fell a victim, stabbed to the heart, of a conspiracy that was aimed at Mr. Burke, an unpopular subordinate, who was walking with him, and who came to the same fate. Several men were arrested when one of them informed; 5 of them were hanged; the informer, Carey, was afterwards murdered, and his murderer hanged. (1836-1882).

Cavendish, Henry, natural philosopher, sophier and chemist, born at Nice, of the Devonshire family; the first to analyse the air of the atmosphere, determine the mean density of the earth, discover the composition of water, ascertain the properties of hydrogen, and discover the presence of nitrogen in nitric acid. He was an extremely shy, retiring man; born rich and died rich, leaving over a million sterling. (1731-1810).

Cavendish, Thomas, an English navigator, gator, fitted out three vessels to cruise against the Spaniards; extended his cruise into the Pacific; succeeded in taking valuable prizes, with which he landed in England, after circumnavigating the globe; he set out on a second cruise, which ended in disaster, and died in the island of Ascension broken-hearted. (1560-1592).

Caversham, town of England formerly on the Thames opposite Reading, Berkshire, in which most of it is now included.

Caves, or **Caverns,** cavities or hollow places in the earth. They are usually hollowed out of rock, and are formed in a

variety of ways. The rock may be worn away by the constant friction of the sea or by the passage of an underground river, the course of which may later be diverted, or it may dry up, leaving a series of underground passages. They may also be formed under glaciers owing to the shifting of the ice, or they may be the result of a volcanic eruption which causes lava to flow over ice and compressed snow.

Primitive man used caves to live in, and remains of men and prehistoric animals have been found in caves. The dripping of water in caves in limestone districts leaves a deposit of bicarbonate of lime which in time forms into pillars, sometimes resembling icicles, called stalagmites and stalactites. In England the Cheddar Caves in the Mendip Hills are celebrated; the Chislehurst Caves are thought to extend far underground.

Caviare, the roe (the immature ovaries) of the common sturgeon and other kindred fishes, caught chiefly in the Black and Caspian Seas, and prepared and salted; deemed a great luxury by those who have acquired the taste for it; largely imported from Astrakhan.

Cavour, Count Camillo Benso, one of the born the younger son of a Piedmontese family, at Turin; entered the army, but was precluded from a military career by his liberal opinions; retired, and for 16 years laboured as a private gentleman to improve the social and economic condition of Piedmont; in 1847 he threw himself into the great movement which resulted in the independence and unification of Italy; for the next 14 years, as editor of *Il Risorgimento*, member of the Chamber of Deputies, holder of various portfolios in the Government, and ultimately, as Prime Minister of Piedmont, he obtained a constitution and representative government for his country, and raised it to a place of influence in Europe; he co-operated with the allies in the Crimean War; negotiated with Napoleon III. for the expulsion of the Austrians from Italy, and so precipitated the successful war of 1859; he encouraged Garibaldi in the expedition of 1860, which liberated Sicily and S. Italy, and saw the parliament of 1861 summoned, and Victor Emmanuel declared King of Italy. (1810-1861).

Cavy, or **Cavia,** a genus of rodents of which the domestic guinea-pig (*Cavia cobaya*) is a species. They are natives of Central and S. America, have rough hair and no tails.

BOLIVIAN CAVY

Cawdor, a Scottish village SW. of Nairn; scene of the murder of Duncan in Shakespeare's *Macbeth*.

Cawnpore, a city on the right bank of the Ganges, in the United Provinces of Agra and Oudh, India, 40 m. SW. of Lucknow, and 628 m. NW. of Calcutta; the scene of one of the most fearful atrocities, perpetrated by Nana Sahib, in the Indian Mutiny in 1857. Pop. 244,000.

Caxton, William, the first English printer, born in Kent, trained as a mercer, settled for a time in Bruges, learned the art of printing, and printed there a translation of the *Recuyell of the Histories of Troyes*, and *The Game and Playe of Chess*, returning to England, set up a press in Westminster, and in 1477 issued *Dictee and Sayings of the Philosophers*, the first book printed in England, which was soon followed by many others. (c 1422-1491).

Cayenne, capital and port of French Guiana. Swampy, unhealthy, rank with tropical vegetation. Pop. 10,000.

Cayenne Pepper, the dried and ground fruit of *Capsicum annuum*, a plant of the order Solanaceae, native to Central and S. America. The pods (known as chillies or red peppers and used in pickles and chilly-vinegar) are bright red and very hot to the taste.

Cayman Islands, three in number: Grand Cayman, Little Cayman and Cayman Brac. Are a dependency of Jamaica, which is about 120 m. away to the SE. They have an area of 104 sq. m. and a population of over 6,000. When discovered by Columbus, on his voyage from Porto Bello to Haiti, they were called the Tortugas.

Ceará, a maritime state of N. Brazil, with a coastline on the S. Atlantic and bounded landwards by the states of Piahy, Pernambuco and Parahyba; climate hot and dry; chief products cattle and tropical products. Pop. 1,848,000. Also the name of the capital (also called Fortaleza). Pop. 143,000.

Cebu, an island of the Philippines, some 125 m. long, and with an area of 1,695 sq. m., producing abaca (Manila hemp), tobacco, copra, etc. The capital of the islands is a town of the same name. Pop. (island) 1,000,000; (town) 82,000.

Cebus, the Capuchin genus of monkeys, dull-coloured, with long, prehensile tails; found in S. America.

Cecil, Robert, Earl of Salisbury, succeeded his father, Lord Burielgh, as first Minister under Elizabeth, and continued in office under James I., whose friendship he sedulously cultivated before his accession, and who created him earl. (c. 1563-1612).

Cecil, Robert Cecil, British politician. A son of the Marquess of Salisbury, he spent 19 years at the Bar before entering Parliament as a Conservative in 1906. He became Under-Secretary for Foreign Affairs in 1915, and was given a seat in the Cabinet in 1916, later representing Great Britain at the Peace Conference and doing a great deal to establish the League of Nations. He served in the Baldwin Government of 1924 until he resigned, as he thought its peace policy insufficient, and he again represented Britain at Geneva when Labour took office in 1929. (1864-).

Cecilia, St., a Roman virgin and martyr, A.D. 230, patron saint of music, especially church music, and reputed inventor of the organ; sometimes represented as holding a small organ, with her head turned heavenwards, as if listening to the music of the spheres, and sometimes as playing on an organ and with a heavenly expression of face. Festival, Nov. 22.

Cecrops, the mythical first king and civiliser of Attica and founder of Athens with its citadel, dedicated by him to Athena, whence the name of the city.

Cedar, a term used loosely for many kinds of fir trees. The true cedar or *cedrus* belongs to the order Coniferae, and is a handsome evergreen tree. There are 3 species: Cedar of Lebanon or *Cedrus Libani*, *Cedrus atlantica* (the Atlantic cedar) and *Cedrus Deodara* (the deodar).

Cedar Rapids, a manufacturing town in Iowa, U.S.A.; a great railway centre. Pop. 58,000.

Ceiling, the interior top surface of a room, over the floor, has attracted the decorator and artist from the earliest times. Egyptian and Roman ceilings were richly designed, and in the Italian Renaissance plaster ceilings reached a high pitch of originality and beauty. Early English ceilings were timbered. Moulding in the classical style later became popular, and the ceilings designed by Robert Adam are among the best English examples of the ornamented ceiling.

Celandine, the name given to 2 English wild flowering plants, viz., the Lesser Celandine, *Ranunculus Ficaria*, of the order Ranunculaceae, bearing small, bright yellow flowers in spring and the Greater Celandine, *Chelidonium Majus*, of the order Papaveraceae (Poppy order), also bearing yellow flowers.

Celebes, an island in the Dutch E. Indies, third in size, in the shape of a body with 4 long limbs, traversed by mountain chains; chief river, Sedang; very healthy climate; reptiles abound, but no large animals; it yields among its mineral products gold, copper, tin, etc.; and among its vegetable, tea, coffee, rice, sugar, pepper, etc.; cap. Macassar. Pop. 3,093,000.

Celery, a species, *Apium graveolens*, of edible plant of the order Umbelliferae. It is cultivated for eating with salads or as a cooked vegetable. The stems of the plant when about a foot high are blanched by being earthed up or tied round with brown paper. A special variety known as Celeriac (*Apium graveolens rapaceum*) is cultivated for the sake of its swollen root rather than its leaves.

Celestine, the name of five Popes: C. II., Pope from 1143 to 1144; C. III., Pope from 1191 to 1198; C. IV., Pope for 18 days in 1241; C. V., Pope in 1294, a hermit for 60 years; nearly 80 when elected against his wish; abdicated in five months; imprisoned by order of Boniface VIII.; d. 1296; canonised 1315.

Celestines, an order of monks founded by Celestine V. before he was elected Pope; they followed the rule of the Benedictine Order, and led a contemplative life.

Celibacy, the unmarried state. It has been much practised by religious communities. In the East Buddhist monks are celibate. In the Christian Church the Synod of Elvira, A.D. 305, disallowed marriage to the higher clergy, and in A.D. 385 celibacy was enjoined on all clergy. Opposition was strong until, at the Council of Trent (1545), it was laid down that the Roman Catholic priesthood should remain celibate as evidence of their faith.

Cell, in biology, the protoplasmic unit of which plant and animal bodies are composed. They are usually of microscopic size, but the egg of a bird is a single cell of comparatively huge dimensions. Most plant cells differ from animal cells in possessing surrounding walls of cellulose (q.v.), though even in plants the sexual cells are normally without a wall. In all cells the typical structure is a mass of relatively undifferentiated protoplasm known as the cytoplasm, in which is embedded a rounded body of denser protoplasm called the nucleus. The nucleus is the carrier of the hereditary characters, and appears to direct the living activities of the cell.

A cell often contains a space filled with an aqueous liquid (cell-sap), and sometimes this space or vacuole bursts to the exterior (e.g., in the minute one-celled animal *Amoeba*), re-forming in the same spot; it is then known as a contractile vacuule. The green colouring-matter of plants, chlorophyll (q.v.), is contained within the cell in special protoplasmic bodies called chloroplasts. New cells are formed from pre-existing ones by the process of cell-division (see Cytology), the nucleus generally dividing first; each daughter nucleus takes a proportionate part of the cytoplasm. In

GREATER
CELANDINE

both plants and animals various cells are modified to fulfil special functions, and frequently large numbers of cells of the same type are associated to form "tissues."

In the simplest forms of life, such as the Protozoa among animals, and the lower Algae among plants, the organism consists of a single cell and is described as unicellular. The higher organisms consist of assemblages of cells, and are thus multicellular. The plant cell was discovered by the English microscopist Hooke in the 17th Century.

Cell, Electrolytic. See *Electrolysis*.

Cell, Voltaic, a chemical device for obtaining a continuous direct current of electricity. The first electric battery was made by Alessandro Volta in 1800. It consisted of a pile of discs of silver, zinc and cloth dipped in salt water, arranged as follows: silver, zinc, cloth, silver, zinc, cloth, and so on, ending with the metals. When the top and bottom discs were connected by means of a wire, a current flowed through the wire; and the device became widely known as the "Voltaic pile." Volta's next battery, the "crown of cups," consisted of a series of cups each containing salt water into which dipped a plate of silver and a plate of zinc; the zinc of one cup was connected by a wire to the silver of the next, there thus being a free plate of silver in the cup at one end and a free plate of zinc in that at the other. These two plates formed the terminals of the battery, and a current would run through a wire connecting them.

The only type of voltaic cell now widely used is the Leclanché, in which the negative plate (or rod) is of zinc and the liquid is a solution of sal ammoniac (ammonium chloride). The positive plate is of carbon, and is placed inside a porous-pot set in the liquid, the space inside the pot not occupied by the carbon being packed with a mixture of gas carbon and manganese dioxide. When the cell is in action, zinc is slowly dissolved by the ammonium chloride, and ammonia and hydrogen are liberated on the carbon.

The hydrogen would soon stop the cell from working, owing to an effect known as polarisation, but it is mostly absorbed by the gas carbon, and afterwards slowly oxidised to water by the manganese dioxide; the cell will therefore recover if left to itself for a while before being used again, and Leclanché cells are very convenient for intermittent working—e.g., in telegraphy, for electric bells and in similar operations. They have a voltage of about 1.4.

The familiar dry cells are of the Leclanché type, but the zinc rod is replaced by a zinc case, which forms the negative part of the cell, the ammonium chloride is dissolved in a paste or jelly, and the whole is enclosed in a cardboard case, which usually contains 3 cells in series, giving a total voltage of rather more than 4. For the type of voltaic cell known as the storage cell or accumulator, see *Accumulators*.

Cellini, Benvenuto, a celebrated engraver, sculptor and goldsmith, a most versatile and erratic genius, born at Florence; had to leave Florence on account of a brawl he was involved in, and went to Rome; worked as a goldsmith there; patronised by the nobles; killed the Constable de Bourbon at the sack of the city, and for this received plenary indulgence from the Pope, Francis I. attracted him to his Court and kept him in his service five years, after which he returned to Florence and executed his famous bronze "Perseus with the Head of Medusa"; was a man of a quarrelsome temper, which involved him in no end of scrapes with sword as well as tongue; left an autobiography, from its self-dissection of the deepest interest to all students of human nature. (1500-1571).

Cellophane. See *Cellulose*.

Celluloid. See *Cellulose*.

Cellulose, a substance known chemically as a carbohydrate of the polysaccharide group, to which also belong starch glycogen (animal starch) and dextrin (gum); it has the empirical formula $C_6H_{10}O_5$, but its true formula, which remains unknown is certainly much more complex than this. Its name is derived from the fact that it is the typical constituent of the walls of plant cells, and the substance itself, in a more or less pure form, is familiar as paper, cotton-wool and linen; it may be distinguished from starch by the fact that the latter gives a blue colour with a solution of iodine, whereas cellulose gives only a brown coloration.

Cellulose will not dissolve in ordinary chemical reagents, but readily dissolves in a solution of copper sulphate to which excess of ammonia has been added (Schweizer's solution); from this solution it may be precipitated by the addition of acids, and can so be obtained in the form of glossy threads from which one kind of artificial silk (Rayon) is spun. With acids it yields derivatives called cellulose esters; the chief of these are cellulose trinitrate (nitrocellulose or "gun-cotton," made by treating cotton-wool with a mixture of concentrated nitric and sulphuric acids), and cellulose acetate, which is used in aeroplane dope and for a second form of rayon (acetate rayon).

Celluloid is a mixture of cellulose dinitrate (pyroxylin or collodion cotton) with camphor; since it can easily be moulded when warm, it finds many uses, but it suffers from the serious defect of being very inflammable. Cellophane is a tough, transparent, waterproof material made from viscose or cellulose sodium xanthate, which is itself prepared by treating cellulose (from spruce wood pulp) with caustic soda and carbon disulphide.

Celsius, Anders, a distinguished Swedish astronomer, born at Upsala, and professor of Astronomy there; inventor of the Centigrade scale for thermometers. (1701-1744).

Celt, the name of the stone (especially) and the bronze axe-heads used by the prehistoric peoples of Europe.

Celts. The W. of Europe was in prehistoric times subjected to two invasions of Aryan tribes, all of whom are now referred to as Celts. The earlier invaders were Goidels or Gaels; they conquered the Ivernian and Iberian peoples of ancient Gaul, Britain and Ireland; their successors, the Brythons or Britons, pouring from the E., drove them to the westernmost borders of these countries, and there compelled them to make common cause with the surviving Iberians in resistance; in the eastern parts of the conquered territories they formed the bulk of the population, in the W. they were in a dominant minority; study of languages in the British Isles leads to the conclusion that the Irish, Manx and Scottish Celts belonged chiefly to the earlier immigration, while the Welsh and Cornish represent the latter; the true Celtic type is tall, red or fair and blue-eyed, while the short, swarthy type, so long considered Celtic, is now held to represent the original Iberian races.

Cement, a name applied to a mixture at different temperatures, forming a material which, when applied in a wet state, unites other materials into a cohesive mass. The best known such mixture is Portland Cement, named from its resemblance in colour to Portland Stone, an English rock formation. It is made by burning a mixture, such as chalk and clay, until it becomes a clinker, when it is broken up and ground. Its binding

qualities are very strong. A good concrete is made from proportions of 1 : 3 : 5 of cement, sand and gravel, respectively.

Cementite, name given in the steel industry to one of the carbides of iron.

Cemetery, a burial-place, unattached to any church. By various Acts of Parliament dating from 1847 cemeteries belong either to a local authority or an incorporated company. The freehold of a grave cannot be sold.

Cenci, The, a Roman family celebrated for their crimes and misfortunes as well as their wealth. **Francesco Cenci** was twice married, had had twelve children by his first wife, whom he treated cruelly; after his second marriage cruelly ill-treated his first wife's children, but conceived a criminal passion for the youngest of them, a beautiful girl named **Beatrice**, whom he outraged, upon which, being unable to bring him to justice, she, along with her step-mother and a brother, hired two assassins to murder him; the crime was found out, and all three were beheaded (1599); this is the story on which Shelley founded his tragedy, but it is now in some points discredited.

Cenis, **Mont**, a mountain between the Graian and Cottian Alps, over which Napoleon constructed a pass 6,884 ft. high in 1802-1810, and through which (17 m. W. of the pass) a tunnel 7½ m. long passes from Modane to Bardonnèche, connecting France with Italy; the construction of this tunnel cost £3,000,000.

Cenotaph (lit. an "empty tomb"), the British national War Memorial "To Our Glorious Dead," in Whitehall, originally a temporary erection of wood built to the designs of Sir Edwin Lutyens for the 1919 Peace Procession, reconstructed in stone in 1920. Memorial services have been held regularly there on Armistice Day since the end of the Great War.

Censors, two magistrates of ancient Rome, who held office at first for five years and then eighteen months, and whose duty it was to keep a register of the citizens, guard the public morals, collect the public revenue, and superintend the public property.

Censorship of Plays, as now exercised in the Licensing Act of 1737. Though existing in some form for 2 centuries before, its importance was only realised after an attack on Sir Robert Walpole in a play written by Henry Fielding. The penalty of performing a play without official sanction was £50 each performance. Many Commissions have been appointed since the Act was passed to consider the strong claim made by dramatic authors for its abolition, but without success. At the present time the censor does his duties so successfully that the agitation for repeal has died down. The Official Censor is the Lord Chamberlain, who, in the case of dissatisfaction with the examiner's decision, can refer the play to a representative Committee for consideration and advice. The Theatres Act of 1843 laid down the conditions under which the Lord Chamberlain may refuse a licence. The fee for perusal of a play is not more than 2 guineas.

Census, a periodical numbering of the people, now held in Britain every ten years. The first in England was that of 1801.

Cent, **Centime**, the name of coins in use one hundredth part of the unit of coinage—e.g., the cent of U.S.A. and Canada is a bronze coin with a value of one hundredth of a dollar. The centime of France is one hundredth part of a franc.

Cental, 100 lb. weight avoirdupois, used as a corn measure. It has since been adopted in the U.S.A. and Canada.

Centaurea, a genus of plants of the natural order Compositæ embracing some 600 species, mostly found in the Mediterranean districts, though several are common to England—e.g., *C. nigra* (knapweed), *C. scabiosa* (scabious knapweed), *C. cyanus* (blue-bottle or cornflower). Annual and perennial species are cultivated.

Centaurs, a mythical race living between Pelion and Ossa, in Thessaly, and conceived of as half men and half horses, treated as embodying the relation between the spiritual and the animal in man and nature, in all of whom the animal prevails over the spiritual, except in Chiron, who therefore figures as the trainer of the heroes of Greece; in the mythology they figure as the progeny of Centaurus, son of Ixion and the cloud; some say their mothers were mares.

Centaury, the popular name for a species of herb (*Erythraea Centaurium*) of the order Gentianaceæ, common in England in dry and sandy soil. The flowers are rose or pink-coloured. Some species (there are 30 in all in the genus) are cultivated as rock plants.

CENTAURY

Centigrade Scale,

the thermometric scale having the freezing-point of water 0° and the boiling-point 100°. It is used for everyday purposes in most of the countries of the world except Germany and the English-speaking countries, and for scientific purposes everywhere. It was introduced by Celsius. To change a Centigrade reading to Fahrenheit multiply by nine, divide by five, and add thirty-two; to Réaumur, multiply by 4 and divide by 5.

Centipedes, a class of Arthropoda, at one time grouped with the millipedes among the myriopoda, but now treated as quite distinct. In some respects they resemble the insects. The peculiarities of the centipede are that they have a distinct head bearing antennæ, a body divided into a varying number of segments or somites, each somite having a pair of legs (the number of pairs varying from 15 to over 100, but always being an odd number). The generative organs open at the rear of the body, and not at the front, as in millipedes. The head bears a pair of killing organs with poison glands. Centipedes are carnivorous and hunt their prey (small insects, flies, etc.) by night. Two species are found in England, though they are small and innocuous. Some tropical American species attain a length of 6 or 8 or even 12 in., their bite being painful to human beings and, it has been claimed, fatal.

Central America. See **America**, **Central**.

Central Australia, a portion of Territory which under the Northern Australia Act of 1926 was divided into two parts, North and Central, respectively; separated by the 20th parallel of south latitude; it was administered by a Government Resident and an Advisory Council; the Act of 1926 was repealed in 1931. The whole of this part of Australia is now the Northern Territory, with Darwin as the headquarters of the Administrator and Alice Springs as that of the Deputy in the S.

Central Criminal Court, the principal criminal court in England and Wales, known as the Old Bailey, after the street in which it stands. Created by statute in 1834, replacing a much older court serving a smaller area, its jurisdiction extends over London, Middlesex and parts of Essex, Kent and Surrey, and British ships on the high seas. It is a court of Assize and part of the High Court of Justice.

Central Electricity Board, The, the body established in 1927 under the Electricity Supply Act to control the production and supply of electricity in Great Britain, to concentrate production in the most efficient stations, to build and operate the "Grid" scheme for transmitting power in bulk from the main generating stations to the subsidiary distributing stations, etc.

Central India, a district in India between Rajputana in the N. and Central Provinces in the S., which includes 23 salute states and 61 other small states, etc., in which the Government of India is represented at Indore by an Agent to the Governor-General and under him in Bundelkhand, Bhopal, and Malwa by a Political Agent. The chief states are Indore, Bhopal, Rewa. Area of the agency, 51,650 sq. m. Pop. 6,636,000.

Central Provinces and Berar, an autonomous province of India occupying the N. of the Deccan, and lying between the Narmada and the Godavari. Principal crops are cotton (grown in Berar); spinning and weaving are carried on at Nagpur), rice and wheat. There are cement factories, and coal and manganese mines. Cap. Nagpur. Pop. 13,900,000.

Centre Board, a movable keel used in particular on shallow-draught and flat-bottomed boats, a device whereby in deep water the stability of greater draught is gained, but in shallow waters when the centre board is raised the boat is enabled to pass over shoals, or even to take the bottom without heeling over.

Centre of Gravity, that point of which the resultant of the earth's attractive forces on all its particles passes. A body behaves as if its whole mass were concentrated at its centre of gravity.

Centrifugal Force, the force with which a body moving in a circle around another body tends to fly away at a tangent. According to a law of Newton's a body in motion when not moving under the compulsion of any force will continue to move in a straight line. The force applied to a body to make it continue to move in a circular path is the centripetal force, the equal and opposite force with which the body tends to fly off at a tangent the centrifugal force.

Centrifugal Machine, one which makes use of centrifugal force produced by rapid revolution; used in clothes-drying, separating sugar from molasses, for clarifying liquids, and in the mechanical cream separator.

Centurion, a Roman officer commanding 100 foot soldiers. A centurion was elected by vote, 60 centurions being elected by each legion. A legion consisted of 30 centuries or companies of 100 men, and two centuries were in command of each century. The first centurion elected belonged to the council of war.

Cephalonia, the largest of the Ionian Is., belonging to Greece, 30 m. long, the ancient Samos; yields grapes and olive oil. Capital Argostolion (pop. 8,000). Pop. 60,000.

Cephalopoda (Cephalopoda), the highest in organisation of

the Mollusca class of marine animals. They are invertebrate, and have their arms or tentacles attached to and springing from the head, a development which has occurred through the foot becoming amalgamated with the head and then growing round and encircling the mouth. They live on crustacea and small fish, and are themselves the prey of the whale and large marine carnivora. The class is divided into 2 orders: the Tetrabranchia, which includes all 4 known species of the Nautilus, and the Dibranchia, with its 2 sub-orders, the Decapoda (having 10 arms and including the cuttlefish and squid) and the Octopoda (having 8 arms, cf. the Octopus).

COMMON
CUTTLEFISH

Cepheids, a class of variable stars of average period 7 days, whose variation is not due to eclipse (see **Binary Stars** and **Algoi**). These pulsatory stars are generally found in clusters. No satisfactory explanation of the cause of their variation has been found, although their periods have been shown to depend upon their absolute brightness.

Ceram (Serang), the largest of S. Moluccas Is., one of the Dutch E. Indies, yields casia, which is the chief product and export. Area 6,800 sq. m. Pop. 98,000.

Ceramics, art, the study of pottery as an being here used to include articles made of porcelain, stoneware and china clay, as well as all other kinds of clay.

Cerastes, a genus of venomous serpents, found in Africa and India, including the *C. cornutus*, the horned viper, which has (at least in the male) a horn projecting over each eye, and *C. ripera*, which has no such horns.

Cerberus, the three-headed or three-throated monster that guarded the entrance to the nether world of Pluto according to Greek mythology; could be soothed by music, and tempted by honey; only Hercules overcame him by sheer strength, dragging him by neck and crop to the upper world.

Cerdic, first King of the West Saxons, and ancestor of kings of England, landed in Britain, probably at the mouth of the Itchen, in 495. He gradually made enough conquests to be able to call himself king, but was defeated (some say by Arthur) in the valley of the Frome in 520. Conquered the Isle of Wight, 530. (d. 534).

Cereals, a group-term for various grasses not necessarily sited botanically, but having in common the fact that the seeds have formed the staple food of man from earliest times. They include wheat, barley, oats, maize, rice and millet. Named after Ceres, Roman goddess of corn.

Cerebration, Unconscious, a working sphere without the person being aware of the activity of the organism. The theory endeavours to explain the fact that the mind, after once being set consciously on, for instance, a problem, may later present to the consciousness a suggested conclusion, even though the conscious mind has since ceased to dwell on that particular problem. The theory has been best expounded by Sir W. Hamilton and by Carpenter in *Mental Physiology*.

Cerebro-Spinal Fever, or **Spotted Fever**, disease of the brain, being an inflammation of

the covering membranes or meninges of the brain and spinal cord. It is due to a germ, and is highly contagious. It is liable to occur in epidemics. Children are the most frequent victims, though it can afflict people of any age.

Ceres, the Latin name for Demeter the asteroids, the first discovered by Piazzi in 1801.

Cerium, a chemical metallic element usually classified with the rare-earth metals (q.v.), but better placed with thorium in the fourth group of the periodic classification (see **Inorganic Chemistry**). Symbol Ce, atomic number 58, atomic weight 140.13.

Cerro de Pasco, a town in Peru, in the Andes, 14,200 ft. above the sea-level, with the richest silver mine in S. America and the largest and oldest copper mine of Peru. Gold and lead are also produced. Pop. 25,000.

Certiorari (law), a writ issued by a superior court directing an inferior court to transmit or "cause to be certified" (*certiorari facias*) all the records or other proceedings, with the object of reviewing the judgment of the lower court, or in order that the whole cause may be tried by the higher tribunal. Such a writ is most used when a lower court has acted beyond its powers, or where a member of the lower court acts under bias (usually pecuniary.)

Cervantes-Saavedra, Miguel de, the author of *Don Quixote*, born at Alcalá de Henares; was distinguished in arms before he became distinguished in letters; fought in the battle of Lepanto, and bore away with him as a "maimed soldier" marks of his share in the struggle; sent on a risky embassy, was captured by pirates and remained in their hands five years; was ransomed by his family at a cost which beggared them, and it was only when his career as a soldier closed that he devoted himself to literature; began as a dramatist before he devoted himself to prose romance; wrote no fewer than 30 dramas; the first part of the work which has immortalised his name appeared in 1605, and the second in 1615; it took the world by storm, was translated into all the languages of Europe, but the fortune which was extended to his book did not extend to himself, for he died poor some ten days before his great contemporary, William Shakespeare; though carelessly written, *Don Quixote* is one of the few books of all time, and is as fresh to-day as when it was first written. (1547-1616).

Cervin, Mont, the French name for the Matterhorn (q.v.).

Cesarewitch, the eldest son and heir before the Revolution. Also a handicap horse race run in the late autumn at Newmarket, so named after Alexander II., who visited England in 1839 when he was Cesarewitch.

Cessnock, a town of New South Wales, Australia, on the edge of Newcastle coal-field. Pop. 14,000.

Cestodes, tapeworms, animals with no intestinal cavity. The body is flat and resembles a ribbon. They have a head, but no mouth, liquid food being assimilated by absorption through the body. Many have hundreds of segments attached to the head, which are continually being formed throughout its life. These segments are hermaphroditic, and may be male or female in the same body, the end being usually crowded with eggs. The worm is usually a parasite of a vertebrate, but seldom dangerous.

Cestus, a girdle worn by Greek and Roman women, especially the girdle of Aphrodite, so emblazoned with symbols of the joys of love that no susceptible

soul could resist the power of it; it was borrowed by Hera to captivate Zeus.

Cetacea, an order of sea-animals, vertebrates, brates and mammiferous. They breathe through their lungs, and rise to exhale and inhale every few minutes, although they can sink to a great depth. They are warm-blooded. Their fore-limbs are modified into paddles to aid swimming. They have no hind-limbs, but the tail is modified into a horizontal fin with flukes. They usually bring forth one at a birth, and always suckle their young. The order is divided into 2 sub-orders: the *Mystacoceti* or Whalebone whales, which are toothless, but have whalebone or "baleen" in the upper jaw (including Right Whales and Boreals), and the *Odonoceti* or Toothed Whales, which include the Sperm Whale or Cachalot, Bottle-nosed Whale, Dolphins, Porpoises, Narwhal and Grampus or Killer.

Cetatea Alba (formerly Akkerman), a fortified town in Bessarabia, Rumania, at the mouth of the Danister. Chief industry fruit growing. Pop. 40,400.

Cetinje (*Cetynye*), the former capital of Montenegro, in a valley 2,000 ft. high; now capital of the territorial division of Zetska in Yugoslavia. Pop. 5,000.

Cetiosaurus, a species of dinosaur of the sub-order Sauro-

poda (i.e., reptile-footed). Remains of this reptile have been found in the Jurassic and Wealden rocks of England. It was a herbivorous quadruped with small five-toed feet and a long, whip-like tail, and probably lived largely in water. They may have reached a total length of as much as 60 ft. and stood 10 ft. or more high at the hip.

CETIOSAURUS

Cette, a French seaport, trading and manufacturing town on a tongue of land between the lagoon of Thau and the Mediterranean, 18 m. SW. of Montpellier, with a large, safe harbourage. Has an important fishing industry. Pop. 35,000.

Cetywayo, King of the Zulus, son of King Panda. In 1856 he defeated and slew his brother Umbulazi. On Panda's death in 1872, he was acknowledged king by the Natal Government, on conditions. On British annexation of the Transvaal in 1877, he was sent an ultimatum by Sir Bartle Frere demanding disbandment of regiments, etc., which he ignored. An expedition against him routed his forces at Ulundi after initial reverses at Isandhlwana and Rorke's Drift. He was captured and brought to England in 1882. Restored 1883, he was driven out by an old enemy, Ushobu. Died at Ekowe native reserve. (c. 1836-1884).

Ceuta, a Spanish port on the coast of Morocco, opposite Gibraltar, and guarded by a fort on one of the Pillars of Hercules, overlooking it; of importance as a military station. Pop. 38,000.

Cévennes, a range of low mountains on the eastern edge of the central plateau of France, separating the basin of the Rhône from those of the Loire and Garonne; average height from 3,000 to 4,000 ft.; the chief scene of the dragonnades against the Huguenots under Louis XIV.

Ceylon, the ancient Taprobane, a pear-shaped island about the size of Scotland, separated from India, to which it geographically belongs, and SE. of which it lies, by Palk Strait, 32 m. broad; comprises a lofty, central tableland with numerous peaks, the highest Piduru Talagala or Pedro-

tallagalla, 8,000 ft., and a broad border of well-watered plains. It was an ancient centre of civilisation.

The soil is everywhere fertile. The climate is hot, but more equable than on the mainland. The chief products are paddy, tea, cacao, cinnamon, tobacco, coconuts and rubber. The forests yield satin-wood, ebony, etc. There are extensive deposits of plumbago. Precious stones, sapphires, rubies, amethysts, etc., are in considerable quantities. The pearl fisheries are a valuable government monopoly. Malaria is endemic, and there was a serious outbreak in 1931-1935. The chief exports are tea, rubber, coal, copra, coconut oil and plumbago. Two-thirds of the people are Sinhalese and Buddhists.

Under its new constitution the island is almost self-governing. The government is administered by a British Governor aided by a State Council of 50 elected members, 3 ex-officio members, who are called Officers of State, and are British, and 8 nominated members. The State Council has administrative as well as legislative functions. The Governor has the power of "certification" over laws or ordinances. In the 16th Century the Portuguese settled in the S. and W., but were dispossessed by the Dutch, who, in 1796, were in their turn driven out by the British, but it was not until the last Kandyan king was captured that the whole island came under British rule. The capital and chief port is Colombo. Area 25,300 sq. in. Pop. 5,312,000.

Cézanne, Paul, French painter. One of the pioneers of Impressionism, his work was for long rejected by the Salon, though his pictures are to be found in the Louvre. Landscapes and flowers were his forte. (1839-1906).

Chablais, a town of France in the dept. of Yonne, giving name to a popular white wine.

Chacma, the *Papio porcarius*, a species of baboon found in S. Africa, a vegetarian feeder, blackish grey in colour, and gregarious in habit.

Chaco, El, a territory in S. America, part of the Gran Chaco falling in Paraguay, Bolivia and Argentina, the scene of fighting from July 1932 to Jan. 1936 between Bolivia and Paraguay in a boundary dispute.

Chad, a shallow lake in the Sahara between Nigeria, French W. Africa, and French Equatorial Africa, of varying extent, according as the season is dry or rainy; at its largest covering an area as large as England and abounding in hippopotamuses, rhinoceroses, etc., as well as waterfowl and fish.

Chadderton, a town of Lancashire, England, suburb of Oldham, with coal-mines near and cotton industries. Pop. 28,000.

Chadwick, Sir Edwin, an English social reformer, born in Manchester, associated with measures bearing upon sanitation and the improvement of the poor-laws, and connected with the administration of them. (1801-1890).

Chadwick, Prof. James, English scientist, educated at Manchester Secondary School and at Manchester, Berlin and Cambridge Universities. Assistant director of radio-active research at the Cavendish laboratory, and a Fellow of Gonville and Caius College, he collaborated for some years with Lord Rutherford (q.v.) at Cambridge University. Distinguished in atomic theory. Awarded Hughes medal of the Royal Society and, in 1935, the Nobel Prize for Physics. (1891-).

Chæroneia, a town in Boeotia, where defeated the Athenians and Thebans 338 B.C. and Sulla defeated Mithridates 86 B.C. The

birthplace of Plutarch, who is hence called Chæronean Sage.

Chaffinch, *Fringilla Coelebs*, a song-bird of Europe. Male has black forehead, bluish head, green rump, ruddy breast, white belly, black wings with white bands, and black tail. Female less brightly coloured, with greyish white underparts, lacks red breast. In autumn sexes segregate and migration towards the S. to a certain extent takes place.

CHAFFINCH

Chain, a measure used by surveyors being equal to 100 links, each link being equal to 7.92 in. 80 Chains equal 1 mile.

Chain, **Chain Cables**, are a series of metal rings or links, connected with one another, and forming a flexible cable. Welded chains made from rolled bar iron are stronger, and will bear a more severe strain than machine-made knotted or stamped chains. Chains are usually open-linked or bar- (stud-) linked; in the latter case each link has a transverse bar to strengthen it. Such links are generally used in the making of chain cables to hold ships' anchors.

Chained Books, books in libraries, dating from 15th Century, open to public reading, but chained to the shelves or to iron rods to avoid theft. Chains were long enough to reach to a reading-desk; or the book might be chained to the desk. A chained library still exists in All Saints' Church, Hereford, dating from 1700, but the practice of chaining books did not long survive that date.

Chain-mail, cuirass, made of rings closely linked together. It came into use in Europe in the 12th Century, but was also known in the East. Its advantage was that it could be worn concealed beneath ordinary clothes.

Chain Shot, a projectile consisting of two balls or half-balls joined together by a chain, formerly employed in naval warfare to destroy the masts and rigging of ships. Also sometimes used in land battles.

Chair, a movable seat with a back-rest, generally intended for one person. They have been in use from very early times, and have often been of great splendour and highly ornamented with carving. They are generally made of wood, sometimes of metal, cf. especially the modern tubular designs.

Chairman, a person presiding over an assembly, public meeting, etc. His duty is to conduct the proceedings in an orderly and judicial manner, and to see that the objects of the meeting are carried out. He is a person exercising great authority, as a rule, in the management of companies, corporate bodies, etc. The Lord Chancellor is chairman of the House of Lords as the Speaker is of the House of Commons. The Chairman of Committees of the House of Commons takes the chair when the House is in committee and the Speaker "vacates the chair." It is an office carrying a salary of £2,500 per annum.

Chaise (the French word for "chair"), was the name given in the 18th Century to a light, one-horse vehicle which was made on either two or four wheels. As in the sedan, the occupant was able to lift off the top of the carriage or "calash" if he wished. The post-chaise was a fast, closed, four-wheeled vehicle of the 18th and 19th centuries drawn by 2 or 4 horses.

Chalcedon, a city of Bithynia, at the entrance of the Thracian Bosphorus, where the fourth Council of the Church was held in 451, which defined the orthodox conception of Christ as God-man.

Chalcedony, a rock found in the form of concentric layers of silica, often of different colours. The centre is sometimes hollow and contains a drop of water and an air bubble. They have been formed by deposition in the cavities of rocks by percolating water.

Chalcidice, the three-fingered peninsula of the Balkan territory stretching into the Ægean Sea.

Chaldea, ancient name for Babylonia.

Chalet, the name of the timber-built houses found in the Swiss, Bavarian and French Alps and in the Tyrol, picturesque buildings of a log-cabin type.

Chalfont St. Giles, a village of Bucks. SE. of Amersham. Here is the cottage in which Milton lived during the Great Plague and where he wrote some of his best poetry. Pop. 2,000.

Chalgrove, a village of Oxfordshire, England, the scene of a clash in 1643 during the Civil War in which Hampden was killed while trying to cut off a troop of Prince Rupert's horse.

Chaliapin, Feodor Ivanovitch, one of the greatest Russian operatic artists of his time. He was a shoemaker before obtaining work as a singer in a local opera company at the age of 17. At 23 he appeared at Mamontoff's private theatre at Moscow, and later at the opera houses of the capitals of Europe. In 1932 he appeared in a film, *Don Quixote*, and published 2 books, *Pages from My Life*, and *Man and Mask*. (1873-1938).

Chalice, the sacred vessel used in the Christian Church in the celebration of Holy Communion.

In the early churches the large two-handled bowl was used, of which no examples survive. Early examples were also of glass, horn, wood, etc., whereas the chalice used in the English Church today must be of gold, silver or silver-gilt, and must be consecrated by a bishop.

Chalk, a white or greyish soft rock consisting almost entirely of carbonate of lime (calcium carbonate). It is composed of the crushed shells and calcareous remains of minute sea animalcules. Silica is always present, and flints are frequently found embedded in it. It is common to the S. of England and N. France, and there are large chalk beds under London. It has many commercial uses, and is sold under the names of Whiting, Paris White, etc.

Challenger Expedition, a scientific expedition sent out by the British Government in the *Challenger* in 1872 in the interest of science, and under the management of scientific experts, to various stations over the globe, to explore the ocean, and ascertain all manner of facts regarding their physical and biological conditions, an expedition which concluded its operations in 1876, of which as many as 50 volumes of reports have been compiled.

Chalmers, James, Scottish missionary to Tonga and New Guinea, in the latter island contributing greatly to the establishment of the British protectorate; killed by cannibals. (1841-1901).

Chalmers, Thomas, a celebrated Scottish ecclesiastical and pulpit orator, born at Anstruther, Fife; in 1823, he

became professor of Moral Philosophy at St. Andrew's and, in 1828, of Divinity in Edinburgh; he was not much of a scholar or even a theologian, but a great man, and a great force in the religious life of his country. He was distinguished for his practical sagacity, and was an expert at organisation. In 1843 he led a body of 470 clergy who left the Church in search of independence from civil authority and founded the Free Church of Scotland, he himself becoming principal of the Free Church College. (1780-1847).

Châlons-sur-Marne, capital of the French dept. of Marne, 100 m. N. of Paris, where Attila was defeated by the Romans and Goths in 451; Napoleon III. formed a camp near it for the training of troops. Fell to the Germans in Aug. 1914, but retaken by Foch in September of that year. Pop. 31,000.

Chalybeate Springs, mineral waters impregnated with iron salts, chiefly the carbonate or the sulphate. They exist in many parts of the world, and are found in England at Harrogate and Leamington. They have medicinal value.

Chamberlain, an official in the court of a monarch or nobleman having nominally the charge of domestic affairs, an ancient office, and one of the highest importance in England from the 13th Century onwards, taking a great share in the government of the country. The office of Lord Chamberlain remains in the King's Household. Though it is of diminished importance, the holder is still responsible for the licensing of theatres in towns with a royal palace and for licensing plays for performance. He also controls all the officers and servants of the King's Household. The Lord Great Chamberlain's office is a sinecure office granted by Henry I. to the De Vere, Earls of Oxford, and hereditary since. The duties are chiefly concerned with coronation ceremonies, the care of the royal palaces at Westminster, including authority, during recesses, of the Parliament buildings.

Chamberlain, Rt. Hon. Arthur Neville, British politician. Second son of Joseph Chamberlain, he spent his early life in municipal politics in Birmingham, where he was Lord Mayor. In 1922 he became Postmaster-General under Bonar Law, was Minister of Health in 1923, and succeeded Baldwin as Chancellor of the Exchequer the same year. In Baldwin's second Government of 1924-1929 he was Minister of Health and fostered the Denning Bill. In the National Government of 1931 he again became Chancellor of the Exchequer, and held the post until 1937, when he became Prime Minister on the resignation of Mr. Baldwin. He has since taken a large personal share in the negotiations which resulted in the Anglo-Eire Treaty and the Anglo-Italian settlement. As Chancellor he introduced the conservative tariff legislation. In Sept. 1938 he went twice to Germany to seek with Hitler a peaceful solution of the Sudeten German problem in Czechoslovakia, and in addition secured Hitler's signature at Munich to a "peace pact." (1869-).

Chamberlain, Houston Stewart, author, born at Southsea, Hampshire, lecturer at Vienna University and naturalised German in 1914; one of the people who, following Gobineau, developed the Nordic theories which are the basis of Nazi Aryan philosophy. (1855-1927).

Chamberlain, Rt. Hon. Joseph, born in London, connected as a business man with Birmingham; after serving the latter city in a municipal capacity, was elected the parliamentary representative in 1878; became President of the Board of

CHALICE

Trade under Mr. Gladstone in 1880, and chief promoter of the Bankruptcy Bill; broke with Mr. Gladstone on his Home Rule measure for Ireland, and joined the Liberal-Unionists; distinguished himself under Lord Salisbury as Colonial Secretary, during which period of his career occurred the South African War and the passing of the Australian Commonwealth Act (1895-1902). It was he who raised the tariff reform issue in 1905 which led to the defeat of the Conservative Party. (1836-1914).

Chamberlain, Rt. Hon. Sir Joseph, British politician. Elder son of Joseph Chamberlain, he entered Parliament as a Liberal-Unionist in 1892, and became a Lord of the Admiralty three years later, being made Chancellor of the Exchequer in 1903. On the fall of the Unionists in 1905 he remained out of office till 1915, when he joined the Coalition Government as Secretary for India. In 1919 he was again Chancellor of the Exchequer; from 1921 to the fall of the Coalition he was leader of the House; and in 1924 he joined Baldwin's Government as Foreign Secretary, holding the post till the Government fell in 1929; signed Locarno Treaty and Kellogg Pact, in 1925 and 1928 respectively. (1863-1937).

Chamber of Commerce, a n Association composed of merchants and other business people to promote the interests of trade and commerce. The earliest is said to have been founded in the 14th Century at Marseilles. To-day most cities and towns of any size possess Chambers of Commerce which are attached to a Central Association. There are British Chambers of Commerce in foreign countries, and foreign Chambers in Great Britain. In 1856 a Congress of British Chambers at home and abroad was held. This has since become a permanent body, known as the Federation of Chambers of Commerce. It is able to get an exchange of views, and thus initiate a common policy which can be used to guide the Government on all matters affecting trade.

Chamber of Deputies, a French legislative assembly, elected now by universal manhood suffrage. It is the lower of the two French assemblies, the other being the Senate, and is at present composed of 618 deputies.

Chambers, Sir Edmund Kirkever, English literary critic and distinguished Shakespearean scholar; born in Berkshire, educated at Marlborough and Corpus Christi College, Fellow of Worcester College, Oxford; author of *The Medieval Stage*, *The Elizabethan Stage*, etc. (1866-).

Chambers, Robert, brother of the preceding, and in the same line of life, but of superior accomplishments, especially literary and scientific; was the author of a great many works of a historical, biographical and scientific, as well as literary interest; wrote the *Vestiges of the Natural History of Creation*, a book on evolutionary lines which made no small stir at the time of publication, 1844. (1802-1871).

Chambers, William, born at Peebles; apprenticed to a bookseller in Edinburgh, and commenced business on his own account in a small way; edited with his brother the *Gazetteer of Scotland*; started, in 1832, *Chambers's Edinburgh Journal* to meet a demand of the time for popular instruction; in company with his brother founded a printing and publishing establishment. (1800-1853).

Chambéry, cap. of the dept. of Savoie, France, in a beautiful district; is the ancient capital, and contains the castle of the Dukes of Savoie; manufactures silk, leather, lace, soap; is a summer resort. Pop. 23,000.

Chambord, spacious chateau in the dept. of Loir-et-Cher, France, built by Francis I.; after being long a residence for royalty and people of distinction, was presented in 1821 to the Duc de Bordeaux, the Comte de Chambord.

Chambord, Comte de, Duc de Bordeaux, son of the Duc de Berri and grandson of Charles X., born in Paris; exiled in 1830, he sought refuge in England with his grandfather; the monarchical party resolved to attempt a restoration in his behalf in 1871, but he refused to adopt the tricolour flag of the Revolution, and the scheme was abandoned. (1820-1883).

Chambre Ardente, a name given justice established in France for the trial of the Huguenots in 1555. They were held at night, and even when in the daytime, with lighted torches.

Chameleon, a division of the Lacertilia (lizard) sub-order of

reptiles, differing from the true lizards in having a very long, cylindrical, club-headed tongue, a crested head, very large eyes covered with a thick lid in which there is only

CHAMELEON

a small opening for the pupil, eyes that will focus independently of each other, 2 toes of each foot opposed to the other 3, thus enabling a good grip to be secured, and a very long, prehensile tail. There are several species, most being found in Africa or Madagascar, but the common chameleon is found in Europe, in Spain, and other species in India and Arabia.

Chamisso, Adelbert von, a German naturalist and litterateur, born in France, but educated in Berlin; is famous for his poetical productions, but specially as the author of *Peter Schlemihl*, the man who sold his shadow to the devil, which has been translated into nearly every European language; he wrote several works on natural history. (1781-1838).

Chamois (*Rupicapra tragus*), a species of ruminant intermediate between the goat and antelope, of the size of a goat which it resembles. It is found in herds in the Alps, Pyrenees, and Carpathian Mountains. The short horns curve backwards. The coat is red in summer, dark brown in winter; a dark band reaches from mouth to the eyes. It is extremely fleet and agile. The skin is prepared as *chamois leather*.

Chamouni (or *Chamonix*), a village in the dept. of Haute-Savoie, France, 40 m. SE. of Geneva, in a valley forming the upper basin of the Arve, famous for its beauty and for its glaciers; it is from this point that the ascent of Mont Blanc is usually made.

Champagne, an ancient province of France, 180 m. long by 150 m. broad, and including the depts. of Aube, Haute-Marne, Marne and Ardennes. In 1284 Joan of Navarre who had succeeded her father Henry III. King of Navarre and Count of Champagne, married the heir-presumptive to the French throne. The province became finally attached to the crown in 1314.

Champagne Wines, sparkling in the old French province of Champagne situated in the NE. of France. The wine is bottled before fermentation is completed, and so retains the carbon dioxide gas which would escape were it left in a cask. There are "dry" and "sweet" champagnes, the difference being represented by the amount of sweet liqueur mixed with the wine.

Champ-de-Mars, a large piece of ground in Paris, between the front of the Ecole Militaire and the left bank of the Seine; the scene of the Fête on 14 July 1790.

Champerty, a bargain entered into by a lawyer and an individual who has no legal interest in the suit, but who consents to finance the action in consideration of sharing the resultant profits, if any. It is an offence against the law.

Champion, a defender of any cause; representative of others to fight on their behalf; a person capable of defeating his competitors in any form of sport; generally, a leader in games of skill and strength. In the olden times, when judicial combats were fought, he acted as a substitute for one unable to bear arms. At the coronation of British Kings it is the duty of the King's Champion to challenge any person denying the King's title to the Sovereignty. The Dymoke family have had this right since the coronation of Richard II. and last exercised it at the coronation of George IV. at Westminster Hall.

Champlain, a beautiful lake between the States of New York and Vermont; it is 110 m. in length, and from 1 m. at its S. end to 14 m. at its N. end broad.

Champlain, Samuel de, the "Father of New France," a French navigator, born at Brouage in Saintonge, was founder of Quebec, and French Governor of Canada; in 1620 he constructed Fort St. Louis. In 1629 Quebec was attacked by the English under David Kirke who compelled Champlain to surrender; he wrote an account of his voyages. (1567-1635).

Champs-Élysées, a Parisian promenade between the Place de la Concorde and the Arc de Triomphe.

Chanak, a town of the sanjak of Biglia, Asia Minor, on the Dardanelles. It was unsuccessfully attacked by the Allied fleet in March 1915, and was occupied in 1922 by the British to check the advance of the Kemalist forces, the incident nearly resulting in war, a catastrophe prevented by the tact of Sir Charles Harcourt, who commanded the troops.

Chance-, or **Chaud-Medley**. In law, chance-medley is the killing of another in an affray in self-defence. Chaud-medley is the killing of a person in the heat of passion.

Chancel, the E. part of a church, generally separated from the nave by a screen. It originated from the division in medieval monastic churches when the lay congregation was entirely shut off by the screen. The chancel now generally contains the altar, communion table, choir-stalls and minister's pew.

Chancellor, a title of an official, derived from that of a petty officer in the courts of ancient Rome. The office increased in importance, and eventually became endowed with judicial functions. The officer did secretarial and notarial work, and prepared and sealed any important documents.

In England, Edward the Confessor was the first King to seal documents, and his Ecclesiastical Chancellor was Secretary and Keeper of the Seals. The judicial duties of the Chancellor continued to grow in importance. Eventually he had his own court, and all petitions came to him direct. In the 22nd year of Edward III.'s reign other matters were definitely assigned to his court, and, in fact, he succeeded the Justiciar as the principal legal and political officer in the kingdom.

When Parliament developed and Ministers attended as Ministers of the House of Lords,

the Chancellor became the Speaker or Prolocutor. There were lay as well as clerical Chancellors. If not a peer the Chancellor's rights were simply those of his office, but from 1706 all Chancellors have been peers, and the title of Lord High Chancellor was conferred on the office. No Roman Catholic can be Lord Chancellor. The Chancellor of the Exchequer is the chief finance minister of the Government and the Chancellor of the Duchy of Lancaster manages its revenues for the Crown. The Chancellors of Oxford and Cambridge and other universities are the elected titular heads of their respective universities.

Chancellor, Richard, an English sea-
man, who, voyaging in northern parts, arrived in the White Sea, and travelled to Moscow, where he concluded a commercial treaty with Russia on behalf of an English company; wrote an interesting account of his visit; after a second voyage, in which he visited Moscow, was lost by shipwreck off Aberdeenshire in 1556.

Chancellor of the Exchequer, the member of the Cabinet in charge of the nation's finances, to whom is entrusted the task of introducing an annual budget. The office dates from 1221 when it was but a minor one. His judicial functions were taken away by the Judicature Act 1873. He is always a member of the lower house.

Chancellorsville, a village of Virginia, U.S.A., the scene of a battle in the American Civil War in 1863, in which Gen. "Stonewall" Jackson was killed.

Chancery, Court of, the name given before the Judicature Act, 1873, to the court which administered equity suits. Its early history is intimately connected with the royal Council, and it sprang from the Concilium Ordinarium exercising its functions as a Court of Appeal and Equity. Since the fusion of common law and equity in 1873, its place has been taken by the Chancery Division of the High Court, to which are usually assigned suits concerning estates of deceased persons, company liquidations, construction of wills and partnerships.

Chanctonbury Ring, a hill of the South Downs, in Sussex, England, above Steyning. The tree-capped summit (814 ft.) is occupied by prehistoric earthworks and a dewpond.

Chandelier, a frame of wood, metal the ceiling of a room, and originally used as a candle-holder, but in modern times as a support for gas or electric-light fittings. They have in the past been very elaborate and highly ornate.

Chandernagore, a small town and territory in India, on the Hooghly, 22 m. N. of Calcutta, belonging to France. Pop. 28,800.

Chandos, John, a celebrated English general in the 14th Century; was present at Crécy, governor of English provinces in France ceded by Treaty of Bretigny; defeated and took prisoner Du Guesclin of Auray; served under the Black Prince, and was killed near Poitiers, 1370.

Chandragupta, son of a King of Magadha, a humble woman; was driven into exile by the King of Magadha, but having conquered the Punjab on the death of Alexander the Great, defeated and killed his kinsman, the reigning King of Magadha, and established the Maurya empire in India, he himself becoming the first

CHANDELIER

Emperor of India, reigning some time in the 4th Century B.C.

Changsha, a town of China, capital of the province of Hunan, a treaty port, with famous antimony works. Pop. 607,000.

Chang-Tso-Lin, Chinese marshal; from leader of bandits who helped the Japanese in their war against Russia, rose to be general of a division. He suppressed republicanism in Mukden 1911-1912, and remained as military governor of S. Manchuria. The rest of Manchuria came under his sway after defeat of Manchuria restoration in 1917. In 1927 he was installed in Peking as generalissimo of the Chinese Republic. On approach of the southern army in 1928 he left for Mukden; his train was bombed, and he received fatal injuries. (c. 1873-1928).

Channel, English, an arm of the Atlantic between France and England, 280 m. long and 100 m. wide at the mouth; the French call it *La Manche* (the sleeve).

Channel Ferries have been in operation for years; among others there is that from Copenhagen to Malmö, 19 m.; another is from Warnemünde to Gdynia, 26 m.; there is one across Chesapeake Bay of 36 m.; during the Great War a regular train ferry service for military purposes was run by the Inland Waterways Section of the Royal Engineers from Hichborough to Dunkirk, 54 m., and Calais, 35 m.; and the same corps also ran another ferry from Southampton to Dunkirk, 130 m., and afterwards from Southampton to Calais, but in each case Dunkirk had to be abandoned as being too exposed to enemy action. The ferry, with the boats used at Hichborough and Southampton, is now in operation between Harwich and Zeebrugge.

Channel Islands, a group of small islands off the NW. coast of France, of which the largest are Jersey, Guernsey, Alderney and Sark; formerly part of the Duchy of Normandy, and now all that remains to Britain of her French dominions, being subject to her since 1066. They have a delightful climate, mild and bright, and varied and beautiful scenery; the soil is fertile; flowers and fruit are grown for export to Britain, also early potatoes for the London market; Guernsey pears and Jersey cows are famous; valuable quarries of granite are wrought; the language is Norman-French. Pop. 93,200.

Channel Swimming. The English Channel was first swum from England to France in Aug. 1875 by Capt. Matthew Webb, who took 21 hrs. 45 mins. It was not till 1911 that the feat was repeated, and not till 1923 that Webb's time was beaten, by S. Trabucchi, who swam from France to England in 16 hrs. 33 mins., the first crossing from France. Gertrude Ederle, of America, was the first woman to accomplish the swim, in 1926. Many have since achieved the feat, including E. H. Tenme (13 hrs. 54 mins.) in 1934 and Hayden Taylor (14 hrs. 48 mins.) in 1935. The fastest time is 11 hrs. 5 mins. by Georges Michel in 1926.

Channel Tunnel. The possibilities of a tunnel under the English Channel have been discussed for well over half a century. Hitherto, the opposition of the military authorities in England has been too strong. A Select Committee of the House of Commons has rejected the proposal, and in 1924 the Prime Minister, Mr. Ramsey MacDonald, and five ex-Prime Ministers in consultation decided against the project. The length of the tunnel would be about 30 m. and the cost is estimated at £30,000,000. It had the approval of the French Government.

Chansons de Gestes (i.e., Songs of Deeds), poems of a narrative kind much in favour in the Middle Ages, relating in a legendary style the history and exploits of some famous hero, such as the *Chanson de Roland*, ascribed to Théroutle, a trouvère of the 11th Century.

Chantilly, town of France, in the dept. of Oise. It has a famous race-course, and three châteaux in a park. It was the French Army headquarters, 1914-1918. Pop. 6,000.

Chantrey, Sir Francis, an English sculptor, born in Derbyshire; was apprenticed to a carver and glider in Sheffield; executed four colossal busts of admirals for Greenwich Hospital; being expert at portraiture, his busts were likenesses; executed busts of many of the most illustrious men of the time, among them of Sir Walter Scott, Wordsworth, Southey and Wellington, as well as of royal heads; made a large fortune, and left it (the Chantrey Bequest) for the encouragement of art. (1781-1843).

Chantry, a small private chapel, part of or adjoining a catholic cathedral or church, endowed by a person for the singing of masses to his soul after death.

Chanty, a sea-song (probably derived from *chanter*, 2nd person plural imperative of the French verb, *chanter*, to sing). Sailor's chants were sung on board ship, the rhythm of the song giving time to such nautical labours as the hauling of ropes.

Chapbooks, a cheap issue of pamphlets in the early part of the 17th Century, containing popular romances and legends or devoted to astrology, palmistry and the interpretation of dreams; similar publications appeared in France and Germany.

Chapel, a separate building or part of a large building such as a cathedral or abbey, dedicated often to some particular sacred purpose. It may be consecrated to a saint or to the memory of a person buried in the chapel. In a cathedral the Lady-Chapel is set apart for devotion to the Virgin Mary. When designed for purposes of general worship, a chapel differs from a church in that its foundation is more private in origin. A place of worship built for the devotion of a family and built on the estate is called a chapel. Similarly, a community such as a college, school or guild, may have a chapel for the devotions of its members. A nonconformist place of worship is also called a chapel.

Chapel-en-le-Frith, market town of Derbyshire, England, in the Peak District. Industries include coal-mining and paper-making. Pop. 5,000.

Chapel-Royal, a clerical body formed for the purpose of conducting religious services for the King of England. The foundation dates back at least to the 15th Century, probably much earlier. It consists of 60 clergymen, including a dean. Its services are now held at St. James's Palace in London.

Chaplain, a clergyman attached to the household of a Sovereign or nobleman, bishop, or any person of distinction, possessing a private chapel. The ordinary chaplain has no parochial duties, but a bishop may appoint a beneficed clergyman as his examining chaplain. The British Sovereign has 36 "Chaplains in Ordinary" in England and some in Scotland. There are chaplains in the Indian Civil Service, and attached to workhouse and prisons. In the Army about 100 chaplains hold commissions under a Chaplain-General. Every large ship in the Navy has a chaplain.

Chaplin, Charles, film comedian. Born in London, he emigrated to America, and after a time on the stage took to film work in the early days of the art. His

comic genius gave the cinema its first wide appeal, and earned him a fortune. His film *Modern Times* was shown in London in 1936. (1889-).

Chapman, Arthur Percy Frank, English cricketer, born at Reading: captained Uppingham School team; played for Cambridge University, Lords, 1920. Played for Berkshire. Toured Australia with MacLaren and with Gilligan. From 1925 played for Kent. Captained England at Oval, 1926, when Australia was beaten; led successful Australian tour, 1928-1929. Captained England in preliminary matches, 1930, with mixed result, and captained M.C.C. team to South Africa in autumn. Captain, Kent, 1933. He is a good left-handed batsman, but best as fielder. (1904-).

Chapman, George, English dramatic poet, born at Hitchin, Hertfordshire: wrote numerous plays, both in tragedy and comedy, as well as poems, of unequal merit, but his great achievement is his translation into verse of the works of Homer, which, though not always true to the letter, is instinct with somewhat of the freshness and fire of the original. He was a contemporary of Shakespeare. (1559-1634).

Chapter, an ecclesiastical term applied to the bishop's council in each diocese. Under the presidency of the dean, it consists of the canons attached to a cathedral or collegiate church.

Chapter-House, the meeting-place of the chapter. Some are square or oblong as at Canterbury and Exeter, but most are polygonal, e.g., Lincoln (decagonal), Salisbury (octagonal), etc.

Char (or Charr), a genus of fish (*Salvelinus*) closely related to the salmon,

from which they differ in the arrangement of the teeth. They are mostly freshwater fish inhabiting deep lake-waters (e.g., in Windermere),

CHAR

but one species *S. Alpinus* is a marine fish found in the Arctic (Lapland), but spawning in rivers. More than one species is found in English lakes. *S. fontinalis* is the N. American Brook Trout, *S. namaycush* the N. American Great Lake Trout or Namaycush.

Charade, usually, the dramatic inter-pretation of a word, each syllable of which, and the whole, is acted by individuals in a series of scenes. The acting may be silent or vocal. It may also be played simply by description of each syllable.

Charcoal, the residue of partially-burnt animal or vegetable matter, especially wood. It is produced more or less pure, according to the substance used and the time and care taken in burning. By burning sugar in ideal circumstances almost a pure carbon is produced. Animal carbon produced by burning bones, on the other hand, contains only 10 to 12 per cent. of pure carbon. For centuries where wood was plentiful, charcoal-burning was practised by simply cutting the wood, stacking it, and burning it. Now it is burnt in retorts, and various valuable by-products are recovered. Wood charcoal is useful mainly as a fuel, but it is also valuable for its capacity for absorbing gases and in the manufacture of gunpowder.

Charcot Land, an island of Antarctica, arctica, in latitude 76° S., of S. America. It is named after the French explorer Jean Baptiste Charcot, who commanded French expeditions to the Antarctic in 1903-1905 and 1908-1910 and mapped a considerable amount of Antarctic coastland.

Chard, a town of Somerset, England, scene of a parliamentary victory during the Civil War. Pop. 4,000.

Charente, a dept. of France, W. of the Gironde; cap. Angoulême: with vast chestnut forests; produces wines, mostly distilled into brandy. Area 2,305 sq. m. Pop. 309,000.

Charente, a river of France, 200 m. long, flowing through the depts. of Charante and Charente-inférieure to the Bay of Biscay, Rochefort the chief town on its banks.

Charente-Inférieure, a maritime dept. of France, W. of the former; includes the islands of Ré and Oléron. Cap. La Rochelle. Area 2,791 sq. m. Pop. 415,000.

Chargé d'Affaires, a diplomatic officer who acts for his ambassador during the latter's absence. He may also be the appointed representative of his country at a less important Court.

Charing Cross, a district of London in the Strand, near Trafalgar Square, taking name from the village of Charing, which was situated there, and the stone (Eleanor) cross erected by Edward I. Here is a railway station, a terminus of the Southern Railway, previously of the London, Chatham and Dover line, and a former station of departure for the Continent.

Charing-Cross Bridge

Scheme, a plan to transfer the present Charing Cross to the Surrey side of the Thames, and to abolish the present railway bridge, with its adjacent footbridge (Hungerford Bridge). In its place a new road-bridge was to be built with wide approach, calculated to divert the traffic from the at present overcrowded Strand. The scheme was considered in connection with the proposed reconstruction of Waterloo Bridge by a Royal Commission in 1927. Following its report the scheme was further advanced by an agreement between the London County Council and the Southern Railway, and plans were drawn up. In 1930, however, Parliament refused its sanction, as details for the development of the S. bank of the river were not satisfactory. Two years later further preparation of the scheme lapsed for reasons of economy, since the cost was estimated at well over £10,000,000.

Chariot, a two-wheeled horse vehicle much used in antiquity in war and sport. They were

lightly-built for fast driving, drawn by 2 or (in chariot-races) by 4 horses, and for purposes of war built up to a certain extent as a

ROMAN CHARIOT

protection for charioteer and fighter. Their shape varied in the different countries. In Persia and ancient Britain destructive whirling scythes were fixed to the wheel-axes of battle-chariots. Chariot-racing was one of the most popular forms of sport in ancient Greece and Rome.

Charity Commissioners, a public body set up in 1853 to supervise charitable trusts and endowed schools, most of its work in connection with the latter being transferred to the Board of Education in 1899. Investments held by the body aggregate over £70,000,000.

Charivari, an ancient French custom, consisting of serenading a newly-married couple with a musical mockery, using domestic utensils as instruments.

Originally a serious custom at weddings, it degenerated into a way of insulting unpopular couples. It was forbidden by the Church about 1600.

Charlemagne, i.e., Charles or Karl the Great, the first Carolingian king of the Franks, son and successor of Pépin le Bref (the Short); became sole ruler on the death of his brother Carloman in 771; he subjugated by his arms the southern Gauls, the Lombards, the Saxons and the Avars, and conducted a successful expedition against the Moors in Spain, with the result that his kingdom extended from the Ebro to the Elbe; having passed over into Italy in support of the Pope, he was on Christmas Day, 800, crowned Emperor of the West, after which he devoted himself to the welfare of his subjects, and proved himself as great a legislator as in arms; enacted laws for the empire called capitularies, reformed the judicial administration, patronised letters and established schools. He died and was buried at Aix-la-Chapelle. (742-814).

Charleroi, a manufacturing town in Belgium, Hainault, Belgium, 32 m. S.E. of Brussels; a centre of the coal and iron industries. Pop. 28,000.

Charles, Archduke of Austria, son of the Emperor Leopold II. and younger brother of Francis II., one of the ablest generals of Austria in the wars against the French Republic and the Empire; he was defeated at the Battle of Wagram, after which, being wounded, he retired into private life. (1771-1847).

Charles I., last Emperor of Austria-Hungary, succeeded to the throne in 1916 during the Great War, left Austria for Switzerland in 1919, and was formally deposed by the Austrian Parliament; led an abortive attempt to restore the monarchy, but was defeated near Budapest and died at Madeira. (1887-1922).

Charles I., King of England, second son of James I., born at Dunfermline; falling in his suit for the Infanta of Spain, married Henrietta Maria, a French princess, a devoted Catholic, who had great influence over him; had for public advisers Strafford and Laud, who cherished in him ideas of absolute power adverse to the liberty of the subject; acting on these ideas brought him into collision with the Parliament, and provoked a Civil War; himself the first to throw down the gauntlet by raising the royal standard at Nottingham; in the end he surrendered himself to the Scots army at Newark, who delivered him to the Parliament on payment of £400,000 alleged arrears of military pay; was tried as a traitor to his country, condemned to death and beheaded, January 30, at Whitehall. (1600-1649).

CHARLES I

Charles II., King of England, son of Charles I., born at St. James's Palace, London; was at The Hague, in Holland, when his father was beheaded; assumed the royal title; was proclaimed King by the Scots; landed in Scotland, and was crowned at Scone; marching into England, was defeated by Cromwell at Worcester, September 3, 1651; fled to France; by the policy of General Monk, after Cromwell's death, was restored to his crown and kingdom in 1660, an event known as the Restoration; he was an easy-going man, and is known in history as the "Merry Monarch"; his reign was an inglorious one for England, though it is distinguished by the passing of the Habeas

Corpus Act, one of the great bulwarks of English liberty. (1630-1685).

Charles IV., The Fair, third son of Philip the Fair, King of France from 1322 to 1328; when trouble arose in Guienne, which was a duchy held by the English in fief to the French crown, Isabella went there in place of Edward II. of England, and with Charles plotted the final overthrow of Edward; was the last of the Capets. (1294-1328).

Charles V., The Wise, son of John II., King of France from 1364 to 1380; recovered from the English almost all the provinces they had conquered, successes due to his own prudent policy, and especially the heroism of Du Guesclin, De Clisson and De Boucicaut; France owed to him important financial reforms, the extension of privileges to the universities, and the establishment of the first national library, in which were gathered together thousands of MSS.; the Bastille was founded in his reign. (1337-1380).

Charles VI., The Well-Beloved, King of France from 1380 to 1422, was son and successor of Charles V.; began his reign under the guardianship of his uncles, who riled the public treasury and provoked rebellion by their exactions; gained a victory at Rosbach over the Flemings, then in revolt, and a little after dismissed his uncles and installed in their stead three wise councillors of his father, whose sage, upright and beneficent administration procured for him the title of "Well-Beloved," a state of things, however, which did not last long, for the harassments to which he had been subjected and the excesses of his life, drove him insane, and his kingdom, rent by rival factions, was given over to anarchy, and fell by the treaty of Troyes almost entirely into the hands of the English conquerors at Agincourt. (1368-1422).

Charles VII., The Victorious, son of Charles VI., became King of France in 1422; at his accession the English held possession of almost the whole country, and he indolently made no attempt to expel them, but gave himself up to effeminate indulgences; was about to lose his whole patrimony when the patriotism of the nation woke up at the enthusiastic summons of Joan of Arc; her triumphs and those of her associates weakened the English domination, and even after her death her influence persisted, till at the end of 20 years the English were driven out of France, and lost all they held in it except Calais, Havre and Guines Castle. (1403-1461).

Charles VIII., King of France, son of Charles VII., and successor of Louis XI.; during his minority the kingdom suffered from the turbulence and revolts of the nobles; married Anne of Brittany, heiress of the rich duchy of that name, by which it was added to the crown of France; sacrificed the interests of his kingdom by war with Italy to support the claims of French princes to the throne of Naples, which, though successful from a military point of view, proved politically unfruitful. (1470-1498).

Charles IX., third son of Henry II., and Catharine de Medici, became King of France in 1560; the civil wars of the Huguenots and Catholics occupy this reign; the first was concluded by the peace of Amboise, during which Francis of Guise was assassinated; the second concluded by the peace of Longjumeau, during which Montmorncy fell; the third by the peace of St. Germain, in which Condé and Montcontour fell, which peace was broken by the massacre of St. Bartholomew, into the perpetration of which Charles was inveigled by his mother and the Guises; incensed at this outrage, the Huguenots commenced further wars when Charles died. (1550-1574).

Charles X., brother of Louis XVI. and Louis XVIII., the latter of whom he succeeded on the throne of France in 1824; was unpopular in France as Duc d'Angoulême in the time of the Revolution, and had to flee the country at the outbreak of it, and stayed for some time as an exile in Holyrood, Edinburgh; on his accession he became no less unpopular from his adherence to the old régime; at an evil hour in 1830 he issued ordinances in defiance of all freedom, and after an insurrection of three days in the July of that year had again to flee; abdicating in favour of his grandson, found refuge for a time again in Holyrood, and died at Gêritz in his eightieth year. (1757-1836).

Charles I., King of Naples and Count of Anjou, brother of Louis IX. of France, with whom he was captured on a crusade. Ransomed, he was offered the crown of Naples and Sicily in 1264 by the Pope. The cruelty of the French caused a massacre and rising in Sicily known as the Sicilian Vespers, after which he never recovered Sicily. (1226-1284).

Charles V. (I. of Spain), Holy Roman Emperor, son of Philip of Burgundy, born at Ghent; became King of Spain in 1516, and succeeded to his Habsburg possessions in 1519 on the death of his paternal grandfather Maximilian I., being crowned at Aix-la-Chapelle in 1520; reigned during one of the most important periods in the history of Europe; the events of the reign are too numerous to detail; it is enough to mention his rivalry with Francis I. of France, his contention as a Catholic with the Protestants of Germany, the invasions of the Turks, revolts in Spain, and expeditions against the pirates of the Mediterranean; the ambition of his life was the suppression of the Protestant Reformation and the succession of his son Philip to the Imperial crown; he failed in both; resigned in favour of his son, and retired into the monastery of St. Yuste, in Extremadura, near which he built a magnificent retreat. (1500-1558).

Charles XII., King of Sweden, son of Charles XI., a warlike prince; ascended the throne at the age of 15; had to cope with Denmark, Russia and Poland combined against him; foiled the Danes at Copenhagen, the Russians at Narva and Augustus II. of Poland at Klissow; trapped in Russia, and forced to spend a winter there, he was, in spring 1709, attacked by Peter the Great at Pultowa and defeated, so that he had to take refuge with the Turks at Bender; here he was attacked, captured and conveyed to Demotica, but, escaping, he found his way back to Sweden, and making peace with the Czar, commenced an attack on Norway, but was killed by a musket-shot at the siege of Friedrickshall. (1682-1718).

Charles XIV., King of Sweden and heir of Charles XIII., better known as Jean Baptiste Jules Bernadotte (*q.v.*).

Charles Albert, King of Sardinia, succeeded his brother, Charles Felix, in 1831; conceived a design to emancipate and unite Italy; in the pursuit of this object he declared war against Austria; though at first successful, was defeated at La Bicocca near Novara, and to save his kingdom was compelled to resign in favour of his son Victor Emmanuel; retired to a monastery at Oporto, and died of a broken heart. (1798-1849).

Charles Edward, the Young Pretender, grandson of James II. of England, born at Rome, landed in Scotland (1745); issued a manifesto in assertion of his father's claims; had himself proclaimed King James VII. of Scotland at Edinburgh; attacked and defeated General Cope at Prestonpans; marched at the head of

his adherents into England as far as Derby; returned and defeated the King's force at Falkirk, but retired before the Duke of Cumberland, who dispersed his army at Culloden; wandered about thereafter in disguise; escaped to France, and died at Florence. (1720-1788).

Charles Martel (i.e., "Charles the Hammer"), son of Pépin d'Héristal and grandfather of Charlemagne; became mayor of the Palace, and, as such, ruler of the Franks; notable chiefly for his signal victory over the Saracens at Tours in 732, whereby the Mussulman invasion was once for all stopped and the Christianisation of Europe assured. (c. 688-741).

Charles's Wain, the constellation, or the Great Bear.

Charles the Rash, last Duke of Burgundy, son of Philip the Good, born at Dijon; enemy of Louis XI. of France, his feudal superior; was ambitious to free the duchy from dependence on France, and to restore it as a kingdom, and by daring enterprises tried hard to achieve this; on the failure of the last effort, at Nancy, was found lying dead on the field. (1433-1477).

Charleston, the largest city in S. Carolina, U.S.A., and the chief commercial city, with a spacious landlocked harbour; the chief outlet for the cotton, rice, and lumber of the district; has a large coasting trade. Pop. 62,000. Also the cap. of W. Virginia, U.S.A., a manufacturing town and centre of a coal, oil and salt-mining district. Pop. 60,000.

Charleville, a manufacturing and trading town in the dept. of Ardennes, France, on the R. Meuse opposite Mézières; manufactures include hardware and bricks. Pop. 23,000. Also a town in Queensland, Australia. Pop. 2,300.

Charlock, Wild Mustard, or Ketlock (*Brassica* or *Sinapis arvensis*), a weed with yellow, four-petaled flowers, which grows in fields in England. It is of the natural order Cruciferae, and belongs to the same genus (*Brassica*) as the cabbage and its relatives.

Charlotte, a city of North Carolina, U.S.A., the county seat of Mecklenburg county, a thriving place with manufactures of machinery, cotton, dyestuffs, etc. Pop. 82,700.

Charlotte, daughter and only child of George IV. of England, married to Prince Leopold of Saxe-Coburg, afterwards King of Belgium; died after giving birth to a still-born boy, to the great grief of the whole nation. (1796-1817).

Charlottenburg, a town on the Berlin, with a palace, the favourite residence of Sophie Charlotte, the grandmother of Frederick the Great, and so named by her husband Frederick I. after her death; contains the burialplace of William I., German Emperor. It is now incorporated with Greater Berlin. Its old name was Lietzenburg.

Charlottetown, the capital of Canada. Pop. 12,000.

Charon, in the Greek mythology the dead over the Styx into Hades, a grim old figure with a mean dress and a dirty beard, peremptory in exacting from the ghosts he ferried over the obolus allowed him for passage-money.

CHARLOCK

Charrington, **Frederick Nicholas**, founder (1885) and honorary superintendent of Tower Hamlets Mission, was born at Bow; son of Frederick Charrington, brewer. Resigned position in father's brewery and became advocate of teetotalism. Member of L.C.C. 1889-1895, prominent in the attack (then justifiable) on music-halls. Guardian and vestryman of Mile End, afterwards on Stepney Borough Council. (1850-1936).

Chart, a map designed for use in the navigation of ships. All features of the coast are given, and soundings and currents are marked. Mercator (1512-1594) drew the first chart, showing the earth as round. The preparation of modern charts is the work of the Admiralty (Hydrographical dept.).

Charter, a formal document drawn up rights or privileges from one party to another. The word applies especially to the charters assigned by the sovereign to a company or corporation; or between private individuals to the deed covering the transfer of property. A public charter is that granted to a people, guaranteeing their rights. In Scottish law a charter evidences the grant of property which the successors of the recipient may inherit, under certain conditions surviving from feudal law.

Chartered Companies are formed under a charter granted by a sovereign power, and given special rights and facilities to develop the commercial advantages in the sphere named in the charter. These companies are of early origin, and the concessions given by the charter were generally in respect of land. Great Britain first granted a charter to a foreign company, the Hanseatic League. Later charters were granted to English companies trading in the Baltic, Russia and Turkey. The discovery of America led to the formation of the famous Hudson's Bay Company, which played a large part in opening up British North America. Other notable Chartered Companies were the East India Company, which was largely responsible for the conquest of India, and the British South Africa Company, which has played a big part in the development of South Africa.

Charterhouse, originally a Carthusian monastery. The Charterhouse in London was founded in 1371 by Sir Walter de Manny. After the Reformation it was for some time the residence of the Duke of Norfolk. In 1611, by the bequest of Thomas Sutton, a hospital, almshouse, and school were founded on the site. The school grew into a prominent public school, but in 1872 was moved to Godalming, Surrey. The Merchant Taylors' School took over the site of the Charterhouse, but some buildings of the older foundation still survive. The Merchant Taylors' School moved to Moorgate, near Northwood, in 1832.

Charter Party, in commerce, a document covering the hiring of a vessel for the conveyance of cargo from one port to another. There are stipulations included as to the date of loading, number of lay-days, freight, demurrage, etc.

Chartism, a movement of the working-classes of Great Britain for greater political power than was conceded to them by the Reform Bill of 1832, which found expression in a document called the "People's Charter," drawn up in 1838, embracing six "points," as they were called, viz., Manhood Suffrage, Equal Electoral Districts, Vote by Ballot, Annual Parliaments, Abolition of a Property Qualification in the Parliamentary Representation and Payment of Members of Parliament, all of which took the form of a petition presented to the House

of Commons in 1839, and signed by 1,280,000 persons. The refusal of the petition gave rise to great agitation throughout the country, which gradually died out after 1849.

Chartres, the capital of the French dept. of Eure-et-Loire, 55 m. SW. of Paris. Its 11th-13th Century cathedral, Notre-Dame, founded by Fulbert, is accounted one of the finest specimens of Gothic architecture in France. Pop. 25,000.

Chartreuse, La Grande, a Carthusian monastery in the dept. of Isère, 13 m. N.E. of Grenoble; famous as the original place of manufacture of the Chartreuse liqueur; founded by St. Bruno in 1084, the original buildings date from c. 1134, but were destroyed by fire and rebuilt 1676.

Charybdis. See Scylla.

Chasseur (French), originally a huntsman. In the 18th Century the name was given to a corps of light-armed soldiers. The term is still employed in the French army to designate certain regiments, either mounted (the Chasseurs d'Afrique, regiments specially trained for service in Algeria) or on foot (including the special Alpine regiments, the Chasseurs Alpins).

Chassis, the framework of an aeroplane or the under-carriage of a motor-car. In the latter it comprises the whole motor-car, including the engine; it excludes the body-work and coachwork.

Chastelard, **Pierre de Boscobel** de, grandson of Bayard; conceived an insane passion for Queen Mary, whom he accompanied to Scotland; was surprised in her bedchamber, and condemned to death, it being the second occasion of the offence. (1540-1563).

Chasuble, an ecclesiastical vestment of the Roman Catholic Church worn by priests when celebrating Mass; a cloak falling over back and breast, but leaving the arms uncovered.

Chatalja, a town in Turkey, 25 m. from Istanbul (Constantinople), near which are the strongly fortified Chatalja lines on the Heights of Chatalja. These lines were constructed during the Russo-Turkish War, served their purpose during the Balkan Wars, attacking Bulgarian armies being driven back, and were strengthened during the Great War.

Chateaubriand, **François René, Viscount de**, French littérateur, born in St. Malo, younger son of a noble family of Brittany; travelled to N. America in 1791; returned to France on the arrest of Louis XVI., and joined the Emigrants (q.v.) at Coblenz; was wounded at the siege of Thionville, and escaped to England; wrote an *Essay on Revolutions Ancient and Modern*, conceived on liberal lines; was tempted back again to France in 1800; wrote *Atala*, a story of life in the wilds of America, which was in 1802 followed by his most famous work, *Génie du Christianisme*; entered the service of Napoleon, but withdrew on the murder of the Duc d'Enghien; made a journey to the East, the fruit of which was his *Itinéraire de Paris à Jérusalem*; supported the Bourbon dynasty all through, withdrew from public life on the elevation of Louis Philippe to the throne; he exercised no small influence on French literature, especially the Romantic school of his day. (1768-1848).

Châteauroux, the capital of the dept. of Indre, France, a town of 22,000 inhabitants.

Château-Thierry, a town and river-port of France, on the Marne in the dept. of Aisne, 60 m. N. of Paris. It has an ancient ruined castle and an old church, and was the birthplace of La Fontaine. Musical instruments of all

kinds are manufactured, and there are sugar refineries and sawmills. Here Napoleon defeated the Russians and Prussians in 1814. It was taken by the Germans in 1914, and here in 1918 the final German offensive was stayed by six American divisions. Pop. 8,000.

Chatham, (1) a town in Kent, England, on the estuary of the Medway, a fortified naval arsenal; is connected with Rochester. Pop. 43,000. (2) a fruit-growing town of Ontario, Canada. Pop. 14,000. (3) River-port of New Brunswick, Canada, on the Miramichi (an alternative name of the town); has fisheries and shipyards. Pop. 5,000.

Chatham, William Pitt, Earl of, a orator, born in Cornwall; entered Parliament in 1735, joined the opposition to Sir Robert Walpole and on account of his maiden speech was deprived by Walpole of his army rank of Cornet. He showed himself conspicuously free of mercenary motives, and in spite of losing the favour of the King, George II., on account of opposition to Carteret's Hanoverian policy, he gained great respect and popularity in the country as a whole. In 1746 he became Vice-Treasurer of Ireland in the ministry of Pelham (the Pelham ministry had to resign before George II. agreed to the inclusion of Pitt). He became Secretary of State in 1756 under the nominal leadership of the Duke of Devonshire (transformed in 1757 into the Pitt-Newcastle administration), his particular responsibility being the conduct of the Seven Years War, the outcome of which was the mastership of India (after the battle of Plassey) and the conquest of Canada. Soon after the accession of George III., Pitt retired, and did not return to office until 1766, when he became Lord Privy Seal and Earl of Chatham. He opposed the taxation of the American colonies and acknowledgment of their independence, and the last time his voice was heard in the Parliament of England it was on that subject. On this occasion he fell back ill into the arms of his friends, and died little more than a month after at Hayes; was buried in Westminster Abbey. (1708-1778).

EARL OF CHATHAM

Chatham Islands, a group of islands 336 m. E. of New Zealand, and politically connected with it; the chief industry is the rearing of sheep and cattle. Chief export wool. Area 372 sq. m. Pop. 700 (300 Maoris).

Chat Moss, a large bog in Lancashire, England, 7 m. W. of Manchester, now largely reclaimed and under cultivation, through the ingenuity of George Stephenson traversed by the Liverpool and Manchester Railway.

Chats (Saxicolinae), a subfamily of the Thrushes, species breeding in Britain being the Stonechat, Whinchat and Wheatear.

Chatsworth, the palatial seat of the Duke of Devonshire, in Derbyshire, 8 m. W. of Chesterfield, enclosed in a park, with gardens, 11 m. in circumference.

Chattanooga, city of Tennessee, U.S.A., a commercial and railway centre, manufacturing iron, steel, etc. Here, in the American Civil War, Grant defeated the Confederates in Nov., 1863. Pop. 120,000.

Chatterton, Thomas, a poet of great promise, born at Bristol; passed off while but a boy as copies of ancient MSS., and particularly of lyric poems, which

he ascribed to one Rowley, a monk of the 17th Century, what were compositions of his own; having vainly endeavoured to persuade any one of their genuineness, though he had hopes of the patronage of Horace Walpole, Earl of Orford, he left Bristol for London, grew desperate, and committed suicide. (1732-1770).

Chaucer, Geoffrey, the great early English poet, and father of English poetry, the son of a vintner and taverner, born probably in London, where he lived almost all his days; when a lad, served as page in the royal household; won the favour and patronage of the king, Edward III., and his son, John of Gaunt, who pensioned him; served in an expedition to France; was made prisoner, but ransomed by the king; was often employed on royal embassies, in particular to Italy; held responsible posts at home; was thus a man of the world as well as a man of letters. He comes first before us as a poet in 1369; his poetic powers developed gradually, and his best and ripest work, which occupied him at intervals from 1373 to 1400, is his *Canterbury Tales*, characterised by an eminent critic as "the best example of English story-telling we possess"; besides which he wrote, among other compositions, *The Life of St. Cecilia*, *Troilus and Cressida*, *The House of Fame* and *The Legend of Good Women*. His influence on English literature has been compared with that of Dante on Italian, while his literary life has been divided into three periods—the French, the Italian and the English, according as the spirit of it was derived from a foreign or a native source. (1340?-1400).

Chauvinism, the French equivalent of Jingoism among the English—i.e., an extravagant zeal for the glory of one's country or party, from one Nicholas Chauvin a veteran soldier, who was famous for his blind devotion to Napoleon.

Cheadle, (1) residential district of Stockport, Cheshire, England. (2) Market town of Staffordshire, England, engaged in metal-working, and the manufacture of silk and tape. Near are collieries. Pop. 6,000.

Cheapside, a London thoroughfare, running from St. Paul's Churchyard to Poultry, formerly a market, a street with many historical associations.

Cheddar, a village of Somersetshire, England, on the Mendip Hills, near Cheddar gorge and its wonderful stalactite caves. Has given its name to a famous cheese. Pop. 2,000.

Cheese, a highly nourishing food prepared from milk. The curd or casein of milk is separated from the whey, and dried under pressure in a mould, or in a wrapping of cheese-cloth. There are several different kinds of cheeses, hard and soft. Of the former are Cheddar, Cheshire, Gloucester, Wiltshire, Gorgonzola, Stilton, Wensleydale, and Dutch, Bel Paese and Gruyere. Soft cheeses are Camembert, Limburger, Brie, Neuchâtel and various cream cheeses.

Cheetah, *Cheeta*, *Chita*, or *Hunting Leopard* (*Cynaurus jubatus*),

a genus of the cat family, native of India and Africa, characterised by its small head, light build, and semi-retractable claws. It is exceedingly footed, especially for short distances, for which reason it is frequently

AFRICAN HUNTING CHEETAH

trained both in India and Africa for purposes of hunting.

Chefoo, or **Chifu**, treaty-port of China, in Shantung province, on the Gulf of Chih-li, with a large, sheltered harbour open all winter. There is a trade in silk, embroidered linens, beans and groundnuts. It is a health resort in summer, and has a large foreign settlement. Pop. 119,000.

Cheke, Sir John, a zealous Greek scholar, born at Cambridge, and first Regius professor of Greek there; did much to revive in England an interest in Greek and Greek literature; was tutor to Edward VI., who granted him landed estates; favouring the cause of Lady Jane Grey on the accession of Mary, left the country, was seized and sent back; for fear of the stake abjured Protestantism, but died soon after. (1511-1557).

Chekhov, Anton Pavlovich, Russian dramatist and author. Born in Taganrog of peasant stock, he was educated at the local grammar school, became a pupil teacher at the age of 16, studied medicine at Moscow and took to writing. His first play, *Ivanov*, was produced when he was 27, and was followed by *The Seagull* and *Uncle Vanya*. Ill-health compelled him to settle in the Crimea, where he wrote *The Cherry Orchard*, a few months before he died in Germany. He was buried in Moscow. (1860-1904).

Chekiang, a maritime province of China, an agricultural province, the chief products being silk, cotton and tea. Area 39,780 sq. m. Pop. 21,000,000. Cap. Hangchow.

Chellean, name given to the early part of the Paleolithic or old Stone Age, from Chelles, in France, where large numbers of the flint tools characteristic of this age have been found.

Chelmsford, the county town of Essex, England, on the Chelmer. It was the site of one of the earliest wireless stations. Pop. 27,000. Also a town in Massachusetts, U.S.A. Pop. 5,700.

Chelmsford (title of Nobility). (1) **Frederic Thesiger**, First baron, Lord Chancellor of England; began life as a naval cadet; studied law with a view to practising in the W. Indies and managing the family estates, which, however, were destroyed by volcanic action; called to Bar, 1818; M.P., Woodstock, 1840; Solicitor-General, 1844; Attorney-General, 1845; ennobled 1858, and Lord Chancellor till 1859. Chancellor again, 1866-1868. (1794-1878).

(2) **Frederic Augustus Thesiger**, Second baron, son of preceding, a soldier, served at Sebastopol and against Indian mutineers; Adjutant-General in the Abyssinian expedition 1867-1868. (1827-1905).

(3) **Frederick John Napier Thesiger**, Third baron and First viscount, son of second baron; member of London School Board and L.C.C.; Governor of Queensland, 1905-1909; of New South Wales, 1909-1913; Viceroy of India, 1916-1921—he and Edwin Montagu, Secretary of State, in 1918 issued report on which was founded the "dyarchy" system in Indian government; made viscount, 1921; First Lord of the Admiralty in 1924. (1868-1933).

Chelonia, an order of reptiles with toothless jaws and horny beaks and body enclosed in a bony case; comprising the tortoises, turtles and terrapins.

Chelsea, a western suburb of London, on the N. of the Thames, famous for its hospital for old and disabled soldiers, and the place of residence of sundry literary celebrities, among others Sir Thomas More, Swift, Steele and Carlyle. Pop. 59,000. Also a manufacturing town in Massachusetts, U.S.A. Pop. 45,000.

Cheltenham, a healthy watering-place and educational centre in Gloucestershire, England; first brought into repute as a place of fashionable

resort by the visits of George III. to it; contains a well-equipped college, where a number of eminent men have been educated, and Cheltenham Ladies' College. Pop. 49,000.

Chelyuskin, Cape, in Siberia, at the N. of the Taimyr Peninsula, the most northerly point in the Eastern hemisphere.

Chemical Warfare. See **Poison Gas.**

Chemin-des-Dames, a district in the dept. of Aisne, France. During the Great War there was much fighting over this area, the most important battle being the successful advance of the German 1st and 7th Armies in May and June 1918. The Allied troops were taken by surprise and driven back across the Aisne. The German armies pushed their front line to form an enormous loop, stretching from Noyon to Rheims and encircling Château-Thierry, a depth of 30 m. Lat.: this loop proved a difficult defensive position, and the attack, although successful, failed in its object, which was to paralyse the Allies before the American forces were mobilised. In September the Germans were driven back over this sector by the army of General Mangin.

Chemist, or **Druggist**, a person permitted and licensed by law to sell medicines, drugs and poisons. Under the Pharmacy Act (1868) he must have qualified by serving an apprenticeship and passing an examination conducted by the Pharmaceutical Society. He may become a member of this Society, but may not be registered as a Pharmaceutical Chemist unless he has passed a higher examination.

Chemistry, **Analytical**. The object of this branch of chemical analysis is to discover the composition of bodies, and consists of two parts—viz., the detection of the constituents (qualitative analysis) and the estimation of their respective proportions by weight or by volume (quantitative analysis). The compounds of carbon are mostly non-electrolytes, and the qualitative analysis of such compounds thus narrows down to the detection of the individual elements in them. The compounds of other elements ("inorganic" compounds, as opposed to carbon compounds or "organic" compounds) are very largely electrolytes, and qualitative analysis here is often concerned with the detection of the ions which these substances give on solution in water.

In quantitative analysis two main types of procedure are adopted: either a known weight of the substance is converted into a solid of known composition, which is weighed (gravimetric analysis), or a solution of known concentration of the substance is made to react with a solution of known concentration of another substance, the end point being marked by a change of colour or in some alternative suitable way (volumetric analysis). Methods for the analysis of very small quantities of substances have recently been worked out by Pregl and others, and form the subject of an elaborate technique (microchemical analysis). Special branches of analytical chemistry deal with water-analysis, food-analysis, and so on.

Chemistry, Biological. See **Biochemistry.**

Chemistry, History of. Chemistry is the study of the various substances which compose the universe, and of the changes in composition they may undergo. The fusion of the practical knowledge of Egyptian craftsmen with late Greek philosophical speculations at Alexandria in the early centuries of the Christian era marked the effective beginnings of chemistry as a science, though China and possibly India made important original contributions. The chemists of Islam, the chief of whom was the celebrated

Geber (Jabir son of Hayyan, c. A.D. 900), greatly extended the bounds of chemical knowledge, and from them chemistry was introduced to Western Europe through the medium of translations from the Arabic during the 12th and 13th Centuries.

The chief aim of nearly all early chemists, was the transmutation of inexpensive metals into gold and silver by means of eagerly sought but always elusive elixirs or philosopher's stones, and the science fell into disrepute as alchemy. Paracelsus (1493-1541), a Swiss character of remarkable but eccentric genius, rehabilitated it as the handmaid of medicine, urging its value as the source of more, better and purer drugs, and chemistry became an essential part of the training of medical students. The Hon. Robert Boyle (1627-1691) envisaged chemistry as an independent and primo branch of natural philosophy, and gave it a new outlook by destroying the old Aristotelian idea of matter as composed of the four "elements" fire, air, water and earth. According to Boyle, an element was to be considered as a substance that could not be split up into simpler bodies, and he suggested that instead of postulating the existence of hypothetical elements, as Aristotle had done, it would be sounder to find by experiment how many indivisible substances there actually were.

Boyle's work changed the whole atmosphere, chemistry becoming much more fully experimental and less trammelled by scholastic dogma. In the 17th Century, Georg Ernst Stahl (1660-1734), extending a previous suggestion of Johann Joachim Becher (1635-1682), supposed that all combustible bodies contain a peculiar substance, phlogiston (Greek, fire-stuff), which is lost on combustion. This theory correlated a large number of previously unconnected facts, and gave rise to much research. Under its inspiration, chemistry took a great leap forward, and during the 18th Century such important substances as oxygen, hydrogen, chlorine, glycerol and urea were discovered, while the classical work of Joseph Black (1728-1799) on chalk and limestone first manifested the value of exact quantitative investigations.

After the isolation of oxygen by the Rev. Joseph Priestley (1733-1804), it was perceived by the French chemist Antoine Laurent Lavoisier (1743-1794), guillotined during the Terror) that the theory of phlogiston failed to explain the newly observed facts, and he substituted for it the modern theory of combustion—viz., that when a substance burns it combines with the oxygen of the air. Shortly after Lavoisier's execution, John Dalton (1766-1844) advanced the theory that matter is composed of minute, indivisible and uncreatable atoms, each element possessing its own type of atom. The adoption of the oxygen theory and atomic theory marks the beginning of modern chemistry, and subsequent progress can modestly be described as amazing.

Chemistry, Inorganic. See **Inorganic Chemistry.**

Chemistry, Organic. See **Organic Chemistry.**

Chemnitz, a manufacturing town in Saxony, called the Saxon Manchester, "at the foot of the Erzgebirge, in a rich mineral district; manufactures cottons, woollens, silks, machinery, etc. Pop. 351,000."

Chemulpo, a town on the W. coast of Korea; a thriving town since it became a treaty-port in 1883. Pop. 73,000.

Chenab, an affluent on the left bank of the Indus, one of the five rivers, and the largest, which give name to the Punjab; is 600 m. long.

Chengtzu, the capital of the province of Szechwan, China, standing in a fertile plain, on a tributary of the Yang-

tsze-kiang, a prosperous trading town, the products of the district including silk, rice, etc. Pop. 400,000.

Chénier, André, French poet, born odes, idylls and elegies, which place him high among French poets; offended Robespierre, and was guillotined a few days before the fall of the latter. (1762-1794).

Chenopodium, a genus of some 60 plants of the order

Chenopodiaceae, 9 of which are found in Britain, including goosefoot (*Ch. olidum* and *Ch. varia*), and good King Henry or Mercury (*Ch. bonus-Henricus*) a perennial which grows wild. The young shoots of this species may be used as a substitute for asparagus, or the plant may be allowed to grow and the leaves used as a substitute for spinach.

Cheops (Khufu), King of Memphis, in Egypt, the greatest of the 4th dynasty; builder of the Great Pyramid, largest of all, at Gizeh, about 3,000 B.C.

Chepstow, a port on (MERCURY) the Wye, Monmouthshire, England, 15 m. E. of Newport; with a tubular suspension bridge, and noted for the tides, which are higher than anywhere else in Britain. Pop. 4,300.

Cheque, strictly a "Bill of Exchange payable on demand." In practice it takes the form of a written order, usually on a form specially printed, on a bank with which the drawer has an account. They are printed in many forms, such as to "bearer" or "order," and may be crossed or "open"—that is, uncrossed. If crossed, they must pass through another bank for collection. Large cheques are sometimes "certified" as being good for the sum mentioned. Cheques often have a form of receipt printed on them for the signature of the drawee, so as to save a separate receipt being sent through the post, though, as they are always returned to the drawer after payment, they are evidence of payment in absence of a formal receipt in any case. The Clearing banks in London have a Clearing House, where cheques on each other are sent and exchanged. At the end of the day the balance payable by one bank to another is settled by a transfer at the Bank of England.

Chequers, country residence of British Prime Ministers, situated in the Chilterns, and presented to the nation by Lord Lee of Fareham in 1917.

Cher, an affluent of the Loire below Tours, over 200 m. long. Also the dept. in France to which it gives name; an agricultural and pastoral district. Area 2,800 sq. in. Pop. 254,000. Cap. Bourges.

Cherbourg, a French port and arsenal, opposite the Isle of Wight, 70 m. distant, on the construction and fortifications of which immense sums have been expended; the fortifications were begun by Vauban in the 17th Century. It is a port of call for Atlantic liners. Pop. 38,000.

Cheribon, a Dutch residency and its chief town and seaport on the N. coast of Java. Pop. (residency) 1,000,000; (town) 32,000.

Cherith, a brook E. of the Jordan, Elijah's hiding-place during the first part of the 3 years' drought. (1 Kings xvii.).

Cherokees, a tribe of American Indians Territory (now Oklahoma), U.S.A.; civilised, self-governing and increasing; formerly occupied the region about the R. Tennessee.

CHENOPODIUM

Cherry (*Prunus Cerasus*), a native English fruit-tree, a plant of the *prunus* (plum) genus of the Rosaceae order. The cultivated varieties have been derived from the *Prunus Cerasus* and the *Prunus Avium* or *Gean*. They are mostly self-sterile, and propagation is by budding (preferably) or grafting on wild cherry stock. Cherries may be grown as standard, half-standard or espalier. The wood of the cherry tree is also useful. Kent is the best centre of cultivation in England.

Chersonesus (i.e., continent island), a name which the Greeks gave to several peninsulas, viz., the Tauric C., the Crimea; the Thracian C., Gallipoli; the Cimbric C., Jutland; the Golden C., the Malay Peninsula.

Chertsey, a very old town of Surrey, England, 21 m. SW. of London, on the right bank of the Thames. Pop. 17,000.

Cherubim, an order of angelic beings, conceived of as accompanying the manifestations of Jehovah, supporting His throne and protecting His glory, guarding it from profane intrusion; winged effigies of them overshadowed the Mercy Seat.

Cherubini, Maria Luigi Carlo, a celebrated, born at Florence; settled in Paris, the scene of his greatest triumphs; composed operas, of which the chief were *Iphigenia in Aulis*, *Elisa*, *Médée* and *Les Deux Journées*, considered his masterpiece; also a number of sacred pieces and requiems of the highest merit. (1760-1842).

Cherusci, an ancient people of Germany, under whom they defeated the Romans, commanded by Varus, in 9 A.D.

Chervil, the name of several plants of, in particular of the *Anthriscus Cerefolium*, which is cultivated to a small extent in S. Europe for the sake of the leaves, which are used in soups and salads, of *Anthriscus sylvestris* of the woods, and of *Charophyllum temulum*, the British wild chervil.

Cherwell, an English river, tributary of the Thames, 30 m. long. It rises in Northants, and flows through Oxfordshire to join the Thames at Oxford.

Chesham, a town of Cheshamshire, England, on the R. Chess, the centre of manufacture of wooden articles (chairs, etc.) from beech. Pop. 8,800.

Chesapeake Bay, a northward-extending inlet on the Atlantic coast of the United States, 200 m. long and from 10 to 40 m. broad, cutting Maryland in two; the scene of a naval battle between French and British fleets in 1781.

Cheshire, a western county of England, between the Mersey and the Dee, the chief mineral products of which are coal and rock-salt, and the agricultural, butter and cheese; has numerous manufacturing towns, with every facility for inter-communication, and the finest pasture-land in England. Area 1,020 sq. m. Pop. 1,087,000. Cap. Chester.

Cheshunt, a town in Hertfordshire, England, 14 m. N. of London, on the R. Lee, where in 1792 the Countess of Huntingdon founded a theological college. Pop. 14,600.

Chesil Bank, or *Beach*, a neck of land on the Dorset coast 18 m. long, being a ridge of loose pebbles and shingle, and ending at the so-called Isle of Portland. U.S.

Chess, a game of Eastern origin but uncertain antiquity. Known in Persia and India from early days, it was introduced into Europe in the 10th Century, probably by the Moors into Spain, and reached England via France. Of modern players Capablanca (q.v.) has been the most famous. It is played by two persons on a board which has 64 squares, usually white and black. The pieces are also white and black or white and red. Each side has 16 pieces—king, queen, 2 knights, 2 bishops, 2 castles (or rooks), and 8 pawns. They are placed at each end of the board, the pawns occupying the penultimate row, the remainder the last row. Each piece has set moves allowed to it. The object of the game is to take one's opponent's chessmen with the ultimate purpose of "checkmating" the king. This is to manoeuvre the king into such a position that he is unavoidably threatened with capture.

Chest, or *Thorax*, compartment of the abdominal cavity. Its bony structure comprises the ribs, 12 on each side, meeting at the back with the 12 dorsal vertebrae. In the front of the thorax is the breastbone or sternum, at the lower end of which is the ensiform cartilage. Ten ribs on each side are joined either to the sternum or the cartilage; two are "floating" or unconnected. The intercostal muscles lie between the ribs. The vitally important organs contained in the thorax are the heart and the lungs.

Chester, the county town of Cheshire, England, on the Dee, 16 m. SE. of Liverpool; an ancient city founded by the Romans; surrounded by walls nearly 2 m. long and from 7 to 8 ft. thick, forming a promenade with parapets. The streets are peculiar—along the lower storeys of the houses there stretch piazzas called "lows," 16 ft. wide, for foot-passengers, and approached by steps; it abounds in Roman remains, and is altogether a unique town. There is a fine Norman cathedral. Pop. 41,000. Also a town in Pennsylvania, U.S.A., with shipyards, boiler works and textile industries. Pop. 59,000.

Chesterfield, a town in Derbyshire, Derby; in a mineral district; manufactures cotton, woollen and silk goods; has a canal connecting it with the Trent. Pop. 64,000.

Chesterfield, Philip Dormer Stan- hope, Earl of, statesman, orator and man of letters, eldest son of the third earl; born in London; sat in the House of Commons from 1715 to 1726; was an opponent of Walpole; held office under Pelham, and distinguished himself during his short Lord-Lieutenancy of Ireland; in 1748 retired from deafness, or perhaps disgust, into private life. He is more celebrated for his *Letters to his Son*, models of elegance, though of questionable morality, which it appears he never intended should be published, and for the scorn with which Dr. Johnson treated him when he offered help which was no longer needed. (1694-1773).

Chester-le-Street, an ancient market town of Durham, England, with iron-works and collieries. Pop. 17,000.

Chesterton, Gilbert Keith, British Paul's School, he early made a name as a critic and an original writer, delighting in paradox. Besides poems, essays and biographies he wrote *The Napoleon of Notting Hill*, *The Innocence of Father Brown* and other novels. Was a noted Catholic apologist. (1857-1936).

Chestnut, the name of two different kinds of tree and their nuts. The Horse Chestnut (*Aesculus hippocastanum*).

belonging to the order Hippocastanaceae, is a large, handsome flowering tree, introduced into England in the 17th Century. The Sweet or Spanish Chestnut (*Castanea vulgaris* or *sativa*), order Fagaceae (the oak and beech family), was probably introduced into Britain by the Romans during the 1st Century. The nuts are edible when cooked.

Chetwode, Sir Philip Walhouse, seventh baronet, Field-Marshal since 1933; son of Sir George Chetwode, sixth baronet, whom he succeeded in 1905. Fought in Burma, 1892-1893, and in South Africa, 1899-1902. In Great War commanded 5th Cavalry Brigade and 2nd Cavalry Division. Major-General, 1916; commanded in Egypt, 1916-1917; with 20th Army Corps which captured Jerusalem, 1917-1918. Chief of General Staff, India, 1928-1930; Commander-in-Chief, India, 1930-1935. (1869-).

Chevalier, Albert, music-hall impersonator, actor of the eastern nonconforming class, was born at Notting Hill, London, son of a French-master at Kensington Grammar School. His mother was Welsh. He appeared on the stage in 1877. In 1891, at the London Pavilion, Piccadilly Circus, he began his "coaster" impersonations; thenceforward for years the foremost figure in the halls. Many of his songs were written, and some composed, by himself; he also wrote plays and sketches. His most famous song was *My Old Dutch*. (1861-1923).

Chevaux-de-Frise, a military fence composed of a beam or a bar armed with long spikes; literally Friesland horses, having been first used in Friesland.

Cheviot Hills,

a range on the borders of England and Scotland, extending 35 m. south-westwards, the highest being The Cheviot in Northumberland, 2,676 ft. high; famous for its breed of sheep.

CHEVAUX-DE-FRISE

Chevron, in heraldry an ordinary of two bands forming an angle descending to the extremities of the shield; representing the two rafters of a house, meeting at the top. In architecture, a zigzag outline moulded as a decoration. Also a badge, similarly shaped to the heraldic design or inverted, worn on the coat-sleeve of a non-commissioned officer, designating his rank.

Chevrotain, the Tragulina, a group of deer-like mammals of the Artiodactyla (even-toed) sub-order, and about the size of a rabbit. Though sometimes called mouse-deer, they are not true deer at all, but have feet more like those of pigs, and stomachs in 3 instead of 4 sections. There are 2 genera: *Tragulus*, ranging from Borneo to India, and *Dorothierus*, of which there is only 1 species, the Water-chevrotain (*D. aquaticus*) of Equatorial Africa.

Chevy Chase, the subject and title of English ballad preserved in Percy's *Reliques* and presumed to refer to an event in connection with the battle of Otterburn.

Chewing-gum, a sweetmeat very popular in the U.S.A., usually flavoured with mint. Its main constituent is chicle, a gum from a rubber tree (the *Acacia Sapota* of the order Sapotaceae) grown in Mexico.

Cheyennes, a once-warlike tribe of Red Indians of Algonquin stock, now much reduced and partially settled in Oklahoma, U.S.A.; noted for their horse-men.

Chiang Kai-Shek, Chinese general. Left fatherless in infancy at Fengkua village; brought up by a remarkable mother, who came of small merchant stock; spent four years in Japan, where he learned something of the art of war at the Tokyo Military Academy; these years also brought him into the fold of the Chinese Revolution, for it was in Japan that he joined the Kuo Min Lin, the forerunner of the Kuomintang. On the death of Sun-Yat Sen, 1925, one of whose daughters, Soong Maling, he married, he was appointed Commander-in-Chief of the army. In 1926 he advanced through Hunan to the Yangtze, and founded a government at Wuchang, which disagreement in the party caused him to remove to Nanking. In 1928 he returned to leadership of the Nanking army, and in October was inaugurated President of the Chinese National Government. Was the leader and inspirer of the Chinese people in their struggle against the Japanese invasion which began in 1937. (1886-).

Chianti, a range of hills, near Siena, dept. of Tuscany, Italy, and part of the Apennines. Their slopes are covered with vineyards, and the hills give name to a popular Italian wine.

Chiapas, Las, a Pacific State of Mexico, bordering on Guatemala, and watered in parts by the R. Chiapas; heavily forested, it yields hardwoods, coffee, rubber, fruit, etc. Stock-raising is carried on. Area, 28,700 sq. m. Pop. 530,000. Cap. Tuxtla Gutierrez.

Chiaroscuro, the reproduction in art of the effects of light and shade in nature as they mutually affect each other.

Chialtolite, a variety of Andalusite, a pale grey mineral consisting of silicate of alumina, found in the form of rhombic prisms.

Chibchas, or Muzas, a civilised people, though on a lower stage than the Peruvians, whom the Spaniards found established in districts of what is now Bogota and Colombia in the 16th Century; now merged in the Spanish population.

Chica, an orange-red colouring matter of the *Bignonia* *chica*, which grows in S. America and is used as a dye.

Chicago, the metropolis of Illinois, U.S.A., in the NE. of the State, on the SW. shore of Lake Michigan, is the second city in the Union. Its unparalleled growth, dating only from 1837 (in 1832 it was a mere log-fort, called Fort Dearborn, built in 1803, with a population in 1896 of half a million and at the present day 3½ million), is due to its matchless facilities for communication. Situated in the heart of the Continent, a third of the United States railway system centres in it, and it communicates with all Canada, and with the ocean by the Great Lakes and the St. Lawrence River.

It is laid out with absolute regularity. It has many magnificent buildings, enormously tall office "sky-scrapers," and an unrivalled system of parks and avenues. It suffered severely from fire in 1871 (this began in the Union Stockyards and, at one time, threatened the whole city). It is one of the greatest grain and pork markets in the world, and its enormous grain elevators and huge stockyards are a feature of the town.

The population is a mixture of all European peoples; native-born Americans are a small minority, outnumbered by the Germans, and almost equalled by the Irish. Its growing suburbs include Pullman, a modern town built by the Pullman Car Company for its numerous employees. It suffered from a crime wave after the Great War, and a serious race riot occurred in 1919. Pop. 3,577,000.

Chicherin, Georgy Vasilievitch, Russian statesman, *Commissar for Foreign Affairs*, 1918-1929; born in the province of Tambov, the son of a Foreign Ministry official; educated at St. Petersburg (Leningrad) University; renounced his estates and joined the social democratic movement in Berlin; took part in revolutionary movements in London, Paris and Berlin until the Revolution of November 1917, when he was imprisoned at Brixton as an enemy alien, and finally allowed to return to Russia. (1872-1924).

Chichester, a cathedral city in the W. K. of Portsmouth, with a port on the Channel 2 m. SW. of it; chief trade in agricultural produce. Pop. 15,000.

Chickasaws, a tribe of N. American Indians, allied to the Choctaws, now settled in a civilized state in Oklahoma. They number about 5,000.

Chicken-pox, a contagious fever, caused by an unidentified filter-passing virus. It is prevalent in the autumn, and children are the most liable. It is not a serious disease, the fever generally being mild. The incubation period is from 2 to 3 weeks. For quarantine 3 weeks are necessary. The chief symptoms are the spots, which form mostly on the upper parts of the body. They contain a fluid which later turns to pus, and finally escapes. A scab forms, and if scratched owing to the irritation, a scar may form.

Chickpea, or Gram (*Cicer Ariselinum*), a leguminous plant of the genus *Cicer*, cultivated in the East and in S. Europe for the seeds, which, smaller than the common pea, are used for food in the same way as lentils.

Chickweed (*Stellaria media*), a species of weed of the order

Caryophyllaceae. It is an annual, and must be eradicated by hoeing or dug in before flowering. It is a favourite food of cage-birds, and flowers all the year round. The name is also popularly applied to other species of Caryophyllaceae, including *Cerastium arvense*, the Field Mouse-ear Chickweed, and *Cerastium viciastrum*, the Viscid Mouse-ear Chickweed.

Chicory, or Succory, a plant, genus *Cichorium*, of the natural order Compositae. *Chicory intybus* is a bitter aromatic cultivated for its roots, which are dried, roasted, ground and used to mix with coffee. The leaves are also blanched in the dark, and used as a salad in the same way as those of its close relative the endive (*C. Endivia*).

Chieti, a city in Central Italy, in the dept. of Abruzzi e Molise, 8 m. from the Adriatic, with a fine Gothic cathedral. It is the capital of a mountainous prov. of the same name. Area (prov.) 1,138 sq. m. Pop. (prov.) 359,000; (town) 50,000.

Chiffchaff (*Sylvia Hippodamia*), a small British singing-bird, a member of the Warbler (Sylviidae) family. Its name is a popular imitation of its song. It has olive-green upper parts, buff underparts and a yellow streak over the eye.

Chignecto Bay, NE. extremity of Canada, separating New Brunswick from Nova Scotia, the territories being joined only by Chignecto Isthmus.

Chigoe, or Jigger, a tropical sand flea which infests the skin of the feet, and multiplies incredibly.

Chihuahua, a town in Mexico; capital name, the largest in Mexico, with famous silver and also copper mines and a cattle-rearing industry. Area (State) 94,860 sq. m. Pop. (State) 491,000 (mainly Mexican); (town) 90,600.

Chilblains, an inflammation and swelling, and more rarely the nose and cheeks and ears, due to the effect of cold on the nerves, diminishing the action of the capillaries or small blood-vessels. Contributory causes are defects in the circulatory system, which make an individual especially liable.

Child, average weight at birth 7 lb. Weight increases by 5 or 6 oz. a week. Length at birth 18 to 20 in. Average growth first year 8 in., second year 4 in., subsequently 2 or 3 in. a year. The fontanelles in the skull generally close after 6 months. The head is about 13 in. round at birth, and some 17 or 18 in. at a year old. Teething takes place at different ages, but should take place within the first year. A child should walk with support at the age of a year, at which time also the child can form words. During the first 8 months most of the child's life is spent in sleeping. Breast-feeding may be supplemented or replaced if necessary by artificial food. At the age of 6 months other food than milk should be given, and the breast-fed baby should be weaned at 8 or 9 months.

Childebert I., son of Clovis, King of Paris, reigned from 511 to 558. C. II., son of Sigebert and Brunhilda, King of Austrasia, reigned from 575 to 596. C. III., son of Thierry III., reigned over all France from 695 to 711, under the mayor of the palace, Pépin d'Héristal.

Childeric I., the son of Meroving and King of the Franks; d. 481. C. II., son of Clovis II., King of Austrasia in 680, and of all France in 670; assassinated 675. C. III., son of the preceding, last of the Merovingian kings, from 743 to 752; was deposed by Pépin le Bref; died in the monastery of St. Omer in 755.

Childermas, (Dec. 28), the festival commemorating the massacre of the children by Herod.

Childers, Robert Erskine, Irish republican, son of Robert Oscar Childers, clerk in the House of Commons, 1895-1914. Hostile to the Free State constitution of 1922, rebelled and was executed. Wrote *The Riddle of the Sands*, a story of German war preparation (1913). (1870-1922).

Children Acts. The present care of children dates back to the Act of 1908, which consolidated laws hitherto existing. The law thus enacted was made more effective and its provisions were enlarged by the Children and Young Persons Act passed in 1933, which provides for the supervision by the local authorities of any private persons who have the care of a child under 9 years old away from its parents. This applies also to Homes, other than those maintained by the Government.

The Act also (Part II) deals with cruelty to children under 14 and young persons (14 to 16), and with exposure to immorality. Part III of the Act makes provision against smoking and the sale of cigarettes, etc., to children under 16. The sale of intoxicating liquor is not permitted to a child under 14 years of age, nor is it permitted to give any intoxicants at all to a child under 5. The law also restricts the employment of children, giving powers to local authorities to enact bye-laws for particular occupations. The age of criminal responsibility is placed at 8 years, and in various respects the law is brought into line with the laws relating to juvenile offenders.

CHICKWEED

Chile, a S. American State with a population of 4,500,000, occupies a strip of country on the average 100 m. broad, between the Andes and the Pacific Ocean, and stretching from Cape Horn northward 2,500 m. to Peru, with Argentine and Bolivia on its E. borders. In the N. are rainless tracts of mountains rich in copper, manganese, silver and other metals, and deserts with wonderful deposits of nitrate. The most productive region is the Atacama desert. In the S. are stretches of pastoral land and virgin forest, with excessive rains, and cold, raw climate. The central portion enjoys a temperate climate with moderate rainfall, and produces excellent wheat, grapes and fruits of all kinds.

The Andes tower above the snow-line, Aconcagua reaching 23,000 ft. The rivers are short and rapid, of little use for navigation. The coast-line is even in the N., but excessively rugged and broken in the S., the most southerly regions being weird and desolate. The people are descendants of Spaniards, mingled with Araucanian Indians; but there is a large European element in all the coast towns. Mining and agriculture are the chief industries; manufactures of various kinds are fostered with foreign capital.

The chief trade is with the U.S.A., Great Britain and Germany. Exports include nitrates and iodine, copper, wool, etc.; imports include textiles, machinery, petroleum and sugar. Santiago is the capital; Valparaiso and Iquique are the principal ports. Railways link up the ports with the industrial centres; that from Valparaiso to Buenos Aires crosses the Andes at the famous Uspallata Pass (9,843 ft.) by a tunnel of over 6 m.

The Government is republican; Roman Catholicism the State religion; education is fairly well fostered; there is a university at Santiago.

Chile Pine, popularly called the "monkey puzzle," a coniferous tree of the genus *Araucaria*. This species (*Araucaria imbricata*) is a native of S. Chile, and grows to a height of over 100 ft. It has been grown in England since 1780.

Chillianwalla, a village in the Punjab, 85 m. NW. of Lahore, the scene in 1849 of a bloody battle in the second Sikh War, in which the Sikhs were defeated by Gen. Gough; it was also the scene of a battle between Alexander the Great and Porus.

Chillingham, a village in Northumberland, 8 m. SW. of Belford, with a park attached to the castle, the seat of the Earl of Tankerville, containing a herd of native white wild cattle.

Chillingworth, William, an able and versatile divine, born at Oxford; champion of the cause of Protestantism against the Pope in *The Religion of Protestants a Safe Way to Salvation*, summing up in the words, "The Bible, the Bible alone, is the religion of Protestants." (1602-1644).

Chillon, Castle of, a castle and state prison built on a rock, 62 ft. from the shore, at the eastern end of the Lake of Geneva; surnamed the Bastille of Switzerland, in which Boulevard, the Genevese patriot was, as celebrated by Byron, incarcerated for six years; it is now an arsenal.

Chiloe, the name of a province in the S. of Chile, also of a thickly wooded island off the coast, the chief constituent part of the province. The island is 115 m. long from N. to S. and 43 m. broad; inhabited chiefly by Indians; exports timber; is said to contain vast deposits of coal. Area (prov.) 12,680 sq. m. Pop. (prov.) 215,000.

Chilperic, the name of two Frankish kings. Chilperic I., attempted to divide the whole of the kingdom on the

death of his father Clotaire, but got a portion only. He married Galswintha, a sister of Brunhilda, but murdered her and married a concubine, Fredegond, who herself later murdered Chilperic's brother Sigebert. Chilperic himself was assassinated in 583. Chilperic II., his son, became King of Neustria in 715, but died 720.

Chiltern Hills, a range of chalk hills, in England, extending about 40 m. NE. from the Thames in Oxfordshire through Buckinghamshire, from 10 to 15 m. broad; the highest point, Coombe Hill, near Wendover, is 852 ft.

Chiltern Hundreds, a wardship forests on the Chiltern Hills against robbers that at one time infested them; now a sinecure office, the acceptance of which enables a member of Parliament to resign his seat if he wishes to retire, the office being regarded as an office of profit under the Crown.

Chimæra, a fire-breathing monster of the Greek mythology, with a goat's body, a lion's head, and a dragon's tail; slain by Bellerophon, and a symbol of any impossible monstrosity.

Chimborazo, one of the loftiest peaks of the Andes, in Ecuador, 20,498 ft.; is an extinct volcano, and covered with perpetual snow; first ascended by Whymper in 1880.

Chimney, an opening in the roof of a house or a passage built in a room up to the roof for the purpose of giving outlet to the smoke of a fire. It also serves to create a draught to help the fire burn. Ornamented chimneys have been a feature of various architectural styles, notably the Elizabethan.

At one time chimneys were swept by small boys who climbed them, a practice which was regulated by various Acts of Parliament in the 19th Century and finally discontinued owing to the invention of a round, flat brush on jointed rods by George Smart in 1805.

Chimpanzee (*Anthropopithecus troglodytes*), a large

African anthropoid ape, from 3 to 4 ft. in height, closely related to the Gorilla, though larger and more allied in several respects to man than any other ape; it is found chiefly in W. Africa.

China, a vast, compact and densely peopled country in E. Asia; bounded on the N. by Mongolia; W. by Tibet and Burma; S. by French Indo-China and the China Sea; and E. by the Pacific. In the W. are lofty mountain ranges running N. and S., from which parallel ranges run E. and W., rising to greatest height in the Yunnan plateau in the S. The Nan Shan form the main ridge, separating the Yangtse-Kiang basin from that of the Si-Kiang. On the W. the Peling Mts., a continuation of the Kwen Lun, divided the Hoang-ho basin from the Yangtse, and form a serious barrier to communication between N. and S. The lofty Nan Shan Mts. (20,000 ft.) form a boundary between China and Tibet.

Three great rivers traverse the country, the Hoang-ho and the Yangtse-Kiang, the latter with many large lakes in its course, and bearing on its waters an innumerable fleet of boats and barges, while in the S. the Si-Kiang, or West River, is the chief waterway of S. China, and is navigable for the greater part of its course. Between the lower courses of

CHIMPANZEE

these rivers lies the Great Plain, one of the vastest and richest in the world, whose yellow soil produces great crops with little labour and no manure. The coast-line is long and much indented, and out of it are bitten the gulfs of Pe-chihli, the Yellow Sea, and Hangchow. There are many small islands off the coast; the mountainous Hainan is the only large one still Chinese.

The climate in the N. has a clear, frosty winter, and warm, rainy summer; in the S. it is hot. The country is rich in evergreens and flowering plants. Agriculture is the chief industry, and, though primitive, it is remarkably painstaking and skilful. Forests have everywhere been cleared away, and the whole country is marvellously fertile. In the N. wheat, millet and other cereals, and cotton are grown; in the S. rice, tea, sugar, silk and indigo. Its mineral wealth is enormous. Iron, copper and coal abound in vast quantities; coalfields exist in every province of China proper and Manchuria. These in E. Shansi and S. Hunan, Kaiping, N. Hopei and Poshan are very productive. Anthracite is yielded at Fanchanghsien, E. Shansi and in E. Hunan. Iron is abundant in Shansi, Manchuria and W. Hopei. Over 60 per cent. of the world's antimony comes from China, and there are tin deposits in Yunnan.

Water is the chief means of communication, and the Yangtze affords unrivalled navigation for ocean steamers through a densely peopled region. Hankow, 700 m. from the mouth, can accommodate steamers drawing 30 ft. of water during April to November. Where boats cannot be used transport is chiefly by human porters and pack-animals. The canal system is highly developed. Most of the railways have been constructed with foreign capital, and are under the nominal control of the Chinese government.

The chief exports are oils, oilcake, silk products, textiles, metals, cereals, tea, sugar, pottery, furs and hides, tallow, peas and beans, while the principal imports are cotton and cotton goods, hardware, machinery, ship-building material, railway material, petroleum and timber. About twenty-five ports are open to British vessels, of which the largest are Shanghai and Canton, others being Hong-Kong (British), Foochow and Tientsin.

The people are a mixed race of Mongol type, kindly, courteous, peaceful and extremely industrious, and in their own way well educated. Buddhism is the prevailing faith of the masses, Confucianism of the upper classes. The Japanese War of 1894-1895 betrayed the weakness of the national organisation, and in 1911 a revolution broke out in Hankow, which resulted in the removal of the Manchu dynasty and the establishment in 1912 of a republic. Attempts to restore the monarchy from 1915 to 1917 failed, and in 1920 Canton established a separate republic. The Cantonese in 1925 started a civil war against the Peking Government, and in 1926 captured Hankow, Shanghai and Nanking. A British Expeditionary Force defended the International Settlement at Shanghai, but the concession at Hankow was surrendered. Later, Nanking broke away from the Hankow Government.

Great strides had been made in the reconstruction of the country, but the National Government has come into conflict with the Japanese on several occasions, with the result that Manchuria and Jehol were lost in 1931-1932, and hostilities, without, however, any declaration of war, began again in 1937. The Japanese soon gained control of the Peking-Tientsin area, and repeatedly bombed Shanghai, Nanking, Canton, and other great cities from the air, the Chinese government moving its capital to Hankow and later to Chungking. By the autumn most of North China was in the hands of the Japanese or of

Japanese-controlled governments; a number of "incidents" occurred, including the bombing of a car containing the British ambassador to China, resulting in serious injuries to him, and the sinking of an American warship, the *Panay*. Early in 1938 Nanking was occupied, and a ruling council under Japanese influence set up, but thereafter the Chinese troops rallied, thus holding up for a time Japanese attempts on Hankow and preventing the forward movement in South China. Both Hankow and Canton, however, fell to the Japanese in Oct. 1938. Area (China proper) 2,903,000 sq. m. Pop. 422,000,000.

China, The Great Wall, a wall, with towers and forts at intervals, over 1,400 m. long, from 20 to 30 ft. high, and 25 ft. broad, which separates China from Mongolia on the N., and traverses high hills and deep valleys in its winding course.

China-clay, or Kaolin (from the Chinese name of the hilly district where porcelain is made), a mineral, a silicate of aluminium, obtained from the decomposition of felspar. It is a fine white powder, free from iron, and readily miscible with water. It is used in making porcelain; also for coating art-paper, etc. China-clay is found in England (Cornwall), France, Germany and U.S.A.

Chi-Nan, or Tai-Nan, capital of the province of Shantung, N. China, a historic city standing near the Hwang-ho, opened to foreign trade in 1904. Pop. 300,000.

Chinaware, a porcelain, a species of fine earthenware. In the making of porcelain china-clay is mixed with powdered felspar that is undecomposed, called potunse. Sand or silica may also be ground and mixed in. As there is no iron in china-clay, the resulting porcelain is pure white when fired; the finest is almost transparent. The Chinese excelled in the art of making porcelain, and invented fine coloured glazes. The art was introduced into Europe by Venetian travellers from China, in the 15th Century, and Italy became the centre for the manufacture of chinaware in Europe up to the 18th Century. The German industry also produced successful imitations of Chinese porcelain, and in France the celebrated factory at Sevres was set up in 1756. At about the same time factories were started in England at Chelsea and Worcester.

Chinchilla, a family of rodents (the *Chinchillidae*) of S. America, hunted for their beautiful fur, which is soft and of a grey colour. They are found chiefly in the mountainous districts of Peru and Chile and are closely allied to the Agoutis. There are three genera, the true Chinchillas (including the *Chinchilla laniger*, the most sought after species), the *Lagidium* and the *Lepusomys* (only one species which is known also as the *Viscacha*). The Chinchillas are about the size of a rabbit and live in burrows.

CHINCHILLA

Chinese Eastern Railway

A railway in Manchuria (Manchukuo), running from Manchuli SE. through Harbin to Vladivostok in Russia, and from Harbin to Port Arthur, built by the Russians with Russian and French capital. It has been a source of much friction. In 1905 the S. portion of the Harbin-Port Arthur branch line, from Changchun to Port Arthur fell into Japanese hands, and in 1935 the Russian Government sold the whole system to the Manchukuo Government.

Chinese White, a pigment made out of zinc oxide. It is used by artists as a foundation white, but is more successful as a water-colour than with oil.

Chingford, municipal borough of Essex, England, between the Lea and Epping Forest, a residential suburb of N. London. Pop. 22,000.

Chinkiang, treaty-port of China on the Yangtze, in the province of Kiang-su. Pop. 200,000.

Chino-Japanese War (1894-1895) was the outcome of the rivalry between China and Japan over the suzerainty of Korea. Korea, nominally independent, was in a state of total disorder. Japan's efforts to impose reform and press her economic advantages met with no response from the Koreans or the Chinese. Japan presented an ultimatum, and when the reply was unsatisfactory, captured the capital of Korea. War with China followed. In Sept. 1894 the Japanese occupied Asan, and also defeated the Chinese fleet off the Yalu R. The capture of Port Arthur in November and later of Wei-hai-wei ended the war. In April 1895 China was forced to sign the Treaty of Shimonoseki. In addition to indemnity, China agreed to cede the Liao-Tung peninsula (including Port Arthur), the island of Formosa and the Pescadore Is. France, Russia and Germany stepped in to prevent the cession of Liao-Tung; to this Japan agreed in exchange for increased indemnity. For subsequent relations between China and Japan and the wars of 1931-2 and 1937-8 see under China.

Chinook, a tribe of N. American Indians of Washington and Oregon, whose language provided the *lingua franca* which is spoken on a great portion of the Pacific coast. Only a few remain on the Columbia R. in Washington.

Chinook Wind, a warm wind blowing down the eastern side of the Rocky Mts., which keeps the pasture lands of Montana and Wyoming free from snow in the winter.

Chintz, a calico printed with flowers and other devices in different colours; originally of Eastern manufacture.

Chioggia (Chiozza), a seaport 16 m. S. of Venice, built on piles, on a lagoon island at the mouth of the Brenta, connected with the mainland by a bridge with 43 arches. Chief industry, fishing. Pop. 22,000.

Chios, a small island in the Grecian Archipelago; subject to earthquakes; yields oranges, lemons, figs, olives, and wine in great quantities; claims to have been the birthplace of Homer. There is an altar to Cybele still extant, and, at Cape Phanee, a temple to Apollo. Pop. (island) 76,000; (town) 22,000.

Chipmunk, the American burrowing ground-squirrel or Striped Gopher, marked with dark bands on the back, and possessing a tail less bushy than that of the eastern squirrel.

CHIPMUNK

Chippendale, Thomas, a cabinet-maker, born in Warwickshire; famous for the quality and style of his workmanship; his work still much in request. (b. 1718-1779).

Chisambham, an ancient market town of Wiltshire, on the A-40, an agricultural centre,

with bacon-curing and condensed-milk factories. Pop. 8,500.

Chippeways, a N. American Indian tribe, located in Michigan, U.S.A., and in Canada, adjoining; originally occupied the N. and W. of Lake Superior; known also as Ojibways, they have mostly settled down in agricultural communities. They number about 27,000.

Chirimoyer, fruit of the custard-apple type, being the *Annona Cherimolia* of the order Annonaceae, and cultivated in tropical America.

Chiron, a celebrated Centaur, in whose nature the animal element was subject to the human, and who was with the education of certain heroes of (among others Pelous, Theseus and Ad) was endowed with the gift of prophecy skilled in athletics as well as music and healing art. See Centaurs.

Chislehurst, a village in Kent, SE. of London. Napoleon III. died in exile in 1873. Here are the famous Chislehurst Caves which extend for miles underground, and the origin and use of which have been much discussed but never settled. Pop. 9,900.

Chiswick, a suburb of London, 7 m. W. of St. Paul's; the Church of St. Nicholas has monuments to several people of distinction. Hogarth is buried there. Pop. (with Brentford) 63,000.

Chitral, a State on the frontier of India, NW. of Cashmere; since 1895 under the protection of the British, who have maintained forces there; a place of great strategical importance, as it commands important passes through the Hindu-Kush Mts. Pop. about 60,000. Also the name of the capital. Pop. 2,500.

Chittagong, a maritime district and a seaport, 220 m. E. of Calcutta; the country is hilly and heavily forested; exports rice, tea and jute. Pop. 38,000.

Chivalry, a system of knighthood, for the qualifications required were dignity, courtesy, bravery, generosity; the aim of which was the defence of right against wrong, of the weak against the strong, and especially of the honour and the purity of women, and the spirit of which was of Christian derivation; originally a military organisation in defence of Christianity against the infidel.

Chivalry, Court of, a court similar to the modern court-martial, which superseded it in the 18th Century. It was set up in the reign of Edward III. (1327-1377), and was presided over by the Earl Marshal and the Lord High Constable. The jurisdiction of the Earl Marshal was confirmed by Letters Patent of James I. in 1623.

Chive (*Allium Schoenoprasum*), a bulbous plant of the natural order Liliaceae, closely related to the onion, leek, shallot and garlic, and native to Britain. It is cultivated for the sake of the leaves, which are considered edible, and are used as flavouring in stews, etc.

Chloral, a colourless narcotic liquid, obtained by the action of chlorine on alcohol; treated with water it produces *chloral hydrate*; was discovered by Liebig, 1831.

Chlorates, salts resulting from the union of chlorine acid with a basic metal. Several are valuable commercially, especially potassium chlorate, formed by heating potassium hydroxide and passing chlorine into it. The chlorate is rich in oxygen, and its oxidising properties make potassium chlorates useful in the manufacture of matches and fireworks.

Chlorimetry, the process by which a chlorine compound is tested. The usual method is by volumetric analysis—that is to say, the chlorine compound is added to a measured volume of some substance (e.g., arsenious acid), which can be oxidised until by means of an indicator it is found that the precise point has been reached when oxidation is complete.

Chlorine, a non-metallic chemical element belonging to the halogen ("salt-producing") family, the other members of which are fluorine, bromine, and iodine. Symbol Cl, atomic number 17, atomic weight 35.46. It was first discovered by Scheele in 1774, but was regarded as a compound of oxygen and muriatic acid (the modern hydrochloric acid) until 1810, when Sir Humphry Davy proved it to be an element. It is manufactured by the electrolysis of common salt solution, and is put on the market as a golden-yellow liquid after compression into steel cylinders; at ordinary pressures it is a greenish-yellow gas. It is a very reactive element, and combines directly with hydrogen to form hydrogen chloride ("hydrochloric acid gas"), and with many metals to form the metallic chlorides.

Chlorine is a good bleaching agent, the colouring-matter being broken up by the oxygen released from water when the chlorine combines with the hydrogen; for this purpose it is used either as the gas or in the form of bleaching-powder (q.v.). Owing to its high density compared with air and to its very toxic character, it has been used as a military weapon, but is much less effective than certain other gases such as mustard-gas.

Hydrochloric acid, HCl, is among the strongest acids known; it is made either by heating common salt (sodium chloride, NaCl) with concentrated sulphuric acid, or by burning chlorine in a stream of hydrogen. The hydrogen chloride obtained in both ways is dissolved in water, and the solution is known as hydrochloric acid ("spirits of salts"). The salts of hydrochloric acid are called chlorides. Ordinary chlorine consists of a mixture of two isotopes, of atomic weights 35 and 37. By bombardment with neutrons, chlorine has been made to show a transitory radioactivity.

Chlorite, a soft mineral of an olive-green colour. Its formation has been due to the metamorphism of various crystalline minerals.

Chloroform, or **Trichloromethane** in extensive use as an anesthetic; produced by treating alcohol with chloride of lime.

Chlorophyll, the characteristic green of plants, is the substance which effects carbon-assimilation (q.v.) by its power of harnessing part of the energy of sunlight. Chlorophyll is actually a mixture of two bodies, known respectively as α -Chlorophyll and β -Chlorophyll; the former is bluish-green in colour, and is present to about three times the extent of the latter, which is yellowish-green.

It is an interesting, and no doubt significant fact, that the constitution of chlorophyll is related to that of haematin, the red colouring-matter of the blood. In the plant, chlorophyll is contained in protoplasmic bodies called chloroplasts, where it is always accompanied by two yellow substances known as carotin and xanthophyll. Chlorophyll may be extracted from leaves by macerating them in boiling water, and then steeping them in warm alcohol or acetone, in which the chlorophyll dissolves.

Chlorosis, green sickness, a form of anaemia incident to young females at a critical period of life, causing a pale-greenish complexion.

Chocolate, a sweetmeat, either in prepared form, a tablet or powder form, of the cacao tree (*Theobroma cacao*). In manufacture the fat content of the cocoa bean is not extracted, but the beans are roasted, ground and made into a paste to which flavouring materials, sugar, etc., are added.

CACAO TREE

Choctaws, a tribe of American Indians, settled to civilised life in Oklahoma, U.S.A.; formerly a powerful nation in the Mississippi region, possessing considerable culture. They number about 18,000.

Choir, a company of singers trained to accompaniment. The term applies especially to the organised singers who take part in a church service, usually confined to male voices only. Architecturally, the choir or chancel is that part of a church or cathedral where the choir sit, divided into two halves: the precentor's side (north) and the dean's (south).

Choke Damp, the name given by miners to carbon dioxide, owing to the fact that this gas, produced by the combustion of explosive gases, causes suffocation.

Choking, suffocation caused either by a stoppage within the windpipe or by external pressure being applied from without, paralysing the heart and lungs. Death ensues. A stoppage inside the windpipe may be due to swallowed food obstructing the epiglottis, which protects the windpipe at the back of the throat.

Cholera, Asiatic, an epidemic disease characterised by violent vomiting and purging, accompanied with spasms, great pain and debility; originated in India, and has frequently spread itself by way of Asia into populous centres of both Europe and America, especially in the epidemic of 1892. It is due to microbic infection, the microbe being the *Cholera spirillum* or Koch bacillus, which is transmitted by means of infected water, flies, food, etc.

Cholon, a municipality of French Cochinchina, near Saigon, and the greatest commercial centre of the country. The principal trade is in rice. Pop. 208,000.

Chopin, **Frederic Francois**, a musical Polish origin; his genius for music early developed itself; distinguished himself as a pianist first at Vienna and then in Paris, where he introduced the mazurka; became the idol of the salons; visited England in 1848; formed a friendship with George Sand (Mme. Dudevant) which lasted till 1847; died of consumption in Paris. (1809-1849).

Chorale, a musical composition originally used by Luther and used in the German Reformed Church; sometimes based on hymn tunes, sometimes on secular airs.

Chord, originally the string of a musical instrument, is now used to mean a combination of tones, in harmony, and performed simultaneously. The notes of a chord are of different pitch. A note with its third, major or minor, and fifth, is called a common chord.

Chorea, or St. Vitus's Dance, a disease of the brain allied to acute rheumatism. Although generally considered to children, one form of it attacks adults. Symptoms are uncontrollable spasms of the limbs, body and facial muscles, usually

stages are shown by anæmia, restlessness, and emotional instability.

Chorley, a manufacturing town in N. Lancashire, England, 21 m. N.E. of Liverpool, with mines and quarries near it; a centre for cotton-spinning, weaving and bleaching. Pop. 31,000.

Chorus, in the ancient drama a group of persons introduced on the stage representing witnesses of what is being acted, and giving expression to their thoughts and feelings regarding it; originally a band of singers and dancers on festive occasions, in connection particularly with the Bacchus worship.

Chosroes, the name of 2 kings of Persia of the Sassanid dynasty. C. I., who reigned A.D. 531-579, fought successfully against the Romans on more than one occasion, though he commenced his reign by making "eternal" peace with them. C. II., his grandson, reigned 590-628, also fought successfully against the Romans, plundering Syria, Asia Minor, Damascus, Jerusalem and Egypt, though the Holy Cross was restored to Jerusalem by the Emperor Heraclius in 628. Chosroes, being assassinated shortly afterwards.

Chota Udepur, a hilly native state in the Gujarat States Agency, India, with a capital of the same name. Area 890 sq. m. Pop. 144,600.

Chouans, insurrectionary royalists in France, especially in Brittany, under Jean Cottereau (1767-1794) and Georges Cadoudal (1771-1804) during the French Revolution, and even for a time under the Empire, when their headquarters were in London; so named from their muster by night at the sound of the *chat-huant*, the screech-owl, a nocturnal bird of prey which has a weird cry. Cottereau died in an ambush, Cadoudal by execution, after having been beaten at Quiberon in 1795.

Chough, a sub-family (the *Fregillinae*) of birds of the Crow (*Corvidae*) family, related to magpies and jays, so named from its peculiar cry. It is usually black, with red feet and a yellow or red beak of great strength. Its food is insects and fruit. They are now somewhat rare. Species include the Cornish Chough (*Fregillinae graculus*), the Common Chough (*Pyrrhonorax graculus*) and the Alpine Chough (*P. alpinus*).

Chow-Chow, a Chinese dog, popular in Britain as a pet. It

has a black tongue and a uni-colour black, red, yellow, blue or white coat. They are good house dogs and intelligent companions.

CHOW-CHOW

Chrétien, or Chrestien, de Troyes, a French poet and author of the latter half of the 12th Century; author of a number of vigorously written romances which are among the earliest connected with chivalry and the Round Table. His works include *Chesalier de la Charette*, *Le Conte del Graal* and *Perceval*.

Chrim, a mixture of olive oil and balm or spices used in Roman Catholic, Greek and orthodox churches for the anointing ceremonies in the confirmation, extreme unction, baptismal and other services.

Christ, the anointed one, the Christ, the Messiah, a word which, with the Jews, implied the Great King who would free them from subjection and restore them their kingdom. See **Jesus Christ**.

Christians, Disciples of, a religious sect sometimes called Campbellites, founded by Alexander Campbell 1800.

Christadelphians, a sect, called **Christadelphians**, also Thomasites, founded by John Thomas of London in 1848, and having adherents in England and America. Their chief distinctive article of faith is conditional immortality—that is, immortality only to those who believe in Christ, and die believing in Him.

Christ Church, a college of Oxford University, founded by Wolsey, 1525; famous scholars of this college have included Gladstone, Ruskin and John Locke.

Christchurch, capital of the province of Canterbury, New Zealand, 5 m. from the sea; Lyttelton the port. Pop. 132,500. Also a town in Hampshire, England, at the junction of the Stour and Avon. Notable for its fine old Priory of Holy Trinity, known in Saxon times as Twineham. Pop. 9,000.

Christian, the name of ten kings of the first began to reign in 1448 and the following deserve notice: **Christian II.**, conquered Sweden, but, proving a tyrant, was driven from the throne by Gustavus Vasa in 1522, upon which his own subjects deposed him, an act which he resisted by force of arms; he was defeated in 1531, his person seized, and imprisoned for life. (1481-1559). **Christian IV.**, king from 1588 to 1648; took part on the Protestant side in the Thirty Years War, and was defeated by Tilly; he was a good ruler, and was much beloved by his subjects; developed and improved the Danish navy. (1577-1648). **Christian IX.**, king from 1863 to 1906; son of Duke William of Schleswig-Holstein, father of the late Queen Alexandra, George I., King of Greece, and the dowager Empress of Russia. (1818-1906). **Christian X.**, married in 1898 Princess Alexandrine of Mecklenburg-Schwerin, and succeeded to the throne in May, 1912. (1870-).

Christian, Prince (Frederick Christian Charles Augustus), was born at Augustenburg, son of Christian August, Duke of Schleswig-Holstein. In conflict with Christian VIII. of Denmark in 1848, and again with Denmark on that king's death 1863. Married, 1866, Princess Helena, third daughter of Queen Victoria; thenceforward England was his home. His eldest son, Prince Christian Victor, died at Pretoria 1900. (1831-1917).

Christian Brothers, a Roman Catholic educational Institute founded in Waterford, Ireland, in 1802 with branches in England and the colonies.

Christian Endeavour Societies, associations originally organised in the U.S.A., and from the first undenominational, their purpose being especially the spreading of religious influence and the promotion of the Christian life amongst members. The first was established by Dr. Francis K. Clark at Portland, Maine, in 1881, in his Congregational Church, and was called the "Young People's Society of Christian Endeavour."

Christiania, the former name of Oslo (q.v.), capital of Norway.

Christianity, the religion of which Jesus Christ is the founder and the centre, and which has spread from Jerusalem throughout the world in the last 2,000 years. Its believers see God revealing Himself in Jesus Christ, His Son, who was crucified that they might be reconciled unto Him and that sin should no more have dominion over them. The religion, with its accompanying high view of the worth of the human soul, has been the greatest civilising factor the world has ever known.

When Christianity was likely to become merely a sect of Judaism, St. Paul carried it into Europe and to Rome, which under Constantine at length adopted it as the official religion. Rome held sway over the Church till the Reformation of the 16th Century established Protestantism, which with Catholicism has since been a wing of the Christian Church in spreading the gospel to all parts of the globe.

Christian Science, a religious doctrine of faith-healing founded by Mrs. Mary Baker Eddy, and taught by her in the U.S.A. from 1836 till her death in 1910. By 1909 there were 1,100 Christian Science churches throughout the world and 4,000 Christian Science practitioners in America, who practise mental healing to cure physical diseases. The official organ is the *Christian Science Monitor*. The doctrine is expounded in the text-book *Science and Health, with Key to the Scriptures*.

Christina, Queen of Sweden, daughter of Adolfus; and only child of Gustavus Adolphus; was trained in manly exercises; governed the country well at first and filled her court with learned men, but later her royal duties becoming irksome to her and her interference in foreign politics of a flighty and unsuccessful nature, she declared her cousin as her successor, resigned the throne, and turned Catholic; her cousin dying, she attempted to reclaim the crown without success; retired to Rome, where she died. (1626-1689).

Christmas, the festival in celebration of the birth of Christ, now celebrated all over Christendom on Dec. 25, as coinciding with an old heathen festival celebrated at the winter solstice, the day of the return of the sun northward, and in jubilation of the prospect of the renewal of life in the spring.

Christmas Cards, greetings sent to friends at Christmas, a practice dating from 1844, when W. E. Dobson, R.A., designed one to send to a friend.

Christmas Island, in the Indian Ocean, 190 m. SW. of Java, forms a part of the Straits Settlements, and has large deposits of phosphates, exporting over 100,000 tons a year. The area is 60 sq. m. and the pop. 1,000. Also the name of the largest atoll in the Pacific, annexed by Britain (1888), and attached to the Gilbert and Ellice Is. Colony. Pop. 40.

Christmas Rose, or **Black Hellebore** (*Helleborus*

niger), a species of Ranunculaceae, a native of Europe, flowering in winter. It contains an acrid poison. The plant bears a close resemblance to the rose. The flower is white, and the reddish calyx turns green after fertilisation.

Christophe, a negro, born in Grenada; one of the leaders of the insurgent slaves in Haiti, who, proving successful in arms against the French, became king under the title of Henry I., but ruling despotically provoked revolt and shot himself through the heart. (1767-1820).

Christopher, St. (the Christ-Bearer), according to Christian legend a giant of great stature and strength, who, after serving the devil for a time, gave himself up to the service of Christ by carrying pilgrims across a bridgeless river, when one day a little child, who happened to be none else than Christ Himself, appeared to be

carried over. As he bore Him across, the child grew heavier and heavier, till he was nearly baffled in landing Him of the opposite shore. The giant represented the Church, and the increasing weight of the child the increasing sin and misery of the world. He was martyred in 260. He is the patron saint of ferrymen.

Christopher's, St., popularly called the **Leeward Is.**, discovered by Columbus (1493), who named it after himself; belongs to England; has sugar plantations. Area 68 sq. m. Pop. 22,000. Part of the Presidency of St. Christopher (St. Kitts) and Nevis (with Anguilla).

Christ's Hospital, the **Blue-Coat School**, founded in 1552, a large institution, 320 boys at Horsham and 280 girls at Hertford; entrance to it is gained partly by presentation and partly by competition, and attached are numerous exhibitions and prizes; among the *alumni* have been Bishop Stillingfleet, Coleridge, Leigh Hunt and Charles Lamb. Until 1902 the school stood in the site of Greyfriars Monastery in Newgate Street. The boys still wear the 16th-Century costume, comprising knee-breeches, yellow stockings and blue gowns, without headgear.

Christ's Thorn, the name of certain Mediterranean shrubs of the order Rhamnaceae, in particular the *Paliurus aculeatus*, and the *Ziziphus Spina-Christi*, from which Christ's crown of thorns is supposed to have been made.

Chromatic Scale, in music, a succession of semitones usually written with sharps ascending and flats descending.

Chromatin, part of the protoplasm of a cell-nucleus, so called because it "colours" or dyes more readily than the rest. In the nucleus it forms a complex network—the "Chromatin network."

Chromite, a mineral, the chief source of chromium, and composed of chromium, iron and oxygen. It is sometimes called chrome-iron-ore and chromic iron. It is black or dark brown in colour, and is found in ultra-basic igneous rocks, in the U.S.A., New Zealand, Turkey, the Ural Mts. and the Shetland Isles. It is a very hard substance.

Chromium, a chemical metallic element belonging to the same family as molybdenum, tungsten and uranium. Symbol Cr, atomic number 24, atomic weight 52.01. The metal itself is used for plating other metals, since it possesses a fine bluish-white sheen and is very resistant to corrosion: the (usually steel) article to be chromium-plated is first plated with copper, then with nickel, and is afterwards immersed in a bath containing a solution of chromium sulphate and chromic acid and subjected to electrolysis, itself forming the anode. The chromium is deposited as a thin, coherent film. Various chromium compounds are used industrially and are important in the laboratory.

Chromosome, a body—usually one of several such—formed from the chromatin network of a cell-nucleus during the process of normal cell-division (Karyokinesis or Mitosis). The chromosome is supposed to be the carrier of hereditary factors. See *Cell (Biological)* and *Genetics and Heredity*.

Chromosphere, the outer layer of the sun's atmosphere, consisting of glowing, red gases which frequently burst forth in the form of "Prominences," normally overpowered by the light of the Photosphere, but visible during a total eclipse.

CHRISTMAS
ROSE

Chronicle, a history arranged in order of time. The Anglo-Saxon *Chronicle* is the oldest existing English chronicle, and much of it is attributed to Alfred the Great. It exists in 7 manuscripts, and hand manuscript goes as far as 1154. It was first printed in 1843.

Chronicles I. and II., two historical books of the Old Testament, the narratives of which, with additions and omissions, run parallel with those of Samuel and Kings, but, written from a priestly standpoint, give the chief prominence to the history of Judah as the support in Jerusalem of the ritual of which the priests were the custodians; Ezra and Nehemiah are continuations.

Chronograph, an instrument registering the passage of time either temporarily as in a stop-watch, or permanently, as in the case of those in which by a clockwork device a permanent record is made on a piece of paper or other suitable medium at regular intervals. Strictly the word chronograph should be applied only to such a recording instrument, and not to a stop-watch, which is more strictly a chronoscope. For the measurement of very small intervals of time, electrical chronographs are used.

STOP-WATCH

Chronology, the science which treats of time and has for its object the arrangement and exhibition of historical events in order of time and the ascertaining of the intervals between them. Its basis is necessarily the method of measuring or computing time by regular divisions or periods, according to the revolutions of the earth or moon. Dates are fixed from an arbitrary point or epoch, which forms the beginning of an era. The more important of these are the creation of the world among the Jews; the birth of Christ among the Christians; the Olympiads, among the Greeks; the founding of Rome among the Romans; the Hijra or flight of Mohammed among the Mohammedans, etc. As this method is applicable only to historic periods, it became necessary to devise some other means of computing time, so as to obtain some knowledge of what took place on the globe prior to the later stages of human civilisation. The new departure of chronological research is founded on the science of geology.

Chronometer, a time-keeping instrument used for determining longitude at sea or for other purposes where accuracy and portability are necessary. Some fit the pocket, though for the most part they are set in gimbals, so as to avoid any disturbance due to the motion of the boat. Though very much like a well-made watch, as a rule there are special adjustments in the mechanism to secure the greatest possible accuracy.

Chrysalis, or Chrysalid, the name of the pupa of an insect, especially that of a butterfly or moth. The pupa is often enclosed in a sheath of gossamer or silk forming a cocoon, of the silk-worm. The chrysalis is the resting stage in the creature's metamorphosis. The larva, having acquired a sufficient store of food, disintegrates, and the mature insect is built up of the changing tissues.

Chrysanthemum, literally the gold-flower, a genus of Compositae comprising over 140 species, and natives of all countries except America. The plants are shrubs or herbaceous, and are generally hardy in Britain.

The autumn varieties came originally from China and Japan. Besides the many common species in Britain, there are the corn-margold (*C. segetum*), the ox-eye or dog-daisy (*C. Leucanthemum*), the marguerite of France (*C. frutescens*), the trefoil daisy (*C. carinatum*) and the feverfew (*C. Parthenium*).

Chrysanthemum, Japanese order of chivalry instituted in 1877 and conferred on Japanese and foreign princes.

Chrysolite, a mineral substance, a yellowish-green variety of olivine, used for jewellery; composed of silicate of magnesium and iron. It is found as crystals having four or six-sided prisms.

Chrysostom, St. John, that is, Mouth of Gold—so called from his eloquence; born at Antioch; converted to Christianity from a mild paganism; became one of the Fathers of the Church, and Patriarch of Constantinople; he was zealous in suppressing heresy as well as corruption in the Church, and was for that reason thrice over subjected to banishment. In the course of the third exile, while on the way, he died, though his remains were brought back to Constantinople; he left behind him sermons, homilies, commentaries and epistles. (c. 345-407). Festival, Jan. 27.

Chub (*Leuciscus cephalus*), a fish belonging to the carp (*Cyprinidae*) family,

brownish-green in colour, with red ventral and anal fins, found in swift streams all over Europe and in Asia Minor. In N. America the name is given also to the *Leucosomus corporalis*.

CHUB

Chubb, Charles, locksmith, began business in Winchester, removed to Portsea, where he improved the "detector" lock patented by his brother Jeremiah in 1818. He afterwards established a factory in Wolverhampton, and in 1835 patented a burglar-proof and fireproof safe. (d. 1845).

Chubut, territory of S. Argentina, stretching from Andes to Atlantic, mainly an arid waste. Cattle, sheep and horses are reared. The R. Chubut flows through it. Rawson is the capital, Madryn the chief port. Area 87,000 sq. m. Pop. 60,000.

Chungking, treaty port and walled town of China, the commercial capital of Szechwan province, at the junction of the Kialing and the Yangtse. Pop. 635,000.

Chuquisaca, a dept. of Bolivia between the Andes, R. Paraguay and the Brazilian border. Area 36,300 sq. m. Pop. 307,000. The capital of the dept., Sucre (or Chuquisaca), is also the nominal capital of the whole of Bolivia.

Church, a term which from the 3rd Century was used as well as *ecclesia*, to signify a Christian place of worship, a word which in its widest sense denotes, in the Teutonic languages, the whole community of Christians, thus rendering the term *ecclesia* used by the New Testament writers. In more restricted significations it denotes a particular section of the Christian community differing in doctrinal matters from the remainder, as the Roman Catholic Church, the Protestant Church, etc.; or to designate the recognised leading Church of a nation, as the English, Scottish or French Church. In yet another sense it signifies the building specially devoted to Christian worship.

After the conversion of Constantine, the basilicas or public halls and courts of justice and some of the heathen temples were consecrated as Christian churches. When

churches came to be specially built for Christian worship, their forms were various—round, octagonal, etc. Later on the form with the cross aisle or transept (cruciform churches) became common. Early British churches were built of wood; the first stone churches erected being that of Whitthorn, Galloway (6th Century) and that of York (7th Century).

Generally speaking, any building set apart for religious ordinances is called a church, though when of a minor kind it is usually designated a chapel. The term church, however, is often restricted to the buildings for worship connected with a national establishment. They are classed as a *cathedral*, when containing a bishop's throne; *collegiate*, when served by a dean or chapter; *conventual* or *monastery*, when connected with a convent or monastery; *abbey* or *priory*, when under an abbot or prior; and *parochial*, when under the charge of a secular priest. The history of the Church of England begins with its establishment by Henry VIII. In 1534, under the Act by which papal authority was abolished, in 1567 Puritanism began to spread and 1662 saw the rise of Nonconformity. John Wesley and Whitfield founded Methodism in 1739.

Church, Richard William, Dean of St. Paul's, born in Lisbon; a scholarly man; distinguished himself first as much by his *Essays and Reviews*, wrote thoughtful sermons, and *A Life of Anselm*, also essays on eminent men of letters, such as Dante, Spenser and Bacon. (1815-1890).

Church, States of the, the Papal States, extending irregularly from the Po to Naples, of which the Pope was the temporal sovereign until their seizure by Italy in 1870. By the Lateran Treaty of 1929 the States were restored to the Pope in a modified form. He was recognised in full and independent sovereignty of the Holy See, and received a cash payment and an income as compensation for his loss of temporal power.

Church Army, a movement, similar to the Salvation Army but confined to the Church of England, founded in 1882 by Prebendary W. Carlile for evangelistic work in the slums.

Church Assembly, a body consisting of 3 houses, the Bishops, Clergy and Laity, set up in 1920 "to deliberate on all matters concerning the Church of England and to make provision in respect thereof." Where an alteration is contemplated requiring Parliamentary sanction, this is sought under the Church Enabling Act of 1919.

Church Congress, the name of the gatherings of ministers and laymen of the Church of England held annually for free discussion of important questions affecting religious, social and moral subjects. The meetings have no legislative powers, and no vote is taken after discussion. The first was held at Cambridge in 1861.

Church Enabling Act, the title of a measure passed in 1919 setting up the Church Assembly with wide powers delegated from the parishes, but subject to Parliamentary veto. Piloted through Parliament by Lord Selborne.

Churchill, Charles, an English poet, born at Westminster; began life as a curate, took himself to the satire, first of the actors of the time, in his *Rocad*, then of his critics, in his *Apology* the wealth and fame which he thus acquired leading him into such unseemly ways of living that he was compelled to resign his curacy. He later attacked Dr. Johnson in his *Ghost*; and wrote numerous satires, all vigorous, his happiest being deemed that against the Scots, entitled *The Prophecy of Famine*. (1781-1784).

Churchill, Lord Randolph, an English Conservative politician, third son of the 7th Duke of Marlborough, was,

a man of mark, and more than once in politics, could never heart and soul join any party and settle down to steady statesmanship; following the defeat of the Tories in 1889, he founded and led the Fourth Party, which aimed at the vindication of Conservative principles; was a foremost advocate of Tory democracy; set out on travel, fell ill on the journey, and came home to die. (1849-1895).

Churchill, Winston, American novelist, published in 1899, was his first success, and was followed by *The Crisis* and *The Crossing*, among others. (1871-).

Churchill, St. Hon. Winston Spencer, British politician. Son of Lord Randolph Churchill, he started his career as a soldier, fighting in India in 1897 and Egypt in 1899, afterwards going to S. Africa, where he acted as war correspondent. Politically he started as a Conservative, and turned Liberal on the tariff issue. He first took office as Under-Secretary for the Colonies in 1905, and became President of the Board of Trade in 1908, an office which he left for the Home Secretaryship in 1910-1911, during which period the "Sidney Street siege" took place. He was First Lord of the Admiralty on the outbreak of the Great War, and was responsible for the speedy mobilisation of the fleet, the glamour of which achievement was later diminished by his handling of the troops at Antwerp and the Dardanelles campaign. He returned to Parliament in 1916, and became successively Minister of Munitions, War Secretary, Air Minister and Colonial Secretary. On the defeat of the Coalition he went for a time into the political wilderness, emerging a Conservative and becoming Chancellor of the Exchequer under Baldwin in 1924, a post he held till the Conservative defeat of 1929, since when he has not held any ministerial office. (1874-).

Churchill River, a river of Canada, chieftain and flowing through numerous lakes to the Hudson Bay. It is 1,000 m. long. The town of Churchill stands at the mouth, is a fine harbour, open during the summer months, a port of export in communication with Liverpool. It is in Manitoba at the terminus of the Hudson Bay railway.

Churching of Women, the public thanksgiving in church by mothers for successful childbirth, obligatory in Catholic and Greek churches but discontinued in the English church.

Church Lads' Brigade, a boys' organisation confined to members of the Church of England, and designed to instil regard for religion, health and citizenship. It is organised on military lines.

Church of England, the Protestant Church established by law in England, dating from 1534 when Henry VIII. was declared its head and the authority of Rome was repudiated. Its present Prayer Book dates from 1662. The Enabling Act of 1919 gave greater internal freedom to the Church, and especially to the laity. The Church of England is governed by Bishops.

Church Rate, a tax formerly levied on land within a parish to meet the expenses of services and of maintenance of Church of England buildings, bells, etc. Since the Compulsory Church Rate Abolition Act of 1888 it has been levied only on actual members of the Church.

Church Union (English), formed in 1859 to maintain Church doctrines against Erastianism, Rationalism, etc., and to resist attempts to seize Church endowments for secular purposes, and attacks on marriage laws.

Chusan, the principal island in the Chusan Archipelago, outside the Bay of Hangchow and S. of the estuary of the Yangtze-kiang. It is some 20 m. long and 10 m. broad, and has been called "the Key of China." Pop. 250,000.

Chutney, a pickle or relish made from sweet fruits such as mangoes, sultanas, together with flavouring of chillies, green ginger, tamarinds, apples, Cayenne pepper and spices, etc., originated in E. India, but popular now in England.

Chuvash, autonomous republic of Soviet Russia, on the Volga, inhabited by a blond tribe of mixed Finnish and Tartar origin. Cheboksara is the capital. Area 18,400 sq. m. Pop. 894,000.

Chyle, a fluid of a milky colour, one of the ingredients of the food, which is separated from the chyme by the action of the pancreatic juice and the bile, and which, being absorbed by the lactical vessels, is gradually assimilated into the blood.

Chyme, the pulpy mass into which the food is converted in the stomach prior to the separation in the small intestines of the chyle.

Ciano, Galeazzo, Count, Italian statesman; enthusiastic supporter of the Fascist régime from the beginning; married Edda, daughter of Mussolini; Under-Secretary of State for Propaganda, 1934; Foreign Minister, 1936. (1904-)

Cibber, Colley, actor and dramatist, of German descent; was manager, and part-proprietor of Drury Lane; wrote plays, one in particular, which procured for him the post of poet-laureate, which he held till his death; was much depreciated by Pope; wrote an *Apology for his Life*. (1671-1757).

Cicada, an insect of the sub-order Homoptera, closely allied to the

lantern flies and frog-hoppers, and well known for the musical sounds they produce from a complex structure at the base of the abdomen. They live on plant juices. A rare species, the *Cicada hamulodes*, is found in the New Forest.

Cicero, Marcus Tullius, a Roman orator, statesman and man of letters, born near Arpinum, in Latium; trained for political life partly at Rome and partly at Athens; distinguished himself as the first orator at the Roman bar when he was 30, and afterwards rose through the successive grades of civic rank till he attained the consulship in 63 B.C.; during this period he acquired great popularity by his exposure and defeat of the conspiracy of Catiline, by which he earned the title of *Father of his Country*, though there were those who condemned his action and procured his banishment for a time; on his recall, which was unanimous, he took sides first with Pompey, then with Caesar after Pharsalia, on whose death he delivered a Philippic against Antony; was proscribed by the second triumvirate, and put to death by Antony's soldiers; he was the foremost of Roman orators, the most elegant writer of the Latin language, and has left behind him orations, letters and treatises, models of their kind. (106-43 B.C.)

Cid Campeador, a famed Castilian 11th century, born at Burgos; much celebrated in Spanish romance. Being banished from Castile, in the interest of which he had fought valiantly, he became a free-lance, fighting now with the Christians and now with the Moors, till he made himself master of Valencia, where he set up his throne and reigned, with his faithful wife Ximena by his

side, till the news of a defeat by the Moors took all spirit out of him, and he died of grief. His real name was Don Rodrigo (Ruy) Diaz of Bivar, and the story of his love for Ximena is the subject of Corneille's masterpiece, *The Cid*.

Cider, a popular beverage in summer made from the fermented juice of apples and containing 2 to 10 per cent. of alcohol. Cider apples are largely grown in the W. of England and cider made, Hereford cider being from the orchards of Hereford, Gloucester, Worcester and Monmouth; Devonshire cider from Devon, Somerset, Dorset and Cornwall. New cider is less intoxicating than ale, but old cider is as potent as old ale.

Cilician Gates, the pass across Mount Taurus by which Alexander the Great entered Cilicia.

Cimabue, Giovanni, a Florentine painter, and founder of the Florentine school, which included among its members such artists as Michelangelo, Raphael and Leonardo da Vinci; was the first to leave the stiff traditional Byzantine forms of art and copy from Nature and the living model. His "Madonna," in the Church of Santa Maria, has been long regarded as a marvel of art, and of all the "Mater Dolorosa" of Christianity, his at Assisi is probably the noblest. (1240-1302).

Cimarosa, Domenico, a celebrated Italian composer of between 20 and 30 operas, mostly comic, his masterpiece being *Il Matrimonio Segreto*; he was imprisoned for sympathising with the principles of the French Revolution, and is said by some to have been poisoned by order of his enemies. (1749-1801).

Cimbri, a warlike Celtic tribe. They led a nomadic existence, and during the 2nd Century B.C. invaded Gaul, and were often at war with the Romans. They were totally defeated by Marius in 101 B.C.

Cimiez, village of the Riviera, France, on a hill behind Nice, of which it is a suburb. Queen Victoria often stayed here.

Cimmerians, a mythical people mentioned by Homer who were supposed to live on the sunless shores of the Black Sea; hence the phrase "cimmerian darkness." Historians have tried to identify them with a race living near the Sea of Azov.

Cinchona, the name of several trees of the order Rubiaceae, from the bark of which is extracted quinine and cinchonidine. They are extensively cultivated in Java, in the valleys of the Andes (where they are natives) and in S. India, etc.

Cincinnati, the metropolis of Ohio, U.S.A., stands on the N. bank of the Ohio R., by rail 270 m. S.E. of Chicago; the city stands on hilly ground, and is broken and irregular; there are many fine buildings, among them a Roman Catholic cathedral, and large parks; there is a university, the Lane Theological Seminary (Presbyterian), schools of medicine, law, music and art, an observatory, zoological garden and large libraries; it is a centre of culture in the arts; manufactures include clothing, tobacco, leather, etc.; the most noted trade is in pork and grain; a large proportion of the population is of German origin. Pop. 451,160.

Cincinnatus, Lucius Quintius, a hero distinguished for his simplicity and austerity. Was twice called from the plough to become dictator of Rome, the first time after the defeat of the Roman army by the Æquii. On each occasion he resigned his office within a few days of achieving victory and returned to the plough without reward. He lived about 460 B.C.

Cinematograph, an adaptation of the old magic lantern, invented by Edison, and first used in England early this century for the showing of "moving pictures" for educational and entertainment purposes. Within a few years it became one of the most popular forms of entertainment, threatening the popularity of the theatre and music-hall, while in 1928 talking films gave an immense impetus to the industry. Hollywood, California, is the chief centre of the industry, but great progress has been made in the development of a British film industry since 1927, when an Act of Parliament made the showing of a definite quota of English films compulsory in all English cinemas.

The projector of a cinematograph is essentially a camera used in the converse of the normal way—i.e., the film with the photograph on it is brilliantly illuminated and the lens casts an image of it upon a suitably placed screen. In taking or "shooting" the scenes, a series of photographs is taken at the rate of about sixteen a second, while during projection the successive photographs are shown on the screen for about one-twentieth of a second each, the light being cut off by a rotating shutter while the photographs are actually being changed. This is to prevent a blurred effect, and the fact that each picture persists on the retina for a short time after it has been withdrawn produces the illusion of one continuous "moving" picture.

In the earliest sound films the sound was produced by amplifying the sound of a gramophone record run at the same time as the film, but the difficulties of exact synchronisation are very considerable. More recently the sounds have been made to record themselves on the side of the film by connecting a microphone to a suitable lamp, the brightness of which varies with the strength of the impulses registered by the microphone, and causing the lamp to shine upon the edge of the film. A varying mark is thus produced, and when the film is projected, a beam of light is shone through the edge-strip on to a photo-electric cell. This conducts electricity in proportion to the intensity of illumination falling upon it, and the fluctuating current is used to actuate a loud-speaker, from which a replica of the original sounds thus issues. The most recent development in cinematography is the colour film.

Cingalese (or Sinhalese), the most numerous native race of Ceylon.

Cinna, *Lusius Cornelius*, a leader of the Roman popular party, a friend and supporter of Marius; drove Sulla from Rome and recalled Marius from exile; participated in the murders which followed his recall, and after the death of Marius was assassinated when organising an expedition against Sulla, 84 B.C.

Cinnabar, a sulphide of mercury, HgS , which the mercury of commerce is obtained.

It is dark red, and is often found in crystalline masses, the chief countries of production being Austria, Spain, California, Peru, etc.

Cinnamon, the aromatic bark of a small tree *Cinnamomum zeylanicum* (natural order Lauraceae), native to Ceylon and cultivated in Asia, Brazil and the West Indies. Oil of cinnamon, which has medicinal value in the treatment of digestive disorders, is distilled from the bark after maceration in salt water.

CINNAMON TREE

que Cento, the abbreviation for the 16th Century ring especially to the revival in culture in Italy during that century, represented by Donatello and Michelangelo in sculpture, Benvenuto Cellini in metal-work, Leonardo da Vinci, Raphael, Titian and Correggio in painting and Ariosto and Tasso in literature.

Cinquefoil, in architecture, an ornament in the Gothic style, consisting of five foliated divisions, often seen in circular windows.

Cinque Ports, the five ports of Hythe, Dover and Sandwich, to which were added Winchelsea and Rye, which, until the reign of Henry VII., possessed certain privileges in return for supplying the royal power with a navy. The privileges and other duties of the organisation have long since passed, but the title of Lord Warden of the Cinque Ports remains as an honorary dignity.

Cintra, a Portuguese town, 17 m. NW. of Lisbon, where a much-reprobated convention between the French and the English was signed in 1808, whereby the former were allowed to evacuate Portugal with all their arms and baggage. Pop. 7,000.

Circars, The Northern, a territory in India along the coast of the Bay of Bengal, from 18 to 100 m. wide; ceded to the East India Company in 1766, now forming part of the Madras Presidency. The modern corresponding districts are Ganjam, Vizagapatam, Godavari and Krishna.

Circassia, a territory on the W. Caucasus, once inhabited by the Circassians, a Caucasian tribe, the noblest professing Mohammedanism, and the lower classes a certain impure form of Christianity; they are Semitic, and resemble the Arabs in their manners.

Circe, a sorceress, the daughter of Helios and Perse, who figures in the *Odyssey*. Ulysses having landed on her Isle, she administered a potion to him and his companions, which turned them into swine, while the effect of it on himself was counteracted by the use of the herb moly, provided for him by Hermes against sorcery. She detained him for a year, and disenchanted his companions on his departure.

Circle, in Geometry, a plane figure—i.e., a figure in one plane, formed by the revolution of a point around another point (the centre), the distance apart of the two points being constant. The word is used sometimes to denote the circumference of the enclosed figure. The distance from the centre to the circumference is called the radius, the straight line drawn through the centre of the circle from circumference to circumference is called the diameter. The formula for the calculation of the circumference of a circle is $2\pi r$ ($\pi = 3.1416$; r = the radius); that for the area is πr^2 .

Circuits, the eight districts outside London into which England and Wales are divided for judicial purposes, for the trial of civil as well as criminal cases connected with them. They are the Midland, the Oxford, the North-Eastern, the South-Eastern, the Northern, the Western, the North Wales and Chester, and South Wales; the courts are presided over by a judge sent from London, or by two, and are held about the middle of January, the middle of May and the middle of October, with an additional assize for Lancashire and Yorkshire only, in May.

Circulation, of the blood, the movement through the arteries to all parts of the body and returning through the veins to the heart again. The circulation depends upon (1) the heart's action; (2) the action of the capillaries; (3) the elasticity of the coats of the arteries;

(4) the pressure of muscles on the veins which pass by them, and (5) the movements of the chest in respiration. The returning blood is called *venous* and is purified by the oxygen supplied by the lungs, becoming *arterial*. The discovery of the circulation of the blood was made by Harvey, court physician to Charles I., in 1628.

Circumcision, the practice of cutting away the foreskin, chiefly of males, as observed by the Jews and the Mohammedans, as well as other nations of remote antiquity; regarded by some as a mark of belonging to the tribe, and by others as a sacrifice in propitiation by blood.

Circus, a large enclosed space resembling the Greek Stadium. That of Maximus was the greatest, and held 600,000 spectators. Entertainments included, besides chariot races, wrestling and running and combats with wild beasts, and sometimes a sea-fight was presented. The contestants, who were professional, were called gladiators. The modern travelling circus is a much smaller canvas covered "ring" where performing animals and acrobats are representative of the entertainment offered.

Cirencester, a market town of Gloucestershire, England, 16 m. SE. of Gloucester. It is the centre of an agricultural district, and site of the Roman station, *Corinium*. Many antiquities have been found in the neighbourhood. Pop. 7,000.

Cirrhosis, a condition to which certain organs of the body, especially the liver, kidney, heart and spleen, are liable. As a result of having been chronically inflamed, they become fibrous and hard. The liver is the most usual organ to suffer.

Cisalpine Republic, a republic of the Cispadane and Transpadane republics, on both sides of the Po, established by Napoleon in 1797; became the Italian Republic in 1802, with Milan for capital, and ceased to exist after the fall of Napoleon.

Cissbury, a great prehistoric earthwork in Sussex, England, 2 m. N. of Worthing. Stone-age flint instruments abound, and there are a number of deep, circular pits. Roman antiquities are also found.

Cistercians, a monastic order founded by Abbot Robert in 1098 at Cîteaux, near Dijon; they followed the rule of St. Benedict. In 1112 St. Bernard joined the Order and founded the Abbey of Clairvaux, which became the centre; became an ecclesiastical republic, and were exempt from ecclesiastical control; contributed considerably to the progress of the arts. Among their most famous abbeys were those at Tintern, Kirkstall, Melrose and Deer, and, in France, at Clairvaux and Pontigny.

Cists, places of interment of an early or pre-historic period, consisting of an irregular stone chest or enclosure formed of rows of stones set upright and covered with flat stones. They are usually found in barrows or mounds.

Citadel, a fortress in or near a city, built to dominate the city and maintain the citizens in order, and as the heart and centre of defence of the city against attackers. Such fortresses play very little part in modern municipal affairs. Famous citadels of the past have included the Acropolis of Athens and the Capitol of Rome.

Cities of Refuge, among the Jews, E. and three on the W. of the Jordan, in which the unintentional manslayer might and refuge from the avenger of blood; so appointed by law (see Joshua xx.).

Citric Acid, a strong acid found in many lemons and limes, extensively used in

dyeing and calico printing and in making effervescent beverages, which afford relief during fever.

Citron (*C. Medica*), a straggling, wild, evergreen shrub of the genus *Citrus*, natural order Rutaceae. It grows to a height of about 10 ft., bears large pale green leaves, a purplish flower and large fruit, the skin of which is candied, but the pulp not edible. It has yielded the varieties *Limonum*, the lemon, and *acida*, the lime.

Citrus, a genus of aromatic, evergreen shrubs and trees of the order Rutaceae, containing many species cultivated in warm climates, including the orange, lemon and allied fruits.

City, in a general sense, a town holding, from extent of population, favourable situation, or other causes, a leading place in the vicinity in which it is situated. In Britain and France the term is popularly used to designate the old and central nucleus as distinguished from the suburban growths of large towns. In the ecclesiastical sense of the term it is a town which is, or has been the see of a bishop. Since the latter part of the 19th Century the official style of city has, in the United Kingdom, been conferred by royal authority on certain important towns, Birmingham, in 1889, being the first to be so distinguished.

Ciudad Bolivar, capital of the Venezuela, 240 m. up the Orinoco, previously called *Angostura*. Pop. 16,780.

Ciudad Real (real city), a province of New Castile, Spain, with an area of 7,620 sq. m. and a population of 520,000, in which quicksilver is mined. Also the capital of the province with a trade in grain, olive oil and wine. Pop. 23,400.

Ciudad Rodrigo, a Spanish town of Salamanca near the Portuguese frontier; stormed by Wellington, after a siege of 11 days, in 1812, for which he earned the title of Earl in England and Duke of Ciudad Rodrigo. Pop. 10,000.

Civet, or Civet-cats, the name of the *Viverridae* family

of the Carnivora, which yield a musky perfume valued in the East. With the exception of two SW. European species they are confined to Africa, India, China and the Malay Peninsula, and are small animals with a long, bushy tail.

CIVET (INDIAN SPECIES)

Civil Air Guard, an organisation in Great Britain in 1938 to arrange training in flying for civilians of both sexes whose services might be used in time of emergency. It is operated through light aeroplane clubs, and comprises a gliding section.

Civil Engineer, one engaged in a branch of civil construction, a term used in contradistinction to military engineer. Their work includes the designing and building of bridges, tunnels, dams, reservoirs and foundations, the construction of roads, docks, harbours and canals, also the problems of irrigation and reclamation of land. The directing body is the Institute of Civil Engineers, whose definition of the profession is "the art of directing the great sources of power in Nature for the use and convenience of man."

Civil Estimates, is the term denoting expenditure for civil purposes as distinct from that for the armed forces and the revenue

departments. They are divided into nine classes, Central Government and Finance; Foreign and Imperial; Home Department, Law and Justice; Education and Broadcasting; Health, Labour and Insurance; Trade and Industry; Common Services; War Pensions, and Miscellaneous.

Civil Law, a system of laws for the communities based on Roman law. In its primary signification, civil law is synonymous with the *corpus juris civilis* which denotes the whole body of Roman law, i.e., the Institutes, Pandects or Digest and Codes of Justinian.

Civil List, the yearly sum granted by the Parliament of England at the commencement of each reign for the support of the royal household and to maintain the dignity of the Crown. In the present reign it amounts to £410,000, from which is to be deducted, pending the birth of a Duke of Cornwall, the balance of the Duchy of Cornwall revenues after payment of certain annuities to the Princess Elizabeth, etc.

Civil Service, those engaged in carrying out the executive work of government and administration of civil affairs, and therefore excluding military and naval services. The service is divided into various departments, such as the Home Office, Foreign Office, Treasury, Ministry of Health (formerly the Local Government Board), Board of Education, Ministry of Labour, Scottish Office, etc. In 1870 the system of appointment by examination was introduced. For some special classes nomination precedes a qualifying competitive examination.

The numerous classes of the Civil Service include administrative, executive, clerical, writing assistants, typists. The administrative class is the highest in the service and includes posts of great responsibility. The junior grade is assistant-principal, and recruits enter by an examination similar to that reached on leaving a university. The duties are concerned with the improvement and co-ordination of government machinery and administration and control of government departments.

The executive class is next in importance, and carries out the higher work of supply and account departments and specialised branches of the service. The examination for entry into the lowest grade of this class is based on a syllabus equal to the standard at the end of a secondary school course. Executive staffs in the defence departments differ in that women are ineligible, that service abroad is likely and that the full London scale of salary is paid wherever employed, while provincial executives receive 5 per cent. less.

The audit staff is concerned with the issue of money from the National Exchequer and the auditing of accounts of other departments, and assistant auditors are required to undergo a course of accountancy in their own time, but at Government expense, before advancement. The examining staff, Estate Duty Office, is responsible for assessing and collecting estate and other death duties, and candidates require a knowledge of legal principles. Assistant examiners are required to obtain a University degree in Law or be called to the Bar before promotion. The actuarial staff includes those engaged in carrying out actuarial work in connection with Unemployment and Health Insurance and Contributory Pension Schemes, Old Age Pensions, Friendly Society Valuations, etc. A training in actuarial sciences is essential, and candidates for advancement are required to pass the examination of the Faculty of Actuaries.

The clerical classes include the General Clerical Class, which is open to men and women, the Customs and Excise Clerical class and

other departmental clerical classes. Candidates are recruited through the clerical examination. Writing assistants are confined to women, and carry out copying, transcribing, addressing, card indexing, etc. Promotion is through the clerical grade.

The age for candidates for the general classes is between 17 and 30, and notice of competitive examination is advertised in the *Times* and the *Daily Telegraph*. For detailed regulations application should be made to the Secretary, Civil Service Commission, Burlington Gardens, London, W.1.

Civil War, a war between citizens of the same state. Outstanding civil wars of the past were that in England from 1642 to 1649, between Charles I. and Cromwell's Parliamentarian party, and the American Civil War of 1861-1865 between the Southern and the Northern States, when the former sought to establish a separate union. Civil war broke out in Spain during 1936 between the Spanish Socialist Government and anti-socialist forces under General Franco.

Clackmannanshire, the smallest county in Scotland, lies between the Ochils and the Forth; rich in minerals, especially coal; chief industries woollens and shipbuilding. Area 55 sq. m. Pop. 31,909. County town Clackmannan.

Clacton-on-Sea, a popular seaside resort of Essex, England. Pop. 16,000.

Clair, a lake in N. America, 30 m. long by 12 broad, which with the R. St. Clair connects Lake Erie with Lake Huron.

Clairvaux, a village of France, on the Aube, where St. Bernard founded a Cistercian monastery in 1115, and where he lived and was buried.

Clairvoyance, in spiritualism and the term used to describe the power of seeing and describing events at a distance or future events.

Clam, bivalve mollusks having the faculty of closing their shells like a vice. In Scotland the scallop is so called; in England certain species of *Macra* and *Mya*. The scallops are edible.

Clan, a tribe of blood relations descended under a chief in direct descent from him, and having a common surname, as in the Highlands of Scotland; at bottom a military organisation for defensive and predatory purposes.

Clan-na-Gael, a Gaelic organisation founded at Philadelphia, U.S.A., c. 1831, to secure by violence the emancipation of Ireland from British control. Headquarters were at Chicago.

Clapham, a SW. suburb of London, England, in the borough of Wandsworth, 4 m. from St. Paul's, with a large common; an important railway junction.

Clapton, residential district of N.E. London, England, in the borough of Hackney. John Howard, the philanthropist, was born here.

Claque, a number of men hired to applaud the success of a theatrical performance. At the end of the 18th Century the theatres of Paris employed people to express applause by clapping, weeping, laughing and demanding encores. The practice, which was in vogue in ancient Rome, still exists to some extent.

Clare, a maritime county in Munster, Ireland (Eire), between Galway Bay and the Shannon, where cattle and sheep are largely reared. Pop. 35,088. Cap. Ennis. Also an island at the mouth of Clow Bay, Co. Mayo, Ireland.

Clare, John, the peasant poet of Northamptonshire, born near Peterborough; wrote *Poems Descriptive of Rural*

Life and Scenery, which attracted attention, and even admiration, and at length, with others, brought him a small annuity, which he wasted in speculation; fell into despondency, and died in a lunatic asylum. (1793-1864).

Clare, *de*, Family of, descended from the Fearless, Duke of Normandy. Godfrey's younger grandson, Richard FitzGilbert, took surname from the castle and honour of Clare in Suffolk. Richard's grandson was made Earl of Hertford; and a successor, Richard (d. 1217), was father of Gilbert, Earl of Gloucester and Hertford (d. 1230). Gilbert, Earl of Gloucester and Hertford (1242-1295), was father of Elizabeth, who married John de Burgh, son of the Earl of Ulster, and founded (1347) Clare College, Cambridge (d. 1360). The seventeenth holder of the honour of Clare was Edward IV., so that it became merged in the Crown.

Clare, *St.*, a virgin and abbess, born at Poor Clares, nuns of the Franciscan rule. (1194-1253).

Claremont, town of Cape Province, South Africa, 6½ m. from Cape Town. Here are the National Botanic Gardens and the site of Herschell's observatory. Pop. (white) 6,000.

Clarence, *George*, Duke of, brother of Edward IV.; convicted of treason he was condemned to death, and being allowed to choose the manner of his death, is said to have elected to die by drowning in a butt of Malmsey wine. (1449-1478). The last to bear the title was Albert Victor, eldest son of King Edward VII.

Clarenceux, or *Clarenceux*, one of the arms. His jurisdiction extends from and includes all England S. of the Trent.

Clarendon, a place 2 Salsbury, England, in the royal palace of which the magnates of England, both lay and clerical, met in 1164 under Henry II. and issued a set of ordinances, called the *Constitutions of Clarendon*, 16 in number, to limit the power of the Church and assert the rights of the Crown in ecclesiastical affairs.

Clarendon, *Edward* CLARENCEUX of, *Hyde*, EARL KING-OF-ARMS, set in the Short and the Long Parliaments on the popular side, but during the Civil War became a devoted royalist; was from 1641 one of the chief advisers of the King; on the failure of the royal cause, took refuge first in Jersey, and then in Holland with the Prince of Wales; contributed to the Restoration; came back with Charles, and became Lord Chancellor; fell into disfavour and quitted England in 1667; died at Rouen; wrote among other works, a *History of the Rebellion*. (1609-1674).

Clarendon, *George Villiers*, fourth Earl of, a Whig statesman; served as a Cabinet minister under Lord Melbourne, Lord John Russell twice, Lord Aberdeen, Lord Palmerston and Mr. Gladstone. As Foreign Secretary handled the crisis which led to the Crimean War; was Lord-Lieutenant of Ireland at the time of the potato failure, and represented Britain at the Congress of Paris. (1800-1870).

Clarendon Code, so called after first Earl of Clarendon, are the four laws against nonconformists, viz., the Corporation Act, 1661; Act of Uniformity, 1662; Conventicle Act, 1664; and the Five Mile Act, 1665. The Corporation Act compelled all

holders of municipal office to take the Sacrament according to the rites of the Church of England. The Act of Uniformity enjoined episcopal ordination and the use of the Book of Common Prayer and compelled ministers and schoolmasters to take the oath of non-resistance. The Conventicle Act forbade, under heavy penalties, all assemblies for religious worship other than those of the Church of England. By the Five Mile Act, clergy who would not take the oath of non-resistance imposed on all who had not subscribed to the Act of Uniformity were forbidden to settle within 5 miles of a corporate town.

Claret, the general English term for the red wines of Bordeaux, produced principally in the prov. of Gironde.

Clarinet, a wooden wind instrument of music. It has a reed mouth-piece through which it is sounded, and a tube having 18 holes, 13 of which have keys.

Clarion, a kind of trumpet with a narrow tube giving a very shrill sound. It is also an organ stop of similar note.

Clark, *Francis* Edward, originally surname, named Symmos, founder of the Young People's Society of Christian Endeavour in 1881, was born at Aymer, Quebec, and adopted by an uncle at Auburndale, Mass., whose name he took. President of the World's Christian Endeavour Union which was organised 1895, and incorporated 1902. (1851-1927).

Clarke, *Edward* Daniel, a celebrated English traveller, born in Sussex; visited Scandinavia, Russia, Circassia, Asia Minor, Syria, Palestine, Egypt and Greece; brought home 100 MSS. to enrich the library of Cambridge, the colossal statue of the Elousinian Ceres, and the sarcophagus of Alexander, now in the British Museum; was professor of Mineralogy at Cambridge University, 1808; his *Travels* were published in six volumes. (1769-1822).

Clarke, *Sir* Edward *George*, British lawyer. After early struggles as a reporter, he was called to the Bar in 1869, made his name in the Penge murder trial; entered Parliament in 1880 as a Conservative, and was Solicitor-General from 1886 to 1892. (1841-1931).

Clarke, *William* Branwhite, English geologist, born in Suffolk; graduated at Jesus College, Cambridge; entered Church, 1821. Went to Australia, where his announcement in 1841 of his discovery of gold in Macquarie R. preluded the gold rush of 1851. Discovered tin in Australia, 1849; and diamonds, 1859. Elected F.R.S. in 1876 and honoured by the Geological Society of London, 1877. (1798-1878).

Clarkson, *Thomas*, born in Wisbech, Cambridgeshire, the great English anti-slavery advocate, who lived to see in 1833 the abolition in the British Empire of the slavery he denounced, in which achievement he was assisted by the powerful advocacy in Parliament of Wilberforce. (1760-1846).

Classic Races, the English horse-races, the St. Leger, the Derby, the Oaks, and the One Thousand Guineas.

Classics, originally, and often still, the standard authors in the literature of Greece or Rome, now authors in any literature that represent it at its best, when, as Goethe has it, it is "vigorous, fresh, joyous, and healthy."

Claude Lorrain (properly *Claude Gellée*), a great landscape painter, born in Lorraine, of poor parents, and apprenticed to a pastry-cook; went as such to Rome; became servant and colour-grinder to Tassi, who instructed him in his art; was eminent in his treatment of aerial perspective, and an artist whom it was Turner's ambition to rival. He compiled six books (called *Libri di Vedute*) of outline

drawings of his paintings in order to avoid repetition and to detect imitations. These have since been engraved and published. His pictures are found in every gallery in Europe, and a goodly number of them are to be met with in England. (1600-1682).

Claudian, a Latin epic poet of the 1st Century, born in Alexandria, panegyrist of Stilicho on his victory over Alaric; a not unworthy successor of Catullus and Propertius, though his native tongue was Greek.

Claudius, Appius, a Roman decemvir and patrician in 451 B.C.; outraged Virginia, a beautiful plebeian damsel, whom her father, on discovering the crime, killed with a knife snatched from a butcher's stall, rousing thereby the popular rage against the decemvir, who was cast into prison, where he killed himself, 449 B.C.

Claudius, Appius, censor in 312-307 B.C.; wrought important changes in the Roman constitution; set on foot the construction of the Appian Way and the Appian Aqueduct, named after him.

Claudius I., Tiberius Drusus, surnamed Germanicus, brother of Tiberius, Emperor of Rome from 41 to 54, born at Lyons; after spending 50 years of his life in private, occupying himself in literary study, was, on the death of Caligula, raised, very much against his wish, by the soldiers to the imperial throne, a post which he filled with honour to himself and benefit to the State; but he was too much controlled by his wives, of whom he had in succession four, till the last of them, Agrippina, had him poisoned to make way for her son Nero. (10 B.C.-54 A.D.).

Claudius II., surnamed Gothicus, Roman Emperor from 268 to 270; an excellent prince and a good general; distinguished himself by his ability and courage against the Goths and other hordes of barbarians.

Clausen, Sir George, British painter, of Danish parentage. He studied at S. Kensington and in Paris, was elected A.R.A. in 1895 and R.A. in 1903. His "Gleaners Returning" and "The Girl at the Gate" are in the Tate Gallery. Knighted 1927. (1852-).

Clausewitz, Karl von, a Prussian general, born at Burg; distinguished himself against Napoleon in Russia; an authority on the art of war, on which he wrote a treatise in three volumes, entitled *Vom Krieg*. (1780-1831).

Claustraphobia, a morbid dread or dislike of confinement, as within closed rooms and narrow passages.

Claverhouse, John Graham of, Viscount Dundee, commenced life as a soldier in France and Holland; on his return to Scotland in 1677 was appointed by Charles II. to the command of a troop to suppress the Covenanters; was defeated at Drumclog 1679, but by the help of Monmouth had his revenge at Bothwell Brig; affected to support the Revolution, but intrigued in favour of the Stuarts; raised in Scotland a force in their behalf; was met at Killiecrankie by General Mackay, where he fell. (1649-1689).

Clavichord, or Clavicord, an ancient musical instrument in

form like a harpsichord; one of the forerunners of the modern pianoforte. The keys had brass pins projecting, which struck the strings and set them in motion.

CLAVICHORD

Clavicle, or collar-bone, which in man is connected with the breast-bone and the shoulder-blade. With the latter it forms the arm socket. It is easily fractured or dislocated, though such injuries are seldom of a very serious nature.

Clavie, burning the, an ancient Scottish custom, now limited to the village of Burghhead, held on Jan. 12, the New Year's day of old times. A bonfire is made of split casks and a piece of charcoal from one of the burned casks is placed in the chimneys to scare away evil spirits.

Clavius, Christopherus (Christoph Clau), mathematician and astronomer; born at Bamberg, Bavaria. Became Jesuit, 1538, and was called to Rome, where he was employed by Pope Gregory XIII. to superintend reform of the Calendar. Called "the Euclid of the 16th Century." (1537-1612).

Clay, a plastic material abundant in nature composed of silica and silicates of aluminium with varying quantities of iron, magnesia, potash and soda, and used in the manufacture of bricks and earthenware. It is composed of the finer particles resulting from the weathering of rocks.

Clay, Frederick, English composer, born in Paris; son of James Clay, writer on whist; wrote and conducted much light music for the stage, but is best known as composer of *I'll Sing Thee Songs of Araby*. (1839-1889).

Clay Cross, a market town of Derbyshire, England, the centre of a large coal- and iron-mining district. Pop. 8,700.

Claymore, the two-edged broadsword of the ancient highlanders of Scotland. The name is also improperly applied to the basket-hilted single-edged sword of the 16th Century.

Clayton, Rev. Philip Thomas Byard, British padre, and one of the founders of Talbot House (Toc H) in Popperinghe, near Ypres, during the Great War, which was continued as a peacetime movement among young men. (1885-).

Clayton-Bulwer Treaty, 1850, pledged Great Britain and the U.S.A. to respect the neutrality of the proposed ship canal across Central America. The neutrality rule was incorporated in the Hay-Pauncefote Treaty, 1902, relating to the Panama Canal.

Clayton-le-Moors, a market town of Lancashire, England, 5 m. NE. of Blackburn. Here are collieries, calico-printing and machinery works and cotton mills. Pop. 1,900.

Clazomenae, an ancient town of Ionia, between Smyrna and Chios (modern Vria), and one of the Ionian Confederation of Twelve Cities. It is noted for the terra-cotta sarcophagi found there. It was founded by the Ionians 98 years before the foundation of Rome and was the birthplace of Anaxagoras and other famous men.

Clear, Cape, a headland at the S. of southerly point of Ireland, and the first land sighted coming from America.

Clearchus, a Spartan general who accompanied Cyrus on his expedition against Artaxerxes; commanded the retreat of the Ten Thousand; was put to death by Tissaphernes in 401 B.C. and replaced by Xenophon.

Clearing-house, a house for inter-protective claims of banks and of railway companies. The London bankers' Clearing-house enables the claims of the member banks to be set off against each other, only the balance of account (e.g., cheques) being met by a transfer of funds at the Bank of England.

Darwen, a market town of Lancashire, England, 30 m. NW. of Manchester, with cotton mills, blast-furnaces, paper-mills, collieries and stone quarries. Pop. 34,010.

Darwin, or Port Darwin, seaport of Northern Territory, Australia, with a fine safe harbour and pearl fisheries. It is also an air port. Pop. 1,000.

Darwin, Charles Galton, mathematical physicist, son of Sir G. H. Darwin and grandson of Charles Darwin. He published many papers on mathematical and physical subjects; appointed Tait professor at Edinburgh University in 1923. (1887-).

Darwin, Charles Robert, great English naturalist and biologist, born

at Shrewsbury, grandson of Erasmus Darwin on his father's side, and of Josiah Wedgwood on his mother's; studied at Edinburgh and Cambridge; in 1831 accompanied, as naturalist without salary, the *Beagle* on her voyage of exploration in the Southern Seas, on the condition that he should have the entire disposal of his collections, which he ultimately distributed among various public institutions. He was absent from England for five years, and on his return published his *Naturalist's Voyage Round the World*, in 1839-1843, accounts of the fruits of his researches and observations in the departments of geology and natural history during that voyage, in 1842 his treatise on the *Structure and Distribution of Coral Reefs*, and in 1859 his work on the *Origin of Species by Means of Natural Selection*, a work which proved epoch-making and went far to revolutionise thought in the scientific study of life. This work was followed by others more or less confirmatory, finishing off with *The Descent of Man and Selection in Relation to Sex*, in 1871, in which he traced the human race to an extinct animal related to that which produced the orang-outang, the chimpanzee and the gorilla. He may be said to have taken evolution out of the region of pure imagination, and, by giving it a basis of fact, to have set it up as a reasonable working hypothesis. Other works of his include *The Variation of Plants and Animals under Domestication*, *The Effects of Cross and Self-Fertilisation*, and *The Expression of the Emotions in Man and Animals*. He was buried in Westminster Abbey. (1809-1882).

CHARLES DARWIN

Darwin, Erasmus, physician and natural philosopher, grandfather of Charles Darwin; born in Nottinghamshire; studied at Cambridge and Edinburgh; practised medicine in Lichfield, and finally settled in Derby; occupied his mind with the study of fanciful analogies in the different spheres of nature, and committed his views to verse. His chief works were the *Botanic Garden* and the *Zoonomia*; or, *The Laws of Organic Life*, in which he anticipated the evolutionary doctrines of Lamarck. (1731-1802).

Darwin, Sir George Howard, mathematician, second son of Charles Darwin. He carried out much work upon tides, rotating masses and the moon. He was appointed Plumian professor at Cambridge in 1883. (1845-1913).

Darwinian Theory, the theory by Charles Darwin (q.v.) that the several species of plants and animals now in existence were not created in their present form but have

been evolved by sexual selection, with modifications of structure, from cruder forms.

Dasyure, the scientific name for a small Australian marsupial, known

popularly as the Native Cat; derives its name from its thick grey-and-white coat and bushy tail; of nocturnal habits; found in Australia, Tasmania, New Guinea and adjacent islands. They live on eggs, small animals and insects, and belong to the family Dasyuridae, which includes, among other highly developed carnivorous marsupials, the Thylacine or Pouched Wolf, now nearly extinct, and the Tasmanian Devil.

DASYURE

Date, the fruit of the date palm (*Phoenix dactylifera*), a tree of fairly wide distribution, being native to Arabia, N. Africa and SW. Asia, and grown elsewhere. As a tree it is of great beauty, and is notable for the old leaf-bases on the trunk and for its head of pinnate leaves. The fruit, which is eaten fresh in Arabia and is an important article of food there, is well known elsewhere in dried form. The fleshy portion, being rich in sugar, is eaten raw, roasted or ground and pressed into cakes. Large quantities are exported. The stone is ground by Arabs into camel-food. The leaves are used in the manufacture of hats, mats, thatch, etc.

Daubenton, Louis Jean Marie, a French naturalist, born at Montbard; associated with Buffon in the preparation of the first 15 vols. of his *Histoire Naturelle*, and helped him materially by the accuracy of his knowledge, as well as his literary qualifications; contributed largely to the *Encyclopédie*, and was for 50 years curator of the Cabinet of Natural History at Paris. (1716-1800).

D'Aubusson, Pierre. See Aubusson, Pierre d'.

Daudet, Alphonse, a noted French novelist of great versatility, born at Nîmes, of poor parents; early selected literature as his career in life; wrote poems and plays, and contributed to the *Figaro* and other journals; worked up into his novels characters and situations that had come under his own observation, often in too satirical a vein to become universally popular; has been likened to Dickens in his choice of subjects and style of treatment. Among his most popular works are *Lettres de mon Moulin*; *Tartarin de Tarascon*, *Jack* and *Les Rois en Exil*. (1840-1897).

Dauphin, a name originally given to the Dauphiné, in allusion to the dolphin which several members of the family wore as a badge, but in 1349 given to the heir-presumptive to the crown of France, when Humbert II, Dauphin of Vienne, ceded Dauphiné to Philippe of Valois, on condition that the eldest son of the King of France should assume the name. The title was abolished after the Revolution of 1830.

Dauphiné, one of the old provinces of France, of which the capital was Grenoble; ceded to the French crown under Philippe II. in 1349. It now forms the depts. of Isère, Drôme and Hautes Alpes.

Davenant, Sir William, an English playwright, godson of William Shakespeare, born at Oxford. He succeeded Ben Jonson as Poet Laureate, and was for a time manager of Drury Lane; was knighted by Charles I. for his zeal in the Royalist cause. His theatrical enterprise had small success during the Commonwealth, but interest in it revived with the Restoration,

at which time the drama broke loose from the restrictions imposed upon it by Puritanism, to indulge in considerable licence. He was the author of *Gondibert*, a tedious and unequal romantic epic, and *The Siege of Rhodes*, which is claimed as marking the foundation of the English opera. Among his plays, written between 1628 and 1638, the best are *The Cruel Brother* and *The Will*. (1608-1668).

Daventry, a market town of Northamptonshire, England, 12 m. W. of Northampton. Boots and shoes are made. Here is the important short-wave Empire broadcasting station. Pop. 3,608.

David, King of Israel, 11th Century B.C., born in Bethlehem. He was the younger son of Jesse, and tended the flocks of his father. He slew the Philistine giant, Goliath, with a stone and a sling; was anointed by Samuel, and succeeded Saul as king in spite of Saul's mad opposition in the later years of his reign, which drove him finally into exile; conquered the Philistines; captured and set up his throne in Jerusalem and reigned thirty-three years. He ruled as an Eastern potentate, had more than one wife, and many children, from and on account of whom (especially Absalom) he suffered much, and was succeeded by Solomon. He was in his youth a talented harpist, but though the book of Psalms was till recently accepted by the Church as wholly his, that hypothesis no longer stands the test of criticism. His story is told in the Books of Kings and Chronicles.

David I., King of Scotland, younger son Margaret; was brought up at the English Court; was Prince of Cumbria under the reign of his brother Alexander, on whose decease he succeeded to the throne in 1124; on making a raid in England in support of Queen Matilda, to whom he had sworn fealty, he was defeated at Northallerton in the Battle of the Standard; addressed himself after this to the unification of the country and civilisation of his subjects; founded and endowed bishoprics and abbeys at the expense of the Crown; the death of his son Henry was a great grief to him, and shortened his life. (1084-1153).

David II., King of Scotland, son of born at Dunfermline; succeeded his father when a boy of four, and was the first Scottish king to be anointed with oil in token of reigning as an independent monarch. When Edward Balliol, with the help of the English King Edward III., defeated the Scots at Halidon Hill, he fled the country, and spent from 1334 to 1341 in France; was taken prisoner by the English at the Battle of Neville's Cross, and was afterwards, till his death, dependent on England. (1324-1371).

David, Gérard, a Flemish painter; painted the life of Christ, his greatest works being great altar-pieces, of which one, "The Marriage of St. Catherine," is in the National Gallery, London. (c. 1450-1523).

of the Revolution; joined the Jacobin Club, swore eternal friendship with Robespierre; designed a "statue of Nature with two mamelles spouting out water" for the deputies to drink to, and another of the sovereign people, "high as Salisbury steeple"; was sentenced to the guillotine, but escaped out of regard for his merit as an artist; appointed first painter by Napoleon, but on the Restoration was banished and went to Brussels, where he died; among his paintings are "The Oath of the Horatii," "The Rape of the Sabinas," "The Death of Socrates" and "The Coronation." (1748-1825).

David, Pierre Jean, known as David of Angers, Angers, a French sculptor, born at Angers; came to Paris, and afterwards proceeded to Rome and was associated with Canova; executed in Paris a statue of the Great Condé, and thereafter the pediment of the Pantheon, his greatest work, as well as numerous medallions of great men; when on a visit to Weimar he also modelled a bust of Goethe. (1789-1856).

David, or Dewi, St., the patron saint of Wales, lived about the 6th Century; Archbishop of Caerleon; transferred his See to St. David's; founded churches and opposed Pelagianism. Little is known of his life. Festival March 1.

Davidson, John, poet and journalist, born at Barrhead, Renfrewshire, Scotland; wrote novels and plays as well as poems, his most important work being *Smith, a Tragic Farce*; *Scaramouch in Names*; *Ballads and Songs*; *Fleet Street Eclogues* (especially the Second Series); *New Ballads*; and *The Last Ballad*. He was drowned at sea in circumstances which pointed to suicide. (1857-1909).

Davidson, Lord (Dr. Randall Davidson), Archbishop of Canterbury.

As a young man he acted as domestic chaplain to Queen Victoria; married a daughter of Archbishop Tait, and was made Dean of Windsor. Successively Bishop of Rochester and Winchester, he became Archbishop of Canterbury in 1903, resigning in 1928, in which year he was raised to the temporal peerage as a baron. Two notable events in his career were his crowning of King George V. in 1911 and his championship of the new Prayer Book, which was rejected in the House of Commons in 1927 and 1928. (1848-1930).

LORD DAVIDSON

Davies, Ben, a popular tenor vocalist, born near Swansea, sang in light opera (e.g., *Dorothy*) first of all, then in Carl Rosa for some years. Left stage for concert platform and for oratorio work. (1858-1911).

Davies, Sir Henry Walters, English composer and conductor, born at Oswestry, Shropshire, organist at St. George's Chapel, Windsor, 1924. Prior to that he had held posts as professor of Music at Aberystwyth, director of music and chairman of the National Council of Music, University of Wales and Gresham professor of Music and for a time (1903-1907) had conducted the London Bach choir. Composer of two symphonies, choral works, etc. Knighted 1922. Appointed Master of the King's Music, 1934. (1869-)

Davies, Sir John, poet and statesman, born in Wiltshire; wrote two philosophic poems, *The Orchestra*, a poem in which the world is exhibited as a dance, and *Noce Teipum* (Know Thyself), a poem on human learning and the immortality of the soul; became a favourite with James I., and was sent as Attorney-General to Ireland. (1609-1626).

Davies, William Henry, British poet. Born in Newport (Mon.), he, to quote his own words, "picked up knowledge among tramps in America, on cattle-boats and in common lodging-houses of England." He acted as a hawker on coming back from America, sang hymns in the street, and published his first volume of poems in 1904, at the age of 33, publishing several subsequently. He was author also of *The Autobiography of a Super-Tramp*, a work to which George Bernard Shaw wrote a preface. (1871-)

Davis, Jefferson, President of the Confederate States during the American Civil War; born in Kentucky; entered the army, fought against the Indians; turned cotton-planter; entered Congress as a Democrat; distinguished himself in the Mexican War; defended slave-holding and the interests of slave-holding States; was chosen President of the Confederate States and headed the conflict with the North; fled on defeat, which he was the last to admit; was arrested and imprisoned. He was released after two years and thereupon retired into private life, and wrote a *History of the Rise and Fall of the Confederate Government*. (1808-1889).

Davis, John, an English navigator, born near Dartmouth; took early to the sea; conducted (1585-1587) three expeditions to the Arctic Seas in quest of a N.W. passage to India and China, as far N. as 73°; discovered the strait which bears his name; sailed as pilot in two South Sea expeditions, and was killed by Japanese pirates near Malacca; wrote the *Seaman's Secrets*. (c. 1550-1605).

Davis, Thomas Osborne, an Irish patriot, educated at Trinity College, Dublin, and called to the Irish Bar; took to journalism in the interest of Irish nationality; founded the *Nation* newspaper, and by his contributions to it, which included a series of noteworthy lyrics, did much to wake the intelligence of the country to national interests; author of *An Essay on Irish Songs*. (1814-1845).

Davis Cup, a lawn-tennis trophy competition, presented in 1900 by Dwight F. Davis, an American player, who represented his country in the first two contests. It is a knock-out tournament for men, consisting of four matches of five sets of singles, and one doubles match of five sets, the winners being the best of the five matches. Competing nations can challenge in either the American or European group, the challenge round being played in the country which holds the cup. It was held by Great Britain from 1933 (when it was won from France) to 1937, when, after some of the hardest play ever seen at Wimbledon, America won the cup. In 1938 Australia were challengers to America.

Davison, William, of Scottish birth, secretary to Queen Elizabeth. He was employed on diplomatic work; took part in the trial of Mary, Queen of Scots, and secured Elizabeth's signature to the execution warrant. He incurred her displeasure as a result, was arrested and committed to the Tower, fined heavily and, though released, never restored to favour. (1541-1608).

Davis Strait, the strait between Greenland and Baffin Bay with the Atlantic, discovered by John Davis (q.v.).

Davitt, Michael, a noted Irish patriot, born in Co. Mayo, son of a peasant, who, being evicted, settled in Lancashire; joined the Fenian movement, and was sentenced to 15 years' penal servitude; released on ticket-of-leave after 7 years; helped Parnell to found the Land League; was for over a year imprisoned again for breaking his ticket-of-leave; published in 1885 *Leaves from a Prison Diary*; entered Parliament in 1895 for West Mayo, though he had been elected several times before—e.g., in 1882, when as a convict, he was not allowed to sit, and in 1892, when he was unseated on petition. (1846-1906).

Platz, a village 5,015 ft. above the sea-level, in Davos, Grisons, Switzerland; by Charles Darwin in winter by invalids suffering of plants and animals, the dry air and sun being favourable for them; for winter sports.

Davout, Louis Nicolas, Duke of Angers, städt., Prince of Eckmühl, Marshal of France, born at Annoux, in Burgundy; was fellow-student with Napoleon at the military school in Brienne; entered the army in 1788, served in the Revolutionary wars under Dumouriez and Desaix, and became general; served under Bonaparte in Egypt; distinguished himself at Austerlitz, Austerlitz, Eckmühl, and Wagram; was made governor of Hamburg; accompanied Napoleon to Moscow; returned to Hamburg, and defended it during a siege; was made Minister of War in 1815, and assisted Napoleon in his preparations for the final struggle at Waterloo; commanded the remains of the French army which capitulated under the walls of Paris; adhered to the Bourbon dynasty on its return, and was made a peer; was famous before all the generals of Napoleon for his rigour in discipline. (1770-1823).

Davy, Sir Humphry, a great English chemist, born at Penzance; professor at the Royal Institution, London, 1802-1812; conceived early in life a passion for the science in which he made so many discoveries; made experiments on gases and the respiration of them, particularly nitrous oxide and carbonic acid gas; discovered the function of plants in decomposing the latter in the atmosphere, prepared sodium and potassium by electrolysis of their fused hydroxides, proved chlorine to be an element and showed its affinity with iodine; invented the safety-lamp, his best-known achievement; he held appointments and lectured in connection with all these discoveries and their applications, and received a baronetcy and numerous other honours for his services; died at Geneva. (1778-1829).

Davy Jones' Locker, the sailors' familiar name for the sea as a place of safe-keeping, and the resting-place of those who die at sea.

Davy Lamp, a lamp encased in gauze, wire, which, while it admits oxygen to feed the flame, prevents the heat of the flame being communicated to any combustible or explosive gas outside. Invented by Sir Humphry Davy in 1816.

Dawes, Brigadier-General Charles Gates, American politician and soldier. Working at the Bar, he was comparatively unknown till he went to France in 1917 with the American troops. On his return he was made Director of the Budget in 1921, and elected Vice-President of the U.S.A. in 1925, after the Reparations Commission had called on him to preside in 1923 over a committee which re-established German finances after the collapse of the mark. He was American Ambassador in London, 1929, and took part in negotiations for naval disarmament. He took charge (1932) of the Reconstruction Corporation. (1865-).

Dawes Plan, The, a scheme to stabilise German currency and reparations payments drawn up in 1924 by a committee over which Gen. C. G. Dawes (q.v.) presided. The standard German reparations payment was fixed at 2,500,000,000 marks per annum, which was actually reached in 1928-1929. The Dawes Plan was replaced by the Young Plan (q.v.) in 1930.

Dawkins, Sir William Boyd, geologist, Montgomershire, Wales; has written *Cave Hunting and Early Man in Britain*, and in 1882 was employed by the Channel Tunnel Committee to make a survey of the French and English coasts. (1837-1929).

DAVY LAMP

Dawlish, a seaside resort of S. Devon, England, 3 m. NE. of Teignmouth. Pop. 4,578.

Dawson, a river of Queensland, Australia, tributary of the Fitzroy. It flows through a coalfield, as yet incompletely developed.

Dawson, **George Geoffrey**, English journalist. Educated at Eton and Oxford, he was private secretary to Lord Milner in South Africa, 1901-1905, became editor of the *Times* in 1912, resigned the editorship in 1919, and was reappointed four years later. (1874-).

Dawson, **Sir John William**, geologist Nova Scotia; and naturalist, born in Pictou, distinguished himself as a palaeontologist; 1855-1893 professor of Geology and principal of McGill University, Montreal; president of the British Association in 1886; published in 1872 *Story of the Earth and Man*; in 1877 *Origin of the World*; and later, *Geology and History*; he opposed the Darwinian theory as to the origin of species. (1820-1899).

Dawson City, capital of Yukon Territory, Canada, on the Yukon R., and centre of the Klondyke goldfields. Its population, 30,000 during the gold rush of 1898, is now only 800.

Dawson, **Sir Bertrand Edward**, G.C.V.O., K.C.B., K.C.M.G., physician, studied at University College and at the London Hospital, where he was physician from 1906. Authority on gastric affections. Physician Extraordinary to Edward VII., Physician in Ordinary to George V. and Edward VIII. Raised to the peerage as a Baron, 1920; Privy Councillor, 1929; President of the Royal College of Physicians, 1931; created a Viscount, 1936. (1865-).

Day, **John**, English dramatist, contemporary of Ben Jonson; collaborator with Dekker and others; author of the *Parliament of Bees*, a comedy in which all the characters are bees. (1574-1640?).

Dayaks. See **Dyaks**.

Daylight Saving, an expedient of moving clocks on during the spring, summer and autumn months, in order to secure a little extra daylight for workers. The amount that clocks are moved on varies from 20 minutes in Sarawak and the Gold Coast to 1 hour in Great Britain, Ireland, France and the majority of other countries. Though Summer time has been adopted in many countries, it has not been adopted in all, and the actual date on which clocks are moved forward is not standard. In England, by the Acts of 1922, 1924 and 1925, it has been established as a permanent arrangement that clocks shall be put forward one hour at 2 a.m. on the morning following the third Saturday in April (unless that day is Easter day, in which case clocks are put on at 2 a.m. on the morning of the day following the second Saturday in April) and put back again at 2 a.m. on the morning following the first Saturday in October. Although the idea of Summer time was first originated in America by Benjamin Franklin, its practice is purely an outcome of the War, when it became necessary in order to economise fuel and light in the evenings. In England the idea was first championed by William Willett in 1907, but did not come into operation until May 21, 1916.

Dayton, a prosperous town in Ohio, U.S.A., on the Miami R., a great railway centre and manufacturing town, particularly of electrical equipment and machinery, aeroplane parts, etc. It suffered severely from flooding in 1913, but flood-control works have minimised the possibility of a recurrence. Pop. 200,943. There is

another town of the same name in Tennessee, U.S.A., which gained notoriety in 1925, when a science master in the local high school was found guilty of violating a State law by teaching the evolution of man from the lower animals. Pop. 2,600.

Daytona Beach, a town in Florida, U.S.A., with a long stretch of firm sand used for motor speed trials. Pop. 16,698.

Deacon, an officer in the Christian Church whose chief functions were, in the 3rd Century, the care of the poor, the collection and distribution of alms and attendance on the bishop. In time those duties, which partook of the nature of social work, were transferred to hospitals and other charitable organisations. To-day in the Catholic and Anglican churches the post is considered a preliminary step to the priesthood, in the Catholic Church being the third order of the ministry, in the Church of England a man not under 23 years of age who, after a year of such service is usually ordained. In the Church of England a deacon may conduct the services, but not consecrate the elements. In the Presbyterian Church a deacon is a layman elected to manage the church affairs, and in particular to take charge of finances. The office is mentioned in the New Testament, where the qualifications appear to be substantially the same as those of a bishop. (See 1 Tim. iii.)

Deaconess, Christian Church, the function of the holders of which was to assist at baptisms, minister to the sick and conduct women to their seats in Church. An order of Deaconesses existed in the Eastern Church from the 4th Century, but fell into abeyance in the Middle Ages. It was revived in the Church of England in the 19th Century for the purpose of carrying on social work under licence from a bishop and of carrying on missionary work.

Deadly Nightshade (*Atropa belladonna*), a highly poisonous plant with a berry and leaves which yield belladonna (q.v.) used medicinally to allay pain. See also *Atropine*.

Deadman's Handle, a device attached to the control gear of an electric train which ensures that the train is automatically brought to rest if the driver releases his grip through sudden illness.

Dead Nettle, a genus (*Lamium*) of the order

Labiatae native to temperate countries as wayside weeds. The principal varieties found in England are White (*L. album*), Purple (*L. purpureum*) and Yellow Archangel (*L. Galeobdolon*).

Dead Sea, called also the Salt Sea and the Asphalt Lake; a sea, or lake, of Palestine, lying between Palestine and Trans-Jordan, formed by the waters of the Jordan, 46 m. long, 10 m. broad, and in some parts 1,300 ft. deep, while its surface is 1,312 ft. below the level of the Mediterranean. It has no outlet, but its waters, owing to the great heat, evaporate rapidly, and are intensely salt. It is enclosed E. and W. by steep mountains, rising to a height of 6,000 ft.

Dead's Part, in Scottish law, the movable estate which may be bequeathed by will or, in intestacy, devolves upon next-of-kin. A person may not will all his money out of his family according to Scotch Law, the

WHITE DEAD
NETTLE

properties which he may so bequeath varying from one-half to only one-third in the case of a married man with children.

Deaf-mute, or speak. The condition is sometimes congenital and sometimes acquired. In the former case intermarriage of deaf-mutes and inbreeding are common causes. Acquired deaf-mutism frequently arises from an affection of the middle ear, often after some febrile disease, such as scarlet fever, small-pox, etc. Special education in language is necessary if imbecility is to be avoided, and visual training, including the two-handed manual alphabet, is practised widely in England and America. The Elementary Education Act of 1870-1891 provides for the compulsory education of deaf-mute children, and training in such trades as bookbinding, carpentry, cigar manufacture, jewellery, law-writing and instrument-making is successfully undertaken. Societies and institutions in England for the welfare of deaf-mutes include the Royal School for Deaf and Dumb Children, Margate, and the Royal Association in Aid of the Deaf and Dumb, 413, Oxford Street, London, W. 1.

Deafness, a diminished or destroyed sense of hearing. It is either congenital or acquired. When congenital, it arises from a malformation of the ear, and is accompanied by dumbness (see *Deaf-mute*). When acquired, it is caused by a number of diseases affecting different parts of the ear. Vitiating secretion of the wax is a common cause, while inflammation of the auditory passage, leading to formation of purulent matter, ulceration and perforation of the drum, is another cause. Measles, scarlet fever, etc., often lead to impairment of the hearing. When the ear is blocked with hardened wax, almond oil should be applied to soften it, and syringing is then efficacious. Perforations of the membrane can be plugged, and a catheter is often of advantage where the eustachian tube is closed, while a variety of instruments are available from instrument-makers for the treatment of various types of deafness. Injury to the external ear alone has little or no effect upon hearing where there is no associated injury of the inner ear. There are a number of societies for the deaf, including National Benevolent Society for the Deaf, 23, Queen Anne's Gate, London, S.W. 1; National Institute for the Deaf, 105, Gower Street, London, W.C. 1, and the Deafened Ex-Service Men's Fund, 23, Queen Anne's Gate, London, S.W. 1.

Deal, a town 14 m. ESE. of Canterbury, on the E. of Kent, opposite the Goodwin Sands, with a fine sea-beach, much resorted to for sea-angling. Pop. 13,680.

Dean, the name of various ecclesiastical dignitaries. 1. *Rural Dean*, a parish priest who also presides over the clergy of a deanery, a subdivision of an archdeaconry. He has the care of a part of a diocese. In the Church of England they have an especial duty to see that the fabric of churches and parsonages is maintained in proper repair. 2. *Dean in a Cathedral Church*, one who presides over the canons who form the bishop's council of the dean and chapter. In some cases the office is included in that of a bishop. 3. *Deans of Peculiar*, being Deans of certain "peculiar" churches and having cure of souls but no chapter, and not subject to visitation by the bishop of the diocese. Such are the deaneries of Battle (Sussex), Stamford (Rutland) and Bocking (Essex). The title is also used of the judge of the Court of Arches, the chief court and consistory of the Archbishop of Canterbury, and of officers of the English Universities charged with the discipline of a college.

Dean, Forest of, a forest in the W. of Gloucestershire, between the Severn and the Wye; the property of the Crown for the most part. There is coal in the district, and the inhabitants are chiefly miners.

Death, naturally by a process of gradual decay, but in the majority of cases is accidental, being caused by disease or violence and resulting from failure of the action of the heart, the brain or the lungs, these being the vital organs. They are mutually dependent, and the functional failure of one may follow injury to one of the other two. Death from failure of the heart may be sudden, as in syncope, or gradual, as in the action of slow poison or from anæmia. Death resulting from disease of the brain is caused by violence, poison or a clot of blood. Failure of the respiratory organs causes asphyxia (q.v.). Notification of deaths to the Registrar of Births, Deaths and Marriages is compulsory.

Death Duties, consist of estate duty (which includes probate duty), legacy duty, succession duty and increment value duty. Estate duty is a stamp tax payable on estates over £100 at the rate of 1 per cent. on estates up to £500, 2 per cent. up to £1,000 and 2½ per cent. up to £5,000 and upon estates of £5,000 or over percentages increasing to 50 per cent. on estates exceeding £2,000,000. It is graduated according to the aggregate net value of the estate after just debts and funeral expenses have been paid. Settlement and estate duty are payable on estates over £1,000 and consist of a further 2 per cent. Legacy and succession duties are taxes on the interest of the beneficiary (q.v.) in personal and real property respectively, received on the death of another. See *Legacy Duty* and *Succession Duty*.

Death Rate, the number of deaths on a basis of every 1,000 of the population estimated annually, but owing to variations due to sex, age, climate, occupation, etc., the rate is standardised according to a fixed proportion of age and sex groups. The advance of national hygiene is shown by the decrease of the death rate of the British Isles as shown in the following figures: 1880, 20.5; 1900, 18.2; 1920, 12.4; 1930, 11.7; 1935, 11.4. The death rate is higher among non-European races and in tropical regions than in temperate areas. In most countries the death rate of males exceeds that of females, and is higher during the early years of life.

Death's Head Moth (*Acheronia atropos*), the popular name for the largest British hawk moth, its body bearing markings which resemble a skull.

Death-watch Beetle, the popular name

of a number of timber-boring beetles. It is more properly applied to the *Xestobium tessellatum*, an insect responsible for the complete honey-combing of rafters and woodwork in many old buildings. The ticking noise is produced by the insect striking its head against the wood. The *Anobium punctatum* is responsible for the "wormholes" in old furniture, but is not properly referred to as a "death-watch beetle." *Atropos divinatoria* is another true "death watch," producing ticking noises.

DEATH-WATCH BEETLE (Magnified)

Deauville, a popular seaside resort on the R. Touques in the dept. of Calvados, Normandy, France.

Debenture, a written acknowledgment of a debt; a deed of mortgage given by a railway or other company for borrowed money, secured on the company's property and registered at Somerset House. Also a certificate entitling an exporter of imported goods to a refund of the duty paid on their importation.

Deborah, a Hebrew prophetess; wife of Lapidoth, and reckoned one of the judges of Israel for her enthusiasm to free her people from the yoke of the Canaanites. She incited Barak to lead out the children of Naphtali and Zebulun against Sisera, the captain of Jabin, the Canaanite's army. Sisera's army was discomfited, and Sisera, taking refuge with Jael, was slain by her. Deborah sang a song of exultation over their defeat instinct at once with pious devotion and with revengeful feeling (see Judges iv. and v.).

Debrecen, a Hungarian town, 130 m. E. of Budapest, the headquarters of Protestantism in the country, and has an amply-equipped Protestant College; is a seat of manufactures and enjoys a large trade in grain and cattle. Pop. 125,000.

Debrett, John, publisher, succeeded John Almon, opposite Burlington House, Piccadilly, 1871. His shop was a Whig resort. First edition of his *Peerage* appeared 1802; the last edition he edited was the 15th, 1823. He published a *Baronetage* in 1808. (d. 1822).

Debt, an ascertained sum of money due from one person to another. As the money must be *due*, rent or the instalment of an annuity is not a debt till it becomes due. But a debt is none the less a debt because the payment is deferred until the happening of an event which must happen. On the other hand, a contract to pay a certain sum on the happening of an event which may never happen does not create a debt unless and until the event happens. A contract to lend money does not create a debt and if the money is not lent the intended borrower is only entitled to damages for the actual loss caused by the breach of contract. A contract of suretyship is not a debt, or, at most, is only a contingent debt. There are three kinds of debts: those of record, i.e., recorded in a court with power to fine and imprison, and judgment debts; specialty debts, i.e., those created by deed or confirmed by special evidence, such as covenants to pay rent on a lease or a bond to repay money with interest, and thirdly, simple contract debts.

Debts are recoverable in the High Court, or by an action in a County Court where the debt does not exceed £100 or those in a foreclosure action up to £500. Actions on simple contract debts are barred after six years and judgment and specialty debts after twelve years (see *Limitations, Statutes of*). A county-court judgment debt does not carry interest, and interest on debts cannot be demanded unless an agreement to pay such interest has been made. No person can be imprisoned for debt except under certain conditions laid down in the Debtors Act of 1869 and 1936. After judgment for a debt has been pronounced, the various methods of enforcing payment include execution, attachment, sequestration or charging order. A person indebted to a judgment debtor is called a garnishee, and a garnishee order may be sought by the creditor to attach the debt.

Debt Conversion, the process of one form of security to another, usually, though not always, for the purpose of reducing indebtedness or reducing rates of interest on indebtedness. The operation is designed to ease a financial situation created by large public debts such as are caused by war, earthquakes, famine, etc.

Debussy, Claude Achille, foremost French composer of his time, born at St. Germain-en-Laye, studied at Paris Conservatoire; won Grand Prix de Rome with *L'Enfant Prodigue* cantata, 1884. His masterpiece is *L'Après-midi d'un Faune*, symphonic poem, 1902. His only opera was *Pelléas et Mélisande*, 1902. (1862-1918).

Decadence, the literary movement of the 19th century, the essence of which is its reaction against the world as the "decadents" saw it. It had its beginnings in the Romantic Movement, and though its ultimate source is to be found in the poetry of S. T. Coleridge, its chief prophet is Baudelaire. Its characteristic note is defiance in despair. The decadents rejected the lessons of both the French and the Industrial Revolutions, especially in the shape of the bourgeois democracies which had superseded the rule of monarchs and autocracies. Science, in their view, was the mere handmaid of democracy and industrialism, the destroyer of beauty and the agent of the individual's sacrifice to wealth. Some of the names in the movement, besides Baudelaire, are Verlaine, Poe, Mallarmé, Rimbaud, Samain, Henri de Régnier, Maeterlinck, Dehmel, Rilke, Fröding, Oscar Wilde and Verhaeren.

Decalogue, the name of the ten commandments given to Israel through Moses by the voice of Jehovah on Mount Sinai. There are two versions, one in Exod. xx. 2-17, and the other in Deut. v. 6-21.

Decameron, a collection of tales between 1348 and 1388, conceived of as related in ten days at a country house during the plague at Florence; are of a licentious character, but told with great humour and literary skill. The tales have been drawn upon by generations of writers, including Chaucer, Shakespeare and Tennyson.

Decamps, Alexandre Gabriel, a distinguished French painter, born in Paris; brought up as a boy among the peasants of Picardy; studied under David and Ingres; represented nature as he in his own way saw it, and visited Switzerland and the East, where he found materials for original and powerful pictures. (1803-1860).

De Candolle, Augustin Pyrame, an eminent botanist, born at Geneva, of Huguenot descent; studied in Paris; attracted the attention of Cuvier and Lamarck, whom he assisted in their researches; published his *Flore Française*, in six vols.; became professor at Montpellier, and then at Geneva; is the historical successor of Jussieu; his great contribution to botanical science is connected with the classification of plants. (1778-1841).

Decapoda, a sub-class of crustaceans, including the crab, lobster,

crayfish and shrimp. The name refers to the ten limbs borne on the thorax. It includes crabs, lobsters, shrimps, prawns, etc.

Decapolis, a league of ten ancient cities E. of the Jordan probably formed c. 63 B.C., after Pompey's campaign in the East.

Deccan, a triangular plateau of from 3,000 to 3,000 ft. of elevation in the Indian peninsula, extending S. of the Vindhya Mts.; is densely peopled, and contains some of the richest soil in the globe.

Decemviri (the ten men), the patricians of Rome, with Consul power, appointed in 451 B.C. to pass

DECAPODA

a code of laws for the Republic, which, after being agreed upon, were committed first to ten, then to twelve tables, and set up in the Forum that all might read and know the law they lived under.

Decimals, a system of fraction calculation in arithmetic by units of tenths, hence the name. Thus decimal one, $\frac{1}{10}$, equals one tenth; $\frac{25}{100}$, two tenths and five hundredths and so on. The system is less cumbersome than the vulgar fraction, since the four rules involve no process of finding the least common multiple, while it is also comprehended with greater speed. It is the basis of the metric system of weights and measures in use in France, Germany, Russia and other European countries. The system is said to have been adopted from the Hindu system of notation in which the value of a number was increased for every place it was set to the left by ten, whereas in the decimal system the value of a figure is decreased by ten for every place it is set to the right from the decimal point. Decimal fractions can be more readily compared with one another than vulgar fractions. At a glance $\frac{825}{1000}$ is greater than $\frac{717}{1000}$, but a somewhat laborious operation is necessary to see whether $\frac{2}{3}$ is greater than $\frac{4}{5}$. On the other hand, certain quantities, such as thirds, sevenths, etc., cannot accurately be represented by decimals.

Decius, Roman emperor from 249 to 251; successor of Philip, who sent him to Moesia to appease the country, instead of which he assumed the purple; was a cruel persecutor of the Christians; perished in a morass fighting with the Goths, who were constant enemies all through his reign.

Decius Mus, the name of three Romans, father, son and grandson, who on separate critical emergencies (338, 296, 280 B.C.) devoted themselves in sacrifice in order to secure victory to the Roman arms. The father and son both devoted themselves to the Manes (the infernal deities). The grandson, arrayed in unusual dress, inspired his men by rushing to death in the thickest part of the foe.

Decken, Karl Klaus von der, African explorer, of German extraction, served in the Hanoverian army before attempting a journey from Zanzibar to Lake Nyasa. In company with Kersten, he attempted, in 1862, the ascent of Kilimanjaro, reaching a height of 13,700 ft. He was murdered by Somalis in E. Africa while engaged on an expedition to explore the East African lakes. (1833-1865).

Declaration of Independence, the document adopted on July 4, 1776, by the Congress of the American colonies of New England in which they publicly declared their independence of England. It was based on a draft by Thomas Jefferson, embodies some of the highest political ideals ever formulated and has proved to be one of the most important and far-reaching documents in the history of the world. It is on permanent exhibition in the Library of Congress. The day is commemorated as a public holiday in America.

Declaration of London, a pronouncement issued by the International Naval Conference in London in 1909 with the object of regulating the mutual rights and responsibilities of countries during war, to establish an International Prize Court and reach an agreement on questions of International Law. The provisions of the Declaration of Paris (1864) were included, and an important ruling defining the area of a blockaded port was made. The articles relate chiefly to questions of blockade, contraband and neutrality of vessels. When the Great War broke out

the Declaration of London was adopted by Orders in Council but found to be impracticable, was superseded by the Maritime Rights Order in Council of 1916.

Declaration of Paris, an agreement signed by nearly every civilized State at the Congress of Paris in 1856. The U.S.A. and Spain did not sign, but during the American Civil War the Declaration was observed, and in 1898 both countries signed. Its principal articles declared privateering abolished, that neutral goods under a hostile flag, unless contraband, were not liable to confiscation, that a state of blockade was not binding unless the blockade were effective. The general purpose of the Congress declaration was to define the principle of maritime law of those countries who had signed, in the eventuality of war.

Declaration of Rights, The, was passed by Parliament in 1689; it declared William and Mary King and Queen of England in succession to James II., and laid down regulations for their successors; in declaring the rights and liberties of the English people it provided for the supremacy of the Parliament in all matters affecting religion and law.

Declarations of Deceased Persons, statements admissible as evidence in law, and include the following: a declaration made by a person in actual danger of death, such declaration being relevant only in a trial for the manslaughter or murder of the declarant and referring only to the cause or circumstances of the death; a declaration against the pecuniary or proprietary interest of the declarant; statements made by a person in the ordinary course of business or duty; declarations as to pedigree; statements referring to disposal of property where there is no will and statements with reference to a public right of way. The declaration may be taken down in writing and used on proof that the deponent is dead or unlikely ever to give evidence.

Declension, in grammar the inflections (noun, pronoun or adjective) undergoes according to its meaning or relation to other words in a sentence. Most languages were originally, and many (as, e.g., German) are still, inflected. Many languages, however (e.g., English, which until the early Middle Ages was highly inflected), have discarded the case-endings and precede the word by prepositions where necessary to achieve the same end. In English there are now only few relics of the previous case-ending. Among these may be noted the "s" or "es" of the genitive or possessive case, the "s" or "es" of the plural and the existing inflection of the personal pronouns (for gender, number and case).

Declination, the name given in astronomy to what corresponds to latitude in geography; it is measured in degrees north or south of the celestial equator.

Declination, Magnetic, the angle between the true north or geographic meridian and the direction in which the compass needle points or magnetic meridian. The declination varies at different places and it also varies at the same place. This steady change in one direction for some years is called the *Secular variation* of the needle. In England the declination, at present W., is decreasing at the rate of about 5.3 seconds per year. In the year 1877 a compass needle set up in London will point due north (as it did in 1857), and subsequently will move to the east. The complete cycle of changes takes 320 years.

Decorated Period, a period in English Gothic

architecture of the 14th Century, showing development from the geometric to the curvilinear style. A feature of the former is the window tracery comprising the arch, circle, quatrefoil, trefoil, while the latter appeared in mouldings based on the ogee curve. Fine examples are at Lincoln and Ely Cathedrals.

DECORATED PERIOD
WINDOWS

Decoy, a device for catching or enticing wild ducks within gun range; more generally any trap. A decoy duck, a tame bird, is used, though in America and sometimes in England artificial decoys are employed. The word also applies to a card-swindler's confederate.

Decree, a term denoting a decision or order by a competent power or magistrate by which some disputed point of judicial inquiry is settled. The term, of Roman origin, is used to express a judgment of the Court of Chancery. Decrees by the Pope are Decretals, and a collection of them forms the basis of Roman Canon Law.

Decretals, The, a collection of laws added to the Canon Law of the Church of Rome, being judicial replies of the popes to cases submitted to them from time to time for adjudication. The False Decretals, dating from the 9th Century, contained a basis of authentic material and additions which were forgeries. The author, the "Pseudo-Isidore," lived in Spain, and took the name of the Archbishop of Seville (Isidore), to which he added the surname Mercator. The False Decretals had some considerable influence on ecclesiastical history.

Dedham, a town of Essex, England, on the Stour, in the midst of Constable country. It was once a centre of the cloth trade. Pop. 1,500. There is a manufacturing town in Massachusetts, U.S.A., bearing the same name. Pop. 15,000.

Deduction, a term used in logic, and commonly applied to a process of inference in arriving at particular conclusions or consequences from general principles. It is now debated whether deduction is a form of induction. A science passes from the inductive to the deductive stage when, having reached a general principle, deductive or consequential inferences may be made from the principle reached. In geometry a deduction is a solution to a problem arising out of, and employing, a former theorem.

Dee, name of several British rivers. One rises in Lake Bala, Merionethshire, Wales, flows through Chester, and empties into the Irish Sea through a sand-blocked estuary. Another, a famous Scottish salmon stream, flows mainly through Aberdeenshire, entering the North Sea at Aberdeen.

Dee, Doctor John, an astrologer and alchemist, he claimed to have the power of transmuting base metal into gold and of invoking spirits; became warden of Manchester College. (1527-1608).

Deed, an instrument or document in writing or print upon parchment or paper, duly sealed and delivered. There are two kinds, indentured and poll. An indenture is a deed between more than one party (i.e., where each party to the contract undertakes liabilities). A deed poll is one in which one person only binds himself to do something, as, e.g., to pay an annuity. An indenture was formerly drawn up in two (or whatever number necessary) parts on one

sheet of parchment and separated by a wavy (indentured) line, so that by placing them together they were identifiable as parts of one and the same document. This indentation is no longer necessary. An indenture begins, "This indenture made, etc." Fraud may invalidate a deed, as indeed it does anything; but valuable consideration is not necessary for a deed in English law. A deed poll has straight cut edges (polled) and begins, "Know all men by these presents, etc." and usually takes the form of a declaration. The most familiar document in the form of a deed is that proclaiming ownership of a house or land. An Escrow is a deed delivered to a person and only becoming effective on the happening of a certain event.

Deemster, the title of a judge in the Isle of Man, one officiating for the northern part and one for the southern. Formerly there was an officer bearing the same title attached to the High Court of Justice in Scotland.

Deer, a family of animals (the Cervidae) belonging to the Pecora (the

FALLOW DEER

Ruminants which include the sheep, cattle, goats, etc.). Most of them bear antlers, bony outgrowths on the head which during growth are covered with sensitive skin with blood-vessels, but which at maturity are bloodless and used for fighting. Except in the case of the reindeer or caribou, the females are hornless. The musk-deer has no antlers. The antlers are usually lost and renewed annually, and increase in size and number of branches at each renewal. Most species live in herds. Different species are found in almost every quarter of the globe. They are even-toed (Artiodactyl), cloven-hoofed, and feed on grass, twigs, lichens, moss and juicy plants. The female deer is called a "hind" or "doe," while males are "stags," "bucks" or "bulls." The more important kinds are the red deer, fallow deer, roebuck, reindeer (caribou in America), wapiti, elk (moose in America), Thorold's Deer, Muntjac and the musk-deer.

Deerhound, a hound akin to the bush wolf-dog, and much used in Scotland. Its coat is rough, and its height about 28 in., its weight between 75 and 90 lb.

Defence of the Realm Act, a number of laws passed at different times during the World War, designed especially to prevent persons from communicating with the enemy or obtaining information harmful to the armed forces, to safeguard H.M. Forces as well as ships and means of communication, and later to remove risk of hindrance to munitions manufacture. The first act in 1914 authorised trial by courts martial and allowed the Admiralty or Army Council to take over, if necessary, the output of any factory engaged in munitions. In May 1915 wide powers were given to the authorities over the supply and sale of intoxicating liquors in certain areas. The initials of the Act earned for it the nickname DORA.

Defender of the Faith (Defensor)

a title conferred by Pope Leo X. in 1521 upon Henry VIII. for his defence of the Catholic faith in a treatise against Luther, and retained ever since by the sovereigns of England, though revoked by Pope Paul III. in 1535 in consequence of Henry's apostasy.

Deflation, a process in the manipulation of currency whereby a diminution of volume is brought about, resulting in a rise in the value of money and consequent fall in prices. It results in a reduced money yield from taxation and reduced profits of business, while fixed incomes rise in value during the fall in prices.

Defoe, Daniel, born in London, the son of James Foe, he himself changing the name to De Foe; trained for the Dissenting ministry; turned to business, but took chiefly to journalism and pamphleteering, was a zealous supporter of William III. His ironical treatise, *The Shortest Way with Dissenters* (1702), which, treated seriously, was burned by order of the House of Commons, led to his imprisonment and exposed him for three days to the pillory, amidst cheers, however, not the jeers of the mob; in prison wrote a *Hymn to the Pillory*, and started his *Review*. After his release he was employed on political missions, and wrote a *History of the Union*. The closing years of his life were occupied mainly with literary work, and it was then, in 1719, he produced his world-famous *Robinson Crusoe*. He has been described as "master of the art of forging a story and imposing it on the world for truth." Wrote also *Captain Singleton*, *A Journal of the Plague Year*, *Moll Flanders* and *A Tour through Great Britain*. (1659-1731).

De Forest, Lee, American scientist, who devoted himself to the study of wireless; was employed by the U.S.A. navy to design the first high-power station; invented the triode valve, thus making possible the later developments in radio-telegraphy, and also carried out early experiments on phonoflms, later known as talkies. (1873-).

Degas, Hilaire-Germain Edgard, French painter. Born in Paris, son of a banker, he was educated for law, but took to art, and became friendly with Manet and other Impressionists. He abandoned his historical line of work and started depicting modern life, the race-course, cafés, theatres and ballet-dancers providing him with ample material. (1834-1917).

Degeneration, in biology, a gradual change of cell structure whereby the organism adapts itself to simpler life conditions. Certain lizards, for example, bear only vestiges of limbs. The term also refers to retrogressive changes which occur, e.g., during senile onset, as in the brain cells of the summer bee, and in human beings, as, e.g., fatty degeneration of the heart.

Degree, a unit of measurement of complete circles and arcs of circles. A complete circle subtends 360° at the centre. A semi-circle contains 180°, and a right angle 90°. On the assumption that the earth is a perfect sphere, a system of degrees has been used for the measurement of the surface. In thermometry, the equal subdivisions of an interval, e.g., between boiling and freezing point, are also called degrees.

Dehra, town and hill-resort of India, in Dehra, United Provinces, capital of Dehra Dun district. Possesses military and forestry colleges. Pop. 47,000.

Deism, belief on purely rational grounds, in the existence of God, and distinguished from theism as denying His deuce.

Deists, a set of freethinkers of various shades, who in England, in the 17th and 18th Centuries, discarded revelation and the supernatural generally, and sought to found religion on a purely rational basis.

Dekker, Thomas, a dramatist, born in London; was contemporary of Shakespeare, Ben Jonson, Ford, Rowley, Webster and Middleton, with some of whom

he collaborated in play-writing; wrote lyrics as well as tragedies and light comedies, and prose as well as poetry. The most famous among his prose works is *The Gull's Hornbook*, a pamphlet in which he depicts the life of a young gallant. He spent some years in the King's Bench prison for debt. (1572-1641).

De la Bêche, Sir Henry Thomas, geologist, published a *Manual of Geology* and the *Geological Observer*; secured the establishment of the Geological Survey of Great Britain and was appointed head of it. (1796-1855).

Delacroix, Eugene, a French painter, born at Charenton, dept. of Seine; one of the greatest French painters of the 19th Century; was the head of the French Romantic school, a brilliant colourist and a daring innovator. His very first success, "Dante crossing Acheron in Charon's Boat," forms an epoch in the history of contemporary art. Besides his pictures, which were numerous, he executed decorations and produced lithographic illustrations of *Hamlet*, *Macbeth* and Goethe's *Faust*. (1798-1863).

Delagoa Bay, an inlet in the S.E. of Africa, E. of the Transvaal, in Portuguese territory (Mozambique), also known as the Bahia de Lourenço Marques. The Delagoa Bay Railway, with a terminus at Lourenço Marques, has a length of 57 m. in Portuguese territory, and was built with English capital, the shareholders being indemnified to the extent of £1,000,000 after seizure of the railway by the Portuguese.

De La Mare, Walter John, poet and novelist; born at Charlton, Kent; educated at St. Paul's Choir School; in 1902 published *Songs of Childhood*, and in 1904 *Henry Brocken*, a fantastic novel. *The Return*, 1910, won the Polignac prize, and *Memoirs of a Midget*, 1921, was a notable success. (1873-).

Delambre, Jean Joseph, an eminent French astronomer, born at Amiens, a pupil of Lalande; measured with Méchain the arc of the meridian between Dunkirk and Barcelona towards the establishment of the metric system; produced numerous works of great value, among others *The Basis of the Metric System*, *Theoretical and Practical Astronomy* and the *History of Astronomy*. (1749-1822).

Delane, John Thaddeus, born in London; studied at Oxford; after some experience as a reporter was put on the staff of the *Times*, and in 1841 became editor, a post he continued to hold for 36 years; was the inspiring and guiding spirit of the paper, but wrote none of the articles. (1817-1879).

Delaroche, Hippolyte, commonly known as Paul, a French historical painter born in Paris; was the head of the modern Eclectic school, so called as holding a middle place between the Classical and Romantic schools of art. Among his early works were "St. Vincent de Paul preaching before Louis XIII." and "Joan of Arc before Cardinal Beaufort." The subjects of his later pictures, such as "The Princess in the Tower" and "Cromwell contemplating the corpse of Charles I.," are from history, English and French. The best-known monument of his art is the group of paintings with which he adorned the Ecole des Beaux Arts in Paris, which he completed in 1841. (1797-1856).

Delaware, one of the Atlantic and original States of the American Union, as well as the smallest of them, with the exception of Rhode I. It lies on the E. side of the peninsula of land which is cut off by Chesapeake Bay on the W. and Delaware Bay on the E. It is mainly an agricultural state, the chief crops being maize,

wheat, fruit and vegetables. The chief mineral resource is china clay. It is named after Lord De la Warr, who is reputed to have entered Delaware Bay in 1610. Area 2,370 sq. m. Pop. 238,000. Cap. Dover.

Delaware, the name of a river in the U.S.A. It rises in New York, bounds that state, Pennsylvania and New Jersey, and enters Delaware Bay through a long estuary. Philadelphia stands on its banks. Length 410 m.

Delawares, a once powerful North American Indian people in whose confederacy of the Five Nations were included the Mohicans. Their power was broken by the Iroquois; now settled, like other tribes, in the Indian Reservations.

De la Warr, title of nobility first conferred 1299, came 1427 to Reynold West as sixth Baron (or first of a new foundation). Thomas West, ninth Baron, was a soldier and a courtier. (1472-1544). Thomas West, twelfth (or third) Baron, imprisoned in connection with Essex's rising, was a member of the Virginia Company Council and appointed Governor of Virginia 1609; proved efficient and just as a ruler, and gave his name to the state of Delaware. He died on voyage to Virginia. (1577-1618). John West, sixteenth (or 7th Baron), was made Earl, 1761, Treasurer of Household, General of Horse. (1693-1766). The present Earl, the ninth, Herbrand Edward Dundonald Brassey Sackville, born 1900, succeeded 1915. He joined the Labour Party, and in 1937 became Lord Privy Seal, after holding various Parliamentary Under-Secretaryships. (1900-).

Delcassé, Théophile, French Minister of Foreign Affairs, born at Pamiers; began life as a journalist; was elected to the Chamber in 1889; became Colonial Minister; advocated colonial expansion; as Foreign Minister dealt skilfully with the Fashoda affair. He was a supporter of the Entente Cordiale. (1852-1924).

Delft, a Dutch town, 8 m. NW. of Rotterdam, once famous for its pottery; is intersected by canals. It has an important polytechnic school. Pop. 53,000.

Delhi, the name of a province in India, created in 1912 from territory that was formerly part of the Punjab Province, and containing within it the town of Delhi, on the Jumna, the capital of India, once the capital of the Mogul Empire and the centre of the Mohammedan power in India. The town contains the famous palace of Shah Jehan, and the Jamma Masjid, which occupies the heart of the city and is the largest and finest mosque in India, and also owes its origin to Shah Jehan. The old city is walled. It is 5½ m. in circumference, and divided into Hindu, Mohammedan and European quarters. It was captured by Lord Lake in 1803, and during the Mutiny by the Sepoys, but after a siege of seven days was retaken in 1857. Proclaimed capital of the Indian Empire at the Coronation Durbar in 1911. New Delhi standing some 5 m. to the S., is the site of the Government buildings planned in 1912 and executed in magnificence since the war, and designed by Sir Edwin Lutyens and Sir Herbert Baker. They were opened formally in 1931. A university was founded at Delhi in 1922. Area (prov.) 573 sq. m. Pop. (prov.) 636,000; (town including New Delhi) 447,000.

Delibes, Clément Philibert Léo, French Paris Conservatoire at the age of 12, sang in the Madeleine choir, and then became jointly church organist and theatre accompanist, and later second chorus master at the Grand Opéra. He composed several short comic operas, of which the best known are *Coppélia*, *Lakmé* and *Le Roi Pèlerin*. (1836-1891).

Delilah, the Philistine woman who betrayed Samson. For 1,100 pieces of silver she successfully (at the fourth attempt) coaxed from him the secret of his strength, so that while he slept on her knees she cut off his hair and delivered him to the Philistines. (Judges xvi.).

Delirium, a state in which the conscious nervous energy is perverted into unaccustomed and meaningless expressions, such as incoherent talk, delusions and uncontrolled muscular action. It differs from insanity by being an accompaniment of actual physical disease or disorder, such as feverishness. It may be a symptom only of such diseases as acute rheumatism and encephalitis. It may follow childbirth, or it may be due to a drug. Trembling delirium (*delirium tremens*) is the result of alcoholism.

Delius, Frederick, British composer. Born in Bradford, he left England at 21 for Florida,

where he stayed two years, returning to Europe to study music at Leipzig. He then settled in France at Gréz-sur-Loing, where he became blind. He wrote six operas, a number of choral and orchestral works, four concertos and a number of songs. His best-known works are *A Mass of Life*, *A Village Romeo and Juliet*, and the incidental music to Flecker's *Hasan*. He was made a Companion of Honour in 1929. (1863-1934).

Dell, Ethel May (Mrs. Savage), English romantic style. Her first and best-known work was *The Way of an Eagle*, 1912. She is the author in all of 35 books, including novels, a few collections of stories and one volume of verse. Married Lt.-Col. Gerald T. Savage, 1922. Published *Honeyball Farm* in 1937.

Della Crusca, a set of English poets that appeared towards the close of the 18th Century, and that for a time imposed on many by their extravagant panegyrics of one another. The founder of the set was Robert Morry, who was actually a member of the Florentine Accademia Della Crusca and who signed himself *Della Crusca*. He first announced himself by a sonnet to Love, in praise of which Anna Matilda wrote an incomparable piece of nonsense, "The epidemic spread for a term from fool to fool," but was soon exposed and laughed out of existence. James Boswell, Mrs. Piozzi, Sheridan and Colman the younger were members of this school. The school was attacked by, among others, William Gifford.

Delorme, Marien, a French courtier, celebrated for her wit and fascination, born in her father's château near Champaubert; came to Paris in the reign of Louis XIII., where her drawing-room became the rendezvous of all the celebrities of the time, many of whom, including St. Evremont, the Duke of Buckingham and Richelieu, are said to have been her lovers. She gave harbour to the chiefs of the Fronde, and was about to be arrested when she died; the story that her death was a feint, and that she had subsequent adventures, is distrusted. She is the subject of a drama by Victor Hugo. (1613-1650).

De l'Orme, Philibert, a French architect, born at Lyons; studied in Rome; was patronised by Catherine de' Medici; with Jean Bullant built the Palace of the Tuileries, and contributed to the art of building. (c. 1510-1570).

FREDERICK DELIUS

Delos, the smallest and central island of the Cyclades, the mythological birthplace of Apollo and Artemis, and where the former had a famous oracle. It was, according to the Greek mythology, a floating island, and was first fixed to the spot by Zeus to provide Leda with a place, denied her elsewhere by Hera, in which to bring forth her twin offspring. It was at one time a centre of Apollo worship, but is now uninhabited, and only frequented at times by shepherds with their flocks.

Delphi, a town of ancient Greece in Phocis, at the foot of Parnassus, where Apollo had a temple. Here he was wont to issue his oracles by the mouth of his priestess the Pythia, who when receiving the oracle used to sit on a tripod over an opening in the ground through which an intoxicating vapour exhaled, which was deemed the breath of the god, and which proved the vehicle of her inspiration. The Pythian games were celebrated in the neighbourhood.

Delphinium, a genus of annual, biennial flowering plants of the order Ranunculaceae. There are some 150 species, mostly natives of Northern temperate regions, and including the *D. Ajacis* or Rocket Larkspur common in England. The perennial delphiniums, grown in the herbaceous border, are mostly hybrids, and have sprung from such species as *grandiflorum* and *formosum*. The colours are chiefly blue or white, but there are also red and yellow species. The annual delphinium, more usually known as larkspur, is bred from the species *Ajacis* and *Consolida*.

ROCKET
LARKSPUR

Delta, a tract of land in the shape of the Greek capital letter Δ, especially the land enclosed by the branching arms of a river where it has divided before entering the sea. Such land is generally very fertile owing to the alluvium brought down by the river. The most notable Deltas are those of the Nile (area 8,600 sq. m.) and of the Ganges (32,000 sq. m.).

Deluge, name given to the tradition, common to several races, of a flood of such universality as to sweep the land, if not the earth, of all its inhabitants, except the pair by whom the land was re-peopled. Geological and archaeological discoveries tend to give support to the tradition in the main, at least as regards a local flood in the Euphrates valley.

Delville Wood, a district in France, of Somme), officially part of the Union of S. Africa, having been presented to the latter for the erection of a war memorial on account of the severe losses among the S. African troops there during the World War in the Battle of the Somme (1916).

Demaratus, King of Sparta from 510 by his crown, fled to Persia and accompanied Xerxes into Greece.

Demavend, Mount, an extinct volcano, the highest peak (18,500 ft.) of the Elburz chain, in Persia.

Dementia, a form of insanity consisting of mental weakness and absence of thought and reason, and being a permanent breakdown of the reason. It may result from disease or be the aftermath of melancholy or mania. It may also occur in old age (senile dementia), when the mind wears out before the body. A more serious form is dementia praecox, in which the intellect and emotions are deranged owing to repression of desires or a failure to face the

realities of life. The patient withdraws into a world of his own, and is governed by unaccountable motives.

Demerara, a county of British Guiana; takes its name from the river, which is 300 m. long and falls into the Atlantic at Georgetown. Chief export is sugar. Demerara (brown) sugar was first produced here.

Demeter (M. Earth-mother), the great Greek goddess of the earth, daughter of Kronos and Rhea, sister of Zeus and mother of Proserpine. She ranks with Zeus as one of the twelve great gods of Olympus. She left Olympus and came down to earth when she discovered the rape of Proserpine by Pluto, and brought a great drought on earth until it was granted that Proserpine should be with her for two-thirds of the year. She is specially the goddess of agriculture, and the giver of all the earth's fruits; known to the Romans as Ceres.

Demisemiquaver, in music, a note equal in duration to a half a semiquaver. Its symbol is like a crotchet with three tails.

Demiurgus, a name employed by Plato to denote the world-soul, the medium by which the idea is made real, the spiritual made material, the many made one. Adopted by the Gnostics to denote the world-maker as a being derived from God, but estranged from God, being environed in matter, which they regarded as evil, and so incapable of redeeming the soul from evil.

Democracy, a form of government based on the theory of the equality of man. In practice it means the government of the State by the majority of the people, as opposed to its government by one (monarchy) or by a few (oligarchy). It has been accurately described as inverted monarchy, and historically it has come about, not by a gradual expansion of power through the medium of municipalities and guilds as they existed in the Middle Ages, but by a direct replacement of the absolute power of a monarch by the will of the major part of the community.

Democracy, being, therefore, not necessarily incompatible with monarchy, may even work within the framework of a monarchy, as in the British constitution; and it is to be remembered that the American constitution, as also the French republican constitution, was drawn up by a people accustomed to thinking in terms of monarchy. In the words of Abraham Lincoln, democracy is defined as "the government of the people by the people and for the people."

The difficulties of democratic government on these lines, however, are so great that, as Sir Henry Maine says, "in large and complex modern societies, it could neither last nor work if it were not aided by certain forces which are not exclusively associated with it, but of which it greatly stimulates the energy. Of these forces, the one to which it owes most is unquestionably Party."

In a democracy a Party governs only by right of representing the will of the majority of the community. When, through the decay of political vitality among the people, a Party comes to represent only its own theory of government or the will of its leader, a democracy is again inverted back into a system of autocracy—a transition which has taken place in several European countries in the years following the World War.

Democrats, a political party in the United States that contends for the rights of the several states to self-government as against government by a central authority. It was founded by Thomas Jefferson. Historically, the party originated with the opposition to the Federalists led

by Washington and Hamilton. Thomas Jefferson, the leader of the Democrats, was elected President in 1801. Subsequent Democratic presidents have been Monroe, Adams, Jackson, Van Buren, Taylor, Woodrow Wilson and Franklin Roosevelt.

Democritus, a Greek philosopher, born in Abdera, Thrace, of wealthy parents; spent his patrimony in travel, gathered knowledge from far and near, and gave the fruits of it in a series of writings to his compatriots. Only fragments of his work now remain, though they must have come down comparatively entire to Cicero's time, who compares them for splendour and music of eloquence to Plato. The philosophy of Democritus was called the *Atomic*, as he traced the universe to its ultimate roots in combinations of atoms, in quality the same, but in quantity different, and referred all life and sensation to movements in them. He regarded quiescence as the *summum bonum*. He has been called the Laughing Philosopher from, it is alleged, his habit of laughing at the follies of mankind. (460-361 B.C.).

Demoiere, Abraham, a mathematician, born in Champagne; lived most of his life in England to escape, as a Protestant, from persecution in France; became a friend of Newton, and a Fellow of the Royal Society, and was of such eminence as a mathematician that he was asked to arbitrate between the claims of Newton and Leibnitz to have been the inventors of fluxions. (1667-1754).

Demon, or *Daimon*, according to the ancients a kind of spirit which watched over the thoughts and actions of men, eventually delivering the body to judgment in accordance with the account it rendered. The daimon of Socrates was particularly famous, it being the name he gave to an inner divine instinct which corresponds to a man's destiny, and guides him in the way he should go to fulfil it. It is more or less potent in a man according to his purity of soul.

Demonology, that branch of learning the existence and character of evil spirits. Among many primitive races the belief in these takes the form of animism.

De Morgan, Augustus, an eminent mathematician, born in Madura, S. India; was professor of Mathematics in London University from 1828 till his death, though he resigned the appointment for a time in consequence of the rejection of a candidate, James Martineau, for the chair of logic, on account of his religious opinions; wrote treatises on almost every department of mathematics, on arithmetic, algebra, trigonometry, differential and integral calculus, the last pronounced to be "the most complete treatise on the subject ever produced in England." (1806-1871).

De Morgan, William Frend, a notable, elderly son of Augustus De Morgan; author of *Joseph Vance, Alice-for-Short and When Ghost Meets Ghost*. He was an artist also, and a member of the Chelsea circle which included Burne-Jones, Rossetti and William Morris. At one stage of his career he set up a kiln for pottery-making, and embarked with success on tile-making, the De Morgan ware becoming famous. It was only in 1905, at the age of 85, that he commenced novel-writing. *Joseph Vance*, his first novel, being published in 1906. (1839-1917).

Demosthenes, the great Athenian orator, born in Athens; had many impediments to overcome to succeed in the profession, but by ingenious methods and indomitable perseverance he subdued them all. He became the first orator not of Greece only, but of all antiquity. A U.K.

stammer in his speech he overcame by practising with pebbles in his mouth, and a natural diffidence by declaiming on the seashore amid the noise of the waves; while he acquired a perfect mastery of the Greek language by binding himself down to copy five times over in succession Thucydides' *History of the Peloponnesian War*. He employed 15 years of his life in denunciation of Philip of Macedon, who was bent on subjugating his country; pronounced against him his immortal *Philippics* and *Olynthiacs*; took part in the Battle of Cheronæa, and continued the struggle even after Philip's death. On the death of Alexander he gave his services as an orator to the confederated Greeks, and in the end made away with himself by poison so as not to fall into the hands of Antipater. (384-322 B.C.). See *Ctesiphon*.

Dempsey, William Harrison (known as "Jack"), boxer; born at Manassa, Colorado, U.S.A. He fought his first professional fight in 1914; became world's heavy-weight champion in 1919 by defeating Willard; defeated Carpenter at Jersey City in 1921; victorious until defeated by Tunney, 1926; defeated again by Tunney in 1927. (1896-).

Demurrage, payment for extra time taken in loading a vessel after the date on which it is due to sail by the terms of the charter-party. The shipowner allows a certain time, called lay-days, for loading. The demurrage beyond that time is paid for by the charterer.

Denarius, a silver coin among the Romans, first coined in 269 B.C., and worth somewhere about 8½d.; originally equal to 10 of the copper coins called *as*.

Denbigh, the town of Denbighshire, Wales, in the Vale of the Clwyd, 23 m. W. of Chester. Pop. 7,249.

DENARIUS

Denbighshire, a county in N. Wales, fertile vales, 40 m. long and 17 m. on an average broad, with a coalfield in the S.E. and with mines of iron, lead and slate. Area 868 sq. m. Pop. 157,600.

Dendera, a village in Upper Egypt on the left bank of the Nile, 28 m. N. of Thebes, on the site of ancient Tentyra, with the ruins of a temple of Hathor in almost perfect preservation. On the ceiling of a portico of the building was found a zodiac, now in the Bibliothèque Nationale in Paris. The temple dates from the period of Cleopatra and the early Roman emperors, and has sculptured portraits of that queen and her son Caesarion.

Dendrite (from the Greek, meaning "tree"), geological term, a stone marked with figures resembling a tree or shrub, due to the action of mineral solutions which have filtered through the interstices of the rock.

Dengue, a tropical fever, epidemic and infectious, accompanied by rheumatic pains in the joints, puffing of the face and vomiting, also by a body-rash; lasts three days, followed by a relapse. Also called breakbone fever, dandy-fever and three-day fever. Rarely fatal.

Denham, village of Buckinghamshire, England, 2 m. N.W. of Uxbridge on the Colne and the Grand Junction Canal; has large film studios. Pop. 2,500.

Denham, Sir John, an English poet, born at Dublin, the son of an Irish judge; took to gambling and squandered his patrimony; was unhappy in his marriage,

and his mind gave way. He is best known as the author of Cooper's *Hull*, a descriptive poem that was the model of Pope's *Windsor Forest*. (1615-1669).

Denia, seaport of Alicante, Spain, on the Mediterranean, a centre of the raisin trade, also exports nuts, oranges and onions. Pop. 12,600.

Denikin, Anton, Russian general, and commander of the anti-Bolshevik forces in S. Russia in 1918-1919. He was of humble birth, rose to the rank of lieutenant-general during the World War, but followed Kornilov on the outbreak of the Revolution. He became commander of the forces on the death of Kornilov, and supreme leader on the death of Alexeeff. He achieved some success, in particular the capture of Stavropol, but suffered reverses in 1919, and finally fled to Constantinople. (1872-).

Denis (Dionysius), St., the apostle of the Gauls, the first Bishop of Paris, and the patron saint of France; suffered martyrdom c. 270. Feast, Oct. 9.

Denis, St., a town 6 m. N. of Paris, within the line of the fortifications, with an abbey which contains the remains of St. Denis, and became the mausoleum of the kings of France.

Denmark, the smallest of the three Scandinavian kingdoms, consisting of Jutland, the N. part of Slesvig and an archipelago of islands in the Baltic Sea, the total area being 16,576 sq. m. It is a low-lying country, no place being more than 500 ft. above the sea-level; as a consequence it has no river to speak of, only meres or lakes. The land is laid out in corn-fields and grazing pastures. There are very few minerals, but abundance of clay for porcelain, while the exports consist chiefly of horses, cattle, pigs, bacon, butter and eggs, etc. The population is 3,706,000; about one-third live by agriculture.

In the 14th Century Denmark was united with Sweden and Norway, and was the dominant kingdom. Sweden separated in 1523, and the next century saw the two countries at war. Denmark was defeated, and took little part in European affairs until at war with England, being an ally of Napoleon. Norway was separated by the Peace of Kiel, 1814, following Nelson's victory at Copenhagen.

In 1864 Denmark was invaded by Austria and Prussia, over the Schleswig-Holstein question, and lost these provinces. After the World War, however, in which Denmark was neutral, North Schleswig was restored by a plebiscite, and named South Jutland. The present king, Christian X., succeeded in 1912 and granted a democratic constitution in 1915. There is a Senate, 76 members, elected for eight years, and a Lower House, 149 members, elected every four years. Education by the State is compulsory and free. The religion of Denmark is Lutheran, established 1536. Defence is entrusted to a national militia on the lines of the Swiss Army.

Dennewitz, a village in Brandenburg, 40 m. S.W. of Berlin, where in 1813 Marshal Ney, with an army of 58,000 French, Saxons and Poles, was defeated by Marshal Blücher, with 50,000 Russians.

Dennis, John, English dramatist and critic, born in London. He was involved in constant broils with the wits of his time. His productions were worth little, and he is chiefly remembered for his attacks on Addison and Pope, and for the ridicule these attacks brought down on his own head, from Pope in *Narrative of the Frenzy of John Dennis*, and the "denotation to everlasting fame" in the *Denadad*. He became blind, and was living in poverty, when Pope wrote a prelude to a play produced for his benefit. (1657-1734).

Denotation. See *Connotation*.

Density, in chemistry and physics, the mass per unit volume of substance. It is estimated in grams per cubic centimetre, or pounds per cubic foot, under normal pressure and temperature. The density of most substances grows less with a rise in temperature. The densities of different substances are brought into relation by comparison with a standard. Water is the standard of comparison for liquids and solids and hydrogen for gases.

Dentatus, Manlius Curius, a Roman general; as consul gained victories over the Samnites and the Sabines and two triumphs in one year; drove Pyrrhus out of Italy (275 B.C.) and brought to Rome immense booty, of which he would take nothing to himself; in his retirement took to tilling a small farm with his own hands.

Dentistry, the art or profession of using or extracting natural teeth, and of making and inserting artificial teeth. Care of the teeth by a dentist includes corrective measures which may be necessary to overcome abnormality of growth, especially in childhood. The cleaning operation is called scaling. Instruments, including an electrical brush, are used to remove concretions of tartar-salivary mucus, etc.

Dental decay, or caries, results from bacteria, which cause fermentation of food residue and form acid deleterious to the tooth enamel. If unchecked, decay exposes the softer portions of pulp and breaks down the tooth altogether. It is then the business of the dentist to extract the tooth, choosing those instruments out of a wide range which are most suitable to the particular tooth. Extractions are usually carried out while the patient is under an anæsthetic, general or local. Decay, however, may be arrested by drilling the tooth, extracting the decayed matter and filling the hole either with gold, porcelain or a dental amalgam.

The mechanical side of dentistry involves taking a mould of the mouth to be fitted with artificial teeth. From this a gold plate is shaped to which porcelain teeth are fixed by platinum pins. Another method is to mould an artificial set out of rubber which is afterwards vulcanised, thus fixing the teeth. Broken teeth are mended by capping—that is riveting a porcelain crown to the lower part of the tooth.

Dentistry is an ancient art, going back to the time of ancient Egyptians, but only in quite recent years has the importance of dentistry in relation to the medical profession been recognised. By an Act of 1878 practitioners in England were required to be registered, but it was not until a further Act in 1921 that the regulations were made more stringent. Most universities give degrees or diplomas in dental work and there are recognised dental schools. The Licensing Corporations are the Royal Colleges of Surgeons in England, Scotland and Ireland, and the Royal Faculty of Physicians and Surgeons of Glasgow. To practise under the title "Dental Surgeon," it is necessary to possess the qualification L.D.S. (Licentiate in Dental Surgery). The penalty for an unregistered person practising is a fine not exceeding £100.

Dentition, the process of cutting the teeth. Teeth do not appear above the gums until normally six months after birth. The lower central incisors are cut first; then the upper central incisors after eight months, followed by the upper and lower lateral incisors. After twelve months the first molars are cut; six months later the canines and, after twenty-four months, the second molars. The permanent teeth begin

to show at about six years old. The term *dentition* is also used in zoology with reference to systems of teeth in animals, e.g., deciduous dentition, permanent dentition.

Denton, (1) a town 7 m. SE. of Manchester, manufactures felt and silk hats. Pop. 17,500. (2) Village of Yorkshire, West Riding, 2½ m. NE. of Ilkley; the birthplace of Sir Thomas Fairfax. (3) A manufacturing city of Texas, U.S.A., centre of an agricultural district; chief industries flour-milling, etc.; seat of the State College of Industrial Arts. Pop. 13,800.

Denudation, the act of wearing away the covering, making bare. In geology the word is used to express the action of water, frost and other natural agents on the earth's surface. For instance, rocks are laid bare by the action of rain wearing away the covering of earth. Rivers have a denuding effect on their banks and the sea upon rocks and cliffs.

Denver, the capital of Colorado, U.S.A., on a plain 5,196 ft. above the sea-level; originally founded as a mining station in 1858, now a large and flourishing and well-appointed town; the centre of a large trade, and a mining district. Pop. 288,000.

Deodar, (1) a small native state in the NW. of Gujarat, India. Pop. 19,700. (2) (*Cedrus Deodara*), the "god tree," a coniferous evergreen tree, a species of Cedar (q.v.), growing high up in the Himalayas.

DEODAR TREE

Department

a territorial division in France, instituted in 1790, under which the old division into provinces was broken up. Each department, of which, including (since 1881) the three of Algeria, there are now 90, is divided into *arrondissements*. Each department is under a government-appointed Prefect, and has representatives of all the ministries.

Dephlegmator, a fractional column, a fractional distilling tube; scientific apparatus used in distilling to collect distillates of varying degrees of volatility. Some types return the less-volatile substances to the still, and thus allow only the most volatile to reach the condenser.

Deportation, the act of sending into exile. A person may be deported from his native country (e.g., Belgians deported to Germany during the World War) or from a foreign country where he is resident. In England the deportation of aliens was originally a royal prerogative. The present controlling Acts are the Aliens Restriction Act 1914 and the Amending Act 1919. By an Order in Council (amended 1923) it is laid down that the Home Secretary is to make out deportation orders if the alien has been convicted of certain crimes or if deportation is "conducive to the public good." Deportation (or transportation) as a punishment for crime as an alternative to capital punishment commenced in England in the reign of James I. Shiploads of convicts were sent to New South Wales every year from 1787, and the system was not finally abandoned until 1840.

Deposition (legal), a witness's statement of evidence at a preliminary examination, taken down in writing in the presence of the Justices by the magistrate's clerk, and signed by the witness. An accused person is allowed to have copies of depositions made against him. He may obtain these from the clerk of the court at which he is committed for trial. Witness must

appear in court at the trial to repeat his evidence, and may be cross-examined on the deposition if his evidence varies at the trial. The deposition can only be accepted as evidence at the trial if the witness is either dead or unable to appear for a valid reason such as serious illness.

Deposits (geological), are the strata in the earth's surface which are formed by the action of wind (Aeolian deposits—e.g., sand-dunes, etc.) and water. Mineral matter which has been split up may be carried by a river or glacier and deposited at some point where the current lessens, either at the foot of a hill or in the delta. Marine deposits consist of river detritus carried out to sea or of shore deposits following denudation of the coast by the action of waves. Decayed organic matter, shells, etc., form a deep-sea deposit.

Depreciation, the estimated decrease in value of assets, industrial plant, etc., owing to wear and tear. The fact that machinery may grow obsolete or its value fluctuate is to be taken into account in calculating depreciation, which is often fixed at an annual sum. The basis is the original cost, annual repairs, market value and its eventual value—e.g., machinery as scrap being assessable. Under the Companies Act a deduction for depreciation must be made from profits before payment of a dividend. Some deduction from profits may also be made for depreciation in assessment for income tax.

Depression, or Cyclone, an area of low pressure round which the wind circulates in an anti-clockwise direction in the northern hemisphere. At the centre there is an upward current of air which frequently gives rise to rain-fall. As a rule cyclones move across the British Isles in an eastward or south-eastward direction. See also Cyclone.

Deptford, a borough of London on the S. bank of the Thames; once with an extensive Government dockyard and arsenal. The site was purchased by the Corporation of London as a market for foreign cattle. Pop. 106,000.

De Quincey, Thomas, English prose-writer, born in Man-

chester; on the death of his father he was placed under a guardian, who put him to Manchester Grammar School, from which in the end he ran away, wandered about in Wales for a time, and then found his way to London; in 1803 was sent to Oxford, which in 1807 he left in disgust. It was here he took to opium, and acquired that habit which was the bane of his life. On leaving Oxford he went to Bath to his mother, where he formed a connection by which he was introduced to Wordsworth and Southey, and led to settle to literary work at Grasmere, in the Lake District. Here he wrote for the reviews and magazines, particularly *Blackwood's*, till in 1821 he went up to London and published his *Confessions* under the nom de plume of *An English Opium-Eater*. Leaving Grasmere in 1828, he settled in Edinburgh, and at Fallow, near Lammade, where he died. (1785-1859).

THOMAS DE QUINCEY

Derating Act, a measure passed in 1929 under which a large part of local rates on industry and agricultural land and buildings were transferred to the State, and which at the same time effected reform of local government, chiefly

the abolition of Boards of Guardians. In the case of industry the relief amounted to three-quarters in the case of agriculture to the whole, of previously existing rates.

Derbend, a town in the Republic of Daghestan, Russia. It is situated on the shore of the Caspian Sea. The caliph Haroun-al-Raschid lived here at various times. Pop. 28,000.

Derby, county town of Derbyshire, England, on the Derwent, with manufactures of silk, cotton, hosiery, lace, porcelain, etc.; it is the centre of a great railway system. Pop. 142,408.

Derby, Charlotte, Countess of, wife of the seventh Earl, who was taken prisoner at Worcester in 1651, and was beheaded at Bolton; famous for the gallant defence of Lathom House against the Parliamentary forces, to which she was obliged to surrender; lived to see the Restoration and died in 1663.

Derby, fourteenth Earl of, British statesman, born at Knowsley Hall, Lancashire; entered Parliament in 1820 in the Whig interest, supported the cause of reform. In 1836 he became Chief Secretary for Ireland under Earl Grey's administration; introduced a coercive measure against the Repeal agitation of O'Connell; contributed to the passing of the Reform Bill in 1832; succeeded from the Whigs in 1834, and became Colonial Secretary in 1845 under a Conservative administration, but when Sir Robert Peel brought in a Bill to repeal the Corn Laws he retired from the Cabinet. He entered the House of Lords in 1844 as Lord Stanley. In 1846 he became the head of the Protectionist party in the House of Lords; succeeded to his father's title in 1851; was after that Prime Minister three times over, and it was with his sanction Disraeli carried his Reform Act of 1867. He resigned his Premiership in 1868, and the last speech he made was against the Irish Disestablishment Bill; was distinguished for his scholarship as well as his oratory, and gave proof of this by his scholarly translation of the *Iliad* of Homer. (1793-1869).

Derby, fifteenth Earl of, eldest son of the preceding; entered Parliament as M.P. for Lynn in 1848; was a member of the three Derby administrations, in the first and third in connection with foreign affairs and in the second as Secretary for India, at the time when the Government of India passed from the Company to the Crown. He became Earl in 1869; was Foreign Secretary under Disraeli in 1874, but retired in 1878. In 1880 he joined the Liberal party, and held office under Gladstone, but declined to follow him in the matter of Home Rule, and joined the Unionist ranks; was a man of sound and cool judgment, and took a deep interest in economic questions. (1826-1893).

Derby, seventeenth Earl of, British politician. After serving in the Guards he entered the House of Commons in 1892, and was Lord Roberts's private secretary during part of the Boer War. In 1900 he became Financial Secretary to the War Office, in 1903-1905 Postmaster-General, and succeeded to the earldom in 1908. During the World War he organised the Derby Scheme (see); Secretary for War 1916 and again 1922-24, and from 1918 to 1920 was British Ambassador in Paris. He is also well known as an owner of racehorses, including the Derby winners of 1924 and 1933 (Sansovino and Hyperion). (1865-).

Derby Day, usually the first Wednesday on the second day of the Summer Meeting at Epsom, on which the Derby Stakes for three-year-old colts (carrying 9 stone) and fillies (carrying 8 stone 9 lb.) are competed for. So called as having been started by the 12th Earl of Derby in 1780. The day used to be

held as a London holiday, and the race is still remarkable for the enormous crowd of spectators.

Derby Scheme, a method of recruiting introduced in 1915 by Lord Derby, whereby a man could "attest" and wait for his "group" to be called up. "Groups" were divided according to age and whether the recruit was married or single.

Derbyshire, a northern midland county of England, hilly in the N., undulating and pastoral in the S., and with coalfields in the E.; abounds in minerals, and is more a manufacturing and mining county than agricultural. Area 1,013 sq. m. Pop. 757,000. County town, Derby.

Dereham, or East Dereham, a market town of Norfolk, England. George Borrow was born and William Cowper buried here. Pop. 6,000.

Derelict, in law, refers to anything which has been abandoned and forsaken voluntarily and utterly by its proper owner; applies especially to a ship deserted by its captain and crew. Salvage can be claimed by the first to arrive at a derelict wreck. Land gained owing to the sea receding is called derelict, and falls to the owner of adjoining land, except in the case of a sudden and considerable receding, in which case it falls to the Crown.

Derg, Lough, an expansion of the waters of the Shannon, Ireland (Eire), 24 m. long, from 2 to 8 broad. Also a small lake in the S. of Donegal, with small islands, one of which, Station I., was a place of pilgrimage to thousands as the reputed entrance to St. Patrick's Purgatory.

De Robeck, Sir John Michael, British admiral. He entered the navy at the age of 15, and in 1915 was given command of the naval forces at Gallipoli; made an admiral in 1920 and given charge of the Mediterranean Fleet. (1862-1928).

De Rougemont, Louis (real name Henri Louis Grin), impostor; addressed anthropological section, British Association, Bristol, Sept. 9, 1898, claiming nearly 30 years' residence among Australian aborigines. His apocryphal adventures in company with an Esquimaux named Etukishuk appeared serially in *Wide World Magazine*. A native of Gressy, Switzerland. True history exposed in *Daily Chronicle*. Died in Kensington Infirmary. (1847-1921).

Derrick, a temporary crane used on board ships; so named after a Tyburn hangman of the 17th Century. It consists of a swinging pole attached at the base to a mast.

De Ruyter.

See Ruyter.

Dervishes, a name given to members of certain mendicant orders connected with the Mohammedan faith in the East. Of these there are various classes, under different regulations, and wearing distinctive costumes, with their special observances of devotion, and all presumed to lead an austere life. Some live in monasteries, and others go wandering about, while some of them show their religious fervour in excited whirling dances, and others in howlings. All are held sacred by the Moslems.

Derwent, the name of several English rivers. One rises near Sea-Foil, Cumberland, and flows through Derwentwater and Bassenthwaite to the Solway Firth. The Derbyshire Derwent, a tributary of the Trent, passes Chatsworth, Matlock and

Derby. There is also a R. Derwent which rises in the Pennines and joins the Tyne above Newcastle, while a fourth is a tributary of the Yorkshire Ouse.

Derwentwater, one of the most beautiful of the Cumberland lakes, in the S. of the county, formed by the river Derwent; extends S. from Keswick; is over 3 m. long, and over 1 m. broad; is dotted with wooded islands, and is overlooked by Skiddaw; it abounds with perch.

Derwentwater, James Radcliffe, Earl of, a Jacobite leader; was third Earl and the last. Several warrants were issued for his apprehension in 1714. He joined the Jacobite rising in 1715, was taken prisoner at Preston, and beheaded on Tower Hill, London, after trial in Westminster Hall. (1689-1716).

Derzhavin, Gavril Romanovich, a Russian lyric poet, born at Kazan; rose from the ranks as a common soldier to the highest offices in the State under the Empress Catherine II. and her successors; in 1803 retired into private life, and gave himself up to poetry; the ode by which he is best known is his *Address to the Deity*, which was translated into English and many other European languages. (1743-1816).

Desaix (de Veygoux), Louis Charles Antoine, a distinguished French general, born at the Château d'Ayat, Auvergne, of a noble family; entered the army at 15; commanded a division of the Army of the Rhine in 1796, and after the retreat of Moreau defended Kehl against the Austrians for two months. He accompanied Bonaparte to the East, and in 1799 conquered Upper Egypt; contributed effectively to the success at Marengo, and fell dead at the moment of victory, shot by a musket-ball. (1768-1800).

Désaugiers, Marc, a celebrated French composer of songs and vaudevilles; "stands second to Béranger as a light song-writer," and is by some preferred to him. (1772-1827).

Désault, Pierre Joseph, a French surgeon, born in dept. of Haute-Saône; his works contributed largely to the progress of surgery. (1744-1795).

Desbarres, Joseph Frederick Wallis, military engineer and hydrographer, aide-de-camp of General Wolfe at Quebec; born in England, fortified Quebec; surveyed the St. Lawrence; revised the maps of the American coast at the outbreak of the American War; died at Halifax, Nova Scotia, aged 102. (1722-1824).

Desborough, Sir William Henry Grenfell, 1st Baron, son of Charles Pascoe Grenfell, of Taplow, Buckinghamshire; was educated at Harrow and Oxford; a distinguished cricketer, athlete and swimmer (of Niagara twice). Liberal M.P. for Salisbury, 1880-1882; Liberal-Unionist for Hereford 1882-1893; Wycombe division, 1900-1905. Chairman of committees on police, and on fresh-water fish; and of Thames Conservancy Board. Ennobled, 1905; K.G., 1928. Father of Julian Grenfell, the poet. (1855-).

Descartes, René, the father of modern philosophy, born at La Haye, in Touraine; was educated at the Jesuit College of La Flèche, where he made rapid progress in all that his masters could teach him, but soon grew sceptical as to their methods of inquiry. He "resolved, on the completion of his studies, to bid adieu to all school and book learning, and henceforth to gain knowledge only from himself, and from the great book of the world, from nature and the observation of man." In 1618 he entered the army of the Prince of Orange, and after a service of five years quitted it to visit various centres of interest on the

Continent; made a considerable stay in Paris; finally abandoned his native land in 1629, and betook himself to seclusion in Holland in order to live there, unknown and undisturbed, wholly for philosophy and the prosecution of his scientific projects. Here, though not without vexatious opposition from the theologians, he lived twenty years, till in 1649, at the invitation of Christina of Sweden, he left for Stockholm, where, the severe climate proving too much for him, he was carried off by pneumonia next year. Descartes's philosophy starts with Doubt, and by one single step it arrives at Certainty; "If I doubt, it is plain I exist," and from this certainty, that is, the existence of the thinking subject, he deduces his whole system. It all comes from the formula *Cogito, ergo sum*, "I think, therefore I exist." Descartes's philosophy is all comprehended in two works, his *Discourse on Method*, and his *Meditations*. His mathematical contributions included the introduction of co-ordinates and the method of undetermined coefficients. He was the founder of analytic or algebraic geometry. (1596-1650).

Deschamps, Eustache, a French poet, born at Vertus, in Champagne; studied in Orleans University; travelled over Europe; had his estate pillaged by the English, whom, in consequence, he was never weary of abusing. His poems are numerous, and, except one, all short, consisting of ballads, as many as 1,175 of them, a form of composition which he is said to have invented. His works deal extensively in satire. (1346?-1406?).

Deschanel, Paul Eugène Louis, French statesman, born in Brussels, son of an exile of the Second Empire; studied law; secretary to Minister of Interior, 1878; deputy, Eure-et-Loire, 1885; President of Chamber, 1898-1902; and again, 1912-1920; of Republic 1920—but resigned same year because of ill-health. (1856-1922).

Desert, a special land form resulting from low annual rainfall of less than 10 ins., or entire absence of rain; generally in tropical and sub-tropical regions (North Africa, Arabia, Central Australia, Central America), but in Central Asia extends into regions usually temperate. Rock deserts (e.g., in Colorado) are those in which the wind has swept away the soil, the rock masses being further eroded by the action of dew and split by the rapid heating and cooling. Sand deserts are generally in areas below sea-level. The sand dunes are formed by the wind, and vary in size from mounds to mountains. Vegetation in deserts is either absent or confined to plants capable of storing moisture (e.g., cacti). In some parts the dew-fall is sufficient to promote plant-life. The natural vegetation found at an oasis keeps its desert character but is far richer owing to the presence of water. Oases vary in extent, some having an area of 100 sq. m. or more.

DESERT
CACTUS

Desertion, voluntarily forsaking a duty or obligations; applies especially to desertion from the services (punishable by death or imprisonment), from the merchant navy (punishable by forfeiting pay), or of a husband from his wife or children. A deserting soldier may be liable for maintenance or subjected to a judicial separation.

Desiccation, the removal of moisture from a substance. In chemistry sulphuric acid is commonly used as a desiccating agent owing to its property of absorbing moisture from the atmosphere.

Gases may also be passed through calcium chloride, which absorbs the moisture.

Des Moines, U.S.A., and the capital, founded in 1848. It is situated in the heart of the cornlands and in the middle of a rich coalfield, and the chief trade is in corn and coal. Pop. 142,600.

Desmoulins, Camille, one of the most striking figures in the French Revolution, born at Guise, in Picardy; studied for the Bar in the same college with Robespierre, but never practised, owing to a stutter in his speech. He was early seized with the revolutionary fever and was one of the ablest advocates of the levelling principles of the Revolution; associated himself first with Mirabeau and then with Danton in carrying them out. He even supported Robespierre in the extreme course he took; but his heart was moved to relent when he thought of the misery the guillotine was working among the innocent families of its victims; with Danton he would fain have brought the Reign of Terror to a close. For this he was treated as a renegade, put under arrest at the instance of Robespierre, subjected to trial, sentenced to death, and led off to the place of execution. His young wife, for interfering in his behalf, was arraigned and condemned, and sent to the guillotine a fortnight after him. (1769-1794).

Des Périers, Bonaventure, a French humanist and storyteller, born in Burgundy; secretary of Margaret of Navarre; wrote *Cymbalum Mundi*, a satirical production, in which, as a disciple of Lucian, he holds up to ridicule the religious beliefs of his day; also *Nouvelles Récréations et Joyeux Devis*, a collection of some 129 short stories admirably told. He was one of the first prose-writers of the century, and is presumed to be the author of the *Heptameron*, ascribed to Margaret of Navarre. (c. 1500-1543).

Despotism, the absolute rule of one man without constitution. In practice a despot generally endeavours to obtain the people's goodwill, otherwise depending on force. Eastern monarchies in early times were despotisms. In the 6th and 7th centuries B.C. despotisms, benevolent or otherwise, were set up in various city-states of Greece and Sicily. Notable despotisms were those of Pisistratus at Athens, Phalaris at Agriguntum and Dionysius at Syracuse. The word is of Greek origin, meaning the master of the household and ruler of the slaves.

Despréaux. See Boileau.

Dessalines, Jean Jacques, Emperor of Hayti, born in Guinée, W. Africa, a negro imported into Haiti as a slave. On the emancipation of the slaves there he acquired great influence among the insurgents, and by his cruelties compelled the French to quit the island, upon which he was raised to the governorship. Soon he was able to declare himself emperor, but his tyranny provoked a revolt, in which he perished. (1758-1806).

Dessau, a N. German town, capital of the Elbe, some 70 m. SW. of Berlin; a manufacturing and trading town. Pop. 79,000.

Destroyer, a warship, 1,500-2,000 tons; 40 knots, and armed with guns up to 4.7 in. and torpedo tubes.

Destroyers madeuvre in flotillas, the flotilla leader being a heavier type of destroyer. They are used for the protection of merchant shipping,

DESTROYER

and in battle for the protection of the main fleet from torpedo attack. The British Navy possesses 20 flotilla leaders, besides 198 destroyers. A number of others are being built under the rearmament programme.

Destroyers, furnaces for the destruction of waste material, especially refuse collected from the houses and streets of towns. Non-combustible refuse is discarded, metal objects being withdrawn by magnets. The first destructor in Great Britain was erected in 1876. There are several types in use to-day. The furnace is very often divided into separate cells, and the refuse is fed in through a hopper. In many towns destructors are attached to the electricity station and used for raising the steam necessary to drive the generators.

Detaille, Jean Baptiste Edouard, an eminent French painter of military subjects; born in Paris; studied under Meissonier; painted "The Conquerors," "The Passing Regiment" and "Saluting the Wounded." (1848-1912).

Detective, a person employed in the detection of crime and a member either of the official police force or of a private detective agency. In its official connection detective work is a highly specialised profession, calling for marked powers in observation, method and deduction. In England the detection of crime is the work of the Criminal Investigation Department, a section of the Metropolitan Police Force numbering over 900 men. Before the creation of the C.I.D. in 1878 the Bow Street "runners" acted as detectives all over the country. Private detectives are employed chiefly for investigation in commercial relations and in divorce cases, for the accumulation of evidence in legal proceedings, for the prevention of blackmail and for the prevention of theft (e.g., in large stores).

Determinism, in philosophy, the principle that phenomena are so connected that the state of affairs at any one moment is conditioned by preceding states and in turn conditions future states. It is to be distinguished, however, from fatalism. In psychology it asserts that the development of consciousness possesses continuity, that causal acts of will do not exist, will being determined by motive.

Detmold, capital of the state of Lippe, Germany; 50 m. SW. of Hanover. There is a colossal bronze statue of Arminius (Hermann), 3 m. SW. of the town. Pop. 16,000.

Detroit, the largest city in Michigan, U.S.A., a great manufacturing and commercial centre, situated on a river of the same name, which connects Lake St. Clair with Lake Erie; is one of the oldest places in the States, having been founded by the French in 1701. It is a well-built city, with varied manufactures and a large trade, particularly in grain and other natural products. Pop. 1,589,000.

Dettingen, a village in Bavaria, where an army of English, Hanoverians and Austrians under George II., in 1743, defeated the French forces under the Duc de Noailles.

Deucalion, in Greek mythology, the Zeus determined to destroy the human race by flood, Deucalion built an ark, in which he and his wife, Pyrrha, drifted for nine days and nights. On the subsidence of the flood they consulted the oracle at Delphi about repopling the land. They were told to throw the bones of their mother over their heads. For a time the meaning of the oracle was a puzzle, but the reader wit of the wife found it out; upon which they took stones and threw them over their heads. The stones be-

threw were changed into men, and those she threw were changed into women.

Deuteronomy (i.e., the Second Law), the fifth book of the Pentateuch, and so called as the re-statement and re-inforcement, as it were, by Moses of the Divine law proclaimed in the wilderness. The Moslem authorship of this book has been called in question, though it is allowed to be instinct with the spirit of the religion instituted by Moses, and it is considered to have been conceived at a time when that religion with its ritual was established in Jerusalem.

De Valera, Eamon, Irish politician. Born in New York of an Irish mother and Spanish father, he went to Ireland as a boy, took a degree there, and in 1917 became President of the Gaelic League. He took part in the Easter rising of 1916, was sentenced to death, had the sentence commuted to life imprisonment and was released under an amnesty in 1917. Returned to Westminster as M.P. for East Clare 1917-1919 and for East Mayo, 1922, but did not take his seat. Arrested again in 1918 on a charge of subversive activities, he escaped from Lincoln Gaol in 1919 and reached the United States. As leader of the Sinn Féin (q.v.), proclaimed himself President of the Irish Republic. He repudiated the Treaty of 1921 and led the republican forces in civil war against the Free State Government, was captured again, but released, and pursued an abstentionist policy from the Irish Dáil until 1927, when he became leader of the Fianna Fáil party. He was President of the Executive Council (i.e., Prime Minister) 1919-1922 and since 1932. He has played the leading part in the events which led to the establishment of a virtual Republic (Eire) in the S. of Ireland owing no obligations of loyalty to the English Crown (except in respect of the appointment of foreign representatives and the signing of international treaties), in the economic war of 1932-1938 on the land annuities issue, and in the events which brought an amicable solution of all issues. (1882-)

RAMON DE VALERA

Development Commission, a government department, set up under the Development and Road Improvement Funds Acts of 1909 and 1910, for the purpose of administering funds for the development of agriculture and rural industries, fisheries, land reclamation and harbour maintenance.

Deventer, a town in Holland, in the province of Overijssel, 55 m. E. of Amsterdam; has carpet manufactures and is celebrated for its ginger-bread. It was the locality of the Brotherhood of Common Life, with which the life and work of Thomas à Kempis are associated. Pop. 38,760.

De Vere, Sir Aubrey, poet, born in Co. Limerick, Ireland; author of *Julian the Apostate* and other dramatic and historical poetical dramas; a master of the sonnet. (1788-1848).

De Vere, Aubrey Thomas, Irish poet, and prose writer, born in Co. Limerick, son of the preceding; educated at Trinity College, Dublin; wrote poetical dramas of *Alexander the Great* and *St. Thomas of Canterbury*; also published several volumes of poetry, his first poem being *The Waldenses*; and critical essays. (1814-1902).

Devi, in Hindu mythology, the wife of Shiva. She is known also as Durga, goddess of destruction; a giant figure possessing ten arms.

Devil, The, a being regarded in Scripture as having a personal existence, and, so far as this world is concerned, a universal spiritual presence, as everywhere thwarting the purposes of God and marrying the destiny of man. Since the introduction of Christianity, which derives all evil as well as good from within, he has come to be regarded less as an external than an internal reality, and is identified with the ascendancy in the human heart of passions native to it, which when subject ennobles it, but when supreme debases it. He is properly the spirit that deceives man, and deceys him to his eternal ruin.

Devil-fishes, or Sea Devils, the name of several fish of the Ray family, so called on account of the pair of rostral or cephalic fins borne on the head and projecting forward like horns. They are the largest of all the Rays, and are found chiefly in the Tropics, where they attain big sizes, specimens having been caught measuring over 20 ft. in width and weighing up to 5,000 lb. The name devil-fish is also sometimes applied to the octopus, which is in reality a mollusc, and not a fish at all.

Devil's Advocate, a name for various arguments with which in reality he disagrees; strictly the ecclesiastical appointee, *advocatus diaboli*, instructed to put forward possible arguments against a proposed canonisation.

Devil's Bridge, (1) bridge of Switzerland through the St. Gotthard Pass crosses the Renss torrent; (2) a double bridge over the Mynach, in Cardiganshire, Wales.

Devil's Coach Horse, a popular name for the *Ocyrops olens* or cocktail beetle, found in Britain. It has short wing-cases, is about 1 in. long, and black, and assumes a threatening attitude with abdomen arched above its back when disturbed.

Devil's Dyke, name for various British earthworks, natural and artificial. The best known is a natural fissure in the Sussex Downs, 4½ m. NW. of Brighton.

Devil's Island, a famous penal settlement in French Guiana.

Devil-worship, a homage paid by the devil or spirit of evil in the belief that he can be bribed from doing them evil.

Devizes, shire, England, formerly a centre of the cloth trade. Here was a fine Norman castle. Brewing, agricultural-implementation making, malling, etc., are carried on. Pop. 6,000.

Devlin, Joseph, Irish Nationalist. He was born in Belfast, educated at Christian Brothers' School and became reporter on *Irish News*. Subsequently he removed to Dublin and visited America and British dominions. M.P., North Kilkenny, 1902; re-elected West Belfast, 1906; represented Falls division 1918-1922; Fermanagh and Tyrone, 1929-1934; sat in Northern Ireland Parliament for Co. Antrim and W. Belfast. (1872-1934).

Devolution, (legal) inheritance by succession; (political) delegation of work by parliament to committees; (historical) War of Devolution (1667-1668), unsuccessful attempt by Louis XIV. of France to conquer Spanish Netherlands on plea of their being inherited by his wife, Maria Theresa—by the old *droit de dévolution* daughter of first marriage inherited before son of second marriage.

Devonian, the name given to the geological strata overlying the Silurian and below the Carboniferous. It includes the rocks of marine origin found

in Devon and the Old Red Sandstone, which was laid down in lakes or inland seas. The earliest known fishes are found as fossils in rocks of this age.

Devonport, a town in Devonshire, England, adjoining Plymouth to the W., and the seat of a naval dockyard and of the military and naval government of the three towns; originally called Plymouth Dock. Established as a naval arsenal by William III. Pop. 81,878.

Devonshire, a county of SW. England, adjoining Somerset and Dorset on the E. and Cornwall on the W. It has a coastline of 150 m. on the English and Bristol Channels. A hilly county, the second largest in England, it includes stretches of wild rugged moorland—Dartmoor in the S. and Exmoor in the N. The valleys are very fertile; apple orchards abound, and there are rich dairy-farms. Some minerals are worked, including tin, copper, lead and china clay; much cider is made. The chief rivers are the Tamar, Exe, Dart, Teign, Taw and Torridge. Exeter is the county town, and among other important centres are Plymouth, Dartmouth, Barnstaple, Bideford, Torquay and Ilfracombe. The mild climate, beautiful scenery and fine coastal resorts make it popular among holiday-makers. Among its many famous natives may be mentioned Drake, Raleigh, Marlborough, Reynolds, Coleridge and Kingsley. Area 2,604 sq. m. Pop. 733,000.

Devonshire, Duke of. See Cavendish.

Dew (and Dew Pond), moisture from the atmosphere condensed on the surfaces of cool bodies, especially at nightfall on the surface of the earth which is cooled by radiation; or moisture rising from the ground and condensed on grass and leaves which have cooled quicker than the ground itself. Wind, by keeping the atmosphere moving, prevents dew forming. Until the researches of Dr. W. C. Wells (*Essays on Dew*, 1814), it was believed that the dew fell from the sky. Ponds, without source or spring, found on chalk hills are called dew ponds. They are probably fed by rain-water rather than dew, and are the source of supply of water for cattle and sheep on the hills.

Dewar, Sir James, physicist, professor at Cambridge and at the Royal Institution. He invented the vacuum flask, and was the first to liquefy hydrogen. He carried out much research on low-temperature work, and was president of the British Association at Belfast in 1902; in collaboration with Sir F. Abel discovered cordite. Knighted 1904. (1842-1923).

Dewberry (*Rubus cæsius*), a plant of the order Rosaceae, closely related to and resembling the bramble. The fruit, however, is covered with a wax secretion like the bloom on grapes.

De Wet, Christian Rudelf, Boer soldier. He won battles in Natal in 1899, was made commander-in-chief of the Orange Free State army and showed brilliant ability in guerilla warfare. From 1907 to 1914 he was a member of the Orange Free State Government. In 1914 he was a leader of the rebellion fomented by Germany, captured later in the year, sentenced to imprisonment; released, 1915. (1854-1922).

Dewey, George, American admiral, was born at Montpelier, Vermont. Graduated at U.S. Naval Academy, 1858. Lieutenant, 1861, in Farragut's fleet; took important part against New Orleans and in other engagements. Captain, 1884; Commodore, 1896. In 1898 destroyed Spanish fleet at Manila and was made Rear-Admiral. Admiral of the Navy, 1899. (1837-1917).

Dewsbury, a town in the W. Riding of Yorkshire, 8 m. SW. of Leeds; engaged in the manufacture of

woolens, blankets, carpets and yarns, and with dye works and iron foundries. Pop. 53,300.

Dextrin, a soluble matter into which the globules is converted by acids or diastase, so called because when viewed by polarised light it has the property of turning the plane of polarisation to the right. It is used as a gum.

Dextrose, a name given to glucose or the fact that the plane of polarisation of polarised light is turned to the right on passing through it.

Dharwar, a town in the S. of the Bombay Presidency, a place of considerable trade in a district noted for its cotton-growing. Pop. 34,750.

Dhole, species of wild dogs (*Cyon*, *nensis* and *Cyon alpinus*), found packs in many parts of India. It is some- larger than the jackal, differs from the dogs (genus *Canis*) in having fewer teeth, is fierce and cannot often be tamed.

Dhow, or *Baggala*, an Arab vessel, used trading in the Arabian Sea and Indian Ocean. It is fast sailing, has one mast or two bearing lateen sails, and is of about 200 tons burden.

Diabase, a group of igneous rocks consisting of augite which contains oxide of iron, crystalline felspar and hornblende; also called trap-rock and, from its colour, greenstone. They are used in road-construction in the N. of England.

Diabetes, a disease characterised

by an excessive discharge of urine, and accompanied with great thirst; there are two forms of this disease: *Diabetes mellitus* (sugar diabetes) is a disorder of the system whereby sugar (and consequently fat) is metabolised. Normally, the sugar content of the blood is regulated by the insulin hormone secreted by the pancreatic islets. This stimulates the muscles to burn up the sugar and the liver to store it in the form of glycogen. A diabetic cannot perform these two functions, and hence there is a rise in the sugar content of the blood to dangerous levels. Sugar is also lost in large quantities in the urine. The progress of the disease can be counteracted and the normal metabolism of sugar restored by hypodermic injections of insulin. *Diabetes insipidus* differs from sugar diabetes in that sugar is present in the urine, but the amount of urine passed increases, accompanied by an exaggerated thirst. It is thought to be due to a defective working of the pituitary gland. Injections of pituitrin sometimes act as a cure.

Diablerets, a mountain of the Bernese de Vaud and de Valais, 10,650 ft. high.

Diaghilev, Sergei Pavlovich, Russian operatic and ballet producer, born in Novgorod province; studied law and music; founded an art paper in St. Petersburg, 1898; in Paris produced *Les Femmes d'Alger*, and the first Russian ballet, 1909; in 1911 brought his ballets to London—*Scheherazade*, with music by Rimsky-Korsakov, being most notable. He produced over 40 ballets and operas. (1872-1929).

Diagnosis, the process of examination by a doctor arrives at as many facts as possible in order to achieve correct identification of the disease or disorder from which the patient is suffering. The first step is generally to draw whatever deductions are possible from the patient's answers to questions on his

DHOW

state of feeling and less visible symptoms and on the past medical history of the patient and his family. Modern methods of diagnosis also include: (1) X-ray, (2) blood-tests, microscopical and chemical, (3) analysis of stomach contents, (4) examination of sputum, (5) chemical tests of urine. There are also electrical methods for testing the nervous system.

Diagoras, a Greek philosopher, born in Melos, one of the Cyclades, 5th Century, B.C., surnamed the Atheist, on account of the scorn with which he treated the gods of the popular faith, from the rage of whose devotees he was obliged to seek safety by flight; died in Corinth.

Dialect, a group variation of a language. Linguistically considered, many languages distinct to-day are variations or dialects of a common speech. For instance, Russian, Bulgarian, Serbian, and Czech are really dialects of a common Slavonic language. Popularly, however, dialects generally mean mutually intelligible variations of what is now one language. The dialects in most countries—notably, for instance, in Germany—can be traced back to local forms of speech which prevailed in the Middle Ages. The various translations of the Bible into the vernacular and the spread of a unifying culture led to a standardisation of speech; but in the 19th Century a romantic value was given to efforts to preserve dialect speech, and Lowland Scotch, Low German and Provençal were reintroduced into literature.

Dialectics, a branch of logic, a method of reasoning by dividing things into their component parts, the application of logic to discussion. In Plato the term refers to the Socratic method of discussion by dialogue and analysis into first principles. Aristotle distinguished the term from analysis, and defined it as a method of reasoning in support of a probable opinion. In the Middle Ages dialectics came to mean formal logic as opposed to rhetoric, a meaning derived from the Stoics.

Dialogue, or conversation between two especially to a formal discussion, as in a drama or a philosophic discourse. The form was first put to the latter use by Plato in the various Dialogues of Socrates. Previous to this the form had been used only in miming plays. Lucian (born c. A.D. 120) used the form in Greek *Dialogues of the Dead*. In connection with this the two French writers of dialogue who borrowed the same title should be noted: the *Dialogues des Morts* by Fontenelle in 1683 and by Fénelon in 1712. The greatest English writer of non-dramatic dialogue is Landor (*Imaginary Conversations*, 1821–1825).

Dialogues of Plato, philosophical dialogues, in which Socrates figures as the principal interlocutor, although the doctrine expounded is rather Plato's than his master's; they discuss theology, psychology, ethics, aesthetics, politics, physics and related subjects.

Dialysis, the process of separation of colloids (q.v.) from crystalline substances in a solution, by means of a membrane which allows free passage to the latter but not to the former.

Diamantina, a district in Brazil, in the province of Minas Geraes, rich in diamonds. The centre of the district is a town of the same name, formerly (until 1838) called Itajucó. Pop. 69,000.

Diameter, in geometry, the straight line which passes through the centre of a circle or other curvilinear figure and is terminated by the circumference; or through a solid body, terminated by its boundaries. The diameter divides the figure into two equal parts.

Diamond, one of the allotropic forms of carbon, of extreme hard-

ness, which has been crystallised in the earth by great heat. Most of the world's supply comes from South Africa and Brazil. Famous diamonds are: the Hope Blue, Koh-i-noor, Orloff, Star of the South, and Cullinan.

Diamond Necklace Affair,

an incident at the court of Louis XVI. of France. A necklace consisting of 500 diamonds and worth 280,000 was taken from a jeweller in Paris by Madame de Lamotte (mistress of Cardinal de Rohan) on the pretence that it was ordered by Marie Antoinette. Actually she disposed of the stones abroad. The swindle was first discovered when the jeweller presented his bill to the Queen, who denied all knowledge of the matter. This led to a trial which extended over nine months, gave rise to great scandal, and ended in the punishment of the swindler and her husband, the exile of de Rohan, and the disgrace of the unhappy, and it is believed innocent, Queen.

Diamond Sculls, a single sculling race, an event since 1844 at Henley Regatta, open to all amateurs. The record of 8 min. 10 sec. set up in 1905 by F. S. Kelly was equalled by H. Buhtz (Berlin) in 1934.

Diana, originally a Roman deity, dispenser of light, identified at length with the Greek goddess Artemis, and from the first with the moon. She was a virgin goddess, and spent her time in the chase, attended by her maidens; her temple at Ephesus was one of the seven wonders of the world. See Artemis.

Diane de Poitiers, the mistress of Henry II. of France, for whom he built the magnificent Château d'Anet, in Eure-et-Loir. She had a great influence over him, and the cruel persecutions of the Huguenots in his reign were due to her instigation. (1490–1568).

Dianthus, a genus of perennial Caryophyllaceae, plants, order with smooth, narrow leaves and solitary, panicled or fasciated flowers, red, pink, white and yellow. Distribution over Europe, temperate Asia, N. and S. Africa and N. America. Pinks, Carnations and Sweet William are cultivated flowers of this genus.

DIANTHUS (CARNATION)

Diapason, in Greek octave or interval which includes all tones of the diatonic scale. Also a concord in which all notes are an octave apart; hence, harmony. Open diapason, stopped diapason, double diapason, are names given to certain stops in the organ.

Diaper, a linen or cotton textile fabric woven with geometric (usually diamond) patterns. Originally the name was given to richly embroidered materials of silk. In the Middle Ages similar patterns were used in the surface decoration of stone, as at Westminster Abbey.

Diaphoretics, medicines or treatment used to promote perspiration. They may take the form of Turkish baths, or drugs which act on the nerve-centres may be administered. Such treatment may be necessary to reduce fever, and is commonly used in the treatment of kidney diseases.

Diaphragm, or *transversum*, a partition of the thorax separating it from the abdomen. Less than an inch in thickness, it is shaped like a dome, pointing upwards under the right fourth rib and the left fifth rib. On its upper surface lies the heart, and it is pierced by the inferior vena cava, by which venous blood is returned to the heart. During inspiration the diaphragm descends into the abdomen, increasing the pressure within it, and thus driving the blood upwards to the heart.

Diarbekir (*Diarbekir*), the largest town in the Kurdistan Highlands, on the Tigris, 220 m. N.E. of Aleppo, and on the highway between Bagdad and Istanbul. It has a large and busy bazaar. It is the capital of a Turkish vilayet of the same name. Pop. (vilayet) 215,000; (town) 98,000.

Diarmid, the name of three kings in Ireland who flourished between the 6th and 11th Centuries and are conspicuous in Erse legend.

Diarrhoea, frequent passage of liquid motions, a condition due to irritation of the bowels from various causes. Diarrhoea is a symptom of many serious disorders—e.g., cholera, dysentery and typhoid. It may, however, result from infection of the bowels from some poisonous substance in food, or merely from an ill-advised diet. In children, it is often a serious complaint—i.e., summer diarrhoea—or it may have an emotional cause. In adults also it is sometimes a concomitant of hysteria. Catarrhal diarrhoea from indigestion or from a chill is due to an abnormal discharge of mucus from the intestinal mucous membrane. Rest of the bowels and removal of the irritant are the methods of curing diarrhoea that is not symptomatic of other diseases. Water in quantity should be drunk, but little or no food eaten. Milk is generally not advisable. Castor oil may be given. Medical attention is required for prolonged diarrhoea.

Diary, a personal record of events of the day, comments upon these and individual thoughts and ideas written down at intervals (strictly day by day). In classical times a diary was simply a record of military conduct, changes in the weather, etc. In mediæval and modern times diaries have taken on a literary and historical significance. The most celebrated diaries in English literature are those of John Evelyn (1620-1706), first published in part in 1813, and of Samuel Pepys (1633-1703), written in cypher and first published in part in 1825 and of Frances (or Fanny) Burney, published in 1842-1846. All these diaries are valuable as pictures of the time.

Diastase, a nitrogenous substance developed during the germination of grain, and having the property of converting starch into dextrose and maltose or malt sugar, which undergoes further changes into alcohol; this is the essential process in the manufacture of beer.

Diatoms, microscopic plants having a jelly-like mass; they live and die on the bottom of the seas in such numbers that thick strata of their remains are formed, as in the Miocene beds of the western states of America.

Diatonic, the term used to describe music in which only the notes, intervals and harmonies of the particular key, major or minor, are used.

Diavolo, *Fra* (St. Brother Devil), Michele Pessa, a Calabrian, originally a monk, who left his monastery and joined a set of bandits, who conducted insurrectionary movements in Italy; taken prisoner by the French, was shot at Naples; Aubert's opera, *Fra Diavolo*, has no connection with him except the name. (1771-1806).

Diaz, Bartolomeu, a Portuguese navigator, sent on a voyage of discovery by John II., in command of two ships; sailed down the W. coast of Africa and doubled the Cape of Good Hope 1488, which, from the storm that drove him past it, he called the Cape of Storms; returning to Lisbon he was superseded by Vasco da Gama, or rather subordinated to him; subsequently accompanied Cabral on his voyage to Brazil, and was lost in a storm in 1506.

Diaz, José de la Cruz Porfirio, Mexican politician. He was a young man one of the leaders during 1867 of the revolt against the French, captured Mexico City 1860 and handed over the command to Juárez. He became President in 1877, remaining in office till 1911. (1830-1915).

Diaz del Castillo, General, historian; accompanied Cortes to Mexico; took part in the conquest, and left a graphic, trustworthy account of it, called *A History of the Conquest of New Spain*; died in Mexico, 1593.

Diazo-compounds, organic compounds formed by the action of sodium nitrite on aniline and similar substances; discovered by Griess, a German chemist, at Burton-on-Trent in 1858. They are the starting-point in the manufacture of the azo-dyes.

Dibdin, Charles, musician, dramatist, ampton, and song-writer, born in Southampton; began life as an actor; invented a dramatic entertainment consisting of music, songs and recitations, in which he was the solo performer, and of which he was for most part the author; wrote some 30 dramatic pieces, and it is said 1,400 songs; his celebrity is wholly due to his sea-songs; was the author of *Tom Bowling*; left an account of his *Professional Life*. (1745-1814).

Dice, small cubes of ivory or bone marked on the sides with spots ranging from one to six. They are chiefly used for gambling, but also supply the element of chance in back-gammon and other games. Swindlers in the past have frequently used "loaded" dice—i.e., dice slightly weighted on one side so that certain numbers are bound to turn up. The word dice is plural for die.

Dicey, Albert Venn, jurist; born at Claybrooke, Leicestershire. First Vinerian professor of English law, Oxford, 1882, Q.C., 1890. Wrote on the conflict of laws, and his *Introduction to the Study of the Law of the Constitution* (1885) is still the stock text book on this subject for British law students, being always taken in conjunction with Anson's *Law and Custom of the Constitution*. (1835-1922).

Dick, Sir William Reid, sculptor; born in Glasgow; educated Glasgow and London, has exhibited at Royal Academy since 1908. Prominent among his works are: Kitchener Memorial Chapel, St. Paul's Cathedral; bronze eagle, Air Force Memorial, Embankment; Lion, on Menin Gate, Ypres. Knighted, 1935. (1879-).

Dickens, Charles John Huffam, celebrated English novelist, born at Landport, Portsmouth; son of a navy clerk. He was brought up amid hardships, sent to a solicitor's office as a clerk, learned shorthand, and became a reporter. In this position he learned much of what afterwards served him as an author. He wrote sketches for the *Monthly Magazine* under the name of "Boz" in 1831, and the *Pickwick Papers* in 1836-1837, which established his popularity. These were

CHARLES DICKENS

succeeded by *Oliver Twist* in 1838, *Nicholas Nickleby* in 1839, *David Copperfield*, partly autobiographical in 1849, and others which are known wherever the English language is spoken. In 1850 he established the magazine *Household Words*, followed 9 years later by *All the Year Round*. Being a born actor, he latterly gave public readings from his works, which were immensely popular, visiting the United States in this capacity. The strain proved too much for him; he was seized with a fit at his residence, Gad's Hill, near Rochester, on June 8, 1870, and died the following morning. (1812-1870).

Dicksee, Sir Francis Bernard, painter, his father and at the Royal Academy, whither he sent pictures from 1876; became president of the Royal Academy in 1924; knighted, 1925. His works were popular and sentimental, the most famous being "Harmony" (Tate Gallery), "The Passing of Arthur," "Redemption of Tannhäuser," "Funeral of a Viking," "Daughters of Eve," "Love Story." (1853-1928).

Dicotyledons, one of two classes into which plants are divided, which flowering plants are distinguished by the characteristic of possessing two cotyledons or seedlobes. Leaves are generally net-veined, whereas the leaves of Monocotyledons are parallel-veined. Dicotyledons are subdivided into the polypetalous and apetalous families, and the gamopetalous families, in which the edges of the leaves are joined.

Dictaphone, an electrical machine for principle as a gramophone, on a revolving wax cylinder, words spoken into the attached mouthpiece. Any speed of dictation is possible. Each cylinder holds over 1,000 words. The cylinder is then transferred to the transcribing machine, which reproduces the words through a head-phone, when they can be typed out.

Dictator, a magistrate invested with republican Rome in times of exigence and danger. The constitution obliged him to resign his authority at the end of six months, till which time he was free to do whatever the interest of the commonwealth seemed to require. The most famous dictators were Cincinnatus, Camillus and Sulla, with Cæsar, who was the last to be invested with this power. The office ceased with the fall of the republic, or rather was merged in the perpetual dictatorship of the emperor. English history records only one dictatorship—that of Cromwell. In still more modern times, Europe, since the close of the World War, has seen the rise of numerous dictators. These include, or have included, Dollfuss (Austria), Tsankoff (Bulgaria), Mahmoud (Egypt), Hitler (Germany), Pangalos (Greece), Bethlen (Hungary), Mussolini (Italy), King Alexander I. (Yugoslavia), Valdemaras (Lithuania), Reza Shah (Persia), Carmona (Portugal), Brătianu (Rumania), Primo de Rivera (Spain), Kemal Atatürk (Turkey).

Dictionary, either a collection of words and phrases of the meaning of each, or equivalents, in the same language, or a collection of words with the equivalent of each in another language. In England from 1440 to the end of the 17th Century the only collections of English words were contained in various Latin-English dictionaries. The first attempt at a comprehensive dictionary of English words was the *Universal Etymological English Dictionary* compiled by Nathan Bailey and published in 1721.

Dr. Johnson used this work in compiling his own celebrated *Dictionary*, published in 1755. He added many words omitted by Bailey and introduced illustrative quotations.

Johnson also had a supreme original talent for definition. Johnson's dictionary was revised by Rev. H. J. Todd in 1818; but after Johnson the next important lexicographer was Noah Webster, an American. His *Spelling Book* (1783) and his *Compendious Dictionary* (1806) were followed in 1828 by the comprehensive *American Dictionary of the English Language*. Later editions and revisions of this dictionary are still widely used. Another American dictionary which should be mentioned is that of Joseph Emerson Worcester, published 1836.

In England Walker's dictionary (1791), authoritative in pronunciation, was superseded by Dr. Charles Richardson's two-volume dictionary in 1837. Twenty years later the collection of material for an English dictionary was begun by the Philological Society, and this work bore fruit in the great *New English Dictionary*, of which Sir James Murray was one of the principal editors until his death in 1915. Publication was commenced in 1884, and the work was completed in 1928, in 10 volumes.

Dictys Cretensis (i.e., of Crete), the reputed author of a narrative of the Trojan war from the birth of Paris to the death of Ulysses, extant only in a Latin translation. The importance attached to this narrative and others ascribed to the same author is that they are the source of many of the Greek legends we find in medieval literature.

Didcot, village of Berkshire, England, 4½ m. S. of Abingdon; an important railway junction and an Ordnance depot. Pop. 1,600.

Diderot, Denis, a French philosopher, born at Langres, the son of a cutler, a zealous propagator of the philosophic ideas of the 18th Century, and the projector of the famous *Encyclopédie*, which he edited with D'Alembert. This did not enrich its founder, who was driven to offer his library for sale to get out of the pecuniary difficulties it involved him in. He would have been ruined had not Catherine of Russia bought it, left it with him, and paid him a salary as librarian. Diderot fought hard to obtain a hearing for his philosophical opinions. His first book was burnt by order of the Parlement de Paris, while for his second he was clapped in gaol. He was a brilliant conversationalist, and one of the greatest intellectual forces of his day. (1713-1784).

Dido, the daughter of Belus, King of Tyre, and the sister of Pygmalion, who, having succeeded to the throne on the death of his father, put Sicheus, her husband, to death for the sake of his wealth. Dido secretly took ship, sailed away from the city with the treasure, accompanied by a body of disaffected citizens, and founded Carthage, having picked up by the way 80 virgins from Cyprus to make wives for her male attendants. A neighbouring chief made suit for her hand, encouraged by her subjects, upon which, being bound by an oath of eternal fidelity to Sicheus, she erected a funeral pyre and stabbed herself in the presence of her subjects. Virgil regardless of accepted chronology made her second the funeral pyre out of grief for the departure of Aeneas, with whom she was passionately in love.

Didymium, a rare earth identified by Mosander in the earth didymia or didymium oxide; thought to be an element, but shown by Von Welsbach to be a mixture of neodymium and praseodymium.

Die-hards, a popular name originally given to the 57th Regiment of Foot after the Battle of Albuera (1811). Later applied to the reactionary Conservative section within the Coalition Government under Mr. Lloyd George, which eventually brought about the break-up of the Coalition in 1919.

Dielectric, electrical term for the insulating material separating the plates of a condenser.

Diemen, Antony van, Governor of the Dutch possessions in India, born in Holland; was a zealous coloniser. At his instance Abel Tasman was sent to explore the South Seas and discovered the island which he named Van Diemen's Land, now called Tasmania after the discoverer. (1593-1845).

Dieppe, a French seaport in the dept. of Seine-Inférieure, on the English Channel, at the mouth of the R. Arques, 93 m. NW. of Paris; a watering- and bathing-place, with fisheries and a good foreign trade. It is the terminus of one of the cross-Channel steamer services to England, being 64 m. from Newhaven. It was seriously affected by the revocation of the Edict of Nantes and was bombarded by the Dutch and English fleets in 1694. Pop. 25,000.

Diesel, Rudolf, German engineer, professor at Munich; inventor of the Diesel engine. (1858-1913).

Diesel Engine, an internal combustion engine using heavy oil as a fuel; the heat necessary to ignite oil is supplied by the compression of air in the cylinder.

Die-sinking, the process of engraving for stamping coins and medals. Steel is generally used for the die or matrix. It is first submitted to a softening process, then cut and afterwards hardened. The cutting for fine impressions is usually done by hand. It is a very ancient art as many early Greek coins testify.

Dies Irae (*Ill.*, the Day of Wrath), a Latin hymn on the Last Judgment, so called from its first words, based on Zeph. i. 14-18. It is part of the Office for the Dead and Requiem Mass, and is ascribed to a monk, Thomas de Celano, who died in 1255. There are several translations of it in English, besides a paraphrastic rendering in the *Lay of the Last Minstrel* by Scott. It is also the subject of a number of musical compositions.

Diet, a term comprehending the various kinds of food customarily eaten, considered in relation to one another. To maintain life certain kinds of substances are essential to the diet. These are: (1) carbohydrates (starch and sugar); (2) fats (all edible oils and fats, animal and vegetable); (3) protein (the lean of all kinds of meat and fish; also found in cheese, milk, eggs and nuts); (4) mineral salts, various, found in most foodstuffs; (5) water (four to six pints per day); (6) vitamins: chemical substances of which six have been distinguished, distributed in various quantities in several foodstuffs.

The carbohydrates and fats are known as fuel foods—that is to say, they are "burnt" by the body for purposes of giving heat and energy. The calorific value of different foods (i.e., the amount of heat given by them) has been calculated. The proteins are body-building and replace the tissue that has been spent. The various mineral salts are essential to the blood (e.g., iron salts) and to the proper functioning of the different glands (e.g., iodine salts are necessary for the secretion of the thyroid). Lime salts are essential for the formation of bones and teeth. Water is necessary for flushing the body. Deficiency of any one vitamin in the diet generally reveals itself by some form of disorder. The late Sir Thomas Stanton's discovery of the cause of beri-beri was essentially the same thing as the discovery of vitamins and their value.

Diet, a convention of the princes, dignitaries and delegates of the German Empire, for legislative or administrative

purposes. The most important historically were those held at Augsburg in 1518, at Worms in 1521, at Nuremberg in 1523, 1524, at Spire in 1526, 1529, at Augsburg in 1530, at Cologne in 1530, at Worms in 1538, at Frankfurt in 1539, at Ratisbon in 1541, at Spire in 1544, at Augsburg in 1547, 1548, 1550 and at Ratisbon in 1622.

Dietrich of Bern, a favourite hero of German legend who in the *Nibelungenlied* avenges the death of Siegfried, and in the *Heldenbuch* figures as a knight-errant of invulnerable prowess, from whose challenge even Siegfried shrinks, hiding himself behind Kriemhild's veil; has been identified with Theodor the Great, King of the Ostrogoths.

Dieu et Mon Droit (God and my Right), the British royal motto, first used by Henry VI. Its origin was a parole used at the Battle of Gisors in 1198.

Diez, Friedrich Christian, a German philologist born at Giessen. After service as a volunteer against Napoleon, and a tutorship at Utrecht, went to Bonn, where, advised by Goethe, he commenced the study of the Romance languages. In 1830 became professor of them. He left two great works bearing on the grammar and etymology of these languages. (1794-1876).

Diffraction, the name given to the slight "bending" of a ray of light round an obstacle. In the early days of the wave-theory of light it was urged against it that if light were a wave-motion it should pass round obstacles, as sound does, and not leave a shadow. Careful experiment shows that light does "bend" round an obstacle to an extent consistent with its very small wave-length. The diffraction grating is a series of fine parallel lines ruled close together on glass by means of a diamond—perhaps as many as four or five thousand to the centimetre. When white light is shone through the grating at a suitable angle a spectrum is obtained, and for many purposes such a spectrum is preferable to that given by a prism.

Diffusion, term in chemistry applied to substances without chemical combination. Gases possess the property of diffusion more than liquids (e.g., diffusion of oxygen and nitrogen in the air) but some metals may be diffused under pressure at a high temperature.

Digby, Sir Everard, member of a Roman Catholic family; concerned in the Gunpowder Plot and executed. (1578-1606).

Digby, Sir Kenelm, a son of the preceding; served under Charles I.; as a privateer, defeated a squadron of Venetians, and fought against the Algerines. He was imprisoned for a time as a Royalist; paid court afterwards to the Protector and was well received at the Restoration. He was one of the first members of the Royal Society, and a man of some learning; wrote treatises on the Nature of Bodies and Man's Soul. (1603-1665).

Digestion, the various chemical processes by which food in the human body is converted into a form in which it can be dissolved in the blood and assimilated by the body. The digestive juices are chemical substances, acid or alkaline, containing other important secretions, called enzymes, produced by the cells and adapted as separate reagents to different kinds of food. Digestion begins in the mouth (especially of starchy foods), is continued in the stomach (especially of protein) and is completed in the intestines.

Digitalis, a genus of tall herbs, biennial or perennial, order Scrophulariaceae, native to Europe, N. Africa and W. Asia. The British species *Digitalis*

purpurea, or foxglove, is remarkable for the poisonous drug (digitalis) obtained from it, used in medicine as a sedative for the heart.

Dijon, the ancient capital of Burgundy, and the principal town in the dept. of Côte d'Or, 195 m. S.E. of Paris, on the canal of Bourgogne; one of the finest towns in France, famous for its buildings, particularly its churches, and its situation. It is a centre of manufacture and trade, and a seat of learning; the birthplace of many illustrious men, including Charles the Bold, Duke of Burgundy, Bossuet and St. Bernard of Clairvaux. Pop. 98,000.

Dilapidations, legal term for the disrepair into which property may fall during temporary possession by a party other than the owner. Between landlord and tenant it is a matter for agreement under the lease. Where the tenant is under obligation and fails to effect repairs, the landlord has right of entry to repair. Ecclesiastical dilapidations are those accruing to the parsonage, vicarage, etc., and to the chance of the church; by common law they are a liability of the incumbent.

Dilemma, in logic a conditional syllogism having one premises which presents two alternatives, while other premisses show that, in either alternative, the consequents are the same; a form of argument which presents two alternatives, each having the same undesirable consequences.

Dilettanti Society, The, a society of noblemen and gentlemen founded in England in 1733. Their labours were devoted chiefly to the study of the relics of ancient Greek art, and resulted in the production of works on this and other subjects of æsthetic interest.

Diligence, a type of stage-coach used in England in the late 18th and in the 19th Centuries until ousted by steam trains. They were popular in France, and used also in America. It has a coupé in front for three passengers, and in the larger types a middle compartment and a rotunde behind, each carrying six.

Dilke, Charles Wentworth, English critic and journalist; served for 20 years in the Navy Pay-Office. He contributed to the *Westminster* and other reviews; was proprietor and editor of the *Athenæum* and manager of the *Daily News*. He left literary papers, edited by his grandson. (1789-1864).

Dilke, Sir Charles Wentworth, English publicist and politician, grandson of the preceding, born at Chelsea; educated Trinity Hall, Cambridge, called to the Bar; travelled in America and the English colonies, and wrote a record of his travels in his *Greater Britain*. He entered Parliament as an extreme Liberal and held office under Gladstone. As a result of citation in a divorce case he decided to retire from public life, but returned again to Parliament in 1892, though he never again held office. (1843-1911).

Dill (*Peucedanum graveolens*), a perennial herb of the natural order Umbelliferae, best grown from cuttings. The leaves are used for flavouring soups and sauces. Dill-water prepared from the seeds is sometimes given to babies to prevent wind.

Dillmann, Christian August, a great German Orientalist, born at Illingen, a village of Württemberg; studied under Ewald at Tübingen; became professor at Kiel, at Gießen, and finally at Berlin. As professor of Old Testa-

ment exegesis he made a special study of the Ethiopic languages, and is the great authority upon them; wrote a grammar and a lexicon of these, and works on theology. (1823-1894).

Dillon, John, an Irish patriot, born in New York. He entered Parliament in 1880 as a Parnellite; was once suspended and four times imprisoned. He sat at first for Tipperary, and later for East Mayo; in 1891 threw in his lot with the M'Carthyites, and in 1918 succeeded John Redmond as leader of the Irish Parliamentary Party. (1851-1927).

Dime, a U.S. silver coin, worth the tenth part of a dollar, or about fivepence.

Dimension, in mathematics, has two common meanings—viz., (a) the power to which a number is raised, thus x is of one dimension x^2 is of two dimensions, x^3 is of three dimensions, etc.; and (b) a direction of measurement, thus a point has no dimensions, a line has one dimension, a surface has two dimensions and a volume has three dimensions. In physics, the fundamental units of measurement are those of length, mass and time, and all other units may be represented as dimensions of these; thus velocity equals length divided by time, and the unit of velocity therefore possesses one dimension in length and D^{-1} in time, while acceleration, or rate of change of velocity, has one dimension in length and D^{-2} in time.

Dimorphism, the capacity in certain species of plants and animals of presenting two varying forms specifically the same—e.g., the fertile queen bee and the barren worker bee. In minerals, e.g., substances which crystallise under two different systems of crystallography—e.g., carbon as diamonds and graphite.

Dinan, an old town on the Rance, in the dept. of Côtes-du-Nord, France, 14 m. S. of St. Malo; most picturesquely situated on the top of a steep hill, amid romantic scenery, of archaeological interest. Pop. 10,000.

Dinant, an old town and holiday resort on the Meuse, 14 m. S. of Namur, Belgium; noted for its gingerbread, and formerly for its copper wares, called Dinanderie. The town was almost completely destroyed by the Germans during the 1914 invasion, but was later rebuilt. The Germans entered in August, and, declaring that the civil population had fired on them, they burnt the town and shot 665 of the inhabitants. Pop. 7,000.

Dinar, the monetary unit of Yugoslavia. It has been subdivided into 100 paras. It has been stabilised at a value equivalent to 26·5 milligrams of gold.

Dinard, Brittany, France, in the dept. of Ille-et-Vilaine. It is situated at the mouth of the Rance opposite St. Malo. Pop. 3,000.

Dinaric Alps, a range of the Eastern Alps between Dalmatia and Bosnia; runs S.E. and parallel with the Adriatic, connecting the Julian Alps with the Balkans.

Dindings, British territory of the Malay Peninsula formerly included in Penang, but retroceded to Perak, partly for convenience of customs collection and partly in recognition of the loyalty of the Sultan of Perak to the British Crown. It consists of a strip of land 22 m. long on the S.W. coast of Perak, and the island of Pangkor.

Dingaan's Day, Dec. 16, the anniversary of a Zulu chief named Dingaan was decisively defeated by the Boers.

Dingle, a fishing and market town of Co. Kerry, Ireland (Eire), on Dingle Harbour, an inlet of Dingle Bay. Pop. 3,000.

Dingley Tariff, in the U.S.A. from 1897 to 1930, maintaining considerable

DILL

protection, and at the same time allowing for tariff agreements of mutual advantage between the U.S.A. and other countries. It was named after the Chairman of the Ways and Means Committee, and was replaced by the Tariff Act of 1930.

Dingo (*Canis dingo*), the Australian wild dog, usually of a yellow colour; fox-like in appearance, but more powerfully built; has been tamed by the aborigines for hunting purposes.

Dingwall, the county town of Ross and Cromarty, at the head of the Cromarty Firth. Pop. 2,554.

Dinkas, an African pastoral people occupying a flat country in the Anglo-Egyptian Sudan, traversed by the White Nile; of good stature, clean habits and semi-civilised manners.

Dinkelsbühl, a picturesque, medieval town, in the county of Bavaria, Germany, on the Würnitz. Pop. 5,000.

Dinnington, a coal-mining village of Yorkshire, England, in the West Riding, 8 m. S.E. of Rotherham. Pop. 1,000.

Dinocrates, a Macedonian architect, who, in the time of Alexander the Great, rebuilt the Temple of Ephesus destroyed by the torch of Erostratus. He was employed by Alexander in the building of Alexandria.

Dinosaurs, an order of extinct reptiles which dominated the land

in the Mesozoic Period. It comprises two entirely distinct groups—viz., the Saurischia (those with "reptile-hips"), which includes carnivorous biped types and herbivorous quadrupeds, and the Ornithischia (those with "bird-hips" and somewhat resembling the ostriches), including bipeds and quadrupeds, but all species being herbivorous. The Dinosaurs included the largest land animals that ever lived, amongst others the *Brontosaurus* and the *Diplodocus* of N. America.

DINOSAURIAN REPTILE

Dinotherium, a gigantic animal now extinct, characterised by two large, downward-curved tusks set in the lower jaw. Remains have been found in the Miocene beds of Europe. The elephant is ecologically related to it.

Diocese, the sphere of a bishop's ecclesiastical jurisdiction. There are 43 in England and 6 in Wales. An Act of Parliament is necessary for the creation of new dioceses.

Diocletian, Roman Emperor from 284 to 305, born at Salona, in Dalmatia, of obscure parentage. He entered the Roman army, served with distinction, rose rapidly to the highest rank, and at Chalcedon, after the death of Numerianus, was invested by the troops with the imperial purple. In 286 he associated Maximianus with himself as joint-emperor, with the title of Augustus, and in 292 resigned the Empire of the West to Constantine Chlorus and Galerius, so that the Roman world was divided between two emperors in the E. and two in the W. In 303, at the instance of Galerius, he commenced and carried on a fierce persecution of the Christians; but in 305, weary of ruling, he abdicated and retired to Salona, where he spent his remaining eight years in rustic simplicity of life. (245-313).

Diodati, Giovanni, a Calvinist theologian, was born in Geneva, where his parents were refugees from Lucerne. He distinguished himself in the course of the Reformation as a pastor, a preacher, professor

of Hebrew and a professor of Theology. He translated the Bible into Italian and into French. A nephew of his (Charles) was a schoolfellow and friend of Milton, who wrote an elegy on his untimely death. (1576-1649).

Diogenes the Cynic, *Sinope*, in Pontus, came to Athens, was attracted to Antisthenes and became a disciple. He dressed himself in the coarsest garb, lived on the plainest diet, slept in the porches of the temples, and finally took up his dwelling in a tub. He would not have anything to do with what did not contribute to the enhancement of life and despised every one who sought satisfaction in anything else. He is said to have gone through the highways and byways of the city at noon with a lantern in quest of an honest man. Visiting Corinth, he was accosted by Alexander the Great: "I am Alexander," said the king, and "I am Diogenes" was the prompt reply. "Can I do anything to serve you?" continued the king: "Yes, stand out of the sunlight," rejoined the cynic; upon which Alexander turned away saying: "If I were not Alexander, I would be Diogenes." While on a voyage to Aegina he fell into the hands of pirates and being sold as a slave, was taken to Corinth where he died. (412-323 B.C.).

Diomedes, legendary King of Argos, called Tydides, from his father; was, next to Achilles, the bravest of the Greeks at the Trojan war. He fought under the protection of Athene against both Hector and Aeneas, and even wounded both Aphrodite and Ares. He dared along with Ulysses to carry off the palladium from Troy; was first in the chariot race in honour of Patroclus, and overcame Ajax with the spear.

Dion of Syracuse, a pupil of Plato, a man; was from his austerity obnoxious to his pleasure-loving nephew, Dionysius the Younger. He was banished, and went to Athens, where he learned that his estates had been confiscated and his wife given to another. He took up arms, drove his nephew from the throne, usurped his place and was assassinated in 353 B.C. (408-353 B.C.).

Dionysia, the festivals held in ancient Greece in honour of Dionysus or Bacchus. In some cases with great drunkenness and debauchery. At first they were celebrated with great simplicity, the worshippers clothing themselves according to the poetical fictions concerning Dionysus and imitating them also in their actions. They were introduced to Rome under the name Bacchanalia.

Dionysius of Halicarnassus,

a Greek historian and rhetorician of the age of Augustus. He came to Italy in 20 B.C., and spent 27 years in Rome, where he died; devoted himself to the study of the Roman republic, its history and its people, and recorded the result in his *Archæologia*, written in Greek, which brings down the narrative to 264 B.C.; it consisted of 20 books, of which only nine have come down to us entire. He is the author of works in criticism of the orators, poets and historians of Greece.

Dionysius, the *Areopagite* (i.e., according to Acts xvii. 34, a convert of St. Paul's; became Bishop of Athens, and is said to have died a martyr in 85; was long regarded as the father of mysticism in the Christian Church, on the false assumption that he was the author of writings of a much later date imbued with a pantheistic idea of God and the universe.

Dionysius the Elder, tyrant of Syracuse from 430 to 367 B.C. At first a private citizen, he early took interest in public affairs, and

played a part in them. He entered the army, and rose to be head of the State, subdued the other cities of Sicily, and engaged in war against Carthage with varying success. Concluded a treaty of peace with them, and spent the rest of his reign, some 20 years, in maintaining and extending his territory. He was distinguished both as a poet and a philosopher. Tradition represents him as in perpetual terror of his life and taking every precaution to guard it from attack.

Dionysius the Younger, tyrant of Syracuse, son of the preceding, succeeded him in 367 B.C., at the age of thirty. He had never taken part in public affairs, but was given over to vicious indulgences, and proved incapable of amendment, though Dion (q.v.) tried hard to reform him. He was unpopular with the citizens, who, with the help of Dion, whom he had banished, drove him from the throne. Returning after 10 years, he was once more expelled by Timoleon of Sicily, upon which he betook himself to Corinth.

Dionysus, in Greek mythology the god of the vine or wine; the son of Zeus and Semele, the "twice born," as plucked first from the womb of his dead mother and afterwards brought forth from the thigh of Zeus, which served to him as his "incubator." See Bacchus.

Diophantus, a Greek mathematician, born in Alexandria in the 3rd Century A.D.; left works in which algebraic methods are employed, and is therefore credited with being the inventor of algebra. His chief work was his *Arithmetica*.

Diopside, a green mineral found in basic igneous rocks, a member of the pyroxene group. Its composition is silica, magnesia and lime.

Diopase, or Emerald Copper Ore, composed of silica, copper oxide and water; occurs in fine, green, six-sided crystals. Sometimes used as a gem.

Diopter, the unit used for measuring the power of a lens; it is the reciprocal of the focal length of the lens expressed in metres.

Dioscorides, a Greek physician, born in Cilicia. He lived in the 1st Century and left a treatise on *Materia Medica*, a work of great research, and long the standard authority on the subject.

Dioscuri, in Greek and Roman mythology, Zeus, a stalwart pair of youths of the Doric stock, the former great as a horse-breaker and the latter as a boxer. They were worshipped at Sparta as guardians of the State, and pre-eminently as patrons of gymnastics. They protected the hearth, led the army in war, and were the conveyer of the traveller by land and the voyager by sea, which, as the constellation Gemini, they are still held to be.

Dip, the angle which a magnetic needle makes with the horizontal, when it is suspended so that it can swing freely in a vertical plane at right angles to the magnetic meridian. At the magnetic poles the dip is ninety degrees and on the magnetic equator zero.

Diphtheria, a contagious disease characterised by the formation of a false membrane on the back of the throat, and due to the presence of the Klebs-Löffler bacillus, so called after the two German doctors who first discovered it in the late 19th Century. The

has been much less deadly since antitoxin treatment was introduced. Antitoxin is administered even in suspected cases, owing to the rapidity with which the membrane in the throat grows.

Diphthong, a union of two vowel sounds, pronounced as one. Examples in English are the combination of o and g as in *poise*, o and a as in *mouth*, a and i as in *aisle*. Pure vowel sounds are comparatively rare in English, most single vowels (as written) having the force of a diphthong—e.g., *duty* where the u has the value of the diphthong i (pronounced ee) + u.

Diplotocus, a large reptile of the Dinosaur family, about 50 or 60 ft. in length, remains of which have been found in America in strata of Jurassic age. It was an herbivorous quadruped.

Diplomacy, a method of establishing between the governments of different countries. The Venetian Republic first maintained permanent representatives in other states in the 16th Century, and the system became prevalent in Europe in the 17th. Previous to that, interchange between governments had been by the despatch of special envoys. Diplomacy is now a profession, although ambassadors of the U.S.A. are sometimes chosen from non-professional classes. The diplomatic staff may consist of ambassador or envoy, naval and military attachés, commercial attachés, etc. The various staffs accredited to any one capital form the diplomatic corps.

Diplomatics, name given to the work of deciphering ancient diplomas and official documents and arranging the material collected in such a way as to be of value especially to the historian. Literary documents, public inscriptions, title-deeds, charters, decrees, codicils and letters all come within the scope of diplomatics.

Dipper, or *Water-couzel*, a genus of Cinclidae, aquatic birds of the family

Cinclidae, found in Northern Europe and America and also in the highlands of Central America and in the Andes. They feed on fresh-water molluscs and insects and dive and swim with ease, using wings as well as legs to propel themselves. The Common Dipper (*Cinclus aquaticus*) is familiar in Great Britain and is not unlike a large wren with a white breast.

COMMON DIPPER

Dipsomania, a diseased craving for alcohol resulting in occasional bouts of heavy drinking, in the intervals between which the patient may have an actual distaste for alcohol. It is quite different from the chronic drinking which results in delirium tremens, and little is known about its nature, except its possible relation to some mild mental disorder.

Diptera, a large order of insects called flies, and characterised by the possession of only two wings, borne by the mesothorax. The mouthpieces are formed for sucking, and are sometimes adapted for piercing also. In the transformation from the larval stage metamorphosis is complete. In the order are included the common House-fly, Gnats or Mosquitoes, Crane-flies (Daddy-long-legs), Hover-flies, Bot-flies, Horse-flies and Flies.

Directoire, a style of architecture, furniture, etc., prevalent in France during the period of the Directory, 1795-1799. In architecture it was a modification of the graceful classicism of the reign of

DIP CIRCLE

Loire XVI. and a preparation for the more grandiose Empire style of Napoleon's day.

Directory. The name given to the government of France, consisting of a legislative body of two chambers, the Council of the Ancients and the Council of Five Hundred, which succeeded the fall of the Convention, and ruled France from October 27, 1795, till its overthrow by Bonaparte on the 18th Brumaire (November 9, 1799). The Directors proper were five in number, and were elected by the latter council from a list presented by the former. The chief members were Barras and Carnot.

Dirigible, a type of balloon propelled by engine-driven propellers. It developed from the free balloon and is usually elongated in form and non-rigid—that is, the shape is maintained solely by the pressure of the gas within the envelope. Dirigibles of about 70,000 cubic feet capacity, known as "Blimps," were used in the Great War for scouting. They are now largely superseded by the rigid and semi-rigid airship. See *Airship*; *Balloon*.

Dirk, spelt *dork* in the 17th Century, a dagger with a 5- or 6-in. blade and a short carved handle, generally made of horn or wood; the weapon worn by Scottish Highlanders.

Dirt-track Racing, the sport of riding motor-cycles round tracks made of loose earth; first introduced from Australia in 1927, it soon attracted large crowds of spectators in England.

Discharge, the cessation of military or naval service. Discharge usually takes place at the end of the period of service for which enlistment was made. Discharge may take place before the expiration of this period with the consent of the soldier, (e.g., to enable him to take up civil work), or without his consent for various reasons, such as (1) irregular enlistment; (2) unsuitability for service; (3) conviction for felony; (4) misconduct; (5) claim for wife desertion if married before enlistment.

Disco, a mountainous island off W. Greenland, with rich coal-mines, quarries and fisheries. Godhavn lies on the S. coast. Area 3,000 sq. m.

Discobolus, The, an antique statue representing the thrower of the discus, and executed by the Athenian sculptor Myron in the first half of the 5th Century B.C. A copy is in the British Museum.

Discord, of (Discordia), a mischief-making divinity, daughter of Night (Nox) and sister of Mars, Nemesis, Parca and Death, who on the occasion of the wedding of Thetis with Peleus, threw into the hall where all the gods and goddesses were assembled a golden apple inscribed "To the most Beautiful," which act gave rise to dissensions that both disturbed the peace of Olympus and the impartial administration of justice on earth. See *Paris*.

Discount, an allowance deducted from a sum of money which represents the price of an article, a debt, etc. Trade discount is the allowance made from the usual retail price by a wholesaler to a retailer. The percentage varies according to the practice of different trades. Cash discount is a small percentage (1½ to 6 per cent.) allowed on an account paid within a stated time. Banker's discount is the amount deducted from the value of a Bill of Exchange

if "bought" by the bank prior to its maturity. The discount is reckoned at simple interest over the time still to run before the bill matures.

Discovery, in law a disclosure. One party in an action is able to compel the other to disclose on oath certain facts, documents, etc., which are material to the case of the party claiming discovery. To obtain discovery of all the documents in an opponent's possession, application must be made to a master in chambers and the applicant must first pay £5 into Court to the "Security for Costs Account." On the hearing of the application the master will order disclosure or "discovery" only so far as he deems necessary either for disposing of the action or for saving costs. No party need produce any document which relates solely to his own title to property, nor any documents which, if produced, would tend to criminate him.

Discus, a circular plate of stone or metal made for throwing to a distance. In ancient Greek times it was 8 to 12 in. in diameter and throwing was a principal gymnastic exercise, being included at the Olympic Games in the pentathlon or quintuple games. In the modern sport the discus weighs about 4½ lb. and is thrown from a 8 ft. 2½ in. circle. The modern style of throwing differs from the Greek.

Disendowment, the annulling of especial reference to ecclesiastical endowment. When a Church is disestablished, disendowment usually takes place also—i.e., the State appropriates certain endowments and administers them for the public good. The Irish Church was disendowed in 1871 and the Russian Church in 1918. The disestablishment of the Church in Wales, however, in 1920 was not accompanied by disendowment.

Disestablishment, the act of depriving a Church of state recognition, privileges and status. The question was a political one in England at the end of the 19th Century, and talk of it was revived when the House of Commons twice rejected the revised Prayer Book of 1927. The Church of Ireland was disestablished in 1871 and the Church of Wales in 1920.

Disfranchisement, the condition of those excluded from the suffrage, with no right to vote in the election of representatives to the government. In most countries some part of the community is disfranchised (e.g., minors). The extension of the suffrage varies, and in some countries women are still unenfranchised. The American Negro was enfranchised in the U.S.A. in 1870, while on the other hand the disfranchisement of the natives in Cape Province, S. Africa, was recently enacted in April 1936.

Disinfection, the process of protecting persons from germ infection or of rendering articles of clothing, bedding, rooms, drains, etc., free from contamination. Liquid disinfectants may be used for disinfecting wounds and for personal disinfection: iodine, perchloride of mercury, carbolic acid, chlorinated lime, formalin, zinc chloride (Burnett's solution), potassium permanganate (Condy's fluid), oxidised turpentine (Sanitas) and coal-tar derivatives (Lysol, Cyllin, Izal, etc.). Among gaseous disinfectants sulphur fumes and formalin vapour may be mentioned. Sunlight is certainly the best disinfectant and heat the most powerful germicide.

Dislocation, an injury to joints whereby the opposed joints are put out of connection and the surrounding muscles and ligaments are sprained. A compound dislocation is one where the bone is forced through the skin. The reduction of the

DISCOBOLUS

dislocated joint to its normal position requires specialised skill and should never be attempted by an unqualified person.

Disney, Walter E., creator of "Mickey Mouse" of the films, was born in Chicago. He has done farm work and served with the ambulance in France. He learned some drawing at Chicago, and went to California in 1923. Besides many short film cartoons introducing Mickey Mouse, Minnie, Pluto the dog, Donald the duck and other favourite animal characters, he has attempted full-feature length cartoons, the first being *Snow White and The Seven Dwarfs*, based on the well-known fairy tale of the brothers Grimm. (1901-).

Dispensation, exemption from requirements of the law. In England the Sovereign's power to dispense with the law was denied by the Bill of Rights, and survives only in such forms as the prerogative of pardon, which is exercised in a strictly formal and constitutional manner. Ecclesiastical dispensation is a permission granted by the head of the Church (Pope, Archbishop, etc.) to evade either compliance with canon law or the consequences of previous non-compliance; established in the Roman Catholic Church since the 5th Century.

Dispenser, a person able to make up medicines according to prescription. Any person practising as a dispenser must first have passed examinations under the auspices of the Pharmaceutical Society and must also be registered under the Pharmacy Acts. The practice of dispensing was not isolated as a profession distinct from that of the doctor until the 17th Century. The enlargement of modern pharmacopoeias requires the dispenser to possess wide knowledge and considerable skill.

Dispersion. When white light is refracted at the surface between two media, the red rays are deviated less than the blue, and the resultant image has a coloured border. This is corrected in optical instruments by using two lenses of different glass, one compensating for the dispersion of the other.

Disraeli, Benjamin. See Beaconsfield.

D'Israeli, Isaac, a man of letters, born at Enfield, Middlesex. He was the only son of a Spanish Jew settled in England, who left him a fortune, which enabled him to cultivate his taste for literature. He wrote several works, but is best known by his *Curiosities of Literature*, a work published in six vols., full of anecdotes, and two books on the quarrels and calamities of authors. He was never a strict Jew, and finally cut the connection, having his children baptised as Christians. He was the father of Benjamin Disraeli, the British statesman who became Lord Beaconsfield. (1768-1848).

Diss, a market town of Norfolk, England, on a hill above the Waveney, 19 m. SW. of Norwich, once a centre for making hempen cloth. John Skelton the poet, who died 1529, was rector here. Pop. 3,400.

Dissection, the cutting up or separation of the component parts of human or animal bodies, or plants; considered as a branch of anatomy or biology and botany. Among the first ever to dissect the human body was Herophilus, a Greek physician of Chalcedon who was credited with the discovery of the lacteals, the nerves, the glands and the pulse, and with giving their names to the various parts of the human body. In 1297 Pope Boniface VIII. forbade dissection of dead bodies, but in England in 1540 surgeons were permitted to dissect bodies of executed murderers. This privilege was taken away by law in 1839, provision being made for anatomists to dissect under certain regulations the bodies of those dying in workhouses.

Dissenters, name for Protestants in England who dissent from the doctrine or ritual of the Church of England; called also Nonconformists, a name taken by the Puritans in protest against the Act of Uniformity in 1662. Dissenters were subject to many legal disabilities, civil and religious, which were not relieved until 1828 by the Corporation and Test Repeal Act. In 1836 Dissenters were permitted to solemnise legally recognised marriages at their own places of worship, and in 1880 Dissenting ministers were allowed to conduct burials in their own burial-grounds. Dissenters are now under no civil disability.

Dissolution, a term used to denote the cessation of Parliament when it is dissolved either by the Government before a general election, or on the expiration of five years, the normal life. The term also refers to the termination of a partnership or business company, the act being notifiable in the *London Gazette* to safeguard the interests of creditors.

Distaff, a staff held under the left arm during the process of hand-spinning of cotton, etc., and to which the material to be spun was fixed. As the fibres were drawn from the material they were twisted with the right hand, the resulting thread being wound round a reel.

Distemper, a disease which affects generally between the third and sixth months of their age, consisting of an infectious microbic inflammation of the mucous membranes of the respiratory passages. Treatment consists in relieving the stomach and bowels by aperients, and in keeping the animal dry and warm, with a light diet of bread and milk.

Distemper, the most ancient method of painting, and in use before the adoption of oil-painting. The colours are "tempered" or mixed with and diluted by a medium to a proper consistence. Modern distemper is mixed with weak glue or size, and the colours are made up into a "body" with whiting or thin plaster of Paris.

Distillation, the process of converting a liquid into vapour and then condensing the vapour back to the liquid state again. In this way non-volatile impurities are left behind in the still and the liquid is consequently purified. If sea-water, for example, is distilled, the salt and other solid substances dissolved in it are left in the distilling vessel and the distillate—i.e., liquid which distils over—is pure water.

Liquids of different boiling points, if mixed together, may often be separated by fractional distillation. Thus ether boils at 35° C. and aniline at 182° C.; if a mixture of ether and aniline is distilled, the first fraction of the distillate consists almost entirely of ether and the last almost entirely of aniline, while the middle fraction consists of both. If it is sufficiently large, this middle fraction can be fractionally distilled again. For liquids that decompose when heated to their boiling points under ordinary pressure, distillation under reduced pressure ("in vacuo") is employed. Here the distillation apparatus is exhausted by attachment to a pump which will remove air from it, and when the pressure is sufficiently low, the liquid is distilled, boiling at a much lower temperature than its ordinary boiling point.

Substances of high molecular weight, which do not mix with water but are appreciably volatile at the boiling point of water, may be purified by distillation in a current of steam ("steam distillation"); the distillate consists mainly of water, but partly of the required substance, impurities being left in the distillation vessel.

Distinguished Conduct Medal

(D.C.M.), a medal awarded for distinguished conduct in war to warrant officers, non-commissioned officers and men in the Army. The ribbon has three vertical stripes, outside red, inside blue.

Distinguished Flying Cross

(D.F.C.), a medal designed for award to officers and warrant officers in the Royal Air Force for acts of gallantry when flying in action against an enemy. It was instituted in 1918. The ribbon is striped horizontally, purple and white.

Distinguished Service Cross

(D.S.C.), a medal awarded to officers of the Royal Navy below the rank of Lieutenant-Commander, and to warrant officers, for conspicuous service. It superseded the Conspicuous Service Cross in 1914. The ribbon has three vertical stripes, blue on the outside, white in the centre.

Distinguished Service Order

(D.S.O.), a decoration awarded for special services in action to commissioned officers of the Royal Navy, the Army and the Royal Air Force. The order dates from 1886. The members of the orders are companions and rank before the fourth class of the Royal Victorian Order. The ribbon is red with blue edges.

D.S.O.

Distraint, or *Distress*, the seizure of goods or cattle for the purpose of procuring satisfaction for a wrong, such as the non-payment of rent, rates, taxes, duties or for damage done by straying cattle, in which case the cattle must be seized by the aggrieved person while they are actually trespassing. It is usually levied through a certified bailiff with a "distress warrant." The goods may be sold after 5 days. Certain personal goods or chattels, such as clothing, bedding and working implements, are absolutely privileged, and distress may not be levied on them. Others are conditionally privileged. Distraint must be made in the day-time and not on a Sunday. Goods distrained must be "impounded" for 5 or 15 days before sale.

Distributor, an important part of the equipment of a high-tension magneto (q.v.), consisting of a rotary switch by which the electrical energy is passed to the various spark plugs in a particular order.

Ditchling Beacon, high point (813 ft.) of the South Downs, 5 m. N. of Brighton. It is crowned by ancient earthworks. It was bought by Brighton Borough Council in 1918. Near is Ditchling village.

Dithyramb, a hymn in a lofty and vehement style, originally in honour of Dionysus (Bacchus), in celebration of his sorrows and joys, and accompanied with flute music.

Diuretics, medicines which stimulate the flow of urine, often administered when anuric products accumulate in the body and in cases of dropsy to assist in the removal of watery collections; alcohol, turpentine, cantharides and caffeine are effective, but turpentine and cantharides are no longer used, as they irritate the kidneys.

Ivan, a Persian word for a muster-roll, register of payments, sale, the last usually permanent as furniture in assembly rooms and fashionable in Europe after the 18th Century.

Divers, or Loons, a family of birds (the Colymbidae) very closely allied

to the Grebes, and having fully-webbed toes. They are essentially swimming and diving birds, but fly well, though they are awkward on land. Their winter plumage is of more sober colours than their summer breeding plumage. Species nesting in Great Britain are the Great Northern and the Red-throated. The Black-throated and the White-billed are winter visitors only.

GREAT NORTHERN DIVER

Dives, the name given, originally in the parable of the Rich Man and Lazarus. (See Luke xvi.).

Dividend, a term in arithmetic signifying the quantity to be divided but especially in commerce the periodical payment of interest on loans, debentures or public funds, as well as the profits of joint-stock companies paid to the shareholders. It is also applied to the proportionate sum of the debts of a bankrupt paid after his assets are realised.

Divination, the art of foretelling the things by supernatural means. In one form or another it was extensively practised in ancient times—e.g., in ancient Rome, where the *haruspices* were consulted on important occasions. This was done by the examination of the entrails of a slaughtered victim. Soothsayers have also been employed, and even in modern times palm-reading, card-reading and divination by the reading of tea-leaves are used for the forecasting of the future.

Divine Comedy, The great poem consisting of three sections, the *Inferno*, *Purgatorio*, and *Paradiso*; "three kingdoms . . . Dante's World of Souls . . . all three making up the true Unseen World, as it figured in the Christianity of the Middle Ages"; the poem describes how, in a vision, Dante passes through hell, purgatory and heaven, led by Virgil, Beatrice and St. Bernard. See *Dante Alighieri*.

Divine Right, a claim on the part of kings, now all but extinct, though matter of keen debate at one time, that they derive their authority to rule direct from the Almighty, and are responsible to no inferior power, a right claimed especially on the part of and on behalf of the Bourbons in France and the Stuart dynasty in England, and the denial of which was regarded by them and their partisans as an outrage against the ordinance of Heaven.

Diving, an art practised since ancient times, and, before mechanical devices were adopted, the only means of obtaining sponges, pearls, coral, etc. Aristotle refers to instruments by means of which divers were able to draw air from above the water, and by this means to remain a long time below the surface. The invention of the diving bell was first used during the construction of Hexham Bridge. In 1818 Siebe invented the diving dress with air pumped into the helmet. It was improved in 1857, and is a waterproof covering of strong twill and indiarubber, with a helmet of copper. Modern diving suits, however, are of jointed cast steel and shingled light-weight metal for work at 240 ft., where water pressure renders the earlier suits ineffective. The joints of the arms and legs work on a ball-and-socket system.

Divining Rod, a forked branch, usually of hazel or rowan, used for the purpose of locating sub-

terranean water. Latterly artificial rods of iron, brass or copper have been used successfully by persons sensitive to the presence of water. In ancient times minerals were sought by its aid.

Divinity, the character of being divine or possessing God-like attributes; a God-head; also the science that deals with the nature of God, and a faculty in Universities, especially for the education, in such matters, of students preparing for priesthood. The study embraces the theological systems of heathen, as well as of Christian, nations. The term is used more commonly by Protestants than by Catholics, who prefer the term theology.

Division, in arithmetic a method of finding how many times a number is contained in another; in military terms a unit of the army, commanded by a general, and containing all branches of the service. An infantry Division usually consists of about 350 officers and 10,000 men. Three infantry divisions make up an army corps. A cavalry division is of two brigades. A parliamentary division occurs when the "ayes" and "noes" are nearly equal and the members "divide", whereupon they are counted in the lobbies of the House of Commons.

Divorce, dissolution of marriage by law, granted by the Probate Divorce and Admiralty Division of the High Court, under the Matrimonial Causes Acts, 1857-1937. Previously divorce was obtainable only by Act of Parliament, though the courts, following the ecclesiastical practice, could grant a decree of judicial separation, which of course did not leave the parties free to marry again. Divorced persons, however, may marry again as soon as the decree nisi has been made absolute, which is usually six months after the decree nisi, provided the King's Proctor has not successfully intervened on the ground of collusion or for other reasons. No petition for divorce may be presented during the first three years after marriage unless the judge allows it on the grounds of "exceptional hardship" suffered by petitioner or "exceptional depravity" of respondent (Act of 1937)—which two grounds are entirely within the court's discretion—and, in determining an application, the court must have regard to the interests of the children.

Grounds of Petition.—A petition may be presented either by the husband or wife for (a) adultery; (b) desertion without cause for at least three years; (c) cruelty; (d) incurable unsoundness of mind of respondent—but respondent must have been continuously under treatment and care for at least five years immediately preceding the petition. A wife may petition on the ground that her husband has, since marriage, been guilty of rape, sodomy or bestiality (save for these grounds, husband and wife are now on equal terms in applying for divorce). A petitioner who also has committed adultery must seek the court's discretion, otherwise the petition will fail. Petitioner may also sue the co-respondent for damages. There is no exact legal definition of "desertion"; but it implies the leaving the other spouse without consent (Ward v. Ward, 1858). Refusal to obey an order for restitution of conjugal rights is constructive desertion. Cruelty includes danger to life or limb, or to health, bodily or mental. Before the law was amended by the Act of 1937 (the Bill introduced by A. F. Herbert), the court was bound to satisfy itself that the petitioner had not "connived at or condoned" the adultery. Under the new Act petitioner must satisfy the court that "there has been no collusion, connivance or consent." Though the Act uses the word "collusion" for the first time in a statute, it does not state how the court should exercise its duty of inquiry. It

would seem, however, that if the court is not satisfied, it should, before dismissing the petition, either ask for witnesses to be called who might be able to assist, or call on the King's Proctor. But even if the respondent were called, he (or she) could not be compelled to answer any question tending to show that he had committed adultery, unless he chose to admit it or gave evidence in denial. There is no narrow definition of "collusion," but it exists where the originating of the petition is founded on an agreement between the parties or their agents.

A petition for *Judicial Separation* may be presented on any grounds on which a petition for divorce might have been presented or on the ground of failure to comply with a decree for restitution of conjugal rights or on any ground on which a decree *a mensa et thoro* (from board and bed) might have been pronounced. Where the court grants the decree, it is no longer obligatory for petitioner to cohabit with respondent. The grant of the decree does not bar presentation of a petition for divorce upon substantially the same facts.

Nullity.—A marriage is void ab initio where the parties cannot or have not contracted a valid marriage—e.g., a bigamous marriage, a marriage induced by fraud, a marriage within the prohibited degrees of affinity. Prior to the Act of 1937, non-consummation for physical or mental defect was the sole ground on which a regular marriage was voidable. New grounds of nullity are: (a) non-consummation owing to wilful refusal of respondent to do so; (b) that either party, at marriage, was of unsound mind or a mental defective; (c) that respondent has suffered venereal disease in a communicable form; (d) that respondent was at the time of marriage pregnant by some person other than petitioner. Generally speaking, however, grounds (b), (c) and (d) will not nullify the marriage unless petitioner was ignorant of the alleged facts at the time of marriage and, in any case, proceedings must be begun within a year; nor will the court grant a decree unless it is satisfied that marital intercourse with the consent of petitioner has not taken place since the discovery by petitioner of the existence of the grounds for a decree.

Usually six months must elapse between the decree nisi and the decree absolute, but in certain circumstances the court may reduce this period.

Alimony.—While a divorce suit is in progress, the husband is liable to provide his wife with alimony or maintenance. The amount is usually one-fifth of his income. After a divorce has been pronounced, the court fixes permanent alimony. This is often at such an amount as will make up the wife's income to one-third of the joint income, but the court has a wide discretion in the matter.

Dixmude, town in the province of W. Flanders, Belgium, on the R. Yser, 12 m. N. of Ypres. It was the scene of much fighting in the autumn of 1914, and was finally recaptured by the Belgians in Sept. 1918.

Dixon, William Hepworth, an English writer and journalist, born in Manchester; wrote *Lives of Howard*, Penn. Robert Blake and Lord Bacon, *New America*, *Spiritual Wives*, etc.; was editor of the *Athenaeum* from 1853-1863. (1821-1878).

Dnieper, a river of Russia, anciently called the Borysthenes, the third largest for volume of water in Europe, surpassed only by the Danube and the Volga; rises in the province of Smolensk, and flowing in a generally southerly direction, falls into the Black Sea below Kherson after a course of 1,330 m.; it traverses some of the finest provinces of the country, is navigable for nearly its entire length, and serves for the transport of corn from the interior.

Dniepropetrovsk, city of the Ukrainian Socialist Soviet Republic, formerly Ekaterinoslav; on the Dnieper, a mining town producing coal, manganese and iron. Pop. 379,000.

Dniester, a river which takes its rise in Poland, in the Carpathians, and for a large part of its course forms the boundary between Rumania and the Ukraine; flows generally in a SE. direction past Bender, and after a rapid course of 650 m. falls into the Black Sea at Aikorman.

Döbereiner's Lamp, a light caused by a jet of hydrogen passing over spongy platinum; named after Johann Döbereiner, a German chemist. (1780-1849).

Dobruja (*Dobruja*, or *Dobrogea*), the part of Rumania between the Danube and the Black Sea, a barren, unwholesome district; rears herds of cattle. It fell to Mackensen's Austro-German armies in 1916, but was returned to Rumania in 1919. Area 8,980 sq. m. Pop. 893,000.

Dobson, Henry Austin, poet and prose writer, born at Plymouth, held appointment in a department of the Civil Service; wrote *Vignettes in Rhyme*, *Proverbs in Porcelain*, *Old World Idylls*, in verse, and *Lives of Fielding*, Hogarth, Steele and Goldsmith in prose; contributed extensively to the magazines. (1840-1921).

Dobson, William, portrait-painter, born in London; succeeded Vandyck as king's serjeant-painter to Charles I.; painted the king and members of his family and court; he was supreme in his art prior to Sir Joshua Reynolds. He was imprisoned for debt and died in poverty. (1610-1646).

Dock, the common name of several tap-rooted species of *Rumex*, a genus of plants which includes sorrel. The Common Dock (*R. obtusifolius*) and the Great Water Dock (*R. hydrolapathum*) besides other species, grow in Britain as weeds. The broad leaves are beneficial in allaying nettle-sting irritation.

Dock, a structure built by engineers to enclose a vessel for loading facilities or for the purposes of repair work. These are the wet dock, the dry dock and the floating dock. A wet dock adjoins the sea or river, and is a basin partly or wholly surrounded by quays. The entrance and departure of vessels depend upon the tide, and locks are fitted to adjust the difference in water-level. Wet docks are necessary where the tidal variation exceeds 12 ft. Important docks at Liverpool are the Canada, the Langton and the Alexandra, whose system covers over 44 acres. The Royal Victoria and Royal Albert Docks, and the King George V. Dock of London extend over 1,102 acres. Other important London docks are the Surrey Commercial London and St. Katharine, West India and Millwall, and the East India Dock.

Where the shores are low-lying, tidal docks are constructed, as well as at places where the tide is slight, such as the Atlantic coast of N. America, and in the Mediterranean dry docks can be pumped dry and completely enclosed, and are built of concrete, brick or masonry. Keel blocks are fitted to the bottom upon which the vessel for repair, etc., is placed. They are also called graving docks. Another form is the floating dock, which can be towed to the place where it is needed. A special floating dock was built for the *Queen Mary* in 1936. Floating docks are supported by pontoons, and are constructed usually of iron and steel.

COMMON DOCK

Dockyard, a place where naval ships are repaired and rendered efficient, equipped with stores, ammunition and personnel, etc. They are controlled by the Admiralty, represented by an Admiral-superintendent. He directs the labour, supervises the other officers, and controls the accounts. The principal dockyards in England are at Portsmouth, Devonport, Chatham, Sheerness and Pembroke. Dockyard administration is responsible to the Controller of the Navy, assisted by the Directors of Dockyards, Stores and Naval Construction.

Doctor, meaning a teacher, is a title or degree granted by a university upon qualification. It ranks next above master in science. Since the 14th Century a title in medicine, and applied to one who is qualified to practise surgery or medicine according to the requirements of the British Medical Association. Honorary doctorates are conferred upon distinguished persons by Universities, especially Doctor of Civil Law, D.C.L., Doctor of Divinity, D.D., and Doctor of Laws, LL.D.

Doctors' Commons, a college of the civil law in London, where they used to eat in common, and where eventually a number of the courts of law were held. Originally it was a society of ecclesiastical lawyers, practising civil and canon law. It was incorporated under royal charter in 1768 and dissolved in 1857.

Doctrinaires, mere theorists, particularly on social and political questions; applied originally to a political party that arose in France in 1815, headed by Royer-Collard and represented by Guizot. It stood for a constitutional government that should avoid acknowledging the divine right of kingship on the one hand and the divine right of democracy on the other. The highest peak (8,760 ft.) in Madras, in the Nilgiri Hills.

Dodd, Francis, British artist, son of a dist. minister. He was one of the official artists of the Great War, and painted a series of portraits of the Generals. Elected R.A., 1906. (1874-).

Dodd, Dr. William, an English divine, born at Bourne, Lincolnshire; was one of the royal chaplains; attracted fashionable audiences as a preacher in London, but lived extravagantly, and fell hopelessly into debt, and into disgrace for the nefarious devices he adopted to get out of it; forged a bond for £4,200 on the Earl of Chichesterfield, who had been a pupil of his; was arrested, tried, convicted and sentenced to death, a sentence which was carried out notwithstanding the great exertions made to procure a pardon; wrote a *Commentary on the Bible*, and compiled *The Beauties of Shakespeare*. (1729-1777).

Doddridge, Philip, a Nonconformist divine, born in London; was minister at Kibworth, Market Harborough, and Northampton successively, and much esteemed both as a man and a teacher; suffered from pulmonary complaint; went to Lisbon for a change, and died there; was the author of *The Family Expositor*, but is best known by *His Rise and Progress of Religion in the Soul*. (1702-1751).

Dodecanese, a group of 18 (originally only 12 were counted in the group) Italian islands in the Aegean Sea, the coast of Asia Minor. They were led by Italy in 1912, recognition of her being given by Great Britain under the of London in 1916. The islands are 'atmos, Lipeo, Kalymanos, Leros, Nisyros, Karoli (Calchi), Syml, Astypalea, 'hos (Scarpanto), Cases and Rhodes. approx. 80,000.

Dodgson, Charles Lutwidge, English mathematician, with the *nom de plume* of Lewis Carroll, born at Daresbury, Cheshire, son of a clergyman; a shy and quaintly precocious child; went to school at Richmond and then to Rugby; distinguished himself at Oxford in mathematics; he was ordained deacon, but never took priest's orders; author of *Alice's Adventures in Wonderland*, with its sequel *Through the Looking-Glass*, besides other works, mathematical, poetic and humorous. His fanciful books have kept their popularity undiminished, a popularity which was to some extent helped at first by the woodcuts of Charles Tenniel. The MS. of *Alice in Wonderland* was sold in America recently for over £30,000. (1832-1898).

Dodman, The, lofty headland of S. Cornwall, England, 8 m. S. of St. Austell, the property of the National Trust.

Dodo, an ungainly, flightless bird, larger than a turkey, with short scaly legs, a big head and bill, short wings and tail, and a greyish down plumage, now extinct, though it is known to have existed in Mauritius some 200 years ago.

DODO

Dodona, an ancient Zeus, in Epirus, close

by a grove of oak trees, from the agitation of the branches of which the mind of the god was construed, the interpreters being at length three old women. It was more or less a local oracle, and was ere long superseded by the more widely known oracle of Delphi (q.v.).

Dodsley, Robert, an English poet, dramatist and publisher; wrote a drama called *The Toyshop*, which, through Pope's influence, was acted in Drury Lane with such success as to enable the author to commence business as a bookseller in Pall Mall; projected and published the *Miscellany*, and continued to write plays, the most popular *Cleome*; is best known in connection with his *Collection of Old Plays*; he was a patron of Johnson, and much esteemed by him. (1703-1764).

Doeg, a herdman of Saul (1 Sam. xxi. 7); a name applied by Dryden to Elkanah Settle in *Abalom and Achitophel*.

Dog, a domestic quadruped of the *Canis* genus which includes the wolf, jackal, fox, etc. Its origin is said to have been from the wolf. It is digitigrade—i.e., walks on toes, the fore-feet having five and the hind four. The legs are slender, the head is small and pointed or square according to the breed. Its teeth consist in each jaw of five incisors, two canines, eight premolars and five molars, though in some species this number varies. The tail varies in length, some kinds being tailless. The period of gestation is 63 days. A dog's average length of life is 10 to 14 years.

By nature carnivorous, the dog has keen intelligence and an acute sense of smell, but the chow-chow is a vegetarian, and in cold latitudes the food is fish. The pariah of India is a scavenger and is a carrion-feeder. There is no complete classification of dogs, since in recent times experimental breeding is producing new types, but broadly they can be divided into those with elongated heads—e.g., the Irish wolfhound, greyhound, etc.; those with moderately elongated heads, such as the St. Bernard, Newfoundland, sheep-dog, spaniel, setter, etc., and those with more or less shortened muzzles like the terrier, bull-dog and numerous toy-dogs.

The Kennel Club enumerates 62 different

species and about 190 varieties which they cover, and they are called either sporting or non-sporting. Wild dogs other than those already mentioned are the hyæna or Cape hunting dog of Africa, which runs in packs, and the long-eared Cape fox, noted for its large ears; those of America which embrace the crab-eating dog of the Orinoco, the bush dog of Brazil and the nocturnal *Canis Azaræ* of the Andes. In Asia there is the pariah, an off-eater, the dhole and buasuh of India, nocturnal hunters and very ferocious; the ruccon dog of N. China and Japan and in Australia the dingoo, the solitary specimen of dog in that continent.

Dogs are subject to certain diseases, such as distemper (q.v.), rabies (q.v.) and eczema, from over-feeding or unsuitable diet. The keeping of dogs in Great Britain is subject to certain legal regulations. No person may keep a dog over 6 months old unless he holds a licence to be obtained (price 7s. 6d.) annually from a post office. Exemption may be obtained in the case of dogs used to lead blind persons and those employed on sheep and cattle farms. A court has power to order a dog to be destroyed if it is dangerous to others.

Dog-days, 20 days before and 20 days after the rising of the Dog

Star, Sirius, at present from July 3 to August 11, the name of the chief magistrate of Venice and Genoa, elected at first annually and then for life in Venice, with, in course of time, powers more and more limited, and at length becoming little more than a figure-head; the office ceased with the fall of the republic in 1797, and in Genoa in 1804.

Dog-fish, the name of several species of fish of the shark order. They

are grouped together in the Squalidae family. Some are oviparous (i.e., the young are born from eggs); some are viviparous (young brought forth alive from the mother). They are voracious and hunt in packs. Several are found round the coasts of Great Britain, the Piked Dog-fish in particular, it being one of the commonest of the shark order. Other species found round the British coasts are the tope or toper, the smooth hound, and the large and small spotted dog-fish. The flesh of the spotted species and of the piked is extensively used (under other names) in fried-fish shops.

LARGE SPOTTED
DOG-FISH

Dogger Bank, a sandbank in the North Sea; a gravel fishing-field extending between Jutland in Denmark and Yorkshire in England, though distant from both shores; 170 m. long, over 60 m. broad, and from 8 to 10 fathoms deep. It was the scene of a naval engagement in Jan. 1915, in which the *Blücher* was sunk.

Doggett's Coat and Badge,

a prize competed for annually by the watermen of the Thames, inaugurated in 1715 by Thomas Doggett, a Drury Lane actor of George I.'s reign.

Dogma, originally a term for the statement of a proved truth or a decree such as those issued by a Greek assembly. Nowadays a theological term designating the Christian doctrine, but in this country the word often refers to an assertion without authority, hence dogmatism. The German universities have a professorship of dogma in theology.

Dog Rose, a popular name for the wild, scentless rose (*Rosa canina*) of the order Rosaceæ, familiar in English hedgerows both in flower (white and red flowers) and in fruit (hips). It flowers in June. See also ↑

Dogs, Isle of, a low-lying projection of a square mile in extent from the left bank of the Thames, opposite Greenwich, and 3½ m. E. of St. Paul's.

Dog's Tail Grass, a genus of two species are found in Britain, the *Cynosurus cristatus* being a most valuable pasture grass with close herbage and yielding the best hay. Its roots penetrate deeply and it resists drought.

Dog Star, the popular name for Sirius, the brightest star and one of the nearest to the earth, in the constellation of Canis Major.

Dog Watch, a term used at sea for a turn of duty from 4 to 6 p.m. and 6 to 8 p.m.

Dogwood, the general term for the *Cornus* genus of the Cornaceae. The Common Dogwood (*Cornus sanguinea*) is familiar in England, bearing dark red branches, egg-shaped, pointed leaves and small, dark-purple berries. The wood, which is hard, is useful. A Scotch species, *Cornus suecica*, has a tonic value. Others yield red dye.

Dolabella, Publius Cornelius, son-in-law of Julius Caesar, a profligate man, joined Caesar, and seized the consulship on his death; joined Caesar's murderers after his death; was declared from his profligacy a public enemy; driven to bay by a force sent against him, ordered one of his soldiers to kill him. (70-43 B.C.).

Dolcoath, rich copper-mine of Cornwall, near Camborne, at Camberne. It has been worked since 1800.

Doldrums, a zone of the tropics where calms lasting for some weeks prevail, broken at times by squalls and baffling winds.

Dôle, a town of France in the dept. of Jura, on the Doubs and the Rhône and Rhine Canal, 28 m. S.E. of Dijon, with ironworks, and a trade in wine, grain, etc. Pop. 18,000.

Dole, a charitable grant of money or food. The word came to be applied loosely both to outdoor relief paid by the guardians and the weekly benefit paid under the Unemployment Insurance Act.

Dolet, Étienne, a learned French humanist, born in Orleans, became, by the study of the classics, one of the lights of the Renaissance, and one of its most zealous propagandists; suffered persecution after persecution at the hands of the Church, and was burned in the Place Maubert, Paris, a martyr to his philosophic zeal and opinions. (1509-1546).

Dolgelly, county town of Merionethshire, Wales, with woollen manufactures; Cadair Idris, 2,929 ft., is in the vicinity. Pop. 2,260.

Doll, a child's toy resembling the human figure. They were known in ancient times in Greece, Rome and Egypt. In Africa negro tribes ascribed magic powers to them, and they became idols, charms against evil spirits, etc. The wooden doll originated in Flanders, and from it the elaborate doll of to-day has developed, with its moveable limbs, opening eyes and "real" hair. Sawdust and, later, unglazed pottery called bisque, rubber and papier-mâché became general as material in doll-making. Modern dolls tend to be bizarre in design, and French models are elaborately gowned and sophisticated in appearance.

Dollar, the unit of the money system of the U.S.A., Canada and Liberia and the Straits Settlements, the most important being that of U.S.A., where it was adopted in 1792. The gold dollar, which is the unit, is now valued at 15.4 grains of gold 0.9000 fine, this being the equivalent of a price of 35

dollars per fine ounce for gold. The silver dollar weighs 412.5 grms. and contains 371.25 grains of fine silver. The dollar in use in the Straits Settlements has a value of 2s. 4d. The Canadian dollar at par of the exchange is valued at 4.86½ dollars to the £ sterling. The word is also a slang term for the English five-shilling piece.

Dollar, town of Clackmannanshire, Scotland, 6 m. N.E. of Alloa. It has a large Academy, the Dollar Institution, opened about 1819. Pop. 1,500.

Dollart Zee, a gulf in Holland into the North Sea, which the Ems flows, 3 m. long by 7 broad, and formed by inundation of the North Sea.

Döllinger, Johann Joseph Ignaz von, a Catholic theologian, born in Bamberg, Bavaria, professor of Church History in the University of Munich; head of the Old Catholic party in Germany; was at first a zealous Ultramontanist, but changed his opinions and became quite as zealous in opposing first, the temporal sovereignty, and then the infallibility of the Pope, and was excommunicated from the Church; he was a polemic, and as such wrote extensively on theological and ecclesiastical topics; lived to a great age, and was much honoured to the last. (1799-1890).

Dollond, John, a mathematical instrument-maker, born in Spitalfields, London, of Huguenot descent; began life as a silk-weaver; made good use of his leisure hours in studies bearing mainly on physics; went into partnership with his son, who was an optician and optical instrument maker; made a study of the telescope, suggested improvements which commended themselves to the Royal Society, and in particular how, by means of a combination of lenses, to get rid of the coloured fringe in the image. (1706-1761).

Dolmen, rude structures of prehistoric date in France, equivalent to the cromlech (q.v.), consisting of upright unhewn stones supporting one or more heavy slabs; long regarded as altars of sacrifice, but now believed to be sepulchral monuments; found in great numbers in Brittany especially.

Dolomite, a double carbonate of lime and magnesia, common in some limestones such as the magnesian limestones of Permian age of Yorkshire and Durham, and the rocks of the Dolomites of the Eastern Alps.

Dolomite Alps, a limestone mountain range forming the S. of the Eastern Alps, in the Tyrol, Italy, famous for the fantastic shapes they assume; named after Dolomieu, a French mineralogist, who studied the geology of them.

Dolphin, a group of sea mammals of the order Cetacea, and closely

related to the whales. The family Delphinidae embraces the narwhal, the beluga, the porpoises and the dolphins. The true dolphins belong to the genus *Delphinus*, the Common Dolphin being *Delphinus delphis*. It is 6 to 8 ft. long, dark brown above and white below. They swim in shoals, feed on fish and are occasionally caught in herring and mackerel nets.

Dombrowski, Jan Henryk, a Polish general, served in the Polish campaigns against Russia in 1792-1794; organised a Polish legion which did good service in the wars of Napoleon; covered the retreat of the French at the Beresina in 1812. In 1815 he was appointed general of cavalry and senator of the kingdom of Poland newly formed. (1756-1818).

COMMON DOLPHIN

Dome, a term in architecture referring to the outside of a circular or polygonal roof, a prominent characteristic of Renaissance architecture, and common also in Eastern mosques. Famous examples are St. Sophia, Constantinople (Istanbul), the Taj Mahal at Agra, India, the Pantheon and St. Peter's of Rome, St. Mark's of Venice, the Pantheon of Paris and the Capitol of Washington, U.S.A. London domes include that of St. Paul's Cathedral and the Albert Hall.

Domenichino, *Domenico Zampieri*, a celebrated Italian painter, born at Bologna; studied under Calvaert and Caracci; was of the Bolognese school, and reckoned one of the first of them; his principal works are his "Communion of St. Jerome," now in the Vatican, and the "Martyrdom of St. Agnes," at Bologna, the former being regarded as his masterpiece; he was the victim of persecution at the hands of rivals; died at Naples, not without suspicion of having been poisoned. (1581-1641).

Domesday Book, the record (since printed in 2 vols.) of the survey of all the lands of England made between 1085 and 1086 at the instance of William the Conqueror for purposes of taxation. The survey included the whole of England, except the four northern counties and part of Lancashire, and a few towns including London and Winchester, and was made by commissioners appointed by the king and sent to the different districts of the country, where they held courts and registered everything on evidence.

Domestication (of Animals), the gradual progression of animals from the wild state to that where they are employed by man as beasts of burden, in the chase, as companions or pets, etc., or for any other service to man. Such progression involves control, either by training or enclosure, to prevent a return to the wild state, protection, since domestication reduces their resistance to natural risks, feeding, where they are confined either to houses, stables, etc., or yards, and selective breeding in order to increase some suitable characteristic either to produce food, perform work or develop instincts useful to man.

Domestic Science, the science of home management and hygiene, in recent years a prominent subject in education schemes of girls' schools and some universities for women students. It treats of the study of food values and preparation of food, nutrition and physiology, personal hygiene, ventilation, sanitation, laundering, needlework, home nursing and the management of household expenditure and income. Degree and diploma courses are taken at London, Bristol, Reading and Sheffield Universities. Other educational institutions include the National Training College of Domestic Subjects, Buckingham Palace Road, London, and similar centres at Aberdeen, Bath, Belfast, Bristol, Cardiff, Edinburgh, Glasgow, Gloucester, Leeds, Leicester, Manchester and Newcastle-upon-Tyne.

Domestic Servant, a person employed in and about a residence, such as a cook, housemaid, gardener, butler, etc., but excluding a tutor or governess. Since the World War, when there was a demand for women's labour in industry, there has been a decline in their numbers, owing to a disinclination for this class of employment. In law, dismissal generally requires a month's notice, though such offences as wilful disobedience, gross misconduct, dishonesty and incompetence entitle a mistress to exercise instant dismissal. The domestic servant is covered by the Workmen's Compensation Act, and must be

insured against sickness under the National Health Insurance Act.

Domicile, a person's home and principal residence and the centre of his affairs, and may be distinguished as (1) domicile of origin, which depends on the domicile of a person's parents at his birth; (2) that of choice, which is of voluntary acquisition. An illegitimate child takes the domicile of the mother. A child's domicile changes with that of the parent during minority. A woman on marriage takes her husband's domicile. Domicile is important in deciding in certain cases where an action may be brought, and in the law of settlement and removal of paupers.

Dominance, term used in biology to express the fact that when an offspring receives the genes of two contrasting characters from its two parents, in many cases one of the characters (the dominant) will develop to the exclusion of the other, instead of combining. The repressed character (the recessive) may reappear in the next generation; for example, a cross between pure-bred horned and hornless cattle produces offspring which are all hornless, but if these were mated some horned animals might be found among their descendants. See *Mendelism*.

Dominica, or *Dominique*, the largest and most southerly of the Leeward Is., in the W. Indies, belonging to Britain. The island is of great beauty and heavily forested in parts. It was discovered by Columbus on Sunday (*Dies Dominica*), Nov. 3, 1493, whence its name. The chief products are limes, coconuts, coconuts, copra, fruit, etc., and the chief export coconuts. There is a small settlement of Caribs on the island. From 1898 to 1925 it was governed by a Nominated Council, but then reverted to an elective system of government. Area 305 sq. m. Pop. 47,000. Cap. Roseau.

Dominical, or *Sunday Letter*, is used for calendar purposes. Each year is given one of the letters A to G corresponding to the date of the first Sunday in the year; if Jan. 1 falls on a Sunday, A; on a Saturday, B; on a Friday, G, etc. A leap year will have two letters, one for the first two months and a second for the remainder of the year.

Dominican Republic (*Republica Dominicana*), a republic forming the E. part of the island of Haiti, and consisting of two-thirds of it. It was discovered by Columbus in 1492, and for centuries was a centre of Spanish power until the Declaration of Independence in 1821 and the Constitution adopted in 1844 after invading Haitians had been expelled. The country is mountainous and fertile. A large part is forested with pine, the remainder devoted to agriculture, the principal product being sugar. Other exports include coconuts, coffee and tobacco. Gold and copper are the chief minerals. After occupation by American marines, 1916-1924, a new constitution was adopted. Boundary disputes with Haiti were resolved in 1936. Area, 19,300 sq. m. Pop. 1,500,000. Cap. Ciudad Trujillo (former Santo Domingo).

Dominicans, a religious order of preaching friars, founded at Toulouse in 1215 by St. Dominic, to aid in the conversion of the heretic Albigenses to the faith, and finally established as the order whose especial charge it was to guard the orthodoxy of the Church. The order was known by the name of Black Friars in England, from their dress; and Jacobins in France, from the street of Paris in which they had their headquarters.

Dominic de Guzman, St. saint of the Catholic Church, born in Old Castile, distinguished for his zeal in the conversion of the

heretic; essayed the task by simple preaching of the Word; sanctioned persecution when persuasion was of no avail; countenanced the crusade of Simon de Montfort against the Albigenses for their obstinate unbelief. He was the founder of the Dominican Order (known in England from their habit as Black Friars) under the rule of St. Augustine, the order receiving approval from the Pope Honorius III. in 1218 and Dominic himself becoming Master of the Sacred Palace. Festival Aug. 4.

Dominions Office, the government department dealing with the U.K. government's relations with the self-governing Dominions, instituted in 1925, till when its work had been done since 1854 by the Colonial Office. It deals also with the business relating to the S. African territories of Basutoland, Bechuanaland and Swaziland and to the Imperial Conference.

Dominion Status, the political status of a co-equal member of the British Commonwealth of Nations. The overseas Dominions of the British Empire enjoy to-day a much higher degree of independence than when Canada was granted self-government in 1867, or when the South Africa Act was passed in 1909 conferring self-government on the Union, and indeed all the self-governing Dominions now enjoy complete autonomy, and are held together by nothing more than their common allegiance to the Crown. This gradual approach by effluxion of time towards independence was recognised in the Balfourian formula adopted in the Inter-Imperial Relations Report of the Imperial Conference of 1926, which report states that equality of status is the root principle governing inter-Imperial relations so far as concerned Great Britain and the Dominions, which are described in the report as "autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any respect of their domestic or external affairs, though united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations."

An added significance was given to this necessarily loosely-worded formula by the passing of the Statute of Westminster of 1931, the purpose of which was to give extra-territorial operation to the legislation of the British Overseas Dominions. The common allegiance to the Crown is exemplified in the appointment of a Governor-General, the right of appeal to the Judicial Committees of the Privy Council and the status of all subjects of the Dominions as British subjects. Ireland (Eire) has by Act of the Dáil abolished the right of appeal to the Privy Council in the case of its own citizens, and has modified its relation to England to the extent of eliminating the Crown from the internal part of its Constitution.

Dominis, Marco Antonio de, a vacillating ecclesiastic, born in Dalmatia; was educated by the Jesuits; taught mathematics in Padua; wrote a treatise in which an explanation was for the first time given of the phenomenon of the rainbow; became Archbishop of Spalato; falling under suspicion he passed over to England, professed Protestantism, and was made Dean of Windsor; recanted to the Papacy, returned to the Church of Rome, and left the country; his sincerity being distrusted, he was cast into prison by the Inquisition, where he died, his body being afterwards disinterred and burned. (1566-1624).

Domino, a term popularly used to denote a mask, but formerly a cloak with wide sleeves and half mask used by persons attending masquerades in Italy, especially in Venice; also the name of a hooded cloak worn by monks in cold weather.

Dominoes,

an Italian game invented in the 18th Century; a game of chance and skill played with 28 rectangular pieces of wood, ivory, etc., called dominoes. The face is marked with dots in numbers ranging from 1 to 6, one domino being blank, and the remainder being 6:1; 6:2 etc.; and 5:1; 5:2; and so forth. The first player "leads" his highest piece, and the second player must play or "pose" one which has a number similar to either of the two on the leader's piece.

DOMINOES

Domitian (Titus Flavius Domitianus), Roman emperor, son of Vespasian, brother of Titus, whom he succeeded in 81, the last of the twelve Cæsars; exceeded the expectations of every one in the beginning of his reign, as he had given proof of a flicentious and sanguinary character beforehand, but soon his conduct changed, and fulfilled the worst fears of his subjects; his vanity was wounded by the non-success of his arms, and his vengeful spirit showed itself in a wholesale murder of the citizens; many conspiracies were formed against his life, and he was at length murdered by an assassin, who had been hired by his courtiers and abetted by his wife Domitia. (51-96).

Domrémy-la-Pucelle,

a small village on the Meuse, in the dept. of Vosges, France; the birthplace of Joan of Arc.

Don, a Russian river, the ancient Tanais; flows southward from its source in the province of Tula, and after a course of 1,153 in. falls into the Sea of Azov; also the name of a river in Aberdeenshire, and another in Yorkshire, tributary of the Ouse.

Don, Kaye Ernest, racing motorist, was in rubber industry till 1915, in Army Service Corps and Flying Corps during War; took up motor-racing in 1920, motor-boat racing in 1931. Established 1932 the motor-boat record, nearly 120 m.p.h., subsequently beaten by Gar Wood. (1894-).

Donaghadee, a seaport of Northern Ireland, in Co. Down, on the Irish Channel, the nearest port to Britain. Pop. 2,500.

Donatello (Donato di Berto Bardi), a great Italian sculptor, born at Florence, where he was apprenticed to a goldsmith; tried his hand at carving in leisure hours; went to Rome and studied the monuments of ancient art; returned to Florence and executed an "Annunciation," still preserved in a chapel in Santa Croce. This was followed by marble statues of St. Peter, St. Mark and St. George, before one of which, that of St. Mark, Michelangelo exclaimed, "Why do you not speak to me!" He executed tombs and figures, or groups in bronze as well as marble. (1384-1466).

Donatists, a sect in N. Africa, founded by Donatus, Bishop of Carthage, in the 4th Century, that separated from the rest of the Church and formed itself into an exclusive community, with bishops and congregations of its own, on the ground that no one was entitled to be a member of Christ's body, or an overseer of Christ's flock, who was not of divine election, this stand being taken in the face of an attempt, backed by the Emperor Constantine, to thrust a bishop on the Church at Carthage, consecrated by an authority that had betrayed and sold the Church to the world. Donatus, a rival bishop, gave his name to the party. The members of it were subject to cruel persecutions in which they gloried, and were annihilated by the Saracens in the 7th century.

Doncaster, a manufacturing town and important coal centre in the W. Riding of Yorkshire, well built, in a pleasant country, on the Don, 33 m. S. of York; famous for its races, the St. Leger in particular, called after Colonel St. Leger, who instituted them in 1776. Pop. 63,300.

Donegal (Tirconnell), a county in the NW. of Ireland (Eire), in the province of Ulster, the most mountainous in the country; is mossy and boggy, and is indented along the coast with bays, and fringed with islands. Area 1,865 sq. m. Pop. 142,000.

Donegal, market town, Co. Donegal, Ireland (Eire), at the head of Donegal Bay. It has remains of a castle and a monastery. Pop. 1,100.

Donetz, a tributary of the Don in S. Russia, the basin of which forms one large coalfield, reckoned to be one of the largest of any in the world.

Dongola, New, a town in the Anglo-Egyptian Sudan, on the left bank of the Nile, above the third cataract, over 700 m. from Cairo; was founded by the Mamelukes about 1812 after the destruction of the Old Town. It is the capital and chief trading town of the province, Dongola.

Donizetti, Gaetano, a celebrated Italian composer, born at Bergamo, Lombardy, and studied at Bologna; devoted himself to dramatic music; produced over 60 operas, among the number *Lucia di Lammermoor*, *The Daughter of the Regiment*, *Lucrezia Borgia*, and *La Favorita*, all well known, and all possessing a melodious quality of the first order. (1797-1848).

Don Juan, the member of a distinguished family of Seville, who seduces the daughter of a noble, and when confronted by her father stabs him to death in a duel. He afterwards prepares a feast and invites the stone statue of his victim to partake of it. The stone statue turns up at the feast, compels Don Juan to follow him, and delivers him over to the abyss of hell, for the depths of which he had qualified himself by his depravity. A legendary character used by writers of various countries; e.g., *Don Juan Tenorio* by Forrilla, and the chief character of Byron's celebrated poem; Shaw in *Man and Superman*; Mozart in his opera *Don Giovanni* and Corneille and Molière all use the character.

Donne, John, English metaphysical poet, born in London; a man of

good degree; brought up in the Catholic faith; after weighing the claims of the Roman Catholic and Anglican communions, joined the latter; married a young lady of sixteen without consent of her father, which involved him in trouble for a time; was induced to take holy orders by King James; was made his chaplain and finally became Dean of St. Paul's; wrote sermons, some 200 letters and essays, as well as poems, the latter, amid many defects, revealing a soul instinct with true poetic fire. (1572-1631).

JOHN DONNE

Donnybrook, a village now a suburb of Dublin, Ireland (Eire), long celebrated for its fairs and the fights of which it was the scene on such occasions. The fair was discontinued in 1855.

Donoghue, Stephen, an English jockey, one of the foremost of his time, born at Warrington; rode the Derby winner in 1916, 1917, 1921, 1922, 1923 and 1925. He is the only jockey who has ever won the Derby in three successive years. He

retired from racing 1937 and took up training. Has written a novel, *The Luck of the Gentle Gaffer*. (1884-).

Don Quixote, the title of a world-famous book, written by Miguel Cervantes in satire of the romances of chivalry with which his countrymen were so fascinated; the chief character of the story gives title to it, a worthy gentleman of La Mancha, whose head is so turned by reading tales of knight-errantry, that he fancies he is a knight-errant himself, sallies forth in quest of adventures, and encounters them in the most commonplace incidents, among his most ridiculous extravagancies being his tilting at the windmills, and the overweening regard he has for his Dulcinea del Toboso. Part I. of the book was written in 1605; part II. in 1615.

Doom, a word derived from the Anglo-Saxon *dom*, meaning judgment, and originally applied to a legal pronouncement from a judge, especially the sentence upon a prisoner. The term is widely used today to indicate a tragic destiny and the final judgment of mankind at the Day of Judgment, or Doom's Day. (See *Doomsday Book*.) In early times one's Doom was foretold by soothsayers.

Doon, a loch and river in Scotland rendered famous by the muse of Burns. After a course of 30 m. the river joins the Firth of Clyde 2 m. S. of Ayr.

Doone Family, a half-mythical robber gang inhabiting the Doone Valley near Lynmouth, N. Devon. Said to have been the household of a Sir Ensor Stuart, of Doone in Perthshire, driven thence by the Earl of Moray c. 1616. Blackmore's romance *Lorna Doone* gives him a date 70 years later.

Doorn Castle, a Dutch mansion, the residence of ex-Kaiser William II., of Germany after his exile.

Doppler Effect, the apparent change in frequency when there is a relative movement between the source of a wave motion, such as light or sound, and the observer. For example, the whistle of an approaching express train appears to be of higher pitch than when it is stationary, and of lower when it is moving away. A star which is moving away from the earth has the lines in its spectrum displaced towards the red end, one which is approaching towards the violet end, an effect which is utilised for measuring the velocity of a star in the line of sight.

D.O.R.A. See *Defence of the Realm Act*.

Dorchester, the county town of Dorset, England, on the Frome; was a Roman town, and contains the ruins of a Roman amphitheatre. Thomas Hardy was born and lived near Dorchester. Pop. 10,030.

Dordogne, a river in the S. of France, which, after a course of 300 m. falls into the estuary of Garonne; also a dept. through which it flows. The dept. is fertile, well-wooded and has abundant chestnut trees and vineyards. Area 3,550 sq. m. Pop. 383,000. Cap. Périgueux.

Doré, Gustave, a French painter and designer, born in Strasbourg; evinced great power and fertility of invention, having it is alleged, produced more than 50,000 designs; had a wonderful faculty for seizing likenesses, and would draw from memory groups of faces he had seen only once. Among the books he illustrated are the *Contes Drolatiques* of Balzac, the works of Rabelais and Montaigne, Dante's *Inferno*, also his *Purgatorio*, and *Paradiso*, Don Quixote, Tennyson's *Idylls*, Milton's works, and Coleridge's *Ancient Mariner*. Among his paintings were *Christ Leaving the Praetorium*, and

Entry into Jerusalem. He left behind him works of sculpture as well as drawings and pictures. (1833-1883).

Doria, Andrea, a Genoese naval commander, born at Oneglia, of noble descent, though his parents were poor; a man of patriotic instincts; adopted the profession of arms at the age of 19; became commander of the fleet in 1513; attacked with signal success the Turkish corsairs that infested the Mediterranean; served under Francis I. to free his country from a faction that threatened its independence, and, by his help, succeeded in expelling it; next, in fear of the French supremacy, served under Charles V., and entering Genoa was hailed as its liberator, and received the title of "Father and Defender of his Country." The rest of his long life was one incessant struggle with his rival Barbarossa, the chief of the corsairs, which ended in his defeat. (1486-1560).

Dorians, one of the four divisions of the Hellenic race, the other three being the Achæans, the Æolians and the Ionians. At an early period they overran the whole Peloponnese. They were a hardy people, of staid habits and earnest character.

Doric, the oldest, strongest and simplest of the four Grecian orders of architecture, characterised by massive fluted columns without ornament.

Doris, in Greek legend, daughter of Oceanus and Tethys, the wife of Nereus, and mother of the Nereids.

Doris, a small mountainous country of ancient Central Greece, S. of Thessaly, and embracing the head-waters of the Cephissus. It was the traditional place of origin of the Dorians, and received its name from Dorus, the son of Deucalion or, according to others, of Helen, who made a settlement there and gave name also to the Dorians.

Dorking, a market-town in the North Downs in the heart of Surrey, England, 26 m. SW. of London; gives name to a breed of fowls. Pop. 10,100.

Dormer Window, a small window in the gable of a sloping roof, and a characteristic feature of later Gothic house architecture.

Dormouse (*Muscardinus arvenarius*), a small, soft-furred, bushy-tailed rodent, squirrel-like in habit, but nocturnal, native of England, and found also in N. Europe. It belongs to the family Glires, all of which are similar in habits, and known as dormice, though no other species is found in England.

Dornoch, the county town of Sutherlandshire, Scotland, on the Dornoch Firth, a small place, but a royal burgh; has a good golf-course.

Dorpat. See Tartu.

D'Orsay, Count, a handsome man of fashion, born in Paris; entered the French army; forsook it for the society of Lord and Lady Blessington; married Lady Blessington's daughter by a former marriage; came to England with her ladyship on her husband's death; their joint establishment in London soon became a rendezvous for all the literary people and artists about town; was the "Phœbus Apollo of Dandyism"; bankrupt in 1849; having shown kindness to Louis Napoleon when in London, the Prince did not forget him; having some pretensions to art as a painter and sculptor, he was appointed Director of Fine Arts in Paris by the Emperor after the coup d'état, but he did not survive the position. (1791-1852).

Dorset, maritime county in the S. of England, with a deeply indented coast; it consists of a plain between two eastward- and westward-reaching belts of downs; is mainly a pastoral county; rears sheep and cattle, and produces butter and cheese. Area 973 sq. m. Pop. 239,000. County town, Dorchester.

Dorset, Earl of. See Sackville, Thomas.

Dort, or Dordrecht, a town on an island in the Maas, in the provinces of S. Holland, 12 m. SE. of Rotterdam; admirably situated for trade, connected as it is with the Rhine as well, on which rafts of wood are sent floating down to it; is famous for a Synod held here in 1618-1619, at which the tenets of Arminius were condemned, and the doctrines of Calvin approved and endorsed as those of the Reformed Church. Pop. 60,000.

Dortmund, a town in Westphalia, Germany, a great mineral and railway centre, with large iron and steel forges, and a number of breweries. It was formerly a free Hanseatic town. Pop. 540,000.

Dory, a genus (*Zcus*) of fishes related to the halibut and found in temperate sea-water. It has a high food value. The body is compressed and, in some species covered with bony, spiny shields. It has a very protrusible mouth and a long fin ending in long, trailing spikes. The *Zcus faber* is found round English coasts.

JOHN DORY
(*Zcus faber*)

Dostoevski, Feodor Mikhailovitch, Russian novelist and author of *Crime and Punishment*, one of the greatest realistic novels ever written. Always poor, he was an epileptic, and served four years in a Siberian prison for attending Socialist gatherings, later going abroad. Other important works of his were *Poor Folk*, *Memoirs of a House of the Dead*, *The Idiot* and *The Brothers Karamazov*. (1822-1881).

Dotterel (*Endromis morinellus*), a bird of the plover family, and one of the most beautiful, with white and black marking, found in N. Europe and Asia, and formerly numerous in Great Britain.

Douai, a town on the Scarpe, in the dept. of Nord, France, 20 m. S. of Lille and one of the chief military towns of the country, with a large arsenal; has a college founded in 1568 for the education of Catholic priests intended for England, and is the place where a version of the Bible in English for the use of Catholics was issued. Pop. 41,000.

Douaumont, village and fort of France, NE. of Verdun, which changed hands several times during the Battle of Verdun, in 1916.

Double Bass, the largest and lowest instruments played with a bow; its invention is assigned to Gaspar di Salo, in the 16th Century. Has usually four strings and is closely related to the old viol.

Doublet, a man's close-fitting body-garment, worn in 14th-17th Centuries. It covered the body to a little below the waist, and was introduced into England from France.

Doubloon, a former coin, originally double the value of the pistole; but later of the value of a guinea sterling.

Doubs, a tributary of the Saône, which it joins below Dôle; gives name to the dept. of

DOUBLET

DORIC COLUMN

France which it traverses. The dept. is on the Franco-Swiss frontier, is crossed by the Jura Mts., but is fertile in the valley of the Doubs. Area 2,050 sq. m. Pop. 305,006. Cap. Besançon.

Doughty, Charles Montagu, traveller and author, born at Theberton Hall, Suffolk. Educated first for navy; then at King's College, London, and at Cambridge. A solitary wanderer; wrote *Travels in Arabia Deserta*, and much poetry of an austere kind—especially *The Dawn in Britain*. (1843-1926).

Douglas, the name of an old Scottish family, believed to be of Celtic origin, that played a conspicuous part at one time in the internal and external struggles of the country; they figure in Scottish history in two branches, the elder called the Black and the later the Red Douglasses or the Angus branch, now represented by the houses of Hamilton and Home. The eldest of the Douglasses, William, was a kinsman of the House of Murray, and appears to have lived about the end of the 12th Century. One of the most illustrious of the family was the Good Sir James, distinguished specially as the "Black" Douglas, the pride of knighthood and the associate of Bruce, who carried the Bruce's heart in a casket to bury it in Palestine, but died fighting in Spain, 1330.

Douglas, the largest town and capital as well as chief port of the Isle of Man, 70 m. from Liverpool; much frequented as a bathing-place. Pop. 19,000. Also the name of a village of Lanarkshire, Scotland, formerly a place of importance. It has a ruined castle (Scott's *Castle Dangerous*). Pop. 1,500.

Douglas, Gawin or Gavin, a Scottish poet and Bishop of Dunkeld, third son of Archibald, Earl of Angus, surnamed "Bell-the-Cat." Political troubles obliged him to leave the country and take refuge at the Court of Henry VIII., where he was held in high regard; died here of the plague, and was buried by his own wish in the Savoy. Besides Ovid's *Art of Love*, now lost, he translated (1512-1513) the *Æneid* of Virgil into English verse, to each book of which he prefixed a prologue, in certain of which there are descriptions that evince a poet's love of nature combined with his love as a Scotsman for the scenery of his native land. Besides this translation, which is his chief work, he wrote two allegorical poems, entitled the *Palace of Honour*, addressed to James IV., and *King Hart*. (c. 1474-1522).

Douglas, Stephen Arnold, an American statesman and orator born in Brandon, Vermont; a lawyer by profession, and a judge of the Supreme Court; a member of Congress and the Senate; was a Democrat and the hero of the slave-holding States in the political struggles prior to the American Civil War; stood for the Presidency when Lincoln was elected; was a leader in the Western States. (1813-1861).

Douglas Fir (*Pseudotsuga Douglasii*), a large tree of the Conifer family, indigenous to the American Pacific Coast, where it grows to a height of 250 ft. Produces a light-red, strong timber which is used for heavy constructional work, poles, masts, etc. Also called Douglas Pine, Douglas Spruce and Oregon Pine. A remarkably fine specimen stands as a mast in the Royal Botanic Gardens, Kew, 214 ft. high.

Douglass, Frederick, American orator, born a slave in Maryland, his surname originally having been Bailey; worked as a slave in a Baltimore shipbuilder's yard; escaped at the age of 21 to New York; attended an anti-slavery meeting, where he spoke so eloquently that he was appointed by the Anti-Slavery Society to lecture on its behalf, which he did with success and much

appreciation in England as well as America; appointed U.S.A. minister to Haiti, 1883; published an *Autobiography*, which gives a thrilling account of his life. (1817-1895).

Doullens, a town of France, in the dept. of Somme. A conference was held here, 1918, which put Foch in command of the Allied forces. Pop. 6,000.

Doulton, Sir Henry, the reviver of art pottery, born in Lambeth; knighted in the Jubilee year for his eminence in that department. (1820-1897).

Doulton Ware, china and earthenware pottery named after Sir Henry Doulton (1820-1897) son of John Doulton, the founder of the Lambeth pottery works. The son's fortunes were made with the manufacture, begun in 1867, of glazed enamel-ware jugs and vases; later came faience ware in coloured glaze, architectural terra cotta and glazed frescoes for mural decoration. Doulton ware is decorated either by the Sgraffiti method—i.e., scratching and filling-in with colour—or the *patte sur pâte* method, which involves the application of thin layers of coloured clays. Doulton ware is now made also in Burslem, Paisley and elsewhere.

Doumer, Paul, President of the French Republic, 1931-1932, born at Aurillac (Cantal), Governor-General of Indo-China, 1897-1902, several times radical Minister of Finance, senator from 1912. He was assassinated by a Russian. (1857-1932).

Doumergue, Gaston, French statesman, born at Aignes-Vives, a barrister by training. He held various ministerial appointments, especially under Clémenceau and Briand. He was Premier, 1913-1914, President of the Senate, 1923-1924, and President of the Republic, 1924-1931. (1863-1937).

Doune, a village of Perthshire, Scotland, on the Teith. It has ruins of a castle held by a kinsman of Rob Roy for Prince Charlie in 1745.

Douro, a river, and the largest, of the Spanish Peninsula, which rises in the Sierra de la Demanda in Old Castile, flows for 40 m. the northern boundary of Portugal, and after a course of nearly 500 m. falls into the Atlantic at Oporto.

Dove, in Christian art the symbol of the Holy Ghost, or of a pure, or a purified soul, and with an olive branch, the symbol of peace and the gospel of peace.

Dove, a name commonly to the smaller birds of the genera *Turtur* and *Columba* of the Columbidae family (pigeons). No very clear distinction is kept between the appellations dove and pigeon. Thus *Columba livia* is often called rock-pigeon. *Columba palumbus* is ring-dove and *Turtur turtur* the turtle dove.

TURTLE DOVE

Dove, a beautiful river of Derbyshire, England, tributary of the Trent. It is a rich trout-stream.

Dover, a seaport on the E. coast of Kent, the nearest in England to the coast of France, 60 m. S.E. of London, and with a mail service to Calais and Ostend; is strongly fortified, and the chief station in the S.E. military district of England; was the chief of the Cinque Ports. Pop. 41,000. There are several towns of the same name in the U.S.A., one being the capital of Delaware.

Dovercourt, a seaside resort of Essex, England, at the mouth of the Stour, near Harwich.

DOVER PATROL

Dover Patrol, The, an arm of the fleet set up during the World War to maintain communications in the Channel and hunt the German submarines passing through. Its monitors made frequent attacks on the Belgian coast, its most famous exploit being the attack on Zeebrugge (q.v.).

Dover, Strait of, divides France from England and connects the English Channel with the North Sea; at the narrowest is 20 m. across; forms a busy sea highway; is called by the French *Pas de Calais*.

Dovey (or *Dyfi*), a river of N. Wales, rising in Merionethshire and emptying into Cardigan Bay at Aberdovey. Length 30 m.

Dovrefeld, a range of mountains in Norway, stretching N.E. and extending between 62° and 63° N. lat., average height 3,000 ft. The highest peak is Snöhätta 7,570 ft.

Dow, or *Douw*, Gerard, a distinguished Dutch genre-painter, born at Leyden, a pupil of Rembrandt. His works, which are very numerous, are the fruit of a devoted study of nature, and are remarkable for their delicacy and perfection of finish. Examples are found in all the great galleries or Europe. (1613-1675).

Dowager, in law, a widow endowed or possessed of a jointure (q.v.); also a title given to a widow to distinguish her from the wife of her husband's heir bearing the same name, and, in this sense, applied particularly to the widows of princes and persons of rank.

Dowden, Edward, literary critic, professor of English Literature in Dublin University, born in Cork; distinguished specially as a Shakespearean; author of *Shakespeare: a Study of his Mind and Art*, *Introduction to Shakespeare*, and *Shakespearean Sonnets with Notes*; wrote *Studies in Literature* and *A Life of Shelley*. (1843-1913).

Dowlais, mining town of Glamorgan-shire, Wales, now incorporated in Merthyr Tydfil.

Down, a county of Northern Ireland, adjoining Antrim, Armagh and Louth. Its coastline on the Irish Sea has many large inlets—Carlingford Lough, Dundrum Bay, Belfast Lough and the almost land-locked Strangford Lough. The surface is hilly, mountainous to the S. (Mourne Mts.), and the ground fertile. Agriculture, stock-rearing, dairy-farming, linen-making, bleaching and fishing are the chief industries. The Bann, Lagan and Quoile are the chief rivers. Downpatrick is the county town. Area 95 sq. m. Pop. 209,000.

Downham Market, a market town of Norfolk, England, on the Ouse. Brewing, malting and flour-milling are the chief industries. Pop. 2,500.

Downing Street, a street in Westminster, London, between St. James's Park and Whitehall. In it are the official residences of the Prime Minister (No. 10) and of the Chancellor of the Exchequer (No. 11), the Dominions, Cabinet and Foreign offices, part of the Home Office, and the offices of the Judicial Committee of the Privy Council. Named after Sir George Downing (d. 1654), a politician of the Cromwellian period who represented Edinburgh and Carlisle in the House of Commons.

Downpatrick, county town of Co. Down, Northern Ireland, on Strangford Lough, an ancient town and seat of a bishop. St. Patrick is reputed to be buried here. Pop. 3,200.

Downs, The, a safe place of anchorage for ships, 8 m. long by 8 m. broad, between Goodwin Sands and the coast of Kent; the scene of several sea-fights between the Dutch and British.

DRAFT

Downs, The North and South, two divergent ranges of broad hills and plateaux of cretaceous age with a valley between, called the Weald. They extend eastward from Hampshire to the sea-coast, the North terminating in Dover cliffs, Kent, and the South in Beachy Head, Sussex. The South Downs are famous for the breed of sheep that pastures on them.

Doxology, the name of two hymns in Doxology, praise of God. The Greater Doxology, beginning "Gloria in Excelsis," is sung at the beginning of the Roman Catholic Mass and at the end of the Anglican Communion. The Lesser Doxology, commencing, "Glory be to the Father and to the Son," is sung chiefly at the end of Psalms and canticles.

Doyle, Sir Arthur Conan, novelist, nephew of Richard Doyle, born in Edinburgh; studied and practised medicine, but gave it up after a time for literature, in which he had already achieved no small success. Several of his productions soon attracted universal attention, especially his *White Company*, *The Refugees* and the *Sherlock Holmes* series; wrote a short play *A Story of Waterloo*, produced with success by Sir Henry Irving; later gave increasing attention to spiritualism. (1859-1930).

Doyle, John, an eminent caricaturist, of Irish origin, under the initials H. B. (1797-1868).

Doyle, Richard, eminent caricaturist, born in London, son of the preceding; contributed to *Punch*, of which he designed the cover, but left the staff in 1850 owing to the criticisms in the journal adverse to the Catholic Church; devoted himself after that chiefly to book illustration and water-colour painting. (1824-1883).

D'Oyly Carte, Richard, English theatrical manager, producer of Gilbert and Sullivan operas and builder of the Savoy Theatre, London, where he produced them. (1844-1901).

Drachenfels (*Dragon's Rock*), one of the Siebengebirge, 8 m. S.E. of Bonn, 1,056 ft. above the Rhine, and crowned by a castle with a commanding view; the legendary abode of the dragon killed by Siegfried in the *Lay of the Nibelungen*.

Drachma, ancient and modern Greek coin, equivalent to the franc. In ancient Greece it was a silver coin, equal to one-hundredth part of a mina. The modern drachma contains 100 lepta.

Draco, a celebrated Athenian lawyer, who first gave stability to the State by committing the laws to writing, and establishing the Epheta, or court of appeal, 621 B.C. He punished every transgressor of his laws with death, so that his code became unbearable, and was superseded ere long by a milder, instituted by Solon, who affixed the penalty of death to murder alone. He is said to have justified the severity of his code by maintaining that the smallest crime deserved death, and he knew no severer punishment for greater; he is said to have been smothered to death in the theatre by the hats and cloaks showered on him as a popular mark of honour. He was Archon of Athens.

Draco, or Flying Dragon, a genus of lizards found in India and Malaya, which have membranous "wings" supported on long extensions of the ribs beyond the body. They are arboreal, and skim from tree to tree by means of these "wings." They are brilliantly coloured, and are capable of changing their colours.

Draft, a written order drawn by one person on another; a writing directing the payment of money on account of the drawer. The term is also used of the first rough form in which legal documents are sometimes drawn for discussion; also of a body of troops sent to join a unit elsewhere.

Dragon, a fabulous monster, being a form of deadly evil, which only preternatural heroic strength and courage can subdue, and on the subdual and slaying of which depends the achievement of some conquest of vital moment to the human race or some members of it; is represented in medieval art as a large, lizard-like animal, with the claws of a lion, the wings of an eagle, and the tail of a serpent, with open jaws ready and eager to devour, which some knight high-mounted thrusts at to pierce to death with a spear. In the Greek mythology it is represented with eyes ever on the watch, in symbol of the evil that waylays us to kill, as in guarding the "Apples of the Hesperides" and the "Golden Plectro," because these are prizes that fall only to those who are as watchful of him as he is of them. It is consecrated to Minerva to signify that true wisdom, as sensible as the ever-wakeful dragon, never goes to sleep, but is equally ever on the watch.

Dragonet (*Dragon Fish*), the common name of a number of species of fish of the genus *Callionymus*, inhabiting tropical and temperate waters and interesting for their small, naked bodies and curious courting habits. Two species are found round British coasts—viz., the Gemmoose Dragonet or Yellow Skulpin (*C. lyra*), of brilliant, gem-like colours and with large wing-like fins, and with a head striped with blue on a yellowish ground, and the Sordid or Dusky Dragonet (*C. draconculus*).

Dragon-fly, the popular name of the Odonata sub-order of insects. They have a large, broad head, very freely attached to the thorax; convex, prominent eyes which meet on the top of the head, and two pairs of closely reticulated wings, of brilliant colouring—blue, yellow, etc. There are hundreds of species. *Aeschna grandis*, the Great Dragon Fly, is the largest British species. They undergo an incomplete metamorphosis, the eggs being deposited in water and the larva living there, but there being no quiescent state before the adult insect breaks from the shell of the larva. They are carnivorous.

Dragon-fly (*Aeschna grandis*) the largest British species. They undergo an incomplete metamorphosis, the eggs being deposited in water and the larva living there, but there being no quiescent state before the adult insect breaks from the shell of the larva. They are carnivorous.

Dragonnades, the name given to the persecution at the instance of Louis XIV. to force the Huguenots of France back into the bosom of the Catholic Church by employment of dragons.

Dragon's Blood, the red-coloured resin of various plants, chiefly the *Calamus draco*, an East Indian palm, and the *Dracena draco*, or dragon's-blood tree of the Canaries. It is used as a lacquer-varnish, and for tooth paste.

Dragon's Teeth, the teeth of the Cadmus slew, and which when sown by him sprang up as a host of armed men, who killed each other excepting the five who became the ancestors of the Thebans, hence the phrase to "sow dragon's teeth," meaning to breed and foster strife.

Dragon Tree. See Dragon's Blood.

Dragoon, a horse soldier. The dragoon was so named from the "dragon" or short musket borne by Brissac's French cavalry in the 15th Century. The first dragoons in England resembled the mounted infantry used in Egyptian campaigns. The term was used later for medium cavalry. The Scots Greys (1691) is the oldest Dragoon regiment in the British Army.

Dragoon Guards, heavy cavalry of the British Army. Before the Great War there were 7 regiments of Dragoon Guards; all, except the 7th (Princess Royal's), were raised in 1685 during the Monmouth Rebellion. Several of these lost their identity through amalgamations in 1921; and under the new scheme of Army organisation announced in 1934 the 1st (King's) Dragoon Guards and the 2nd (Queen's Bays) Dragoon Guards, which had survived, are, like most other cavalry regiments, being converted into mechanical units.

Drainage (in geology), the direction and arrangement of the system of rivers and streams draining any given area. In civil engineering the "drainage area" is the area drained by a particular stream, river or sewer, and the term may also be applied to an area drained by a complete sewerage system. In relation to land reclamation, drainage is accomplished by means of dykes, as exemplified in Holland; also marshy areas or water-logged soil may be drained by water-mills or by means of turbines. Catchment Boards have been appointed under the Land Drainage Act of 1930 to promote schemes of land drainage in the United Kingdom.

Drake, Sir Francis, a great English sea-man of the reign of Queen

Elizabeth, born near Tavistock, in Devon; served at sea under his relative, Sir John Hawkins, and distinguished himself with signal success by his valour and daring against the pride of Spain, towards which, as the great Catholic persecuting power, he had been taught to cherish an invincible hatred. He received a privateering commission in 1520 from the Queen; swooped down on Spanish ports across seas, and despoiled them; in 1577 sailed for America with five ships, passed through the Straits of Magellan, the first Englishman to do so; plundered the W. coast as far as Peru; lost all his ships save his own, the *Golden Hind*, and one other, which, becoming separated, returned home; crossed the Pacific, and came home by way of the Cape—the first to sail round the world—with spoil to the value of £300,000. He received a knighthood on his return and the *Golden Hind* was preserved as a token of his daring. In 1587 he destroyed 33 Spanish ships in Cadiz harbour—an exploit which he called "singeing the King of Spain's beard." He was vice-admiral in the fleet that drove back the Armada from our shores. He died at sea whilst engaged on a less successful expedition. (1540-1596).

SIR FRANCIS DRAKE

Drakensberg Mountains (or *Alma Mountains*), a range of mountains in S. Africa between Natal and Basutoland and the Orange Free State. The highest peak is Mont-aux-Sources, 10,763 ft. high. Majuba Hill, 7,000 ft., is at the Eastern end of the range.

Drake's Teeth, the teeth of the Cadmus slew, and which when sown by him sprang up as a host of armed men, who killed each other excepting the five who became the ancestors of the Thebans, hence the phrase to "sow dragon's teeth," meaning to breed and foster strife.

Drama, a composition in prose or verse, representing human events, fictional or based on history or legend, and consisting of speeches and conversation, put into the mouths of "characters" and intended to be spoken by those impersonating the characters, who at the same time carry out all appropriate and necessary action. European drama began with the introduction of an actor in the Greek choral festivals in honour of Dionysus. This innovation is accredited to Theophrastus in 335 B.C. On this foundation

Greek tragedy grew into a dramatic representation of the myths and legends of ancient Greece. Examples have come down to us in the great dramas of Aeschylus, Sophocles and Euripides. Greek comedy also began with the Dionysian festival, and was mainly rude and boisterous, with allusions to current topics. The later or New Comedy developed with Aristophanes into a satirical comedy of manners and character.

Roman drama imitated the Greek. Plautus and Terence were the best writers of comedy, but with Seneca tragedy became more suitable for declamation than for acting. Through him classical drama influenced European drama at the Renaissance. The classical theory of the dramatic unities (*q.v.*)—unity of time, place and action—was not, however, so much respected by English and Spanish dramatists of the 16th and 17th Centuries as by the French. From the time of Corneille's *Le Cid*, however, the rule of the unities no longer had the force of law. Corneille had no regard for the unity of place and his application of the rule of time led him into extravagant improbabilities.

Long before this, however, medieval drama came into existence in Europe, independent of classical tradition, but owing its origin, like the Greek, to religious ceremony. Plays based on Bible stories—"Mysteries" or Miracle Plays—were acted by the members of the trade guilds of medieval towns. In England cycles of these plays were associated especially with the towns of York, Chester, Coventry and Wakefield during the 14th and 15th Centuries.

In France miracle plays existed much earlier. They were succeeded by the Morality plays, in which the Bible characters were replaced by personifications of abstractions, virtues and vices, etc. They were allegorical, and *Everyman* is the best known of English "moralities."

In the 15th Century the few farcical and non-sacred elements of the mysteries and moralities were developed into a type of play called the Interlude, allied to the French *sofie* or farce of this period. Out of this native drama, combined with the influence of the Renaissance, came the Elizabethan drama—the works of such men as Marlowe, Chapman, Beaumont, Fletcher and Webster being excelled only by Shakespeare. At the same time a more rigid comedy of humours was being written by Ben Jonson, Massinger and others. It was this comedy, combined with the influence of French drama, especially of Molière, that produced the English Restoration Comedy of Wycherley, Etherege and Congreve, followed by the later "comedy of manners" (Goldsmith and Sheridan, etc.), which dominated the theatre for over a century.

The great German tragedians, Goethe and Schiller, and the French romantics, Victor Hugo, De Musset, etc., did not profoundly affect English drama, but when the power of Ibsen was felt in Europe, English drama especially became a closer criticism of contemporary life and more psychological in tendency. There are to-day signs of a departure from the sociological towards the historical and poetic, or at least more spectacular drama.

Dramatic Unities, three rules of construction prescribed by Aristotle, observed by the French dramatists, but ignored by Shakespeare, that (1) a play should represent what takes place within eight hours, (2) there must be no change of locality, and (3) there must be no minor plot.

Drammen, a Norwegian seaport on a Christiania Bay, 23 m. SW. of Oslo (Christiania); trade chiefly in timber. Pop. 28,000.

Drapier, a pseudonym adopted by Swift in his letters to the people of Ireland anent Wood's pence, a protest which led to the cancelling of the patent.

Draughts, a game played on a chess-board with twelve black and twelve white pieces or men on opposite sides. The pieces are placed on each alternate square, and the winner is the side which captures all the pieces of the opposing side. The pieces move forward diagonally, one square at a time, except when capturing a piece, which is done by jumping over any piece the square behind which is unoccupied. Omission to capture a piece when the opportunity offers, involves either "huffing"—*i.e.*, loss of the piece with which the capture ought to have been made, or compulsory revocation. A piece which reaches the last row of squares on the board is crowned a king and can thereafter move either backwards or forwards. The game seems to have been first mentioned in the middle 16th century, and was also called "jeu des dames."

Drave (German *Drau*), a river from the Eastern Alps which flows eastward, and after a course of some 450 m. falls into the Danube. It rises in Carinthia (Austria), flows through the N. of Yugoslavia and for part of its course forms the boundary between Yugoslavia and Hungary. The valley of the Drave was the route taken centuries ago by the invading Huns and Slavs.

Dravidians, races of people who occupied India before the arrival of the Aryans, and being driven S. by them came to settle chiefly in the S. of the Deccan. They are divided into numerous tribes, each with a language of its own, but of a common type or group, some of them literary and some of them not, the chief being the Tamil.

Drawbridge,

originally an adjunct of a castle consisting of a bridge, hinged at one end, which could be let down to give access to the castle, but drawn up to prevent assault. They were usually used to cross the moat.

DRAWBRIDGE

Drayton, Michael, an English poet, born in Warwickshire, one of the three chief patriotic poets, Warner and Daniel being the other two, who arose in England after her humiliation of the pride of Spain, although he was no less distinguished as a love poet. His great work is his *Polyolbion*, in glorification of England, consisting of 30 books and 100,000 lines. It gives in Alexandrines "the tracts, mountains, forests, and other parts of this renowned isle of Britain, with intermixture of the most remarkable stories, antiquities, wonders, pleasures, and commodities of the same digested in a poem." This was preceded by other works, and succeeded by a poem entitled *The Ballad of Agincourt*, pronounced one of the most spirited martial lyrics in the language. (1563-1631).

Dreadnought, the name of a British battleship of nearly 18,000 tons, and about 500 ft. in length, launched in 1906 at Plymouth. It gave its name to a class of modern battleship, and was in fact a synonym for an armored or battleship carrying ten 12-in. guns, and a number of 12-pounder quick-firing anti-torpedo-boat guns, and propelled by steam turbine. See also *Battleship*.

Dream, an image produced on the senses, sensory chart of the mind during the semi-consciousness of sleep. It

has always been disputed whether the mind sleeps or whether a train of ideas is always passing through it at all times. The latter hypothesis involves the assumption that we are continually dreaming when asleep, though only that part of a dream which we experience when half awake survives in our consciousness. It seems more probable that sound sleep is dreamless and that dreams are merely induced by some disturbance such as indigestion or some external cause such as a sudden noise. The interpretation of dreams is the basis of the psychological teaching of Freud, Wundt and other Continental psychoanalysts, who regard dreams as a valuable factor in mental therapeutics.

Dredging, the operation of raising silt, mud, sand and gravel from the bed of a stream or other water to deepen the channel, or to obtain material for ballast, or for filling low grounds. Dredgers are either (a) digging, or (b) suction. Digging dredgers include bucket-ladder chain dredgers, dipper dredgers, and grab dredgers. The stream-dredging machine commonly used in harbours has a succession of buckets on an endless chain around a drum, and the buckets discharge at the stern of the vessel dripping the silt or mud into a lighter. Such machines were first used over a century ago. The dipper dredger has a single bucket at the end of a long arm, and is used chiefly in N. America. The grab is merely a modification of the bucket type, but works largely by the force of gravity. Suction dredgers work either by a continuous tube and centrifugal pump, or with the addition of rotary cutter blades to dislodge the material.

Dred Scott Case, a famous case Supreme Court on the status of slaves, tried in 1857, the slave in the suit being Dred Scott, a Missouri slave, who sued for his emancipation on the ground that his master had broken the status of slavery by removing him to a non-slave state. The Court decided against him on the ground, *inter alia*, that property in a slave was permanent. The decision is regarded as one of the causes of the American Civil War.

Dreiser, *Theodore*, American realistic novelist; wrote *Sister Carrie*, a tale of a fallen woman, in 1900, and followed it with numerous works of which the best known are *The Financier*, *The Titan*, and *An American Tragedy*. (1871-)

Drenthe (or *Drense*), a province of Holland lying between Hanover and the other Netherlands provinces, Groningen, Friesland and Overijssel. The soil is poor, low and marshy, and the population sparse. Area 1,030 sq. m. Pop. 238,000.

Dresden, the capital of Saxony on the Elbe, 111 m. S.E. of Berlin, a fine city, with a museum rich in all kinds of works of art, and called in consequence the "Florence of Germany." Here the Allies were defeated by Napoleon in 1813, this being his last great victory secured at a loss to himself of 10,000 men and to the Austrians, Russians and Prussians of 38,900.

Dreyfus Affair. On Dec. 22, 1894, Alfred Dreyfus, an Alsatian Jew, captain of French Artillery, was by court-martial found guilty of revealing to a foreign Power secrets of national defence, and sentenced to degradation and perpetual imprisonment. He constantly maintained his innocence and in time the belief that he had been unjustly condemned became prevalent, and a revision of the trial being at length ordered, principally through the exertions of Colonel Picquart and Zola, the well-known author, Dreyfus was brought back from Devil's Island, where he had been kept a close prisoner and ill-treated. A fresh trial at Rennes began on Aug. 6, 1899 and

lasted till Sept. 9; the proceedings—marked by scandalous "scenes," and by an attempt to assassinate one of prisoner's counsel—disclosed an alarmingly corrupt condition of affairs in some lines of French public life under the Republic of the time, and terminated in a majority verdict of "guilty." Dreyfus, however, was set at liberty on Sept. 20, the sentence of ten years' imprisonment being remitted. In 1906 he was entirely exonerated and restored to rank as a major in the army. He was promoted Lieutenant-General in 1918, having re-entered the army during the War. The Legion of Honour was conferred on him in 1919. (1860-1935).

Driffeld, *Great*, a market town of the E. Riding, an agricultural centre for the Wolds, with manufactures of oil-cake. Pop. 6,000.

Drift, in geology, a general term for a series of loams, gravels and clays, containing irregularly deposited and variously sized boulders, these boulders being scratched and polished by ice action. It is best exemplified in the Eastern Counties of England and its formation is attributed to glacial action.

Drifter, a fishing-boat, generally about 100 ft. long, with a drift-net—i.e., a fishing-net of about 100 yds. in length for herring, or half that length for mackerel, and corked at the upper edge, which is allowed to drift across the flow of the tide just below the surface of the water (cf. the "trawlers" which trawl the sea-bottom). This method of fishing is particularly used for herring, as herring swim in shoals in mid-stream, whereas bottom-loving fish, such as plaice, can only be caught by trawling. The term is used in particular of a boat with drift-net employed in mine-sweeping.

Drill, the method of training members of the fighting services to military or naval warfare, or instruction in military evolutions. The various movements in military exercises are set out in official physical training manuals of the War Office. A favourite method of drill on the Continent, and in schools in England is "Swedish Drill," or "free movements." No apparatus is used; and there are special exercises for the arms, legs, neck, abdominal muscles and so on. As its name implies, this form of drill began in Sweden.

Drill (tool), a machine tool for boring a hole in metal or stone. A metal-drill works with a rotative action, the tool having at least two cutting edges; a stone drill may also have a reciprocating action, the tool being alternately lifted and dropped.

Drina, a river of Yugoslavia which, rising in the mountains of Montenegro, after a course of 160 m., joins the Save.

Drinkwater, *John*, British poet and playwright. He spent 12 years as an insurance clerk, and founded what became the Birmingham Repertory Theatre. His first volume of verse was published in 1906, and in 1918 came his first play, *Abraham Lincoln*, followed by *Mary Stuart*, *Oliver Cromwell* and *Robert R. Lee*. (1882-1937).

Driver, *Samuel Rellies*, Regius Professor of Hebrew, Oxford University, and Canon of Christ Church, was born at Southampton; wrote commentaries on several books of the Old Testament and an introduction to its literature. He was on the Old Testament Revision Committee, 1876-1884. (1846-1914).

Driving, the art or act of guiding a carriage or other vehicle drawn by horses; or the art of regulating and managing a steam engine or mechanically propelled vehicle of any kind. There is, of course, no relationship between driving horses and driving mechanically propelled

vehicles. Driving a tandem or a four-in-hand is an art which requires not only much practice but the possession of the quality known as "good hands," a quality which involves the ability to use reins without irritating the horse's mouth. Driving a motor-car in Great Britain involves taking out a licence (5s.) and passing severe tests under the Roads Act. Bus-drivers and taxi-drivers also undergo searching tests before being licensed to drive their vehicles. In Great Britain drivers keep the left-hand side of the road.

Drogheda, a seaport in Co. Louth, Ireland (Eire), near the mouth of the Boyne, 32 m. N. of Dublin, with manufactures and a considerable export trade; was stormed by Cromwell in 1649 after a stout resistance, and the garrison put to the sword; surrendered to William III. after the Battle of the Boyne in 1690. Pop. 12,000.

Droitwich, market town and spa of Worcestershire, England. Its brine springs or wyes, are valuable for rheumatic disorders. Pop. 4,500.

Drôme, a mountainous inland dept. of on the Rhône. Chief industry is agriculture, wheat, olives, fruit and wines, being produced. Area 2,532 sq. m. Pop. 287,000. Cap. Valence.

Dromedary, the Arabian camel; differs from the Bactrian camel in having a single hump, the latter two, on its back. The name is often applied indiscriminately to all one-humped camels, but, strictly, denotes only the swift riding species.

DROMEDARY

Dromore, a cathedral town in Co. Down, Northern Ireland, 17 m. SW. of Belfast, of which Jeremy Taylor was bishop.

Dronfield, town of Derbyshire, England, 6 m. S. of Sheffield. It has collieries and iron and steel goods are made. Pop. 4,500.

Dropwort, the common name for the plant *Spiraea* (or *Ulmaria*) *Filipendula* of the order Rosaceae, occurring in dry pastures in England. It bears small white flowers not unlike those of the meadow-sweet. Water-dropwort is the common name for a poisonous species of plant of the genus *Enanthe* of the Umbelliferae order.

Drouet, Jean Baptiste, French Revolutionary, a notable and violent Jacobin, and member of the Council of the Five Hundred; had been a dragon soldier; was postmaster at St. Menesbould when Louis XVI., attempting flight, passed through the place, and by whisper of surmise had the progress of Louis and his party arrested at Varennes, June 21, 1791. (1763-1834).

Drouet, Jean Baptiste, Comte d'Erion, Marshal of France, born at Republic and the Empire. On Napoleon's return from Elba seized on the citadel of Lille, and held it for the emperor; commanded the first corps d'armée at Waterloo; left France at the Restoration; returned after the July Revolution; became governor of Algiers, and marshal. (1765-1844).

Drought, want or absence of rain over a prolonged period. According to Symonds's *British Rainfall*, a drought begins, in England, after a fortnight "without measurable rain." London has periodically

experienced droughts in recent summers, with the result that the Metropolitan Water Board has used temporary expedients to seek out existing supplies; but probably the remedy lies in a more modern reservoir system for a metropolis which has long outgrown its present system.

Drowning, the act of suffocating in water, or the state of being drowned. Death from drowning shows itself in cessation of the heart's action and of respiration, half-closed eyelids, dilated pupils and frothy mucus on the lips and nostrils. The two objects to be aimed at where there is hope of resuscitation are, first to restore breathing, and secondly to induce warmth and circulation. See *Artificial Respiration*.

Droylsden, urban district of Lancashire, England, 4 m. E. of Manchester, with dye, chemical, cotton and print works. Pop. 13,000.

Droz, Antoine Gustav, a highly popular Paris, and brilliant novelist, born in Paris, grandson of Jean Pierre Droz, a medal engraver, (1746-1833); author of *Monseigneur, Madame, et Bébé*; *Entre Nous* and *Le Cahier bleu de Mlle. Cibot*. (1832-1895).

Drug, any substance, mineral, vegetable in physics, or animal, used as an ingredient in physics, or in the preparation and composition of medicines. Under the Sale of Food and Drugs Acts a drug is defined as a medicine for internal or external use; but what actually constitutes a drug, other than specified narcotics and poisons, are matters of fact to be determined by evidence before a magistrate on a summons.

Druggist, one who deals in drugs in the business is now generally combined with that of the apothecary, who compounds and prepares drugs; such persons must have passed the examinations presented by the Pharmaceutical Society and be registered as pharmaceutical chemists. Any drug which contains a poison must be so labelled, and particulars of sale entered in a register kept for that specific purpose.

Druids, a sacred order of learned men under a chief called the Arch-druid, among the ancient Celtic nations, particularly of Gaul and Britain, who, from their knowledge of the arts and sciences of the day, were the ministers of religion and justice, as well as the teachers of youth to the whole community, and exercised an absolute control over the unlearned people whom they governed. They worshipped in oak groves and the oak tree and the mistletoe were sacred to them. The heavenly bodies appear to have been also objects of their worship, and they presumably believed in the immortality and transmigration of the soul; but they committed nothing to writing, and for our knowledge of them we have to depend on legend and the reports of others.

Drum, a musical instrument formed by heads of a wooden cylinder or over a bowl-shaped metallic vessel. The chief varieties are the common or side-drum played with two sticks and carried at the drummer's side; kettle drum, a metal hemisphere with parchment stretched across the mouth with screws for tuning; and the bass drum, played with two sticks with padded heads. The tom-tom is a primitive form of drum, and is still much used in W. Africa.

SIDE-DRUM

Drumclog Moss, a flat wilderness of broken bog and quagmire in Lanarkshire, Scotland, where

the Covenanters defeated Claverhouse's dragons in 1679.

Drummond, Henry, popular scientist and Christian teacher, born at Stirling; was educated at Edinburgh; studied for the Free Church; lectured on natural science in Glasgow and appointed professor at the Free Church College; became famous by the publication of *Natural Law in the Spiritual World*, a book which took with the Christian public at once, and had an enormous sale, being succeeded by *Tropical Africa*, a charmingly written book of travel, and by a series of booklets, commencing with *The Greatest Thing in the World*, intended to expound and commend the first principles of the Christian faith. His last work, except one published posthumously, entitled *The Ideal Life, was the Ascent of Man*, in which he poises an altruistic element in the process of evolution, and makes the goal of it a higher and higher life. (1851-1897).

Drummond, Captain Thomas, civil engineer, born in Edinburgh; inventor of the Drummond Light; was employed in the trigonometrical survey of Great Britain and Ireland; became Under-Secretary for Ireland, and was held in high favour by the Irish. (1797-1840).

Drummond, William, of Hawthornden, a Scottish poet, called the "Petrarch of Scotland," born in Hawthornden; studied civil law at Bourges, but poetry had more attractions for him than law, and on the death of his father he returned to his paternal estate, and devoted himself to the study of it and the indulgence of his poetic tastes. His work was done in the reign of James I., but is the result of the Elizabethan influence extending to Scotland; his sonnets and madrigals have some of the grace of Sidney, and he occasionally rose to noble verse, as in his sonnet on John the Baptist. He was a devoted Royalist. His first poem was *Tears* on the death of James I.'s eldest son Henry, and the fate of Charles I. is said to have cut short his days. (1585-1649).

Drummond Light, an intensely pure white light produced by the play of an oxyhydrogen flame upon a ball of lime, so called from the inventor, Captain Thomas Drummond.

Drunkenness, or inebriety, the term the habit of being under the influence of drink. The general term includes all stages from mental excitement to dipsomania (q.v.) and chronic alcoholism, resulting in the brain-fever of drunkards, or delirium tremens and grave nervous disorders, cirrhosis of the liver, distension of the legs and abdomen, etc. In law drunkenness does not necessarily affect a man's civil capacity nor does it exculpate from crime, though it may in certain cases be taken into account in considering intention.

Drury Lane, a celebrated London theatre founded in 1683, in what was then a fashionable quarter of the city; has since that time been twice burnt down and three times rebuilt; was the scene of Garrick's triumphs, and of those of many of his illustrious successors, as Kemble, Keen and Macready, though it is now given up chiefly to spectacular musical plays.

Druses, a peculiar people, numbering of Lebanon and Antilebanon, with the Maronites on the N., whose origin is very uncertain, only it is evident, though they speak the Arab language, they belong to the Aryan race. Their religion, a mixture of Christian, Jewish and Mohammedan beliefs, is grounded on faith in unity and the incarnation of God. Their form of government is half hierarchical and half feudalistic. In early times they were under emirs of their own, but in consequence of U.E.

the sanguinary, deadly and mutually exterminating strife between them and the Christian Maronites in 1860, they were put under a Christian governor appointed by the Porte. This brought their political importance to an end. Some migrated, but some remained, keeping themselves apart as a community. In 1925 they revolted against the French, who held the Mandate over Syria, but the Syrian Nationalist revolt which followed was suppressed with the utmost rigour after the Druses themselves had inflicted some severe reverses on the French.

Drusilla, Livia, wife of the Emperor Tiberius Claudius Nero, her elder son by whom, Tiberius, succeeded Augustus. Divorced at command of Augustus when, to marry her, he divorced his wife Sebonia. Suspected of death of Augustus's grandsons. Dominated Tiberius. (c. 55 B.C.-29 A.D.).

Drusus, Marcus Livius, a tribune of the people at Rome in 122 B.C., but a supporter of the aristocracy; after passing a veto on a popular measure proposed by Gracchus his democratic colleague, proposed the same measure himself in order to show and prove to the people that the patriots were their best friends. The success of this policy gained him the name of "patron of the Senate."

Drusus, Marcus Livius, Roman tribune, 91 B.C., son of the preceding, and an aristocrat; pursued the same course as his father, but was baffled in the execution of his purpose, which was to broaden the constitution, and admit the Italians to citizenship, in consequence of which he formed a conspiracy, and was assassinated, an event which led to the Social War (q.v.).

Drusus, Nero Claudius, surnamed "Germanicus," younger brother of Tiberius, and son-in-law of Mark Antony; distinguished himself in four successive campaigns against the tribes of Germany, but stopped short at the Elbe. He was thrown from his horse, and died 30 days later. His brother, the Emperor Tiberius, hastened across the Alps and brought home his body. (38-9 B.C.).

Dryads, or *Hamadryads*, in Greek mythology, ology, nymphs of forest trees, which were conceived of as born with the tree they were attached to and dying with it. They had their abode in wooded mountains away from men, held their revels among themselves, but broke them off at the approach of a human footstep.

Dryburgh, an abbey, now a ruin, Tweed, in Berwickshire, Scotland, 4 m. S.E. of Melrose; burial-place of Sir Walter Scott.

Dry-cleaning, or cleansing of textile fabrics without the use of water. The substances employed include petrol, alcohol, acetone and various tetrachlorides, all of which have the property of rendering grease or fat soluble and thereby making its removal easy. Other dirt which may still remain is removed by vacuum extractors.

Dryden, John, a celebrated English poet, born in Northamptonshire, of a good family of Puritan principles; educated at Westminster School and Trinity College, Cambridge. His first poetic production of any merit was a set of "heroic stanzas" on the death of Cromwell. At the Restoration he changed sides and wrote a poem which he called *Annus Restitutus* in praise of the event, which was ere long followed by his *Annus Mirabilis*, in commemoration of the

JOHN DRYDEN

year 1686, which revealed at once the poet and the royalist, and gained him the appointment of poet-laureate. Prior to this and afterwards he produced a succession of plays for the stage, which won him great popularity, after which he turned his mind to political affairs and assumed the rôle of political satirist by production of his *Abesalom and Achitophel*, intended to expose the schemes of Shaftesbury, represented as Achitophel, and Monmouth, as Abesalom, to oust the Duke of York from the succession to the throne. On the accession of James II. he became a Roman Catholic, and wrote *The Hind and the Panther*, in defence of the Church of Rome. At the Revolution he was deprived of his posts, but it was after that event he executed his translation of Virgil, and produced his celebrated odes and *Fables*. (1631-1700).

Dry-farming, a special method of where rainfall is scanty. It involves essentially doing everything to conserve what moisture the soil does contain, and this is effected by tilling in the summer in alternate years, by the extirpation of all moisture-absorbing weeds and substances and by covering the soil with wet straw and leaves so as to counteract evaporation. Wheat is the chief crop of areas cultivated by dry-farming. It is practised chiefly in the U.S.A., Canada and W. Australia.

Dry Rot, decay in wood due to certain kinds of fungus which, in some conditions of heat and damp, attack the woodwork in dwelling-houses or the timber of ships, eating into the wood in all directions and reducing it to powder. It may occur through using insufficiently dried timber for building.

Duala, seaport and railway centre of W. Africa, in the French Cameroons, on the Cameroons R. It was taken from the Germans in 1914. Pop. 30,000.

Dualism, or *Manichæism*, the doctrine independently existing principles which go to constitute every concrete thing throughout the universe, such as a principle of good and a principle of evil, light and darkness, life and death, spirit and matter, ideal and real, yea and nay, God and Devil, Christ and Antichrist, Ormuzd and Ahriman.

Du Barry, XV., born at Vaucouleurs, daughter of a dressmaker; came to Paris, professing millinery; had fascinating attractions, was introduced to the King and installed as favourite; exercised great influence. After Louis's death she lived in retirement until the Revolution, when she fled to England, but on returning thence was arrested, brought before the tribunal, condemned for wasting the finances of the State, and guillotined. (1746-1793).

Dublin, capital of Eire (Ireland), in Co. Dublin, Leinster, on Dublin Bay. It stands at the mouth of the Liffey, which divides it into two, and is crossed by 13 bridges. There is a good harbour, recently improved, and railway and canal connexion with the rest of Ireland. Dublin has a famous university (Trinity College), two Protestant Cathedrals, founded in the 11th and 12th Centuries, a Catholic Cathedral and a Castle, formerly the residence of the Lord-Lieutenant. In Phoenix Park it has famous public pleasure grounds. One of the finest streets is O'Connell Street (formerly Sackville Street), which suffered severely from bombardment and fire in the risings of 1816 and 1822. The G.P.O., the Customs House and the Four Courts (law courts) were destroyed, but have been rebuilt. The city is marred by slums, but in 1936 the City Corporation had schemes of improvement under consideration. The chief industries are the making of poplin, whiskey and porter (Guinness). Pop. 467,000.

Dubois, Guillaume, Cardinal and Prime Minister of France; notorious for his ambition and his debauchery; appointed tutor to the Duke of Orleans; encouraged him in vice, and secured his attachment and patronage in promotion, so that in the end he rose to the highest honours, and influence, in both Church and State; notwithstanding his debauchery he was an able man and an able minister. (1656-1723).

Dubrovnik, seaport and city in Yugoslavia, on the Adriatic; an Austrian town before the World War, under the name Ragusa; in the 16th Century an important centre of South Slavonic literature and art; pop. c. 13,000.

Du Cange, Charles du Fresnoy, one of the most erudite of French scholars, born at Amiens, and educated among the Jesuits; wrote on language, law, archaeology and history; devoted himself much to the study of the Middle Ages; contributed to the rediscovery of old French literature, and wrote a history of the Latin empire; his greatest works are his *Glossaries of Medieval Latin and Greek*. (1610-1688).

Ducat, a coin, generally in gold, that circulated in Venice, and was current in Germany after 1559 and in other European countries. It was worth about ten shillings.

Du Chaillu, Paul Belloni, an African equatorial region of W. Africa, which resulted in an extension of our knowledge of its geography, ethnology and zoology, and particularly of the character and habits of the ape tribes, especially the gorilla. (1835-1903).

Duck, the popular name given to various birds of the family Anatidae, and especially to those of the two sub-families Anatinae and Filligulinae, the former being called, by some, River ducks, or True ducks, and the latter Sea ducks. The Anatinae have a broad, lengthened bill, nostrils basal, very short legs, and hinder toe slightly lobed, and are migratory. They build nests near freshwater lakes, and among reeds and sedges. The Filligulinae are distinct in having the hinder toe very broad. Among the numerous species of Sea Ducks are the Elder.

Duck-billed Platypus, a name

Ornithorhynchus or Platypus, an aquatic, furred mammal, native of Australia. It has powerful fore-feet for burrowing, and a bill like a duck.

*DUCK-BILLED PLATYPUS

The young are hatched from eggs. **Ducking-stool**, a stool or chair in otherwise offending woman in England was securely fastened and set before her own door to be pelted at, or borne in a tumble through the town to be jeered at, or placed at the end of a see-saw and ducked in a pool. Dishonest brewers and bakers were also so punished. They disappeared from use at the beginning of the 19th Century.

Duckweed, the common name of four of the genus *Lemna*, order Lemnaceae, common in Britain and found floating on water, especially stagnant water. The plant consists of a flattened green leaf or stem from which a long root hangs downwards in the water.

Ductility, the property of substances, especially of metals, which renders them capable of being extended by hammering or drawing without breaking.

Ductless Glands, the endocrine in the human body, comprising the thyroid.

parathyroids, pancreatic islets, adrenals, sex glands, pituitary, spleen and thymus. They produce various internal secretions, called hormones, which enter the blood. Metabolism and the functioning of other glands largely depend on them.

Dudley, the largest town in Worcester-shire, England, 8½ m. NW. of Birmingham, in the heart of the "Black Country," with coal-mines, ironworks and hardware manufactures. Pop. 60,000.

Duel, a pre-arranged fight with weapons and, according to rules between two persons to settle a personal grievance between them. It is not to be confused with single combat between champions (e.g., Achilles and Hector). The origin of duelling is probably to be found in the trial by ordeal prevalent among Germanic peoples in the Middle Ages. Out of this developed the judicial combat between accused and accuser. The further development of the judicial combat into the private duel first took place in Italy, and in the 15th Century spread to France. Duelling was practically extinct by 1900, but in four centuries many thousands of duels were fought. In England duelling was abolished by Act of Parliament in 1818, and is now illegal. In some other countries it has also been suppressed. In Germany the student duels of the 17th Century, revived in the 19th, are especially noteworthy.

Duet, a musical composition for two singers or instrumentalists. Also a composition intended to be performed so.

Dufferin and Ava, first Marquis of, diplomatist; held office under Lord John Russell and Mr. Gladstone; was in succession Governor-General of Canada, ambassador first at St. Petersburg, then at Constantinople and Viceroy of India; secured the annexation of Burma; later he was ambassador at Rome and Paris; created an earl in 1871 and Marquis in 1888 (1826-1902).

Duffy, Sir Charles Gavan, an Irish patriot, born in Co. Monaghan; trained for the Bar; took to journalism in the interest of his country's emancipation; was one of the founders of the *Nation* newspaper; was twice over-ruled for sedition, but acquitted; emigrated at length to Australia, where he soon plunged into Colonial politics, and in his political capacity rendered distinguished services to the Australian colonies, especially in obtaining important concessions from the mother-country; wrote *The Ballad Poetry of Ireland*, and an interesting record of his early experiences in *Young Ireland*. (1816-1903).

Dugdale, Sir William, antiquary, born in Warwickshire; was made Chester herald; accompanied Charles I., throughout the Civil War; at the Restoration was appointed Norroy King-at-Arms; and later Garter King-at-Arms. His chief work was the *Monasticon Anglicanum*, which he executed conjointly with Roger Duckworth; wrote also on the antiquities of Warwickshire and heraldry; left 27 folio MSS. now in the Bodleian Library. (1605-1686).

Dugong, or *Halicore*, a genus of aquatic mammals of the order Sirenia.

They have two tusk-like incisors and a whale-like tail with a nearly straight hind edge. They are found on the coasts of the

DUGONG

Indian Ocean from the Red Sea to Australia, and are said to be the origin of the mermaid legends. There are three species—viz., the Red-Sea Dugong (*Halicore tabernaculi*), the Australian (*H. australis*) and the Indian (*H. dugong*).

Du Guesclin, Bertrand, constable of France, born in Cotes du Nord; one of the most illustrious of French war-captains, and distinguished as one of the chief instruments in expelling the English from Auvergne, Quenne and Poitou; was taken prisoner at the Battle of Auray in 1364, but ransomed for 100,000 francs, and again by the Black Prince, but soon liberated. He was esteemed for his valour by foe and friend alike, and was buried at St. Denis in the tomb of the kings of France. (c. 1320-1380).

Duhamel, Georges, French novelist. By his profession a doctor, he made his mark in literature with *Vie des Martyrs*, published in 1916, and *Civilisation* in 1917, calm, dispassionate revelations of modern war. His later novels include *Confession de Minuit* and the *Salavin* trilogy, his greatest contribution to literature. (1844-).

Duiker, or *Duikerbek*, a genus of small antelopes of S. Africa, some of them being very little larger than a rabbit. They live in thick forest. The name is given in particular to the *Cephalophus grimmii*, and refers to the way it threads its way through wooded country.

Duilius, Gaius, a Roman consul, distinguished for having on the coast of Sicily gained the first naval victory recorded in the annals of Rome, 260 B.C., mainly by the use of grappling-irons and boarding-bridges which he invented.

Duisberg-Hamborn, town and river-port of Germany, on the Rhine, near the Ruhr; coal-field, with iron, chemical, textile and machine-making industries. It was occupied by the French, 1921-1925. Pop. 440,419.

Duke, a title of nobility, being the highest in the English peerage. Four members of the Royal family to-day hold the title of Duke—viz., the Dukes of Gloucester, Kent, Connaught and Strathearn, and Windsor. The word is derived from the Latin *Dux*, meaning a leader, and in particular a military leader. The title originated in the Roman Empire. The first grant of a duchy in England was of Cornwall (q.v.) to the Black Prince in 1337 and was made for the support of the King's eldest son. The Duchy and County Palatine of Lancaster was created in 1377, but the estates have vested in the Crown since 1399.

Dukeries, The, a district near Worksope in Nottinghamshire, England, where are situated Clumber Park and Welbeck Abbey, residences of the Dukes of Newcastle and Portland, as well as Worksope Manor and Thoresby House.

Dukhobors, or *Doukhobors*, a religious community in Russia of Quaker principles, and of a creed that denied the doctrine of the Trinity and the divinity of Christ. They became a cause of trouble to the empire by their fanaticism, and were removed to a high plateau in Transcassania, where they live by cattle-rearing. There are communities of this sect in Western Canada, where their peculiar views frequently bring them into conflict with the authorities.

Dukinfield, municipal borough of Cheshire, England, 6 m. E. of Manchester. Coal-mining, iron-working, calico-printing, cotton-making, etc., are carried on. Pop. 19,000.

Dulac, Edmund, artist, born at Toulouse; naturalised British, 1912. Mainly an illustrator, especially of Arabian Nights, Omar's *Rubaiyat* and Poe's poems. Exhibited at Leicester Galleries, London, since 1907. (1882-).

Dulcimer, a medieval stringed instrument, prototype of the pianoforte, derived from the East through the Crusades; consisted of triangular wooden frame with strings on tuning-pins stretched

over a sound-chest. It was played by striking with hammers.

Dulong, Pierre Louis, a French chemist, born at Rouen; discoverer, by accidental explosion, of the chloride of nitrogen. He was also distinguished as a physicist, investigating in particular the theory of heat. (1785-1838).

Dulse (*Rhodomenia palmata*), a widely distributed, reddish-brown seaweed, eaten dried and uncooked by peasants on Scottish and W. Irish coasts.

Duluth, a port on Lake Superior in Minnesota, U.S.A.; has a fine harbour and is a great centre of commerce. Pop. 101,000.

Dulwich, a southern Surrey suburb of London, with a flourishing college, opened in 1619, and a picture-gallery attached, rich especially in Dutch paintings. The College now comprises two schools, Dulwich College and Alleyn's School.

Duma, the name of the House of Representatives in the former Russian Empire, first granted in 1905 by the Czar Nicholas II. and functioning until the revolution of 1917. In that period there were four Dumas, the first two having a short existence only.

Dumas, Alexandre, The Elder, a celebrated French author, born at Villiers-Cotterets, son of General Dumas, a Cripple; lost his father at four, and led for a time a miscellaneous life, till, driven by poverty, he came to Paris to seek his fortune. Here he soon made his mark, and became the most popular dramatist and romancer of his time. His romances are numerous, and he reached the climax of his fame by the production of *The Count of Monte Cristo* in 1844, and the *Three Musketeers* the year after. He was unhappy in his marriage, and squandered his fortune in reckless extravagance. Before the end it was all spent, and he died at Dieppe, broken in health and impaired in intellect, ministered to by his son and daughter. He was the author of a large number of immensely popular works, in the production of which he had some help. (1802-1870).

Dumas, Alexandre, The Younger, or *fils*, Paris, natural son of the preceding. He made his debut as a novelist with *La Dame aux Camélias* in 1848, which was succeeded by a number of other novels. He eventually gave himself up to the production of dramas of a slightly didactic nature, including *Les Idées de Madame Aubray*, *La Femme de Claude* and *Diane de Lys*, on which his reputation chiefly stands. (1824-1895).

Dumas, Jean Baptiste André, a distinguished French chemist, born at Alais. At the Revolution of 1848 he became a member of the National Assembly; was created a senator under the Empire, but retired into private life after Sedan. He was distinguished for his studies in chemistry, both theoretical and practical, and ranks among the foremost in the science. He invented a method of obtaining vapour densities at high temperature and applied it to mercury, iodine, phosphorus and sulphur. He also discovered chloroacetic acid. (1800-1884).

Du Maurier, George Louis, born in London as a designer of wood engravings; did illustrations for *Once a Week*, the *Cornhill Magazine*, etc., and finally joined the staff of Punch, to which he contributed numerous clever sketches. He published a novel, *Peter Rabbit*, in 1891, which was succeeded in 1894 by *Trilby*, which had a phenomenal success in both England and America. (1834-1896).

Du Maurier, Sir Gerald, actor-manager, younger son of George Du Maurier; went on stage, 1894, at the Garrick, in *An Old Jew*; acted with

Forbes Robertson and Tree; with Frank Curzon, managed Wyndham's Theatre, 1910-1935; appeared in many of Barrie's plays; "created" Mr. Darling and Captain Hook in *Peter Pan*. Knighted 1932. (1873-1934).

Dumbarton, the county town of Dumfrieshire, Scotland, and a royal burgh, at the mouth of the Leven, on the Clyde, 15 m. from Glasgow; shipbuilding the chief industry. It was the capital of the kingdom of Strathclyde. Adjoining is a castle of historic interest, 250 ft. high, kept up as a military fortress. Pop. 21,500.

Dumbartonshire, a county of Scotland, originally part of Lennox. It is traversed by the Leven, borders on Loch Lomond on the E. and on the Clyde in the S., is mountainous in parts, elsewhere fertile and is engaged in agriculture, shipbuilding, etc. Area 246 sq. m. Pop. 147,700.

Dum-Dum, a town in Bengal, India, 6 m. N.E. of Calcutta; a military post with a small-arms factory whence came the dum-dum bullet. It was here in 1857 that the sepoys first mutinied.

Dumfries, an agricultural market town of Scotland, county town of Dumfriesshire and a seaport, stands on the left bank of the Nith, with Maxwelltown as suburb on the right; manufactures tweeds and hosiery, and trades in cattle. Here Robert Burns spent the last five years of his life, and his remains lie buried. Pop. 19,000.

Dumfriesshire, a S.W. Border county of Scotland; an agricultural district, which slopes from a northern pastoral region to the Solway Firth, and is traversed by the fertile valleys of Nithsdale, Annandale and Eskdale. The rearing of sheep, cattle, pigs and horses, is the chief pursuit, and sheep, cattle, grain, wool and skins are exported. Area 1,000 sq. m. Pop. 81,000.
